(NOTE.—As per report of Farm Loan Bureau of the Treasury Department, as of February 29, 1928, farmers had paid for $61,482,997.50 of the capitalization of the 12 Federal land banks and had paid for $717,440 of the capitalization of the same banks on loans made direct to these banks through agents, while individual farm borrowers had subscribed $115 to the stock. The Federal Treasury held $710,651 of the stock, the total capitalization of the banks being reported as $62,911,203.50. Economists wonder why the Federal Treasury has nearly three-quarters of a million of the peoples' money tied up in a strictly class banking institution, in view of the alleged need of money to tide over (?) the Coolidge administration's so-called "economy"(?) campaign? Why has not this money long since been devoted to reduction of taxes and the farmers' money used to fully repay to the Treasury this advance?)

WHY IS IT THAT FARMER OWNERS OF THE 12 LAND BANKS ARE DEPRIVED OF THEIR PROPERTY RIGHTS AS ENJOYED BY ALL OTHER CAPITAL STOCK OWNERS IN THE UNITED STATES?

Why?

In any normal corporation the holder of securities automatically receives by mail an annual financial statement which deals with that enterprise and no other. Farmers who hold stock in the 12 district land banks receive no annual report without solicitation. If they send to the Federal Farm Loan Board or the Superintendent of Documents in Washington for information they receive a pamphlet of about 50 pages addressed, as required by statute, to Congress, not to stockholders.

(NOTE.—In 1927 the Secretary of the Treasury withheld issuance of this report to Congress, as required by the farm loan act of 1916, until after Congress had adjourned, though in previous years the Farm Loan Bureau's report had always been released early in January. By thus withholding the release date of the report for about five months, Mellonized political plunders were able to safely avert a scandal in the maladministration of the 12 district land banks. They are playing the same game this session of Congress—the report is about five months late at this writing—May 1, 1928.)

GIVE FACTS, NOT JUMBLED-UP FIGURES

This contains a consolidated statement of the assets and liabilities of the 12 district land banks, in which the figures are lumped. It does not give separately financial statements showing the exact condition of each land bank, although complete separate statements are necessary to judge the welfare of the system. Since the farm loan is so organized that the liabilities or losses of one bank are in the end the liabilities and losses of the other 11, every stockholder has a right to demand this information. Every investor in farm-loan bonds would be protected by such publicity.

EVEN AN EXPERT CAN NOT UNDERSTAND THE FARM LOAN BUREAU'S REPORT—HOW CAN THE FARMER-OWNER OR THE BOND BUYER BE EXPECTED TO FIND ANY SENSE IN THE REPORTS?

This annual report of the Federal Farm Loan Board to Congress covers not only the billion-dollar Federal land banks system but includes also the annual statements of 50 joint-stock banks and a third system of the dozen Government-owned Federal intermediate-credit banks, sixty-odd more banks which have practically a second billion of assets. All three are discussed in the report, to the confusion of any but an expert in farm credits. Even for such an expert or an accountant the information given is wholly inadequate.

FARMER NOT SUPPOSED TO KNOW WHAT IS GOING ON!

If this report is not sufficient for such an expert to comprehend, the stockholder on the farm may conclude that he is not supposed to understand it. Yet—here is the predicament shared by close to 400,000 farmers—to get his loan he was compelled under the act to purchase stock in the land bank of his district. This was justifiable because farmer stockholders were guaranteed control. They were not permitted complete self-management as in all true cooperatives, but they were assured the right to elect the majority of the directors of the land bank in which they owned stock.

HOW FARM LOAN BUREAU TRICKED CONGRESS AND STOLE THE FARMERS' FEDERAL LAND BANKS

In 1923, upon the recommendation of the Federal board, the law was amended. Without the full knowledge of Congress stockholders were deprived of majority control, having thereafter the right to elect only the minority of each land-bank board.

FARMERS NOW OWN OVER $61,000,000 OF BANK STOCK, THOUGH THE COOLIDGE POLITICIANS COMPLETELY DOMINATE THEIR PROPERTY, DEPRIVING THE FARMERS OF EVERY CONSTITUTIONAL RIGHT TO MANAGE THAT WHICH THEY HAVE PAID FOR IN FULL AND WHICH THEY NOW OWN

To create the farm-loan system farmers pooled lands worth close to two and a half billions as security for a billion of outstanding loans. They put up hard cash in addition, fifty millions of it. Yet the dissemination of essential information was not assured, nor were stockholders encouraged to feel that they owned their banks and had free rein in their local farm-loan associations.

FARMERS NOT GIVEN STOCK CERTIFICATES AS ARE OTHER BANK STOCK OWNERS

When they became members of the system, bought stock, and received their loans they were given no certificates of stock. Individually they had nothing except a receipt for money paid to show that they had actually invested in the system.

FARM LOAN BUREAU HAMSTRINGS FARMERS WITH RED-TAPE RULES WHICH DEPRIVE THEM OF ORGANIZATION TO SAFEGUARD THEIR PROPERTY FROM NEFARIOUS POLITICIANS AND SELFISH MONEY INTERESTS

Upon the advice of the Federal Farm Loan Board the local associations generally employed nonstockholders, bankers or business men, as secretary-treasurers. Compared with the work of this position the pay was small. Secretaries were not primarily disposed to make a business of disseminating even such information about Federal farm-loan affairs as they received. The stockholders have been prohibited by the Federal Farm Loan Board from supporting out of the funds of their own local associations a national federation through which they could voice organized opposition to anything they considered either a neglect or an abuse of power.

FARM LOAN BUREAU SPEND FARMER'S CASH AND GIVE HIM NO STATEMENT OF ITS USE—NO STATEMENT GIVEN OF MORE THAN $500,000 SPENT—FISCAL AGENT'S OFFICE A LAW UNTO ITSELF THOUGH USING FARMER'S MONEY IN LARGE SUMS—"WHERE DOES MY MONEY GO?" ASKS THE FARMER OWNER, BUT RECEIVED NO ANSWER

Without the general knowledge of the farmers who foot the bill, the expenses of the Federal Farm Loan Board in Washington have swelled to more than a half million dollars annually. If stockholders sent to Washington for the annual report, they would not have found in it this item nor any statement of the expenses of the fiscal agent, his staff, and the offices for which farmers pay the rent.

FARMERS PAY HUNDREDS OF THOUSANDS OF POLITICIANS' SALARIES, YET KNOW NOTHING OF THE COST TO THEM OF THESE PILLAGERS

Farmers pay many hundreds of employees throughout this system who are political appointees, yet as stockholders have no uncontested way of finding out what it costs to maintain this huge force, including 600 appraisers and examiners constantly traveling over immense districts.

WOULD LIKE TO MAKE "ANDY" BIG BOSS

The Federal board, nominally a bureau of the Treasury but privately paid, has for years engaged the usual Treasury rules of monthly audit. The McFadden-McLean bill, just proposed at time of going to press, would transfer to the Secretary of the Treasury control of financial policies of the farm-loan system and administration of an essential part of the political patronage. The Federal board, deprived of certain powers, is to be left intact. Farmers will still pay all the bills of political management and be further taxed without additional and just representation or increased control.

UNCLE SAM IS MORALLY IN POSITION OF TRUSTEE FOR THOSE FROM WHOM CONGRESS STOLE PERSONAL PROPERTY AND RIGHTS TO ITS MANAGEMENT

Under such conditions it may be seen that the importance of information about all and every expenditure is greater than in the case of stockholders in ordinary corporations. Uncle Sam is morally in the position of trustee for those whom Congress has deprived of power to help themselves.

TIME TO STOP "HIDDEN SECRET" OPERATION OF A NATIONAL INSTITUTION—GIVE OWNERS AND BONDHOLDERS AN HONEST STATEMENT

The Federal Farm Loan Board can be a model in the matter of giving stockholders essential information. In language a layman could understand it might render a model service. In this great cooperative credit pool the bonds are all sold through a syndicate. An annual report should provide stockholders and bond buyers with a record of all

agreements under which these bonds are distributed. It should furnish a list of the investment houses participating in the sale of each and every issue. It should give the exact report of commissions or bonuses received. A separate statement of the assets and liabilities of each bank should supplement the present consolidated statement in the annual report. Additional information should cover the following points for each land bank for each fiscal year:

1. Gross earnings.
2. Deductions:
   Interest.
   Commissions and expense of sale of bonds.
   Operating expenses.
3. Net earnings.
4. Disposition of net earnings:
   Dividends paid.
   Carried to reserve account.
   Carried to suspense account.
   Undivided profits.
5. Dividend rate for each dividend payment.
6. Amount of stock upon which each dividend rate was paid.

DEPRIVE OWNERS OF RIGHTS AND INFORMATION FREELY GIVEN BY SUCCESSFUL PRIVATE CORPORATIONS OF THE COUNTRY—WHY?

Prof. W. Z. Ripley considers the financial and general reports of the United States Steel and General Electric corporations the best in the country. Why should not stockholders of the Federal farm-loan system get treatment equal to that furnished by the security holders of these private corporations? Certainly no right of control or management to which corporations are entitled should be denied to cooperative enterprises capitalized entirely with farmers' money.

AS LONG AS POLITICIANS RUN THAT WHICH PRIVATE PROPERTY OWNERS REALLY OWN, EVERY TAXPAYER HAS SOMETHING AT STAKE

So long as politically appointed men run a system which controls a lending power too vast to realize, extending over the entire country, every ordinary citizen has something at stake. If we are to marry political control to lending power we must guard against the development of the danger of government by secrecy.

ALL PROSPERITY AND PROGRESS HINGES ON GETTING THE FARM-LOAN SYSTEM OUT OF THE HANDS OF POLITICIANS AND INTO THE HANDS OF THE RIGHTFUL OWNERS—THE FARMERS WHO HAVE PAID FOR THE CAPITAL STOCK OF THE 12 FEDERAL LAND BANKS

If well administered, the Federal farm-loan system should increase agricultural prosperity, which supports all other industries. If not properly administered, such a system may prove detrimental to farmers and to other industries, introducing a new, subtle, perilous condition in politics.

Hence, it is fundamentally necessary that the Federal Farm Loan Board should give full information in simple and understandable language to stockholders on the farms, to bond buyers, and to the public.

---

[Extract from article in Good Business Magazine]

UNCLE SAM, OPERATOR OF FARMER-OWNED FEDERAL LAND BANKS

One of the most gigantic steals of the age was when Congress, at the last moment of a long and weary session, and without the knowledge of most of the Members, passed, without roll call, an amendment to the fundamental farm loan act, advanced by as vile a gang of political tricksters as ever invaded the halls of the American Capitol Building, and deprived the half million farmer owners of the 12 district Federal land banks of their property rights. By doing this shady piece of work the Senate and House voted out of the hands of the rightful owners of this bank stock the simple privilege of voting it, as do all other American owners of bank stock, while permitting the "dear farmer back home" to assume the double liability to safeguard the banks against any losses which the Mellonized politicians might run up. We repeat, this gigantic steal, aggregating more than $61,000,000 of Federal land-bank stock, as of February, 1928, was without parallel in history, and should shame the most craven-minded alleged representative of the American people who now warms a seat in either the Senate or the House to immediate action. How these representatives have thus long remained calmly seated in the legislative halls, apparently suffering from the palsy of moral paralysis, is beyond the comprehension of folks who have been reared amid even common everyday moral surroundings.

THE FARMER PAYS THE FREIGHT

Added to this incomprehensible trickery way of treating the American farmer, in a legislative way treating him with even less consideration than the Indian, the same Congress passed another joker amendment whereby the farmer who now owns this string of 12 Federal land banks was forced—blindly, mind you—to pay the major portion of the bills which the political plunderers set up might wish to spend. How much money they have pillaged out of the farmer-owners no one knows; probably the Farm Loan Bureau itself has no idea, for their strange so-called system of bookkeeping does not permit of showing this; they set down important figures on wrapping paper or wall paper, which has become missing when Senators or Representatives of the House asked for a simple statement regarding their stewardship. But we do know that half a million dollars a year is being stolen from the pockets of the nearly half million farmers who now own these land banks, or about $1 per head per farmer per year. This, remember, is the "saving grace" of the modern political plundering going on under the title of "relieving the dear farmer."

THE POLITICAL GANG GETS ITS HANDS IN DEEP

Now, we must add to this tremendous drain on the American farmer's annual income—which everybody agrees is none too large—the enormous and unknown sums which the political gangsters all over the country pillage out of the pockets of the same farmers. There are the loan agents, who, although apparently held down to a commission not to exceed 1 per cent of the amount of the farmer's loan per year, have been known to dip in much deeper, and if these agents have the right kind of a "stand in" with the Mellon gang nothing is doing about it beyond sending out a "cake-eater" examiner, who "goes over the thief's books" and reports to the farmer-owners making the complaints that everything is O. K. They did that in the case of the loan agent located at Meadville, Pa., who not only withheld from the farmer-owners of the Crawford County National Farm Loan Association for a period of years a dividend from the land bank on their stock holdings, thus depriving them of participation in the "savings" (?) of belonging to that association, but the same examiner—D. J. Coughlin, of ill-famed reputation among farmer-operated and farmer-minded associations—also helped the same loan agent to hide in the matter of charging extortionate commissions on foreclosure proceedings, records of which may be seen by anyone in the local courthouse. The same Coughlin was mighty handy with both hands; in many associations where the local loan agent has been laboring in behalf of building up a cooperative organization that would really serve farmers, but who has fought the political red tape of the Farm Loan Bureau, Coughlin has been known to stoop to most doubtful methods of "blackjacking," and many are the good and faithful men in the service who quit as a result of his persecutions rather than remain in the ranks at the dole which the Farm Loan Bureau and land bank would permit as compensation to these "unfriendly" men to the pillaging process of the politician bankers.

NEED OF BLEASE INVESTIGATION

Senator COLE L. BLEASE, of South Carolina, has asked the Senate to name an investigating committee to go over the whole farm-loan system from top to bottom and already has produced most startling facts based upon authoritative statements of fact to substantiate his claim that everything is not right in the system. In fact, Senator BLEASE has demonstrated to the entire satisfaction of sound economists that there is "something very rotten in Denmark," and the only bridge to now cross to secure the much-needed investigation is to break down the barrier of political control which Mellon holds over certain Members of the United States Senate, who have held out about as long as they are able to in face of nation-wide public opinion for a real and searching investigation of the entire farm-loan system.

GIVE THE FARMERS THEIR LAND BANKS

This investigation is essential for two or three reasons, the most important of which is that it is needful that the United States Government determine to what extent the political plunderers have illegally expended the money of the American farmer-owners of the land banks; that the Congress may make an appropriation ample to repay these farmers the amount which political appointees have spent which does not belong to them. Congress repaid to the Germans that which was taken away from them during the World War; surely the same Congress should as willingly repay to their own farmers that which the Harding-Coolidge pillage crew has stolen from these farmers. It is a handsome bill Congress owes these farmers, but the quicker they pay it the sooner they may join the forces of honest, square-dealing, self-respecting manhood. As the matter now stands, no representative, either in the Senate or the House, can do other than hang his head in shame that he is partner to this gigantic steal from the farmers unless he be so craven in his warped moral viewpoint as to be beyond human relief.

The Blease investigation is needful that the truth may be known. Irrespective of the fact that Congress stole from the farmer that which he has paid for and which he rightfully owns and which is now personal property as much as the soil he tills from a national standpoint, the criticism of the maladministration of the Farm Loan Bureau's political wrecking crew has been so widespread as to call for a searching investigation.

WHAT ABOUT THE SPOKANE LAND-BANK MANIPULATIONS?

No report has been given the farmer-owners or the country with respect to the receivers' committee named to act in the Spokane Federal land-bank case, although the property rights and the property possessions of half a million farmers is now, as for a long time past, been bound by the action of that secret-working committee. What they have spent, or agreed to spend, or their gifts of land to this man or that, is unknown. Thus far they have revealed no desire to give the farmer-

owners, whose property they thus pillage, any hint of their activities; and the annual reports of the Farm Loan Bureau have been withheld on two occasions by the Secretary of the Treasury many months past the usual release date. This, we take it, for the purpose of averting an acknowledged scandal, which would surely spread to every part of the United States, were real facts revealed. The Senate committee should go after the real facts about the Spokane bank case.

FEDERAL LAND BANKS NOW WALK THE LINE

It is no secret that the financial condition of half a dozen Federal land banks, including Spokane's, now are in open jeopardy. The political directors of these banks are hoping that they can remain seated over the "fire hole" until after Congress adjourns, and that the big smash which they now face may thus be held off so that the Senate will not, in keeping with Senator BLEASE'S wishes, name a committee to look into their shady deals. However, the Republican leaders are most fearful that these banks may go to pieces before the "dear people" can go to the polls next November and register their "solemn mandate" in behalf of the pillagers of the Coolidge crew, who are of the same stripe and shade, regardless of who bears the standards, as they have been for the past eight years.

EVERY FARMER BORROWER'S PROPERTY AT STAKE

Due to the mutual methods under which the 12 district Federal land banks are operated, under the present political régime, the stock and liability features of a farmer living in Maine may be jeopardized by a financial wreck in a bank in Spokane. Each of the half million farmers stands to lose by any wreck in any land bank. Thus the Senate, acting for the farmers, whose hands they tied and whose property they helped the present Mellon crew to steal, should now name a committee to fully investigate the condition of all banks, that they may assist in averting a crash which may result in a loss of many millions to farmers if the searchlight is now turned on instead of some months hence. The investigation is bound to come, for Mellon can not much longer stem the tide; the quicker the investigation is held the larger the saving to the farmer-owners and the less the disgrace to the shameless Coolidge crew.

IS HE A DOUBLE DEALER?

And is this man Coolidge a double dealer? We wonder! Speaking before the Daughters of the American Revolution in Washington, on April 16, 1928, he said, in part, with respect to the Government operating private business:

"If it is desirable to protect the people in their freedom and independence, if it is desirable to avoid the blighting effects of monopoly supported by the money of the taxpayer, if it is desirable to prevent the existence of a priviliged class, if it is desirable to shield public officials from the influence of propaganda and the acute pressure of intrenched selfishness, if it is desirable to keep the Government unencumbered and clean, with an eye single to public service, we shall leave the conduct of our private business with the individual, where it belongs, and not undertake to unload it on the Government."

If Cal is sincere in the above statement, why has he waited so long to forward a message to Congress, and why has not the "White House spokesman" long since whispered something about returning to the American farmers those 12 Federal land banks which his—Coolidge's administration—stole from the selfsame farmers?

Or, did Cal wish thus to add his name to the illustrious heroes of America and stand, for a moment only, in the shade of the overspreading career of Abraham Lincoln, who said with respect to the Federal Government getting into private business?—

LINCOLN AGAINST GOVERNMENT OWNERSHIP

"The legitimate function of government is to do for the people what needs to be done but which they can not by individual effort do at all or so well for themselves."

STEALING PRIVATE PROPERTY

The amendment to the fundamental farm loan act of 1916 really deprived hundreds of thousands of farmers of their property—the capital stock which they had paid for in the 12 Federal land banks—without due process of law. The only honest way that Congress could have went about this steal—if steal they wished to effect—would have been to institute a legal action against the respective thousands of farmers, haled them into a justice's court, and secured a judgment against them in the sum of the capital stock which they had paid for, and thus legally stolen the property of the farmer. To have passed a blanket amendment which deprived these thousands of farmers of the powers to manage the banks which they owned, and the liability of which they fully assume, was one of the most cowardly tricks ever played upon any particular people anywhere, any time.

FARMERS DID NOT WISH PROPERTY STOLEN

Even had any considerable number of farmer-owners of these land banks went to Washington and vigorously requested Congress to thus subsidize their property holdings, it is most doubtful if any sane legislator would have consented, since to do this established a precedent that was both unsound and unsafe. However, the facts are that not one single farmer-stockholder of one single Federal land bank asked the Senate and House to thus steal his property. Those testifying and those lobbying for this gigantic steal were recruits exclusively from the ranks of the political Farm Loan Bureau, under the leadership of $25,000 Charles Lobdell, fiscal agent, hired to act for the politicians by the 12 politician presidents of the 12 Federal land banks, who he, as farm loan commissioner, named to preside over the destiny of those farmer owned though politically pillaged banks. It was a case of "You tickle me and I will tickle you." Lobdell handed these very common and inexperienced ward heelers jobs that paid four and five times as much as they had ever received prior to their rise to bank presidents, and so it was not so strange that, when Lobdell had manipulated things to best suit Lobdell, that these fellows held a little secret conference in Washington, at which Lobdell arose and nominated Lobdell to become fiscal agent of the banks at $25,000 per annum (two and one-half times as much as Lobdell was ever paid as member of the Farm Loan Bureau), that the same Lobdell seconded the nomination, and that Lobdell's dummy bank presidents voted "Aye, aye, Captain."

THE FARMER PAYS THE SHOT

From that day to this the farmer, who pays all the shot, has never received any statement of the amount that the same Lobdell had dipped into and taken from the same farmer's pocket. Not only does Lobdell make the farmer—through the district Federal land bank contributions to his fiscal office—pay his gigantic salary of $25,000 per year but the Lord only knows how much more the farmer is paying Lobdell as "expenses." Lobdell was shown, as per the report of the investigation of the American Farm Bureau's committee, to have dipped into Federal land bank funds and "played the Wall Street market," as a common stock manipulator. What will happen, some sad day, when the tricky and unsafe market "goes against" this manipulator, who takes the American farmer's money to play the races? The farmer, make certain, will pay (though he may not know it) all of the bill of Lobdell's stock-market manipulations.

Since neither the Farm Loan Bureau nor Lobdell has revealed the slightest disposition to render a report of his manipulations of this office—an illegal office, by the way, not mentioned in the farm loan act—the Blease Senate investigating committee should put Lobdell over the coals and search out the facts. If there is evidence of crookedness, the proper parties should receive a buggy ride at Government, not farmer, expense to that popular year-round resort down in Georgia.

THE LESS YOU DO THE MORE IT COSTS

Although the peculiar reports of the 12 district Federal land banks do show that gigantic sums of money are each month being contributed to the Lobdell office, for a purpose no one knows save those in the confidence of the politicians therein, now and again evidence of double dealing has been revealed.

LOBDELL'S SECRET BANK ACCOUNT

For instance, Lobdell carried a secret bank account in the Franklin National Bank in Washington, totals amounting to more than $70,000, and no vouchers or receipts were available. What was Lobdell doing with this money? Well, the Howell investigation showed that he was using some of it, at least, to pay his "worthies." D. J. Coughlin, his right-hand bower, while receiving from the United States Treasury compensation for acting as farm-loan association "examiner," and supposedly devoting his entire time and energies to this, was paid out of this secret Lobdell fund (which really belonged to the Federal land banks) money for doing some secret and unknown work with reference to handling bonds. We may well assume that Lobdell is now using money in about the same way he did while acting as farm loan commissioner, and seated upon a high and holy throne, sitting in judgment of the secretary-treasurers of the more than 4,000 farm loan associations whose books were audited (?) by his examiners of the Coughlin complex!

Enough evidence is, therefore, already in the hands of the Senate and House to fully warrant immediate investigation of the entire farm loan system which Senator BLEASE now requests, and not one moment of time should be further wasted in withholding from the American farmer, whose property has been stolen and whose money is still being misused to the extent of millions a year, and from the American public, who have a right to know how their Government is being administered, or more truly, maladministered, by the present wrecking crew in Mellon's offices.

Let us now have the investigation and let it be nation-wide, fearless, and all searching.

The hour has long since struck for the thieves of the farmer's land-bank stock.

---

[Excerpts from letters, 1924 to 1928]

WHAT FARM LOAN STOCKHOLDERS AND LOCAL ASSOCIATION OFFICIALS SAY ABOUT THEIR OWN SYSTEM—STOCKHOLDERS PROTEST THAT THEY ARE DEPRIVED OF FUNDAMENTAL RIGHT OF CONTROL OF THEIR OWN PROPERTY, THE 12 LAND BANKS, GUARANTEED BY THE ACT

Farm Loan Board perpetuated political control: "Election was a farce * * * damnable outrage." (St. Louis land bank district:)

"The law as amended by Congress in 1923 gives the Farm Loan Board autocratic control over the associations. All they had to do

was to follow the law to perpetuate their control over the banks. The election was a farce. Also the reorganization of the banks on a permanent basis. Speaking of this district, there was no such thing as a reorganization, the old organization was simply continued. The Federal appointees being in control swiped up everything in sight. The three members elected by the farmers are simply eliminated. It is a damnable outrage on the farmers who own $41,000,000 of the $43,000,000 of stock. The farmers' representatives are at home while the political appointees are running the bank to suit themsleves. * * * The amendment of the last Congress relating to land-bank elections and reorganization was a genuine camouflage. It pretended to give the farmers an honest minority representation, when as a matter of fact it intended nothing of the kind."

Fears emnity of Farm Loan Board until law is changed: County Farm Bureau's agent (Oregon), Spokane Bank:

"The point of the matter is this, as the law now stands, the Farm Loan Board now controls four of the directors in the Federal land banks and the farmers three, while as you know the farmers are the principal owners of all the stock in the Federal land banks, but the control of these banks has been denied by various acts of Congress. * * * The fact still remains that the Farm Loan Board controls the operations of the Federal land banks and establishes its salaries by a majority of the board of directors. * * * I can not see any other way as long as this situation exists but what the farmers will have to submit to the political control which exists in Washington of the Federal land banks.

"I do not think there is occasion for the present high salaries paid some of the officers connected with the farm loan system. But it is useless to argue this matter unless this law is changed, as we will only incur the enmity of the Farm Loan Board."

Secretary St. Louis bank district:

"If I could honestly believe that Congress would tie a knot in the tail of the Farm Loan Board, I would not hesitate to answer your questions freely, but as I stated above, it seems to me that every move that has been made has tended to strength the hold of the Farm Loan Board."

"Our association's board is not satisfied with the way the election of directors of the Federal land bank at Spokane was held. We would like to kick at the Federal Farm Loan Board at Washington on several other scores. Will mention its un-American antagonism to district or State associations of farm-loan associations; its recommendations about the Federal farm loan act, depriving the stockholders of the Federal land banks of the right to elect six of the nine land-bank directors; giving themselves the power to levy on the several farm-loan banks for the expense of the Farm Loan Board without limiting the said expense; and last, but not least, the board's extravagance."

For complete freedom of the system from Federal Government prompts feeling for real cooperation or return to original act. Stockholder and appraiser for N. F. L. A., Kansas (Wichita bank district):

"In the matter of election of directors I think that there should not be any directors but what are elected by members of the association and are also members of the associations themselves.

"I think all secretary-treasurers of associations should be members of the association.

"I think that the Federal appraisers should be elected by the farmer directors.

"I would be in favor of the original act in regard to association—have six directors and the Government three directors.

"In regard to reserve fund, to amend the act so that when a member pays his loan he gets his portion of the reserve fund back."

No control for farmers: Michigan secretary and stockholder. (Requests name withheld:)

"We nominally were to select four of these seven directors, one being the director at large—so large, by the way, that he 'happens' to be the vice president of the Federal land bank at St. Paul—the other three being the hand-picked favorites of the bank, and, of course, the Farm Loan Board returned the compliment by selecting three good farmers (nit) like the president, secretary, and treasurer of the said Federal Land Bank of St. Paul. The hand-picked directors elected by the farm loan associations were, I believe, all bankers—at least the one from Michigan is—and, from the methods of propaganda, I judge the others are.

"We think the bank has put something over us in getting amendments to the Federal land bank act, so that the Farm Loan Board now has practically seven directors and the farmers not one to run their business, in which the directors or their political bosses have not one cent of cash, except their salaries and other things pulled out.

"Can you tell me of any other banking business on earth managed by those not having a cent of money invested in same?"

Control in hands of Government appointees: Stockholders deprived of power to defend themselves. Nebraska secretary and stockholder, Omaha Land Bank:

"The law has been changed so that it now gives complete control of the system into the hands of Government appointees, to protect the interests of the bond investors and taking away from the borrowing stockholders the power to defend themselves against the gross extravagance in operating the system that reduces dividends which belong to stockholders.

"If the dividends were getting too large in the estimation of the board, why is it not as good an arrangement to pay secretary-treasurers a little more for the work as it was to boost the salary of a farmer member of the Farm Loan Board to $25,000? It seems since the permanent organization the strangle hold is a little stronger than ever on the associations and the liberalities all going the other way."

"The actual government of the Federal land banks should be put more under the jurisdiction of the stockholders, as the original bill was drawn." Kansas secretary, Wichita district.

Editor, Montana:

"As it stands to-day the Farm Loan Board is the whole thing. The borrowing farmers are completely disfranchised."

Secretary-treasurer Springfield (Mass.) land bank district:

"To my mind the Farm Loan Board has exercised a repressive and unfriendly attitude toward the operation of the farm loan act from the very start. Through an amendment they retained their temporary organizations of the land banks up to one year ago. In response to general protests they railroaded through an amendment which changed the number of directors from nine to seven, four of whom are really appointed by the Farm Loan Board and three elected by the large group of associations in each district. There is no other organization in the country in which the members or shareholders own from 90 to 100 per cent of the stock and yet have no deciding vote in its vital affairs. 'A farmer is not supposed to be interested in affairs of the kind; it is his business to keep digging in the dirt.'

"One year we received 6 per cent on our Farm Loan Association stock. At the annual conference with the officers of the land bank the next spring there remained $240,000 of undivided profits. The officers debated with us the advisability of allowing a book credit to each shareholder or distributing the amount in extra dividends. They did neither, and you can imagine the consternation of some of our members when they were allowed only a 3 per cent dividend last year. Many farmers said, 'We pay them 6 per cent on their money and they allow us only 3 per cent for the use of ours.'

"The present administration of the act is working toward the elimination of the farm loan associations, as the men who carry on the work receive practically nothing for their services. This comes about through the centralization of all detailed work at the land banks, which, because of the large volume of business on their books and the liberal operating margin of 1 per cent (the difference between the interest paid on land-bank bonds and the rate the farmer pays on his mortgage), are now permanent institutions, whether or not they close another loan for the next 20 years. This was never intended by the original act, which visioned thousands of thrifty cooperative units throughout the land, uniting and encouraging that group of people who work harder and get less than any other class at the present time. If the farm loan associations can be crippled, the day of the joint-stock land bank is at hand * * *.

"If politics were not such a strong factor the administration of the act could have been placed in the hands of an impartial and friendly board who would have worked for its favorable growth, to the general good of the country.

"If I am correctly informed, the Farm Loan Bureau is the only bureau of the Treasury Department which is compelled to bear the expenses of its own supervision and operation. The Federal Government carries the expense of the national bank supervision, etc.—but here again the farmer is the goat.

"The American people are far removed from their Government and when their trusted electors traitorously barter their influence in playing the fortunate against the unfortunate, a disgust is overwhelming and we long for retaliatory justice. The originally magnificent Federal farm loan act is hardly recognizable to-day, and further sinister amendments will divest it of the last atom of any fine American spirit. * * * Mr. Lobdell, the farm loan commissioner, resigned his $10,000 job and bade farewell to his associates of the system. What are we outsiders to think when he comes back to a $25,000 berth, the expenses of which are to be saddled on the borrowing farmers?"

Unfair elections: Complained of in many letters from every district after the stockholders had waited seven years without any election whatever. They charge prearrangement by banks; "temporary officials."

NOTE.—Documents show that in each district the president sent out a letter. Some other director, present or past, wrote about the president to all associations. In Wichita, for example, Miles La Sater himself wrote, and in the New Mexico territory John B. McManus wrote a mimeographed letter to all New Mexico secretaries. (Information given by a man not running for a directorship.)

"In Texas (Houston district) the two Farm Loan Board directors who would be dropped communicated with associations, advocating themselves for election."

In St. Louis, Omaha, Spokane, New Orleans, Baltimore, and St. Paul, Springfield, letters report same tactics used. Not specifically stated for three remaining districts, but indicated.

Secretary of the State of Idaho Utilities Commission, Boise, former secretary of the Mountain Home Farm Loan Association, wrote:

"The whole matter appeared to us to be prearranged, and there seemed nothing to do except to join in the program outlined. It occurred to us at the time that there should have been a method by which, as an association, we could have expressed more fully our choice for these nominees. * * * It occurred to us that southern Idaho associations should have had ample time to have called a meeting or to have communicated with each other to ascertain the desire of our district as to who should have been nominated for these positions. * * * We had no candidates for southern Idaho, due in my judgment to the fact that insufficient time was allowed for any action on our part."

National Farm Loan Association secretary:

"Will advise that the land bank advised us that a certain party was a candidate for director. Blank ballots were forwarded us, which were never completed. Everything was evidently arranged, so we did not even cast a vote."

"Glance at the results of the nominations and the final election as shown on pages 34 and 43 of the seventh annual report of the Farm Loan Board. You will see that the fake-election program was carried out throughout the system." (Texas secretary, Houston bank.)

INFORMATION DENIED TO STOCKHOLDERS FIRST BY FARM LOAN BOARD ITSELF, THEN BY LAND BANKS

(NOTE.—Information was not given to farmers' candidates concerning associations and their officials in the district prior to the elections in most cases. In Texas, upon pressure, the land bank did belatedly send information to candidates, but too late to permit them to get in touch with other secretaries. In Texas the land bank refused to call a meeting of secretaries before the coming election, so it was quite impossible to know whom, except the land-bank nominees, to vote for.)

All persons whose candidacy was initiated or supported by the bank could naturally get access to the lists on file there.

LAND BANK DISTRICTS SUBDIVIDED AT THE SAME TIME ELECTION NOTICES WERE SENT OUT AND INFORMATION EITHER INADEQUATE OR LACKING

Kansas man, Wichita district, writes:

"We were told that the two western tiers of counties of Kansas were tacked onto Colorado, but not told to how much of Colorado. Looks as though it were manipulated."

From Texas secretary:

"We candidates who were afterwards so badly defeated had to take a map and ferret out what associations were in our district * * *.

"Directors and officers of local associations have no organization, are not known, and can not hope to be elected directors of Federal banks. It takes time and money to make a campaign against the regular men. No one except party connected with present organization can possibly win."

From secretary and stockholder, Florida, Columbia Bank:

"Our association received circular letters sent out by the land bank to different associations advocating certain nominees at the same time they were notified of the election and the machinery. They must have been prepared and ready for mailing before information in regard to the election of directors was mailed to all associations. This would indicate that the election was controlled from a central point and the candidates who were advocated by these circular letters were all elected, and from the annual report of the Federal Farm Loan Board * * * these directors elected were very satisfactory to the Farm Loan Board."

APPRAISERS USED

From the Spokane district:

"I was asked by an appraiser to support a southwest Washington man who was a candidate. A list of names of the candidates was sent us in time for the election, but we did not know any of them, nor did we have time to find out about any of them. Mr. O'Shea was the only one we knew at all."

From the following districts comes similar testimony: Houston, St. Louis, Baltimore, St. Paul, Wichita—six at least—that appraisers have been used to influence vote.

STOCKHOLDERS' MONEY USED BY TEMPORARY OFFICIALS TO DEFEAT FARMERS' CANDIDATES

"At the time of the election we received a telegram advising us that certain candidates would interfere with the policy of the bank." (National Farm Loan Association in Nebraska, Omaha Bank.)

"The land bank plastered the district with communications." (Stockholder in Baltimore district.)

Appraisers appear to have used stockholders' money for telephoning, traveling, telegraphing, to secure election of land-bank officials.

Kansas secretary (Wichita bank): "Not a single director is identified with a farm loan association."

Another Nebraska secretary in Omaha district writes: "If you know of any land bank director in any district who actually represents farmers, please send me his name and address so that I may write and congratulate him." Also, "There was absolutely nothing in the methods followed in the elections to allow a fair presentation of candidates and a full, free, and fair expression of choice by associations."

COMPLAINTS OF ADMINISTRATION—INTEREST RATES TOO HIGH

Another Nebraska secretary (Omaha bank district) answers a question about the restrictions on loans that there is no limit to the number of applications that are allowed his association, because farm loan rates "are higher than old-line rates, and only the undesirable and slow loans apply."

Texas secretary (Houston Land Bank district): "The interest rate should be reduced. Old-line loan companies are loaning money at 5 per cent, while most of the land banks charge 5½."

Letter from secretary of Anderson, Ind. (Louisville bank), already in record of hearings, shows same conditions prevail in Louisville district. A number of others make the same point, indicating that from Canada to the Gulf and the Rockies to the Alleghenies the rate is now higher than charged by competing mortgage companies. (This is feeding the enemy, is it not?)

Oklahoma secretary (Wichita district):

"The per cent held by the Federal land banks of the total loans in force in this territory is small, but it is enough to cause or contribute to the closing of the agencies of the more substantial loan companies formerly operating in this territory, with result that a higher rate obtains than when the companies were competing.

"Few loans are made (by the land bank) in the amount applied for. Usually the amount is cut just enough either to make the loan impossible or undesirable."

POOR SERVICE

Delay, whether unintentional or intentional, results in forcing farmers who want loans to turn to private sources, from which they get reasonably quick service, says the president of a Kansas bank (Wichita district).

"As a banker with 22 years' experience in this locality, I have come to the conclusion that if the Federal farm loan law was properly administered it would serve the purpose for which it was intended. I have been secretary-treasurer of the local association ever since its organization, and if I ever get forgiveness for taking the job I don't believe I would ever be guilty of the same offense. As secretary-treasurer you do the work for practically nothing, and there is so darn much red tape connected with getting a loan through that I have just about given up in despair. I believe in the law and want to see it succeed, but from my observation it has had rotten administration." Six other bankers in various districts likewise serving as secretary-treasurer of farm loan associations make similar complaints.

A New Mexico secretary (Wichita):

"Loans are not acted on with reasonable promptness. As an instance, acknowledgment of receipt of application dated October 19, 1923; notice of approval dated February 14, 1924. Four months after."

Several hundred letters from Texas, Wichita, Spokane, New Orleans, and Columbia districts specifically complain that service is "unreasonably slow."

INADEQUATE SERVICE REPORTED IN SEVERAL HUNDRED COMMUNICATIONS

Appraisers complained of in the Berkeley bank district. Secretary-treasurer, National Farm Loan Association, Utah:

"Our troubles do not come from the way our director was elected, but they come from what we believe incompetent Federal appraisers—men who are not taken from practical farmers, but usually, we believe, from men appointed through politics. For instance, Senator SMOOT had his son-in-law—so we are told—to be the chief supervisory appraiser for this bank district appointed. He then appoints an assistant, who does the real work. The assistant is a man from California, who took a law course—from my own observation absolutely unqualified for a position where he had the lifeblood of some poor struggling farmers in his hands. That man turned down loans upon the best farms in the district, and farmers the best qualified to operate successfully that could be found in the United States. (Cites specific cases and values.)

"These fellows act as though they were appointed to see that worthy people did not get loans. How could the system be more quickly undone than by the men playing into the hands of the local banks who gladly pick up such risks after they—borrowers—have been worried almost to death by our muddled-up methods?"

From secretary and stockholder, St. Louis district, Illinois:

"It has been practically impossible to get a loan for this association. They have turned down thousands of dollars worth of business for us, notwithstanding the security has been good and sufficient and just such security as gets the money from other investors.

"The bank at St. Louis is afraid of a State organization of farm-loan associations and hence is against it. They want absolutely to dominate everything, just as they are dominated by those higher up. You may know how the Farm Loan Board fought our national union of farm loan associations. They finally threatened to boycott any association using its own money to join the national association. So vigorously did they—the Farm Loan Board—prosecute the associations that the spirit of organization was killed. They never made a greater mistake. They knocked on the head the only source through which the banks can get business, viz, the farm loan associations."

From secretary in Oklahoma, Wichita district:

"One Federal appraiser, a city boy, was out on his first trip, and I picked up a handful of soil and asked him how he would classify it, and this was his reply:

"'Don't ask me anything about soils for I don't know a thing about soils.'

"Another appraiser did his work at 11 p. m. of a dark night and cut $700 from a $2,500 loan to make it look like he was a careful appraiser."

"We were afflicted with a worse one—but why bother? It is 'pull.'"

REJECTION—DISCRIMINATION

No information to stockholders about their business. Poor appraisers.

Secretary Idaho Farm Loan Association (Spokane bank district):

"Until recently this association has never been able to get a statement as to the condition of the Federal Land Bank of Spokane. During the past month such statement was received and the indications are that there will be less secrecy as to the workings of the bank. Loans will be disallowed without any explanation and the secretary-treasurer is unable to get the reason therefor. If he could get information as to why the application was disallowed he could avoid taking applications of this kind in the future.

"This association objected, together with four other associations, to a certain appraiser's methods, and since then we have not had adequate service. While we are not trying to dictate who our appraiser shall be, we find that there is an appraiser near here who has had nothing to do for several months."

From Michigan secretary:

"There are something like six appraisers in the Michigan area, but we can not get service."

COUNTY AGENT NOW BOSS

President Farm Loan Association (New Orleans bank district):

"On account of delay in getting applications through and the expense attached for the loan, we are receiving no applications in our association. * * * The land bank at New Orleans reduces our loans from one-fourth to one-third below the amount of our careful appraisement. The bank is also now demanding that the loan be recommended by the 'county demonstration agent,' which makes him virtually dictator or boss in this county, and which we believe is in violation of the Federal farm loan act."

AGRICULTURE SUFFERING

Michigan secretary (April 5, 1924):

"Farms are being foreclosed here because of delay in making appraisements."

Secretary-treasurer Texas Farm Loan Association (Houston bank):

"We notice the latter part of the first paragraph of your letter of the 4th instant refers to the adequacy of amount of loans being made. We will say that after the Houston meeting of secretary-treasurer, where my friend, the district appraiser, hereinabove referred to, was hissed by the secretary-treasurers (the writer not being one guilty), this appraiser tightened up on his appraisals to such an extent that of the 17 applications we succeeded in getting 3 loans through.

"We had one application for $17,500 whereon the appraiser offered $70 per acre, and the land sold the next week for $175 per acre for cash under forced sale, when there is a Federal loan made through this association within 600 yards of this land of $86 per acre of land this appraiser admitted was not as good as that which I offered.

"During the same period I offered an application of $25,000 on 600 acres, formerly the stock farm of ex-Senator Bailey, of Texas, and was offered $17,000. The owner is now closing a loan with an old-line firm for $20,000. I had another application whereon he offered $2,300 on 100 acres, and within three weeks the party obtained a loan of $3,500 from an old-line company.

"We hasten to say, however, that recently our appraisals are picking up." (This man testifies that the appraiser stood over him and the association board during their election and induced both him and the board to do precisely what the land bank wanted.)

(NOTE.—The allotment plan in regard to applications for loans is shown by letters to be now used by Columbia, St. Paul, and Wichita banks. That is, each association is told that it may receive a given number of applications for loans. The number apparently is not an equal allotment to each association, but an arbitrary parceling out of the opportunity to get money through this system. It is possible to discriminate, first, in the number of applications allowed. On this plan it would be impossible ever to register the real loan demand upon the system, for it practically limits the business any association may hope to do. This allotment may have relation to the previous amount of business done in that locality, but that is not a safe guide to what the present may be. Such an allotment might be used by other money lenders in the country as a gauge of exactly how far they could go in competition for the local business. The allotment plan is a vicious limitation on the farm loan system, which tends to destroy even the regulatory effect of the system. As a disciplinary measure the land bank may starve a whole community by this plan. It may allot to one section of its district and not to others, thereby starving a whole State, for example. The power to make allotments should be prohibited.)

CONSERVATIVE AMOUNTS APPLIED FOR UNREASONABLY REDUCED BY APPRAISERS

From a Nebraska secretary (Omaha Bank):

"The amounts offered by the Omaha bank are not adequate and the service is much too slow. Senator GEORGE NORRIS is a landowner in our territory, and he would be willing to send to you for his perusal a list of amounts offered on farms that he will positively know from personal inspection, and he can judge whether southwest Nebraska is being fairly treated. If he so regards it, we shall bow—but we feel that the amounts are unfair. The bank has loaned $100 per acre in eastern Nebraska, and will often refuse $10 in this territory."

Testimony from association appraiser and stockholder in Kansas Association, Wichita:

"I have been one of the appraisers since the association was started, and have found that there has only been about 50 per cent of the applications that have got through, with 35 per cent of the amount of money recommended by the local appraisers."

Secretary National Farm Loan Association (Springfield district):

"My candid opinion is that the general policy of the Federal land bank is to do as little to compete with the local banks as possible. To my mind that is a mistake. The farmers need help and the benefit of the doubt far more than the banks. In our district the savings bank will always loan from one to seven or eight hundred dollars more than the Federal land bank. Again, the attorneys' fees, from $60 to $80, and the purchase of stock cuts the final amount."

COUNTRY BANKS BENEFIT

Colorado secretary (Wichita Bank):

"We have complained that our applications after having been judiciously passed upon by our local committee and again by our board of directors have been unnecessarily and in some cases unreasonably reduced by the bank, thus placing the borrower in an embarrassing position of having to go to a local country bank for a supplemental loan to clear an existing lien on his property, to refund which was his purpose in procuring the Federal farm loan. In this connection it appears quite evident that nearly all country banks have assumed an attitude of opposition in line with that of the national bankers' association, with which you are no doubt familiar.

"From the reports now available it appears that the earnings of the system are largely exceeding the dividends distributed to borrowing stockholders, and we desire to protest the diversion of the earnings of any portion thereof to investments in securities, office buildings, or salaries that appear to be out of proportion to the service rendered.

"We opposed the creation of a super bank at Washington."

Secretary and stockholder, farm loan association, Washington (Spokane district):

"We are rapidly losing our grip on the borrowing farmers of this county. They are afraid to place an application in our hands, knowing our inability to secure the closing of a loan within any reasonable time.

"Applicants marry, are divorced, and die between the signing of an application and the closing of their loans. Many of them linger with us a few months and then withdraw their application and go over to the Puyallup association, who have frequent Federal appraisings.

"Although the Puyallup association is taking more than the 1 per cent allowed by the amended law of July, 1920, while we are standing strictly by that law as you will see by comparing the inclosed circulars of the two associations, farmers would rather submit to be bunked out of a few more dollars if they can get action looking toward the closing of the loans. We protest against being penalized while the real exploiters are profiting by discriminations. We are not working off any high-priced, old-line insurance on our people, nosing in on their real estate, or conniving with any abstractor.

"We are close to the largest of the Sound cities, have three ferries and a large number of passenger boats, so your appraiser can run over here for three or four applications with no more cost per application than he would have for any one of a score of long drives he makes out from Puyallup. He can slip across at any hour of the day and be back in Tacoma in a few hours. There is no good reason why we should not have just as good treatment as Puyallup does."

PROTEST HOLDING UP OF UNDIVIDED PROFITS BELONGING TO STOCKHOLDERS

Demand surplus should be divided annually as intended by law.

Secretary-treasurer, Waverly, Iowa (Wichita):

"I think the surplus on hand, aside from the legal reserve, should be divided up among the borrowers who created it and to whom it belongs."

National Farm Loan Association (Wichita):

"Our chief complaint is that we do not receive dividends for periods where we have no delinquents. We think this dividend money is held unjustly."

Secretary-treasurer, Madison National Farm Loan Association (Omaha):

"The land bank holds up the dividends on account of one or two delinquent members."

National Farm Loan Association secretary:

"There is a matter I believe should be brought to the attention of Congress, and that is the lack in the Federal farm loan act of any

provision applying to the division of accrued dividends on the stock of members who pay their loan off in five years or who sell their land and the Federal land bank mortgage is assumed by the purchaser. Under the present conditions in either case the original borrower does not receive any of the undivided profits either of the Federal land bank or the association. As both of these banks must set aside 10 per cent of the dividends to reserve account, you will see that the arrangement is not fair to the borrower who sells or who pays off, or for that matter, to the borrower who sells or who pays off, or for that matter, to the borrower who carries his loan for the full time, as he would be in the same condition then as the other two are now."

Kansas (Wichita):

"All moneys not used up as expense by the Federal land banks in any fiscal year should at the end all be prerated to the stockholders instead of piling it up in half a dozen funds for somebody eventually to get away with. * * * Congress in passing the bill failed to say what the surplus or reserve in local associations was for. * * * Some provision should be made in the law so it would be used * * * in case of emergency."

Federal Loan Association, Idaho:

"This surplus belongs to borrowers—undivided profits—and those stockholders are the borrowers. The surplus should be paid back to the borrowers because they paid it. If not, it should be used by the banks to take care of loans on foreclosed farms."

Nebraska (Omaha):

"The practice of the Federal land banks piling up such large amounts as surplus funds above their legal reserves * * * is very unpopular among the stockholders."

Township National Farm Loan Association, Missouri (St. Louis):

"I have noted for some time that there were huge sums of money being carried as undivided profits. If these earnings are becoming burdensome and so tempting that the Farm Loan Board must resort to extravagance, then it seems to me that this temptation should be removed by having these undivided profits divided between the National Farm Loan Association as a cumulative dividend. This money belongs to stockholders and they should have it."

PROTESTS PATRONAGE

Berkeley secretary comments:

"I presume that the Federal Farm Loan Board appointments are all political favors and that men are appointed to such positions without any definite knowledge of farm values or economic rural conditions. The salaries of the board seem to be very excessive, and I also believe the officers of the Federal land banks * * * in private life would get about one-third of their present salaries."

Resolutions from certain associations call for independent investigation by congressional inquiry of Lobdell's manipulation to secure complete control for the Federal board and a $25,000 job for himself.

Phoenix, Ariz., Rogue River:

"Stockholders have been intimidated or refused information on vital matters, for example, disposition made of undivided profits; even the lists of associations and officers in the district or proper business inquiry."

Secretary-treasurer of Nebraska association:

"They have tried to influence our association to refrain from making complaints. I inquired about the large reserve held by them, and asked them whether it could not be divided among the stockholders, or whether the interest rates could not be reduced to compete with the old-line companies. They came back with a letter addressed to the directors urging my resignation. Freedom of speech, as long as you wrong no one, should never be discouraged."

(Intimidation to prevent federation. See documents (form letters) from Federal boards, Nos. 27, 29. Form 37, and others, containing threats of withholding lands.)

Secretary Federal loan association, South Carolina:

"Our association got word * * * that we were expected not to join any national federation, that if we did our applications might be held up on us."

The Federal land bank at Houston also tried to intimidate the borrowers at Hereford, Tex. They recommended the discharge of the secretary. Bank unsuccessful. Farmers retained Potts, who had brought in a million of business. Then the bank used another method.

"While the executive committee of the Federal Land Bank of Houston recognizes the fact that secretary-treasurers are chosen by the boards of directors of farm loan associations, yet we sometimes doubt if the borrowing membership of the Hereford association is advised of the position assumed by Mr. Potts and of his chronic attitude toward the Farm Loan Board and the Federal land bank. * * *

"If under these conditions the Hereford association desires to continue the services of Mr. Potts, you of course may do so; but the executive committee of the Federal Land Bank of Houston may decide to organize another association at Hereford to serve the future needs of borrowers in that territory.

"You are advised to send direct to the Federal land bank payments owing on the June and July installments."

By order of the executive committee.

THE FEDERAL LAND BANK OF HOUSTON.

Re federation. Oregon secretary writes concerning the prohibition of use of association funds for the support of an association of stockholders. "I'll say so. I was compelled to replace in our association's treasury money paid as membership fee in a federation of National Federal Loan Association before we were allowed to do business with the Federal land bank."

The result of such autocratic methods, Secretary of Iowa Farm Loan Association (Wichita district):

"They have got the strongest body of self-perpetuating officeholders, all responsible to the next higher up, that we have in the Government."

A FARM LOAN STOCKHOLDER MAY NOT EVEN COMPLAIN TO HIS SENATOR

Michigan secretary (St. Paul Bank district):

"Recently I made complaint to Senator COUZENS, which he kindly took up with the Farm Loan Board at Washington, with the result that my complaint was sent to the Federal land bank and I received a letter threatening a thorough investigation of the affairs of this association.

"I have had two examinations this winter in an effort to trap me in some irregularity in carrying out a multitude of rules and regulations promulgated by the Farm Loan Board.

"On his last visitation the examiner was kind enough to show me the real reason for his visit, as warning to me to stop complaining. The board has every letter I have ever written to anyone regarding the rottenness that is going on, and I will be glad if you will let them have this one. They are tied up hand and foot with Wall Street. Any fool could see that. They do not want the farmers to get their money at lower rate than the money sharks offer it."

POOR FARMER EXCLUDED FROM BENEFITS OF ACT

National Farm Loan Association secretary, Wyoming (Omaha district):

"The amounts approved by the Federal Land Bank of Omaha are usually so inadequate to the needs of the applicant, and the cost of the appraisal having increased, that the small farmer is prohibited from making application. If these methods are continued, the standard of the Federal land bank will certainly be lowered. We are unable to state who is responsible for this unfairness in valuations and low corresponding loans as approved by the board. The people who are developing the agricultural interests of this far-western State are deserving of more consideration."

Secretary Minnesota (St. Paul district):

"The farmers don't get satisfaction from the Federal land bank. The farmer has to be well farmed, with good buildings and no debts and rich before he gets a loan. Last summer I took applications for nine loans and only one could have got a loan. So I don't know what the bank stands for. Not for the farmer—for other bankers, I guess."

FARM LOAN HELP REFUSED TO THE LITTLE BORROWER

Secretary National Farm Loan Association (Spokane district) (recited cases of a worthy small loan refused):

"Now, we all understood that the farm loan act was to help a man get on the land. * * * They seem to want to cater to the big man and let the little man go unhelped. I could go into more details and call your attention to other cases, but I have written the Farm Loan Board at Washington and the bank repeatedly about these matters, and it seems of no use, so I almost have lost hope. I am a member borrower and a farmer living on the farm I homesteaded here in 1910. I have refused $2,000 an acre for my land."

Complaints from many other districts. New Orleans bank, however, has fine record.

FARM LOAN SYSTEM FAILING—WHAT ABOUT THE $10 FEES ON REJECTIONS?

Secretary Oklahoma association (Wichita):

"Under the present management the Federal land bank is a farce and a failure.

"They induce farmers to make application and put up their $10 for inspection and then cut the value of their land so low that the loan they offer the farmer is so low he can't use it, and he loses his $10 and other money he puts up to pay local inspectors. This results in deterring other farmers from making any attempt to get a loan from this bank and the farmer goes to some old-line loan and trust company and pays their high interest and commission notes.

"If you can induce Congress to take a hand in this matter and in some way have the bank make better loans, it will be a blessing to this country and save many a farmer from losing his lifetime's savings."

INCOMPETENT SERVICE—DISREGARD LOCAL ADVICE OF RESPONSIBLE MEN

Idaho secretary (Spokane) complains of limitation of service and says:

"I have no complaint to make as far as Mr. O'Shea is concerned, but he certainly has an incompetent bunch working with him. * * * I wish you could see some of the letters that farmers get from the new collector, A. B. Thompson. They are simply insulting. He will never accomplish anything until he changes his methods. * * * They have started foreclosure on some of the farmers that are on their places and would make good if they were given a chance. Then, again, in some cases where the farmers have starved out and gone and we have recommended foreclosure so we can get control of the place and lease

it to some one, they will just let it and charge the interest up to our dividends."

HIGH INSURANCE

Wisconsin secretary complains of high insurance required by the St. Paul Land Bank, particularly tornado insurance.

Also Indiana and Oregon secretaries, one of whom suggests one reason the secretaryship of the farm loan association is desirable to non-stockholders.

FACTS PROVIDED ARE NOT FULL ENOUGH FOR STOCKHOLDERS' LIKING

Kansas secretary believes examination and title fees are too high. Also asks for detailed annual report to stockholders of salaries and expenses paid by banks.

EXPENSE WIPES OUT SERVICE

Secretary-treasurer, National Farm Loan Association, Montana:

"We do not try to interest farmers in it (the farm loan system) any more, as the results do not justify us in charging them the necessary expense to render service."

OVERLAPPING OF TERRITORY

Wisconsin secretary complains that organizing it is "not wise and a poor policy for the Federal Farm Loan Board to pursue."

Unreasonably poor pay for secretary-treasurer protested by a very large number.

WANTS FACTS ABOUT ACCOUNT IN FRANKLIN NATIONAL IN WASHINGTON

Nebraska secretary demands to know why the Franklin National Bank account was kept in 1924 subject to farm loan commissioner's check, and whether the Federal board makes checks on any other account, as it is not under bond.

"Let us have more service and help a greater number instead of creating more offices and bigger salaries, which have not helped us in the least.

"The borrowers should own and control everything, by the consent of Congress."

Secretary Texas Farm Loan Association (January 5, 1927), Houston Federal Land Bank:

"As you will note, I am still secretary-treasurer, but they are making life miserable for me and business hard.

"The man Shropshire, who conducted a campaign in this district for Rowan Mills as director (of the Houston Land Bank) and whom I antagonized, has been chosen chief appraiser at Houston and has the routing of appraisers and the final approval of our loans. He has placed one P. W. Chunn, of 1809 South Tenth Street, Waco, Tex., as appraiser for my district. In the second quarter of 1926 I lost every application I received. He approved none high enough for me to get the loan. Early in December I had $46,000 applied for on six loans and I lost every one of them. Four of them he positively refused a loan on, and on two he reduced the approval below what the parties could use. He has become very dictatorial. His last act is assuming authority to write me letters in practically the same verbiage I usually get from the bank, advising me he has rejected certain applications and giving his reasons. I have been informed by two different secretaries, one of whom had another appraiser and one of whom had Chunn, that they refused to let him appraise for them. However, should I do that way, they could get the business through another secretary in this county. They have held my appraisals about 20 per cent under the average amount loaned by joint-stock land banks. In two instances there were double appraisals—by accident this was proved about two years ago. Last month I gave them applications for a loan to take up a joint-stock loan that had been running five years and they reduced it 20 per cent. Of course, I could not get it."

Louisiana secretary (New Orleans Bank district):

"Expense should be reduced."

Pennsylvania stockholder (Baltimore Bank district):

"Nearly four years ago I resigned as secretary-treasurer, and the place is now in the hands of a politician attorney, who is rapidly turning our association into a graft ring.

"One amendment to the law I strongly urge. Require the secretary-treasurers of all farm loan associations to be stockholders in the associations they manage, same as the other officers. He is the real life of the organization; he ought to be in sympathy with the troubles of the farmers and think in terms of the farm."

Nebraska secretary-treasurer farm-loan association:

"The officers of the Federal land banks are going to ruin the system unless something is done. It has come to a pass where large and profitable loans are the only ones desirable; all ordinary loans are rejected for some trivial excuse. It is only profits these banks are looking for; increased profits and increased salaries go together. New offices are being established all the time, and relatives of the officers, personal friends, and those of the same church affiliations are given nice fat jobs. The conduct of the bank at Omaha has been very noticeable for a long time.

"The office of 'pistol agent' at $25,000 per annum is ridiculed everywhere it is mentioned, and the other appointments—new directors or members of the Farm Loan Board at $10,000 per annum—are not in favor with the farmer stockholders of these land banks. The law provides for an election of directors of these banks, which is little less than a practical joke, so much so that any member of farm-loan associations do not go to the trouble to take any part in these elections whatever.

"The land banks claim that they can operate on one-fourth of 1 per cent of the profits. If this is the case—and we do not doubt it—why could not the borrowers have a little reduction in their interest rate? Why accumulate such large profits to be corrupted and spent in extravagance by the officers of the Farm Loan Board and the Federal land banks?"

Louisiana Chamber of Commerce secretary and farm-loan stockholder:

"By all means this department (Farm Loan Bureau) should be kept under close Government supervision, otherwise bond buyers will lose confidence in the securities and the farmers will again be in a bad way for money."

Secretary in Columbia Bank district:

"This meritorious institution will lapse into decay if some drastic measures are not passed by Congress."

Secretary National Farm Loan Association, Washington (Spokane district):

"What more could the great mortgage companies ask of us than we are giving them?"

POSTAL RATES

Mr. MOSES. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 883, the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes.

Mr. BRUCE. Mr. President, may I inquire what became of the retirement bill?

Mr. MOSES. It was the subject yesterday of a filibuster.

Mr. FLETCHER. Mr. President, I suggest the absence of a quorum.

Mr. BRUCE. Mr. President, I ask the Senator from New Hampshire whether he has an understanding with the Senator from Vermont [Mr. DALE] about taking up the retirement bill?

Mr. MOSES. I have an understanding with the leaders about taking up this bill.

The VICE PRESIDENT. Does the Senator from Florida insist upon a quorum call?

Mr. FLETCHER. I call for a quorum.

Mr. McKELLAR. Was the motion of the Senator from New Hampshire agreed to?

The VICE PRESIDENT. It was not. The absence of a quorum has been suggested. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Edwards | La Follette | Sheppard |
| Barkley | Fess | Locher | Shipstead |
| Bayard | Fletcher | McKellar | Shortridge |
| Bingham | Frazier | McMaster | Simmons |
| Black | George | McNary | Smoot |
| Blaine | Gerry | Mayfield | Steck |
| Blease | Gillett | Metcalf | Steiwer |
| Borah | Glass | Moses | Stephens |
| Bratton | Goff | Norbeck | Swanson |
| Brookhart | Gooding | Norris | Thomas |
| Broussard | Gould | Nye | Tydings |
| Bruce | Greene | Oddie | Tyson |
| Capper | Hale | Overman | Vandenberg |
| Caraway | Harris | Phipps | Wagner |
| Copeland | Hawes | Pine | Walsh, Mass. |
| Couzens | Hayden | Pittman | Walsh, Mont. |
| Curtis | Howell | Ransdell | Warren |
| Cutting | Johnson | Reed, Mo. | Waterman |
| Dale | Jones | Reed, Pa. | Wheeler |
| Deneen | Kendrick | Robinson, Ark. | |
| Dill | Keyes | Sackett | |
| Edge | King | Schall | |

The VICE PRESIDENT. Eighty-five Senators having answered to their names, a quorum is present. The question is on agreeing to the motion of the Senator from New Hampshire to proceed to the consideration of House bill 12030, the postal rates bill.

The motion was agreed to; and the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 12030) to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes, which had been reported from the Committee on Post Offices and Post Roads with amendments.

Mr. MOSES. Mr. President, the bill now before the Senate represents a final conclusion on the part of the Senate Committee on Post Offices and Post Roads in dealing with the vexed question of postal rates, a question which has engrossed the attention of the committee, by subcommittee and through joint action with the House through a select committee for more than three years.

It will be remembered that the postal salary bill was vetoed by President Coolidge and that by a narrow margin the veto

was sustained, the basis of the President's objection to the measure being that it carried no additional revenue with which to meet the burden placed upon the Treasury by increases in salaries which Congress with great unanimity then voted. As the result, a postal rate bill was hastily framed. None of its authors claimed that it was scientific, and few of us felt sure that the schedule would be productive. As a matter of fact, it was not productive to the extent which the framers of the schedule had hoped. It lays burdens upon the users of the mails in almost every class of mail matter, burdens which, I am glad to say, were freely assumed in order that the beneficial salary legislation might be assured.

As time went on, however, the burden of these additional rates became apparent. Their unscientific character was known from the start, and their unproductiveness became much more evident. In consequence, the House sent to us earlier in the session a schedule of postal rates which returned in large measure to the schedules which had existed prior to the enactment of the legislation of 1925, and in some respects returned to the schedules which had existed even earlier than that; that is to say, with reference to rates on second-class matter.

Briefly, Mr. President, the House proposed a return to the old rates on first-class matter, a return to the rates of 1921 on second-class matter, a return to an earlier rate on third-class matter, and a return to the earlier rate on fourth-class matter. There were provided, however, some additional features, so that third-class matter might receive a treatment somewhat similar to that in the second class, in that a pound rate was established for that class of mail matter. The result of the House changes has been augmented by the changes made through the amendments submitted by the Senate committee, so that on the face of the facts as we now know them there will be an apparent total reduction in postal revenues of $38,550,000.

I ought to say, Mr. President, in justice to the Postal Service and in justice to the users of the mails, that two schools of opinion arise concerning those figures. One is that this represents the absolute net reduction in postal revenues which will result from the workings of the bill as now drawn. The other is that by a reduction in postal rates, especially for those classes of mail which constitute the great bulk and the great weight of the mail, there will be drawn back into the mails many millions of pounds of mail matter which was formerly carried in the Postal Service under the old rates, but which has been taken out and transported by express and other methods since the new and onerous rates were imposed by the legislation of 1925.

I ought to say that there is a marked divergence of opinion between the House and the Senate with reference to the rates on those classes of mail which are dealt with by the amendments proposed by the Senate committee. It is, therefore, desirable, inasmuch as so many people are affected by this legislation, that the bill should be sent to conference as speedily as may be.

In justice to myself, I ought to say in conclusion that some of these amendments did not meet my approval in the committee, and I voted against them; but, Mr. President, that does not dilute my duty as chairman of a committee. It is my business to bring the action of my committee to the floor of the Senate and to secure its approval here if possible. That does not dilute my duty, either, as a conferee, if I should be named to the conference on this bill, where it would then be my duty to stand by the action of the Senate.

Mr. FESS. Mr. President, will the Senator yield?

Mr. MOSES. Yes.

Mr. FESS. Is the $38,000,000 loss that is estimated on account of the Senate bill or the House bill?

Mr. MOSES. No, Mr. President. The total reduction made by the House changes from the existing rates is $13,585,000; but the Senate has added $24,965,000. If the Senator desires, I can tell him the items of difference.

Mr. FESS. No. The Senator, the chairman of the committee, is not convinced that the reduction will be that amount?

Mr. MOSES. Mr. President, I hesitate to give an opinion of my own about that. It has been represented to us everywhere, in the course of the hearings which we held in all sections of the country, that if the rates were reduced to the point where they are placed by the Senate committee's amendment, at least 100,000,000 pounds of mail matter of the second class which had been withdrawn from the mails under the high rates would be restored to the mails; that that amount of additional matter could be carried in the mails with no additional overhead charge and with very little additional compensation to the railroads for the space occupied; and that the estimate of the department as to the reduction in revenue caused by these lower rates could not be accepted wholly.

The Senator should have this fact in mind also in connection with whatever takes place regarding postal rates: The normal increase in postal business, as shown by the actuarial tables covering a long period of years, is between 6 and 7 per cent of the total postal revenues; and the postal revenues now, in round numbers, are $750,000,000. That, however, does not mean that that would be the full amount of the increase, because necessarily, through increases in personnel, through increases in transportation charges, through increases in additional quarters for the enhanced volume of mail matter, that would be reduced; but the point of view of those who maintain that the low rates bring matter into the mails, and the point of view of those of us who look upon the regular annual increase in postal revenues as an element to argue in behalf of this legislation, lead me to think that the results of the operation of this measure will not be as serious as the estimated figures would show.

Mr. FESS. Mr. President, if the Senator will permit me, I should like to know whether we are abandoning the principle of making the Post Office Department self-sustaining.

Mr. MOSES. Mr. President, the principle of making the Postal Service self-sustaining never has been applied, so far as I know. There is always an operating deficit in the Postal Service, and there is a bookkeeping deficit, the two figures not being alike; but the operating deficit has ranged as high as $39,000,000 in some years. In the years that I have had to do with the Postal Service my theory has been that the people of the country did not much care whether the Postal Service was self-sustaining or not; what they wanted was postal service, because there are certain very costly elements in the Postal Service which never can be made self-sustaining. The 40,000 rural free-delivery routes, for instance, never can be made self-sustaining; but nobody in the country would think of abandoning that service.

Mr. FESS. That is the embarrassing feature. There are certain divisions, like the rural service, that never can be self-supporting. I am aware of that; but I thought it was our purpose to make the service as a unit as nearly self-supporting as is possible, and that is why I voted against the measure before, being one of only three Senators who voted against it, not because I am satisfied with the salaries, but because I should hate to abandon the principle of making this service self-supporting to the degree that it is possible to do so.

Mr. MOSES. I do not see how a principle which never obtained can be abandoned; but the fact is that year by year the Postal Service comes nearer to being self-supporting. That is to say, the annual increment in postal revenues, unless some great additional burden like another salary bill is laid upon the Postal Service, would mean that within a comparatively short time, five or six years, the service ought to be substantially self-supporting.

Mr. GOODING. Mr. President——

Mr. MOSES. I yield to the Senator from Idaho.

Mr. GOODING. I should like to ask the Senator who is in charge of this bill if he is familiar—and of course he is—with the loss which the Government is now sustaining in the handling of second-class mail matter. It is my understanding that that is something like $86,000,000 at the present time.

Mr. MOSES. Seventy-six million dollars, according to the cost-ascertainment report.

Mr. GOODING. My advices from the Post Office Department, I think, are that it is around $86,000,000. If the Senate amendment is adopted, it means an additional loss of $7,610,000 on top of a very, very large deficit already sustained in carrying second-class mail matter.

Mr. President, why should we carry second-class mail matter at a great loss to the Government? Can not every line of business afford to pay the Government the actual cost of transacting its business? Why do we favor second-class mail matter by carrying it at a loss, or any other class of mail matter, so far as that is concerned—I do not care what it is? I do not think that any line of business has a right to ask the Government to transact its business for it at a loss, be it great or small; and the loss to the Government in carrying second-class mail is enormous, and that is admitted.

Mr. MOSES. I can only say to the Senator that two schools of thought exist with reference to that question also. The department, through its cost-ascertainment report, estimated the loss in the carrying of second-class mail matter at $76,000,000 a year, as I recall the figures. The publishers, however, maintained before the Joint Select Committee on Postal Rates—and maintained with very great force, and certainly with plausibility and with every show of accuracy—that the great publications more than paid the cost of handling in the mails. If we come to analyze second-class matter, however, it will be

found that the deficit of that class of mail arises from causes wholly dissociated with the great publications.

To begin with, every weekly paper printed in the United States is circulated in the county of its home office without paying any postage whatever. There are 6,000 publications which receive a preferential rate, a flat rate, all over the country—a rate approximating the very low rate on second-class mail matter which existed prior to the revenue legislation of 1917. To those two elements may be attributed the greater part of the deficit in second-class mail transportation. I imagine that no Senator would think of taking away from the country weekly the privilege of free circulation in the county; and when Senators reflect that the privileged class of second-class publications consists of the religious, scientific, educational, and agricultural publications, I imagine that most Senators would hesitate before depriving that class of publications of this preferential rate.

Mr. GOODING. Yet the Senator agrees with the department that its investigation of the cost of actually carrying the mail shows a loss now of $76,000,000. My understanding is that it is $86,000,000.

The point I am making is that these great publications that this bill will benefit have made a vicious attack upon agriculture in that they say that agriculture is "going to loot the Treasury" because it is asking a loan of something like $400,000,000 to enable the great business of agriculture to be carried on successfully; and that involves no loss to the Government. Every dollar will be paid back; but every year the Government is sustaining a loss in carrying second-class mail matter of, I say, from my information, $86,000,000, and you are going to add to that immense loss $7,600,000 more. It seems to depend on whose ox is being gored when we talk about "looting the Treasury."

Mr. MOSES. That is a fact with reference to most legislation that comes in.

Mr. PHIPPS. Mr. President, will the Senator yield for a question?

Mr. MOSES. I yield to the Senator from Colorado.

Mr. PHIPPS. I desire to know if it is the purpose of the Senator to ask that the amendments made by the Senate committee in the House bill shall be considered in their order?

Mr. MOSES. Yes.

Mr. PHIPPS. I thank the Senator.

Mr. KING. Mr. President, will the Senator yield to me?

Mr. MOSES. I yield to the Senator from Utah.

Mr. KING. If it is the purpose of the Government, as indicated in the response of the Senator to the queries propounded by the Senator from Ohio, to make the Post Office Department self-sustaining, and the House bill provides for a deficit of only $13,000,000 and the Senate bill for a deficit of $38,000,000, why would it not be better for us to take the House bill and reject the labors of the committee of which the Senator is the able chairman?

Mr. MOSES. One answer to that, Mr. President, is the argument of business generally that low prices stimulate trade, and that by reducing the rates on second-class matter we shall attract into the mails again this 100,000,000 pounds of second-class mail matter which was driven out by reason of the high rates. The other answer is that, in the language of a great leader of the party to which the Senator from Utah belongs, we are confronted by a condition and not a theory.

Mr. KING. May I propound another inquiry?

Mr. MOSES. Yes, indeed.

Mr. KING. In view of the Senator's statement that further investigations were needed, if I understood him correctly, I should like to ask him why, after these years of investigation—and I know that the question of postal rates has been the subject of investigation for many, many years—facts have not been elucidated that will enable us to determine whether the Post Office Department's figures are correct or not? They report a deficit of between seventy and eighty million dollars in carrying second-class mail matter.

Mr. MOSES. Yes.

Mr. KING. Those figures are challenged. With all of these investigations, and with the vast amount of figuring which has been done by experts who have worked upon this scheme, is the committee of which the Senator is chairman now uncertain as to what the facts are respecting that matter?

Mr. MOSES. I am very clearly of the opinion, Mr. President, that the great periodicals against which the chief complaint is registered in connection with the great volume of second-class matter are probably paying their own way, in view of the zone rate of postage applied to their advertising. The great item of cost which produces the deficit in the handling of second-class mail arises from the small publications, so slight in weight that some of them, as shown before the committee, would take 120 to the pound, and yet each one of those pieces has to be given the same handling that a periodical weighing 3 pounds would have; and the 120 pieces pay only the cent and a quarter rate in the first zone, whereas the pound piece pays the same, or in multiples of that, depending on the weight of the periodical. Those are conditions in the Postal Service which can not be obviated by legislation, as I believe, although I understand that the Senator from Colorado [Mr. PHIPPS] intends to offer an amendment—which, so far as I can, I shall accept and take to conference with the bill—which would obviate a great deal of this cost of individual piece handling, or, at any rate, would make that kind of mail much more nearly pay its way.

Mr. KING. May I make one observation in the Senator's time?

Mr. MOSES. Indeed, yes.

Mr. KING. If the Senate accepts the Senator's suggestion and passes the bill in order that it may go to conference for further investigation, I hope the Senator and the conferees will not deduce from our action that the Senate approves of this bill. I think I shall vote for it to go to conference, but I want to assure the Senator that I am very much opposed to the bill. I think it will operate as a very great injustice to the Government and will result in very great losses, and in voting for the bill in order to get it to conference I hope that the Senator, as a conferee—and I am sure he will be—will not take the vote of some of us as an approval of the bill.

Mr. MOSES. I assure the Senator that I shall not misinterpret his position.

Mr. KING. May I make one further observation?

Mr. MOSES. Yes, sir.

Mr. KING. I understood the Senator to say that the Post Office Department had never been self-sustaining. My recollection is that four years out of six, or six out of eight, during an administration different from that which is in power to-day, the Post Office Department showed a surplus instead of a deficit.

Mr. MOSES. Well, that is still a question.

Mr. COUZENS and Mr. LA FOLLETTE addressed the Chair.

The VICE PRESIDENT. Does the Senator from New Hampshire yield; and, if so, to whom?

Mr. MOSES. I yield first to the Senator from Michigan.

Mr. COUZENS. The Senator spoke of 100,000,000 pounds of mail matter going out of the service of the Post Office Department. Where does it go?

Mr. MOSES. Some of it is carried by express. Some of it is carried on trucks. Some of the large metropolitan newspapers, for instance, finding the zone rate to be, as they deem it, onerous, set up truck services of their own, which enabled them to take into the near-by territory their publications at a cheaper rate than that imposed by the postal rates.

Mr. COUZENS. Was that service satisfactory to them?

Mr. MOSES. Does the Senator mean the truck service?

Mr. COUZENS. Yes.

Mr. MOSES. Evidently not, because they want the lower rates so that they can put this matter back into the mails.

Mr. COUZENS. Evidently the service that they set up so as to take this matter out of the Post Office Department is not satisfactory; and they ought to pay materially more for better service, although they do not seem to be willing to do so.

Mr. MOSES. Possibly I made a bad choice of words, I will say to the Senator. There is a great element of safety to the mails when in charge of the Postal Service, which does not obtain when the mail is carried on trucks or by private conveyance. Most users of the mail look upon the element of safety as of very great value in the use of the mails.

Mr. COUZENS. Are they willing to pay for it?

Mr. MOSES. They think they are paying for it.

Mr. COUZENS. As I understand, the committee has not obtained any figures which enable them to arrive at even an approximate estimate as to whether that pays the cost of the service.

Mr. MOSES. I am willing to admit that there is no class of mail matter to-day, except letter mail, which is carried at anything like a profit in the Postal Service. In other words, the service exists for the purpose of rendering service.

Mr. COUZENS. Has the Senator any figures as to what the difference will be between the cost and what we receive on this particular class of mail as provided in the bill?

Mr. MOSES. The Senator means if the 100,000,000 pounds come in?

Mr. COUZENS. Yes.

Mr. MOSES. Immediately, I would say, we ought to get between six and eight million dollars.

Mr. COUZENS. Of additional revenue?

Mr. MOSES. Yes.

Mr. COUZENS. And to obtain that additional revenue, what will it cost the Government?

Mr. MOSES. In overhead, nothing.

Mr. COUZENS. No; but in actual transportation?

Mr. MOSES. The immediate reduction, according to these figures, $38,000,000.

Mr. COUZENS. So to get $6,000,000 worth of additional business we pay $38,000,000. Is that the idea?

Mr. MOSES. No; that is the business that is promised by the publishers to come in at once. Of course, it is thought that a great deal more will come in, and it probably will.

Mr. COUZENS. I understand the more that comes in the greater the deficit, because the actual handling is costing us more, regardless of the overhead.

Mr. MOSES. The Senator means the greater will be the cost on that particular class of mail?

Mr. COUZENS. Yes.

Mr. MOSES. That may be true, but the general deficit in the department will diminish from year to year.

I was in error in the figures which I gave to the Senator regarding the second class. I should not have charged this whole $38,000,000 to the second class, because, as the Senator would see from these figures which I quoted before, the total reduction in second-class zone rate revenues is $7,610,000, and we should get at least $6,000,000 immediately. My own opinion is we will get much more.

Mr. COUZENS. The Senator has not any figures, then, as I understand it, leaving the overhead out, which, of course, is reduced by the volume, as to the actual cost of the transportation between the new business we get and the actual cost of handling? The Senator has not any figures as to that?

Mr. MOSES. No; I do not think any exist.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. MOSES. I yield to the Senator.

Mr. NORRIS. I was interested in the colloquy the Senator just had with the Senator from Michigan, and I want to make inquiry of him about what he designated as the "truck" service. That applies particularly to the second-class mail?

Mr. MOSES. Yes.

Mr. NORRIS. The Senator says that is unsatisfactory to the people who are sending that kind of mail.

Mr. MOSES. Evidently, or they would not be clamoring to get back into the Government-carried mail.

Mr. NORRIS. The truck service is not Government operated?

Mr. MOSES. Not at all.

Mr. NORRIS. I believe the Senator said that the patrons sending that kind of matter through the mails regarded the Government service as much safer than the truck service.

Mr. MOSES. Yes.

Mr. NORRIS. I am rather dumbfounded at that. That would seem to indicate that the Government is doing more efficient business than these private parties who operate the trucks, where the blessed private initiative comes in. That seems to go contrary to the conviction that the Government ought to do no business, and that private people can do all business so much better.

Mr. MOSES. It ought to be said at that point, the Senator will admit, that the Postal Service is made up of very highly trained and responsible people, who have been long at it, and therefore have become very efficient.

Mr. NORRIS. Yes. I have an idea that argument would probably apply to other activities, like water power, and so forth.

I want to ask the Senator another question. On page 6 of the bill, referring to fourth-class matter, with the exception of a clause referring to a preceding paragraph, it seems to me that the charges for fourth-class matter in the first zone and in the second zone are exactly the same. Is that correct?

Mr. MOSES. In what zones?

Mr. NORRIS. The charges for mail matter in the first zone seem to be just the same as the charges in the second zone.

Mr. MOSES. Five cents; that is right.

Mr. NORRIS. Commencing on line 15, page 6, the paragraph seems to apply to postage rates on fourth-class matter in the first zone. Commencing in line 24, of the same page, the paragraph seems to apply to mail matter of that class in the second zone, but the charges are just the same.

Mr. MOSES. The Senator refers to the figure appearing in line 4 on page 7?

Mr. NORRIS. I am referring to the figures appearing in both those paragraphs.

Mr. MOSES. That is a typographical error, which I intended to have corrected as I came along to it. That should be 6 cents, in line 4, instead of 8.

Mr. NORRIS. In line 4?

Mr. MOSES. Yes.

Mr. NORRIS. Then, what about the 5 cents in line 24, on page 6, which is just the same as the 5 cents in line 16?

Mr. MOSES. That is true.

Mr. NORRIS. For that sized package, the charges in the two paragraphs are just the same.

Mr. MOSES. Yes; that is right.

Mr. NORRIS. What is the theory of the committee on that?

Mr. MOSES. That came to us, I will say to the Senator, by the somewhat circuitous route of the Post Office Department, the Post Office Committee in the House, and the House itself, and as originally drawn was carrying the zone service charge on all of the fourth-class matter. Because the service charge was there contained, that uniform rate was made in the first two zones. We have not undertaken to change those rates, because the opinion of the committee was that the parcels post could be made much more productive if we gave the uniform treatment in the two zones, the fact being that the great bulk of all the mails of all classes is carried in the first three zones.

Mr. NORRIS. Yes; but it always seemed to me that it was the theory of the parcels post—and I thought it was a correct one—that where there was any perceptible weight to a package, the distance of its transportation ought to be taken into consideration. For instance, you would take a package for delivery in the first zone for 5 cents for the first pound. For a pound package, or a package of any weight, it is 5 cents for the first pound, and 1 cent for each additional pound, and in the second zone it is 5 cents for the first pound and 1 cent for each additional pound.

Mr. MOSES. I think I can anticipate the Senator's thought about that by saying that the parcel post constitutes one of the great anomalies of the Postal Service, in that under the legislation of nine years ago, I think it was, the rate of compensation to the carriers was changed from a weight basis to a space basis, while we still continue to collect postal revenue on the weight basis. The result is that we find that the parcel post is very largely filled up, not with heavy packages, but with packages of considerable volume which are very light in weight.

Mr. NORRIS. As I understand it, then, the experience of the Post Office Department shows that for all practical purposes it costs just as much to the department to carry these packages the short distance of the first zone as it does the longer distance of the second zone?

Mr. MOSES. Yes; due to the changed character of the matter going into the mails.

Mr. LA FOLLETTE. Mr. President, will the Senator yield?

Mr. MOSES. I yield.

Mr. LA FOLLETTE. I do not desire to let the full implication of the statement made by the junior Senator from Utah [Mr. KING] go unchallenged. Of course, the Senator has a perfect right to explain his reasons for voting for or against any measure; but it seemed to me, as he made the statement, that the clear implication was that there was a large group in the Senate who would support this bill merely on the theory that it is to be sent to conference. So far as I am personally concerned, and I know from the discussion in the committee so far as the majority of the committee is concerned, we are sincerely in favor of the recommendations made by the committee, and I believe that there is an overwhelming majority in the Senate who are sincerely in favor of the recommendations made by the committee.

Mr. MOSES. The chairman of the committee shares the opinion expressed by the Senator from Wisconsin regarding the opinion of the Senate as to the provisions of this bill, and the chairman himself is supporting this bill because of his belief in the intrinsic merits of very many of the recommendations which the bill contains.

Mr. EDGE. Mr. President——

The PRESIDING OFFICER (Mr. WATERMAN in the chair). Does the Senator from New Hampshire yield to the Senator from New Jersey?

Mr. MOSES. I yield.

Mr. EDGE. Has the Post Office Committee any records as to the bulk of second-class matter carried following the raising of the rate in 1920 and again in 1921? In other words, did the bulk of second-class matter materially fall off when the rates were raised?

Mr. MOSES. Yes. I ought to say, however, to be perfectly frank with the Senator, that there was one other condition which may have contributed to that, and that was certain administrative features in the Post Office Department.

Mr. McKELLAR. Mr. President, will not the Senator speak louder?

Mr. MOSES. I am referring to a class of matter which is very dear to the Senator from Tennessee, the "blue-tag" matter.

Mr. McKELLAR. I thought the Senator was about to refer to that, and therefore I wanted to hear what he had to say.

Mr. MOSES. The administrative features in regard to the so-called "blue-tag" mail were so changed, in many instances

being wholly abolished, that a very great deal of mail matter was withdrawn because of that. That is, the class of second-class mail matter as to which we can not estimate the amount which will be returned. As I said to the Senator from Michigan a few minutes ago, we know, from the figures presented in the testimony by some of the publishers, that a hundred million pounds is coming back at once. We think that a great deal more is coming back, because, as a necessary concomitant of these rates, we believe that the "blue-tag" service will have to be reinstated; that has been talked over in an administrative way with the department, and we have good reason for believing that.

Mr. EDGE. Has the Senator in his investigation through the department, or with representatives of the department, reached the conclusion that, through a return to the lower rates of 1920, as provided, as I understand, under the bill, there will be a sufficient increase in second-class matter at the lower rate to enable the department to transport it at a profit, or even to break even with it? Has the committee gotten that far in its investigation?

Mr. MOSES. I think it is very likely that the Government will break even, and for the reason that because of the space method of compensating the railroads, we shall be able to utilize the space in the mail cars much better than we do now; that is to say, paying for space in a mail car by linear feet, the loadings will be higher toward the roof of the car, and, without any additional compensation to the carriers, I think without question this added volume of second-class mail matter will come in, and the added revenue will be practically all "velvet."

Mr. EDGE. Recurring to a question which I understand was asked by the Senator from Nebraska while I was not in the Chamber, of course, that might account for the fact of private interests being ready to give up their independent transportation, in order to get a very much lower rate, and the Government, on the other hand, being able to transport the matter at a lower rate because of the volume of business they have, which is an answer, I think, to the suggestion that some business interests are prepared to use the governmental service when it is handled in that way.

Mr. MOSES. When it suits their interest, of course.

Mr. EDGE. Exactly.

Mr. COUZENS. Mr. President——

Mr. MOSES. I yield to the Senator.

Mr. COUZENS. I can not let the statement of the Senator from New Jersey go by in that way, because the Senator from New Hampshire said that the service was better and more reliable when performed by the Post Office Department than it was when performed by private trucks.

Mr. MOSES. I maintain that position, I will say to both these Senators, who may be on opposite sides of the question of Government ownership. I maintain the statement just made, that the Postal Service is superior and safer, and that is why these people want to come in and use it.

Mr. EDGE. I want to add my word of compliment, and to say that after a service has been developed through years and years of training, I would hope it would be much better than a casual service put into effect by some business interests.

Mr. MOSES. Mr. President, if possible, I would like to have the committee amendments taken up in the order in which they appear in the printed bill.

Mr. McKELLAR. Mr. President——

The PRESIDING OFFICER. Does the Senator from New Hampshire yield to the Senator from Tennessee?

Mr. MOSES. I will yield the floor to the Senator from Tennessee, if he wishes to make a statement.

Mr. McKELLAR. I want to make a statement.

Mr. BLACK. Mr. President, I would like to ask the chairman of the committee a question.

Mr. McKELLAR. I yield to the Senator for that purpose.

Mr. BLACK. I have some letters here complaining about the third-class rate. It was originally a protest against what was known as the Griest bill.

Mr. MOSES. That has been corrected by the Senate committee.

Mr. BLACK. It has been corrected in part as to the objections this writer makes. I will tell the Senator what the objections are and ask him about them. This writer states that under this bill, in order to obtain the benefit of the cheaper rate on catalogues for mail-order houses, a man must ship as much as 20 pounds. Therefore, he claims, the little man would not receive the benefit of the reduced rate, and that it would result in permitting the mail-order houses further to drive out the small-town merchant.

Mr. MOSES. I can hardly conceive of any house big enough to use a catalogue of any size at all that would not be depositing pieces that would be at least 20 pounds in weight.

Mr. BLACK. What objection would there be to giving a man the benefit of that rate if he shipped as much as 1 pound? Is there any reasonable objection? I am asking for information.

Mr. MOSES. The Senator heard my colloquy with the Senator from Michigan, I think.

Mr. BLACK. On account of the confusion I could not hear it.

Mr. MOSES. The great cost in the Postal Service is in the handling. Each piece, no matter how small, has to receive just the same handling as the biggest piece, and necessarily when we set up a pound rate for one class of mail, if that pound is to be composed of 100 pieces it is going to cost a hundred times more to handle that pound than it will to handle but one piece which weighs a pound.

Mr. McKELLAR. Mr. President, if the Senator from Alabama will permit me in regard to that question, I would like to make this statement: The change in rate from one and a half cents to 1 cent absolutely cures the matter about which the Senator speaks.

Mr. MOSES. The Senator from Alabama does not think so, however. The correspondent of the Senator from Alabama apparently does not think so. The Senator from Tennessee and I think it does; in fact, I am absolutely positive about it, but the correspondent of the Senator from Alabama does not think so.

Mr. McKELLAR. His letter was evidently received before the Senate committee made the change from one and a half cents to 1 cent.

Mr. MOSES. I am quite sure of that, because the protest of the Senator's correspondent was directed toward the Griest bill.

Mr. BLACK. As amended. What is the reduction in third-class matter—from one and a half cents to 1 cent?

Mr. MOSES. Yes; together with the reduction that goes with the pound rate.

Mr. BLACK. It has been one and a half cents?

Mr. MOSES. Yes.

Mr. McKELLAR. Mr. President, I have just a few words to say about the matter. The Senator from New Hampshire has made a very fair statement of the bill as it comes from the Senate committee. I want to say to the Senate also that this is substantially the same bill that was passed by the Senate last year and sent to conference, but which was not reported from conference.

Mr. President, the principal changes from the Griest bill are three. The Griest or House bill provides for the 1921 rate on second-class matter, to wit, to the first and second zones the Griest bill has 1¾ cents, while this bill recommends the 1921 rate of 1½ cents; for the third zone, 2½ cents according to the Griest bill and 2 cents according to the pending bill; for the fourth zone, 4 cents according to the Griest bill and 3 cents according to the Senate bill; for the fifth zone, 4¾ cents in the Griest bill as against 3½ cents in this bill; for the sixth zone, 5½ cents in the Griest bill as against 4 cents in this bill; and for the seventh zone, 7 cents in the Griest bill as against 5 cents in this bill. In other words, the Senate restores the old rates of 1920, so far as second-class matter is concerned, and the Senate has gone on record before by a very considerable majority in favor of those rates.

As to the third-class matter, it will be remembered that the rate was 1 cent up until 1925, when the Congress passed a bill raising the rate to 1½ cents. What was the result? The result of that increase of one-half cent caused, according to the statistics, 800,000,000 pieces of mail to leave the Post Office Department. In other words, with the same freight rates, with the same overhead, with the increased salaries, we lost, because of the increase in rate, 800,000,000 pieces of mail matter from the mails. The result was a consequent large loss in the revenues of the department. It not only injured business but caused a great loss in revenue to the department.

Mr. NORRIS. Mr. President, may I ask the Senator how much was the loss in revenue?

Mr. McKELLAR. It has been variously estimated. We do not know, and it is very difficult to ascertain. We do know that this enormous bulk of mail was sent into other channels of distribution, such as trucks, freight, and express.

The same was true of second-class matter. What we did several years ago was to increase the rate to a greater degree than the traffic would bear. The result was that much of our mail traffic went into other channels, like trucks, freight, and some express, and in that way the Post Office Department has lost enormous quantities of mail matter. The 1920 rates on

second-class matter should be restored. Our joint committee took a great deal of proof, and the evidence was overwhelming that enormous quantities of second-class mail matter would be restored to the mails if the 1920 rates were restored. I have no doubt we will get more revenue from the 1920 rates than we do now, and more than we would if the 1921 rates were adopted as proposed in the House bill.

As to fourth class, we all remember the situation. We added in 1925 a service charge of 2 cents on each parcel-post package. It was not a scientific rate at all. We just added 2 cents on each parcel supposedly for the purpose of increasing the revenue. The effect it has had is very difficult to state. Business decreased very much. The normal increase of 7 per cent for the whole postal system was not sustained, and while it is a question of dispute, yet in my judgment we sustained a loss of revenue because of that charge of 2 cents on parcels post.

Those are the three principal changes between the so-called Griest or House bill and the Senate bill. The Senate has already gone on record in favor of the changes, and I hope the bill may pass and be sent to conference so that we may get a law reducing the rates.

In the matter of reduction of rates on post cards, let me say just a word in conclusion. The old rate was 1 cent and it remained that way up until 1925, when we increased it to 2 cents. What was the result? Instead of obtaining an increase in revenue we lost an enormous amount of revenue. Not only that, but we put more postal-card concerns out of business than we might imagine, if they testified before the committee according to the facts, and I think they did. I think the chairman of the committee will agree with me that the post-card concerns all over the country stated that they had virtually been put out of business by the increased rate. We not only put them out of business in that way, but we reduced the Government revenues. In other words, we did with post cards just what we did with second-class matter or rather third-class matter. We put on a greater charge than the traffic would bear.

Mr. BLACK. Mr. President——

Mr. McKELLAR. I yield to the Senator from Alabama.

Mr. BLACK. I understand that part of these rates have been reduced on account of the fact that the higher rates were driving certain mail matter away from the Government.

Mr. McKELLAR. Yes.

Mr. BLACK. I see that catalogues are now placed at 8 cents per pound. What reduction is that?

Mr. McKELLAR. That is the reduction on catalogues.

Mr. BLACK. A reduction of how much?

Mr. McKELLAR. I do not remember what the old rate was just at this moment. I took exactly the same view the Senator takes about it. I did not think there was any reason for it. I did not think it ought to be in the law, and for that reason I offered an amendment in the committee which proposed to reduce the rate, as the Senator will see on page 4 of the bill, from 1½ cents to 1 cent for each 2 ounces. The Senator, by a simple mathematical calculation, will see that the 1-cent rate for 2 ounces makes a pound rate of 8 cents, which is the same as the catalogue rate. I see no discrimination there. In other words, the catalogue houses will not get any cheaper rate than does the small user of the mails for that kind of literature.

Mr. BLACK. On pages 4 and 5 of the bill, certain classes of mail matter are carried at 12 cents per pound, but further down we find several changes, including mail-order catalogues, which are at 8 cents.

Mr. McKELLAR. I can easily see how the Senator is confused by it. If the Senator will notice the amendment on page 4, line 10, he will see that the pound rate was a rate established on the theory that the regular postage for 2 ounces would be 1½ cents. A reduction of the rate on books, catalogues, seeds, cuttings, bulbs, roots, scions, and plants to 8 cents would be a very substantial reduction. In other words, it would have given to those particular commodities substantially a 1-cent rate, depriving others of the use of that rate. The amendment now in the bill, which I offered in the committee, reducing third-class matter to 1 cent for 2 ounces corrects that situation and, of course, the pound rate is immaterial, because it is just the same as if the pound rate had been stricken out.

Mr. GOODING. Mr. President, I express the wish that the hopes of the Senator in charge of the bill and of the Senator from Tennessee will be realized, and that an increased business, with the reduction in the price charged for all classes of mail matter apparently as appears in the present bill, will be the result. But I want to say to them that I am satisfied they are going to be disappointed. The Saturday Evening Post is not using the Government mails for distribution of their publication to any great extent, because they find that they can do it much more inexpensively by freight in carload lots, and this is, no doubt, true of other great publications.

The Saturday Evening Post, in a large measure, is shipped out in carload lots by freight, and in that way distributed over the country, and, of course, it is done more cheaply than the Government can possibly do it. I believe at the present time the post office is as efficient in its line of business as any we have in the country and that there is no waste or extravagance there. I do not understand how any transportation company can carry the mail any cheaper than the Government is carrying it and yet give the same service. Of course, we know that the newspapers are using automobile trucks to a very large extent. They are going to continue to use them because it means quicker and better service to them. I am satisfied that the reduction which is being inserted in the bill will not bring about an increase in the business of the Government, so far as the transportation of mail is concerned. The loss is not due to the price the Government is charging.

Again I object, so far as I am concerned, and I shall vote against the bill. I do not believe the Government should transact business at a loss for anyone. It is a wrong policy and dangerous, to my mind, and against the best interests of the Government.

The PRESIDING OFFICER. The clerk will state the first amendment.

The first amendments of the Committee on Post Offices and Post Roads were, under "Second-class matter," on page 3, line 12, to strike out "one and three-fourths" and to insert "one and one-half"; in line 13, strike out "2½" and insert "2"; in line 14, strike out "4" and insert "3"; in line 15, strike out "4¾" and insert "3½"; in line 16, strike out "5½" and insert "4"; in line 17, strike out "7" and insert "5"; and in line 21, strike out "7¾" and insert "5½," so as to make the section relating to second-class matter read as follows:

SECOND-CLASS MATTER

SEC. 4. Section 202, paragraph (a) (2), of the act of February 28, 1925 (43 Stat. 1066, U. S. C., title 39, sec. 283), is hereby amended to read as follows:

"SEC. 202. (a) (2) On that portion of any such publication devoted to advertisements the rates per pound or fraction thereof for delivery within the eight postal zones established for fourth-class matter shall be as follows:

"For the first and second zones, 1½ cents.

"For the third zone, 2 cents.

"For the fourth zone, 3 cents.

"For the fifth zone, 3½ cents.

"For the sixth zone, 4 cents.

"For the seventh zone, 5 cents.

"For the eighth zone, and between the Philippine Islands and any portion of the United States, including the District of Columbia and the several Territories and possessions, 5½ cents."

The amendments were agreed to.

Mr. PHIPPS. Mr. President, I think before adopting these amendments seriatim as it is proposed to do, it should be understood that the Committee on Post Offices and Post Roads was not unanimous in reporting the amendments. It was a very narrow question, as I am informed, and as the chairman of the committee may state. I was unfortunately prevented from attending the committee meeting at the time the bill was ordered to be reported out, but I left my proxy with the chairman in opposition to the increases which have been made by the committee.

Mr. MOSES. Mr. President, I may say to the Senator from Colorado that I made that statement in my opening remarks regarding the bill. There was a division of opinion in the committee and there were many of the amendments against which I myself voted in the committee and I also voted the proxy of the Senator from Colorado.

Mr. PHIPPS. I thank the Senator. I was sure he would do so. I merely wanted to have that understood before the vote proceeded.

The next amendment of the Committee on Post Offices and Post Roads was, on page 4, under third-class matter, to change the rate from 1½ cents to 1 cent for each 2 ounces or fraction thereof.

The amendment was agreed to.

The next amendments were, under fourth-class matter, on page 6, line 12, to strike out the numeral "7" and insert the numeral "5"; in line 16, to strike out the numeral "7" and insert the numeral "5"; in line 24, to strike out the numeral "7" and insert the numeral "5"; on page 7, to strike out the numeral "8" and insert the numeral "6"; line 10, strike out the numeral "8" and insert the numeral "7"; line 13, strike

out the numeral "9" and insert the numeral "8"; line 16, strike out the numeral "10" and insert the numeral "9"; line 19, strike out the numeral "12" and insert the numeral "11"; line 25, strike out the numeral "13" and insert the numeral "12," so as to make the section read:

The postage on matter of the fourth class shall be as follows:

"On all matter mailed at the post office from which a rural route starts, for delivery on such route, or mailed at any point on such route for delivery at any other point thereon, or at the office from which the route starts, or on any rural route starting therefrom, and on all matter mailed at a city-carrier office, or at any point within its delivery limits, for delivery by carriers from that office, or at any office for local delivery, 5 cents for the first pound or fraction of a pound and 1 cent for each additional 2 pounds or fraction thereof.

"For delivery within the first zone, except as provided in the next preceding paragraph, 5 cents for the first pound or fraction of a pound and 1 cent for each additional pound or fraction of a pound (and except where the distance by the shortest regular mail route from the office of origin to the office of delivery is 300 miles or more, in which case the rates of postage shall be 8 cents for the first pound or fraction of a pound and 2 cents for each additional pound or fraction of a pound).

"For delivery within the second zone, 5 cents for the first pound or fraction of a pound and 1 cent for each additional pound or fraction of a pound (except where the distance by the shortest regular mail route from the office of origin to the office of delivery is 300 miles or more, in which case the rates of postage shall be 8 cents for the first pound or fraction of a pound and 2 cents for each additional pound or fraction of a pound).

"For delivery within the third zone, 6 cents for the first pound or fraction of a pound and 2 cents for each additional pound or fraction of a pound.

"For delivery within the fourth zone, 7 cents for the first pound or fraction of a pound and 4 cents for each additional pound or fraction of a pound.

"For delivery within the fifth zone, 8 cents for the first pound or fraction of a pound and 6 cents for each additional pound or fraction of a pound.

"For delivery within the sixth zone, 9 cents for the first pound or fraction of a pound and 8 cents for each additional pound or fraction of a pound.

"For delivery within the seventh zone, 11 cents for the first pound or fraction of a pound and 10 cents for each additional pound or fraction of a pound.

"For delivery within the eighth zone and between the Philippine Islands and any portion of the United States, including the District of Columbia and the several Territories and possessions, 12 cents for the first pound or fraction of a pound and 12 cents for each additional pound or fraction of a pound."

The amendments were agreed to.

Mr. MOSES. Mr. President, on page 7, line 4, a typographical error gives 8 cents as the rate. It should be 6 cents. I move the amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 7, line 4, strike out the numeral "8" and insert the numeral "6."

Mr. MOSES. This is the removal of the service charge. Through a typographical error it was not removed in this particular place.

Mr. McKELLAR. It is entirely all right.

The amendment was agreed to.

The next amendment was, on page 8, lines 3 to 9, to strike out the following proviso:

*Provided*, That the rate of postage on matter of the fourth class when mailed on rural routes shall be, for local delivery and for delivery within the first, second, and third zones, 2 cents less than the rates prescribed in this section, and for delivery within the fourth, fifth, sixth, seventh, and eighth zones, 1 cent less than the rates prescribed in this section.

The amendment was agreed to.

The next amendment was, on page 9, line 3, after the word "individual," to insert the words "as a service to county or other unit libraries or"; and in line 5, after the word "latter," to insert the words "libraries or readers"; and in line 8 to strike out "2 cents" and insert in lieu thereof "1 cent," so as to make the paragraph read:

(d) Books, consisting wholly of reading matter and containing no advertising matter other than incidental announcements of books, when sent by public libraries, organizations, or associations not organized for profit and none of the net income of which inures to the benefit of any private stockholders or individual, as a service to county or other unit libraries or as a loan to readers or when returned by the latter libraries or readers to such public libraries, organizations, or associations shall be charged with postage at the rate of 3 cents for the first pound or fraction thereof, and 1 cent for each additional pound or fraction thereof, except that the rates now or hereafter prescribed for third or fourth class matter shall apply in every case where such rate is lower than the rate prescribed herein for books under this classification: *Provided*, That this rate shall apply only to such books as are addressed for local delivery, for delivery in the first, second, or third zone, or within the State in which mailed.

The amendment was agreed to.

Mr. COPELAND. Mr. President, if I am inclined to find fault with this section, may I ask the chairman of the committee, the Senator from New Hampshire, whether I should do so now?

Mr. MOSES. If the Senator wishes to offer the amendment to this section which he offered in the committee, I would like to have him wait until the committee amendments are disposed of.

Mr. COPELAND. Very well.

Mr. MOSES. That completes the committee amendments.

The PRESIDING OFFICER. The bill is in Committee of the Whole and open to amendment.

Mr. PHIPPS. Mr. President, I send to the desk an amendment, which I ask to have read and which I will explain.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 3, after line 21, insert:

That section 202, Title II, act of February 28, 1925, is amended by the addition of a paragraph 4, to read as follows:

"(4) *Provided*, That in the case of publications entered as second-class matter where the number of individually addressed copies or packages to the pound is more than 16 and not in excess of 32, the rates of postage thereon shall be double the rates prescribed in paragraphs (1), (2), and (3)a of the act of February 28, 1925; where the number of individually addressed copies or packages to the pound is more than 32 and not exceeding 48, the rates of postage shall be three times the regular rates, and for each additional 16 individually addressed copies or packages, or fractional part of such number of copies or packages, there may be to the pound the rates of postage shall be correspondingly increased over the regular rates."

Mr. MOSES. Mr. President, I will say to the Senator from Colorado that, unless he wishes to make a statement about the amendment, I am prepared, so far as I am personally concerned, to accept it.

Mr. PHIPPS. I am glad to have that done.

Mr. McNARY. That authority does not lie within the chairman of any committee.

Mr. MOSES. I said "so far as I am personally concerned."

Mr. McNARY. That is not very far. I want to have the amendment stated. I do not know about it. It did not sound very good to me as it was read. I am not familiar with it and I certainly shall insist upon having it presented.

Mr. PHIPPS. If the Senator desires to have the amendment read again, I will wait for that; otherwise I will try to explain the purpose of it.

Mr. McNARY. I understood the language as read, but I am asking for an explanation of the purpose of the amendment.

Mr. PHIPPS. I am quite willing to offer an explanation.

The amendment is intended to cover a character of publications which are registered in the Post Office Department, under existing law and rule, as second-class matter. They are put out by different organizations in small pamphlet form and in many instances consist of not more than two or four pieces of paper no larger than the ordinary Senate committee reports, so that in many cases there are not in excess of 100 or 200 on which the pound rate is charged.

The purpose of the amendment is to assess against each 16 pieces weighing less than a pound the additional charge, which will not begin to cover the handling cost. It is estimated that the cost of handling and delivering a postal card is at least three-fourths of a cent; two postal cards, a cent and a half. But here we are delivering hundreds of these pieces of literature, great portions of which are wastebasket stuff—those that come to me are largely so—at a very excessive cost for service, for which there is no real compensation. The Post Office Department favors making this charge, and does not consider that it is an unreasonable charge for the service required.

Mr. McNARY. Mr. President, the subject is an entirely new one to me. It may be a very plausible effort legitimately to improve the service. It does appear to me, though, from reading the bill, that it makes a higher assessment against the small weekly papers of the country than against the great, large magazines published in the metropolitan centers of the country.

Mr. PHIPPS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Oregon yield to the Senator from Colorado?

Mr. McNARY. I do.

Mr. PHIPPS. I call the Senator's attention to the fact that in the third classification there is a similar requirement for pieces of mail matter of minimum weight. This proposition has

been under consideration for three or four years, at least, and is favored by the Post Office Department.

Mr. McNARY. That is not very persuasive.

Mr. PHIPPS. The fact is that it woud bring quite a large amount of additional revenue to the service.

Mr. McNARY. Mr. President, I heard it said on this floor in former years by some who believed they had the knowledge to make the assertion that the cost to the Government of the services it rendered to the Curtis Publishing Co., which publishes the Saturday Evening Post, the Country Gentleman, and the Ladies' Home Journal, read by town people, was equal to a subsidy to that company of from eight to ten million dollars a year. That assertion, be it so or not, is in the CONGRESSIONAL RECORD. I am not at this time complaining about that situation, though I do not think it is fair if it is true. It does occur to me that the small newspapers, the weekly papers, the semi-weekly papers——

Mr. PHIPPS. The amendment would not affect them.

Mr. McNARY. Pardon me just a moment—and the papers published in medium-sized rural districts and communities would suffer by reason of the adoption of the amendment of the Senator from Colorado as compared with the magazines and metropolitan press throughout the country. If my interpretation is wrong I shall subside.

Mr. PHIPPS. It does not cover that class of matter.

Mr. McKELLAR. I had the same understanding from the Senator from Colorado, that it does not affect the country weeklies.

Mr. PHIPPS. It does not.

Mr. McKELLAR. If it does, I take the same attitude that the Senator from Oregon does; but I was assured by the Senator from Colorado that it did not affect them.

Mr. PHIPPS. It is not intended to, and I believe it will not affect them.

Mr. MOSES. Mr. President, will the Senator permit an interruption?

Mr. McNARY. Not for a moment. It is all new to me. The language appeared a little uncertain in that respect; hence I asked an explanation of the matter. If the committee has given thought to that phase of the matter and can assure the Senate that it is not the way in which the bill will operate, I shall not further oppose the amendment.

Mr. MOSES. Mr. President, I think I can thoroughly assure the Senator from Oregon that this amendment does not affect the small country weekly, because, in the first place, it does not in any sense change the free-in-county privilege; and so far as the experiments go which were performed before the committee, I do not recall any country weekly, even the small ones which were seeking the second-class privilege, which fall within this category of weights.

The PRESIDING OFFICER. The question is upon the amendment proposed by the Senator from Colorado.

The amendment was agreed to.

Mr. McMASTER. Mr. President, I send to the desk an amendment proposing to strike out all after the words "Section 9," and to insert in lieu thereof the matter which I am sending to the desk, and to add a new section, section 10, which comprises the language now contained in section 9.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. It is proposed to insert as a new section——

Mr. McMASTER. Beginning with the words "Section 9," I move to strike out all of the present section and to insert the amendment which I am sending to the desk, and the new section 10 would then be comprised of the language contained in the present section 9.

Mr. McKELLAR. The Senator refers to the two sections at the end of the bill?

Mr. McMASTER. At the end of the bill.

The CHIEF CLERK. On page 12, line 12, after the numeral "9," it is proposed to strike out the present section 9 and to insert in lieu thereof the following:

SEC. 9. The Postmaster General is authorized and directed to appoint a director of parcel post, whose chief duty shall be to encourage the use of parcel post and who have the authority to initiate and to carry into effect, subject only to the approval of the Postmaster General, adjustments and modifications of service, regulations, and policies affecting parcel post, not inconsistent with existing statutes. The director of parcel post shall be appointed subject to the civil service laws and his compensation fixed in accordance with the classification act of 1923.

And to insert as section 10 the present section 9.

The PRESIDING OFFICER. The question is upon the amendment proposed by the Senator from South Dakota.

Mr. KING. Mr. President, I should like to ask the chairman of the committee if it is his purpose to accept the amendment offered, which to me seems, if I may be pardoned for saying so, wholly unnecessary and somewhat revolutionary.

Mr. MOSES. As far as I may, I am prepared to accept the amendment, for this reason, I will say to the Senator from Utah: The discussion of this particular subject in the committee developed so much opinion in favor of it that I am quite sure that if it had ever been brought to a formal vote it would have been brought here by the committee itself.

Mr. KING. Mr. President, I shall be very glad to have the Senator from South Dakota, if he cares to do so, make some explanation of the amendment. If not, I desire to submit a few observations against it.

Mr. McMASTER. I suggest that the Senator make his observations first.

Mr. KING. Mr. President, this is the first suggestion I have heard of this amendment. It seems to me that it is an attempt, first, to create a new office which is unnecessary, and, secondly, to encourage the utilization of the post-office system for the carrying of freight.

Many evidences have been brought to my attention of the fact that there has been a perversion of the functions of the Post Office Department. It was created for the purpose of carrying the mails. It is being utilized to a large extent for the purpose of carrying freight. I have seen lumber and shingles and flour and coal and all sorts of commodities carried under the parcel-post provisions. That has been notably the case where traffic has been interrupted because of bad roads, cold weather, and so forth.

I recall a situation when for weeks it was difficult for vehicles to cross the mountains for the purpose of carrying needed freight to the people. It could be carried, but the charges were very heavy; so those who desired to send freight to the valley to which I refer concluded that they would have it sent by parcel post. They put the flour into 50-pound sacks and they placed other commodities in small bundles or boxes and sent them through the mails, thus costing the Government literally hundreds of dollars during that period. That is a perversion of the use of the mails.

We do not need to encourage the use of the Parcel Post System. I think it is being used now in an improper way, and at a great loss to the Government. We have excellent transportation systems, our railroads and trucks furnish practical and efficient means for the transportation of freight and all forms of commodities. To utilize the mail service to carry freight and commodities which should be hauled by express companies or transportation companies appears to me to be an improper use of an instrumentality or agency of the Government.

If there are some limitations upon the size of the articles which will be sent, if there shall be some proper classification of the commodities which may be transmitted through the mail, that is one thing; but the Parcel Post System is being abused and there should be no effort to increase the evil.

Just one word in regard to the first point:

The Post Office Department now has a large personnel. It is well organized. The Postmaster General has various assistants who are familiar with all of the functions of the department. It is not necessary to create a new bureau or a new organization or agency in the department to make available proper benefits to be derived from the Parcel Post System.

Therefore, Mr. President, I am opposed to this amendment.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from South Dakota [Mr. McMASTER].

The amendment was agreed to.

Mr. COPELAND. Mr. President, I send to the desk an amendment which I shall ask to have stated in a moment. It is a long amendment, and perhaps I can explain what it is at the same time that I comment upon it. I should like to have the attention of Senators, because there is not one here who has not had this matter discussed with him. It relates to the postage on books.

Forty-four per cent of the people of this country are not within reach of libraries or bookstores. Fifty million of our citizens have no contact with libraries or bookstores; and it seems only fair that provision should be made for the carriage of books through the mails. If the matter happens to be fiction, when this fiction is printed in a magazine it is carried to the people at a very low rate; but when it is bound in the form of a book the rate is exorbitant, as many of us view it.

The committee did make some concessions and arranged in the bill that books sent to libraries or from libraries within the State or within the first three zones should have a special rate; but that does not take care of 50,000,000 of our people. So I urge upon Senators the fact that everybody who buys a book and has it sent by mail from the publisher in New York or in Boston or in Pittsburgh or Chicago has to pay the list price of

that book, plus the postage upon it, and that represents a very considerable sum of money, which comes out of the pockets of worth-while people who are sufficiently interested in these books to order them. It does not relate to fiction, because it develops that only a fraction of the books ordered in this way are fiction. These books are substantial books, making for the education and the welfare of the people. Every doctor, every lawyer, every engineer, every teacher, every person who desires a substantial book on history or economics or some other subject, must pay this tax in excess of what would be charged if the matter contained in that book were printed in a publication.

Therefore, Mr. President, I present this amendment, and trust that the chairman of the committee—who is amiable this morning, as always, and, I am sure, in sympathy with the purpose of the amendment—will be glad to accept it for the committee.

The PRESIDING OFFICER. The Senator from New York offers an amendment, which will be stated.

The CHIEF CLERK. On page 8, line 23, it is proposed to strike out all to and including line 21, on page 9, and to insert in lieu thereof the following:

(c) Books, consisting wholly of reading matter and containing no advertising matter other than incidental announcements of books, shall be charged with postage at the rate of 2½ cents per pound or fraction thereof, with a minimum charge of 3 cents for each parcel and subject to the same maximum weights per parcel now prescribed by law for mail matter of the fourth class, except that the rate now or hereafter prescribed for third or fourth class matter shall apply in every case where such rate is lower than the rate prescribed herein for books under this classification: *Provided, however,* That such books when sent by public libraries, organizations, or associations not organized for profit, and none of the net income of which inures to the benefit of any private stockholder or individual, as a service to county or other unit libraries or as a loan to readers or when returned by the latter libraries or readers to such public libraries, organizations, or associations, if addressed for local delivery, for delivery in the first, second, or third zone or within the State in which mailed, shall be charged with postage at the rate of 3 cents for the first pound or fraction thereof, and 1 cent for each additional pound or fraction thereof, except that the rate now or hereafter prescribed for third or fourth class matter, or the special rate provided by this subdivision for books, shall apply in every case where either of such rates is lower than the rate prescribed for library books.

Public libraries, organizations, or associations before being entitled to the foregoing rates shall furnish to the Postmaster General under such regulations as he may prescribe, satisfactory evidence that none of the net income of such organizations inures to the benefit of any private stockholder or individual.

Mr. MOSES. Mr. President, I am in thorough sympathy with the principle of disseminating information; but I am not in favor of this amendment, because the committee feels that by the amendments already incorporated in the bill with reference to the cheapened circulation of books from libraries within the States where the loaning library system prevails we have gone as far as would be possible.

I wish simply to call attention to one fact which was brought out in the hearings on the amendment which the Senator now proposes, and which was debated at some length before the committee.

The president of a great publishing company testified that 60 per cent of all books are shipped by freight and 25 or 30 per cent by express. The Post Office Department is clearly of the opinion that if this rate is made for books, as proposed by the Senator from New York, the books now sent by freight and express will be brought into the mail and carried at a loss estimated—and we can estimate only by parcel post—at one-eighth of a cent a pound for each book so transported.

Mr. COPELAND. Mr. President, one closing word, because I assume that this amendment will be annihilated, and die a-borning. This is of interest to every Senator, and to practically every constituent of every Senator.

If we are seeking to disseminate knowledge through good books, we should make it possible for those of our citizens who are not within reach of libraries to buy these books as reasonably as possible. If you buy a $2 book, it will add anywhere from 17 to 25 cents to the cost of that book if it is sent by mail; and that is an exorbitant charge.

I therefore appeal to Senators to give this amendment consideration, because I feel that it is in the interest of the common people.

The PRESIDING OFFICER. The question is on the amendment of the Senator from New York. [Putting the question.] By the sound the noes seem to have it.

Mr. COPELAND. I should like to have a division on this question.

On a division, the amendment was rejected.

The bill was reported to the Senate as amended, and the amendments were concurred in.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

### LOAD LINES FOR AMERICAN VESSELS

Mr. JONES. Mr. President, I ask unanimous consent for the immediate consideration of the bill (S. 1781) to establish load lines for American vessels, and for other purposes. When this bill was called once before on the calendar the Senator from Utah asked that it might go over.

I want to say with reference to the bill that it deals with ships in foreign trade only. It has been urged that it should deal with vessels in the coastwise trade, and possibly it should, but ships in the foreign trade are in a different situation from those in the coastwise trade, and the passage of this would not in anywise prejudice a bill relating to the coastwise trade.

Mr. ROBINSON of Arkansas. Will the Senator explain what the purpose of the bill is?

Mr. JONES. Briefly, the purpose is to provide for the placing of a load line on vessels in the foreign trade of over 250 tons. As it is now, our ships are entering English ports and other foreign ports simply upon sufferance. We have no load line established, and the authorities in the foreign countries have been threatening to shut our ships out unless we conform to their load line laws. But on the assurance of this Government that we would pass legislation taking care of the matter, they have been postponing their action from time to time. This is to meet that situation.

Mr. ROBINSON of Arkansas. Is the bill reported by the committee unanimously?

Mr. JONES. The report of the committee is unanimous. A similar bill has been reported from the Committee on Commerce, I think, in three different Congresses.

Mr. KING. Mr. President, will the Senator yield?

Mr. JONES. I yield.

Mr. KING. Did I understand the Senator to state that our merchant marine—that is, those who are engaged in trans-Atlantic business—are loading their ships too heavily?

Mr. JONES. I do not know whether they are or not, but we have no load line established by law, and, as I have said, the British authorities, especially, have been threatening to enforce against our ships the English load line law. In other words, they have been threatening not to let them enter their ports unless their load lines conformed with the English law. I do not know of any particular instances where the vessels have been overloaded. There was testimony before the committee, however, that some ships had been lost, and the surmise was that they were really overloaded, and that that possibly was the cause of their loss. That was not definitely shown, however. The embarrassing situation that may come about would result from the action of foreign governments enforcing their load line laws against our ships, because we have no load line established by our law.

Mr. KING. Mr. President, will the Senator permit another question?

Mr. JONES. Yes.

Mr. KING. Suppose we should pass a law which would fix a load line, or set up an agency which might fix a load line, and that was entirely different from the load line prescribed in Great Britain, for instance, or in Germany, would that difference result in the exclusion of our vessels from their ports?

Mr. JONES. I have not a copy of the bill before me just now, but my recollection is that there is a provision in the bill under which we would recognize the load lines established by other countries, and they would recognize the load line established by this country, at least that is the understanding. In my judgment, we would make our own load line practically correspond with the English load line.

Mr. KING. I shall not object to the consideration of the bill, but several persons, and among them Mr. Furuseth, who knows more about shipping than any man in the Senate, I think, and who is usually very sane and fair in his presentation of questions relating to marine matters, has told me, and I have a memorandum—but not anticipating that this would come up, I did not bring it with me from my office to-day—to the effect, first, that there is no necessity for the passage of this measure; and, secondly—and this was the matter he emphasized—that efforts had been made for a number of years to secure a load line law with respect to our coastal and intercoastal boats, and those engaged in shipping of that character had sufficient influence to prevent the passage of such a law.

They did not want a load line law; they wanted to load too heavily; he saw in this bill an opportunity to secure proper legislation dealing with our coastwise trade, and he was afraid

that if this bill were passed we would encounter the same obstacles and influences in the future as in the past that defeated efforts to secure a proper load line law for the vessels to which I have just referred. Therefore he was very much opposed to the passage of this bill unless and until there should be included within it provision that the load line should be prescribed with respect to the coastwise trade.

Mr. JONES. Mr. President, I want to say to the Senator that I have the same opinion of Mr. Furuseth he has. I have every confidence in his judgment in regard to matters of this kind. It was in conformity with his views with reference to some of these matters that the committee made changes in the bill, for instance, reducing the minimum tonnage requirement from 500 to 250. But the main reason why the committee reported this bill relating to foreign trade is the situation in the foreign countries I have described to the Senator. I shall be glad to enter upon the consideration of legislation extending this to the coastwise trade. My impression now is that this ought to be done, especially for certain ports on our coast, anyhow. My sympathies are that way.

Mr. KING. It does seem to me that because we are seeking the safety—for that is the object of it—of ships that cross the Atlantic, we ought to seek the safety of ships that go from port to port on our own coast line.

Mr. JONES. I agree with the Senator, and I shall support legislation of that kind.

Mr. KING. I shall offer a bill to-morrow and have it referred to the Senator's committee, and I hope he will give it attention, because I do think the appeals of Mr. Furuseth and those for whom he speaks ought to have consideration.

Mr. JONES. I agree with the Senator.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.,* That load lines are hereby established for the following vessels:

SUBSECTION 1. (a) Cargo-carrying vessels of 250 gross tons or over, loading at or proceeding to sea from any port or place within the United States or its possessions for a foreign voyage by sea.

(b) Cargo-carrying vessels of the United States of 250 gross tons or over, loading at or proceeding to sea from any foreign port or place for a voyage by sea.

SUBSEC. 2. The Secretary of Commerce is hereby authorized and directed in respect of the vessels defined in subsection 1 (a) and (b) of this section to establish by regulations from time to time in general accordance with the practice of the principal maritime nations the load water lines and marks thereof indicating the maximum depth to which such vessels may safely be loaded: *Provided,* That no load line shall be established or marked on any vessel, which load line, in the judgment of the Secretary of Commerce, is above the actual line of safety. Such regulations shall have the force of law.

SUBSEC. 3. It shall be the duty of the owner and of the master of every vessel subject to this section and to the regulations established thereunder to cause the load line or lines so established to be permanently and conspicuously marked upon the vessel in such manner as the Secretary of Commerce shall direct, and to keep the same so marked. The Secretary of Commerce shall appoint the American Bureau of Shipping, or such other American corporation or association for the survey or registry of shipping as may be selected by him, to determine whether the position and manner of marking on such vessels the load line or lines so established are in accordance with the provisions of this act and of the regulations established thereunder: *Provided, however,* That at the request of the shipowner the Secretary of Commerce may appoint, for the purpose aforesaid, any other corporation or association for the survey or registry of shipping which the shipowner may select and the Secretary of Commerce approve; or the Secretary of Commerce may appoint for said purpose any officer of the Government, who shall perform such services as may be directed by the Secretary of Commerce. The Secretary of Commerce may, in his discretion, revoke any appointment made pursuant to this section. Such corporation, association, or officer shall, upon approving the position and manner of marking of such load line or lines, issue a certificate, in a form to be prescribed by the Secretary of Commerce, that the same are in accordance with the provisions of this act and of the regulations established thereunder, and shall deliver a copy thereof to the master of the vessel. It shall be unlawful for any vessel subject to this section and to said regulations to depart from any port or place designated in subsection (1) of this section without bearing such mark or marks, approved and certified by such corporation, association, or officer, and without having on board a copy of said certificate.

SUBSEC. 4. It shall be unlawful for any vessel subject to this section and to the regulations established thereunder to be so loaded as to submerge, in salt water, the load line or lines marked pursuant to this act and to the regulations established thereunder applicable to her voyage; or so as to submerge under like conditions the point where such load line or lines ought to be marked pursuant to the provisions of this act and of the regulations established thereunder; or so as in any manner to violate the said regulations.

SUBSEC. 5. Whenever the Secretary of Commerce shall certify that the laws and regulations in force in any foreign country relating to load lines are equally effective with the regulations established under this act, the Secretary of Commerce may direct, on proof that a vessel of that country has complied with such foreign laws and regulations, that such vessel and her master and owner shall be exempted from compliance with the provisions of this section, except as hereinafter provided: *Provided,* That this subsection shall not apply to the vessels of any foreign country which does not similarly recognize the load lines established under this act and the regulations made thereunder.

SUBSEC. 6. It shall be the duty of the master of every vessel subject to this section and to the regulations established thereunder and of every foreign vessel exempted pursuant to subsection 5 of this section, before departing from her loading port or place for a voyage by sea, to enter in the official log book of such vessel a statement of the position of the load-line mark applicable to the voyage in question with reference to the actual water line at the time of departing from port as nearly as the same can be ascertained.

SUBSEC. 7. If any collector of customs has reason to believe, on complaint or otherwise, that a vessel subject to this section and to the regulations established thereunder is about to proceed to sea from a port in the United States or its possessions within his district when loaded in violation of subsection 4 of this section, or that any vessel exempted pursuant to subsection 5 of this section is about to proceed to sea from such port when loaded in violation of the laws and regulations of her country with respect to load line, he may by written order served on the master or officer in charge of such vessel detain her provisionally for the purpose of being surveyed. The collector shall then serve on the master a written statement of the grounds of her detention and shall appoint three distinterested surveyors to examine the vessel and her loading and to report to him, whereupon the said collector may release or may by written order served on the master or officer in charge of such vessel detain the vessel until she has been reloaded in whole or in part so as to conform to subsection 4 of this section; or, in case of a vessel exempted pursuant to subsection 5 of this section, so as to conform to the laws and regulations of her own country with respect to load line. If the vessel be ordered detained, the master may, within five days, appeal to the Secretary of Commerce, who may, if he desires, order a further survey, and may affirm, set aside, or modify the order of the collector. Clearance shall be refused to any vessel which shall have been ordered detained.

SUBSEC. 8. (a) If the owner or master of any vessel subject to this section and to the regulations established thereunder shall permit her to depart from her loading port or place without having complied with the provisions of subsection 3 of this section, he shall for each offense be liable to the United States in a penalty of $500. If the owner or master of any vessel exempted pursuant to subsection 5 of this section shall permit her to depart from her loading port or place without having the load line or lines required by the laws and regulations of the country to which she belongs marked upon her as required by said laws and regulations, he shall for each offense be liable to the United States in a penalty of $500. The Secretary of Commerce may, in his discretion, remit or mitigate any penalty imposed under this paragraph, or discontinue prosecution therefor on such terms as he may deem proper.

(b) If the master of any vessel subject to this section and to the regulations established thereunder, or of any foreign vessel exempted pursuant to subsection 5 of this section, shall fail, before departing from her loading port or place, to enter in the official log book of such vessel the statement required by subsection 6 of this section, he shall for each offense be liable to the United States in a penalty of $100. The Secretary of Commerce may, in his discretion, remit or mitigate any penalty imposed under this paragraph.

(c) If any person shall knowingly permit or cause or attempt to cause any vessel subject to this section and to the regulations established thereunder to depart, or if, being the owner, manager, agent, or master of such vessel, he shall fail to take reasonable care to prevent her from departing from her loading port or place when loading in violation of subsection 4 of this section, or if any person shall knowingly permit or cause or attempt to cause a foreign vessel exempted pursuant to subsection 5 of this section to depart, or if, being the owner, manager, agent, or master of such vessel, he shall fail to take reasonable care to prevent her from departing from her loading port or place when loaded more deeply than permitted by the laws and regulations of the country to which she belongs, he shall, in respect of each offense, be guilty of a misdemeanor, unless her going to sea in such condition was, under the circumstances, reasonable and justifiable, and shall be punished by a fine not to exceed $500.

(d) If the master of any vessel or any other person shall knowingly permit or cause or attempt to cause any vessel to depart from any port or place in the United States or its possessions in violation of any order of detention made pursuant to subsection 7 of this section, he

shall, in respect of each offense, be guilty of a misdemeanor and shall be punished by a fine not to exceed $500 or by imprisonment not to exceed three months, or both such fine and imprisonment, in the discretion of the court.

(e) If any such person shall conceal, remove, alter, deface, or obliterate or shall suffer any person under his control to conceal, remove, alter, deface, or obliterate any mark or marks placed on a vessel pursuant to this section or to the regulations established thereunder, except in the event of lawful change of said marks, or to prevent capture by an enemy, he shall in respect of each offense be guilty of a misdemeanor and shall be punished by a fine not to exceed $1,000, or by imprisonment not to exceed one year, or both such fine and imprisonment, in the discretion of the court.

(f) Whenever the owner, manager, agent, or master of a vessel shall become subject to a fine or penalty by way of money payment pursuant to the provisions of this section, the vessel shall also be liable therefor and may be seized and proceeded against in the district court of the United States in any district in which such vessel may be found.

SUBSEC. 9. This section shall take effect one year after the approval of this act or at such earlier time as the Secretary of Commerce may fix.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MESSAGE FROM THE HOUSE—ENROLLED BILL

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the Speaker had affixed his signature to the enrolled bill (H. R. 10151) to amend section 9 of the Federal reserve act.

ARMORY DRILL PAY

Mr. BINGHAM. Mr. President, I ask unanimous consent for the immediate consideration of the bill (S. 4216) to authorize the adjustment and settlement of claims for armory drill pay.

This is a very brief bill, authorizing the Comptroller General to adjust and settle and present to Congress for payment certain claims for money due the National Guard for drill pay during the years 1917, 1918, and 1919, which moneys went back into the Treasury because the pay rolls of the National Guard were not in order.

The War Department has asked for the passage of this bill. The total amount involved, I am informed by the Secretary of War, will not be over $80,000, which represents money owed and due to officers and men of the National Guard for drills which they have performed.

Mr. ROBINSON of Arkansas. Has the bill been unanimously reported by the committee?

Mr. BINGHAM. It is unanimously reported by the committee.

Mr. ROBINSON of Arkansas. And is it recommended by the War Department?

Mr. BINGHAM. It was prepared by the War Department, and recommended by the department.

Mr. ROBINSON of Arkansas. Very well; I have no objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. KING. Let the bill be read.

The Chief Clerk read the bill, as follows:

*Be it enacted, etc.,* That the Comptroller General of the United States be, and he is hereby, authorized and directed to adjust and settle claims for pay for services rendered during the fiscal years 1917, 1918, and 1919, or any portion thereof, for which appropriations are now being made pursuant to sections 67 and 92 of the national defense act, approved June 3, 1916, as amended, and certify such settlements to Congress from time to time.

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

REMOVAL OF CONFEDERATE MONUMENT TO GARFIELD PARK

Mr. FESS. Mr. President, I ask unanimous consent that we proceed to the consideration of the bill (H. R. 7475) to provide for the removal of the Confederate monument and tablets from Greenlawn Cemetery to Garfield Park.

This bill is to grant authority to remove a Confederate monument in the city of Indianapolis out to a new cemetery, as a place better fitted for the monument. The old cemetery, where the monument is now located, is being abandoned. We can not remove the monument unless we have the authority of Congress.

Mr. ROBINSON of Arkansas. Is the bill reported unanimously by the committee?

Mr. FESS. It is reported unanimously.

Mr. ROBINSON of Arkansas. I have no objection.

Mr. BRATTON. Have any protests or objections reached the Senator against this bill?

Mr. FESS. No; everyone is in favor of it.

Mr. KING. Let the bill be read.

The PRESIDING OFFICER. The clerk will read.

The Chief Clerk read the bill, as follows:

*Be it enacted, etc.,* That the Secretary of War is authorized and directed to provide for the removal of the Confederate monument and tablets erected by the United States from Greenlawn Cemetery, Indianapolis, Ind., to Garfield Park, Indianapolis, Ind.

SEC. 2. That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $3,000, or so much thereof as may be necessary to carry out the provisions of this act.

Mr. KING. I would like to ask the Senator from Ohio whether any Confederate organization has been advised about the pendency of this bill.

Mr. FESS. I have no information on that score, but I understand that there is no opposition to it. In fact, it is to take care of the monument.

Mr. HARRIS. I would like to say to the Senator from Utah that the Confederate organizations are very much interested in this bill, and hope it will pass.

Mr. FESS. That is my understanding.

Mr. KING. My anxiety was in seeing that a Confederate monument which had been erected with the approval of those interested should not be removed without the consent of the organization which was responsible for it.

Mr. FESS. As I understand it, it is the wish of all concerned that this should be done.

Mr. KING. I have no objection.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

TITLE TO LAND IN MILITARY RESERVATIONS

Mr. FLETCHER. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the bill (S. 3752) to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926. It is a local bill, intended to take care of a situation at the Government reservation at Pensacola, Fla., where we are authorizing the War Department to dispose of certain lots. We did this in 1926, but there was an error in punctuation, and we are trying to correct that legislation.

Mr. KING. Is it correctly punctuated now?

Mr. FLETCHER. It is.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

Mr. CURTIS. Let the bill be read.

The PRESIDING OFFICER. The clerk will read the bill.

The bill was read, as follows:

*Be it enacted, etc.,* That section 3 of an act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes, be, and the same is hereby, amended to read as follows:

"SEC. 3. The Secretary of War is hereby authorized, directed, and empowered, in the event it be found that any citizen of the United States, or the ancestors, the assignors, or the predecessors in title of a citizen, either separately or by tacking, shall have for a period of 20 or more years immediately preceding the approval of this act resided upon and occupied adversely or improved any part or parcel of the aforesaid designated property; or exercised ownership thereof based upon a deed of conveyance, purporting to convey a fee simple title and executed 20 years or more prior to the passage of this act, and theretofore made by one claiming title to such part or parcel, to have such part or parcel so claimed separately surveyed if requested in writing by a claimant within 60 days after the service of written notice on such person or his tenant or agent that the United States claims such land, and to thereafter convey title to the claimant by quitclaim deed upon payment of 10 per cent of the appraised value thereof: *Provided,* That any claimant who fails or refuses for more than 60 days after the notice herein provided to make written application for survey and submit satisfactory record and other evidence required by the Secretary of War to substantiate the claim that he is entitled to a quitclaim deed under the provisions of this section shall forever be estopped from exercising any claim of title or right of possession to the property: *Provided further,* That the Secretary of War may, in his discretion, extend to citizens of the United States who have themselves or whose predecessors in interest have occupied and improved portions of such reservations under leases from or with the consent of the War Department for more than 15 years prior to the approval of this act, an option to buy the portions of such reservations so occupied and im-

proved at the appraised value of the land exclusive of improvements placed thereon; and the Secretary of War is hereby authorized to convey title to such persons by quitclaim deed upon payment of the appraised value of any such portions: *Provided further*, That in carrying out the provisions of this section the Secretary of War shall not incur any expense other than that incident and necessary to giving the notices required and surveying and platting such of the property as may be claimed by a citizen of the United States."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

MARGARET T. HEAD, ADMINISTRATRIX

Mr. WALSH of Massachusetts. Mr. President, I ask unanimous consent for the immediate consideration of the bill (H. R. 3216) for the relief of Margaret T. Head, administratrix. It is a bill to pay compensation for an accident due to a postal truck.

Mr. KING. Let the bill be read.

The PRESIDING OFFICER. The clerk will read the bill.

The Chief Clerk read the bill, as follows:

*Be it enacted, etc.*, That the Secretary of the Treasury be, and he is hereby, authorized and directed to pay, out of any money in the Treasury not otherwise appropriated, the sum of $5,000 to Margaret T. Head, administratrix, of Watertown, Mass., as full compensation for the accidental death of her son, Alfred Head, on June 11, 1924, caused by being struck by an automobile truck then in the service of the United States Postal Service.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ZACHARY TAYLOR NATIONAL CEMETERY

Mr. SACKETT. Mr. President, I ask unanimous consent for the immediate consideration of the bill (H. R. 11482) to amend section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes," approved February 24, 1925.

Mr. CURTIS. Let the bill be reported.

The PRESIDING OFFICER. The bill will be read.

The Chief Clerk read the bill, as follows:

*Be it enacted, etc.*, That section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes," approved February 24, 1925, is hereby amended to read as follows:

"SEC. 2. That the Secretary of War be, and he is hereby, authorized to accept, free of cost to the United States, from the State of Kentucky, and from any others having authority to donate the same, the land comprising the aforesaid burial grounds, and such other and additional land contiguous or adjacent thereto as in his judgment may be deemed advisable; and upon the conveyance to the United States of a valid, fee-simple title to said land or lands the Secretary of War is authorized and directed to establish thereon a national cemetery, to be known as the Zachary Taylor National Cemetery."

Mr. SACKETT. Mr. President, the bill does not call for the appropriation of any money. It is simply to permit the Government to accept a little donation of land.

The PRESIDING OFFICER. Is there objection to the consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

GOVERNMENT ROAD IN GEORGIA

Mr. HARRIS. Mr. President, I ask that the Senate take up for consideration Senate bill 2990, to provide for the paving of the Government road extending from Lee & Gordon's mill to La Fayette, Ga., known as the La Fayette extension and constituting an approach road to Chattanooga and Chickamauga National Military Park.

Mr. CURTIS. Mr. President, I ask the Senator if the bill is recommended by the War Department.

Mr. HARRIS. It is recommended by the War Department. It is also unanimously reported by the committee. The House has passed a similar bill, and I ask that the House bill be substituted for this bill. The two bills are exactly alike.

Mr. KING. Mr. President, I would like to ask the Senator one question. Was not provision made in the War Department appropriation bill for this matter?

Mr. HARRIS. No; no such provision has been made.

Mr. KING. I know that bill carried many millions of dollars for roads, and I can not understand why these separate bills come in when we have a general appropriation covering such matters.

Mr. HARRIS. This is made under the general act, I will say to the Senator from Utah, which allows just such legislation for the Government to turn over to a State a road or approach road through a national park or Government reservation, provided the State will take it over, improve it, and be responsible for its upkeep. The House has passed a similar bill at this session, and I ask that the House bill be substituted for this bill.

The PRESIDING OFFICER. The Chair asks the Senator from Georgia if the House bill has been reported and is on the calendar?

Mr. HARRIS. The House bill is exactly like the Senate bill which has been considered by the Committee on Military Affairs, and was unanimously approved. I ask that the House bill be substituted for my Senate bill. I repeat, they are exactly alike.

The PRESIDING OFFICER. Without objection, the Committee on Military Affairs will be discharged from the further consideration of House bill 11723.

Mr. JONES. As I understand it, Mr. President, this money is to be spent within the limits of the military reservation.

Mr. HARRIS. Within the limits, and the approach road to the park, and is done under a general act which has been passed by which the Government can turn over roads in a park, and the approach to the park, provided the State will take charge of those roads and keep them in order.

Mr. JONES. What does the Senator mean by the approach to the park? It might be a hundred miles or 50 miles.

Mr. HARRIS. It is just a few miles, I will say, and I will state that if the Senator will read the report he will see that the War Department have gone into the matter thoroughly. They sent their special representative down there to investigate and make a report.

Mr. JONES. What I have in mind is that we have a general road fund, which is provided for and expended on roads throughout the country. I have been confronted with this situation with reference especially to Indian reservations: Congress will not make an appropriation for a road on an Indian reservation, at least will not actually appropriate any money for it, that applies to roads outside of the Indian reservation.

The PRESIDING OFFICER. Is there objection to substituting House bill 11723 for Senate bill 2990? The Chair hears none, and it is so ordered. The Senator from Georgia now asks unanimous consent for the consideration of House bill 11723. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 11723) to provide for the paving of the Government road, known as the La Fayette Extension Road, commencing at Lee & Gordon's mill, near Chickamauga and Chattanooga National Military Park, and extending to La Fayette, Ga., constituting an approach road to Chickamauga and Chattanooga National Military Park, which was read, as follows:

*Be it enacted, etc.*, That the Secretary of War is authorized to improve and pave the Government road, known as the La Fayette Extension Road, commencing at Lee and Gordon's mill, near Chickamauga and Chattanooga National Military Park, and extending to La Fayette, Ga., in the length of approximately 12.9 miles, for which an appropriation of not to exceed $193,500 is hereby authorized out of any money in the Treasury not otherwise appropriated: *Provided*, That no part of the appropriation herein authorized shall be available until the State of Georgia or any county or municipality or legal subdivision thereof, or any State or county or municipality or legal subdivision thereof, or any State or county or municipal highway commission, or equivalent public authority shall contribute at least an equal amount for the same purpose, and the Secretary of War is hereby authorized to expend such sum as may be contributed by said local interests concurrently with the appropriation herein authorized in the improvement and pavement of said road: *Provided further*, That should the State of Georgia or any county or municipality or legal subdivision thereof, or any State or county or municipal highway commission, or equivalent public authority desire that the position of said road be changed in any particular from the present Government-owned right of way, and should such local interests acquire title to the land necessary to effect such changes, the Secretary of War may expend the funds herein authorized for the improvement and pavement of such road as changed: *And pro-*

*vided further*, That no part of the appropriation herein authorized shall be expended until the State of Georgia, or the counties or municipalities thereof concerned, have accepted title to the present Government-owned road known as the La Fayette Extension Road and have obligated themselves in writing to the satisfaction of the Secretary of War that they will maintain said road as built under the provisions of the act approved March 3, 1925 (43 Stat. L. 1104), immediately upon the completion of such improvements as may be made under this appropriation.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

The PRESIDING OFFICER. Senate bill 2990 will be indefinitely postponed.

RECEPTION OF GERMAN AND IRISH AVIATORS

Mr. CURTIS. Mr. President, I am advised that at about half past 3 the aviators of the *Bremen* will be on this side of the Capitol. I ask unanimous consent that when they come to the Senate side of the Capitol the Senate shall take a recess of 10 minutes in order to give them a reception.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

NICARAGUA AND THE UNITED STATES

Mr. NYE. Mr. President, I ask unanimous consent to have printed in the RECORD an article by Amy Woods on "Nicaragua and the United States."

The PRESIDING OFFICER (Mr. ODDIE in the chair). Without objection it is so ordered.

The article is as follows:

On March 7, 1928, its Committee on Foreign Relations reported to the Senate that—

"The Government of the United States has made an agreement with the Government of Nicaragua to supervise an election in Nicaragua.

"The so-called Liberal factions in Nicaragua have laid down their arms upon the promise of the United States Government to supervise said election.

"To withdraw our troops at this time from Nicaragua would be a violation of said agreement."

Two days later Senator NORRIS presented a resolution (S. Res. 164), which propounds five most pertinent questions, as follows:

"1. What, if any, authority did the President of the United States have to accept an invitation to supervise elections in Nicaragua?

"2. If he did have such authority, does the same authority give the President of the United States the right to supervise any election in any foreign country?

"3. If the President of the United States has authority under existing law to use the United States Army and Navy to supervise an election in Nicaragua, has he not the same authority to use the same forces in the supervision of elections in foreign countries?

"4. Will the use of the Army and Navy of the United States in supervising elections in foreign countries have a tendency to bring on war between our Government and foreign nations where such supervised authority is attempted?

"5. If the President of the United States, under existing law, has the authority to use the Army and Navy to supervise elections in foreign countries, does he possess the same authority to use the armed forces of the United States to supervise elections in different States of the Union, and would such use of the Army and Navy be advisable in cases where the Senate has official information of corruption taking place in State elections, where Members of the United States Senate and the House of Representatives are elected?"

The Norris resolution concludes:

"If the President of the United States does not possess authority to use the Army and Navy of the United States to supervise elections in foreign countries, then the Committee on Foreign Relations is directed to report to the Senate the necessary legislation that will prevent such illegal use of the armed forces of the United States in the future."

* * * * * * *

Salomon de la Selva, Nicaraguan delegate to the Fifth Pan American Labor Conference last July, said to that international gathering:

"War is on in Nicaragua, and unless the United States marines leave they will have to destroy the entire population."

Six months later President Coolidge, in his annual message to Congress, reported that we are at peace; that our example has become of great importance in the world.

"It is recognized," said the President, "that we are independent, detached, and can and do take a disinterested position in relation to international affairs." (President's Annual Message, December 6, 1927.)

Members of the United States Senate, who were not satisfied with these presidential statements, called for further information early in the session. Several bills and resolutions were introduced and referred to the Committee on Foreign Relations. (See last page.) Hearings were held and Senator BORAH, as chairman, gave out the information that the committee had exhausted the subject so far as military operations in Nicaragua were concerned. No action was taken by the committee, however, and no facts were given out until Senator DILL, of Washington, brought the question to an issue on March 2 by reading into the RECORD a dispatch from Nicaragua reporting five more American marines killed in the process of preparing the people of that country for an election to be held in October, 1928.

When asked what had become of the resolution of Senator HEFLIN providing that the bodies of marines killed in Nicaragua be brought back, Senator DILL replied:

"I presume it sleeps the sleep that has no awakening in the Foreign Relations Committee, where all such resolutions have died up to this time."

Twelve days later the position of the Foreign Relations Committee was given to the public through the Associated Press, as follows:

"The Washington administration feels that its position has been materially strengthened by the action of the Senate Foreign Relations Committee under BORAH in quashing proposals referred to it looking to American withdrawal. * * * The committee has taken the position that since the pledge of American supervision was given and both Liberals and Conservatives surrendered their arms with that understanding, to withdraw from the engagement would merely be to abandon the Liberals to the mercy of the most reactionary elements of the Conservative group. With that position complete accord between the State Department and the White House has been indicated." (Washington Post, March 14, 1928.)

An inconvenient question at once arises. How would the "most reactionary" Conservatives be able to control those tragically abandoned Liberals, who happen to be a large majority in Nicaragua, if an embargo on arms were continued, since "all arms in Nicaragua are now in our custody." (United States State Department release, June 10, 1927.)

Senator DILL, in presenting his resolution, made it quite clear that he did not believe a forced contract to be legal, even though made by the Chief Executive of the United States. He objected to the "spending of American lives to buy profits for men who had made investments in Nicaragua." He would vote, he said, to have the Senate direct the President to withdraw the marines from Nicaragua. (CONGRESSIONAL RECORD, March 1, 1928, page 4029.)

On March 4 the hearings "on the use of the United States Navy in Nicaragua" appeared as a printed report. (Hearings before Foreign Relations Committee, 70th Cong., 1st sess., on S. Res. 137, February 11–18, 1928.) It gives official details of what is sometimes called President Coolidge's private war, since no declaration of war has been made by the United States and Congress has not yet been consulted as to the use of the Army and Navy in Nicaragua.

The report covers the period from August, 1926, to February 8, 1928. The casualties of the American marines are 16 killed and 35 wounded. The casualties among Nicaraguans could not be determined with any degree of accuracy. "One hundred and fifty-six are known to have been killed." (Ibid., p. 9.)

At the engagement of Ocotal, Captain Hatfield, who was on the ground, estimated 300 Nicaraguans killed, but it was an estimate only. (Ibid., p. 49.) Ocotal, the capital of the Province of Nueva Segovia, is a very well-built town, laid out in squares, with a population ordinarily of 2,000. The fighting continued from 1 or 2 in the morning to 3 or 4 o'clock in the next afternoon. General Lejeune, who was in charge of the expedition, says:

"There were probably a few inhabitants killed during the fights in the streets."

He was told that a few of the people who were killed met death by stray bullets from the firing down the streets and into the public square. He also told the committee: "It is impossible to have street fighting without having somebody killed." (Hearings on S. Res. 137, p. 49.)

In another encounter near Quilali the marines estimated 100 killed. (Hearings on S. Res. 137, p. 54.) On the 14th of January, when El Chipote, the mountain stronghold of Sandino, was bombed it was "swarming with men, and everywhere they went they were shot at." General Lejeune's description of this American attack upon Nicaraguans is vivid:

"The aviators approached El Chipote from the clouds, 5,000 feet up, and they came down at the rate of about 200 miles an hour, vertically, so that they could drop the bombs accurately, and they struck the houses, and the people ran out and they shot them up with machine guns, and it was a very successful bombing operation."

These casualties, with others in Nueva Segovia, were the result of Admiral Latimer's orders to "start after Sandino."

On January, 1927, five destroyers and two light cruisers of the United States Navy were detailed to Nicaraguan waters, and a marine expeditionary force of about 3,000 officers and men were landed. Also six airplanes were landed. (Hearings on S. Res. 137, pp. 15–16.)

After the Stimson agreement, on May 11, 1927, 1,200 marines and from two to four vessels of the special service squadron were all that it was deemed necessary to continue in Nicaragua. (Hearings on S. Res. 137, p. 15.)

By January 1, 1928, however, the activity of Sandino and his eight or nine hundred followers in the vicinity of Nueva Segovia "rendered advisable the dispatch of additional forces," according to the Navy report, and the number was increased to approximately 2,700 marines

and two to four vessels of the special service squadron. (Hearings on S. Res. 137, p. 27.)

The Navy Department offered further explanation:

"It should be clearly understood that all disturbances since the conclusion of the Stimson agreement have been confined to a relatively small area in the immediate vicinity of Nueva Segovia. This locality is sparsely populated and composed principally of a mountain jungle. It borders on Honduras."

Admiral Latimer described the Province of Nueva Segovia, where the American marines are fighting, as practically a wilderness. Few people live there but Indians—not over 3 per cent of the entire Nicaraguan population. One can go for miles without seeing a shack. The villages are mere rows of 3, 4, or 5 houses. The only town of size is Ocatal of about 1,500 people. The Province, which covers something less than 7 per cent of Nicaraguan territory, is almost impassable. They call it "the wilderness." During the wet season (May to November) one can hardly get through at all. "The only way you can get through is with barefooted men and oxen and cows. They do their transporting of goods by oxen and cows and their split feet keep them on top of the mud." (Hearings on S. Res. 137, pp. 23–24.)

General Lejeune described the people of west Nicaragua to the committee as very attractive, kindly, hospitable, courteous, generous, and proud. They have many good qualities; the relations between them and the American marine are remarkably good.

The summary of operations in Nicaragua, filed by Secretary of the Navy Wilbur, with the Foreign Relations Committee, says:

"The steps that have been taken since the Stimson agreement are those considered necessary to prepare the country so that a fair election may be conducted in 1928." (Hearings on S. Res. 137, p. 16.)

Admiral Latimer told the committee that when Stimson reached Nicaragua in May, there had been a pitched battle imminent for three months (hearings on S. Res. 137, p. 34), but the situation was about at a stalemate. "With the rainy season coming on, it would have remained stalemate until January." He added that "the country was just sinking into chaos and anarchy."

Admiral Latimer did not know how many United States citizens are living in Nicaragua. (Hearings on S. Res. 137, p. 41.) The largest number at any one place is 250 at Puerta Cobezas, the most northern harbor on the east coast. They are employed by the Bragman Lumber Co.

There are probably 20 or 25 at Bluefields, the other eastern port, where bananas are shipped to New Orleans. There are about 40 or 50 in the capital city, Managua, on the western plateau, and there is one American family besides the consul in Corinto, the western port where 60 per cent of the exports and imports pass through the customs. There are none in Ocatal. (Hearings on S. Res. 137, p. 62.) The city of Leon, the center of the Liberal Party, Admiral Latimer did not mention.

In answer to questions as to why our troops were ordered back to Nicaragua, Admiral Latimer said that the United States marines were sent to Bluefields beginning December 26, 1926, for the purpose of "protecting American and foreign lives and property," and also at the request of the Conservative President, Adolfo Diaz. It was a strong Liberal place, held by the Conservatives, and an uprising was imminent. There was no intention of attacking American rights there. (Hearings on S. Res. 137—Admiral Latimer, p. 41.)

As a result of further developments the American forces in Nicaragua have included Army, Navy, and marine detachments. These expeditionary forces were acting without authority from Congress, which has the sole power to declare war.

The Comptroller General of the United States has ruled in the case of five officers of the Second Battalion, Fifth Regiment, United States Marine Corps, that they were "on field duty" for the purpose of allowances. These officers landed in Bluefields January 10, 1927, and in Corinto January 24, with their regiment. By Executive order of August 13, 1924, the term "field duty" was construed to mean service under orders with troops operating against an enemy, actual or potential.

The Comptroller General states that it would seem that—

"Rebel forces might look upon the military forces of the United States, landed in Nicaragua for the purpose stated, as their enemy, and attack them accordingly." (United States Daily, September 28, 1927, p. 4. Text of Comptroller General's decision.)

It is difficult to get away from the conclusion that either we are at war with Nicaragua contrary to constitutional authority or we are committing wholesale murder.

* * * * * * *

Nicaragua's relations with the United States are easily divided into three periods: United States intervention from the overthrow of Zelaya to the withdrawal of American marines (1909–1924); Chomorro's coup d'état to the Stimson agreement (October, 1925, to May, 1927); Sandino's rebellion to the present (July, 1927, to March, 1928).

Without some knowledge of the financial and political strategy developed in both the United States and Nicaragua, no opinion of value can be formed of the most imminent question before the people of the United States to-day: Is the President of the United States justified in carrying out a military intervention in foreign countries, such as Nicaragua has been subjected to, without the consent of Congress? Has he constitutional authority to supervise elections in foreign countries?

The answer to these questions by the American people will determine the future foreign policy of the United States, and test the fundamental principles of democracy.

The history of Nicaragua is a composite of domestic revolutions and military and financial foreign invasions. It is the largest of the Central American countries, and yet is only a little larger than the State of Ohio. It has a population of 700,000, largely of Indian origin in the east and of Spanish and Indian descent on the Pacific coast.

There is an abundance of natural resources, and the location and size of its lakes make logical a waterway from the Atlantic to the Pacific. The question of building a canal has always been a factor in its international relations. With the Panama Canal rapidly reaching its capacity for trading vessels and becoming inadequate for the developing of the military program of the United States, a second canal through Nicaragua has again become an issue. As outlined by the War Department, it would cost five hundred million to a billion dollars. President Coolidge is quoted as saying that the construction of an additional canal would bring economic benefits and undoubtedly have a pacifying effect upon Nicaragua's political situation.

The political interests of Spain and the commercial interests of Great Britain and France were gradually superseded by early financial and political intrigue of American private interests.

This early history forms a background for the events of the 15 years between 1909 and 1924. Nicaragua declared her independence from Spain in 1821, and for 40 years thereafter was disrupted by civil war and revolution.

Filibustering which followed and apparently grew out of the adventurous life fostered by the "Forty-niners," pushing westward for gold, subjected Nicaragua to American colonization by intrigue, by force, and by purchase of land grants. William Walker, from California, aided by financial interests in New York, invaded Nicaragua with an army recruited from the United States, and in 1856 had himself declared President. He was ousted by an alliance of the other Central American States financed by other American interests.

The pressure for transcontinental transportation about the same time brought Cornelius Vanderbilt's money into the country.

Politically, from 1867 to 1893, Conservatives were in power, followed by the Liberals, with Jose Santos Zelaya as President. For 14 years he ruled as a dictator. During the last of Zelaya's régime he was not supported by the Liberal Party but by personal hangers-on of both parties interested only in the monopolies and concessions granted by Zelaya. In 1909 Zelaya negotiated a loan with a London firm, which was later repudiated as unconstitutional by the Nicaraguan Government.

The following year he was overthrown by a coalition of Liberals and Conservatives. When the matter of the London loan was adjusted, Nicaragua had a debt of only $2,500,000. And during her independent life she had never defaulted on a payment of a foreign debt, except once. This was in the year 1910, when Zelaya was overthrown by a revolution financed by United States interests. (S. Con. Res. 15, hearings January 25, 26, 27, and February 16, 1927.)

During the next 15 years, American bankers promoted a series of financial contracts with Nicaragua that, according to Robert W. Dunn, "provide a historical case which is still interesting for the thoroughness of the accompanying intervention for which the contract provided." (American Foreign Investments, by Robert W. Dunn, Viking Press.)

The facts regarding these 15 years are now matter of public record.

According to the State Department these transactions are nominated "financial reforms." Through the assistance of the United States the State Department claims "it was possible to place Nicaraguan finances in a better position than those of any other Caribbean country." And "in consideration of the establishment of a customs collector, named by themselves and approved by the Department of State, two New York banking firms advanced somewhat over $2,000,000 to place the new government on its feet financially and to stabilize the depreciated and fluctuating paper currency." (Dana G. Monro, officer of the Latin American Division, Department of State.)

Nicaragua is divided, politically, into two camps. You are either born into the Conservative Party, with your interests that of the large property owner and centered in the southwest city of Granada, or you are a Liberal in sympathy with merchants and labor, centered in the northwestern city of Leon. These 675,000 citizens on the west coast, who are under the domination of the leaders of the two political parties, are cut off by mountain ranges, rivers that overflow with rain from May to November, and impassable roads, from the 25,000 Indians, negroes, and mixed whites on the hot tropical east coast.

The Liberal Party has traditionally opposed attempts on the part of the United States Government to obtain control of the canal route, and to establish a naval base at Fonseca Bay, an inlet of the Pacific Ocean, which washes the shores equally of Salvador, Honduras, and Nicaragua. The Liberal Party also opposed further extension of American business interests in the Republic.

Walter W. Liggett writes, in the New Masses of March, 1928, that Philander C. Knox, Secretary of State under Taft, was the largest stockholder in La Luz y Los Angeles Mining Co., which held the mineral concessions over an area of 60,000 square miles. Henry Fletcher, now ambassador to Italy and then a minor official in the State Department, was also a heavy stockholder.

This company had a dispute with the Nicaraguan Government over the amount of royalties it was to pay. The merits of the dispute are obscure, but it is known that President Zelaya was considering canceling the concession.

There also had been a strike in the Nicaragua banana fields, which Zelaya did not suppress with sufficient vigor to please American fruit interests. (New Masses, March, 1928, "Ham and yeggs," by Walter W. Liggett.)

When the two political parties united in their attempt to overthrow the dictator Zelaya, American business interests took advantage of the revolution to push a conservative administration into power.

In the hearings before the Foreign Relations Committee of 1914 many of the details were laid bare. The revolution against Zelaya was financed by Adolfo Diaz, then a clerk of the American mining corporation, La Luz y Los Angeles Mining Co. He had a salary of $1,000, and though it was not known that he had other resources he advanced the revolution $600,000 and later made a claim against the Nicaraguan Government and repaid himself. (U. S. Foreign Relations Com., "Conventions between U. S. and Nicaragua," 1914, Pt. I, p. 32, Pt. II, p. 88.)

The American consul at Bluefields knew about the revolution in advance, and wired the State Department that it would break out the next day and that the new government would apply to Washington "for immediate recognition."

Five days later the consul reported to Washington that a provisional government had been established, "friendly to American interests," and that it guaranteed "annulment of all concessions not owned by foreigners" (U. S. Foreign Relations, 1909, p. 452). American marines were sent to Bluefields to "protect American life and property," but when the revolutionists were located in the city the marines forbade the Government army to come into the city. (U. S. Senate Foreign Relations Committee, "Hearings on Foreign Loans," 1927, S. Con. Res. 15, p. 2.)

When President Zelaya was at last forced to resign, the Nicaragua Congress elected Dr. Jose Madriz as his successor. Doctor Madriz was a well-known jurist and at the time a member of the Central American Court of Justice. American marines were landed on the west coast and sent up to the capital, Managua, where they assisted the Conservatives, under the leadership of General Estrada and General Chamorro, to overthrow this Government also. (U. S. Foreign Relations, pp. 910, 738–760.)

Thomas G. Dawson, who, as American minister to Panama, had already arranged for American control of the customs of Santo Domingo, was sent by the State Department as a special agent to Nicaragua (Ibid.), and two months later on board an American battleship secret agreements were signed under his direction.

The Dawson pact, as these agreements were later to be known, stipulated that the United States would recognize the revolutionary Government of Nicaragua provided—

"1. That Estrada as President and Adolpho Diaz as Vice President be elected by a newly chosen constituent assembly * * * and that no supporter of Zelaya be included in the administration.

"2. That a mixed commission satisfactory to the United States Department of State be appointed to settle claims. * * *

"3. That Nicaragua would solicit the good offices of the American Government to secure a loan to be guaranteed by a certain per cent of the customs receipts, collected in accordance with an agreement 'satisfactory to both Governments.'" (U. S. Foreign Relations, 1910, pp. 763–4.)

Under the Dawson pact there was no chance for free and fair elections. The terms were carried out after Dawson wired the State Department:

"A popular presidential election is at present impracticable and dangerous to peace."

On January 1, 1911, President Taft formally recognized the Estrada Government. Three weeks later Secretary Knox instructed the new American minister to Nicaragua to carry out the provisions of the Dawson pact.

The year 1911 was a momentous one for Nicaragua. There was a storm of protest against the terms of the Dawson pact, many Nicaraguans seeing in them the establishment of a virtual protectorate. Then the invincible strength of dollar diplomacy began to show itself.

In February the American minister cabled Secretary Knox:

"The natural sentiment of an overwhelming majority of Nicaraguans is antagonistic to the United States and even with some members of Estrada's cabinet I find a decided suspicion, if not distrust, of our motives." (Foreign Relations, 1911, pp. 655–6.)

In March he wired that President Estrada was—

"Being sustained solely by the moral effect of our support and the belief that he would unquestionably have that support in case of trouble." (Ibid.)

In April the national assembly voted to adopt a constitution guaranteeing the independence of the Republic and directed against foreign control through loans. Upon this, President Estrada, with the approval of the United States Department of State, dissolved the assembly and called for new elections. Protest against these proceedings forced the resignation of Estrada in favor of Vice President Adolpho Diaz, the man who had originally financed the revolution, and the President of Nicaragua at the present time. (Ibid., pp. 657–658, 600.)

In May the American minister wired that to sustain Diaz "a war vessel is necessary for the moral effect." (U. S. Foreign Relations, 1911, p. 661.) Later he wired that the Liberals were "in such a majority over the Conservatives" that he hastened to repeat the suggestion "as to the advisability of stationing permanently, at least until after the loan had been put through, a war vessel at Corinto." In response to this wire an American warship was dispatched to Nicaragua, and Secretary Knox wired that Diaz should not be allowed to resign.

In June, while the majority of citizens in Nicaragua were struggling to maintain the independence of their country, the representative of the Conservative government, which was being kept in power by the United States, signed a treaty in Washington with the United States through the State Department.

This Knox-Castrillo treaty, which was ratified by the American-controlled Nicaraguan Congress in June, provided that Nicaragua should borrow $15,000,000 from American bankers and that Nicaraguan customs should be controlled by the United States.

At the same time, the State Department negotiated with Brown Bros. & Co. and J. & W. Seligman & Co., of New York, to handle the loan as fiscal agents, the United States Mortgage & Trust Co. to act as trustees, on condition that the Knox-Castrillo treaty should be made an integral part of the contract for the loan.

The treaty was referred to the United States Senate, which adjourned in August without ratifying it. This prevented the agreement for the bankers' loan from being carried into effect. The treaty was never ratified, although it was considered by the Senate three times. (U. S. Foreign Relations, 1912, p. 1076.)

The American bankers, however, with a persistency which spells success, presented another contract to Nicaragua, based on the assumption that the Senate would ratify the treaty at its next session. It was called the "Agreement of gold treasury bonds," and under American pressure was accepted by the Nicaraguan Assembly on September 1, less than a month after the United States Senate had rejected the treaty upon which it was predicated. During this time an American official cabled the State Department that—

"Opposition to these loan contracts and concessions is becoming more determined."

Secretary Knox, however, was unyielding and directed the Chargé d'Affaires to keep the Nicaraguan Legislature in session until the loan agreement was approved.

This contract was the entering wedge which placed the control of the customs in the hands of American financiers. A collector general, "designated by the bankers, approved by the United States Department of State, and named by the Republic," was to have absolute control of the collection and disbursement of both export and import duties. The bankers reserved to themselves the power to remove him at their pleasure.

It was agreed that if the customs were not sufficient to meet the demands of the loan that the collection of taxes on the alcohol monopoly should be given over to the American collector general. In case of disputes or difficulties in respect to the interpretation or fulfillment of the agreement, the question was to be submitted to the United States Secretary of State for final decision.

This clause of the 1911 Nicaragua contract appears to be the forerunner of the San Salvador contract of 1922, which went but one step further in making the judge of the supreme court, instead of the Secretary of the State, the final arbiter.

The concession referred to in the contract allowed the American bankers to use a part of the loan to establish under a charter of the State of Connecticut a national bank in Nicaragua, with an authorized capital of $5,000,000, and a paid-up capital of $100,000, where all funds of the Republic should be deposited without earning interest. The bank was made the fiscal agent and paymaster of the Government. It was exempt for 99 years from all forms of taxation, as was also all money deposited in the bank, and all business connected with the bank. It was given the right to issue Government money with or without guaranty; that is, without any gold deposited as security for the paper currency, and to "introduce and maintain a monetary system." This contract placed the fiscal life of Nicaragua in the hands of the New York private financiers. (U. S. Senate Committee on Foreign Relations hearings, S. Con. Res. 15, pp. 3–4.)

The so-called "fiscal reform" was started at once. Mr. Harrison and Mr. Connant came to Nicaragua as financial experts to prepare the necessary legislation and to make a study of the currency. They were selected by the bankers, paid by the Nicaraguan Government, and approved by the State Department of the United States. The

New York bankers loaned $2,000,000, half of which was used for the capital stock of the bank and half for expenses, and to put the "currency on a gold basis."

In order that this part of the concession could be approved by the Congress, and not be unconstitutional, the old banking laws in Nicaragua were repealed and a provisional amendment to the constitution was made. (U. S. Senate Committee on Foreign Relations hearings, S. Con. Res. 15. Testimony of Toribio Tijerino, financial agent and director of the railroad and national banks of Nicaragua in 1924 pp. 4–6.)

Then, with a free hand to "issue bonds, warrants, bank notes, deposit certificates, obligations and credit documents of all kinds with or without guaranty," they went ahead changing the unit of currency from pesos to cordobas, which was supposed to have a $1 backing for each cordoba. The value of the peso at the time was 28 to $1. The bankers arbitrarily fixed the value of the pesos in circulation. Mr. Toribio Tijerino, who testified to this effect before the Foreign Relations Committee in 1924, had been financial agent of Nicaragua, and director of the railroad and the national bank.

Mr. Tijerino told the Senate committee how Diaz before this arrangement was made, had, first as Secretary of the Treasury under Estrada and then as President, issued 30,000,000 paper pesos that were used to pay himself and his friends for what they claimed had been expended in the revolution, so that they had all this paper money in their hands. This they exchanged for gold at double its original value and left the rest of the paper money converted into paper cordobas without any gold backing. In other words, Nicaragua now has 4,000,000 cordobas in circulation, nearly a third of which has no gold backing or other guaranty, and having spent $2,000,000, they have the same amount of paper money as before. The American bankers claim that the best work they have done in Nicaragua is to "stabilize the currency."

From the American bankers' point of view the year 1911 had been successful and further financial negotiations were advanced in the first half of 1912. These included a further loan to the Republic of $725,000 "for monetary experts to stabilize the exchange and to pay current expenses." The bankers obtained as security a first mortgage on the Government railroads and the steamship lines, with the right to purchase a controlling share of the capital stock of both and the right to collect a balance of more than a million dollars on the loan which Nicaragua had negotiated in London and upon which the payment of interest had lapsed because of the revolution which placed the Government of 1912 in power. This balance was to go to the bankers as part payment on their previous loan.

The Liberal Party in opposition to President Diaz proclaimed a revolution. They seized part of the Government railway, some steamers, and several customs houses. The American bankers wired to the State Department for protection. The report of the secret hearings of the United States Senate Committee on Foreign Affairs, 1914, shows that a locomotive and two flat cars owned by the bankers were seized, and the next day 3,000 marines, 125 officers, and 8 naval vessels went into action to protect life and property. The leader of the Nicaraguan revolution surrendered to the United States commander and was exiled to Panama on board a United States warship.

In the fall of 1912 Nicaragua went to the polls, which were guarded by American marines, and in opposition to public opinion President Diaz was reelected for another four years. The election of 1916 showed the domination of Washington. The Liberals were more numerous and would have won if American marines had withdrawn. Instead, the American minister openly supported the Conservative candidate, Chamorro, while the candidate whom the Liberals had chosen was not allowed to enter the country to carry on his campaign.

The 1916 elections were fraudulent and Chamorro was held in power against the opposition of three-fourths of the population, according to a report of the commander of American forces at the time.

In 1920, President Emilio Chamorro was succeeded by his uncle, Diego Chamorro, aided by marines and the United States Department of State. An American "special observer" was sent to Nicaragua. He reported that "fraud undoubtedly did take place in the registration and the counting of votes by the Government."

The President gave all the important appointive offices to his immediate relatives. The American Federation of Labor prepared a list giving the official governmental titles of 12 of the Chamorro family in 1921. Walter Liggett says:

"They looted the treasury on an extensive scale and were retained in power solely by the presence of United States marines."

When, by the death of the President in 1923, the Vice President, Martinez, became head of the Government, there was great poverty, unemployment, and business failures; natives were leaving the country in search of work. With a genuine desire to help his country he decided to buy back the national railroad and bank.

American marines were kept in Nicaragua from 1911 to 1925, when they were replaced by a native police force officered by Americans.

Secretary of State Knox wrote:

"It is fair to assume that these military and naval tactics have continued to be a heavy annual expense to the United States taxpayers. During the course of the year it is many times necessary for the United States to send forces to the ports of some of the Central American Republics in order to afford protection to foreign life and property. (That is, American life and property.) This is done at an enormous expense, an informal estimate from some of the naval officers showing that the annual cost to the Government amounts to over $1,000,00. (U. S. Foreign Relations, 1912, p. 586.)"

In 1921 the United States shipped rifles and ammunition to Nicaragua to suppress Liberal uprisings, and in 1922 the Conservative government was maintained in power only by threats of force on the part of the United States marines and the arrest of 300 of the Liberal Party.

When the great nation shows military concern for the life and property of its citizens in another country or the impulse to establish a "free and just government" for its neighbor it is well to look up the bank and the railroad and the private concessions in the other country.

The National Bank of Nicaragua, in September, 1911, was organized with $100,000 as capital supplied from the first loan of $1,500,000 to the Government by Brown Bros. and J. & W. Seligman & Co. The following March the paid-in capital was raised to $300,000, of which the Government supplied $49,000 and the New York bankers $151,000, thus obtaining control of the bank. In 1914 the bankers made another agreement with Diaz for further issuance of paper cordobas and 500,000 were delivered to the Government. This loan was repaid in 1920, so that from 1914 to 1920 the currency was again on a paper basis. These cordobas were to be retired from circulation by the interest paid on the moneys deposited in New York as guaranty and by the profit in coining money; but the money deposited in New York received but 1 per cent yearly interest, and the bills from the management of the currency were larger than the profits from the interest and the coinage.

This state of affairs was called to the attention of the State Department by Gen. Emiliano Chamorro, when he was minister to Washington in 1922, and in 1924, under the presidency of Martinez, the Nicaraguan Government was allowed to buy back the bank stock belonging to the bankers for $300,000 in cash, approximately double the original purchase price. (Foreign Relations Committee hearings, 1927, S. Con. Res. 15, p. 7.) The bank directors were changed at the time to include six Nicaraguans and three Americans "who represented the State Department"—Mr. Robert F. Loree, Mr. Hansel, and Mr. Jeremiah W. Jenks. Mr. Jenks was also made financial adviser to the Nicaraguan Government to help in a plan which was to be put in force in 1925. (Ibid., p. 9.)

The bank again belonged to the Nicaraguan Government, but the control by American bankers opened the way for a contract on March 21, 1927, which again placed bank and railroad in the hands of the Guaranty Trust Co. and J. W. Seligman & Co. The details of this last transaction will be described later. (Committee on Foreign Relations hearings, 1927, S. Con. Res. 15, pp. 6–7.)

At the same time, in 1911, the Nicaraguan railroad was incorporated under the laws of the State of Maine with $300,000 capital stock. It included the road which had been built from the surplus in the national treasury between 1881 and 1904, and the steamers plying in the Nicaragua Lake and the San Juan River. These form the only means of communication between the two oceans.

In the contract of 1911 the New York bankers obtained an option to purchase 51 per cent of the stock for $1,000,000. At the same time they obligated themselves to loan the company $500,000 to be used for improvements. In 1914 the bankers exercised the option and purchased the 51 per cent of the stock. In 1919 the road was in such bad shape that the Nicaraguan Government paid two American engineers to examine and estimate the value of the road. They reported that less than half of the rails and ties were in good shape, not one new locomotive had been added, and the lake and river steamers had been allowed to be completely destroyed. The Pacific Railroad was in a "most dilapidated and deplorable condition." (Ibid., p. 11.)

In 1920 the Nicaraguan Government and the same bankers entered into a new agreement for a loan of $9,000,000. One of the features of the agreement was that the Government should buy back the bankers' $1,000,000 interest for $1,750,000. So, with the railroad deteriorated and their steamers sunk in the mud, the people of Nicaragua, through Government officials, paid $350,000 in cash to the bankers and 9 per cent interest on the balance of $1,400,000, which was covered by a note which had to be renewed every six months at an expense of 1 per cent. The last installment was paid in July, 1924, and the railroad became again temporarily the property of the Government. (Ibid., p. 11.)

Both the railroad and the bank, because they were chartered in Connecticut and Maine, are obliged to pay State and Federal taxes to our Government. The Nicaraguan Government immediately began to put the railroad in repair and renew and extend the rolling stock.

These facts regarding the earlier railroad deals are fairly well known, but the rest of the story, which Mr. Tijerno also made public before the Foreign Relations Committee in 1927, needs to be retold.

Jeremiah Jenks, of J. W. Seligman & Co., and Joseph Choate, of the G. J. White Managing Corporation, remained on the board of directors of the railroad after 1924. While the railroad was under the control

of the bankers, the G. J. White Managing Corporation was retained to manage the railroad, at a compensation of $15,000 a year, with 2 per cent commission on all supplies bought in the United States. (Ibid., p. 12.)

The G. J. White organization has three companies—a managing corporation, a construction corporation, and one other. So that, in purchasing for the Nicaraguan Railroad, this triplicate organization charged 2 per cent commission for buying materials from itself, and so made one hand pay the other. When the Nicaraguan Government attempted, in 1925, to cancel this agreement, it was found impossible to do so, because Jeremiah Jenks, the financial adviser of the Nicaraguan Government and director of the bank and of the railroad by appointment of the State Department, came to Washington and used the private code of the State Department to send cable messages to President Solorzano, of Nicaragua, asking him not to cancel the contract with the White Managing Corporation.

The message was sent through the American minister in Managua, giving the impression that the State Department was interested in maintaining the old arrangements with the White Managing Corporation (Committee on Foreign Relations hearings, 1927, S. Con. Res. 15, p. 13), and President Solorzano reversed the official order to cancel the contract.

No satisfactory explanation was given for this action either by Mr. Jenks or members of the State Department, who claimed that they had allowed the code to be used out of courtesy to the Nicaraguan President, as Mr. Jenks explained that there was no direct code with the Nicaraguan Government. At a meeting of the directors of the railroad in New York in the early part of October, Mr. Tijerino, who is a director of the railroad, testified that Mr. Baillie, another member of the board, gave as a reason for extending the White contract another two or three months that "in this time many things can happen in Nicaragua." (P. 14, S. Con. Res. 15.)

The multiple contracts made by the New York bankers with the Nicaraguan Government form a network of political and financial scheming, with their real significance hidden in a labyrinth of words. Few people in either country would have the patience to study their intricacies. The fact that they were originally written in French adds to their obscurity. The English text of three is given in the report of the hearings before the Foreign Relations Committee in 1925. (S. Con. Res. 22, 1925, pp. 152–167.)

The contract of October 20, 1917, known as the "financial" or "Lansing" plan, dealt with the canal treaty and gave Nicaragua the right to receive $3,000,000 American gold from the United States Government. Less than 30 per cent reached Nicaragua.

The bulk of this $3,000,000 remained in the hands of the New York bankers to pay the arrears of loans to the Diaz régime and to pay also the Emery claim against Nicaragua, which the bankers had bought at a tremendous profit from its original owner. (Foreign Relations Committee hearings, 1927, S. Con. Res. 15.)

The financial plan, proposed by the bankers and under which Nicaragua is now living, provides for a high commission of three members, one a Nicaraguan, the other two citizens of the United States appointed by the United States Secretary of State. One of these shall act as arbitrator in case of discord between the other two. Any difference arising between the Republics, the collector general, and the bankers is to be referred to the high commission "whose decision will be final and obligatory."

In return for $3,000,000 paid by the United States, the Bryan-Chamorro treaty of 1916 gives the following concessions to the United States:

1. The right to construct a transcontinental canal through Nicaragua.

2. A 99-year lease of Great Corn and Little Corn Islands, off the Nicaragua coast in the Caribbean Sea, for a naval base and an option to renew the lease.

3. The establishment of a naval base on the west coast in Fonseca Bay. (Foreign Relations, 1913, p. 1021–1034; 1914, p. 953–969; 1915, p. 1140–1141; 1916, p. 849, 852.)

Col. Clifford D. Ham, collector general of customs in Nicaragua, says of the Bryan-Chamorro treaty:

"It is an important link in the chain which we are attempting to forge, of preparedness and national offense and the protection of our investments in the Panama Canal."

The Bryan-Chamorro treaty was ratified and proclaimed by the United States Senate June 24, 1916. Before that date Costa Rica and Salvador protested the treaty as a violation of their rights. Their objections did not bring about any changes in terms, but the Senate, before ratification, added a clause that nothing in the treaty should affect any existing right of those two countries or of Honduras. (Ibid.)

Costa Rica and Salvador also referred the question to the Central American Court of Justice which ruled that Nicaragua should maintain the status quo existing prior to the signing of the treaty. (Ibid.)

Neither the United States nor Nicaragua paid any attention to the decision of the court, and as the court was created through the initiative of the United States, it was rendered useless and two years later, after 12 years of service, was formally dissolved.

In 1924 Nicaragua paid off her debt to the bankers and bought back her railroad. Nominally she was a free republic; virtually she was a protectorate of the United States; and the story of Nicaragua was only just begun. (For list of debts see For. Rel., 1913, p. 1043–1044.)

Three weeks after the board of directors of the Nicaragua bank had heard "that many things can happen in a short time in Nicaragua," General Chamorro started the revolution of October 21, 1925.

Walter Liggett writes, in the March issue of "New Masses":

"There is every reason to suppose that the revolution was planned and financed in New York by the bankers, with the tacit consent of the State department * * * if not with the active aid of Jordon H. Stabler, ex-banker employer and chief of the Latin-American division."

The presidential election of the year before was of especial significance to Nicaragua since the withdrawal of American marines rested on the results. The election was to be carried out under a new law drafted by H. W. Dodds, known as an American expert who had acted as an "observer" during the American-dominated elections of 1916 and 1920.

A split in both parties brought four candidates into the field. Gen. Emiliano Chamorro came back from Washington to conduct his own campaign as one of the Conservatives. A compromise ticket which did not include him was finally negotiated with Carlos Solorzano as President and Juan B. Sacasa as Vice President, and the State Department was asked if Washington would approve. The State Department declined to express its views but said:

"The Government of the United States has no preference whatever regarding presidential candidates in Nicaragua * * *. It desires only a free and fair election." (Current History, July, 1924, p. 1010.)

Then Nicaragua made a gesture of self-government. It notified the State Department that it would prefer not to have "observers" at the coming elections.

This election was pronounced the fairest election ever held in the country. Solorzano and Sacasa were elected by a nearly 2 to 1 majority. The United States at once recognized them.

The new President was not a strong leader, and the Congress, made up of two Conservative wings as well as Liberals, was not leadable. Three acts of the Congress were obviously anti-American. Two new loans, one for the bank and one for proposed public construction, aggregating 5,500,000 cordobas were rejected, and it was voted to investigate the expenses of the commission of which Jeremiah Jenks, the fiscal arbiter, was head. (Current History, April, May, and July, 1925.)

A law suggested by the American chargé d'affaires, establishing a new national constabulary of 400 was passed, and C. B. Carter, of Texas, was appointed to instruct it. (Current History, September, 1925.) This law is the forerunner of the development of a national guard under the control of American marines as discussed in the early months of 1928.

American marines were withdrawn from Nicaragua in August, 1925, following the election. Quarrels soon broke out between Conservatives and Liberals, and the President revised his cabinet, keeping the war department in his own hands. On October 25 Chamorro took possession of the fortress commanding Managua. He forced the President to dismiss the Liberal cabinet members, pay him $10,000 for his expenses in arranging this coup d'état, and to appoint him commander of the army. The President, refusing to call upon war vessels hovering around the coast, was obliged to resign, and Vice President Sacasa left the country to save his life. Chamorro had gained control of Nicaragua.

Chamorro, a member of a prominent Conservative family of Granada, has been one of the best-known political leaders of the country. It is said that it was he who started the revolution against Zalaya in Bluefields. Minister of War in Diaz's administration, openly supported by the American minister for President in 1916, with the aid of American marines he received the election. As minister to Washington, his name became linked with Bryan's on the treaty which made Nicaragua a virtual protectorate of the United States. He evidently counted upon his close relationship with the State Department when he usurped the presidency in 1926.

He tried to propitiate by sending as minister to Washington Castrillo, another man of hyphenated treaty fame. Isaac Joslin Cox, professor of history of Northwestern University, writes that Chamorro also offered to sell the Nicaragua Railway and the bank. (Nicaragua and the United States, by Isaac Joslin Cox; World Peace Foundation pamphlet, p. 779.) Mr. Cox also says that the State Department refused to recognize him, but the various fiscal agents and the American minister maintained with him unofficial relations that were outwardly friendly. (Ibid, p. 779.) He remained in power for more than a year.

The following May the Liberals started a revolution against the Chamorro government by raiding the branch of the national bank at Bluefields. Under the excuse that the bank is chartered under the laws of Connecticut the American Navy arrived to "protect American citizens and American property" and established a neutral zone. Five other neutral zones were established, including one on the railroad, which, like the bank, belonged alone to Nicaragua. The Liberals found

themselves deprived of victory by the Government of the United States, which would not recognize the administration they were fighting against.

In September Admiral Latimer arranged a 15-day armistice. Lawrence Dennis, in charge of the American Legation and now associated with the firm of J. W. Seligman & Co., acted as director under orders from Washington.

The Liberals proposed to submit the question of the Presidency to arbitration by a representative of the United States Department of State and one from each of the other four Central American Republics.

The Conservatives would submit the matter to the State Department only. Adolfo Diaz was the candidate which both the Conservatives and Washington wanted. With respect to the coup d'état of the preceding October, Diaz was "as deep in the mire as Chamorro was in the mud," says Mr. Cox. But he had avoided the open acts that rendered the latter unavailable. (Ibid, p. 781.)

The Liberals refused and Diaz withdrew from the conference. United States pressure was continued and Diaz was made President by the Nicaraguan Congress on less than a two-thirds vote, more than a fifth of the entire body refusing to vote.

Diaz was elected President on November 11 and quickly recognized by the State Department. A week later it was reported that the American bankers were ready to make a temporary advance of $300,000 to the Government, to be followed by a loan of $6,00,000. Diaz denied this but, according to the New York Times, the first was negotiated. (New York Times, November 18, 19, 20, 1926; January 1, 1927.) Then came the scare-up of Bolshevism from Mexico, with Diaz's appeal to the American State Department to help prevent it. (New York Times, November 18, December 14, 1926; State Department release, No. 18, 1926.) Sacasa returned to Nicaragua and established a "constitutional government," which Mexico recognized. Sacasa represented the wing of the Liberals that believed in using peaceful methods. (H. W. Dodds in the Annals American Academy of Political and Social Science, p. 139.)

He offered several times to give up his claim to the presidency and stop fighting if both parties would agree on a neutral candidate.

On December 23, 1926, Admiral Latimer, following instructions from Washington, landed at Puerta Cabezas, the Liberal capital, and at Rio Grande Bar, both on the east coast, and established neutral zones. The Liberal envoy believed this was to prevent the Conservative forces from being driven from Pearl Lagoon. (New York Times, December 24, 25, 1926; State Department release, Deeember 25, 1926.) The Liberal cause was growing more popular. Diaz called again for help from the State Department. President Coolidge, in a special message to Congress, defended the stand taken by the State Department in none too convincing a manner. Congress was aroused to debate. The press of the world was divided in its comment according to its imperialistic bias.

Guatamala and Costa Rica offered mediation. Sacasa expressed his willingness to accept Costa Rica's offer, but Diaz refused. Diaz proposed peace terms which involved United States protection, and asked President Coolidge for "guidance, cooperation, and aid." (New York Times, January 16, 21, 1927.) Sacasa was ready to welcome the advantages the United States had to offer. In an open letter he spoke of the fear of the "proceeding employed for quite a number of years against Nicaragua and other small republics of Central America." He said:

"It is not an American national policy, beneficial to Americans as a whole, but rather a policy for the exclusive benefit of a certain group of bankers. * * * We wish a frank and dignified understanding between Nicaragua and the United States—an understanding between the great commercial and financial interests of two sovereign entities." (New York Times, January 20, 1927.)

In view of the fact that Coolidge would recognize no one but Diaz, Sacasa feared a possible clash between American and Liberal forces.

In January, 1927, the Liberal forces began fighting again. A terrible battle occurred at Chinandega. American aviators reconnoitered and encouraged the Conservatives from bombing planes. They were reported as "private individuals," and the State Department disapproved. (Current History, March, 1927, p. 919.) Diaz offered to retire, and said he would "welcome the return of the marines." Then came Diaz's "benevolent and honorable plan," a proposal for a treaty of alliance between the United States and Nicaragua.

American intervention followed closely. With the advice of Admiral Latimer, the State Department announced in February that the number of American marines were to be increased to over 5,000. (State Department release, February 21, 1927; Current History, April, 1927, p. 104.) A British cruiser appeared in Corinto, and stayed less than two weeks. This precipitated a popular discussion of the Monroe doctrine and hints of collusion between American and British diplomats. (Chicago Daily Tribune, February 25, 1927, and other dailies.) Admiral Latimer sent a mission to confer with Moncada, chief of the Liberal forces. The mission returned, and the State Department on March 8 announced that Moncada accepted Diaz's peace terms "in principle." (State Department release, March 8, 1927.)

Moncada is the candidate for the coming elections whom the State Department will recognize. He has been in New York this winter talking about future loans. The Nation of February 1 shows him to be a party turncoat and a traitor, having supported Honduras in a war against his own country. Sandino is reported to have predicted that Moncada would fail Sacasa.

On February 25 the State Department announced a sale of 3,000 rifles, 200 machine guns, and 3,000,000 rounds of ammunition, at a cost of $217,718, to the Diaz Government. (State Department release, March 23, 1927; New Republic, April 13, 1927.) These are to be paid for after January 31, 1929, thus placing the burden on the next President. The details of the contract which was made with the usual New York bankers to cover this expense is given later under date of March 21, 1927. (State Department release, March 23, 1927; New Republic, April 13, 1927.)

Just as the rainy season was coming on and nature would force an armistice upon the waring factions, Henry L. Stimson, as President Coolidge's special emissary, reached Nicaragua. He was one time Secretary of War of the United States, and has now been sent to the Philippines as Governor General.

The Stimson agreement was the outcome of his mission. Sacasa and Moncada yielded to Mr. Stimson's persuasion, made impregnable by threats of force. Diaz looked on smiling. He had triumphed again, backed financially by New York bankers and politically by the United States Department of State.

Sandino alone, of all the Nicaraguan leaders, refused to capitulate to American dollar diplomacy at its worst.

Salomon de la Selva, in the Nation of January 18, gives a description of Augusto Calderon Sandino, which absolutely refutes the hearsay report of the Navy Department that he had spent 22 years in Mexico and had been the lieutenant of Pancho Villa. Most of his life has been spent in his own country.

The following letter from Mr. Stimson to Moncada shows how the Stimson agreement was brought about:

"Confirming our conversation of this morning, I have the honor to inform you that I am authorized to say that the President of the United States intends to accept the request of the Nicaraguan Government to supervise the election of 1928;

"That the retention of President Diaz during the remainder of his term is regarded as essential to that plan and will be insisted upon;

"That a general disarmament of the country is regarded as necessary for the proper and successful conduct of such election; and

"That the forces of the United States will be authorized to accept the custody of the arms of those willing to lay them down, including the governmental, and to disarm forcibly those who will not do so." (State Department release, May 10, 1927.)

Both governmental and Liberal forces laid down their arms, and by June 6 the State Department reported "practically all arms in Nicaragua are now in our custody." (State Department release, June 10, 1927.)

Moncada received in return certain supplies of clothing and $10 for each rifle turned in to the American forces, and Mr. Stimson publicly favored the candidacy of Moncada for the presidency.

The outstanding facts are that during the whole period of civil strife Nicaragua had respected American property, and it was not until after the Stimson agreement that it was put in jeopardy. Neither had foreign trade suffered a loss. The total foreign trade for 1926, $23,283,237.91, was the largest of any except 1920.

Two months after Stimson had forced the Liberals to lay down their arms and accept a program of military supervision by the United States, equivalent to the protectorate already operating in San Domingo and Haiti, Sandino seized some mines of the La Luz y Los Angeles Mining Co. This was the American company in which Secretary Knox had a pecuniary interest and for which Diaz worked when he advanced $600,000 to carry on the revolution of 1909. The recent hearings before the Foreign Relations Committee revealed that after refusing to capitulate to either American force or bribery Sandino started north with the idea of crossing into Honduras. The Nicaraguan Government notified the Honduran Government of Sandino's movements and troops were sent down to catch him when he crossed the border. He turned back and, keeping about 40 men with him, sent the married men back to their homes. (Foreign Relations Committee hearings, S. Res. 137, p. 25.)

Major General Lejeune, in command of the United States Marine Corps, issued an ultimatum to Sandino to lay down his arms at El Ocatol before a certain hour on July 14 or suffer an attack by joint American and Nicaraguan forces. Sandino refused, as Patrick Henry would have done, "calling for a free country or death."

The conflict which resulted was described by Major Lejeune to the Foreign Relations Committee as: "Entirely a surprise attack" on the United States garrison at Ocotal, "without warning and without any preliminary or anything that happened which indicated that he was going to make an attack." (Ibid., pp. 47–48.) The actual battle has previously been described. Two-thirds of the Nicaraguan losses were inflicted by bombing and machine-gun attacks made from United States airplanes dispatched from the capital Managua. (Ibid., p. 48.) The United States Government, by recommending the officer in command of the bombing raid for distinguished service, sanctioned this method of carrying out the terms of the program to establish peace.

The day after the battle at Ocotal, President Greene, of the American Federation of Labor, notified Secretary of State Kellogg that officers and members of the Pan American Association of Labor, then in session at Habana, were "deeply concerned over the exceedingly disturbed conditions which exist in Nicaragua."

Secretary Kellogg in his reply to President Greene reviewed the events leading up to the El Ocotal incident and characterized Sandino's forces as "nothing more than common outlaws who do not have the support or approval of any of the leaders of either of the political parties of Nicaragua." (Current History, September, 1927.)

The same day Moncada, former Liberal generalissimo who had accepted the Stimson agreement and delivered over the arms of his forces, placed full responsibility upon Sandino, saying that "Sandino preferred to gather a band of bandits and assassins" and create disorder than "to lay down his arms and return to peaceful pursuits." (Current History, September, 1927.)

A telegram from Sandino which was intercepted by airplanes patrolling the district was reproduced in Current History of September, 1927. It gave his explanation of why the Ocotal combat took place, as follows:

"1. To show that we continue protesting and defending the constitutionality of Doctor Sacasa.

"2. To disabuse the idea that we are bandits.

"3. To prove that we prefer death to slavery, for the peace secured by Moncada is not the peace that can give liberty to men but puts men under the domination of others."

And he added:

"I wish to say that the only one responsible for what has happened is the President of the United States, Calvin Coolidge, who has supported Diaz." (Ibid.)

The answer from the State Department did not convince the Pan American Labor Congress, and three days later by a rising vote it unanimously approved a resolution which stated that—

"The people of Nicaragua have been the unfortunate victims of a foreign intervention which has caused not only internal suffering but internal difficulties."

It petitioned the United States Government to effect an "immediate withdrawal of United States forces on land, sea, and air" from Nicaragua, and deplored the "recent tragic events said to have accrued on account of the intervention decreed as against a free country."

It is not labor alone that protested. An extreme wave of anxiety swept over the United States in regard to the official actions of the United States toward Latin America. Hardly an American magazine appeared without some approach to the subject. (Current History, Latin-American number, September, 1927. The Annals of the American Academy of Political and Social Science. "Some outstanding problems of American foreign policy," July, 1927. The World To-morrow, "The Caribbean," May, 1927. The Nation. The New Republic.) Current History, the Annals of the American Academy of Political and Social Science, and the World To-morrow devoted a whole issue to the subject.

The Pan American Labor Conference also touched a sensitive nerve when it denounced in another resolution the arrangements "alleged to have been agreed to by President Diaz, of Nicaragua, whom the United States marines are again holding in power * * *, by which New York bankers would secure complete control of Nicaraguan finances." (Current History, September, 1927.)

The substance of this resolution is based on a contract signed by New York bankers and agreed to by the State Department eight weeks before Colonel Stimson was sent to Nicaragua.

This contract was signed on March 21, 1927. It is between the financial agent of Nicaragua, Don Dr. Joaquin Cuadro Zavala, and the Guaranty Trust Co. of New York, and J. and W. Seligman & Co., also of New York. It is for a so-called "loan" to the interim government of Adolfo Diaz, pending the coming elections of 1928. This contract was sent to the proconservative congress on March 22, and the following day published in the Nicaraguan papers. It was not made public in the United States, as the American bankers stated that it was a private affair between themselves and the Nicaraguan Government.

Mr. Teribio Tijerino, former consul general and financial agent of Nicaragua, analyzes the contract in this way (letter written by Mr. Tijerino in possession of writer):

It does not in the least deal with a straight loan. The bankers are not lending Nicaragua one red penny of their money. They are only opening a credit in the United States of $1,000,000 to the Nicaraguan Government. The life of the credit is one year, with the possibility of extending the time six months longer on one-half the amount. Six per cent interest is to be paid on whatever part of the credit is used. Besides this interest, the contract stipulates that the first money taken from the credit shall be 1 per cent ($10,000) as payment to the bankers for arranging the credit, and for this also Nicaragua will have to pay 6 per cent interest from the day the contract was approved.

Nicaragua is bound by the contract to use the credit exclusively for the following purposes:

1. For buying provisions for the armed forces of the Diaz Government.

2. For maintaining and equipping the Diaz forces and to pay them off.

3. For any other purposes judged necessary, as determined by a special board composed of the American high commissioner (Roscoe Hill), the American manager of the national bank (Lois Rosenthal), and the Nicaraguan minister of finance. As all decisions of this board will be binding when approved by two of its members, control of the expenditures rests with the two Americans.

Eight weeks later the Liberals were forced by the United States Government to disarm.

This million-dollar credit is guaranteed in such a way as to throttle all possibility of self-government, Mr. Tijerino claims, by a mortgage placed on new taxes which were created by a special decree of the Nicaraguan Congress in January, 1927, for the express purpose of repaying small farmers for the supplies taken from them for the Diaz forces, and to meet other war claims of a similar nature such as commandeering livestock and looting farms and shops. These taxes include an increased export tax on coffee, the largest crop of the country, and an increased import tax upon all goods coming into the country except rice, flour, and corn.

Mr. Tijerino writes:

"This means less pay for the peon working on the coffee plantation as well as less profit for the owners. * * * It means higher prices on most of the many imported commodities such as cigarettes, lard, and other food stuffs, calico and gray sheeting of which the national dress is made, cement which is so necessary for modern construction, and medicine of all kinds. * * * It means loss of business for the merchants and greater poverty for the people."

Bad as this increase in living costs is, it is not the worst result of this contract. Mr. Tijerino points out that the injury done by the Diaz troops has been in the section where the Liberals predominate, and where the anti-Diaz feeling runs highest. This mortgage upon the tax receipts which were to pay the people will act as a big stick to force them to submit to the will of the Diaz régime or to forego indemnities due them. "Free elections becomes but an empty phrase when the free action of the people is bound and tied to the will of the minions in Nicaragua of the New York bankers," he rightly says.

This secret credit is also guaranteed by the surplus of the national treasury revenue, thus preventing the Nicaraguan people from undertaking any national improvement such as road building, without the consent of private American bankers.

In the same way the bankers now have obtained complete control of the national bank and the railway through a mortgage upon all stock and dividends of both.

In the contract Nicaragua is pledged to reorganize the boards of directors of both the railroad and the bank so as to include a majority of directors chosen by the bankers. The result is an interlocking directorate of six out of nine members in each of the two boards.

The bankers are given priority rights for the next five years in regard to other loans and bond issues; that is, all competition is eliminated; and the nation if it needs to borrow more is at the mercy of the bankers as to amount and rate of interest.

"All these conditions," Mr. Tijerino writes, "have been fulfilled by the Diaz government, and with a vengence." At the first meeting of the boards of directors of the bank and the railroad it was decided to cancel an existing agreement with the Royal Bank of Canada and to transfer all the various funds belonging to or held in trust by the Nicaraguan bank and the railroad to the New York bankers. The amounts aggregate some three and a half million dollars, for which the bankers will pay 2½ per cent interest, while requiring 6 per cent on their credit. The president and the treasurer of the National Bank, both Americans, receive $6,000 salaries. The president is a vice president of the Guaranty Trust Co. of New York.

In summing up, Mr. Tijerino says:

"This contract, which places the absolute control of a sister Republic in the hands of New York bankers, was entered into with the knowledge and approval of the United States Department of State, and is typical of the kind of business that certain New York bankers have been doing in Nicaragua for the past 15 years under the protection of the United States flag."

In the light of the coming Nicaraguan elections in October, 1928, which President Coolidge has decreed shall be guaranteed by the United States Government, this contract ceases to be a private affair.

Since Mr. Stimson reported: "The civil war in Nicaragua is now definitely ended (1)," there have been 50 engagements or more between American forces and Nicaraguans. (2) In January of this year they were almost daily occurrences. Sandino's forces have increased in number and are called "rebels" now instead of "bandits." They are fighting under the colors red and black, of the organized labor group. They call themselves the "wild beasts of the mountains," probably much in the same spirit as the Italian troop which the United States feted during the World War nominated themselves the "Blue devils." General Lejeune says:

"Sandino has ability and is ambitious and * * * he would rather be a leader of a band in the mountains than to be working in the mines as a clerk."

Who with ability and ambition would not? But General Lejeune said something really important when he told the Foreign Relations Committee that—

"Sandino has become a symbol in Central America."

Sandino is fighting for an imperishable principle embedded in the hearts of men from the beginning. He is but one of the many courageous young men who are arising in every part of the world to-day against the hydra-headed diplomatic military banking beast, which sucks the very life blood of democracy.

"What would happen," Senator McLEAN asked, "if the American marines took the defensive only" against Sandino? And General Lane answered: "He would be simply king of the Province of Nueva Segovia, and would prevent the elections being held there in September."

There is no report of civilians having been killed by Sandino's forces in Nueva Segovia or the surrounding territory. General Latimer stated before the Foreign Relations Committee that no one was killed in the American mine where Sandino obtained dynamite and other supplies.

Sandino in the wilderness of Nueva Segovia is too small an objective to account for 2,700 United States marines in Nicaragua and more to come.

It is an open secret that neither Diaz nor Chamorro want the elections held next fall, and they are giving encouragement to Sandino. Others are undoubtedly strengthening his position also.

Two new issues have stirred Nicaraguans to further resistance: By the presence of marines in the capital, attempts have been made to force through a treaty for the establishment of a national guard, and a law which would legalize American supervision of elections.

American marines are in Nicaragua not to suppress Sandino, says Mr. Tijerino, but they are in Managua to see that "Congress behaves meekly and raises no protest." (Letter signed by T. Tijerino, January 9, 1928, in possession of writer.)

Information came first from the Nicaraguan paper El Comercio, of Managua, that a covenant is under consideration between the United States and Nicaragua concerning the establishment and organization of a guardia nacional in Nicaragua. (Letter signed by T. Tijerino, January 9, 1928, in possession of writer.)

Mr. Tijerino explains that by legislation of the Solorzano-Sacasa government the country is pledged to establish a national guard, but not by treaty with the United States which would give the United States control.

The pending covenant stipulates that the guardia nacional is to replace all military and police force of the country, and that it will not be subject to the judiciary branch of the Government as would be the national constabulary provided for in the 1924 law. American officers of the guardia would be subject to neither Nicaraguan courts or law. The cost to Nicaragua would be a minimum of $700,000, more than half of the annual national budget. Ninety-two American officers are to receive $117,000 in wages, while 1,101 Nicaraguan members receive not much more, $177,960. American are to have a minimum of $200,000 for expenses also, for which they will not be accountable to anyone.

Mr. Tijerino writes:

"This covenant which the national congress will be forced, if possible, into approving is in opposition to Nicaragua's constitution and to her jurisprudence."

By this covenant the State Department is evidently trying to make a continued control of Nicaragua by American officers legal under Nicaraguan laws.

It is an attempt to establish a military dictatorship as bad, if not worse, than that of Haiti. The United States Senate ratified that treaty without knowing how it had been obtained. It looked at the time like a friendly act freely entered into by the Haitians.

A summary of the results of American dictatorship in Haiti after 12 years is to be found in Senator KING'S resolution (S. Res. 158), now before the Foreign Relations Committee, calling for investigation. It charges that—

"The suppression of civil authority by military power is contrary to the Constitution of the United States and those principles of political and civil liberty which are professed by the Government and the people of the United States."

Mr. Carr, of the State Department, has announced the "approval of a private loan to Nicaragua, to be used to pay the expenses of the national guard and of the coming elections." This loan will put the entire administration of the revenue into the hands of New York bankers.

Diaz and Moncada, through the directivas of their respective political parties, have agreed to the treaty, but it is reported that Diaz has turned against the terms of the loan.

Besides an American collector general of customs and an American high commissioner there has been appointed lately an American general inspector of internal revenues. The United States now has governmental control of Nicaraguan finances, armed forces, and prisons, and private control of the national bank and railroad, for all of which Nicaragua pays the bills.

The attempt of the United States executive department to legalize American supervision of elections in Nicaragua under the law of that country has recently failed.

Admiral Latimer told the Foreign Relations Committee:

"As far as principles and practices are concerned there is no difference between the two political parties in Nicaragua. The original dividing line was the church, but that has long since passed." (Foreign Relations Committee hearing, S. Res. 137, p. 40.)

There is also "no differences between the two parties as far as protection of American rights and property is concerned." (Ibid. 41.)

Marines have been acting as "observers" in recent elections in the Provinces, where Liberal victories and "no frauds" are reported.

Ostensibly we are in Nicaragua only to assure a fair election. It was brought out in the recent hearing by a Navy officer that Admiral Sellers wrote Sandino a "very carefully prepared letter," pointing out that the United States was determined to bring about a state of peace in Nicaragua. The United States had no ulterior motive; its only desire was to do something for the good of the people; it wanted to hold and had promised to hold a free and fair election under American supervision. (S. Res. 137, hearing Foreign Relations Committee, p. 60.)

General Lane told the Foreign Relations Committee that the United States is trying to instill in the Nicaraguans "a spirit of patriotism in support of Nicaraguan institutions, as distinguished from partisan institutions." He thought it doubtful if it could be accomplished. He also said that in his opinion the plan of protecting this election would not pacify the country and that no election would accomplish it in any Central American country whether it was fair or not. General McCoy is the man whom the United States has appointed to have charge of supervision of elections. It is under his name that the new election law was presented to the Nicaraguan Congress.

The McCoy electoral law passed the American-controlled senate unanimously. It provided that the elections should be held under the "control and supervision" of the United States.

The chamber of deputies amended the law so that the elections should be held under "observation" only. When put to a vote the measure failed by 22 to 16.

The Conservatives, led by Chamorro, who opposed the bill, held that President Diaz had no authority under the constitution to abrogate the right of Congress to supervise elections. Article 84, section 2, of the Nicaraguan constitution reads:

"It shall be the duty of Congress to regulate the votes and judge and declare election of President and Vice President of the Republic, and to elect those officers in the way provided by the constitution."

It is evident that the marines have not yet succeeded in uprooting partisanship and replacing it with the kind of patriotism which President Coolidge feels is necessary to deserve our moral support.

The United States is placed in an unenviable position. If we go through with the election it must be under the decree which President Diaz at once issued establishing American supervision of election, on the unsound legality of his own position.

The United States Department of State, on March 26, released the text of the decree signed by Diaz March 21, 1928.

The authority of the decree is based upon a resolution of the Nicaragua supreme court of justice, adopted four days before, which "designated Gen. Frank Ross McCoy to be president of the national board of elections by virtue of his nomination thereto by the President of the United States."

The national board of elections, consisting of General McCoy and two representatives of the political parties or their alternates, is vested with full authority to supervise the elections of 1928 "and to prescribe with obligatory force, all measures necessary for the registration of voters, for the counting of ballots, and regarding all other matters that may pertain to the election." Alternates for each member of the board, known as "suplentes," are provided for. General McCoy's position in absolute power is made impregnable. His "suplente" shall be a citizen of the United States who may be nominated by the President of the United States. The President of Nicaragua shall remove any other member of the board if the chairman so recommends, but can not do so without his recommendation.

No meeting of the board can be held without the chairman. The chairman, with either of the other two members, shall constitute a quorum; but if an emergency meeting be deemed necessary, the presence of the chairman alone shall constitute a quorum, provided that a formal notice to the other members has been given a day in advance. No action or decision of the board shall be valid unless concurred in by the chairman, and in the case of a tie he shall have a double vote. Finally, the chairman is authorized to declare an emergency measure any action or demonstration which in his opinion may be indispensable for the conduct of a free and fair election.

General McCoy is given authority by this decree to command the services of the guardia nacional, and to give that force "such orders as he may deem necessary and appropriate to insure a free and impartial election."

If the Liberals win, the Conservatives can point to the failure of the passage of this law to justify them in another revolution. If

the Conservatives should win, the Liberals can claim they were forced to accept the terms of an election at the point of a gun.

In either case, if we continue our present plan we shall have to maintain the next administration in office by marine protection. President Diaz, as unofficial spokesman for the State Department, proposed to "permit" the passage of the bill on condition that the United States agree to supervise the next four or five elections.

If the marines are withdrawn, partisan fighting may begin again.

Will Rogers says, "Nicaragua voted the other day not to have us supervise their elections, but that's not official, as we didn't supervise that vote." (Washington Post, March 24, 1928.)

We are in a dilemma. The only excuse given for not acknowledging that the administration is wrong is that the State Department must "save its face." It would seem better to retrieve our national integrity than to save our face. Our refusal to supervise the elections of Panama points the way.

The New Republic, of March 28, suggests a four-cornered conference in which the United States, the Moncada Liberals, the Conservatives, and Sandino would all be represented to see whether some sort of compromise agreement can not be reached.

Two objections present themselves to this: First, the Conservative Party is now split into Diaz and Chamorro factions, neither of whom can be counted on from past experience to sink self-interest for the welfare of their country. Secondly, the conference still would give a preponderance of power to the United States.

Sandino has offered terms of peace which would seem to lead to a possibility of more equitable adjustment. He proposes supervision by Latin-American representatives instead of American marines.

Admiral Sellers's letter to Sandino, together with a letter from General Sandino himself, has been placed in Senator BORAH'S hands as chairman of the Foreign Relations Committee of the United States Senate.

Sandino writes:

"The only way this struggle can be ended is by the immediate withdrawal of the invading forces from our territory;

"The substitution for the present president of some Nicaraguan citizen not a candidate for the presidency; and

"The supervision of the coming elections by Latin-American representatives instead of American marines."

The message of Sandino to the United States Senate reads:

"In the name of the Nicaraguan people I protest against the continued barbarism of your forces in my country, such as the recent total destruction of the town of Quilali. I shall never recognize a government imposed by a foreign power. I demand the immediate withdrawal of the invading troops. Otherwise from this date on I can not be responsible for the safety of any North American official resident in Nicaraguan territory." (Signed) "For fatherland and liberty, A. C. Sandino." (Washington Star, March 14, 1928.)

The Coolidge administration answers as George III would have done:

"A thousand more troops will sail to help enforce the Stimson peace agreement."

Secretary Wilbur says the new marine force will be used principally for maintaining order during the balloting for a successor of Adolfo Diaz. They will not be used in the field against Sandino, although some of them will be employed for guard duty and other marine activities. (Washington Star, March 17, 1928.) He does not explain why these 1,000 more men should leave the United States in March to supervise Nicaraguan elections in October at the additional expense to the Nicaraguan people, and their own discomfort through six tropical months of the wet season.

With 15 years of Nicaraguan history in mind, one turns back with curiosity to President Coolidge's message of December 6 to find that—

"We are a peaceful people and committed to the settling of disputes by amicable adjustment rather than by force."

And also that—

"Our country has made much progress. But it has taken and will continue to take much effort. Competition will be keen, the temptation to selfishness and arrogance will be severe, the provocation to deal harshly with weaker peoples will be many. * * * They will be overbalanced by cooperation, by generosity, and a spirit of neighborly kindness.

Rumor has it that after elections, if all goes well, the railroad and the bank may be given back to Nicaragua, but there will be no compromise nor investigation in regard to foreign concessions in Nicaragua.

There's a bill introduced in the Senate by Senator EDGE, of New Jersey, asking for an appropriation of $500,000 to be used by Secretary Wilbur for an immediate survey of a Nicaragua canal route. The canal would connect United States fortifications at Little and Big Corn Islands with Fonseca Bay.

It brings to mind that British war vessel hovering off the coast for less than 10 days. American world trade needs Suez and British world trade needs Panama. "In that circumstance," says the Chicago Tribune of March 14, "lies justification for an understanding between this country and Great Britain by which we would support Britain in maintaining her canal in exchange for her support in defense of ours."

It is right that Americans should question the legality of our present Nicaraguan policy.

Albert H. Putney, professor of constitutional law in the National University Law School, has forcefully presented the legal aspects of the matter in an article entitled "Executive Assumption of the War-Making Power." (Albert H. Putney, professor of constitutional law, National University Law School, "Executive Assumption of the War-Making Power," in the National University Law Review, May, 1927.) A brief summary of the points which he makes follows:

The Constitution declares that Congress shall have the power to declare war, and the Supreme Court has ruled that this power of Congress is an exclusive one and that the President has no power to initiate or declare war either against a foreign nation or a domestic State. These early decisions have never been overruled or modified.

As a principle of international law, "Armed intervention consists in threatened or actual force, employed or to be employed by one State in regulating or determining the conduct or affairs of another. Such an employment of force is virtually a war, and must be justified or condemned upon the same general principle as other wars."

The granting of the war-making power to Congress by the Constitution was one of the greatest innovations, in the direction of greater human liberty and justice, made by that document. It was in striking contrast to the prevailing rule in the European monarchies of the times.

Sumner said of it:

"Kings were rejected in substance as in name. The one-man power was set aside and this kingly prerogative placed under the safeguard of the people, as represented in that highest form of national life, an act of Congress * * *. I do not go too far when I call it an essential element of republican institutions, happily discovered by our fathers."

From the first inauguration of Washington to 1903 Congress maintained the exclusiveness of its rights to declare war, or to authorize offensive warlike acts even though limited in scope.

The validity of the claims of Congress have been acquiesced in by each Executive administration, frequently by expressed acknowledgment.

Details of the attitude of successive Presidents on this question are cited. Professor Putney writes:

"The most famous event in the history of the foreign relations of the United States was the proclamation of the Monroe doctrine, but this was not an assertion by the President of the right of the Executive to make war upon his own authority in support of this doctrine, but a recommendation to Congress as to what their action should be."

At no time did President Lincoln indicate that he believed that the President had the power to employ force abroad without the consent of Congress.

President Cleveland in connection with the Hawaiian revolution, when it was revealed that it had been aided by the American minister and American marines, repudiated the whole transaction. He believed that there was more disgrace in defending a wrong which had been committed than in acknowledging and attempting to remedy it. He said in his special message, December 18, 1893:

"By an act of war, committed with the participation of a diplomatic representative of the United States and without authority of Congress, the Government of a feeble but friendly and confiding people has been overthrown. * * * A substantial wrong has been done which in due regard for our national character as well as the rights of an injured people requires we should endeavor to repair. * * * The consideration that international law is without a court for its enforcement and obedience * * * depends upon good faith * * * brands any deliberate infraction of it not merely as a wrong, but as a disgrace."

McKinley awaited the action of Congress before declaring war on Spain.

The first quarter of the twentieth century has witnessed the change from the exclusive power of Congress to make war, guarded jealously and successfully to the winter of 1926–27, when the Executive definitely and openly appropriated this power with only a few Members of Congress having the courage to protest.

Roosevelt succeeded in exercising the war-making power in Panama without the consent of Congress.

Taft, in his annual message, doubted if he had the authority to intervene in Mexico without express congressional approval, and then without authority intervened in Nicaragua in 1912.

Wilson, after the Tampico incident, asked the authorization of Congress to send the troops into Mexico, and then, contrary to his fundamental belief in the right of every people to determine its own form of government, proclaimed a military government in Haiti and Santo Domingo. There was an attempt to justify this infraction of the Constitution by treaty, but, as Doctor Putney points out, it is Congress, not the President and the Senate, which has the power to declare war.

Doctor Putney writes:

"The construction of the United States Constitution can not be affected by such questions as * * * whether the intervention by

the United States in Nicaragua was necessary to protect legitimate American interests, or whether, as is charged, it is in support of a rebellion financed by American interests, who desire to keep control of property in Nicaragua after they had sold the same to the Government of Nicaragua, and whether the only American in one of the towns occupied by the United States was a single beachcomber who arrived in town a few hours ahead of the marines."

Professor Putney continues:

"President Coolidge's action brings the question to an issue. In his message of January 10, 1927, he virtually asserts that the President of the United States has the power to wage an offensive war, upon his own authority, against any country and for any reason which in his opinion appears to affect 'the lives and property and the interests of its citizens and of this Government itself.'"

Against the claim of the present administration are arrayed the plain and express wording of the Constitution, decisions of the Supreme Court, the attitude and conduct of legislative and executive departments down to November, 1903.

In support of his claim are a few "dubious actions by the executive department since 1903."

Resolutions submitted to the Seventieth Congress clearly indicate that both bodies are alive to the seriousness of the Nicaraguan situation and its implication in regard to the Constitution of the United States. Senator WHEELER, in two resolutions (S. Res. 47 and S. Res. 102) calls for an investigation of terms and conditions under which concessions have been procured by Americans in Nicaragua and other foreign countries, and also as to who ordered the marines to be sent to Nicaragua.

Senator NYE'S resolution (S. Res. 100) opposes any policy of the United States which would guarantee or protect by force the investments of its citizens in foreign countries.

On January 4 Senator HEFLIN introduced a resolution (S. J. Res. 57) requesting the President to immediately withdraw the armed forces of the United States from Nicaragua, which was reported adversely by Mr. BORAH. Two months later he entered a second resolution (S. Res. 103) to provide for the return of the bodies of American marines who had died in Nicaragua during the present intervention by the United States.

Senator BLAINE has a resolution, S. Con. Res. 7, which would declare the foreign policy of the United States in reference to American investments in foreign countries to be based on friendly negotiations and arbitration without recourse to arms to preserve rights to American citizens beyond those enjoyed by the native citizens.

Senator KING, in Senate Resolution 138, asks as to the right of the President to employ the armed military and naval forces to carry on belligerent operations in certain foreign countries. Senator NORRIS, in March, following along the same line in his Senate Resolution 164 asks the five questions given at the beginning of this article regarding the right of the United States to supervise elections in other countries.

At the same time, in the House Mr. ROMJUE in House Resolution 80 has called upon the President to furnish information pertaining to our military forces in Nicaragua. The McSwain House Joint Resolution 201 would prohibit the employment of armed forces to intervene in domestic affairs of any foreign country; and the two Fish resolutions, H. J. Res. 167 and 172, deal with the exportation of arms to any country with which we are at peace, or to any belligerent country without the consent of Congress. Mr. BLOOM, in House Resolution 73, asks information from the Navy and State Departments regarding the circumstances surrounding American marines in Nicaragua.

These bills reflect the awakened demand of citizens of the United States to an answer to Senator NORRIS'S pertinent question—

"What authority, if any, has the President of the United States to supervise elections in Nicaragua?"

## REPORT OF FEDERAL TRADE COMMISSION ON SALE OF FLOUR AND BREAD

Mr. BRUCE. Mr. President, I desire to ask for the publication as a Senate document of the final report of the Federal Trade Commission, made to the Senate on January 11, 1928, pursuant to resolution of the Senate No. 163, agreed to February 16, 1924, directing an inquiry into the Bakery Trust.

This is the report that relates to the bread trust. It is, of course, a matter of very great public significance. The Federal Trade Commission itself has not the necessary funds for the publication of the report.

The PRESIDING OFFICER. Without objection, the report will be printed as a Senate document.

## BOULDER DAM

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 728) to provide for the construction of works for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

The PRESIDING OFFICER. The Senator from Colorado [Mr. PHIPPS] is entitled to the floor.

Mr. KING. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Dill | Kendrick | Reed, Pa. |
| Barkley | Edge | Keyes | Robinson, Ark. |
| Bayard | Edwards | King | Sackett |
| Bingham | Fess | La Follette | Sheppard |
| Black | Fletcher | Locher | Shortridge |
| Blaine | Frazier | McKellar | Simmons |
| Blease | George | McMaster | Steck |
| Borah | Gerry | McNary | Steiwer |
| Bratton | Gillett | Mayfield | Stephens |
| Brookhart | Glass | Metcalf | Swanson |
| Broussard | Goff | Moses | Thomas |
| Bruce | Gooding | Norbeck | Tydings |
| Capper | Gould | Norris | Tyson |
| Caraway | Greene | Nye | Vandenberg |
| Copeland | Hale | Oddie | Walsh, Mass. |
| Couzens | Harris | Overman | Warren |
| Curtis | Hawes | Phipps | Waterman |
| Cutting | Hayden | Pine | |
| Dale | Johnson | Pittman | |
| Deneen | Jones | Ransdell | |

The PRESIDING OFFICER. Seventy-seven Senators having answered to their names, a quorum is present.

Mr. PHIPPS resumed and concluded the speech begun by him yesterday. The entire speech follows:

*Tuesday, May 1, 1928*

Mr. PHIPPS. Mr. President, the subject of legislation for the development of the lower Colorado River has had the attention of the Congress for at least 10 years past. I remember that as early as 1920 I was personally called as a witness before the House Committee on Irrigation and Reclamation, then considering a Boulder Canyon Dam bill.

In 1924 the Senate Committee on Irrigation and Reclamation, under the chairmanship of the Senator from Oregon [Mr. MCNARY], held hearings on Boulder Canyon Dam. They continued those hearings for quite a time. They took them up again in 1925; and, under a special resolution adopted by the Senate, that committee as an entire committee was authorized to visit the lower Colorado River for the purpose of looking at the situation and inquiring into the questions of flood control and river regulation. A majority of that committee went to California and held hearings in the city of Los Angeles, then at San Diego, then at El Centro in Imperial Valley, then at Yuma, Phoenix, and Prescott, Ariz., and at Las Vegas, N. Mex., during which visit the committee inspected the proposed site at Black Canyon below the Boulder Canyon site, which is some miles farther up the stream, but in practically the same basin.

Mr. President, the committee of the Senate is not composed of engineers. There are some attorneys who are members of that committee; but the members of the committee have some ideas of business, and have exerted every effort to determine the features entering into this question of flood control and regulation of the rivers. Witnesses appearing before the committee—and they came from all quarters of the United States—were questioned, we think intelligently, and every endeavor was made to bring out all facts bearing upon or relating to this great question.

Mr. President, had it not been for the necessity claimed for flood control, I doubt if very serious attention, and certainly not as definite attention, would have been paid to this subject as that accorded it by the committee of the Senate.

The hearings were again taken up in the year 1927 and carried along for quite a length of time, still under the leadership of the Senator from Oregon [Mr. MCNARY]. This year, with the beginning of the present session of Congress, it was thought that possibly hearings might not be required; but after consideration the committee agreed that they would devote one week to hearings, so that everyone desiring to present his views on this important question might be given an opportunity to be heard. Those hearings consisted not only of one session a day but of two sessions per day.

After the testimony had been printed—and now all of the hearings that have been held by committees of the House and Senate mean volumes, a little library of itself—the committee got to work on the bills that had been proposed. The leading bill, of course, was Senate bill 728, now before the Senate for consideration. Its author, the senior Senator from California [Mr. JOHNSON], had had a bill in the Sixty-ninth Congress which did not come to final action. Not being entirely in accord with some of the features of the Johnson bill, I undertook to prepare a substitute measure which was given consideration by the committee; but the desire was to perfect the Johnson bill. That was my own feeling. That is what I desire.

The bill as reported by the committee had only one vote in opposition. All other members voted for reporting out favorably the Johnson bill. It is true that in order to report it out it was necessary for members of the committee to concede points which they were not entirely willing to concede, but they stood by the vote of the majority.

I do not feel that the bill is in as good form now as it should be. In order to perfect it, I have presented so far three amendments, to which I shall make reference later.

The principal interest of the Government, naturally, is in flood control. The experience of the past in the Imperial Valley is the full answer and reason for that. Were it not for the necessity of affording flood control in the lower reaches of the river, I doubt very much if the Federal Government would be justified in considering the present measure.

The estimates that have been made as to the cost of a dam that would afford flood control vary from twelve to twenty million dollars. The Senator from Utah has given the figures for the proposed dam at Topock; and while he states an estimate of $15,000,000, yet his proposal now is to authorize the expenditure of $20,000,000, which is the exact figure that in one amendment submitted to the Senate committee I used as an amount that the Federal Government could afford to contribute for that purpose, and then be reimbursed only if and when the dam structure were raised to a height which would afford production of hydroelectric power, bringing a revenue which would be devoted to paying off the investment.

Taking an expenditure by the Federal Government of $20,000,000, not reimbursable, it has seemed to many of us that it would be good business to double that amount and thereby secure a dam which would produce revenue, so that the project could and would pay for itself. I call attention to the fact that the estimate for the dam structure as embraced in this bill is $41,500,000. The other items making up the total of $125,000,000 proposed to be authorized are $35,000,000 for the power plant and $31,500,000 for the proposed all-American canal. The power plant need not necessarily be built by the Government, and a little later on I shall discuss that question.

The all-American canal is authorized only if and when the Secretary of the Interior finds that the lands to be irrigated by the use of such proposed canal can bear the burden and repay to the Federal Government the cost of the construction of such canal. The difference between the amounts I have named and the total of $125,000,000 is the estimated amount of interest during construction and until repayment.

Mr. KING. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. SHEPPARD in the chair). Does the Senator from Colorado yield to the Senator from Utah?

Mr. PHIPPS. Gladly.

Mr. KING. I think the Senator ought to state that with respect to the all-American canal it is not contemplated that interest shall be charged upon any advancement, even if the people in the valley are ever able to pay it; in other words, that the interest is to be remitted, and that they are to have an indefinite period—40 years at least—within which to make payment.

Mr. JOHNSON. No; they are to repay under the reclamation law.

Mr. KING. That means without interest.

Mr. JOHNSON. Exactly.

Mr. KING. It will take 40 years.

Mr. PHIPPS. As other reclamation projects—that is correct.

Mr. KING. And, judging this reclamation project by many other reclamation projects, it may mean that the Government will get nothing. There are several reclamation projects that are absolute failures and will be wiped off the ledger; and in the case of other reclamation projects we have had to reduce the amount of payment and extend the payment of that which we finally charged them for a period of 40 years.

Mr. JOHNSON. But the Senator would not eliminate the reclamation law for that reason, would he?

Mr. KING. I would eliminate many of the engineers who have been employed in the Reclamation Service, and I would put the Reclamation Service on a better and more efficient basis than it ever has been up to date.

Mr. JOHNSON. The Senator has the same view that I have of personal elimination in certain instances.

(At this point Mr. PHIPPS was interrupted for the day by a message from the House of Representatives announcing the death of Representative SWEET, of New York.)

*Wednesday, May 2, 1928*

Mr. PHIPPS. Mr. President, briefly yesterday, in speaking upon the pending measure known as the Boulder Dam bill, I referred to the interest of the Federal Government in flood control. At the time of adjournment we were speaking about the reclamation projects which could be irrigated by means of the proposed all-American canal. I now desire to have it made plain that under the language of the bill the all-American canal would come under the reclamation law and that the money, estimated at some $31,000,000, authorized for that purpose would be refunded to the Government, if expended, and that it would be the duty of the Department of the Interior to determine that the recovery could be made before authorizing expenditures on the project.

Another purpose of the bill is to supply potable water for use in the cities of the coastal plain. The committee has had a great deal of testimony on that subject and the evidence is very strong to the effect that this water is not only desired, but that it will be needed, and that steps should now be taken by those cities to provide themselves with a plentiful supply of good drinking water.

Mr. President, the main question around which the dispute appears to have centered is that of the power possibilities, the development of hydroelectric power. The many engineers and other well informed witnesses who have appeared before our committee have testified that it is not only possible, but practicable and advisable, while securing flood control, to continue the height of the structure of the dam itself to that point where the water will be made available for the production of hydroelectric power and by that means the expenditure for the enterprise may be recovered within a reasonable length of time, estimated at not to exceed 50 years and under some estimates as short a period as 25 years, through the sale of the hydroelectric power which would be produced from a dam 550 feet in height.

The firm or constant horsepower would be 550,000 horsepower or a maximum of at least 1,000,000 horsepower. The estimates for recovery of receipts or return on the investment are necessarily based upon the constant figure of 550,000 horsepower. I shall not at this time attempt to go into any details as to the cost of production, expense of operation and maintenance, or the price at which the power may be sold; but I call attention to the fact that, given the proposed project of the coastal plain cities for construction of their aqueduct line to carry water to the Pacific coast, there will be required promptly at least 200,000 horsepower, which will no doubt be increased to 250,000 and eventually perhaps to almost 400,000 horsepower; so that there we would have a market close at hand for the power to be produced at the dam.

Mr. President, bear in mind that the demands for power, hydroelectric or steam electric, in California and that section of the country increase so rapidly that they double in five or six years. Personally I am of opinion that no matter what developments may come in the lessening of cost of electrical power produced by steam, it will still be found practicable and economical to construct hydroelectric plants and produce power on our western rivers.

In one instance—I think my information was dependable, although it was not given in the form of more than an assertion—were it known to-day that this bill is passed and it becomes known that the Boulder Dam is to be built and that the power is to be produced, applicants who are interested in at least one other site on the Colorado River will promptly, when the way has been opened for release of the present embargo on the power commission, make application for their permits to build a dam at least 380 feet in height on the Colorado River for the purpose and the sole purpose of producing hydroelectric power without any reference whatever to irrigation uses.

Mr. President, I believe I referred to the trip of the majority of the members of the Senate committee which was made to the Imperial Valley in 1925, in early November, at which time the members of the committee visited the site of the proposed dam at Black Canyon. Two or three members of the committee also visited the site further up the river, I believe, at Glen Canyon. Other members were prevented, on account of their engagements, from making the latter trip. But the determination of a proper site for a project of this nature would not come within the direct judgment of the committee. The committee necessarily would have to depend upon the testimony of expert witnesses, of those who are familiar with the possibilities of the lower Colorado River.

Mr. President, the one main feature of disagreement, the one thing which has delayed final consideration of the bill for this purpose, has been the difficulty in securing an understanding and agreement among the States of the lower basin, the three States there, as to a division of the waters of the stream. I do not believe they are very far apart at the present time. I believe they should compose their differences, accept the Colorado River compact, and give us a seven-State agreement, removing the principal obstacle which has stood in the way of

this legislation. Frankly, I have always favored the seven-State compact. In offering at one time a substitute for the present bill, which was presented at the opening of the present session of Congress, one provision which I included in the bill was that unless the seven States came to an agreement within the period of one year, then if six States ratified the compact the bill could become effective.

The committee did not accept that amendment when I proposed it and offered it to the present measure; and I take this occasion to call attention to the fact that an amendment should be made to the present bill, because in changing from a proposed four-State compact to a six-State compact a reference to seven States was omitted, I think through oversight or inadvertence; so I have prepared an amendment that will take care of that feature.

Another item which was considered of importance by the States of Arizona and Nevada—and I think properly so—was the fact that in the event the power plant as well as the dam were constructed by the Federal Government, those States would not be permitted under the law to exact taxation in the manner that they would in the event the structures were erected by private enterprise. Very grave consideration has been given to that feature. It was finally worked out in an amendment which is satisfactory to the States of Nevada and Arizona, as the committee has been led to believe, and which I do not oppose. That amendment provides that in the event of excess revenue over and above the amount required for operation and maintenance, for payment of interest on the Government's advances, and for retirement of the indebtedness within a period of 50 years, 37½ per cent of such excess may be divided equally between the States of Nevada and Arizona. It is believed that in no event would those States derive from that source and by that means anything like the amount they would receive by way of taxation in the event the enterprise were carried forward with private capital.

As to the feasibility of successfully damming the stream at the point recommended by erecting a dam 550 feet in height, this is one of the most important questions with which the committee has had to deal. The evidence showed that the river had been examined by various experts, engineers, and others interested; yet there was a feeling on the part of some of us that a separate, independent examination should be made by a committee of engineers who are not in any manner interested in the enterprise.

With that point in mind, under date of January 18, 1927, one year and three months ago, I presented Senate Joint Resolution 146, to authorize the President to appoint a board of five engineers to make a comprehensive investigation of the lower Colorado River for the purpose of determining and reporting the most economical, efficient, and feasible method of control for the prevention of floods, the use of water for domestic and irrigation purposes, and for the production of hydroelectric power.

In the regular course this joint resolution was referred to the Department of the Interior for its consideration; and a report was received by the chairman of the committee to the effect that in view of the many investigations which had already been made, and which had involved expenditures amounting to one-half million dollars or more, the department believed that it had in its possession all of the information that could be obtained or that might be considered desirable. Naturally, with that adverse report, the committee did not favorably report out my joint resolution, and it was not considered on the floor of the Senate. Now, however, the department is rather inclined to take a little different view as to the advisability of having an independent examination.

Under date of April 21 the Secretary of the Interior, Dr. Hubert Work, wrote me as follows, addressing me as chairman of the Committee on Irrigation and Reclamation:

> MY DEAR SENATOR: I see that in discussion of the so-called Boulder Dam bill in the Senate fear has been expressed that a safe foundation may not be found for such a structure.
>
> In a previous report some years ago on this project I stated that "it would be an engineering experiment." It has, however, since had the approval of some of the ablest engineers and geologists. Borings have been made by the engineers of this department to the depth of 250 feet, cores have been analyzed by the geologists of the department, and their reports agree that a safe foundation can be laid in both the Black and Boulder Canyons.
>
> I have previously stated, in event the project is authorized by Congress, that I would ask five of the ablest engineers in the country to determine faults, if any, in the geology of the area and confirm or disapprove our findings.
>
> I wish, however, that there might be included in the bill pending a mandate to the Secretary of the Interior that a board of five engineers and geologists should examine and approve the adopted site before construction should begin.

Mr. ODDIE. Mr. President——

The PRESIDING OFFICER (Mr. BINGHAM in the chair). Does the Senator from Colorado yield to the Senator from Nevada?

Mr. PHIPPS. I do.

Mr. ODDIE. A statement has recently been made on the floor of the Senate to the effect that a rather recent earthquake has done great damage to one of the walls of the canyon at the Black Canyon site. Is the Senator familiar with anything of the kind?

Mr. PHIPPS. I have had no report of that nature. I have not heard the rumor.

Mr. ODDIE. I will say from my own knowledge, and having talked to many people, including numbers of engineers, who are familiar with the Boulder Canyon Dam site, that no such thing has ever happened, and the statement recently made on the floor of the Senate is in error in that particular.

Mr. PHIPPS. Mr. President, the Senator from Utah [Mr. SMOOT], in his address, attacked the engineering feasibility of the Boulder Canyon project. I desire to call his attention to an amendment proposed by me to the pending bill. It provides that a board of five competent engineers, of outstanding reputation, shall examine into and review all the plans and estimates heretofore made, and take every possible step to be assured as to the financial, economic, and engineering feasibility of the project. Until a favorable report is received from them, no contract shall be made, and no construction work shall be undertaken.

Certainly Senators believe that we must rely upon the best judgment of engineers who carefully investigate such a project. As a matter of fact, the Senator from Utah has made his present argument upon the basis of engineering testimony. If, then, outside engineers of national reputation, after investigation, agree with those in the Government service, his objection to proceeding with the work should be removed. In other words, I believe that the Senator should join with me in this amendment; and I believe that it affords a complete answer to any argument against the possibility of constructing the project from an engineering standpoint.

Mr. President, the amendment to which I refer was printed. However, I have found that it contained one typographical error; and I desire further to perfect it by providing for the payment of the board. Therefore I desire to have the amendment printed in its present form in lieu of the one that was heretofore printed, and have that one disposed of.

The PRESIDING OFFICER. Without objection, it will be so ordered.

Mr. PHIPPS. Mr. President, under date of February 28, 1928, I received a letter from the Secretary of the Interior from which I quote:

> If the entire project—
>
> Referring to the Boulder Canyon Dam—
>
> could be constructed by private enterprise, at private expense, with proper protection to State, interstate, and international rights and interests involved, I should prefer that method. If not, lease of the rights to use the water to the highest bidders would be the simplest and best means of reimbursing the Federal Government for its outlay. If it should prove that no adequate lease could be so secured, I believe that the Government should have authority to erect the power plant and lease the plant itself, and if no adequate contract of this character could be made, then the Government should have authority to generate and sell the power at the generating station to persons willing to purchase it and provide their own transmission and distribution.

I call attention to a statement included in President Coolidge's message to Congress of last December, in which he referred to Boulder Dam:

> Flood control is clearly a national problem, and water supply is a Government problem, but every other possibility should be exhausted before the Federal Government becomes engaged in the power business. The States which are interested ought to reach mutual agreement. This project is in reality their work. If they wish the Federal Government to undertake it, they should not hesitate to make the necessary concessions to each other.

With that point in mind, Mr. President, I have offered and had printed another amendment which states that the hydroelectric plant and incidental structures shall not be constructed by the Secretary of the Interior if a satisfactory contract or contracts can be entered into with a State or States or public subdivisions thereof, or individuals, associations, or corporations, in the order of their priority, for the construction of such plant, and for the fullest economic development of electrical energy.

Mr. President, I am fully aware that the bill contains a clause which provides for construction by private enterprise and gives to the Secretary of the Interior the authority to contract for that purpose; but I believe that language should be included in the first section of the bill, wherein the Secretary is authorized to construct a hydroelectric plant, rather than in a separate section, quite a little farther on in the bill.

Mr. President, when this bill or a similar bill was under consideration in the Sixty-ninth Congress, some reference was made to my personal interest in the hydroelectric power business; and I endeavored to state exactly what that was. I have been interested at any time in only one hydroelectric power company; and that has grown up from a very small concern until it is now one of considerable magnitude, with 8 or 10 different plants; I do not know how many. Mine is not a controlling interest, and I devote no time or attention to the management of the business. That company operates in Nevada and California, the southern part of California, and in the Imperial Valley.

I desired to learn from that company its views with reference to the possibility of acquiring power through this Boulder Canyon Dam project. For that purpose I addressed to the president, Mr. Edwin S. Kassler, a letter under date of January 11:

Mr. EDWIN S. KASSLER,
*President Nevada-California Electric Corporation,*
*Symes Building, Denver, Colo.*

MY DEAR MR. KASSLER: You will recall our conversation, during which I told you that you had been quoted as stating that the corporation would prefer to purchase power at the switchboard in event a dam is constructed across the Colorado River in the neighborhood of Boulder Canyon, rather than to finance a proportionate amount of the expenditure required to install a power house and pay the Government for the right to use the water.

If this is also in accord with the feeling of the board, I would appreciate it very much if you would write me, setting out the above expressions in full, as I think it would go a long way toward removing the existing sentiment that my attitude with reference to the Boulder Canyon Dam bill has been dictated by the interests of the Nevada-California Electric Corporation.

With personal regards,

Yours sincerely, LAWRENCE C. PHIPPS.

To that I received a reply under date of January 16, addressed to me at the Senate Office Building, and reading:

DENVER, COLO., *January 16, 1928.*

Hon. LAWRENCE C. PHIPPS,
*143 Senate Office Building, Washington, D. C.*

MY DEAR SENATOR: Replying to your recent inquiry, in event of the construction of a dam at or near Boulder Canyon by the United States Government, the board of directors of the Nevada-California Electric Corporation would unquestionably prefer to have its subsidiary companies purchase electric power at the switchboard at a fair rate, rather than pay a proportionate cost of financing construction of a hydro power plant at the dam site, together with attendant rental payments for use of water.

The cost of electric power generated by tidewater steam plants has been so far reduced, with possibilities for still further cost reductions, that it is questionable whether electric power can be generated at Boulder Dam and transmitted to coast cities in competition with steam-generated power when transmission losses are taken into consideration.

Very sincerely yours,

E. S. KASSLER, *President.*

In my presentation of those letters to our Committee on Irrigation and Reclamation I made this statement:

In presenting these letters I desire to state that, notwithstanding the position of the Nevada-California Electric Corporation, which would prefer that the Government erect the plant, I am absolutely opposed on principle to the Federal Government going into the business of producing hydroelectric power and selling it at the switchboard.

Mr. President, referring to the interest of the upper-basin States in this project, I call attention to the fact that claims have been set up and statements have been made repeatedly that the natural flow of the Colorado River has already been appropriated, if not, indeed, overappropriated. Within the past two years rumors have come to us in Colorado to the effect that those claiming the right to use water under certain filings made in Colorado would probably be taken into court within a short period of time because their taking of water was interfering with the flow of the stream and preventing priorities in southern California from receiving the full amount of water to which they were entitled.

At the present time the Pittman resolution, so called, is in force, and under its provisions developments on the Colorado River and its tributaries are not permitted; that is to say, the Federal Power Commission is prohibited from issuing permits for use of water on the Colorado River or any of its branches.

At the present time that is the only protection the upper-basin States have against appropriations which would interfere in time with their requirements. It is a well-known fact that the States of the lower basin, particularly California and Arizona, in that order, may develop their lands, and irrigate them, much more rapidly than we in Colorado; or, in fact, citizens of any of the upper-basin States can or may develop theirs. For that reason, and to avoid conflicts in court, the seven-State compact was devised. As I previously stated, I always favored that compact, I think it should be made effective, and I sincerely trust that the States of California and Arizona will soon come to an understanding and settle that question.

It is true that in event Colorado were called upon to defend in the courts what she considers her rights to the waters appropriated, she would probably find herself on a little different footing than in the case of Wyoming against Colorado, where there was no question of riparian rights involved, because neither of those States has recognized that doctrine. But in a case of California against Colorado, I can see where that question might very readily be raised, because California does recognize riparian rights.

The Senator from California referred to the limit of 4,600,000 acre-feet of water written in this bill as the maximum amount which California might use per annum out of the stream. I think in that statement he was disregarding the fact that California would be entitled to at least her one-half of the surplus or additional waters which are known to pass through the stream annually, to the extent, it is estimated, of at least 1,000,000 acre-feet.

I do not care to enter into a discussion as to an equitable division of water between California and Arizona, as that is a matter they could settle between themselves, and the more promptly that question can be disposed of I think the better off they will both be.

The Senator from California, in referring to subdivision (a) of section 5 of the bill, as I took it, expressed the feeling that the purpose of that language was to enable the Secretary to secure contracts which would yield greater revenue, and thereby increase the possible surplus revenue for the benefit of Arizona and Nevada. I do not believe that was the intention of that provision, and I do not think it would operate in that way. The fact is that unless provision is made which will permit of a revision of the base rates for the hydroelectric power at about 10 or 15 year intervals, it would be next to impossible to find any large user of hydroelectric power who would be willing to contract at a fixed price for a 50-year period of time. The term is too long, and that, to my mind, is the only reason for insistence that a provision authorizing the Secretary to revise the rates up or down as to price, depending upon conditions at the time, was considered necessary to the making of a real bill that would be effective.

Mr. President, while I do not believe that the Senator from Utah meant in any manner to reflect upon the ability or the work of the committees of Congress, which have been laboring with this question on the House side, as I have intimated, for at least eight years, and in the Senate at least four years or more, the term "meager consideration" in referring to the study of this measure by the committees in the Senate and in the House does not quite fit in with the facts. During my service in Congress I have not had to give attention to any problem as difficult, as intricate, or as hard to master as this question of the development of the lower Colorado River. I do not see how committees of the House or the Senate could have gone to greater pains to inform themselves, to get the best advice possible, to endeavor to solve this problem of Boulder Canyon Dam, or, in a broader term, the development of the lower Colorado River, and, above all, flood control. Of course, before contracts can be made, the Department of the Interior would have to be satisfied that the receipts would be sufficient to cover the operation and maintenance, the interest requirements, and the amortization of the principal sum itself.

Mr. KING. Mr. President, would it interrupt the Senator if I should ask a question?

Mr. PHIPPS. I yield.

Mr. KING. Does the Senator interpret the bill as assuring the Government the execution of contracts, binding in their character, which will give the Treasury sufficient to compensate for all the sums advanced, plus interest?

Mr. PHIPPS. That is the intention of the bill, and I believe its terms cover that. I have referred to the fact, however, that it might be necessary, in order to secure contracts covering a 50-year period of time, that there should be price adjustments

at stated periods of 10 or 15 years; but in order to cover that, the Secretary would necessarily have to make some leeway or allowance in his calculations. I stated earlier in my remarks that the firm horsepower is only 550,000, but the ultimate will be perhaps double that, at least, estimated at 1,000,000 horsepower.

As the science advances and power is used in larger quantities and for more varied purposes, there will be a demand on the lines for assistance, and so on. To illustrate, a hydro development, in order to assure of its ability to supply, must have stand-by power. The general practice was for each company to have a steam plant which, floating on the line, could almost instantaneously, within a minute, perhaps, take the place of the hydroelectric power in case of an interruption, so as to avoid shut downs of manufacturing plants or the going off of electric-light systems in cities, the stopping of the working of elevators, and so on. But to-day, with a greater demand and a more general use, the power companies have lines with which they connect up, and they have contracts or agreements for interchange of power, so that if one company has an abundance of water, we will say, in its reservoirs, that will run its hydroelectric plants to their full capacity, it can afford to sell to a competing company the surplus over and above what it requires for its regular customers, which will enable the competing company to shut down its steam plant, and they are both advantaged in that way and they can all help each other out in case of accident or the power lines going out. I think there is ample leeway in the possibilities of a hydroelectric plant such as would be erected at Boulder Canyon Dam to enable the department to safely figure upon a return.

It has been argued on the floor that the advance in the science of producing power by steam is such, and will be such, as to put hydroelectric power in the discard. I do not go to that length. I would not be surprised to see further reductions in the cost of producing power by steam. At the present time, perhaps, there are more steam plants than hydroelectric plants being constructed, but I do not expect to see an abandonment of hydroelectric-power development.

I have stated here, from the testimony of one witness, the belief that even on the passage of this bill, when this plant is authorized and the embargo on the use of Colorado River water is removed—that is, granting permits for power—responsible interests will promptly make a request for a permit to erect another large plant, and for the sole purpose of producing hydroelectric power on the Colorado River.

Mr. KING. A plant at the same place, at the Boulder Dam?

Mr. PHIPPS. Oh, no. I am speaking of one within a distance of 150 miles of Boulder Dam. I would not like to designate the plant, for that would hardly be fair, but within the distance of 150 miles—another plant, with a dam 380 or 400 feet high, is proposed to be constructed to produce and sell hydroelectric power.

Mr. KING. I would like to ask the Senator another question, with his permission.

Mr. PHIPPS. Certainly.

Mr. KING. I have tried to ascertain from this bill whether it is the intention to require those who now have privately owned lands in the Imperial Valley, who would be great beneficiaries of this bill, to pay any sum whatever for the water which they receive through the all-American canal. I understand, of course, that if there are publicly owned lands which will be brought under cultivation under the reclamation project, then the terms of the reclamation act will apply to them, and they will pay only such fixed prices as may be determined by the Secretary of the Interior over a period of 40 years, without interest. But the point I am trying to get at is whether the other owners there, who own several hundred thousand acres of land, and who own now a considerable part of the water of the Colorado River as it goes down through the canal, will be required to pay for the water which they get, and for the cost of the construction of the all-American canal.

Mr. PHIPPS. I will say to the Senator that my information is to the effect that the so-called mesa lands of the Imperial Valley, which can not now be reached by gravity flow through the present canal and the adjoining lands in the Coachella Valley, which could be watered by the proposed all-American canal, could not stand the expense of the estimated cost of construction of the all-American canal. The lands now under irrigation in the Imperial Valley would have to be called upon to contribute in order to insure the building of the all-American canal. If they have those lands leased, with an assurance of a constant supply of water, it would help; but more than that they need to be relieved of the enormous cost of taking care of the silt that is annually deposited on their lands by the Colorado River waters. If that silt were evenly distributed over the lands and did not form a crust, the expense of disposing of it would not be so bad; but as it is to-day it clogs up not only their main canal but their laterals as well and the small distributing ditches on the farms, so that there is a large acreage expense at the present time in disposing of the silt. It is becoming an increasing problem to them. Those lands would be largely benefited by the construction of the all-American canal, and I have every reason to believe that they would gladly pay what was found to be a reasonable charge for the protection they would have in their assurance of a regular supply of water and relief from the excessive cost of the silt deposit.

Mr. COPELAND. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from New York?

Mr. PHIPPS. I yield.

Mr. COPELAND. I think the Senator from Arizona [Mr. ASHURST] has said that because of the silt the water is too thick to drink and too thin to farm, which causes the situation to be burdensome. [Laughter.]

Mr. PHIPPS. The Imperial Valley, no matter what one may say, is a garden spot. It is a wonderful piece of territory. It is as productive as any place in the United States. It is capable of further development. In due course of time that land will come in for improvement, not only the mesa lands of the Imperial Valley and those of the Coachella Valley, but further development of the lands now under cultivation.

Mr. KING. Mr. President, will the Senator yield again?

Mr. PHIPPS. I yield.

Mr. KING. I have asked other questions and am asking the question I am about to propound in no controversial spirit, and I shall be glad if the Senator from Colorado or my friend from California, when he comes to address the Senate again, will give his views upon the question. I confess that the bill to me is very uncertain as to the obligation which will be imposed upon those who are beneficiaries through the use of water through the all-American canal. It seems to me as though the plan is to put upon the power development and the revenues to be derived from power which is sold practically the entire burden. I have felt that those who get water through the all-American canal, whether they shall become the owners of new lands, of Government lands, or are the owners of lands which are now irrigated, should pay a reasonable proportion of the cost—indeed, should pay all the cost of the all-American canal—and should make some reasonable contribution, perhaps, toward the maintenance of the entire system; if not, then something toward the construction of the dam, although I will say very frankly I am very much interested in the welfare of the people of the Imperial Valley. I am very anxious that it shall be productive. I shall be very glad to see new lands or raw lands in that valley brought under cultivation. But considering the benefits which will be derived by those who now have irrigated lands, I have felt that they should make a reasonable contribution to the cost of this great enterprise, and I have felt that the bill is too uncertain to be passed in its present form, if it shall be passed, until that question has been entirely clarified and made more precise.

Mr. ROBINSON of Arkansas. Is it not expected that those who secure water rights will pay a fair share of the cost of the works that produce the water and make it available for them?

Mr. KING. I am just complaining about that point. I think the bill before us does not make that certain.

Mr. PHIPPS. My answer to the question or series of questions propounded by the Senator from Utah will, I hope, give a fair understanding of the proposal. To begin with, the Government's interest is in flood control. It is estimated that $15,000,000 to $20,000,000 will be required for that purpose at any point on the river. The Government engineers of the Department of the Interior state that with an expenditure of $41,500,000, their estimate of the cost of a dam 550 feet high, hydraulic power can be produced at prices which will enable it to be sold on the market to yield a profit that will retire the investment within a period of 50 years; in fact, the first estimates were based on about 30 years, as I recall. If the Government builds the dam and leases to power companies the right to use the water, then the power companies would build a power plant at an estimated cost of $35,000,000, to be paid for, of course, by the power companies. They would have to charge a price that would enable them to amortize their investment and have a profit on their investment. The Government would have to have enough revenue from the right to use the water to pay for the dam.

Mr. ROBINSON of Arkansas. Who would determine how the water should be used for irrigation purposes and what charges should be made for it?

Mr. PHIPPS. I will come to that point too. The purposes of the bill, in the order of priority are flood control, the use of

the water for domestic purposes and purposes of irrigation, and for power. The irrigation feature is placed, and we believe properly, under the conditions of the reclamation law which provides for repayment, but without interest.

Mr. ROBINSON of Arkansas. Is it proposed to determine the portion of the investment properly assessable to irrigation, and how will that be decided?

Mr. PHIPPS. The entire cost of the all-American canal will be charged to the reclamation project if the canal is built.

Mr. ROBINSON of Arkansas. Will any part of the cost of the dam be charged to reclamation?

Mr. PHIPPS. It is not so assessed under this bill.

Mr. ROBINSON of Arkansas. It is not?

Mr. PHIPPS. No; it is not. I will say that that is exceptional. The committee gave it very careful consideration. It was felt that the very heavy cost of the all-American canal was such that it would be as large a burden as the lands to be served by it could well stand. Under the reclamation law, of course, any expenditure that is contemplated, authorized, or contracted for by the Department of the Interior, having charge of reclamation enterprises, must be of such a nature as to assure the department of the return of such expenditure. It is possible that in an enterprise of this magnitude, on account of the limited amount of money that comes annually into the reclamation fund, a direct advance would have to be made out of the Treasury of the United States rather than out of the reclamation fund. But that is a question with which I do not believe the Congress would have to deal immediately, because I think it will take some little time to work out the plan, although large amounts of money have been expended in the making of the surveys and estimates as to the cost at the present date. They would have to be checked and perhaps further engineering work would be required before dependable estimates would be available. I hope I have answered fully with reference to the reclamation law.

Mr. President, I do not care to say much further about the measure. At the proper time, when we reach the pojnt where amendments are to be considered, I shall submit some further remarks. I think I have covered about all I desire to say to-day. I feel that at the earliest possible moment the amendments should be taken up for consideration and disposed of. As far as I am concerned, I do not see any objection to considering first the two particular amendments that were referred to by the Senator from Nevada [Mr. PITTMAN]. I mention these because I do not see him on the floor at the moment.

The PRESIDING OFFICER. Is it the desire of the Senator from Colorado to have the amendments considered at this time?

Mr. PHIPPS. No; I am not asking for that to-day. I leave that to the Senator from California [Mr. JOHNSON], who is the author of the bill and was authorized by the committee to report it to the Senate.

### FERTILIZER PRICES

Mr. McKELLAR. Mr. President, several days ago I called the attention of the Senate to a very peculiar condition existing in my State and in the State of Alabama in reference to prices charged for fertilizer. In Lincoln County, in the southern part of my State, it was found that the fertilizer association charged from $3 to $5 a ton more for fertilizer than they charged right across the line in Alabama. Complaints were made to me by citizens of Tennessee, and I at once took it up with various departments. I first took it up with the Attorney General by letter of March 27. In the meantime I took it up with the fertilizer associations themselves. The fertilizer associations sent an explanation virtually admitting that they were charging higher prices in Tennessee than in Alabama, but claiming a number of reasons in justification therefor, only one of which was a good reason, and that was that there was a tax of 20 cents per ton on fertilizer in Tennessee greater than in Alabama, and to that extent their reasons were good. Otherwise their reasons were without merit, in my judgment.

The other suggestions that the Alabama customers bought a few more cars than the Tennessee customers; that the Tennessee customers demanded better drilling conditions than those in Alabama; that the freight charges were greater; and that there was a difference in the cost of bags—all these reasons were trivial and without merit, in my judgment. As a matter of fact, much of this fertilizer comes through Mobile and New Orleans, and the freight rates should be no more in southern Tennessee than they are in northern Alabama, and, as a matter of fact, the letter hereto attached from the Interstate Commerce Commission shows the contentions of the fertilizer people as to freight to be without merit.

But the remarkable thing to which I wish to call attention is the fact that while I received a letter from the fertilizer people on April 13 setting out their reasons for the larger charge, I received on April 27 virtually the same letter from the Attorney General of the United States, or his assistant, Mr. Donovan, not verbatim, but substantially so. In other words, it is perfectly clear from the correspondence that when I took up the matter with the Attorney General he proceeded to take it up with the fertilizer association, and in his letter to me simply repeated the reasons or alleged reasons given by the fertilizer people themselves. I am frank to say that this is quite astonishing, and I call the attention of Senators to the two letters, and I ask them to read them in to-morrow's RECORD.

I will give the reasons as set forth in both and ask that the correspondence be placed in the RECORD. I especially want the two letters, one from the Attorney General of date April 27, 1928, and the other from Mr. Brand, representing the fertilizer companies, of date April 13, 1928, to be printed one right after the other in the RECORD so that it may be seen how closely they tally. I can not believe that either Mr. Donovan or Attorney General Sargent, for both of whom I have a very high opinion, looked into the matter himself. Surely they would not have simply repeated and reiterated the excuses given by the fertilizer people. The fertilizer people themselves admit they are charging more for fertilizer in Tennessee than in Alabama, and apparently, if we are to judge by his letter, the Attorney General takes the same attitude about it.

Mr. President, I have also applied to the Federal Trade Commission to have the matter examined into, and I have a letter from that commission saying they will begin an examination at an early date. If they do not, then I want the Senate to appoint a committee to examine into the matter. It is a most important matter. It is a tremendous tax upon the farmers of my State unless it is corrected. I am determined it shall be corrected if it is possible to correct it.

I also took up the matter with the Interstate Commerce Commission, it being claimed that freight rates had something to do with the situation. I have a letter from the chairman of the Interstate Commerce Commission in which he says that the freight rates are substantially the same all over the South and that no differential can be substantiated on the question of freight rates. I am sure that that is so.

I ask unanimous consent that these letters be printed in the RECORD, and I call the attention of Senators to them in the hope that they will be read to-morrow. I hope that the Attorney General's office will not undertake simply to make inquiries only of the very people whom we are to investigate. It seems to me the investigation ought to be made from independent sources, and I hope that will be done. I hope that all that may be necessary to be done is for me to make this public statement about it. There is no reason on earth why the Fertilizer Trust should sell fertilizer in Tennessee at a higher price than it is sold in other States immediately adjoining, and I do not intend, if I am able to prevent it, to permit it to be done.

Mr. President, in our part of the country the question of fertilizers is tremendously important. Many of our lands are well worn and have to be built up. Commercial fertilizers have long been used and must be continued in ever-increasing quantities. The farmers' fertilizer bill is a large bill. It constitutes a large tax and a severe drain on him. The idea that the fertilizer companies can get together and arbitrarily fix the price of fertilizers can not be tolerated at all.

I quote from the Assistant Attorney General's letter as follows:

> It would, of course, be impossible to obtain exact information on these points without a very detailed and lengthy investigation. No trace of a price agreement has been discovered which would justify such an investigation.

It is incomprehensible to me, Mr. President, that such a statement should be made by the Assistant Attorney General. The very fact that on the south side of the State line fertilizers are being sold at prices from three to five dollars a ton more than that used in the same field on the other side of that State line is the most cogent proof that somebody is fixing prices in that locality.

The very letter of the Assistant Attorney General, and the very last paragraph of his letter, shows that these fertilizer companies have been fixing prices in the other parts of the country, because General Donovan says:

> You will recollect that in December, 1926, the Government filed a criminal information in the district court in Baltimore against 39 of the leading fertilizer manufacturers of the United States, charging them with price fixing, which resulted in a collection of approximately $100,000 in fines.

It is inconceivable with a record like this and under the facts as presented to the Attorney General that his office could reach the conclusion that—

> no trace of a price agreement has been discovered.

Mr. President, I hope the Attorney General's office will busy themselves and see to it that the law against price fixing is complied with.

The PRESIDING OFFICER. Without objection, the correspondence referred to will be printed in the RECORD.

The correspondence is as follows:

MARCH 27, 1928.

Hon. JOHN G. SARGENT,
*Attorney General, Washington, D. C.*

MY DEAR MR. ATTORNEY GENERAL: Inclosed I hand you a letter and a copy of a telegram from Mr. William M. Smith to me and a copy of my reply, and a further letter from Mr. Smith in reference to the price of fertilizer.

I will greatly appreciate it if you will have the matter examined into and advise me.

There is no earthly reason why fertilizer should be sold cheaper in Alabama than in Tennessee, unless by an agreement of some sort.

Very sincerely yours,

KENNETH MCKELLAR.

---

APRIL 10, 1928.

Mr. C. J. BRAND,
*616 Investment Building, Washington, D. C.*

MY DEAR MR. BRAND: Your letter of the 9th received and will have careful consideration.

Not having a direct connection with this, but applying to the fertilizer situation in general, I wish to say that I have advices from Fayetteville, Tenn., to the effect that the fertilizer company will sell fertilizer across the line in Alabama from $3 to $5 a ton cheaper than they will sell in my State.

My authority for the statement is Mr. William M. Smith, of Fayetteville, Tenn. I have been asking information in reference to this matter ever since Mr. Smith first wrote me about it, but have been unable to ascertain anything further except that there is greater competition in Alabama than in Tennessee.

Will you kindly have the matter examined into and advise me?

Very sincerely yours,

KENNETH MCKELLAR.

---

DEPARTMENT OF JUSTICE,
OFFICE OF THE ASSISTANT TO THE ATTORNEY GENERAL,
*Washington, April 27, 1928.*

Hon. KENNETH MCKELLAR,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: With further reference to your letter of March 27, addressed to the Attorney General and inclosing a telegram from William M. Smith, Fayetteville, Tenn., complaining that commercial fertilizer is some three to five dollars per ton cheaper across the line in Alabama than in Lincoln and other border counties in Tennessee.

The department has given careful consideration to this complaint, and the following facts have been obtained:

1. There is a difference in prices on fertilizer sold in Alabama and in Tennessee, and information obtained shows an average difference on four leading grades of fertilizer of $1.73 per ton, the largest difference being $2.25 per ton on 12–4–4 grade.

2. The State tonnage tax is 20 cents per ton higher in Tennessee than in Alabama.

3. Tennessee dealers buy from 1 to 5 cars per season, while Alabama dealers buy from 5 to 20 cars. The higher sales cost appears to be about 55 cents per ton.

4. Tennessee customers demand better drilling conditions than those in Alabama, which involves double milling and screening and longer curing, with a resulting extra cost of preparation of 50 cents per ton.

5. Freight charges to Tennessee average 30 cents per ton more than freight charges to Alabama.

6. The Tennessee law requires that all fertilizer shall be shipped in 125-pound bags, while in Alabama a 200-pound bag is most commonly used. This means six additional bags per ton for goods going into Tennessee, with a resulting addition of at least 50 cents per ton to the cost.

The foregoing additional costs total $2.05 per ton. This figure is approximate, but I believe that it is very close to the actual difference in cost. The foregoing figures are based upon cash prices to dealers on fertilizer sold by the various manufacturers. It would seem that a three to five dollar per ton difference reported to you must be a retail price difference. There is nothing in the telegram sent to you to indicate whether the differences were on cash sales or on time sales. Also part of the difference may be due to varying commissions charged by different dealers.

It would, of course, be impossible to obtain exact information on these points without a very detailed and lengthy investigation. No trace of a price agreement has been discovered which would justify such an investigation.

You will recollect that in December, 1926, the Government filed a criminal information in the district court in Baltimore against 39 of the leading fertilizer manufacturers of the United States, charging them with price fixing, which resulted in a collection of approximately $100,000 in fines. Since that time a few complaints of price fixing have been received, all of which have been carefully investigated by this department; but no price agreement has been found since that date.

Very truly yours,

WILLIAM J. DONOVAN,
*The Assistant to the Attorney General.*

---

WASHINGTON, D. C., *April 13, 1928.*

Hon. KENNETH MCKELLAR,
*United States Senate, Washington, D. C.*

DEAR SENATOR MCKELLAR: I have received your letter of the 10th and am glad to know that you will give careful consideration to my letter of the 9th.

In regard to the apparent price disparity in northern Alabama and the adjoining counties in Tennessee, it happens that I have just received information bearing on this situation from a number of companies that sell in that territory. It is therefore comparatively easy to answer the question raised by Mr. William M. Smith. In answering this question I am giving you summarized information which I have obtained within the past few days from at least five different companies.

One company reports an average difference on four leading grades of $1.73 per ton, the largest difference being $2.35 per ton on a 12–4–4 grade. Another company reports an average difference of $1.33 per ton, the largest difference on a specific grade being $1.76. Another large company reports an average spread of $1.40 per ton, another $1.75, and still another $1.35.

These differences exist for a number of reasons.

1. The State tonnage tax is 20 cents per ton higher in Tennessee than in Alabama.

2. Tennessee customers (dealers) buy from 1 to 5 cars per season, while Alabama customers buy from 5 to 20 cars. This higher sales cost is estimated by one company at 55 cents per ton.

3. Tennessee customers demand better drilling condition than is demanded in Alabama. This involves double milling and screening and longer curing, making an extra preparation cost of 50 cents per ton.

4. The additional freight cost averages about 30 cents per ton.

5. The Tennessee law requires that all fertilizer be shipped in 125-pound bags, while in Alabama a 200-pound bag is most commonly used. This means six additional bags per ton for goods going into Tennessee. This adds at least 50 cents to the cost.

These added costs would total $2.05, and although this figure should be considered more or less approximate it must be very close to the actual difference in cost, since one of the larger companies estimates this difference at an average of $1.82 per ton. Although the others have not estimated the total difference in cost, they agree pretty well on the above-enumerated items.

It therefore seems to me that there is ample justification for the slightly higher prices that are being charged in southern Tennessee as compared to northern Alabama. The larger difference—namely, $3 to $5 per ton reported to you by Mr. Smith—is, of course, a retail price difference, and the figures I have given you are all based on cash prices to dealers. It is, of course, entirely possible that such differences may be found to exist in adjoining counties in the two States, due to the varying commissions charged by dealers. This might easily be true of time prices quoted by different dealers, or it might even be that the cash prices of one dealer are being compared with the time prices of another. At any rate, I am convinced that in so far as fertilizer manufacturers are concerned there are no price differences between the two territories that can not be amply justified by the difference in actual costs of manufacturing and selling.

Very truly yours,

CHARLES J. BRAND,
*Executive Secretary and Treasurer.*

---

APRIL 6, 1928.

INTERSTATE COMMERCE COMMISSION,
*Washington, D. C.*

DEAR SIRS: Inclosed please find another letter from Mr. W. M. Smith, of Fayetteville, Tenn.

I can not conceive that such a situation as he describes exists. He says that he received a letter from the fertilizer people saying that they were willing to bill fertilizer to him at an Alabama destination and then he could have it stopped in Tennessee. Is it possible that the Interstate Commerce Commission permits a lesser rate for Alabama than Tennessee, and if so, under what possible construction of the law can this be done? Your early attention to the matter will be greatly appreciated.

* * * * * * *

Very sincerely yours,

KENNETH MCKELLAR.

INTERSTATE COMMERCE COMMISSION,
*Washington, April 9, 1928.*

Hon. KENNETH MCKELLAR,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: Your communication of April 6 to the secretary of the commission respecting the complaint of Mr. William Smith, of Fayetteville, Tenn., and submitting copy of letter written him by Mr. Hendley, of the Tennessee commission, has been referred to me for reply.

I assume that Mr. Smith is complaining of the intrastate-rate adjustment in Alabama as it has existed on fertilizer and fertilizer materials as compared with the interstate-rate adjustment on this traffic. In this connection I may say that on July 1, 1927, a general line of rates on fertilizer and fertilizer materials became effective in the South in compliance with an order of this commission and that contemporaneously we required the Alabama commission to adjust its intrastate rates in conformity with the interstate level under the authority of sections 3 and 13 of the interstate commerce act. The Alabama commission thereupon sought an injunction in the Federal courts against our order. This was denied, but an appeal has since been taken to the Supreme Court of the United States. It is understood, however, that on or about March 1, 1928, the rates in Alabama were adjusted in compliance with our order. You will note, therefore, that the inequality about which Mr. Smith complains was brought about by the action of the Alabama State commission and not by any action of ours. As indicated, however, I understand that this inequality no longer exists.

Very truly yours,

JOSEPH B. EASTMAN, *Commissioner.*

---

APRIL 28, 1928.

FEDERAL TRADE COMMISSION,
*Washington, D. C.*

DEAR SIRS: Inclosed I hand you an excerpt from the record that explains itself.

I want you to make an investigation as to why the fertilizer people are selling fertilizer cheaper in Alabama than they are in Tennessee. That they are doing it there can be no question, and I have an idea they are fixing the prices themselves.

Please let me know at your earliest convenience when it can be taken up.

Very sincerely yours,

KENNETH MCKELLAR.

---

FEDERAL TRADE COMMISSION,
OFFICE OF THE SECRETARY,
*Washington, May 1, 1928.*

Hon. KENNETH MCKELLAR,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: Your letter of April 29, with inclosures relating to the fertilizer situation, has been received and laid before the commission, and the commission has referred the matter to its chief law examiner for a preliminary inquiry and report.

Upon the coming in of the chief examiner's report you will be advised further.

Very truly yours,

FEDERAL TRADE COMMISSION,
OTIS B. JOHNSON, *Secretary.*

---

DEPARTMENT OF AGRICULTURE,
STATE OF TENNESSEE,
*Nashville, April 25, 1928.*

Hon. KENNETH MCKELLAR,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR: Your kind letter of the 21st with attached copy of letter from Mr. Charles J. Brand, executive secretary-treasurer of the National Fertilizer Association, was duly received. The letter of Mr. Brand has been read with interest.

Referring to his statement of the difference in prices for the same goods in Alabama and Tennessee, I wish to state that I have before me a statement from a large farmer who resides in Lincoln County, Tenn. This statement is in the form of an affidavit. The gentleman states that he owns a farm of 650 acres in Lincoln County, Tenn., and another farm in Madison and Limestone Counties, Ala., containing about 1,200 acres. He states that during the spring of 1928 he purchased two cars of commercial fertilizer, one car consisting entirely of the analysis 15–4.11–5; that is, 15 per cent available phosphoric acid, 4.11 per cent nitrogen, and 5 per cent potash. The other car contained a considerable amount of the same brand and same analysis. One of these cars to be delivered in Tennessee, the other in Alabama. He found, however, on getting prices, that the delivered price in Alabama on this grade of goods was $42.75 per ton, and the delivered price for the same grade in Tennessee was $47.80 per ton, and that both prices were given the same discount for cash. He, therefore, made the purchase of both cars to be delivered to Harvest, Ala., and stopped one car at Fayetteville, thus getting advantage of the Alabama price and effecting a saving of $5.05 per ton on the goods.

This is one of a number of instances which have been brought to our attention of cars diverted from Alabama points to Tennessee points on account of the substantial saving in prices, due to the difference between Alabama prices and Tennessee prices on the same grades.

I note that Mr. Brand gives five reasons for the difference in prices in Alabama and Tennessee. I will take up these reasons and comment on them serially:

1. We admit the difference in the State tonnage tax in Tennessee and Alabama, which he claims.

2. Mr. Brand is mistaken in his statement that Tennessee dealers confine their purchases from one to five cars per season. Under the Tennessee commercial fertilizer law, copy of which I am sending you under separate cover, the manufacturer is required in section 15 to notify the commissioner of agriculture of all shipments of commercial fertilizer to points in Tennessee, such notifications to show the grade and amount of the fertilizer, and the name and address of the consignee. I have taken one county from each division in the State. Up to the present time, which is about the middle of the spring shipment season, one dealer in Greene County, east Tennessee, has received 34 cars; another 11 cars; another 10 cars; another 8 cars. One dealer in Robertson County, middle Tennessee, has received 30 cars; another 25 cars; another 23 cars; another 11 cars; another 10 cars; and two others 9 cars each; and one 8 cars. One dealer in Gibson County, west Tennessee, has received 23 cars; another 13 cars; another 9 cars; and five others 8 cars each.

Bear in mind that the shipping season continues to the last of May and sometimes until the middle of June. These shipments are of record in this office, and consist of cars carrying from 20 to 40 tons each.

3. Answering Mr. Brand's statement that Tennessee customers demand better drilling condition of the goods than is demanded in Alabama.

The superintendent of the division of foods, fertilizers, and dairies, which division is charged with the administration of the fertilizer law, and one of the inspectors working out of that division, have examined a number of the Alabama cars diverted to points in Tennessee and have taken samples of a number of the brands contained in these cars. They state that their examinations showed that the mechanical condition of the fertilizer in the cars billed to Alabama and diverted to points in Tennessee was just as good as that of the fertilizers being billed to points in Tennessee.

4. I can not quite understand how the freight cost to points in Tennessee from Nashville and other shipping points in the State would average about 30 cents per ton more than the freight to points in Alabama. I am reliably informed that the freight on commercial fertilizers from Nashville to Huntsville, Ala., is $2.55 per net ton. The freight from Nashville to Springfield is $1.35 per net ton (Springfield, Tenn.).

5. Mr. Brand states that the Tennessee law requires that all fertilizer be shipped in 125-pound bags. The Tennessee law does not specify the size package in which commercial fertilizer shall be sold. The act, however, confers upon the commissioner of agriculture the power to make such rules and regulations as may be necessary for the proper enforcement of the law. By referring to regulation 2 on page 14 of copy of bulletin being mailed you you will see that shipments of commercial fertilizers may be made into Tennessee in bags or packages of 100, 125, or 200 pounds net weight.

I notice Mr. Brand states in the concluding paragraph of his letter that the difference reported to you by Mr. Smith in the letter referred to in Mr. Brand's communication, is the retail price difference. In this Mr. Brand is mistaken, as you will note by referring to the inclosed price list of one of the large concerns, which gives you the price list for the spring season 1928 to dealers in Alabama and dealers in Tennessee. You will note that this price list is based on 100 and 200 pound bags in Alabama, and on 125-pound bags in Tennessee. But by turning over to the back of the list for Tennessee, the statement is made that the prices quoted are for goods in 125-pound bags and that when other sizes are desired add 50 cents per ton for 100-pound bags, and deduct 50 cents per ton for 200-pound bags. We have a number of price lists which have been secured from dealers. The price lists which we have are all prices made by the manufacturer to the dealer, as shown on the inclosed list.

An interesting fact in this connection is that the prices made by the different manufacturers on similar analyses are exactly the same. This covers perhaps, all told, 25 or 30 different analyses. It is inconceivable that this could have happened without an understanding between the fertilizer companies. Therefore, it seems to me a plain case of price fixing, possibly under a gentleman's agreement. Then the question arises as to whether this is a violation of the Federal and Tennessee antitrust laws.

May I assure you that I appreciate the interest you are manifesting in this matter. I believe you are rendering the farmers of Tennessee a valuable service, and I sincerely hope that we may get favorable results from our efforts to correct this apparent injustice to the farmers of our State.

Very sincerely yours,

HOMER HANCOCK, *Commissioner.*

FAYETTEVILLE, TENN., *April 25, 1928.*

Senator MCKELLAR, *Washington, D. C.:*

Your letter and CONGRESSIONAL RECORD received and carefully noted. The statement made by Mr. Charles J. Brand has not, as I understand the situation, given any light on the matter. Take statement No. 5, for instance. He states that the size of bags makes a difference.

| | |
|---|---|
| Tennessee prices on 12–4–4 in 100-pound bags are | $39.65 |
| Alabama prices on 12–4–4 in 100-pound bags are | 36.65 |
| A difference of | 3.00 |
| Tennessee prices on 15–5–5 in 100-pound bags are | 48.30 |
| Alabama prices on 15–5–5 in 100-pound bags are | 42.75 |
| A difference of | 5.55 |

These are bona fide prices given me by agent of the company. All these prices are subject to 10 per cent discount, bill of lading with goods.

Please do not let this matter drop now that you have gotten it started for Mr. Brand's explanation will not hold in the face of the facts in the case. Again thanking you for the help you have been to the cotton farmers of this section, and assuring you of their appreciation, beg to remain,

Respectfully yours,

WM. M. SMITH.

FAYETTEVILLE, TENN., *April 28, 1928.*

DEAR SENATOR: Your letter to hand and am glad to state that the greater part of the fertilizer was shipped to Alabama points and diverted to points in Lincoln County by paying a switching charge and paying the State 50 cents a ton for bags. In fact, Mr. Jesse Lowery, who handled nine cars, said he got all of his at Alabama prices. Mr. Charles J. Brand's statement in the CONGRESSIONAL RECORD is misleading in most of its contents. The writer bought a car for his own use and had paid Tennessee prices before he knew that the fertilizer companies were making the difference they were, as on last year we got it the same as north Alabama, and I do hope that when this is all thrashed out that Tennessee farmers will not be compelled to ship to Alabama and divert to Tennessee. If I can serve you, please command me.

Yours truly,

WM. M. SMITH.

### CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The absence of a quorum is suggested. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Edge | La Follette | Sheppard |
| Barkley | Edwards | Locher | Shipstead |
| Bayard | Fess | McKellar | Shortridge |
| Bingham | Fletcher | McMaster | Simmons |
| Black | Frazier | McNary | Steck |
| Blaine | George | Mayfield | Steiwer |
| Blease | Gerry | Metcalf | Stephens |
| Borah | Gillett | Moses | Swanson |

The VICE PRESIDENT. Eighty-one Senators having answered to their names, a quorum is present.

### RECEPTION OF GERMAN AND IRISH AVIATORS

Mr. CURTIS. Mr. President, I understand that the trans-Atlantic aviators are here. In pursuance of the unanimous-consent agreement, I ask that the Senate take a recess for 10 minutes, in order that they may be received.

The VICE PRESIDENT. Without objection, that order will be made.

The Senate being in recess, the German aviators, Capt. Hermann Koehl, of the German Army, and Baron Günther von Huenefeld, and the Irish aviator, Maj. James FitzMaurice, chief of the Irish Free State air force, were escorted into the Chamber by Vice President DAWES, Mr. CURTIS, the majority leader, and Mr. ROBINSON of Arkansas, the minority leader, amid great applause from the floor and the galleries.

The VICE PRESIDENT personally presented the Members of the Senate and guests to the distinguished visitors, after which they retired from the Chamber amid great applause; and the recess having expired, the Vice President resumed the chair.

### BOULDER DAM

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 728) to provide for the construction of works, for the protection and development of the lower Colorado River Basin, for the approval of the Colorado River compact, and for other purposes.

Mr. HAYDEN. Mr. President, the State of Arizona has three primary or fundamental objections to Senate bill 728 as introduced by the senior Senator from California [Mr. JOHNSON].

The first objection is that the bill seeks to use the power of the Federal Government to coerce a sovereign State to its injury, and to the benefit of another State.

The second objection is that the bill contemplates an unjust division of the water of the lower Colorado River Basin, to the permanent detriment of the State of Arizona, and to the great advantage of the State of California and the Republic of Mexico.

The third objection is that the bill as introduced makes no provision for compensation to the States of Arizona and Nevada for the use of their natural resources, their lands, and their waters, for the generation of hydroelectric power.

The committee amendments suggested by the Senator from Nevada [Mr. PITTMAN] have the great merit of recognizing a principle which we of those two States believe to be fundamental. Later in my remarks I shall discuss the Pittman amendments.

Before we proceed to discuss these three fundamental objections to the bill, before we attack the larger trees in the forest, there is some underbrush which should be removed.

There are some amendments to this bill that I intend to propose which I believe the Senators from California [Mr. JOHNSON and Mr. SHORTRIDGE] will, upon reflection, be willing to accept. I shall address myself this evening principally to amendments of that character.

The first amendment that I intend to suggest relates to the rights of the Yuma reclamation project. My colleague the senior Senator from Arizona [Mr. ASHURST] discussed the matter in his minority report; but the senior Senator from California [Mr. JOHNSON], in his remarks the other day, did not see fit to discuss the issue thus raised. I shall read very briefly, from what my colleague had to say on the subject, in order that the Senate may understand just what is involved in the Yuma controversy.

Senator ASHURST said:

### RIGHTS OF YUMA PROJECT

Any analysis of this legislation would be incomplete that failed to recognize the avidity with which its authors have availed themselves of every opportunity for advantage. The bill is inconsistent and contradictory; it is vague and indefinite where it should be clear and certain, and is harsh and unyielding where it should be flexible. But no point has been overlooked where advantage might be reaped, at whatsoever cost, to others for the interests it is designed to enrich.

A striking illustration of this may be found in section 10, supplemented, extended, and enlarged by the provisions of section 7.

Section 10 empowers the Secretary of the Interior with the consent of Imperial irrigation district, to modify the existing contract, dated October 23, 1918, authorizing the use of Laguna Dam for the diversion of water for the irrigation of Imperial Valley. That may appear reasonable enough to the casual observer, since the Secretary of the Interior and Imperial irrigation district are the parties of record to the contract in question. It should be understood, however, that the contract, in all of its details, relates to property rights and interests vital to the welfare and existence of Yuma project.

The Secretary of the Interior is a party to the contract merely in his capacity as an officer of the United States, in which the title to the Yuma project temporarily vests. The contract was the result of long negotiations, in which the negotiating parties were representatives of Imperial irrigation district on one hand and Yuma project on the other.

The protection to Yuma project, as embodied in the completed agreement, was the result of hard labor and determined effort over the attempts on the part of the California representatives seeking, as they now seek, every advantage for themselves. To disturb the status quo of this contract and agreement without the consent of the organization conducting the affairs of the landowners and water users of Yuma project, which originally confirmed its provisions, would constitute a violent outrage of the rights of those water users.

The water users of the Yuma project have taken notice of these provisions in the bill. I have here in my hand numerously signed and identical petitions addressed to the Congress of the United States, one of which I shall read. The petition states:

*To the Congress of the United States:*

Your petitioners, the board of governors of the Yuma County Water Users Association, with headquarters at Yuma, Ariz., and the undersigned individual water-right holders and farmers of the Yuma project (Arizona-California) respectfully represent:

That under date of October 23, 1918, a contract was entered into by the Secretary of the Interior and Imperial irrigation district, of Imperial County, Calif., whereby the said district secured the right to use Laguna Dam, in the Colorado River near Yuma, Ariz., and to divert water therefrom for the irrigation of the lands of said district, and to use the main canal of the said Yuma project for the conveying of water to a point known as Siphon Drop, where a proposed canal for the irrigation of the land of said district will digress from the said main canal of the Yuma project.

That the Secretary of the Interior, acting as a party to the aforesaid contract, did so in his official capacity as an agent of the United States and as trustee for the Yuma project; that Laguna Dam and the main canal therefrom to the point known as Siphon Drop were constructed by the United States, under contract with the Yuma County Water Users Association, as integral and essential parts of the Yuma project; that the lands of the Yuma project were and are obligated for the construction of said works; that the maintenance of the integrity of these works, as parts of the Yuma project, is essential to the independence and successful management of the said project and the preservation of the rights of the water users thereunder; that in the negotiations leading up to the contract aforesaid the rights and interests of the water users under the Yuma project were fully recognized, and the Yuma County Water Users Association was a party thereto by its accredited representatives; that the said contract was not entered into nor authorized by the Secretary of the Interior until it had the approval of the said governing board of the water users under the Yuma project, and that the said contract, when so approved, authorized, and entered into, contained provisions deemed by the said governing board to be ample for the protection of the rights and interests of the said water users under the Yuma project, and particularly with respect to the title to said Laguna Dam and the main canal of the project down to the point known as Siphon Drop; to the water rights of the said project and to the development of power necessary for the full development of the land embraced therein; that it was at no time the purpose of the negotiations nor the purpose of the said contract to alienate the title nor any interest in the title to the Laguna Dam and the said main canal from the water users of the Yuma project, nor to convey the title to said works to Imperial irrigation district.

That to alienate the said title to these essential works of the Yuma project, or to impair the rights of the water users of the Yuma project which are theirs under the reclamation law, under the contract between the United States and the Yuma County Water Users Association for the construction of Yuma project, and under the aforesaid contract of October 23, 1918, would be illegal and confiscatory and do violence not only to fundamental principles of law but as well to vital considerations of justice, equity, and morals.

That the bill now pending in Congress and known as S. 728 would, if enacted into law, work this very injustice, commit this very outrage. Under the provisions of section 10 it would authorize the Secretary of the Interior, with the consent of Imperial irrigation district, and without the consent of the Yuma County Water Users Association, to modify the said contract of October 23, 1918, and to surrender the protection which under the terms of the said contract is afforded to the water users of the Yuma project. Under the provisions of section 7, and in direct contravention of the terms of the said contract, it would authorize the Secretary of the Interior to convey the title to the main canal and appurtenant structures authorized by the bill to the districts having a beneficial interest therein in proportion to their respective capital investment, the effect of which would be to turn the main canal of the Yuma project, down to the point known as Siphon Drop, over to Imperial irrigation district. Under later provisions of the same section, and likewise in utter violation of the contract of October 23, 1918, it would give to Imperial irrigation district the right to utilize power possibilities of great value reserved to and necessary for the full development of the Yuma project.

For the reasons above set forth, your petitioners most earnestly pray and hope that the Congress do not pass the said bill, S. 728, containing, as it does, provisions violative of the reclamation law, in impairment of vested rights, and destructive of a contract vital to the protection of the water users under a Federal reclamation project.

Authorized and adopted by unanimous vote of the board of governors of the Yuma County Water Users' Association, held at Yuma, Ariz., April 2, 1928.

YUMA COUNTY WATER USERS' ASSOCIATION,
By J. P. COREY, *President.*

Attest:
[SEAL.] J. C. POWER, *Secretary.*

This petition was circulated among the farmers of the Yuma Valley, who are landowners and water users under the United States reclamation project. I have a number of copies of it here, each accompanied by a certificate similar to one which I shall now read:

YUMA, ARIZ., *April 29, 1928.*

*To whom it may concern:*

This is to certify that I, O. M. Clark, member of the board of governors of Yuma County Water Users Association, spent part of two days in circulating the accompanying petition of protest against certain sections of the Swing-Johnson bill, and of the 98 persons asked to sign same, only two refused; making a 98 per cent majority.

Respectfully yours,

O. M. CLARK.

I have a number of other certificates of a similar character, which I ask unanimous consent to have printed in the RECORD along with the document itself.

The PRESIDING OFFICER (Mr. ODDIE in the chair). Is there objection?

There being no objection, the papers were ordered to be printed in the RECORD, as follows:

YUMA, ARIZ., *April 27, 1928.*

*To whom it may concern:*

Mr. J. A. Gifford, member of the board of governors from fourth district, had this petition only after the ground had been covered by Mr. Moss and Mr. Clark. I talked with him over the phone just prior to going to his place for the petition, and he stated that no one had refused to sign same. He was not at home when I came for his petition, hence the absence of his certification as to this petition being 100 per cent against the Swing-Johnson bill.

[SEAL.] J. C. POWER,
*Secretary Yuma County Water Users' Association.*

---

YUMA, ARIZ., *April 21, 1928.*

*To whom it may concern:*

This is to certify that I, J. C. Barter, member of the board of governors of Yuma County Water Users' Association, spent two days in circulating the accompanying petition of protest against certain sections of the Swing-Johnson bill, and of the 73 bona fide landowners asked to sign same only 2 persons refused. Making a 97 per cent majority against the above-named sections, as is contained in the body of the petition of protest.

Respectfully yours,

J. C. BARTER,
*Member of Board of Governors.*

---

YUMA, ARIZ., *April 26, 1928.*

*To whom it may concern:*

This is to certify that I, George Stinnett, member of the board of governors of Yuma County Water Users' Association, carried this petition to secure signatures upon a certain protest which is being made against certain provisions contained in the Swing-Johnson bill. Of the 21 water users and landowners to whom I presented this petition none refused to sign same.

G. A. STINNETT,
*Member of the Board of Governors, Fifth District.*

---

YUMA, ARIZ., *April 26, 1928.*

*To whom it may concern:*

This is to certify that I, O. J. Moss, member of the board of governors of Yuma County Water Users' Association, carried this petition to secure signatures upon a certain protest which is being made against certain provisions contained in the Swing-Johnson bill. Of the eight water users and landowners to whom I presented this petition none refused to sign same.

O. J. MOSS,
*Member of the Board of Governors, Fifth District.*

Mr. HAYDEN. Mr. President, I shall read the contract entered into between the Secretary of the Interior and the Imperial irrigation district on the 23d of October, 1918, so that the Senate may understand that the water users under the Yuma project have substantial rights which this bill would violate. The contract reads as follows:

CONTRACT BETWEEN THE UNITED STATES AND THE IMPERIAL IRRIGATION DISTRICT

This agreement, made the 23d day of October, A. D. 1918, by and between the United States of America, acting in this behalf by Franklin K. Lane, Secretary of the Interior, hereinafter styled the United States, party of the first part, and the Imperial Irrigation, a corporation, duly organized and existing under and by virtue of the laws of the State of California, hereinafter styled the district, party of the second part—

Witnesseth:

2. Whereas in connection with the Yuma project, Arizona-California, under the provisions of the reclamation act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof and supplementary thereto, and particularly section 25 of the act of April 21, 1904 (33 Stat. 224), the United States Reclamation Service has constructed on the Colorado River a dam known as the Laguna Dam and certain auxiliary works, situate about 10 miles northeast of Yuma, Ariz., together with a main supply canal extending from said dam southwesterly to a point known as Siphon Drop, situate in section 10, township 16 south, range 22 east, S. B. M.; and

3. Whereas under the aforesaid act of Congress the United States contemplates the reclamation of 120,000 acres of irrigable land, more or less under the Yuma project with water from Colorado River diverted at Laguna Dam, and the district desires to change its point of diversion and secure the right to divert water at said dam for the irrigation of all irrigable land within the boundaries of the district; and

4. Whereas the district is authorized under chapter 160 of the Statutes of California, 1917, page 243, to contract with the United States for a supply of water for irrigation;

5. Now, therefore, in consideration of the mutual covenants and agreements to be kept and performed and considerations to be paid, as hereinafter provided, it is hereby agreed as follows, to wit:

6. That immediately on the execution of this contract the district shall proceed with diligence to secure data, which, together with other available data and data to be gathered under the existing cooperative contract dated February 16, 1918, will constitute a complete detailed survey with specifications and estimates of cost for the following:

(a) All necessary works and structures for the diversion of water from the Colorado River at Laguna Dam; thence through said existing main canal of the Yuma project, and sufficient enlargement and modification, including such works or devices as the Secretary of the Interior may require for the purpose of maintaining as near as may be the efficiency of the desilting and sluicing works at Laguna Dam, as such efficiency would be, were the Yuma project fully developed, to divert and carry all water needed by the district for the irrigation of its lands above referred to, without impairing the utilization of said Laguna Dam, main canal, and auxiliary works to the full extent necessary to irrigate the Yuma project when fully developed.

(b) A main canal entirely within the United States, with all necessary appurtenant structures for the practical operation thereof, of sufficient capacity and proper construction to irrigate all lands in Imperial County, State of California, susceptible of economic irrigation from said canal. Such canal to connect with said main canal of the United States at a point described as Siphon Drop, and thence to connect with the canal system of said district in the United States upon the line located and approved as provided by the terms of the cooperative contract of February 16, 1918, above referred to.

7. Upon the approval by the Secretary of the Interior of the said survey, specifications, and estimates, district will provide for beginning and carrying to completion with due diligence, at the cost of the district, the work of construction and installation at the Laguna Dam and on the main canal, described in and contemplated by this agreement, and the district shall provide proper pecuniary support for the same in advance, in a manner satisfactory to the Secretary of the Interior. All such work shall be carried on in such manner as not to interfere with the proper operation of the Yuma project by the United States, and the district will promptly carry out any measures required by the United States or its authorized agents to avoid or relieve any interference with the delivery of water to the Yuma project during and due to such construction, and will save the United States harmless as to any claims for damages that may be presented by reason thereof.

8. All work of construction and installation, and the materials used therein, shall at all times be subject to the approval of the Secretary of the Interior, and be under the supervision and inspection of his authorized agents and engineers, to the end that the works shall conform strictly with said surveys and specifications, and such modification thereof as the Secretary of the Interior may approve in writing. In case any of said works are constructed under contract made by the district and are not in accordance with said surveys and specifications, the Secretary may, at his option, replace such unsatisfactory construction work at the expense of the district, or stop said work of construction or cancel this contract, or resort to any other lawful remedy, and the decision of the Secretary of the Interior whether said surveys and specifications or modifications thereof have been complied with shall be final and conclusive. The district shall make complete detailed progress reports of the said construction work upon demand of the Secretary of the Interior. The cost of the inspection on the part of the United States provided by this section shall be paid by the district to the United States upon demand.

9. For the right to use the Laguna Dam, the main canal and appurtenant structures, and divert water, as herein provided, the district agrees to pay to the United States the sum of $1,600,000, in 20 installments, the first of which shall become due and payable December 31, 1919, and subsequent installments annually thereafter. The first four installments shall each be 2 per cent, the next two installments each 4 per cent, and the next 14 each 6 per cent of the total amount. Upon failure of the district to make any such payment at the time and in the amount specified, then all rights under this contract shall be at an end, and all payments theretofore made shall become forfeited to the United States as liquidated damages; and as a further consideration for entering into this contract on the part of the United States, the district hereby releases and relinquishes any and all claims whatsoever for said moneys or any portion thereof so forfeited and paid as liquidated damages: *Provided*, That the Secretary of the Interior may in his discretion extend the time for any such payment upon the payment of 7 per cent interest in advance.

10. Subject to the provisions of the reclamation act of June 17, 1902 (32 Stat. 388), and acts amendatory thereof and supplementary thereto, the United States shall have and retain perpetually the title to and the complete control, operation, and management of said Laguna Dam, auxiliary works, and enlarged main canal from the dam to and including the Siphon Drop with appurtenant structures as enlarged, including the diversion works at Siphon Drop for the diversion and delivery of water to the Yuma project and the district. The district shall pay to the United States, quarterly, on demand, April 1, July 1, October 1, and December 31, its proportionate share of the cost of operation and maintenance of said dam, auxiliary works, and enlarged main canal for the preceding quarter, such payment by the district to bear the same ratio to the total cost of such operation and maintenance as the amount of water received by the district at the point of delivery to the district's canal at Siphon Drop bears to the total amount of water carried in said main canal at that point plus the amount of water diverted from the canal above the Siphon Drop for use on the Yuma project lands: *Provided*, That such extraordinary expense as may be caused by the operation of such desilting works as may be necessary to as nearly as may be maintained the efficiency of the desilting works at Laguna Dam, as such efficiency would be were the Yuma project fully developed, shall be borne by Imperial irrigation district. Such extraordinary expense, if any, shall be determined by the Secretary of the Interior. If the district fails to pay to the United States within 30 days after rendition of bill all operation and maintenance charges as determined by the Secretary of the Interior as they become due, the Secretary of the Interior, in addition to any other remedy which may be available to him for recovery of such charges, is authorized to shut off water from the intake of the district until such time as all sums due have been paid, with interest thereon at the rate of 7 per cent per annum, from rendition of bill.

11. The United States reserves the right to arrange for the connection with and use of Laguna Dam on such terms as the Secretary of the Interior may deem expedient, by any other irrigation enterprise, district, corporation, or individual; also of the headworks and main canal and other governmentally constructed works, and works constructed jointly by these parties, after proper enlargement and modification, on terms herein stipulated, without, however, impairing the utilization of said dam, canal, and other works to the extent necessary to irrigate the lands within the boundaries of Imperial irrigation district.

12. The United States reserves the right to develop power with the water in the enlarged main canal down to and including Siphon Drop. All other power possibilities in the main canal down to and including some convenient power site near Pilot Knob shall be developed by the United States to the extent deemed expedient by the Secretary of the Interior, at the joint expense and for the joint benefit of the Yuma project and the Imperial irrigation district, as herein provided. The apportionment of the cost of canal and headworks alterations and enlargement, and of canal extension from the Laguna Dam to the site selected for power development, near Pilot Knob, shall be made to the United States (for the Yuma project) and to the Imperial irrigation district, in the proportion that 2,000 second-feet bears to the total canal enlargement, less 2,000 second-feet. The cost of constructing power plants, transmission lines, and other power-plant accessories shall be also apportioned to Yuma project and the district, respectively, in the ratio that 8,500 water horsepower bears to the aggregate water horsepower capacity of the plant installed.

The operation and maintenance of any such power plant or plants constructed for joint benefit and the sales of power therefrom shall be under the control of the Secretary of the Interior, and charges for commercial power shall be upon rules adopted by the Secretary of the Interior applying equally to both valleys. Such power as, in the judgment of the Secretary of the Interior, is necessary for pumping and other operation and maintenance purposes shall be delivered to the Yuma project and to the Imperial irrigation district, at the cost of development thereof, plus 10 per cent, said cost to include interest at 5 per cent per annum on the capital invested in power plants, transmission lines, and power-plant accessories, and also a proportional part of the headworks and canal enlargement from Laguna Dam to Pilot Knob, determined by the relation 2,000 second-feet bears to the total enlarged canal capacity and reasonable depreciation as may be determined by the Secretary of the Interior. The preference right to purchase power developed at the price herein specified shall be given over other uses of power, to the requirements of the Yuma project (limited to an area not exceeding 120,000 acres) for power to be used in pumping irrigation water. The profits from power sales or power leases shall be divided between the Yuma project and the Imperial irrigation district in the proportion of their respective investments in power plants, transmission lines, and power-plant accessories, and in the canal and headworks alterations, canal enlargement, and canal extension(s) from the Laguna Dam to and including the power-house site near Pilot Knob, to be determined by the Secretary. In case capacity be also provided by enlargement for the irrigation of lands in the United States outside of the Imperial irrigation district, then the cost of enlargement computed as above as chargeable to the Imperial irrigation district shall be borne "by such district and such"

other lands in the ratio of their respective irrigable acreages(s). The cost of any works used jointly by several irrigation enterprises below the point near Pilot Knob, where power is developed, shall be apportioned "equitably" by the Secretary of the Interior. No water shall be diverted for power purposes from such main canal below Siphon Drop at any time when such water shall be required for irrigation of lands being irrigated therefrom in Imperial County.

13. It is understood and agreed that the connection with Laguna Dam, herein provided for, is to be constructed as a part of an all-American canal, which the district hereby agrees to build at as early a date as possible and within reasonable time, and "when" the district shall have completed said all-American canal it shall have the right to drop water at some other point than the vicinity of Pilot Knob for power development, and in this event agrees to place at the disposal of the United States at Pilot Knob, or some other point to be agreed upon, such power in addition to that generated at Pilot Knob as in the judgment of the Secretary of the Interior is necessary for pumping and other irrigation operation and maintenance purposes of the Yuma project or any auxiliary thereof, not in excess of 8,500 water horsepower in the aggregate, at the cost of development thereof at the power house, plus 10 per cent, said cost to include interest at 5 per cent, and reasonable depreciation as determined by the Secretary of the Interior. All power development, operation, and maintenance of power plants on the all-American canal and sales of power shall be under the control of the Secretary of the Interior, and charges for commercial power shall be upon rules adopted by the Secretary of the Interior, applying equally to both Imperial and Yuma Valleys. The profits from commercial power shall be divided between the Imperial irrigation district and the Yuma project in ratio of their respective investments in power, including the enlargements, alterations, and extensions of the headworks and main canal down to and including the power-house site near Pilot Knob, plus investments in the power plants, power house, transmission lines, and other accessories. In dividing profits the district shall be credited with the net revenue from the amount of power by which the total power output is increased by the all-American canal west of Pilot Knob, which shall be determined by the Secretary of the Interior. Power delivered to Imperial irrigation district for pumping and other irrigation operation and maintenance purposes shall be delivered on the same terms as power delivered to the Yuma project for said purposes.

14. It is understood and agreed that the Secretary of the Interior shall control the division of water and shall divert for use of the Yuma project, or any auxiliary thereof, as heretofore or hereafter undertaken by the United States within the present boundaries of the United States, and not exceeding 120,000 acres, sufficient water to secure the permanent and economical reclamation thereof, not exceeding, however, one-quarter of the water in the river above Laguna Dam. The foregoing applies only to the natural flow of the Colorado River, and not to storage water, which shall be delivered to the party entitled thereto.

The United States makes no guaranty or representation as to the quantity of water that may be available without storage for delivery to the district under this contract, and shall not be responsible for failure to deliver water under this contract caused by insufficient supply of water in the Colorado River, hostile diversion, or drought, interruption made necessary by repairs, nor on account of any valid order or decree of a competent court; nor for any damages by floods, acts of hostility, or unavoidable circumstances, nor for loss of crops or other damage caused by nondelivery of water.

15. It is understood and agreed that the district shall have the right at any time to extend its boundaries within the United States and water additional lands upon payment of same amount per acre as irrigable lands in present Imperial irrigation district are to pay under terms of this contract. This right to be also available on same conditions to Yuma project, additional to 120,000 acres herein mentioned. All proceeds from payments on account of initial connection charges assessed to and collected from such new lands shall be used under the direction of the Secretary of the Interior for the construction of storage works for the benefit of the lands contributing.

16. This contract shall not become effective until the same shall have been duly ratified and confirmed in accordance with law, by a vote of the people of the Imperial irrigation district, and unless it shall be so ratified within six months from the date of execution hereof by the Secretary of the Interior, it shall become void and of no further effect.

17. In case of failure on the part of the district to provide for beginning the work of enlargement of the Yuma main canal within two years from the date hereof, the Secretary of the Interior shall have the right to abrogate this contract.

18. No Member of, or Delegate to Congress, or Resident Commissioner, after his election or appointment, or either before or after he has qualified, and during his continuance in office, and no officer, agent, or employee of the Government shall be admitted to any share or part of this contract or agreement, or to any benefit to arise thereupon. Nothing, however, herein contained shall be construed to extend to any incorporated company, where such contract or agreement is made for the general benefit of such incorporation or company, as provided in section 116 of the act of Congress approved March 4, 1909 (35 Stat. L. 1109).

In witness whereof the parties hereto have caused the execution of these presents as of the day and year first above written.

[SEAL.] THE UNITED STATES OF AMERICA,
By FRANKLIN K. LANE,
*Secretary of the Interior.*

[SEAL.] THE IMPERIAL IRRIGATION DISTRICT,
By LEROY HOLT, *President.*

Attest:

F. H. MCIVER, *Secretary.*

I direct the particular attention of the Senate to the fact that the water users of the Yuma reclamation project have a substantial interest not only in the Laguna Dam but the main canal, down to a point called Pilot Knob, where there is a power possibility in the benefits of which, if developed, the Yuma project would share. As the case now stands, with the provisions in the bill whereby the Secretary of the Interior may transfer the title of the Laguna Dam and the main canal and appurtenant structures to irrigation districts and other agencies in proportion to their respective capital investments, it is quite evident that the Yuma project would lose out in such an arrangement. Under the all-American canal in California, if completed according to the plans of the Government engineers, there will be some 785,000 acres of irrigated land, whereas under the Yuma project, if it is completed to the fullest extent, there would be only 120,000 acres in cultivation. The bill provides that the title may pass to these organizations and the main canal and appurtenant structures shall be controlled in proportion to capital investment, whereas the contract between the United States and the Imperial irrigation district provides that the title to the Laguna Dam and the main canal, as far as Siphon Drop, shall remain in the United States forever. In addition thereto, the contract provides that any power development at Pilot Knob shall be shared by the Yuma project.

The contract refers to a certain act of Congress (33 Stat. L. 224), a provision in an Indian appropriation act which authorizes the construction of Laguna Dam, and I read that into the RECORD:

[33 U. S. Stat. L., p. 224, ch. 1402, sec. 25]

That in carrying out any irrigation enterprise which may be undertaken under the provisions of the reclamation act of June 17, 1902, and which may make possible and provide for, in connection with the reclamation of other lands, the reclamation of all or any portion of the irrigable lands on the Yuma and Colorado River Indian Reservations in California and Arizona, the Secretary of the Interior is hereby authorized to divert the waters of the Colorado River and to reclaim, utilize, and dispose of any lands in said reservations which may be irrigable by such works in like manner as though the same were a part of the public domain. * * *

If the Colorado River were not a navigable stream, it would be entirely unnecessary for the Secretary of the Interior to have authority to divert its water. The law that I have read is the authority and the only authority authorizing such diversion, and under that authority the Laguna Dam was constructed.

In order that the Senate may completely understand this issue and in order to be perfectly fair, I shall read from a pamphlet, entitled "The Boulder Dam and All-American Canal Project," issued in 1924 by the Imperial irrigation district in support of this legislation, which gives the reasons why that district made the contract of October 23, 1918. I read from page 7.

Another phase of our problem we have mentioned as being that of diversion. In the earlier years in the Imperial Valley no serious difficulty was experienced in diverting water from the Colorado River through a gate installed parallel with the California side of the river bank, through which water was admitted over flashboard, but without any structure being provided in the river channel which would regulate the head of water on the intake gate.

As the acreage under cultivation increased from year to year it was found that the intake canal silted up during flood season, and as the waters in the river receded very extensive dredging operations were necessary before normal river bed and canal conditions could be restored, and very frequently water service was so badly impaired for a term of four to eight weeks that great loss, totaling millions of dollars, to crops resulted.

To correct this impairment of service the district board has, during a series of years, installed and maintained a temporary brush weir in the Colorado River immediately below the canal intake, which serves to maintain and regulate the head of water at our gate during the low-

water period. By this expedient we have been enabled to maintain our water service with greater regularity and with less frequent periods of shortage. But meanwhile 50,000 acres of land have been brought under cultivation in the Yuma project. These lands are river-bottom lands and were naturally subject to overflow in flood season, and the flood waters are now held back by a system of levees erected and maintained as a part of the Yuma project development.

The people of Yuma naturally feel a very grave concern as to the maintenance in the river channel of any obstruction which during flood season might so obstruct the run-off of flood waters as to endanger their protective levee system.

Consequently, they have been very insistent that the people of Imperial Valley provide another and a safer method of diverting the waters of the river required by them, and have urged upon us the availability for that purpose of Laguna Dam. We have no criticism to offer as to this attitude on the part of the people in the Yuma Valley. It is natural for them to seek to protect their property rights. They have been very insistent yet have refrained from going to harsh lengths in the courts in their desire to protect themselves. We have endeavored to take them fully into our confidence, and have stated to them frankly that we recognize the justice of their contention and that we will, as quickly as possible, conform to their demands and will endeavor to connect our canal system with the Laguna Dam and thereafter refrain from the maintenance of any temporary structure in the river below that point. They are vitally interested in our progress along these lines.

It is apparent, therefore, that the Imperial irrigation district must speedily provide for a connection of its canal system with the Laguna Dam in order to increase the efficiency of its own service; to provide means by which water, when available, may be diverted for new lands and, by no means of least importance, to protect the values created under the Yuma project, and relieve the people of that section of the natural apprehension which will exist so long as the present methods of diversion are maintained.

Therefore, under date of October 23, 1918, the Imperial irrigation district entered into a contract with the Government of the United States, Secretary of the Interior, Franklin K. Lane, acting on behalf of the Government, under the terms of which the district obligated itself to pay to the Government for the privilege of making such a connection with its Laguna Dam, the sum of $1,600,000. The district, in that contract, obligated itself, so soon as it could secure the sanction of its people and the authority of the State engineer and bond commission, to provide funds with which to construct a canal connecting its system with such dam. Since that time the district has paid to the Government the annual installments on the purchase price stipulated in the contract $192,000, with future payments ranging from $64,000 to $96,000.

I must say, Mr. President, that on the face of this showing there is no apparent desire on the part of the people of the Imperial irrigation district to do any injustice to the water users of the Yuma project.

If the bill is amended to provide that the all-American canal shall be constructed as an ordinary reclamation project, then all of the provisions contained in the bill relative to the transfer of title to the main canal and appurtenant structures are wholly unnecessary. I read from the original reclamation act of 1902 the following provision:

SEC. 6. That the Secretary of the Interior is hereby authorized and directed to use the reclamation fund for the operation and maintenance of all reservoirs and irrigation works constructed under the provisions of this act: *Provided*, That when the payments required by this act are made for the major portion of the lands irrigated from the waters of any of the works herein provided for, then the management and operation of such irrigation works shall pass to the owners of the lands irrigated thereby, to be maintained at their expense under such form of organization and under such rules and regulations as may be acceptable to the Secretary of the Interior: *Provided*, That the title to and the management and operation of the reservoirs and the works necessary for their protection and operation shall remain in the Government until otherwise provided by Congress.

The reclamation extension act of 1914 contains this proviso, which slightly modifies the provision of the original act. I read from section 5:

*Provided*, That whenever any legally organized water users' association or irrigation district shall so request, the Secretary of the Interior is hereby authorized, in his discretion, to transfer to such water users' association or irrigation district the care, operation, and maintenance of all or any part of the project works, subject to such rules and regulations as he may prescribe.

Therefore, if the project is to become a regular reclamation project there is no necessity for any language in the bill authorizing the transfer of the title to irrigation districts or other agencies. The Imperial and Coachella irrigation districts will be in the same position as any other irrigation district. The Secretary of the Interior can transfer to them the care, operation, and management, which are all that count. The water users under the Salt River reclamation project are in complete control of that project, although the title to the works of the entire project remains in the United States. So it would be with the farmers in the Imperial and Coachella Valleys if they knew what was best for them.

I am satisfied that under these circumstances neither the people of the Imperial irrigation district nor those who speak for them here on the floor of the Senate can legitimately object to the amendment to the bill which I now ask the clerk to read. I offer the amendment, not expecting that it shall be accepted instantly, but for the careful consideration of the Senators from California, so that at a later time they may express to the Senate their approval or disapproval thereof. I shall be glad to hear from them in connection with the other amendments which I may offer. If they do not care to agree to accept them in their entirety, I shall be glad to hear from them as to what changes may be brought about which may bring us into closer accord. I ask that the amendments may be read and I now offer them.

The PRESIDING OFFICER. The clerk will read, as requested.

The Chief Clerk read the proposed amendments, as follows:

On page 12, line 20, insert the following: After the word "advanced" strike out the words "with interest reimbursable hereunder" and insert the following: "as provided in the reclamation law."

Page 12, line 22, after the word "structures," insert the words "below Pilot Knob."

Page 12, lines 22 and 23, after the word "agencies," strike out the words "of the United States."

Page 13, line 3, after the word "canal," insert the words "below Pilot Knob."

Page 13, line 8, after the word "canal," insert the words "below Pilot Knob," and before the word "fund" insert the word "reclamation."

Page 17, lines 5 and 6, strike out the words "fund herein provided for" and insert in lieu thereof the words "reclamation fund."

Page 18, lines 5 to 11, strike out the remainder of the section after the word "dam," in line 5.

The PRESIDING OFFICER. As the Senate is considering committee amendments first, the amendments submitted by the Senator from Arizona will be printed and lie on the table.

Mr. HAYDEN. I think it appropriate to now mention another matter, inasmuch as we are speaking about the all-American canal, and that is that there should be in the bill a limitation providing that water shall not be furnished from that canal to any land in private ownership in excess of 160 acres. I find in a pamphlet called "The Story of a Great Government Project for the Conquest of the Colorado River," issued by the Boulder Dam Association, Los Angeles, Calif., in support of the Swing-Johnson bill, this statement:

SOLDIERS' PREFERENCE RIGHTS

The act provides that all lands practicable of irrigation and reclamation by the irrigation works authorized shall be withdrawn from entry, and when the works are sufficiently constructed to permit the delivery of water the same shall be open to entry in tracts not exceeding 160 acres, with preferential right to persons who have served in the United States Army, Navy, and Marine Corps. There are 166,900 acres known to be irrigable from the all-American canal which will be subject to such entry, or 4,172 farms of 40 acres each.

That statement would lead one to believe that the public lands which are to be open to entry will be divided into 40-acre farm units and that all the land which a veteran could obtain would be 40 acres. The bill is silent on the subject of how much land in private ownership may be irrigated, but if ex-service men are to be limited to 40 acres certainly private landowners should not be given water for more than 160 acres.

I find on page 80 of the so-called Fall-Davis report on the problems of the Imperial Valley, which is Senate Document 142, Sixty-seventh Congress, second session, that lands to be irrigated under the proposed all-American canal aggregate net 785,000 acres, of which 167,000 acres are public lands; and that conforms to the figure I have just quoted from the Boulder Dam Assocation pamphlet; 529,500 acres of private lands, 14,700 acres of State lands, and 47,300 acres of railroad lands. The railroad lands referred to in the report are a part of the grant of alternate sections to the Southern Pacific Railroad Co. It is obvious that the major portion of the benefits to be extended by the construction of the all-American canal are to go to private landowners.

Congress has adopted a very definite policy on that subject. The policy of limiting the acreage in private ownership had its inception in a report transmitted by the President to the Sixty-

eighth Congress and published as Senate Document 92, entitled "Federal reclamation by irrigation." The report was made to the Secretary of the Interior by Messrs. Thomas E. Campbell, former Governor of Arizona; James R. Garfield, former Secretary of the Interior; Oscar E. Bradfute, of the American Farm Bureau Federation; Clyde C. Dawson, of Colorado; Elwood Mead, present Director of Reclamation; and John A. Widtsoe, of Utah. I find in this report a discussion of the reasons for the adoption of a better and more enlightened policy with respect to United States reclamation projects. One of the reasons for the failures of the past is speculation in land. I read from page 111 of that report, under the title "Homesteader versus speculator—the purpose of the reclamation act," as follows:

A main purpose of the reclamation act was to provide opportunities for homestead making for rural-minded people. Making a homestead, a place able to support a family and desirable for family life, must remain the central thought of every activity connected with the Federal reclamation.

It was hoped that the homesteader under the Federal irrigation works would settle upon the land with a strong determination to subdue the soil, to build a home, and to add another rural farmstead to the thousands which form the stable foundation of our Republic.

Such benefits did not flow from the original reclamation act and the report discusses the reasons for the disappointing results. Among other reasons given is this:

Those who made use of the opportunity offered by the Government to secure land and water on most easy terms, and with the intention to hold them until the unearned increment would enable them to sell out at a large profit. Such men are seldom farmers. They are always seeking for an opportunity to sell the lands at a good profit to themselves. These are the speculators.

Then the report continues, on page 114:

A closely related type of speculation has influenced the financial condition of many farmers. Large holdings of private land which became part of the project lands, but without water, had very little value before the project was authorized. When water became available their value immediately arose. The public lands were soon exhausted and the later settler attempted to secure his homestead by purchase from the large landholder. These private lands were often held at a very high figure, and the settler, full of hope, frequently agreed to pay a high price for the land, in addition to the construction cost included in his water-right contract. This added greatly to the farmer's burdens.

It should be remembered, however, that, although two-thirds of the lands now under water contract with the Government were in private ownership at the time water was ready for delivery, not all of these private lands were in large holdings and susceptible of this type of land speculation. Such private land, when held for speculative purposes, only added to the difficulties of the farmer who was engaged in winning a homestead from the desert.

The special advisers on reclamation, otherwise known as the "fact-finding commission," then made the following recommendation:

Disposition of private lands in excess of farm unit: That no reclamation project should hereafter be authorized until all privately owned land in excess of a single homestead unit for each owner shall have been acquired by the United States or by contract placed under control of the Bureau of Reclamation for subdivision and sale to settlers at a price approved by the Secretary. This price to be considered in determining what land and water will cost settlers and hence the feasibility of the project under the payment conditions of the law.

That recommendation was made in 1924. Subsequently Congress had under consideration a bill, introduced at the request of the commission, wherein they translated their recommendation into the form of a proposed statute, found in a proviso, as follows:

*Provided*, That no part of any sum provided for herein shall be expended for construction on account of any division of any project until all areas of land irrigable under such division and owned by any individual in excess of 160 irrigable acres shall have been conveyed in fee to the United States free of encumbrance to again become a part of the public domain, under a contract between the United States and the individual owner providing that the value as shown by said appraisal of the land so conveyed to the United States shall be credited in reduction of the construction charge thereafter to be assessed against the land retained by such owner; and lands so conveyed to the United States shall be subject to disposition under the reclamation law when so ordered by the Secretary of the Interior: *Provided further*, That no part of any sum provided for herein shall be expended for construction on account of any division of any project until an appropriate contract in form approved by the Secretary of the Interior shall have been properly executed by all holders of Federal land grants of more than 160 acres irrigable under such division, which shall provide for the sale of such lands to actual bona fide settlers at not more than the value thereof as shown by said appraisal.

The last proviso is applicable in this instance, because there are railroad-grant lands within the proposed all-American canal project.

When Congress took up the consideration of the bill to authorize the construction of the Coolidge Dam in Arizona, for completion of the San Carlos irrigation project, a provision similar to the one I have just read was incorporated in the act approved June 7, 1924. I shall read just exactly what is contained in that law:

*Provided further*, That no part of any sum provided for herein shall be expended for construction on account of any lands in private ownership until all areas of land irrigable under the project and owned by any individual in excess of 160 irrigable acres shall have been conveyed in fee to the United States free of encumbrance to again become a part of the public domain under a contract between the United States and the individual owner providing that the value as shown by said appraisal of the land so conveyed to the United States shall be credited in reduction of the construction charge thereafter to be assessed against the land retained by such owner; and lands so conveyed to the United States shall be subject to disposition by the Secretary of the Interior in farm units at the appraised price upon such terms and conditions as he may prescribe.

We find that in the companion bill to the measure now under consideration by the Senate that the House Committee on Irrigation and Reclamation has included a provision limiting the area in individual ownership to 160 acres. I have, therefore, rather than copy the law as enacted with respect to the San Carlos project in Arizona, taken from the House bill the language of an amendment which I now offer and ask to have read.

The PRESIDING OFFICER. The clerk will read, as requested.

The Chief Clerk read the proposed amendment, as follows:

On page 17, line 25, after the word "provided," insert the following: "*Provided further*, That all contracts for the delivery of water for irrigation purposes shall provide that all irrigable land held in private ownership by any one owner in excess of 160 acres shall be appraised in a manner to be prescribed by the Secretary of the Interior and the sale prices thereof fixed by the said Secretary on the basis of its actual bona fide value at the date of appraisal without reference to the proposed construction of the irrigation works provided for by this act; and that no such excess lands so held shall receive water from said canal if the owners thereof shall refuse to execute valid recordable contracts for the sale of such lands under terms and conditions satisfactory to the Secretary of the Interior and at prices not to exceed those fixed by the Secretary of the Interior."

Mr. HAYDEN. I feel very confident that, upon reflection, the Senators from California will accept an amendment of that character to the pending bill. I am quite sure it will remove much criticism and be of immense advantage to bona fide settlers in the Imperial and Coachella Valleys.

In conversations that I have had with representatives of the Imperial irrigation districts they have expressed a fear that, by reason of some treaty with the Republic of Mexico, they might be deprived of water to which they now have a perfected right. I, myself, doubt very much whether anything like that could happen. I can conceive, however, by reason of the contacts they have had with the Mexican landowners and the friction which has taken place, that such a fear is one which might properly arise in their minds. In talking with them I made the suggestion that, inasmuch as the Federal Government and the Federal Government alone, would be the authority which could enforce a treaty, Congress has complete authority to prescribe the manner wherein the actual delivery of water to Mexico in compliance with any treaty should be carried out.

It occurred to me that the logical way in which such water should be delivered would be in accordance with the Colorado River compact, which requires the upper basin to furnish one half of it and the lower basin to furnish the other half in case of shortage.

But when that time arrives, the Federal authorities could not deal with basins. They would be compelled to deal with States, and there would be a quota of water imposed upon each State to be delivered to Mexico in the event the fulfillment of the treaty required it. The proper way for any State to carry out its delivery of the quota of water assigned to it would be in the inverse order of appropriations; that is, the last person who had acquired a right to water should be the first to furnish water to Mexico in case of a shortage.

I have, therefore, prepared an amendment which I offer to the bill at this time. I hope that the two Senators from Cali-

fornia will give it very careful consideration. I feel quite sure that some of their constituents will be interested in seeing such a provision as this included in the bill.

The PRESIDING OFFICER. The amendment will be stated for the information of the Senate.

The CHIEF CLERK. On page 22, line 3, it is proposed to insert the following:

SEC. 15. If, as provided in paragraph (c) of Article III of the Colorado River compact, it shall become necessary to supply water to the United States of Mexico, the United States of America shall not require any land having a perfected right to water at the date of the approval of this act to be deprived of water. Unless otherwise provided by State law, lands having the latest order of priority to the use of water shall be the first to be deprived of water to supply the quota of water which any State may be required by the United States of America to supply to the United States of Mexico.

The PRESIDING OFFICER. The amendment will be printed and lie on the table.

Mr. HAYDEN. Mr. President, the senior Senator from California [Mr. JOHNSON], in his remarks last week, did not discuss the question, which has aroused a great deal of interest on the Arizona side of the river, as to whether this bill really and in fact does place the all-American canal in the category of a United States reclamation project. However, in his report I find these words:

The reason for many of the committee amendments above outlined are obvious and made for the purpose of making the various provisions conform one with another. A few of them, however, are entitled to special consideration.

The amendment on page 2, commencing on line 11, making the expenditure for the all-American canal reimbursable under the provisions of the reclamation law, is for the purpose of avoiding conflict with well-established precedent. The latter part of the amendment to the effect that no charge shall be made for irrigation water through the all-American canal is to avoid duplication of charge on the lands. These lands already have a water-right, and since they are to reimburse the Government under the reclamation law the act should be perfectly clear that the lands are not to pay additional charges for water service.

The Senator, in his remarks, referred to section 2 of the bill, saying:

Section 2 of the bill, sir, contains the financial features. These were furnished by the Secretary of the Treasury. I assume, therefore, they will meet with an enthusiastic reception even from the opponents of the measure. They were written into the bill at the suggestion of the Treasury Department.

I am frank to say that I can not be very enthusiastic about the provisions in section 2 of the bill to which the Senator referred, because, if the the all-American canal is to be constructed as a United States reclamation project, it is my best judgment that the money for that purpose should be appropriated by Congress and placed in the reclamation fund, and not in the fund mentioned in section 2.

I believe it will be well for me to recite some of the history of this legislation so as to explain the financial provisions in the bill.

You will all remember that in the last Congress it was proposed that the works to be constructed on the Colorado River, both the dam and power plant and the all-American canal, were to be paid for by a bond issue. I find in the Swing-Johnson bill of last year two provisions which are not in the bill as introduced in this Congress. They are provisions (f) and (g) in section 2, which have been deliberately omitted from the bill by its authors this year.

Paragraph (f) reads:

In order to make the advances to the fund, the Secretary of the Treasury may, if he deems it advisable, exercise the authority granted by the various Liberty bond acts and the Victory Liberty loan act, as amended and supplemented, to issue bonds, notes, and certificates of indebtedness of the United States; and any bonds so issued shall be disregarded in computing the maximum amount of bonds authorized by section 1 of the second Liberty bond act, as amended.

Paragraph (g) reads:

The Secretary of the Treasury is authorized and directed to use, upon such terms and conditions as he may prescribe, for the payment, redemption, or purchase, at not to exceed par and accrued interest, of any bonds, notes, or certificates of indebtedness of the United States, the money covered into the Treasury under subdivision (e) in repayment of the amounts advanced.

All of the financial provisions in section 2 of the bill were originally predicated upon the theory that there was to be a Federal bond issue. The bond-issue feature has been stricken from the bill this year. Whether that was done for parliamentary reasons, in that it would not be in order to pass a revenue bill in the Senate, or whether, upon reflection, it has been determined that such provisions are unnecessary, I can not say. Undoubtedly the senior Senator from California can give the reason for the omission.

It is my judgment, as I stated before, that if Congress is to set up this financial scheme, it should apply only to the dam and the power plant and not to the all-American canal, because that can best be handled through the reclamation fund. That is, by placing sufficient money in the reclamation fund the all-American canal can then be constructed in the ordinary way, as in the case of all other reclamation projects.

As to the financial features of the bill, the Senator from California repeated, as he has many times, a statement that the ultimate cost of this project was to be without expense to the United States. In order that I may not misquote him, I shall read what he stated to the Senate on April 26:

At the beginning of what I say to-day, at the end of the argument whenever that shall occur, whether within a week or a day or a month or a year or a lifetime—at the beginning and at the end of the argument upon the pending measure, I want to make plain to those who do me the honor to listen to me that under the provisions of the measure the United States Government will not be required ultimately to pay a single dollar. I iterate and reiterate this, sir, because again and again in newspapers which publish their articles for one reason or another, by individuals who make their assertions for one cause or another, repeatedly it has been asserted that under the measure the taxpayers of the United States will be required to go deep into their pockets in order to afford some benefit to the people in the southwestern portion of our country.

Not so, sir; not so at all. Nothing will be required from the United States Government ultimately. The provisions of the bill emphatically make that plain, as we will see when we reach those provisions. No sum is asked from the United States Government in this plan. Before there can be a shovelful of earth turned or a single dollar expended the United States Government must have in its hands wholly executed contracts which will repay every penny contemplated to be expended under the bill.

Never before in any measure of this magnitude or of this character has such a provision been presented; and I repeat, because of the misrepresentation which has been indulged all over this land, that the taxpayers will be mulcted not of a single penny by the passage of this bill. Taxes will be increased not a farthing. No community, no individual, will be required to pay a single cent toward this project. Every bit of money that may be expended upon it must be paid out of the project itself, and the Government of the United States must be satisfied upon that point before it begins any activity of any kind or any character.

The thought behind the statement made by the senior Senator from California is based upon the old and abandoned bond-issue idea. I have seen in the public press a statement by another Senator that it is well understood that when this bill has passed the Senate it will be amended in the House to provide for a bond issue, and not for a direct appropriation of funds from the Federal Treasury.

This proposal for bond issue was first considered by the House Committee on Irrigation and Reclamation, of which I was then a member.

Mr. BLAINE. Mr. President, will the Senator yield for a question?

The PRESIDING OFFICER. Does the Senator from Arizona yield to the Senator from Wisconsin?

Mr. HAYDEN. I yield.

Mr. BLAINE. Does the Senator have any objection to the proposition that the Government should be repaid the amount that it invests in this whole project?

Mr. HAYDEN. I have no objection whatever. I propose to demonstrate that the purpose to be accomplished, however, will be accomplished with the money of the taxpayers of the United States, and that such is the true intent of the bill. Certainly the taxpayers should be reimbursed. I am not objecting to that at all; but I am objecting to a statement which has been quite often broadcast that this project will not cost the taxpayers one penny, not a farthing. I am sure that I can demonstrate to the Senator in a very few moments from a very high financial authority that such is the fact.

Mr. BLAINE. If the Senator will yield for another question—I do not like to interrupt him——

Mr. HAYDEN. I am very glad to explain any matter that I can to the Senator from Wisconsin.

Mr. BLAINE. As I understand, this project involves a reclamation project for irrigation purposes, the furnishing of water for cities of southern California to a certain extent, flood control, and the development of a hydroelectric power, which it is

hoped, I understand, will be one of the main sources from which funds are to be derived for the purpose of paying for this result. Is there anything essentially wrong about a proposition of that kind, so far as the taxpayers of the United States are concerned, if they are guaranteed, as far as it is possible to guarantee any obligation, that ultimately, and within the time fixed by law, the project itself will have paid for the initial expenditures?

Mr. HAYDEN. I am making no comment upon the merits or demerits of the project itself. I am merely trying to state the fact, first, that the funds to be used to pay for the all-American canal should be placed in the reclamation fund, and not scrambled in with another special fund out of which it is proposed to build a dam and power plant. I should like to have the two funds kept separate. In the second place, I want to demonstrate that the money which will go into this scheme, for whatever purpose, is the money of the taxpayers of the United States.

As I stated, I have the very highest authority on that point in the testimony of the present Secretary of the Treasury, Mr. Andrew W. Mellon. This proposal for a bond issue was investigated by the House Committee on Irrigation and Reclamation during the consideration of a measure similar to the one now under consideration, except that it had a Federal bond-issue provision in it.

It was sent down to the Treasury Department for report; and I shall read the letter of Secretary Mellon dated March 18, 1926, addressed to the chairman of the House Committee on Irrigation and Reclamation:

TREASURY DEPARTMENT,
*Washington, March 18, 1926.*

DEAR MR. CHAIRMAN: I have your letter of March 6 requesting my advice on the financial plan proposed by H. R. 9826. This bill contemplates the sale by the United States of $125,000,000 of 15–50 year 4 per cent bonds and the use of the proceeds to pay for the cost of construction of a dam on the Colorado River and an irrigation canal to the Imperial and Cochella Valleys. I am not familiar with the engineering features involved, nor with the earning prospects of the project, and I accordingly express no opinion thereon.

Proceeds from the sale of our bonds are not governmental revenues. The payment for the project by the sale of bonds has exactly the same effect on our governmental accounts as the payment of the same expenditure out of any governmental revenue, and the fact that it is a dam and might have earnings in the future does not differentiate it from an expenditure for a battleship, a public building, or to pay employees. In each case the expenditure would appear as an expenditure in the Treasury statement, and if the sum of this expenditure and all other expenditures during the fiscal year was less than the revenue for that year from all sources there would be a surplus. If this sum was in excess of the revenue there would be a deficit. With our large Government indebtedness outstanding, the effect of a surplus is to require less borrowing at the next quarterly refunding period, and the effect of a deficit is to require more borrowing. In other words, if there were no provisions at all in the bill for the floating of the loan and the general revenues of the Treasury were insufficient to pay for the project, the Treasury would be obliged to sell additional securities from which to obtain the cash to cover the cost of governmental operation in excess of Government revenues.

The proposal for the bond issue, therefore, simplifies in no way the fiscal problem involved. As a matter of fact, the limitation in the bill as to rate of interest and maturity and the power of the Secretary of the Interior to control some of the terms of the proposed issue would hamper the Treasury in meeting a money market which might exist at the time the securities had to be sold and to some extent would increase the cost of money to the Government. If the project is adopted by Congress, it would be, in my opinion, better fiscal policy to authorize the Secretary of the Treasury to pay for the project out of the general fund, or out of the proceeds of bonds authorized generally to be sold to replenish the general fund, and then earmark the earnings from the project to the payment of interest and principal on an amount of public debt equivalent to that created for this purpose. This policy would permit the Treasury to take care of our debt structure as a whole and in the manner most effective at the time.

If we eliminate the question of paying for the project out of the bond issue, which, as I have said, is no aid from a Treasury standpoint, then the question for the determination of Congress is, Should the United States spend $125,000,000 in the construction of a power and irrigation project? I believe that, in general, sound public policy in America, as elsewhere, is to encourage private initiative and not to have the Government ownership or operation of projects which can be handled by private capital under proper governmental regulations. The governmental operation of railroads in this country was our largest experiment on this line, and a comparison of public and private operation in that field justifies my faith in private enterprise. Canadian and European experience is the same. To get the Government out of business, whether it be in banks, utilities, or monopolies, has become one of the most essential steps to a permanent fiscal restoration of Europe, and I am loath to have the United States embark upon enterprises not strictly governmental in their nature. The fact that a government can furnish capital at lower rates of interest is illusory, if there be taken into account that the public project pays no tax and therefore does not bear its share of the cost of government. It seems to me that if the project is one which can pay its way, private capital can be found. If it can not pay its way, then we should consider whether all the taxpayers throughout the United States should be taxed for the benefit of a part of the country.

To these general principles, which I feel to be correct, there may arise exceptions. The Colorado River project involves the adjustment of the interests of seven States and a division of water between the United States and Mexico. In a project which involved a compact between different States and an international agreement, it is apparent that action must be had by the Federal Government if a satisfactory solution is to be obtained. It might be practicable to solve the problem through the Federal Government and still have the project constructed and operated by private enterprise. Congress may, however, feel that full or partial Federal Government ownership would be more convenient and under the particular circumstances the present case be made an exception to the general rule of sound policy.

If my suggestion as to a more satisfactory way of financing the project meets the approval of the committee, I shall be glad to have prepared a draft of legislation along this line.

The period of amortization of the cost of the project over 50 years seems to me a little long.

Very truly yours,

A. W. MELLON,
*Secretary of the Treasury.*

Hon. ADDISON T. SMITH,
*Chairman Committee on Irrigation and Reclamation,*
*House of Representatives.*

Later, Mr. President, at my request there appeared before the House Committee on Irrigation and Reclamation Undersecretary Winston, of whom I asked a number of questions in order to obtain an explanation of the financial set-up as now evidenced in part in this bill.

Mr. Winston appeared before the committee on April 23, 1926. I shall read from the hearings certain questions which I propounded to him, and his replies:

Mr. HAYDEN. What I am trying to ascertain is whether there is any difference between the plan proposed in this bill and the general practice of the Treasury Department or whatever department handles special appropriations for particular purposes.

Undersecretary WINSTON. There is a departure in that we have tried to create something so that we could show at all times what it costs and whether it has paid back its costs to the Government. Whenever this project pays itself out, the Government will be in the same position as if it had never advanced the money.

Mr. HAYDEN. In the case of the San Carlos Federal irrigation project and the Coolidge Dam, there was authorized an appropriation of $5,500,000 out of the Treasury for a specific purpose. It can not be possible that accounts are so loosely kept by the Treasury Department or any other department of the Government that one could not be told at any time how much money had been spent for a particular purpose, and how much had been repaid as repayments are made?

Undersecretary WINSTON. I will ask Mr. Hand to answer that question.

Mr. HAND. Whenever there is a specific appropriation, it is set up on the books of the Treasury Department and funds are advanced out of that alone. If there are dozens of different projects all embraced in one appropriation, separate accounts are kept by the administrative offices. Each separate appropriation has to be set up separately.

Mr. HAYDEN. The appropriation for the construction of Boulder Canyon Dam will be a specific appropriation, and the Treasury Department is not proposing to do anything different by this legislation than you would if there was no legislation.

Undersecretary WINSTON. Yes; we are providing for a return of interest and the exact interest on the amount advanced.

* * * * * * *

Mr. HAYDEN. I want to know whether, aside from the collection of interest during construction, you have departed from the usual accounting practice of the Treasury Department?

Undersecretary WINSTON. Do you mean a departure by way of keeping accounts or a departure in legislation by Congress?

Mr. HAYDEN. By way of keeping accounts.

Undersecretary WINSTON. I do not think it is very much of a departure.

Mr. HAYDEN. If it is, I would like to know in what manner?

Undersecretary WINSTON. Mr. Hands knows these matters better than I do.

Mr. HAYDEN. Mr. Hand, by the proposal we are now considering as an amendment to this bill, are we following the usual and routine

practice and not doing violence to the usual accounting methods of the Treasury Department with respect to specific appropriations for a particular purpose? You are not asking Congress to adopt some new bookkeeping system in the Treasury?

Undersecretary WINSTON. It is not going to change the method of keeping accounts, and the principle is not very much different from other legislation.

* * * * * * *

Mr. HAYDEN. This bill in its original form was submitted to the Treasury Department. I shall read a paragraph from the report of the Secretary of the Treasury in which he refers to the proposed bond issue and ask whether this present provision fits in with what he then said. The report is dated March 18, 1926, and is signed by Secretary Mellon.

"Proceeds from the sale of our bonds are not governmental revenues. The payment for the project by the sale of bonds has exactly the same effect on our governmental accounts as the payment of the same expenditure out of any governmental revenue, and the fact that it is a dam and might have earnings in the future does not differentiate it from an expenditure for a battleship, a public building, or to pay employees. In each case the expenditure would appear as an expenditure in the Treasury statement, and if the sum of this expenditure and all other expenditures during the fiscal year was less than the revenue for that year from all sources, there would be a surplus. If this sum was in excess of the revenue there would be a deficit. With our large Government indebtedness outstanding, the effect of a surplus is to require less borrowing at the next quarterly refunding period, and the effect of a deficit is to require more borrowing. In other words, if there were no provisions at all in the bill for the floating of the loan and the general revenues of the Treasury were insufficient to pay for the project, the Treasury would be obliged to sell additional securities from which to obtain the cash to cover the cost of governmental operation in excess of Government revenues."

If that general proposition is true, and appropriations for the Boulder Canyon project are the same as appropriations for a public building or for pay of employees, as the Secretary of the Treasury states, what is the necessity for issuing bonds for this particular purpose?

Undersecretary WINSTON. It is only, as I have explained, that if we did want to borrow the money through Liberty bonds we do not want to handicap ourselves on that Liberty bond limit. That is the sole purpose of this provision. It has no bearing on the part of the letter you have just read.

Mr. HAYDEN. In this morning's paper I read that there is a probability of a deficit of $21,000,000 during the next fiscal year. If that should occur, the Treasury Department would have to borrow $21,000,000 to meet it.

Undersecretary WINSTON. If we should spend less money than we take in, of course there would be a surplus. When we come to a period in which we have a maturity, which is every three months, we will borrow less. Of course, if we are spending more money than we take in, we have to borrow. The money we borrow goes into the general fund of the Treasury and it comes out of there for such expenditures as Congress appropriates for those expenditures.

Mr. HAYDEN. That is what Secretary Mellon meant when he said, in the third paragraph of his letter to the chairman of this committee:

"If the project is adopted by Congress it would be, in my opinion, better fiscal policy to authorize the Secretary of the Treasury to pay for the project out of the general fund or out of the proceeds of bonds authorized generally to be sold to replenish the general fund."

* * * * * * *

Mr. HAYDEN. Is it perfectly clear in your mind that the way in which this project is to be built is by appropriations out of the general fund of the Treasury? In other words, does the bill, as it now stands, utterly and completely abandon the plan to which Secretary Mellon objected, namely, that the Boulder Canyon project should be financed by the sale of Government bonds?

Undersecretary WINSTON. Yes. It makes it a perfectly clear proposition.

Mr. HAYDEN. I notice on page 22 of the report made to the Senate by Senator JOHNSON on Senate bill 3331, under the caption "Power," the following:

"The Federal Government is interested in power on the project from two sources from two points of view; first, as a means by which the great works authorized may be financed without a drain on the National Treasury."

If money is appropriated by Congress out of the Treasury, is it not a drain on the Treasury?

Undersecretary WINSTON. There is not any way of spending money of the United States without spending it. If you spend $125,000,000, I do not care where you get it, you are spending money of the United States.

Mr. HAYDEN. That was always my opinion, and I was therefore greatly surprised to read a statement in such a carefully written report saying that the project may be financed without a drain on the National Treasury.

* * * * * * *

Mr. HAYDEN. I think you have already stated the Treasury Department's views in regard to it, but for fear there might be some doubt in the mind of somebody else, I direct your attention to a statement made in a speech by Secretary Work at Los Angeles, on April 26, 1926, in which he refers to the proposed bond issue. He said:

"My proposal that the funds needed for this entire development be obtained from the sale of Government bonds was made because it is believed that enough revenue can be obtained from the sale of water for irrigation and domestic use, and the sale of power, to make this a solvent undertaking, paying interest on all the money expended and returning the principal within a reasonable time. To finance the enterprise in this way would remove a serious objection from taxpayers in other parts of the country, who can see little reason for advancing funds out of the National Treasury as a temporary expedient, to be replaced by them in the form of taxes, when it may be possible to make the project a self-sustaining one without disturbance in the fiscal operations of the Government."

As I understand the bill in the present form, Secretary Work's proposal for a bond issue is utterly rejected, and we have returned to the original proposition that this project shall be paid for out of the Treasury with money raised by taxes imposed upon the American people. The only question is, if enough taxes are not collected, whether the Government shall issue bonds to meet a general deficit in the Treasury.

Undersecretary WILSON. I do not want to disagree with Secretary Work, but it makes no difference from a governmental standpoint whether you borrow money directly and spend it on a project or whether you spend some other cash on a project and borrow the money to replace that cash. That is the only difference between the two bills. Secretary Work proposed to borrow the money directly for the fund. This proposal is to use the general cash in the Treasury, and if we need to, to replenish it. It is the same thing.

* * * * * * *

Mr. HAYDEN. I want to thank Mr. Winston for coming before the committee, because he did so at my request. He has made a very clear and definite statement of the purposes of the amendments proposed by the Treasury Department.

However, I want to say in all frankness that it appears to me that if the provisions with respect to bookkeeping were not specifically provided for in the bill, and the Treasury Department was directed by a general requirement to collect interest, the proper officials could arrange their books to meet that situation without difficulty.

With respect to the new bond-issue provision, it amounts to nothing more than raising the limit of $20,000,000,000, as now authorized, by an additional $125,000,000.

Undersecretary WINSTON. But we are approaching this limit and with this maturity of third Liberty bonds, we will probably go up to it. We do not want to be handicapped by having borrowed money for this particular project. The general plan, I believe, is clearer. It keeps everything intact and in one fund. It is better than a bookkeeping arrangement which might be worked out to carry out the same purpose.

I might state that he was referring to the Liberty bond provisions in the bill of last year, which I read, and which have been abandoned this year, so that the argument he then made is no longer applicable.

Mr. HAYDEN. Another thought, from the viewpoint of the advocates of the bill, is that, having originally proposed a bond issue, which was definitely rejected by advice of the Treasury Department, placing these bookkeeping provisions in the bill would have the appearance of providing a cushion upon which to break their fall from their original position. As a matter of fact the proposed amendments do not change the fundamental proposition which Secretary Mellon laid down and which is that the money to build the Boulder Canyon Dam must be appropriated from the Treasury from funds raised by taxation.

Undersecretary WINSTON. It is United States money and it has to come out of the United States Treasury.

Mr. CURTIS. Mr. President, does the Senator from Arizona wish to conclude his remarks to-night? If he does not, it is desired to have a short executive session.

Mr. HAYDEN. I will be glad to yield for that purpose.

EXECUTIVE SESSION

Mr. CURTIS. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened, and (at 4 o'clock and 55 minutes p. m.) the Senate adjourned until to-morrow, Thursday, May 3, 1928, at 12 o'clock meridian.

## NOMINATIONS

*Executive nominations received by the Senate May 2, 1928*

COLLECTOR OF INTERNAL REVENUE

Joseph S. MacLaughlin, of Philadelphia, Pa., to be collector of internal revenue for the first district of Pennsylvania in place of Blakely D. McCaughn, resigned.

REGISTER OF THE LAND OFFICE

Arthur Wellington Doland, of Washington, to be register of the land office at Spokane, Wash., effective May 27, 1928. (Reappointment.)

PROMOTIONS IN THE NAVY

The following midshipmen to be ensigns in the Navy from the 7th day of June, 1928:

Thomas A. Ahroon.
Alfred M. Aichel.
John C. Alderman.
Stephen H. Ambruster.
Paul R. Anderson.
Robert J. Archer.
Carl R. Armbrust.
Theodore F. Ascherfeld
Thomas Ashcraft.
Michael P. Bagdanovic
Alan B. Banister.
Richard N. Belden.
Irwin F. Beyerly.
Lex L. Black.
John A. Bole, jr.
John T. Bowers, jr.
Clarence M. Bowley.
John M. Boyd.
James H. Brett, jr.
Chesford Brown.
Cuthbert J. Bruen.
John E. Burke.
Albert C. Burrows.
Raymond O. Burzynski.
Harlow J. Carpenter.
Eugene C. Carusi.
Max L. Catterton.
William A. Cockell.
Victor B. Cole.
George W. Collins.
John L. Collis.
Gordon V. Conway.
Albert B. Corby.
Neale R. Curtin.
Roger M. Daisley.
Edwin B. Dexter.
Thomas A. Donovan.
George P. Enright.
Augustus W. Estey.
Edward T. Eves.
Albert J. Fay.
Evan E. Fickling.
Joseph Finnegan.
Eugene W. Fitzmaurice.
Michael F. D. Flaherty.
Leonard F. Freiburghouse.
George Fritschmann.
Allan G. Gaden.
Philip D. Gallery.
Norman F. Garton.
Marcel R. Gerin.
Donald S. Gordon.
Walter N. Gray.
Robert S. Hall, jr.
Weldon L. Hamilton.
Edward A. Hannegan.
Claude M. Harris.
Wilfred J. Hastings.
Earle C. Hawk.
Lindell H. Hewett.
Allen S. Hicks.
William E. Howard, jr.
Charles P. Huff, jr.
George K. Huff.
William H. Jacobsen.
Ralph K. James.
Milton G. Johnson.
Horace B. Jones.
Thomas W. Jones.
Francois C. B. Jordan.
Robert T. S. Keith.
Charles H. Kendall.
William D. Kennedy.
Paul E. Kerst.
George E. King.
Rodney B. Lair.
James R. Lee.
Julian H. Leggett.
Carl A. R. Lindgren.
Donald A. Lovelace.
Edward E. Lull.
Elwood C. Madsen.
Edward J. Martin.
Harold A. McCormick.
John K. McCue.
David L. McDonald.
Maurice M. Merson.
William J. Millican.
George H. Moffett.
Albert O. Momm.
Idris B. Monahan.
Frederick E. Moore.
Robert L. Morris.
Baron J. Mullaney.
John F. Mullen, jr.
Nic Nash, jr.
John F. Nelson.
Frank McD. Nichols.
Hugh R. Nieman, jr.
Rollo N. Norgaard.
Oscar L. Otterson.
William S. Parsons.
Robert C. Peden.
John R. Pierce.
Robert A. Pierce.
Earl H. Pope.
William S. Pye, jr.
Joseph F. Quilter.
John Quinn.
William F. Raborn, jr.
Matthew Radom.
Howard F. Ransford.
Jack C. Renard.
Harry W. Richardson.
J. Clark Riggs, jr.
Basil N. Rittenhouse, jr.
Lewis W. Sayers, jr.
William A. Schoech.
James B. Schuber, jr.
John A. Scott.
William M. Searles.
Harry E. Sears.
William W. Shea.
Vincent Shinkle, 3d.
Thomas H. Simmonds.
Charles R. Smith.
Thurmond A. Smith.
Phillip G. Stokes.
Robert O. Strange.
Guy W. Stringer.
Stephen N. Tackney.
Henry B. Taliaferro.
Donald A. Taylor.
William A. Taylor.
William D. Thomas.
Wells Thompson.
David W. Todd, jr.
Jesse J. Underhill.
John G. Urquhart, jr.
Robert E. Van Meter.
Daniel J. Wagner.
Philip F. Wakeman.
Albert J. Walden.
William M. Walsh.
Charles R. Watts.
John T. White.
Harry B. Whittington.
John A. Williams.
Robert W. Wood.
Joe E. Wyatt.
Edwin J. S. Young.
John Zabilsky.
Hurley McC. Zook.

The following-named midshipmen to be assistant paymasters in the Navy, with the rank of ensign, from the 7th day of June, 1928:

James S. Bierer.
Edward H. Koepel.

POSTMASTERS

ALASKA

Lillian H. White to be postmaster at Kodiak, Alaska, in place of Z. T. Halferty, removed.

CALIFORNIA

Zylpha Potter to be postmaster at Hughson, Calif., in place of Zylpha Potter. Incumbent's commission expired May 1, 1928.

Frank N. Lawrence to be postmaster at Mount Shasta, Calif., in place of F. N. Lawrence. Incumbent's commission expired May 1, 1928.

Belle Kornelissen to be postmaster at Newhall, Calif., in place of Belle Kornelissen. Incumbent's commission expires March 7, 1928.

COLORADO

Walter P. Merrill to be postmaster at Brighton, Colo., in place of R. C. Alexander, deceased.

IDAHO

Peter W. McRoberts to be postmaster at Twin Falls, Idaho, in place of P. W. McRoberts. Incumbent's commission expires March 7, 1928.

ILLINOIS

Louis C. Schultz to be postmaster at Chebanse, Ill., in place of Oscar Siggins. Incumbent's commission expired January 7, 1928.

Mary Slocum to be postmaster at Franklin Park, Ill., in place of Mary Slocum. Incumbent's commission expired April 22, 1928.

Charles E. Hartman to be postmaster at Mount Carroll, Ill., in place of C. E. Hartman. Incumbent's commission expires May 5, 1928.

Burnham M. Martin to be postmaster at Watseka, Ill., in place of F. M. Maus. Incumbent's commission expired February 1, 1928.

John F. Shimkus to be postmaster at Westville, Ill., in place of J. F. Shimkus. Incumbent's commission expires May 5, 1928.

Willis D. Coffland to be postmaster at Seaton, Ill., in place of F. E. Walters, resigned.

INDIANA

Harold P. Willoughby to be postmaster at Spencer, Ind., in place of H. P. Willoughby. Incumbent's commission expired April 7, 1928.

IOWA

Charles B. Santee to be postmaster at Cedar Falls, Iowa, in place of C. B. Santee. Incumbent's commission expires May 5, 1928.

John E. Mieras to be postmaster at Maurice, Iowa, in place of J. E. Mieras. Incumbent's commission expires May 5, 1928.

KANSAS

Charles E. Schul to be postmaster at Grenola, Kans., in place of C. E. Schul. Incumbent's commission expires May 5, 1928.

Alice M. McLavy to be postmaster at Morganville, Kans., in place of A. M. McLavy. Incumbent's commission expires May 5, 1928.

Edgar F. Brungardt to be postmaster at Victoria, Kans., in place of F. B. Brungardt, deceased.

KENTUCKY

John P. Lawton to be postmaster at Central City, Ky., in place of J. P. Lawton. Incumbent's commission expired January 17, 1928.

MAINE

Roy A. Evans to be postmaster at Kennebunk, Me., in place of R. A. Evans. Incumbent's commission expires May 5, 1928.

Lyman E. Stinson to be postmaster at Stonington, Me., in place of L. E. Stinson. Incumbent's commission expires May 5, 1928.

MICHIGAN

Laurence C. Snyder to be postmaster at Blanchard, Mich., in place of L. C. Snyder. Incumbent's commission expires May 5, 1928.

MINNESOTA

Fred J. Page to be postmaster at Cusson, Minn., in place of F. J. Page. Incumbent's commission expires May 5, 1928.

Thomas Considine to be postmaster at Duluth, Minn., in place of Thomas Considine. Incumbent's commission expired April 21, 1928.

MISSISSIPPI

Charles Kramer to be postmaster at Stonewall, Miss., in place of Charles Kramer. Incumbent's commission expired December 19, 1927.

NEBRASKA

William I. Tripp to be postmaster at Belvidere, Nebr., in place of W. I. Tripp. Incumbent's commission expired April 7, 1928.

Hannah Price to be postmaster at Bennet, Nebr., in place of Hannah Price. Incumbent's commission expired April 25, 1928.

Harold L. Mackey to be postmaster at Eustis, Nebr., in place of H. L. Mackey. Incumbent's commission expired April 25, 1928.

Charles C. Cramer to be postmaster at Hardy, Nebr., in place of D. A. Page. Incumbent's commission expired December 19, 1927.

Arthur H. Logan to be postmaster at Ponca, Nebr., in place of A. H. Logan. Incumbent's commission expired April 25, 1928.

Albert E. Pratt to be postmaster at Tobias, Nebr., in place of A. E. Pratt. Incumbent's commission expires May 5, 1928.

NEW YORK

Thomas C. Richardson to be postmaster at Auburn, N. Y., in place of T. C. Richardson. Incumbent's commission expires May 5, 1928.

Adam Metzger to be postmaster at Callicoon, N. Y., in place of Adam Metzger. Incumbent's commission expired January 9, 1928.

Nellie Fredricson to be postmaster at Cornwall on the Hudson, N. Y., in place of Nellie Fredricson. Incumbent's commission expires May 5, 1928.

L. Frank Little to be postmaster at Endicott, N. Y., in place of L. F. Little. Incumbent's commission expires May 5, 1928.

Ralph D. Sanford to be postmaster at Hammondsport, N. Y., in place of R. D. Sanford. Incumbent's commission expires May 5, 1928.

Mary A. Blazina to be postmaster at Harrison, N. Y., in place of M. A. Blazina. Incumbent's commission expires May 5, 1928.

Harry M. Lanpher to be postmaster at Lowville, N. Y., in place of H. M. Lanpher. Incumbent's commission expires May 5, 1928.

J. Frank Smith to be postmaster at Patterson, N. Y., in place of J. F. Smith. Incumbent's commission expires May 5, 1928.

Austin E. Hummel to be postmaster at Prattsville, N. Y., in place of A. E. Hummel. Incumbent's commission expires May 5, 1928.

George A. Hager to be postmaster at Watertown, N. Y., in place of G. A. Hager. Incumbent's commission expires May 5, 1928.

Thomas Wheatcroft to be postmaster at Watervliet, N. Y., in place of Thomas Wheatcroft. Incumbent's commission expires May 5, 1928.

Charles J. Ryemiller to be postmaster at West Sand Lake, N. Y., in place of C. J. Ryemiller. Incumbent's commission expires May 5, 1928.

Mabel Parker to be postmaster at Yulan, N. Y. Office became presidential July 1, 1927.

NORTH CAROLINA

Ocie O. Freeman to be postmaster at Gates, N. C., in place of O. O. Freeman. Incumbent's commission expires May 5, 1928.

Lucile L. White to be postmaster at Salemburg, N. C., in place of L. L. White. Incumbent's commission expires May 5, 1928.

NORTH DAKOTA

Redmond A. Bolton to be postmaster at Jamestown, N. Dak., in place of R. A. Bolton. Incumbent's commission expired April 19, 1928.

John W. Campbell to be postmaster at Ryder, N. Dak., in place of J. W. Campbell. Incumbent's commission expires May 5, 1928.

OHIO

Ralph B. Troyer to be postmaster at Continental, Ohio, in place of R. B. Troyer. Incumbent's commission expired April 28, 1928.

Irvin F. Sherman to be postmaster at Deshler, Ohio, in place of I. F. Sherman. Incumbent's commission expires May 5, 1928.

OKLAHOMA

Stephen M. Gold to be postmaster at Indianola, Okla., in place of S. M. Gold. Incumbent's commission expires May 5, 1928.

Isaac W. Linton to be postmaster at Jones, Okla., in place of I. W. Linton. Incumbent's commission expires May 5, 1928.

OREGON

George B. Bourhill to be postmaster at Moro, Oreg., in place of G. B. Bourhill. Incumbent's commission expired May 1, 1928.

PENNSYLVANIA

Lionel W. Stevens to be postmaster at Knoxville, Pa., in place of L. W. Stevens. Incumbent's commission expired January 22, 1928.

Robert H. Wilson to be postmaster at Littlestown, Pa., in place of E. B. Collins. Incumbent's commission expired January 8, 1928.

Isaiah H. Stauffer to be postmaster at Millersville, Pa., in place of I. M. Stauffer. Incumbent's commission expires May 5, 1928.

Seth E. Sterner to be postmaster at Montgomery, Pa., in place of S. E. Sterner. Incumbent's commission expired January 22, 1928.

Thomas B. Painter to be postmaster at Muncy, Pa., in place of T. B. Painter. Incumbent's commission expired January 24, 1928.

Ray J. Crowthers to be postmaster at West Elizabeth, Pa., in place of R. J. Crowthers. Incumbent's commission expires May 3, 1928.

Lewis E. Knapp to be postmaster at Westfield, Pa., in place of L. E. Knapp. Incumbent's commission expired January 22, 1928.

John M. Kotch to be postmaster at Beaver Meadows, Pa. Office became presidential July 1, 1927.

SOUTH CAROLINA

Clarence L. Knight to be postmaster at Ellenton, S. C., in place of J. B. Bagnal, removed.

SOUTH DAKOTA

Ralph L. Hazen to be postmaster at Canistota, S. Dak., in place of R. L. Hazen. Incumbent's commission expired February 8, 1928.

Pius Boehm to be postmaster at Stephan, S. Dak., in place of Pius Boehm. Incumbent's commission expires May 5, 1928.

TEXAS

Charles W. Ford to be postmaster at Gatesville, Tex., in place of C. W. Ford. Incumbent's commission expires May 14, 1928.

Carroll T. Coolidge to be postmaster at Pasadena, Tex. Office became presidential July 1, 1927.

UTAH

Andrew Adamson, jr., to be postmaster at North Salt Lake, Utah, in place of Andrew Adamson, jr. Incumbent's commission expires May 5, 1928.

VERMONT

Charles A. Robinson to be postmaster at Milton, Vt., in place of C. A. Robinson. Incumbent's commission expires May 5, 1928.

Sheridan P. Dow to be postmaster at Sheldon Springs, Vt., in place of S. P. Dow. Incumbent's commission expires May 5, 1928.

VIRGINIA

George A. Chrisman to be postmaster at Christiansburg, Va., in place of W. F. Walters, removed.

WYOMING

William G. Haas to be postmaster at Cheyenne, Wyo., in place of W. G. Haas. Incumbent's commission expires May 5, 1928.

## CONFIRMATIONS

*Executive nominations confirmed by the Senate May 2, 1928*

UNITED STATES MARSHAL

Thomas Bolton to be United States marshal, district of Montana.

APPOINTMENTS, BY TRANSFER, IN THE ARMY

Frank Henry Hollingsworth to be captain, Field Artillery.
Edward Fearon Booth to be second lieutenant, Air Corps.
Robert Wells Harper to be second lieutenant, Air Corps.

APPOINTMENTS, BY PROMOTION, IN THE ARMY

Frederick Sion Young to be colonel.
Thomas Samuel Moorman to be colonel.
Philip Henry Worcester to be lieutenant colonel.
George Veazy Strong to be lieutenant colonel.
Sereno Elmer Brett, Infantry, to be major.
William Dennison Alexander to be major.
Timothy Sapia-Bosch to be captain.

Edward Garrett Cowen to be captain.
Ralph Christian Bing to be first lieutenant.
Clinton John Harrold to be first lieutenant.

POSTMASTERS

DELAWARE

William H. Evans, Newark.

GEORGIA

Vera H. Cummings, Warthen.

LOUISIANA

Nettie Sojourner, Amite.
Minnie M. Baldwin, Bernice.
John A. Moody, Cotton Valley.
Vera M. Canady, Eros.
Harry Preaus, Farmerville.
David S. Leach, Florien.
Edward A. Drouin, Mansura.
J. Wiley Miller, Many.
Edwin J. LeBlanc, Melville.
William F. Hunt (Mrs.), Meridian.
Otto J. Gutting, Oil City.
Teakle W. Dardenne, Plaquemine.
James H. Gray, Pollock.
Avenant Manuel, Ville Platte.
Samuel A. Fairchild, Vinton.
Keary E. Ham, Wilson.

MASSACHUSETTS

Mary M. Langen, Lancaster.

MISSOURI

John M. Mathes, Aurora.
Charles F. McKay, Knox City.
Edward F. Walden, Morehouse.
Frank L. Mertsheimer, Pleasant Hill.

NEBRASKA

Milton R. Cox, Arapahoe.
Arvid S. Samuelson, Axtell.
Walter G. Mangold, Bennington.
Robert J. Boyd, Trenton.

NEW JERSEY

William M. Matthews, Berlin.
Raymond Johnson, Riverside.
G. Raymond Beck, Roebling.
Alfred T. Kent, Summit.

NORTH CAROLINA

Annie L. Stanton, Stantonburg.

VIRGINIA

Elroy Shelor, Meadows of Dan.
Richard F. Hicks, Schuyler.

## HOUSE OF REPRESENTATIVES

### WEDNESDAY, *May 2, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Again, our blessed Heavenly Father, the clouds hang low and the shadows, dull and dreary, fall on our reluctant path. We wonder what day of the week, we wonder what night of the year when our idols of earth shall shatter and we shall know just what the human heart has to bear. Our brother and friend, the conscientious and capable servant of state, has closed his eyes in death and gone out in silence. Shaking off in strange, resistless power, so swift the flight, so sudden the fall, and swept beyond the boundary of the stars and touched eternity. Oh, God is God, and somehow, some way, His plans will work out, and he who does his best shall never mourn in vain. The heart-stricken family. Oh, the deep fountains of grief from which their sorrows flow! Oh, be with them, dear Lord, as their mute hearts go out to Thee and as their feet are summoned to tread a way so hard and lonely. Comfort their poor, sick hearts and take them to Thy breast. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 10151. An act to amend section 9 of the Federal reserve act.

The message also announced that the Senate had passed bills of the following title, in which the concurrence of the House of Representatives was requested:

S. 1769. An act for the relief of the legal representative of the estate of Haller Nutt, deceased; and

S. 2720. An act for the relief of David McD. Shearer.

The message further announced that the Senate had passed the following resolution:

Senate Resolution 218

*Resolved*, That the Senate has heard with profound sorrow the announcement of the death of Hon. THADDEUS C. SWEET, late a Representative from the State of New York.

*Resolved*, That a committee of 10 Senators be appointed by the Presiding Officer to join the committee appointed on the part of the House of Representatives to attend the funeral of the deceased Representative.

*Resolved*, That the Secretary communicate these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

*Resolved*, That as a further mark of respect to the memory of the deceased the Senate do now adjourn.

The message also announced that pursuant to the foregoing resolution the Presiding Officer had appointed Mr. COPELAND, Mr. WAGNER, Mr. CURTIS, Mr. ROBINSON of Arkansas, Mr. BINGHAM, Mr. REED of Pennsylvania, Mr. HALE, Mr. WALSH of Massachusetts, Mr. SWANSON, and Mr. EDWARDS members of the committee on the part of the Senate to attend the funeral of the deceased.

THE DAIRY INDUSTRY IN THE SOUTH

Mr. BUSBY. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on a subject akin to the subject of agriculture, being the subject of the dairy industry in the South.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi

There was no objection.

Mr. BUSBY. Mr. Speaker, the eye of the dairying industry of the Nation is being cast over our country for the most favored fields in which to economically and advantageously develop that industry.

In very recent years the dairying industry has looked over the Southland and there has discovered those essential elements so necessary to its most advantageous operation. There it has found a sunny climate but a section where the temperature in the summer months rarely goes higher than 95 degrees. It has found long grazing seasons, mild winters, inexpensive grazing lands, and amply supply of water and running streams—all provided by nature as aids to this great industry which must grow to supply a large part of the sustenance of the Nation.

Southern dairymen are following the trail of the dairy cow to farm stability and community prosperity it is indicated by a survey of the 16 Southern States showing the growth of dairying in the South to a farm value estimated at easily $275,000,000 as against $230,036,832 estimated by the Bureau of the Census for this group of States in 1925.

That this figure will be considerably increased in 1928 is the conviction of those watching the remarkable flood into the South of new capital from manufacturers of dairy products of other sections, who are beginning to show keen interest in the dairying possibilities of the Southern States.

In this light it is easy to understand that the future of dairying development in the States below the Ohio River in 1927 is more secure than at any time since the cotton-growing States first actively launched forth upon dairying enterprises 15 years ago in the face of the boll weevil's relentless march from the Texas border to the northernmost boundaries of the cotton States.

Last year's growth in farm value of dairy products is not the significant feature of the outlook for this industry's growth in the South; the coming in of new dairying capital is the development causing observers of this industry to believe that the tide of America's mighty dairying industry at last has set forth on a southward trend just as the cotton-mill industry earlier picked out the South as offering conditions altogether more favorable to its success.

In the South's record of dairying progress, the year 1927 will go down as the year of the coming in of the condenseries and cheese factories. While one milk condensery was established at Starkville, Miss., in 1926, and a few Southern States a few years ago began to interest themselves in cheese-manufacturing possibilities, it was in 1927 that leading manufacturers of cheese and condensery products from other sections of the country began a deluge of investments that yet will grow into several millions, in the opinion of those closely following this

trend, among them L. J. Folse, general manager of the Mississippi State Board of Development, who estimates that dairy manufacturing projects begun in 1927 and 1928 will approximate $2,500,000 in Mississippi alone before the year is out—this in investment in plants and equipment, to say nothing of corresponding growth in investments in cows and farm equipment to keep pace.

Impressed with the success of the Borden Condensery at Starkville, erected at a cost of $750,000, the Carnation Milk Products Co., Oconomowoc, Wis., one of the largest condensery manufacturers of the Nation, erected a $500,000 plant at Tupelo, Miss., in the spring of 1927, followed by another plant at Murfreesboro, Tenn., in the summer of 1927, the Pet Milk Co., in 1927, established condenseries at Mayfield and Bowling Green, Ky., and Greenville, Tenn., and early in 1927 had begun erection of a condensery at Kosciusko.

The Borden Co. followed up the successful operation of its Mississippi plant in 1927 by erecting plants at Lewisburg and Fayetteville, Tenn., in 1927.

The coming of the cheese factories to the South followed early efforts to build up a cheese industry in this section through local enterprise, Georgia and North Carolina made bids in the cheese industry a few years ago, and in 1927 the Mississippi State Board of Development cooperated with the Yazoo City Chamber of Commerce in establishing at Yazoo City the first cheese factory operated in Mississippi.

Then followed surprising interest in the Southern States on the part of the Kraft Cheese Manufacturing Co., the Barber Cheese Co., the Phenix Cheese Co., and other large dairy-products manufacturers of the Nation. The Kraft Co. is expected to run its 1927 investments in the South to more than $1,000,000, having picked out sites in Mississippi, Alabama, and Tennessee.

The Barber Co. has established headquarters at Columbus, Miss., where a $50,000 central manufacturing plant is being completed at this time. Twelve miles away, at Billups Station, the same company has completed a plant with a capacity of 20,000 pounds of milk a day, or 2,000 pounds of cheese. The plant at Columbus is to be one of the largest cheese factories established anywhere and can be expanded from its original capacity of 50,000 pounds of milk, or 5,000 a day, to ten times this amount; and it is significant that officials have purchased adjacent property with this thought in mind. While there is no official announcement, this company is known to be planning other plants in Mississippi, Alabama, and possibly in Tennessee.

While last year's activities in dairying development seemed to center in Mississippi, which State has grown from a farm value of dairy products estimated by the Government at about $11,000,000 in 1925 to an estimated value of $18,000,000 or $20,000,000 in 1927, other Southern States likewise are improving their opportunities in dairying and almost without exception are showing marked progress.

While Government estimates placed Georgia's creamery production at 1,982,000 pounds in 1926, a survey shows that State's creamery output in 1927 was around 5,500,000 pounds. State officials believe the Government's 1926 estimate was less than half that State's actual butter production, and records show that Georgia increased in amount of butterfat sold from 4,687,000 pounds in 1926 to 6,300,000 pounds in 1927, with an increase in whole milk to 44,000,000 gallons from 40,500,000 gallons the preceding year.

The farm value of dairy products for that State is estimated at $23,334,500, as against $22,875,876. In the opinion of Milton P. Jarnagin, of the Georgia State College of Agriculture, dairying is on a much firmer foundation in that State, for—

A recent survey of 200 typical dairy farms showed satisfactory net returns were being obtained from virtually all classes of dairy farms. Our farmers are improving pastures, growing a greater percentage of feed required, buying purebred bulls. Dairying is now on a substantial basis, and I believe each year will show material expansion and development.

Maryland is seen to have grown substantially in number of cows and in value of cows. A 7 per cent increase in cows for Kentucky is noted, and in the past year dairy heifers from 1 to 2 years old increased from 67,000 to 74,000. The State's dairy production is estimated at between $20,000,000 and $25,000,000, a substantial increase over $18,225,120, estimated for 1927. While dairying as a whole lost ground in South Carolina in the period from 1920 to 1925, it is seen to be on the upgrade since 1925. On January 1, 1928, there were 20,000 more cows than a year before, and of the 1,688,000 cows in the State, it is estimated that 53,000 produce milk used in some form of commerce. While census figures show no increase for dairy cows in Texas, Prof. J. A. Clutter, of the University of Texas, figures the average production for each cow is increasing and probably exceeds 3,000 pounds a year now. It is estimated that Texas produced 48,000,000 pounds of farm butter in 1927, sold 15,000,000 pounds of butterfat to creameries, 850,000 gallons of cream, and 36,000,000 gallons of whole milk, with a total value of dairy products estimated at $45,000,000, as against $33,442,933 estimated by the Government for 1925.

The number of cows in Missouri increased to 827,000 in 1927, and creamery production is estimated at 73,000,000 with the total farm value of dairy products estimated at $65,000,000. Alabama's creamery output in 1927 is estimated at well in excess of 2,000,000 pounds, although the Government's 1926 estimate was slightly less than 1,000,000 pounds. Arkansas easily manufactured 2,500,000 pounds of creamery butter in 1927, a gain of more than 1,000,000 pounds over the 1926 estimate. Georgia is estimated to have produced approximately the same amount. Kentucky's production is estimated at 22,000,000 pounds; Maryland, 1,000,000 pounds; Mississippi, 8,000,000 pounds; Oklahoma, 23,000,000 pounds; South Carolina, 1,000,000 pounds; Tennessee, 15,000,000 pounds; Texas, 18,500,000 pounds; Virginia, 6,500,000 pounds; and West Virginia about 1,000,000 pounds. Florida and Louisiana have negligible creamery production, although the latter State is laying ambitious plans to drive out the cattle tick and follow the good example of surrounding States that are rapidly advancing in dairying.

The almost south-wide movement now taking shape for tick eradication causes many to expect speedy elimination of this pest and an extraordinary course of dairying development for the Southern States, particularly in view of the growing interest of dairy products manufacturers of other States in this section—an interest it is significant to note—that developed fullest after steps had been taken to wipe out the tick from Mississippi and other Southern States.

Coming now to my own State of Mississippi, I desire to particularize concerning the development of the dairying industry there. By far the major portion of this development has come to us within the last two or three years.

As already stated, an estimate made by Mr. L. J. Folse, general manager of the Mississippi State Board of Development, at Jackson, Miss., shows that projects begun in 1927 and in 1928 will approximate an investment of $2,500,000 for dairying plants alone for these years. This does not take into consideration the additional dairying stock, improvement in dairying herds, or anything pertaining to the production of milk.

I quote from a letter received from Mr. Folse, dated April 30, 1928, as follows:

*Summary of the industry in Mississippi*

| | |
|---|---|
| Condensed-milk plants | 4 |
| Cheese plants | 11 |
| Creameries | 31 |
| Skimmed-milk plants | 6 |
| Ice-cream plants | 61 |
| Dried buttermilk plants | 4 |
| Semisolid buttermilk plant | 1 |
| Whole-milk shipping stations | 6 |
| Whole-milk distributing stations | 5 |

The dairy progress in Mississippi can best be stated by these facts:

In 1912 Mississippi produced one-half ounce butter per minute, for which it received 1 cent. In 1927, 6 pounds butter, for which it received $3.73. In 1928, 14 pounds of butter, for which it received $6.50.

With the magnificent showing that is being made in Mississippi, and likewise in all the other Southern States, in developing the dairying industry, I believe that this section of the country offers such advantages—cheap grazing lands, warm climate, long grazing periods—that the drift of the dairying industry to the South is permanent and is destined to become one of our outstanding economic institutions.

ADDRESS OF SENATOR BORAH, OF IDAHO

Mr. SMITH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by printing a speech of Senator BORAH before the Hamilton Club in Chicago Saturday last.

The SPEAKER. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. SMITH. Mr. Speaker, under consent given by the House to extend my remarks, I wish to insert in the RECORD the address of Hon. WILLIAM E. BORAH, Senator from Idaho, before the Hamilton Club, Chicago, Ill., on the 28th ultimo. In view of the esteem in which Senator BORAH is held by the people of the country, this address should be preserved in the RECORD.

The speech is as follows:

PARTY RESPONSIBILITY

Mr. President, this is the year of the great election, a year in which candidates and political parties will ask for the commendation and confidence of the great American electorate. It is the most interesting and impressive event which takes place in the political affairs of our people. The world offers no more absorbing and inspiring scene than

that of 120,000,000 people selecting their President—the executive head of their Government. And no king, no ruler, anywhere on this earth is clothed with the power which the President of the United States enjoys. There are none whose influence for ill or for good exceeds the influence of the Chief Magistrate of the American Nation. He has been intrusted with an authority which, for weal or woe, has no parallel and has had but few precedents. It is an expanding power and with indifference upon the part of the people, it could soon become an absolute power. There is, there can be, therefore, no more exacting test of a people for self-government than the faithful and intelligent performance of this obligation thus imposed by the Constitution under which we live and commanded by the liberty which we would preserve.

The political parties facing each other in this campaign are historic parties. The humblest supporter of either will have no trouble in recalling the great leaders of his party and their achievements or the policies and theories of government which in the past have distinguished one from the other. We need not, as Democrats or Republicans, vie with each other in extolling the achievements of the past—they are secure. There is ample in the records of either party to arouse the pride and stir the patriotism of all true Americans. We can neither augment nor diminish the luster of past party deeds. Our task is with the present. The worth and the commendation of either party depend upon what it proposes to do now, depend upon the merits of the program with which it proposes to deal with present problems. Encomiums and denunciations, eulogies and criticisms will no doubt have their place in the campaign, but an inconsequential place, and, after all, prosaic place; for it is the present and what we propose to do with our own living questions which engage the attention and grip the hearts and minds of those whose favor we covet and whose judgment we now await.

Mr. President, the approaching contest for party supremacy promises to be an interesting one. I trust it may be. As a Republican, but more as a citizen, I watch its coming with uncommon enthusiasm. I see, or seem to see, an aroused and deeply interested electorate. Nothing could be better for the country. Nothing is more imperative. Organization has its place and I neither discard it nor decry it. But popular interest, a keen, searching, vigilant electorate is indispensable to clean government and sound policies. Ours is the best of governments when the people are vigilant. It is the worst of governments when the people are indifferent. We all rejoice, therefore, in the sign of renewed concern upon the part of those whose government this is. It means a cleaner and more responsive government. It means issues clearly stated and candidly met. It means just and equal laws, sincerely and courageously enforced. It means constitutional government respected and upheld. It means corruption driven from its lair in public places. When those out yonder in the open, out there where men and women have to meet and deal with the austere realities of life, where men and women ask of their Government nothing more than wise measures and sound policies, when those out there in the streets, in the factories, and on the farms bestir themselves in the public interests, the great campaign for the Presidency is the most interesting and the most assuring spectacle which takes place in politics, in any land, or under any government. Above all things, give us an aroused people and a fighting campaign. That is the beginning of all things worth while in American politics. The country needs again the kind of political warfare in which the voter demands some evidence of the fitness, some evidence of the sincerity, of candidates beside that of the party label, demands some justification for party fealty aside from the declarations and doings of the party fifty or a hundred years ago; that kind of political warfare in which the voters demand consideration of living issues and concrete programs for the problems of the hour. That is what made the campaign of 1828 forever memorable and its results forever justified. That is what lifted the great political battle of 1860 into the region of the sublime and baptized a nation with that moral fervor which finally melted the last shackle from every human being under the flag. In such times political candidates speak plainly to the people in language they understand of subjects in which they are deeply concerned. In such times "of difficulty and danger" partisan "flattery and falsehood can no longer deceive and simplicity itself can no longer be misled."

Both the old parties have had great periods—heroic days. I will not pause to recall them. They come readily to your memory. What made them great? What is there about those periods to which not only every partisan in his zeal, but every American in his pride, often and devotedly recurs? All Republicans, as well as all Democrats, recall with gratification and enthusiasm the marvelous story of Andrew Jackson. All Democrats, as well as all Republicans, recall the administration of Abraham Lincoln, wrestling with the problems of a dissevered nation, finally saving it through his unfailing wisdom and reuniting it with his undying love. It is a new doctrine, sirs, that moral questions have no place in party politics and should find no expression in party platforms. These men and those of their day thought otherwise. It is a strange and modern teaching that constitutional integrity is not a matter for party concern and pledges to uphold it when assailed are not worthy of a place in the creed of the party. These men and those of their day thought otherwise. Tariff had its place, business was not neglected, economy was not only preached but practiced, party success, then as now was zealously sought, but the great underlying, driving power was the moral problems of the hour and the upholding and preserving in all its integrity and all its strength and worth of the Constitution under which we live. They were not afraid of questions like these and they neither hesitated nor sought to avoid them because of the difficulty of estimating the number of votes for or against. No stronger partisans ever lived than these men. No greater party leaders have ever appeared in the politics of our country. But they neither compromised with moral problems nor surrendered to those who challenged the great charter of the Republic. These days which you and I, as partisans and as Americans are glad to recall, are the days in which were fought the great battles for constitutional government and for the upbuilding—intellectually, morally, and physically—a people upon whose shoulders could safely rest the weight and within whose wisdom could be safely intrusted the preservation of representative democracy. "Lord God of hosts! Be with us yet! Lest we forget! Lest we forget!"

I have been asked to say something this evening about the future of the Republican Party. I am not disposed to enter the rôle of a prophet. But I am not averse to expressing my views upon some matters which should, and I believe do, concern the party and with which it must inevitably deal. I say some matters with which the party must inevitably deal; for there are subjects now before the public relative to which millions of Republicans do not intend to keep the peace. When the public conscience is uneasy, it is time to be frank. When Illinois grows restless the country is on the verge of a riot.

Internal party troubles always give rise to two classes of partisans differing radically as to how to weather the storm. There are those who are willing to look facts in the face, condemn wrongdoing in the party as well as out of the party, call together the forces of straight thinking and right acting, and face the future with a purpose and with a program. These people believe in their party, believe in its principles, but are unwilling in the name of the party to protect or condone those who have betrayed the public. There is another class who may be properly styled "Wait till the storm blows over." Class? This class has been immortalized, properly immortalized, in a famous cartoon from the inspired pencil of Thomas Nast. You may recall it. Connolly, a name still prominent in the politics of New York City, Hall, Sweeney, and Boss Tweed are perched like obscene birds of prey against a beetling cliff, their claws fastened upon the skeletons of their victims, the forked lightning of public wrath splintering the rocky crags about them—slinking, silent; they are waiting for the storm to blow over. It did blow over and took them with it. This class of politicians feel no indignation because the public has been robbed and because a great party has been humiliated and discredited. They are interested solely in promoting their personal ambitions and in the length of the public memory.

The world will judge the Republican Party not by what took place prior to the recent exposures, but by the course and conduct of the party after the exposures. Nothing could be worse than the conditions lately uncovered at Washington. No one should underestimate the searching significance of these faithless and sordid transactions and no one can overstate the profound issues which they present for the consideration of the American people. But it is my contention that the future of the Republican Party and its possibility of service to the public depend not upon what a few men did in secret and without the slightest knowledge of the voters of the party, but upon what you and I and all Republicans, knowing the facts, advised of the treachery and warned of the evils, propose to do next, and in the open. Against the secret machinations of unscrupulous men, neither business nor political organizations can at all times defend. But when the deeds stand uncovered and the practices are known, the simplest and most primary principles of honesty and decency will repudiate the acts and reject the fruits and renounce the obligations of the crime. Calvin Coolidge, as the Republican candidate for President, received 15,725,016 votes. Of this number at least 15,725,000 Republican voters are guilty of no wrong, uncorrupted and incorruptible, and ready to fight for clean government and Republican principles. This is the Republican Party in which I am interested, and of which I speak to-night, and against whose fidelity to principles and devotion to country no one will dare to inveigh. All that these voters are asking for, or waiting for, are courageous leaders, clean candidates, decent organizations, and a platform of principles. Give them these and they will demonstrate that the Republican Party belongs to neither crooks nor cowards—refuse them these things and I leave the future to tell its own story. In such an event I do not seek to penetrate the veil.

Corruption will undoubtedly be one of the issues of this campaign. We can not avoid it if we would and we should not avoid it if we could. There are those, of course, who will charge that the party as a party has forfeited its right to the confidence of the American people. In such an event there will be those who will retort by hunting out the evidence to show that there are corrupt Democrats. The Queensboro scandal in New York and the oil scandal will take their places in cam-

paign literature. Teapot Dome and Tammany Hall will be weighed against each other on the hustings, and the voters will be urged to decide between acute and chronic corruption. But I beg the Republican Party to believe that the issue in which the people are interested is broader and deeper. The American people divide into parties, but whether Democrats or Republicans, they are first and above all devoted to our Government. The issue is, as they see it: Shall the people have clean government and clean politics; how is it proposed to protect the interests of the people against the domination of selfish and criminal influences in the affairs of government and in the domination of parties? The improper use of money in politics presents a problem as broad and deep and vital as representative democracy itself, and the people know it. Partisan fencing will not satisfy them. Purity of the ballot and integrity of officials are the beginning and the end of popular government. Without these the people are disfranchised and, sooner or later, become the victims of exploitation and oppression, and this they know. The fight for clean government is a fight for free government. This the people perfectly understand. The issue is here. It is a notorious fact that the officials of great cities, who hold in their keeping the decency and health of millions of men and women and children, go into partnership with crime and lawlessness. It is now notorious that the governors of great States, trusted executives of great and noble Commonwealths, barter their State's honor for a few paltry dollars, that men high in the Federal Government consort with those who seek the Nation's wealth, that venality has left its filth in the exalted precincts of Federal power. The issue is here. It is no ordinary condition. It is no ordinary situation. The future of our party turns upon how we propose to meet it. Timidity has no place in such a fight. Silence is accessory after the crime. Retention of corrupt funds while talking about clean politics is an insult to the intelligence of the voter. If those in places of leadership shirk their responsibility, they not only bring discredit to themselves but they betray the millions of men and women who over and over again have attested their devotion to our Government and in many a well-fought campaign have evinced their loyalty to the policies and principles of the party. We need not have the least uneasiness about support from the people. They will respond to any sincere and fearless effort to lift the Republican Party to the level of the demands of the hour. In the last interview of that celebrated American, Chauncey Depew, who had lived nearly a century through the most stirring period of the world's history, he said: "Democracy was better 50 years ago. Lincoln went before the people on a big moral issue that was tremendously interesting to thousands of young men." There is, there has been, there can be no greater moral issue in American politics than clean government, than a pure ballot, than the preservation against lawlessness, against selfishness and greed, the only real Republic that has ever existed on this earth. Let us imitate our first great leader.

Mr. President, the three great political parties in party history have been the Liberal Party of England, the party of Gladstone and Asquith, and Lloyd-George; the Democratic Party, the party of Jefferson, Jackson, and Cleveland, and Wilson; the Republican Party, the party of Lincoln, and Grant, and Seward, and Sumner, and Garfield, and McKinley, and Roosevelt. It will not be regarded as immodest for a partisan to claim that the Republican Party does not suffer in comparison with either or both. Its story is interwoven with the story of our national growth and advancement of the last half century. Its leaders have taken their place among the liberators and lawgivers and administrators of all time. Its policies and precepts have been built into institutions and written into laws and constitutions. The questions and problems of this day which now confront the party are no less vital, no less commanding, than the questions and problems of former days. The voters, the rank and file of the party, are no less intelligent, no less devoted to wise measures and good government. The issues are before us, the people await their presentation. The times and the occasion persist for great causes. And it is my judgment that the future of the Republican Party is merely a test of leadership. The perils of political parties ordinarily lie not among the voters and the people but are found in the organizations and among the leaders.

The Federalist Party, with its galaxy of brilliant leaders, lost touch with the people, disregarded their individual rights and liberties, and it perished. The Democratic Party, with Jefferson as its leader, took its place in the administration of Government. The Whig Party was wrecked and disappeared utterly, in consequence of a contempt for the inflexible integrity of the moral code upon the part of those who in a critical hour dominated its councils. The Republican Party, with Abraham Lincoln as its leader, took its place. Opinions alter, times change, material issues come and go, but the moral law and the great fundamental principles of right and decency do not change—they still have their place in the purposes and plans and hearts and minds of the American people. I would not overlook the great questions which make for our material welfare. Our tax laws; our revenue laws; economy in Government; the rehabilitation of the farm; the control of our rivers; the staying of the growth of bureaucracy, arbitrary as fascism, demoralizing as communism; the conservation of the Nation's natural wealth; coal; oil; power; all these are of great moment and of great interest to the American people. But I would place above them all in the platform and in the program and in the purposes of the party, as first in imminence and first in importance, a pure ballot, a clean government, and the integrity of the Constitution under which we live.

This club takes its name from one of the most gifted men who ever dealt with the science of government. Washington, Hamilton, and Jefferson, and in that period there is no fourth to be placed along with these. There are other names of imperishable luster, but these three hold a place apart. A short time before his fatal wounding upon the field of Weehawken, when planning how best to meet the machinations of his most unscrupulous foe, he wrote to a friend outlining his views and pleading for a great organization which would reach into every part of the country and gather the nobler elements of American life and discipline them against the enemy of orderly and constitutional liberty. In this letter he said: "Let an association be formed to be denominated 'The Christian Constitutional Society,' its objects to be, first, the support of the Christian religion; second, the support of the Constitution of the United States."

When we think of Hamilton we think of him at the age of 17, defending with rare skill and ability the rights of the colonists; at the age of 23 outlining in his letter to Duane his views on government; his great battle in the New York State convention for the ratification of the Federal Constitution; his report on the public credit. But in none of these instances does he disclose higher qualities of statesmanship than when he outlined to his friend the true basis of political power under our form of government and the only guarantee of permanency of our institutions. I repeat, we may talk tariff, preach economy, plan for prosperity, and all these things which make for dollars and cents. But is that all? Is that the only and the highest element in our national purpose and life? Shall we stop there? Is that the full aim and end of party? Is this the final goal of our boasted higher civilization? We know, as we look back over the last few years, we know as we trace the slimy wriggling of corruption through the corridors of government, that it is not all, that there is something more essential, something more vital. And the people know that it is not all. Along with these things, and not in conflict with them, but an essential part of them politically, are the great moral problems of the people and the constitutional questions where alone orderly liberty dwells. Organization, party strategy, the card index, and the check book will claim their place. But nothing has ever been as controlling with the American people as the simple power of great principles.

You will hear it said in these days that democracy as a form of government is breaking down—that upon the complicated questions of modern industrial life the people can not successfully pass. We need not debate that question now. But make no mistake, that upon the great questions which involve national honor and public decency the people have an interest that is insatiable and an instinct that is sure.

### LINCOLN ELLSWORTH

Mr. BURTON. Mr. Speaker, I ask unanimous consent to take from the Speaker's table and consider the bill (S. 3919) awarding a gold medal to Lincoln Ellsworth.

The SPEAKER. The gentleman from Ohio asks unanimous consent to take from the Speaker's table the bill S. 3919. The Clerk will report the bill.

The Clerk read the bill, as follows:

*Be it enacted, etc.*, That the President of the United States is hereby authorized to present a gold medal to Lincoln Ellsworth, the distinguished American explorer, who, by his conspicuous courage, sagacity, and perseverance made his famous polar flight of 1925, and the transpolar flight of 1926.

SEC. 2. That the President of the United States is hereby authorized to receive, in the name of the Nation, the American flag which the said Lincoln Ellsworth took over the top from Kings Bay over the North Pole to Point Barrow and Teller, Alaska.

The SPEAKER. The Chair will ask the gentleman if he takes this action by authority of the committee?

Mr. BURTON. There is no objection presented by the chairman of the Committee on the Library.

Mr. LUCE. No.

Mr. LAGUARDIA. Mr. Speaker, reserving the right to object, this is the same expedition that Mr. Amundsen was on, is it not?

Mr. BURTON. Yes.

Mr. LAGUARDIA. This expedition attracted world-wide attention and are we not following a rather narrow attitude if we simply recognize the efforts of one who happens to be one of our nationals?

Mr. BURTON. It seems to me not. If there were a resolution on behalf of Mr. Amundsen or your own General Nobile, I do not think I should object; but special attention was given to the work of Lincoln Ellsworth. I have here a quotation from the book of Commander Byrd commending him especially and I also have a letter of congratulation from the President.

Mr. LAGUARDIA. There is no doubt about Mr. Ellsworth's participation in this venture and every one recognizes his merit, but I would suggest to the gentleman that he withdraw the bill for the present so that we may look into it somewhat. I believe there is a difference of opinion on it and we do not want to do a small thing. It is something that is of world-wide importance.

Mr. CRAMTON. Will the gentleman yield?

Mr. BURTON. Yes.

Mr. CRAMTON. Has a similar resolution had consideration by the House committee or was it considered by the Joint Committee on the Library?

Mr. BURTON. It has not been considered by the House committee at all, I must say frankly.

Mr. CRAMTON. Mr. Speaker, I have a great deal of sympathy with the gentleman's resolution, but this does not impress me as a wise way for us to legislate, except when there is some clear emergency shown, which does not appear in this case, to bring up legislation that has great appeal but has not been considered by any committee of the House. It seems to me if the gentleman would withdraw his request for the present and let it take its orderly course——

Mr. BURTON. It is now on the Speaker's table, and the achievements of Ellsworth are so great, not only on this expedition over the North Pole but in other things, that it seems to me he is clearly entitled to recognition.

Mr. CRAMTON. But I would say to the gentleman the very fact that the appeal of the gentleman's resolution is so great would mean that he would not have any reason to fear lack of proper consideration in a committee of the House.

Mr. LAGUARDIA. I do not think it is even questioned, but, as I stated before, this was not a one-man expedition. Each one played his important part. One conceived the idea of the airship and attended to the navigation, another contributed scientific knowledge and experience, and another contributed his enthusiasm and finances. All were necessary. Now, let us not do the little thing, and I beg the gentleman to withdraw his request for the present.

Mr. BURTON. It is not so customary in a matter of this kind to vote medals to a foreigner.

Mr. LAGUARDIA. We did that yesterday, did we not?

Mr. BURTON. Sometimes that is done, but we owe recognition first to our own nationals.

Mr. LAGUARDIA. Other countries have recognized our own nationals.

Mr. CRAMTON. Mr. Speaker, these are the very things that a House committee would consider and advise us with respect to them.

Mr. BURTON. It seems no one has considered it worth while to introduce a resolution with regard to the others, so far as I am informed. I know there was some little friction between Mr. Ellsworth and the Italian member of this expedition, and I trust no degree of partiality for the Italian member will cause any objection to be made.

Mr. LAGUARDIA. No.

Mr. BURTON. I must say frankly that the achievement of Mr. Ellsworth was a most notable one. I might read, if I had the time, the reference to him in Commander Byrd's book, which ranked his achievement very high.

Mr. CRAMTON. Mr. Speaker, I have made an appeal to the gentleman which I think is based on proper legislative methods, and it is an appeal I will make to anyone else that brings in any other kind of bill here that has not been considered by a committee of the House, unless a clear emergency is shown. I do not understand there is any emergency or any reason for haste in this case. I do not like to object to it because of my sympathy with the resolution.

Mr. SANDLIN. Mr. Speaker, the gentlemen do not seem to be able to agree upon this matter, and I ask for the regular order.

Mr. LAGUARDIA. Mr. Speaker, the gentleman from Ohio himself has brought in one feature of the case which I regret exceedingly, and for the present I shall object.

The SPEAKER. Objection is heard.

Mr. BURTON. Under unanimous consent, I subjoin a letter from President Coolidge and a quotation from Commander Byrd's new book, Skyward, as follows:

The epochal flight of the *Norge* across the north polar regions did much to wipe out some of the skepticism created by disasters among dirigibles. The Amundsen-Ellsworth-Nobile expedition not only accomplished one of the greatest nonstop flights on record but also performed one of the greatest feats of exploration in all history. It is already apparent that the flight has had a profound and beneficial effect upon aviation in the lighter-than-air field, but when we think that plus that demonstration of the great value of aircraft, those hardy pioneers have performed a tremendous service in exploration, we must conclude that those men have accomplished one of the great feats of our age which will shine through future ages as the feats of Columbus, the Cabots, Magellan, and other great navigators of the past shine through our age.

PAUL SMITHS, N. Y., *July 13, 1926.*

Mr. LINCOLN ELLSWORTH,
*The Century Club, 7 West Forty-third Street,*
*New York City.*

MY DEAR MR. ELLSWORTH: If I were in Washington it would be a great pleasure for me to extend my congratulations to you in person upon your participation in the flight of the *Norge* over the North Pole. But, as I am not receiving here this summer, I shall have to content myself by expressing in a letter my satisfaction that you, an American, should have had a part in so notable an achievement.

Very truly yours,

CALVIN COOLIDGE.

OMNIBUS PENSION BILL

Mr. KNUTSON. Mr. Speaker, I desire to present a conference report on (H. R. 10141) an omnibus pension bill for printing under the rule.

CLAIMS OF THE NORTHWESTERN BANDS OF SHOSHONE INDIANS

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table S. 710, with Senate amendments, and agree to the conference asked for by the Senate.

The SPEAKER. The gentleman from Montana asks unanimous consent to take from the Speaker's table a bill, which the Clerk will report by title.

The Clerk read as follows:

An act (S. 710) conferring jurisdiction upon the Court of Claims to hear, adjudicate, and render judgment in claims which the Northwestern Bands of Shoshone Indians may have against the United States.

The SPEAKER. The gentleman asks unanimous consent to take the bill from the Speaker's table, to insist on the House amendments, and agree to the conference asked for. Is there objection?

Mr. GARNER of Texas. Reserving the right to object, has the gentleman consulted the minority members of the committee?

Mr. LEAVITT. Yes.

Mr. GARNER of Texas. And it is satisfactory?

Mr. LEAVITT. Yes.

Mr. CRAMTON. Reserving the right to object, I would like a statement as to the effect of the Senate amendments. This is a bill to which I offered some amendments, and it passed the House by unanimous consent by reason of those amendments. I would like to know if the House amendments are destroyed by the Senate amendments.

Mr. LEAVITT. The Senate amendments strikes out the House amendments, and we are disagreeing to that action and agreeing to a conference.

Mr. CRAMTON. Is the gentleman prepared to give assurance that the House position will be adhered to?

Mr. LEAVITT. I am not prepared to state that.

Mr. CRAMTON. Then for the present I will object.

EMPLOYEES OF THE INDIAN SERVICE

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 11629 and agree to the Senate amendments.

The SPEAKER. The gentleman from Montana asks unanimous consent to take from the Speaker's table and agree to the Senate amendments, the bill which the Clerk will report by title.

The Clerk read as follows:

A bill (H. R. 11629) to amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service.

The SPEAKER. Is there objection?

There was no objection.

The Senate amendments were read and agreed to.

ONE HUNDRED AND FIFTIETH ANNIVERSARY OF THE CONQUEST OF THE NORTHWEST TERRITORY

Mr. LUCE. Mr. Speaker, I ask unanimous consent for the present consideration of Senate Joint Resolution 23.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent for the present consideration of Joint Resolution 23, which the Clerk will report by title.

The Clerk read as follows:

Senate joint resolution (S. J. Res. 23) providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest

Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779.

The SPEAKER. Is there objection?

Mr. BLACK of Texas. Reserving the right to object, what is the amount of the appropriation involved in the passage of this resolution?

Mr. LUCE. In answer to the question I will first say that this request has been made at the instance of the delegation from Indiana on both sides of the House. The Senate resolution would authorize an appropriation of $1,750,000. The House committee advised that that be reduced to $1,000,000.

Mr. BLACK of Texas. Mr. Speaker, I think bills of this kind should not be taken up by unanimous consent and passed in that manner. I shall feel compelled to object.

Mr. WOOD. Will the gentleman reserve the objection?

Mr. BLACK of Texas. I will.

Mr. WOOD. There is a very great necessity for action on this resolution, for the reason that the Legislature of Indiana has made all provisions for the completion of this work, and if the resolution is not passed at this session it will be absolutely destroyed.

Mr. BLACK of Texas. Well, next Monday is the regular day for unanimous consent and suspension of the rules.

Mr. WOOD. I understand next Monday is District day.

Mr. GARNER of Texas. The trouble is that this resolution will not be reached next Monday. If the gentleman will examine the calendar he will see that it will take two full days to reach the bottom of the calendar.

Mr. BLACK of Texas. It could be reached under suspension of the rule.

Mr. GARNER of Texas. I doubt the propriety of passing legislation like this under suspension of the rule. I would rather it would be considered under unanimous consent.

Mr. BLACK of Texas. That means no consideration at all.

Mr. GARNER of Texas. Yes; you could debate it after getting unanimous consent to consider it if it was thought desirable to debate it. If it is to pass this session, it ought to pass now.

Mr. BLACK of Texas. For the present I object.

### EFFICIENCY OF THE AIR CORPS

Mr. JAMES. Mr. Speaker, I ask unanimous consent that the Committee on Military Affairs be allowed to file a supplementary report on the bill H. R. 12814, to increase the efficiency of the Air Corps.

The SPEAKER. The gentleman from Michigan asks unanimous consent that the Committee on Military Affairs be permitted to file a supplementary report on H. R. 12814. Is there objection?

There was no objection.

### SPEECH OF HON. HENRY ST. GEORGE TUCKER, OF VIRGINIA

Mr. FORT. Mr. Speaker, under the leave granted to extend remarks in the RECORD on the McNary-Haugen bill, I understand that no remarks may be extended except those of a Member himself. I ask unanimous consent to extend my remarks by adding thereto the speech made by the Hon. HENRY ST. GEORGE TUCKER, a Member of this House from Virginia, in 1922.

The SPEAKER. The gentleman from New Jersey asks unanimous consent to print in the extension of his remarks a speech delivered by the gentleman from Virginia [Mr. TUCKER], in 1922. Is there objection?

There was no objection.

Mr. FORT. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following speech delivered in this House August 17, 1922, by Hon. HENRY ST. GEORGE TUCKER, of Virginia:

### THE SUPREME COURT AND THE CONSTITUTIONALITY OF LAWS

Mr. TUCKER. Mr. Speaker, the casual remark of a Member of this House to a friend the other day in my hearing is my apology for trespassing briefly upon the time of the House. The remark which I heard in passing was this:

"I doubt whether this bill is constitutional, but we can pass it up to the courts, and they can decide that question."

I may add that this was not the first time I had heard such a sentiment expressed, nor was it the last time. It is a question of great importance and one about which there seems to be some confusion of thought and of duty.

I think it can be safely stated that the courts will not declare a law unconstitutional unless in their judgment it is plainly unconstitutional beyond a reasonable doubt. A great many decisions of the courts, Federal and State, could be quoted in support of this position. I will give only a few:

In Knox *v.* Lee (12 Wall. 457) the court says:

"A decent respect for a coordinate branch of the Federal Government demands that the judiciary should presume, until the contrary is clearly shown, that there has been no transgression of power by Congress, all the Members of which act under the obligation of an oath of fidelity to the Constitution."

Chief Justice Waite declares in the Sinking Fund cases (99 U. S. 700):

"The declaration [that an act of Congress is void] should never be made except in a clear case. Every possible presumption is in favor of the validity of a statute, and this continues until the contrary is shown beyond a rational doubt."

In Ogden *v.* Saunders (12 Wheat. 213) the court says:

"It is but a decent respect due to the * * * legislative body, by which any law is passed, to presume in favor of its validity until the violation of the Constitution is proved beyond all reasonable doubt."

In Fletcher *v.* Peck (6 Cranch) the court says:

"It is not on slight implication and vague conjecture that the legislature is to be pronounced to have transcended its powers and its acts to be considered as void. The opposition between the Constitution and the law should be such that the judge feels a clear and strong conviction of their incompatibility with each other."

Justice Miller, in the Trade-Mark cases (100 U. S. 96–97), says:

"We adopt this course because when this court is called on in the course of the administration of the law to consider whether an act of Congress or any other department of the Government is within the constitutional authority of that department a due respect for a coordinate branch of the Government requires that we shall decide that it has transcended its powers only when that is so plain that we can not avoid the duty."

See also Osborne *v.* Staley (5 W. Va. 94) and Tate's Executors *v.* Bell (26 American Decisions, 222), where the court says:

"It is here proper to remark that it is with reluctance the court will declare a law unconstitutional; not from any fears of consequences which might arise from conflict of opinion with another coordinate branch of the Government, but because the court might incline the more to doubt that opinion, where, on the same point, it may seem to have been formed upon deliberation by others officiating in a high and responsible sphere. Hence this court, in a doubtful case, would permit a law called in question to have its effect. But when the court is satisfied, there is an obligation resting upon them that it would be criminal to compromise."

In the Origin and Scope of the American Doctrine of Constitutional Law Professor Thayer treats this subject most interestingly, in the course of which he says:

"It [the court] can only disregard the act when those who have the right to make laws have not merely made a mistake but have made a clear one, so clear that it is not open to rational question."

Many other authorities could be adduced, but these are sufficient to show that judges considering the constitutionality of a law regard the law as occupying the position of the prisoner in the dock, who has the right to claim his innocence unless the evidence shows him guilty beyond all reasonable doubt.

The reason why a judge can not declare the law of Congress unconstitutional unless he be satisfied beyond a reasonable doubt that it is unconstitutional rests upon strong grounds. First, the law has been passed by a coordinate branch of the Government, which is entitled to great respect at the hands of the court, and it will naturally hesitate to undo its work. Secondly, that reason is strongly enforced because the Members of Congress are required, upon taking their seats, to take an oath to support the Constitution of the United States. That oath carries with it the presumption that no bill will be voted for that the Member of Congress believes to be unconstitutional; so that the law comes to the court with the imprimatur of approval of 435 Members of the House and 96 Senators; and the weight of their approval, with the presumption of their examination of the bill, and of their conclusion as to its validity, must be, and ought to be, both compelling and persuasive. If a Member of the House or Senate can pass legislation up to the courts free from any responsibility for its validity themselves, what does the requirement of the oath which he takes mean? Is it merely a matter of form or is it a reality? The fact that we live under it carries with it the implication of obedience to the Constitution; and when a Member of Congress attempts to relieve himself of passing upon the constitutionality of a bill because the courts may have that duty to discharge, has he not failed to discharge the duty imposed upon him by his oath to support the Constitution—that is, to uphold it; not to pull it down, and not to do any act that will impair its integrity? Our oath is to support the Constitution.

Under the law of the land every man is required to support his wife and his family. If he doubts whether certain action on his part will contribute to the support of his wife and family, he must reject it; and any failure to contribute to their comfort, consistent with his condition in life, is a failure to support; and no man can justify his action in his relation to his family, about which he is uncertain, and the propriety of which he doubts.

And so a Member of Congress, in voting on a bill, must consider with care whether it be constitutional or not, and if he doubts its constitutionality it is held that he is not living up to the letter and spirit of his oath if he votes for it. So that if a Member of Congress doubts the constitutionality of a bill it is held that he should not vote for it, while the judge must declare it constitutional when it comes before him, unless beyond a reasonable doubt he believes it unconstitutional. That a Member of Congress, in obedience to his oath, is expected to consider seriously and carefully the constitutionality of a bill before he votes for it is recognized by all of the authorities.

Willoughby on the Constitution, page 1220, declares:

"From necessity the Constitution must have intended that the legislative and executive departments should have the power, in the first instance at least, of determining the extent of the powers constitutionally granted to them, and that, therefore, the judiciary should not substitute its judgment for theirs except in cases where there is no doubt that the action which has been taken is not constitutionally warranted."

Judge Cooley in his Constitutional Law, pages 153–154, says:

"Legislators have their authority measured by the Constitution; they are chosen to do what it permits and nothing more, and they take solemn oath to obey and support it. When they disregard its provisions they usurp authority, abuse their trust, and violate the promises they have confirmed by an oath. To pass an act when they are in doubt whether it does not violate the Constitution is to treat as of no force the most imperative obligations any person can assume. * * * A witness in court who would treat his oath thus lightly and affirm things of which he was in doubt would be held a criminal. Indeed, it is because the legislature has applied the judgment of its members to the question of its authority to pass the proposed law, and has only passed it after being satisfied of the authority, that the judiciary waive their own doubts and give it their support."

Tucker on the Constitution, page 379, declares:

"He [the legislator] is bound to support the Constitution, to uphold it as one of the pillars to an edifice. He is under the Constitution, not above it. He can not support it by doing an act repugnant to it."

"His public office is a public trust. If he doubts his power to do under the authority of the Constitution, he is bound to resolve the the doubt against the act, not in favor of it."

Hon. James M. Beck, Solicitor General of the United States, in a recent brief before the Supreme Court on this subject, uses the following language:

"It is the common belief that groups of men can agitate for any kind of a law without considering its constitutional aspects; for, if it be unconstitutional in substance or in motive, the Supreme Court will avert the evil of its enactment. This indifference to our form of government, which is now so widely prevalent, has its reflex action upon the representatives of the people both in the legislatures of the States and of the Nation. When laws are discussed which go to the verge of constitutional power the principal and sometimes the only discussion is that of policy, while the effect of such legislation upon our constitutional form of government is given little attention. The prevalent disposition seems to be to ignore constitutional questions by shifting them to the Supreme Court, in the belief that that court will exercise the full powers of revision, which I have tried to show the framers of the Constitution did not intend this court to have. The result may be an exaltation of this court, as a tribunal of extraordinary power; but, in the matter of constitutionalism, it inevitably leads to an impairment of the powers and duties of Congress and, above all, to the impairment of the popular conscience; for, in the last analysis, the Constitution will last in substance as long as the people believe in it and are willing to struggle for it."

Judge Cooley, in his Constitutional Limitations, page 254, seventh edition, puts more powerfully than any other author the duties of the legislator and the courts, and the reasons therefor:

"The constitutionality of a law, then, is to be presumed, because the legislature, which was first required to pass upon the question, acting, as they must be deemed to have acted, with integrity and with a just desire to keep within the restrictions laid by the Constitution upon their action, have adjudged that it is so. They are a coordinate department of the Government with the judiciary, invested with very high and responsible duties, as to some of which their acts are not subject to judicial scrutiny, and they legislate under the solemnity of an official oath, which it is to be supposed they will not disregard. It must therefore be supposed that their own doubts of the constitutionality of their action have been deliberately solved in its favor, so that the courts may with some confidence repose upon their conclusion as one based upon their best judgment. For although it is plain upon the authorities that the courts should sustain legislative action when not clearly satisfied of its invalidity, it is equally plain in reason that the legislature should abstain from adopting such action if not fully assured of their authority to do so. Respect for the instrument under which they exercise their power should impel the legislature in every case to solve their doubts in its favor, and it is only because we are to presume they do so that courts are warranted in giving weight in any case to their decision. If it was understood that the legislators refrained from exercising their judgment, or that in cases of doubt they allowed themselves to lean in favor of the action they desired to accomplish, the foundation for the cases we have cited would be altogether taken away."

The position of the legislator and the court, therefore, on this subject is this: The legislator can not, in accordance with his oath, vote for any bill if he doubts its constitutionality. The judge who is sitting in judgment on that same law, if he doubts its constitutionality, as did the legislator, must, unless in his judgment it is plainly and beyond a reasonable doubt unconstitutional, declare it constitutional. He must have a clear vision of its repugnancy to the Constitution. The judge, before he can declare it unconstitutional, must have no rational doubt of its validity, while the legislator can not vote for it if he has any doubt as to its constitutionality. The reasons for these positions seems clear. Bound by his oath to support the Constitution, the Member of Congress must not enact a law whose constitutionality he doubts, for to doubt its validity and then enact it does not square with his oath to support the Constitution. The position of the judge, however, is very different. He approaches the consideration of the validity of the law passed by a coordinate department of the Government with every presumption of its validity, not only because it has been passed by a coordinate branch of the Government, but because every member of that coordinate branch, the court has a right to believe, by voting for it, has examined it to determine whether it was valid, and having found it constitutional enacts it into law. So that the law comes to the court with the sanction of every Member of both Houses of Congress, fortified and strengthened by the fact which the court takes cognizance of, that every legislator in House and Senate has examined the bill and has voted for it because he had no doubt of its validity and constitutionality. The legislator might be unable to vote for a bill because of his doubts as to its constitutionality, and though he voted against it as a Member of Congress, if, after the passage of such a bill, he be transferred to the bench and has to pass upon the validity of that law, though he could not vote for the bill when in Congress because he doubted its constitutionality, he can not, as a judge, declare it unconstitutional unless beyond all reasonable doubt he believes it to be so.

Tucker sums up the argument as follows (Tucker on the Constitution, p. 380):

"In the case of the lawmaker the question to be asked is: 'Have I a right under the Constitution to pass the act?' The onus is for him to show his authority. In the case of the judge the question is: 'Is the law clearly unconstitutional? In annulling the law in support of the Constitution will I transcend my judicial functions and usurp the legislative; or is the repugnancy so strong that I will only act judicially in annulling the effect of the law and not transcend the boundary of my power?' The burden shifts in the two cases. The legislator must show that he has the right; the judge must show the legislator was clearly wrong.

"Hence the lawmaker may not justify a vote for a measure which as judge he could not declare void; but, if the judiciary declares such an act unconstitutional, it should forbid the lawmaker to pass similar legislation. On the other hand, though the judiciary can not declare a law unconstitutional because not clearly repugnant, it does not justify the lawmaker in voting for it."

If these principles are correct, how can we consent to abdicate our functions in this body? And if so, will the courts continue to be bound by the rule that is predicated on the discharge of our duty in this body which we now abandon? If that duty be abandoned, will the courts continue to recognize it as existing? Will the courts recognize as an existing fact what Members of Congress openly repudiate? Judge Cooley, in the language above quoted, indicates clearly that the courts will not be bound if the Members of Congress fail to live up to their obligations; and Chief Justice Taft shows the same tendency in his recent opinion in the case of Bailey against the Drexel Furniture Co. (child-labor case), when he says:

"In the light of these features of the act, a court must be blind not to see that the so-called tax is imposed to stop the employment of children within the age limits prescribed. Its prohibitory and regulatory effect and purpose are palpable. All others can see and understand this. How can we properly shut our minds to it?"

Why should the courts be bound by a rule which is openly and notoriously violated? Will they not, as indicated in the above case of Bailey against the Drexel Furniture Co., take judicial notice of such an open and notorious fact? To refuse to live up to our obligation and yet expect the courts to consider it as still existing is a fraud upon the courts and Congress would never knowingly be a party to such an act.

I invoke the careful consideration by the House of this principle that our Government may continue to meet the demands of the people in the orderly and constitutional performance of our duties and in the continued progress of this great people under the protecting care of our Constitution faithfully and obediently followed, which is our best, our only hope of progressive development.

### CALENDAR WEDNESDAY BUSINESS

Mr. TILSON. Mr. Speaker, I ask unanimous consent that Calendar Wednesday business, in order to-day, be dispensed

with, and that in lieu of to-day the Committee on the Merchant Marine and Fisheries may have, as Calendar Wednesday, the first regular session day following the completion of the shipping bill, which is to be presented immediately following the McNary-Haugen bill.

The SPEAKER. The gentleman from Connecticut asks unanimous consent that Calendar Wednesday business in order to-day be dispensed with, and that in lieu of to-day the Committee on the Merchant Marine and Fisheries may have, as Calendar Wednesday, the first regular session day following the completion of the shipping bill, which is to be presented immediately after the vote on the McNary-Haugen bill. Is there objection?

Mr. QUIN. Mr. Speaker, reserving the right to object, then that gives the Committee on Military Affairs next Wednesday?

Mr. TILSON. It would mean that the Committee on the Merchant Marine and Fisheries would have as Calendar Wednesday the first day that was not suspension day or Calendar Wednesday. I mean the first regular session day following the completion of the bill which the Committee on the Merchant Marine and Fisheries will bring before the House under a special rule.

Mr. GARNER of Texas. Mr. Speaker, that means the next Wednesday the Committee on Military Affairs will be called?

Mr. TILSON. That committee will be on call one week from to-day.

Mr. WHITE of Maine. And does that mean that if the shipping bill is concluded seasonably the Merchant Marine and Fisheries Committee might have Tuesday for its Calendar Wednesday, or, if the shipping bill is not concluded by that time, that we would have Thursday?

Mr. TILSON. Yes; it might be Thursday. It will be the next regular session day following the completion of the shipping bill.

Mr. ALMON. And this in no way will interfere with next Wednesday being Calendar Wednesday?

Mr. TILSON. Not at all.

Mr. ALMON. And the Committee on Military Affairs will have the call on that day?

Mr. TILSON. Yes.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

Mr. BANKHEAD. Mr. Speaker, reserving the right to object, and I shall not object, I ask the privilege of making just a brief statement. As the House is well informed there is a matter of great importance, not only to the agricultural section of my State, but to the entire agricultural sections of the country that the Committee on Military Affairs has in mind to call up under its call on Calendar Wednesday, namely, the Muscle Shoals bill. As a Member of the Committee on Rules, I have been endeavoring to secure a rule for the consideration of that bill. On account of its tremendous importance I think that bill should be considered under a rule to be brought in, and I shall continue to ask my associates on that committee to give us a rule for the consideration of that bill. The Committee on Military Affairs, by almost unanimous vote, has requested the Committee on Rules to grant a rule to consider that bill on its merits, with a reasonable amount of debate, so as not to be compelled to take the chance of failing to complete the consideration of a bill of that importance on two Calendar Wednesdays. In reserving the right to object I merely wish to give notice that those who are interested in a fair consideration of that bill, notwithstanding the agreement that is made here, will earnestly and seriously ask the Committee on Rules to give us a rule for the consideration of that bill.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

### TRANSATLANTIC FLYERS

Mr. TILSON. Mr. Speaker, while I have the floor I take this opportunity to announce to the House that it is expected that the distinguished trans-Atlantic flyers who are now visiting our city will be at the Capitol this afternoon and will probably visit the House sometime between 3.30 o'clock and 4 o'clock. It is hoped that there will be a full attendance of the House at that time.

### ORDER OF BUSINESS

Mr. GARNER of Texas. Mr. Speaker, will the gentleman from Connecticut please state when he expects to reach a vote on the pending bill? A great many Members are wiring in here wanting to know, and I wish to get any information that can be had on the subject.

Mr. TILSON. The gentleman comes to the wrong source for information on this particular subject.

Mr. HAUGEN. Mr. Speaker, I shall put forth every effort possible to pass the pending bill to-morrow, in order to accommodate a number of people who desire to leave town.

### AGRICULTURAL SURPLUS CONTROL BILL

Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3555.

The motion was agreed to.

The SPEAKER. The gentleman from Michigan will please take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3555, with Mr. MAPES in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3555, which the Clerk will report by title.

The Clerk read as follows:

A bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce.

The CHAIRMAN. The general debate having been concluded, the Clerk will read the bill for amendment.

Pursuant to the special rule, the Clerk proceeded to read the committee substitute, as follows:

### DECLARATION OF POLICY

SECTION 1. In order to stabilize the current of interstate and foreign commerce in the marketing of agriculture commodities and prevent suppression of commerce with foreign nations in such commodities and unjust discrimination against such foreign commerce, it is hereby declared to be the policy of the Congress to promote the orderly marketing of agricultural commodities in interstate and foreign commerce, and to that end, through the execution of the provisions of this act, to provide for the control and disposition of surpluses of such commodities, to preserve advantageous domestic markets for such commodities, to prevent such surpluses from unduly depressing the prices obtained for such commodities and from causing undue and excessive fluctuations in the markets for such commodities, to minimize speculation and waste in marketing such commodities, and to further the organization of producers of such commodities into cooperative associations.

Mr. ASWELL, Mr. KETCHAM, and Mr. LAGUARDIA rose.

The CHAIRMAN. The Chair will ask the gentleman from Louisiana [Mr. ASWELL] for what purpose does he rise?

Mr. ASWELL. To move to strike out all after the enacting clause and insert a substitute for the section just read, and to give notice that if my motion prevails I shall move to strike out the entire bill.

Mr. DOWELL. Mr. Chairman, I desire to make a point of order, and I also desire to suggest that the committee has reported the striking out of section 1, and the committee amendment should be considered before any other amendments are presented.

The CHAIRMAN. The Chair will state to the gentleman from Iowa that he has recognized the gentleman from Louisiana.

Mr. KETCHAM. Mr. Chairman, I object.

Mr. DOWELL. I reserve my point of order.

The CHAIRMAN. The Chair understands that the gentleman from Michigan objects and the gentleman from Iowa reserves a point of order.

Mr. ASWELL. Mr. Chairman, has the Chair recognized me?

The CHAIRMAN. The Chair is somewhat embarrassed on the question of recognition.

Mr. KETCHAM. Mr. Chairman, without losing my own right, I yield to the gentleman from Louisiana [Mr. ASWELL].

The CHAIRMAN. That simplifies the matter.

Mr. ASWELL. I move to strike out the section just read and insert the substitute which I offer, and if my motion prevails I shall move to strike out the entire bill.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Strike out section 1 and insert in lieu thereof the following——

Mr. DOWELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The reading of the amendment can not be interrupted by a parliamentary inquiry.

Mr. FORT. Mr. Chairman, I rise to make a parliamentary inquiry, if the Chair please.

The CHAIRMAN. The gentleman from Louisiana has offered an amendment, which the Clerk has not yet reported. The reading of the amendment can not be interrupted by the making of a parliamentary inquiry.

Mr. DOWELL. I am not making a parliamentary inquiry. I make a point of order that the amendment can not be offered at this time. I make a point of order that it is not in order at this time to offer an amendment.

Mr. ASWELL. The gentleman does not know what the amendment is.

The CHAIRMAN. The Chair will hear the gentleman from Iowa.

Mr. DOWELL. The Committee on Agriculture has reported an amendment striking out the section of the Senate bill which the gentleman from Louisiana desires now to amend. The committee amendment of the Committee on Agriculture is first to be considered, and the striking out of this amendment and the presentation of any other amendment is not in order.

That is the rule that has been followed at all times by every Chairman on amendments that have been offered to strike out a section reported by a committee, and it occurs to me that at this time the committee has recommended the striking out of the section, and therefore that amendment must first be considered before any further amendment can be offered to that section. The gentleman's amendment is not in order until the committee amendment has been disposed of.

Mr. KETCHAM. Mr. Chairman, may I call the attention of the Chair to the rule under which we are considering the bill to see if the contention of the gentleman is not answered? It provides that—

> The bill shall be read for amendment under the five-minute rule. It shall be in order to consider without the intervention of the point of order as provided in clause 7 of Rule XVI the substitute committee amendment recommended by the Committee on Agriculture now in the bill, and such substitute for the purpose of amendment shall be considered under the five-minute rule as an original bill.

Mr. DOWELL. Certainly. That is the rule at all times. It is the general rule.

Mr. KETCHAM. If we are considering this bill as an original bill, the motion of the gentleman from Louisiana would be in order at this time. I therefore make the point of order of the gentleman from Iowa [Mr. DOWELL] that the point of order is not in order.

Mr. DOWELL. The committee having recommended the striking out of this section, how will you strike out the committee amendment if you do not consider it before other amendments are presented? If the committee considers this section, then the gentleman from Louisiana might be in order to strike out the section. The committee has recommended that this section be stricken out. When that substitute comes before the House the gentleman's amendment, if then in order otherwise, would under the circumstances be proper to consider. But it seems to me that the rule universally followed is that the committee amendment must first be considered by the Committee of the Whole before other amendments are presented or debatable.

Mr. CRISP. Suppose the gentleman's contention should be accepted by the Chair, which I do not at present concede is the right way, because under the rule by which we are considering this bill the Committee on Agriculture amendment to the Senate bill is considered as the original text or bill; but admitting the proposition of the gentleman is correct, suppose the Committee of the Whole considered the Haugen bill by sections and approved it.

If anybody then offered to strike out and substitute a different text, would they not be confronted with the proposition that the committee had adopted the committee substitute (the Haugen bill) and, therefore, it would not be in order to offer an amendment changing that which the committee had already agreed to?

Mr. DOWELL. Of course, after the amendment had been agreed to that would be true, but while the amendment is before the committee it must be agreed to or voted down by the committee, and if the committee does vote it down, then any other amendment would be in order.

Mr. CRISP. Is not this also true, that under the rules of the House there can be four amendments—an amendment to the text, an amendment to that, a further amendment in the nature of a substitute to which one amendment can be offered—and is it not the universal practice in the House that when you are considering a bill and you determine to substitute a new text, the procedure is to move to strike out the first section of the bill and offer a substitute, and if the substitute prevails you can then move to strike out the succeeding sections of the original text you are considering?

Mr. DOWELL. But the gentleman must recognize the fact that the committee amendment is now before the committee and it is here for its consideration, and that may be amended.

The CHAIRMAN. The Chair will ask the gentleman from Iowa if he has in mind that the Clerk is reading the committee amendment?

Mr. DOWELL. No; the Clerk is reading the original bill, as I understand it.

The CHAIRMAN. The gentleman's understanding is incorrect. The Clerk is reading the committee amendment.

Mr. DOWELL. Then it is one amendment and can not be amended except as a whole.

The CHAIRMAN. The Chair is ready to rule.

Mr. DOWELL. If the amendment of the committee is now being read and considered, then that is one amendment, because it carries all of it; and it can not be amended until it has been read in its entirety, and then any amendment that is germane may be in order.

Mr. ASWELL. Will the gentleman yield?

Mr. DOWELL. Yes.

Mr. ASWELL. I am offering an amendment to the whole committee amendment; I am proposing to amend the whole amendment and, therefore, the gentleman's own argument indicates it is in order.

Mr. DOWELL. I object to its being presented at this time.

The CHAIRMAN. The Chair is ready to rule. It seems to the Chair that the language of the rule, which says that the substitute, for the purpose of amendment, shall be considered under the five-minute rule as an original bill, very largely answers the argument of the gentleman from Iowa [Mr. DOWELL]. It clearly indicates that the amendment is not to be read in toto but by sections, and that at the completion of the reading of any one section amendments may be offered to that section, and taking into consideration the next sentence of the rule the intent of the rule is still more manifest. The rule provides that the committee substitute shall be considered and voted upon by the House when the committee rises. The only way the House could be assured of having that right is to consider the substitute as a whole and have it reported to the House as a substitute in place of the original bill. If this committee had the right to vote on the question of substituting the Agricultural Committee substitute for the bill the House might never have a chance to vote on the committee substitute. The Chair thinks that the intent of the rule is clear and overrules the point of order.

Mr. KINCHELOE. Mr. Chairman, I want to reserve a point of order against the amendment as to its germaneness, although I do not know what it is.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Louisiana.

The Clerk read as follows:

> Amendment offered by Mr. ASWELL: Strike out section 1 and insert:
>
> DECLARATION OF POLICY
>
> SECTION 1. In order to stabilize the current of interstate and foreign commerce in the marketing of agriculture commodities and prevent suppression of commerce with foreign nations in such commodities and unjust discrimination against such foreign commerce, it is hereby declared to be the policy of the Congress to promote the orderly marketing of agricultural commodities in interstate and foreign commerce, and to that end, through the execution of the provisions of this act, to provide for the control and disposition of surpluses of such commodities, to preserve advantageous domestic markets for such commodities, to prevent such surpluses from unduly depressing the prices obtained for such commodities and from causing undue and excessive fluctuations in the markets for such commodities, to minimize speculation and waste in marketing such commodities, and to further the organization of producers of such commodities into cooperative associations.

Mr. LAGUARDIA. Mr. Chairman——

The CHAIRMAN. For what purpose does the gentleman from New York rise?

Mr. LAGUARDIA. I understood that the gentleman from Louisiana was offering one section as a substitute for section 1.

The CHAIRMAN. He is offering a substitute bill to the section.

Mr. ASWELL. Mr. Chairman, I would like to make a unanimous-consent request.

The CHAIRMAN. The Clerk has not yet completed the reporting of the gentleman's amendment.

Mr. ASWELL. The Clerk has read the first section, and I want to make the request that the amendment be considered as read and may be printed in the RECORD at this point.

Mr. CANNON. Mr. Chairman, reserving the right to object——

Mr. CHINDBLOM. The amendment is being offered now, is it not?

Mr. HAUGEN. It seems to me the amendment ought to be read.

Mr. ASWELL. Mr. Chairman, I ask unanimous consent to proceed for one minute.

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent to proceed for one minute pending the reading of the amendment. Is there objection?

There was no objection.

Mr. ASWELL. Mr. Chairman, the language I have offered as a substitute is the exact language of the bill before the committee with the exception that sections presenting the equalization fee are omitted, and all reference to the equalization fee is omitted; otherwise, my substitute is the exact language of the Haugen bill. In other words, the exact language you have heard read as a substitute is the language of the bill before the committee and will be the same identical language in every line until you pass through the ninth section. After the ninth section, I strike out the two sections involving the equalization fee and then following those two sections I have stricken out references to the equalization fee. I have not changed a single word except this reference to the equalization fee, and therefore I have asked unanimous consent that my substitute may be printed in the RECORD and considered as read, and that we vote on the substitute section by section.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. ASWELL. Yes.

Mr. COOPER of Wisconsin. Does that leave out sections 9, 10, and 11?

Mr. ASWELL. It does not. It retains section 9.

Mr. CANNON. Mr. Speaker, I reserve the right to object, to ask the gentleman from Louisiana a question. As I understand it, there is nothing in the substitute which the gentleman offers that is not in the original bill?

Mr. ASWELL. Not a line.

Mr. CANNON. It is merely a question of striking out?

Mr. ASWELL. Yes.

Mr. JOHNSON of Texas. Reserving the right to object, Mr. Chairman——

Mr. CANNON. Mr. Chairman, I desire to reserve a point of order.

Mr. ASWELL. I was merely trying to save time. If the Members want it read, go ahead. [Cries of "No! No!"]

Mr. CANNON. I have no objection to the gentleman's request, but desired simply to reserve a point of order.

The CHAIRMAN. The Chair is not sure he understood the reference of the gentleman from Louisiana in his unanimous-consent request that the amendment be read section by section, and in order that there may be no misunderstanding the Chair desires to state that he did not put that part of the gentleman's request.

Mr. ASWELL. Very well.

Mr. FORT. Mr. Chairman, reserving the right to object, I would like to be informed as to the rights of Members who desire to offer amendments to the substitute. If the amendment is not to be read, may all of the amendments to any section of the substitute be offered simultaneously at the conclusion of the reading or upon the granting of the unanimous-consent request?

The CHAIRMAN. One amendment may be offered to the substitute and disposed of, and that procedure may be followed indefinitely; but only one such amendment can be pending at the same time.

Mr. LAGUARDIA. Mr. Chairman, for the sake of the RECORD I desire to make the point of order that the substitute offered by the gentleman from Louisiana is not a bona fide substitute.

The CHAIRMAN. Will the gentleman from New York let us first dispose of the request that the amendment be considered as read?

Mr. LAGUARDIA. Then I reserve that point of order.

Mr. KINCHELOE. Mr. Chairman, I reserve the right to object in order to get some information. Do I understand from the gentleman from Louisiana that the amendment is identical with the McNary-Haugen bill as reported to the House with the exception of sections 11 and 12?

Mr. ASWELL. And except references to the equalization fee in the sections that follow those that are to be stricken out.

Mr. KINCHELOE. Then it is the McNary-Haugen bill, except it eliminates the equalization fee.

Mr. ASWELL. Yes.

Mr. FORT. And the nonpremium-insurance feature.

Mr. ASWELL. Yes; that is based upon the equalization fee.

Mr. KINCHELOE. I wanted to ask the gentleman about that. I reserved a point of order. The gentleman from New York can make it if he desires.

Mr. HARRISON. May I ask the gentleman how he proposes to finance the plan outlined in his bill?

Mr. ASWELL. There is a $400,000,000 revolving fund.

Mr. HARRISON. And does that have to be contributed yearly by the Government?

Mr. ASWELL. That depends on how long it lasts.

The CHAIRMAN. Is there objection to the request of the gentleman from Louisiana that his amendment be considered as read and printed in the RECORD?

Mr. ADKINS. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. ADKINS. As I understand it, we are getting ready to vote on an amendment offered by the gentleman from Louisiana [Mr. ASWELL], which in substance is the Haugen bill with the equalization fee stricken out, is it not?

Mr. ASWELL. That is it.

Mr. ADKINS. Suppose the House adopts the gentleman's amendment, then we are through. We can not amend the amendment any further, can we?

Mr. ASWELL. Oh, yes.

Mr. ADKINS. I understand we may do that while it is a pending amendment to the committee amendment, but I do not see how you are ever going to amend the gentleman's amendment after you have adopted it, and, therefore, if we adopt this amendment "the show is over."

Mr. JONES. Reserving the right to object, I would like to know if the offering of this substitute will interfere with the offering of another substitute until this is disposed of?

The CHAIRMAN. Only one substitute can be pending at the same time.

Mr. JONES. And another substitute will be in order after the actual disposition of this?

The CHAIRMAN. It is important that everyone should understand the procedure. As the Chair understands it, this substitute offered by the gentleman from Louisiana is subject to amendment. Only one amendment can be pending at the same time, but as many amendments can be offered and disposed of as Members care to offer. After the amendment stage is passed and the substitute is once adopted it can not be further amended.

Mr. RAMSEYER. After the amendment is adopted the committee is to proceed with the rest of the bill and strike out sections.

The CHAIRMAN. Yes; but the language which has been inserted could not be modified.

Mr. RAMSEYER. Each section would be read for such disposition as the committee sees fit to make.

Mr. DOWELL. Mr. Chairman, the first section is pending and the committee has recommended a certain amendment. This is the second amendment.

The CHAIRMAN. The Chair will say that for the purpose of procedure in Committee of the Whole the Senate bill may well be dismissed from consideration. We are considering the Agricultural Committee substitute to the original bill. The Chair will be glad to put the request for unanimous consent made by the gentleman from Louisiana.

Mr. HOCH. Reserving the right to object, there is one point that I am not clear about. The gentleman from Louisiana has offered this as one amendment. I understood him to say that he desired it to be voted on section by section. If this is one section and an amendment to it is in order—if it is to be considered as one amendment it will be in order for any one to offer an amendment to any part of it.

The CHAIRMAN. There is no doubt about that.

Mr. JONES. If we should let this go over until to-morrow and let the bill be read, then if the substitute offered by the gentleman from Louisiana is voted down it will be too late to offer another substitute, the rest of it having been read. We have to offer the substitute after the reading of the first paragraph of the bill.

The CHAIRMAN. If the amendment of the gentleman from Louisiana is voted down any other substitute would be in order.

Mr. JONES. The first paragraph will have been passed at that time.

The CHAIRMAN. No. This amendment simply will have been voted down, and then another amendment will be in order. Is there objection to the request of the gentleman from Louisiana that the amendment be considered as read and printed in the RECORD?

There was no objection.

DECLARATION OF POLICY

SECTION 1. In order to stabilize the current of interstate and foreign commerce in the marketing of agriculture commodities and prevent suppression of commerce with foreign nations in such commodities and unjust discrimination against such foreign commerce, it is hereby de-

clared to be the policy of the Congress to promote the orderly marketing of agricultural commodities in interstate and foreign commerce, and to that end, through the execution of the provisions of this act, to provide for the control and disposition of surpluses of such commodities, to preserve advantageous domestic markets for such commodities, to prevent such surpluses from unduly depressing the prices obtained for such commodities and from causing undue and excessive fluctuations in the markets for such commodities, to minimize speculation and waste in marketing such commodities, and to further the organization of producers of such commodities into cooperative associations.

FEDERAL FARM BOARD

SEC. 2. (a) A Federal Farm Board is hereby created which shall consist of the Secretary of Agriculture, who shall be a member ex officio, and 12 members, one from each of the 12 Federal land bank districts, who shall be appointed by the President of the United States, by and with the advice and consent of the Senate.

(b) The terms of office of the appointed members of the board first taking office after the approval of this act shall expire, as designated by the President at the time of nomination, four at the end of the second year, four at the end of the fourth year, and four at the end of the sixth year, after the date of the approval of this act. A successor to an appointed member of the board shall be appointed in the same manner as the original appointed members, and shall have a term of office expiring six years from the date of the expiration of the term for which his predecessor was appointed.

(c) Any person appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

(d) Any member of the board in office at the expiration of the term for which he was appointed may continue in office until his successor takes office.

(e) Vacancies in the board shall not impair the powers of the remaining members to execute the functions of the board, and a majority of the appointed members in office shall constitute a quorum for the transaction of the business of the board.

(f) Each of the appointed members of the board shall be a citizen of the United States, shall not actively engage in any other business, vocation, or employment than that of serving as a member of the board, and shall receive a salary of $10,000 a year, together with necessary traveling expenses and expenses incurred for subsistence or per diem allowance in lieu thereof, within the limitations prescribed by law, while away from the principal office of the board on business required by this act, or if assigned to any other office established by the board, then while away from such office on business required by this act.

GENERAL POWERS

SEC. 3. The board—

(a) Shall annually designate an appointed member to act as chairman of the board.

(b) Shall maintain its principal office in the District of Columbia, and such other offices in the United States as it deems necessary.

(c) Shall have an official seal which shall be judicially noticed.

(d) Shall make an annual report to Congress.

(e) May make such regulations as are necessary to execute the functions vested in it by this act.

(f) May (1) appoint and fix the salaries of a secretary and such experts, and, in accordance with the classification act of 1923 and subject to the provisions of the civil service laws, such other officers and employees, and (2) make such expenditures (including expenditures for rent and personal services at the seat of government and elsewhere, for law books, periodicals, and books of reference, and for printing and binding) as may be necessary for the execution of the functions vested in the board.

(g) Shall meet at the call of the chairman, or of the Secretary of Agriculture, or of a majority of its members.

(h) Shall keep advised, from any available sources, of crop prices, prospects, supply, and demand, at home and abroad, with especial attention to the existence or the probability of the existence of a surplus of any agricultural commodity or any of its food products, and it may advise producers through their organizations or otherwise in matters connected with the adjustment of production, distribution, and marketing of any such commodity, in order that they may secure the maximum benefits under this act.

(i) Shall advise producers through their organizations or otherwise in the development of suitable programs of planting or breeding, so that burdensome crop surpluses may be avoided or minimized, in order that they may secure such benefits.

COMMODITY ADVISORY COUNCILS

SEC. 4. (a) For each agricultural commodity, which the board from time to time determines may thereafter require stabilization by the board through marketing agreements authorized by this act, the board is hereby authorized and directed to create an advisory council of seven members fairly representative of the producers of such commodity. Members of each commodity advisory council shall be selected annually by the board from lists submitted by cooperative associations or other organizations representative of the producers of the commodity. Members of each commodity advisory council shall serve without salary but may be paid by the board a per diem compensation not exceeding $20 for attending meetings of the council and for time devoted to other business of the council and authorized by the board. Each council member shall be paid by the board his necessary traveling expenses to and from meetings of the council and his expenses incurred for subsistence, or per diem allowance in lieu thereof, within the limitations prescribed by law, while engaged upon the business of the council. Each commodity advisory council shall be designated by the name of the commodity it represents, as, for example, "The Cotton Advisory Council."

(b) Each commodity advisory council shall meet as soon as practicable after its selection at a time and place designated by the board and select a chairman. The board may designate a secretary of the council, subject to the approval of the council.

(c) Each commodity advisory council shall meet thereafter at least twice in each year at a time and place designated by the board, or upon call of a majority of its members at a time and place designated in the call, notice of such call being sent by registered mail at least 10 days before the date of the meeting.

(d) Each commodity advisory council shall have power, by itself or through its officers, (1) to confer directly with the board, to call for information from it, or to make oral or written representations to it, concerning matters within the jurisdiction of the board and relating to the agricultural commodity, and (2) to cooperate with the board in advising the producers through their organizations or otherwise in the development of suitable programs of planting or breeding so that burdensome crop surpluses may be avoided or minimized, in order to secure the maximum benefits under this act.

LOANS

SEC. 5. (a) The board is authorized to make loans, out of the revolving fund hereinafter created, to any cooperative association or corporation created and controlled by one or more cooperative associations, upon such terms and conditions as, in the judgment of the board, will afford adequate assurance of repayment and carry out the policy declared in section 1, and upon such other terms and conditions as the board deems necessary. Such loans shall be for one of the following purposes:

(1) For the purpose of assisting the cooperative association or corporation created and controlled by one or more cooperative associations in controlling a seasonal or year's total surplus, produced in the United States and either local or national in extent, that is in excess of the requirements for the orderly marketing of any agricultural commodity or in excess of the domestic requirements for such commodity.

(2) For the purpose of developing continuity of cooperative services from the point of production to and including the point of terminal marketing services, if the proceeds of the loan are to be used either (A) for working capital for the cooperative association or corporation created and controlled by one or more cooperative associations, or (B) for assisting the cooperative association or corporation created and controlled by one or more cooperative associations in the acquisition, by purchase, construction, or otherwise, of facilities and equipment, including terminal marketing facilities and equipment, for the preparing, handling, storing, processing, or sale or other disposition of agricultural commodities, or (C) for furnishing funds to the cooperative association or corporation created and controlled by one or more cooperative associations for use as capital for any agricultural credit corporation eligible to receive discounts under section 202 of the Federal farm loan act, as amended, or (D) for furnishing funds to the cooperative association or corporation created and controlled by one or more cooperative associations for necessary expenditures in federating, consolidating, merging, or extending the membership of cooperative associations or corporations created and controlled by one or more cooperative associations.

(b) In case of a loan to a cooperative association under paragraph (2) of subdivision (a), the notes or other obligations representing the loan (1) may be secured by marketing contracts of members of the cooperative association, and be required to be repaid, together with interest thereon, within a period of 20 years, by means of a charge to be deducted from the proceeds of the sale or other disposition of each unit of the agricultural commodity delivered under the members' marketing contracts, or (2) may be secured in such other manner as the board deems adequate.

(c) Any corporation created and controlled by one or more cooperative associations shall be eligible to receive loans under this section if the corporation is organized under the laws of any State, has the minimum capital required by the laws of the State of its organization, and agrees with the board:

(1) To adopt by-laws satisfactory to the board in accordance with which any cooperative association handling the same commodity may become a stockholder in such corporation and putting such restrictions upon the alienation of stock in such corporation as will insure the retention both of such stock and of all beneficial interest therein by cooperative associations.

(2) To keep such accounts, records, and memoranda, and make such reports in respect of its transactions, business methods, and financial condition as the board may from time to time prescribe.

(3) To permit the board upon its own initiative or upon written request of any stockholder in the corporation to investigate its financial condition and business methods.

(4) To set aside a reasonable per centum of its profits each year for a reserve fund; which reserve fund may be transformed into fixed capital and certificates representing its ownership issued to the cooperative associations, stockholders in the corporation, with the assent of the board and under terms and conditions approved by the board.

(5) To distribute the balance among its cooperative association stockholders ratably, according to the amount of such commodity produced in the current year that has been marketed through such associations by the producers thereof.

(d) Any loan under this section shall bear interest at the rate of 4 per cent per annum. The aggregate amount of loans under this section, outstanding and unpaid at any one time, shall not exceed $400,000,000, but—

(1) The aggregate amount of loans for all purposes under paragraph (2) of subdivision (a), outstanding and unpaid at any one time, shall not exceed $25,000,000; and

(2) The aggregate amount of loans for the purpose of expenditures in federating, consolidating, merging, or extending the membership of cooperative associations or corporations created and controlled by one or more cooperative associations, outstanding and unpaid at any one time, shall not exceed $2,000,000.

INCREASED PRODUCTION

SEC. 6. If the board finds that its advice as to a program of planting and breeding of any agricultural commodity as hereinbefore provided has been substantially disregarded by the producers of the commodity, or that the planting or breeding of any agricultural commodity for any year is substantially greater than a normal increase, as determined by the board, over the average planting or breeding of such commodity for the preceding five years, the board may refuse to make advances for the purchase of such commodity.

INVESTIGATIONS BY BOARD

SEC. 7. The board, upon the request of any cooperative association or upon its own motion, may investigate the conditions surrounding the marketing of any agricultural commodity produced in the United States and determine:

(1) Does a surplus of any such commodity exist or threaten to exist;

(2) Does the existence or threat of such surplus depress or threaten to depress the price of such commodity below the average cost of the actual production of such commodity in continental United States during the preceding five years; and

(3) Are the conditions of durability, preparation, processing, preserving, and marketing of such commodity, or the products therefrom, adaptable to the storage or future disposal of such commodity.

Before declaring or entering its finding upon the foregoing matters, the board shall consult with the advisory council for the commodity.

CLEARING HOUSE AND TERMINAL MARKET ASSOCIATIONS

SEC. 8. The board may assist in the establishment of, and provide for the registration of, in accordance with such regulations as it may prescribe, (1) clearing house associations adapted, in the opinion of the board, to effect the more orderly production, distribution, and marketing of any agricultural commodity, to prevent gluts or famines in any market for such commodity, and to reduce waste incident to the marketing of such commodity, and (2) terminal market associations adapted, in the opinion of the board, to maintain public markets in distribution centers for the more orderly distribution and marketing of any agricultural commodity. Only cooperative associations or corporations created or controlled by one or more cooperative associations shall be eligible for membership in any clearing house association or terminal market association registered under this section. Rules for the governance of any such association shall be adopted by the members thereof with the approval of the board.

MARKETING AGREEMENTS

SEC. 9. (a) From time to time upon request of the advisory council for any agricultural commodity, or upon request of leading cooperative associations or other organizations of producers of any agricultural commodity, or upon its own motion, the board shall investigate the supply and marketing situation in respect of such agricultural commodity.

(b) Whenever upon such investigation the board finds—

First. That there is or may be during the ensuing year a seasonal or year's total surplus, produced in the United States and national in extent, that is in excess of the requirements for the orderly marketing of any agricultural commodity or in excess of the domestic requirements for the commodity;

Second. That the operation of the provisions of section 5 (relating to loans to cooperative associations or corporations created and controlled by one or more cooperative associations) will not be effective to control such surplus because of the inability or unwillingness of the cooperative associations engaged in handling the commodity, or corporations created and controlled by one or more such cooperative associations, to control such surplus with the assistance of such loans; and

Third. That the durability, the conditions of preparation, processing, and preserving, and the methods of marketing of the commodity are such that the commodity is adapted to marketing as authorized by this section—

Then the board, after publicly declaring its findings, shall arrange for marketing any part of the commodity by means of marketing agreements with cooperative associations engaged in handling the commodity or corporations created and controlled by one or more such cooperative associations. Such marketing shall continue during a marketing period which shall terminate at such time as, in the judgment of the board, such arrangements are no longer necessary or advisable for carrying out the policy declared in section 1.

(c) A marketing agreement shall provide either—

(1) For the withholding by a cooperative association, or corporation created and controlled by one or more cooperative associations, during such period as shall be provided in the agreement, of any part of the commodity delivered to such cooperative association or associations by its members. Any such agreement shall provide for the payment from the revolving fund of the costs arising out of such withholding; or

(2) For the purchase by a cooperative association, or corporation created and controlled by one or more cooperative associations, of any part of the commodity not delivered to such cooperative association or associations by its members, and for the withholding and disposal of the commodity so purchased. Any such marketing agreement shall provide for the payment from the revolving fund of the amount of the losses, costs, and charges arising out of the purchase, withholding, and disposal, or out of contracts therefor, and for the payment into the revolving fund of profits (after repaying all advances from the revolving fund and deducting all costs and charges, provided for in the agreement) arising out of the purchase, withholding, and disposal, or out of contracts therefor.

(d) The board may, in its discretion, provide in any such marketing agreement for financing any withholding, purchase, or disposal under such agreement, through advances from the revolving fund. Such financing shall be upon such terms and conditions as the board may prescribe, but no such advance shall bear interest.

(e) If the board is of the opinion that there are two or more cooperative associations or corporations created and controlled by one or more cooperative associations capable of carrying out any marketing agreement, the board in entering into the agreement shall not unreasonably discriminate against any such association or corporation in favor of any other such association or corporation. If the board is of the opinion that there is no such cooperative association or corporation created and controlled by one or more cooperative associations capable of carrying out any marketing agreement for purchase, withholding, and disposal, then the board may enter into the agreement with other agencies but shall not unreasonably discriminate between such other agencies.

(f) During a marketing period fixed by the board for any commodity, the board may enter into marketing agreements for the purchase, withholding, and disposal of the food products of such commodity, and all provisions of this section applicable to marketing agreements for the purchase, withholding, and disposal of the commodity, shall apply to the agreements in respect of its food products.

(g) Any decision of the board relating to the commencement, extension, or termination of a marketing period shall require the affirmative vote of a majority of the appointed members in office.

(h) The powers of the board under this section in respect of any agricultural commodity shall be exercised in such manner, and the marketing agreements entered into by the board during any marketing period shall be upon such terms, as will, in the judgment of the board, carry out the policy declared by section 1.

(i) The United States shall not be liable, directly or indirectly, upon agreements under this act in respect of agricultural commodities, in excess of the amounts available in the premium insurance and revolving funds.

INSURANCE

SEC. 10. (a) In order that a cooperative association handling any staple agricultural commodity may with reasonable security make payments to its members at the time of delivery of such commodity by the members, fairly reflecting the current market value of such agricultural commodity, the board is authorized to enter into an agreement, upon such terms and conditions as it may prescribe, for the insurance of such cooperative association against price decline as hereinafter provided. Such insurance agreement may be entered into by the board only with respect to any such agricultural commodity which, in the judgment of the board, is regularly traded in upon an exchange in sufficient volume to establish a recognized basic price for the market grades of such commodity, and then only when such exchange has accurate price records for the commodity covering a period of years of sufficient length, in the judgment of the board, to serve as a basis upon which to calculate the risks of the insurance.

(b) Any such agreement for insurance against price decline shall provide for the insurance of the cooperative association for any 12 months' period commencing with the delivery season for the commodity against loss to such association or its members due to decline in the average market price for the commodity during the time of sale by the association from the average market price for the commodity during the time of delivery to the association. The measure of such decline, where a decline occurs, shall be the difference between the average market price weighted for the days and volume of delivery to the association by its members, and the average market price weighted for the days and volume of sales by the association. In computing such average market prices the board shall use the daily average cash prices paid for the basic grade of such commodity in the exchange designated in the agreement. Any such agreement shall cover only so much of the commodity delivered to the association as is produced by the members of the association and as is reported by the association for coverage under the agreement.

(c) Payments under insurance agreements in respect of any commodity shall be made out of the premium insurance fund for the commodity to be established by the board under such regulations as it may prescribe.

(d) For insurance under an insurance agreement the cooperative association shall pay a premium, to be determined by the board prior to the making of the insurance agreement, upon each unit of the commodity reported by the association for coverage under the insurance agreement. Such premium shall be calculated with due regard to the past price records in established markets for the commodity. The premiums applicable to the commodity in the successive 12 months' periods shall be adjusted with due regard to the experience of the board under preceding insurance agreements. There shall be deposited in the premium insurance fund for any commodity the premiums paid by cooperative associations under insurance agreements in respect of the commodity, and advances from the revolving fund in such amounts as the board deems necessary for the operation of the fund. There shall be disbursed from the premium insurance fund for any commodity (1) the payments required by any insurance agreement in respect of the commodity, and (2) repayments into the revolving fund of advances made from the revolving fund to such premium insurance fund, together with interest on such advances at the rate of 4 per cent per annum.

REVOLVING FUND

SEC. 11. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $400,000,000. Such sum shall be administered by the board and used as a revolving fund in accordance with the provisions of this act. The Secretary of the Treasury shall deposit in the revolving fund such portions of the amounts appropriated therefor as the board from time to time deems necessary.

EXAMINATIONS OF BOOKS AND ACCOUNTS OF BOARD

SEC. 12. Expenditures by the board from the premium insurance funds shall be made by the authorized officers or agents of the board upon receipt of itemized vouchers therefor, approved by such officers as the board may designate. All other expenditures by the board, including expenditures for loans and advances from the revolving fund, shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the board. Vouchers so made for expenditures from the revolving fund or from any premium insurance fund shall be final and conclusive upon all officers of the Government; except that all financial transactions of the board (including the payments required by any marketing or insurance agreement) shall, subject to the above limitations, be examined by the General Accounting Office, at such times and in such manner as the Comptroller General of the United States may by regulation prescribe. Such examination in respect of expenditures from the revolving fund or from any premium insurance fund shall be for the sole purpose of making a report to the Congress and to the board of expenditures and agreements in violation of law, together with such recommendations as the Comptroller General deems advisable concerning the receipts, disbursements, and application of the funds administered by the board.

COOPERATION WITH EXECUTIVE DEPARTMENTS

SEC. 13. (a) It shall be the duty of any governmental establishment in the executive branch of the Government, upon request by the board or upon Executive order, to cooperate with and render assistance to the board in carrying out any of the provisions of this act and the regulations of the board. The board shall, in cooperation with any such governmental establishment, avail itself of the services and facilities of such governmental establishment in order to avoid preventable expense or duplication of effort.

(b) Upon request by the board the President, by Executive order, (1) may transfer any officer or employee from any department or independent establishment in the executive branch of the Government, irrespective of his length of service in such department or independent establishment, to the service of the board, and (2) may direct any governmental establishment to furnish the board with such information and data pertaining to the functions of the board as may be contained in the records of the governmental establishment; except that the President shall not direct that the board be furnished with any information or data supplied by any person in confidence to any governmental establishment, in pursuance of any provision of law or of any agreement with the governmental establishment.

(c) The board may cooperate with any State or Territory, or department, agency, or political subdivision thereof, or with any person.

GENERAL DEFINITIONS

SEC. 14. (a) As used in this act—

(1) The term "person" means individual, partnership, corporation, or association.

(2) The term "United States," when used in a geographical sense, means continental United States and the Territory of Hawaii.

(3) The term "cooperative association" means an association of persons engaged in the production of agricultural products, as farmers, planters, ranchers, dairymen, or nut or fruit growers, organized to carry out any purpose specified in section 1 of the act entitled "An act to authorize association of producers of agricultural products," approved February 18, 1922, if such association is qualified under such act.

(b) Whenever any agricultural commodity has regional or market classifications or types which in the judgment of the board are so different from each other in use or marketing methods as to require their treatment as separate commodities under this act, the board may determine upon and designate one or more such classifications or types for such treatment.

ADMINISTRATIVE APPROPRIATION

SEC. 15. For expenses in the administration of the functions vested in the board by this act, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $500,000, to be available to the board for such expenses (including salaries and expenses of the members, officers, and employees of the board and the per diem compensation and expenses of members of the commodity advisory councils) incurred prior to July 1, 1929.

SEPARABILITY OF PROVISIONS

SEC. 16. If any provision of this act is declared unconstitutional or the applicability thereof to any person, circumstance, commodity, or class of transactions in respect of any commodity, is held invalid, the validity of the remainder of the act and the applicability of such provision to other persons, circumstances, commodities, and classes of transactions shall not be affected thereby.

COOPERATIVE ASSOCIATIONS ACT

SEC. 17. Nothing in this act is intended or shall be construed to repeal or modify any provision of the act entitled "An act to authorize association of producers of agricultural products," approved February 18, 1922.

PENALTIES

SEC. 18. (a) The provisions of sections 123 and 124 of the Penal Code, approved March 4, 1909, as amended, shall apply to any member, officer, or employee of the board; and, in addition, it shall be held a violation of section 123 of such code if any member, officer, or employee of the board at any time speculates, directly or indirectly, in any agricultural commodity.

(b) It shall be unlawful (1) for any cooperative association, or corporation created and controlled by one or more cooperative associations, or other agency if such agency is acting for or on behalf of the board under any marketing agreement, or (2) for any director, officer, or employee of any such association, corporation, or agency, to which information has been imparted in confidence by the board, to disclose such information in violation of any regulation of the board. Any such association, corporation, or agency, or director, officer, or employee thereof, violating any provision of this subdivision, shall be fined not more than $10,000 or imprisoned not more than 10 years, or both.

SHORT TITLE

SEC. 19. This act may be cited as the "Surplus Control Act."

Mr. CANNON. Mr. Chairman, I have reserved the point of order.

Mr. DOWELL. I reserve the point of order.

Mr. LAGUARDIA. And I make a point of order, Mr. Chairman.

Mr. CANNON. I make the point of order that the amendment is not admissible.

Mr. DOWELL. And it is not germane.

Mr. ASWELL. It is in the same language as the original bill.

Mr. CANNON. There is not a word, paragraph, or punctuation mark in the substitute that is not in the original bill. The gentleman from Louisiana is proposing to strike out the bill and put back the bill. The only difference is that in putting the bill back he leaves out certain paragraphs.

Mr. ASWELL. Will the gentleman yield?

Mr. CANNON. Yes.

Mr. ASWELL. Does not the gentleman consider that a vital and important change?

Mr. CANNON. That is the reason I am making the point against it. It is vitally important.

And what is still more to the point, it contravenes the orderly procedure of the House. While it is proposed in the guise of a substitute it is in fact not a substitute at all but is really a proposal to strike out certain sections of the bill which in the regular order will not be reached until later on in the reading of the bill.

The proposed amendment does not contain a single phrase or word or comma that is not already in the original bill. It is patent, therefore, that it can not be considered as a substitute. You can not offer the absurd proposal to strike out and put back exactly what you have stricken out. You can not propose to insert in lieu of a text the identical text that is already in the bill.

Consequently the effect of such an amendment if entertained would be to bring up out of its regular order and before the proper time for its consideration a proposition to strike out a section which has not yet been reached in the regular reading of the bill.

Now, that is not only in violation of the practice of the House, but it is manifestly inequitable. Why does not the proponent of the amendment wait until sections 10 and 11 are reached in their regular order? What is the occasion for this unseemly haste, for this unprecedented proposal at this inopportune stage of the consideration of the bill? I will tell you why. It is because the sections thus proposed to be stricken out by this amendment are the sections providing for the equalization fee—the issue about which all political considerations incident to this legislation have centered since the Seventieth Congress convened. They want to force a surprise vote on the controverted question of the equalization fee out of its regular order and before opportunity is given to amend preceding sections of the bill leading up to and affecting these sections.

It is the inflexible rule and practice of the House that in the consideration of a bill its sections shall be read and considered in their serial order. The first section is read and considered and disposed of. Then the second section is read and considered and disposed of. And then the remaining sections of the bill are taken up and disposed of in their turn. It is not in order to return to any section once disposed of, and it is not in order to take up in advance any section not yet reached in the reading of the bill. This has been the practice since the days of the Continental Congress.

To entertain such an amendment as that proposed is to violate the long-established practice of the House, and if followed would permit the consideration of any section of a bill or of all sections of a bill out of order and at any time, whether opportunity had been afforded to perfect related sections or not.

Why does not the gentleman wait until the sections on the equalization fee are reached in the order prescribed by the rules of the House? I submit, Mr. Chairman, that the proposed amendment is not admissible; that a proposal to strike out a text and put back the same text is not in order; that it is an effort to secure an unauthorized advantage; and that the gentleman, without sacrificing any of his rights, should wait until the sections he seeks to eliminate are reached in the orderly reading of the bill.

Mr. LAGUARDIA. Mr. Chairman, in submitting my point of order, I have in mind the same thought in part that has been stated by the gentleman from Missouri [Mr. CANNON]. I call the attention of the Chair to this situation: If the substitute offered by the gentleman from Louisiana [Mr. ASWELL], which, on his own statement, is word for word the bill now before the committee with the exception that he eliminates certain sections, is a proper substitute amendment at this time, it will establish an entirely new precedent and the very purpose of reading a bill under the five-minute rule for amendment will be entirely destroyed. Instead of bringing the bill up for consideration before the committee section by section, for its orderly consideration and amendment, it will bring the whole substituted bill before the committee for amendments, but all at one time. After the substitute is agreed to, if it is, the striking out of the remaining sections is purely pro forma. At any time the committee may rise and present the substitute bill to the House just as now offered. We can not amend a single section of the substituted bill. If the substitute as it is worded is exactly as the bill now before the House with the exception of one or two sections, is held to be a proper substitute to be considered in this confused manner, then any bill may be taken from the consideration of the committee, out from under the five-minute rule, by simply eliminating one section and offering the whole bill.

Mr. CHINDBLOM. Mr. Chairman, will the gentleman yield?

Mr. LAGUARDIA. Certainly.

Mr. CHINDBLOM. After this amendment has been acted upon, and amendments have been made to it, the original text will be read section by section and the gentleman will lose no opportunity to debate the original text.

Mr. LAGUARDIA. To do that we would have to vote the substitute down. What good is it or what effect will it have to amend the sections of the original text if the substituted bill is adopted in the manner suggested, to wit, as a complete bill?

Mr. CHINDBLOM. Each section will be taken up and a motion will be made to strike it out, and motions can be made to amend it. Each section of the original text will be read.

Mr. LAGUARDIA. Mr. Chairman, the gentleman from Louisiana [Mr. ASWELL] will have his rights protected by moving to strike out the particular sections to which he objects when we reach those sections regardless of the amendments or how an original section may have been perfected.

Mr. CHINDBLOM. And instead of being deprived of any opportunity for action or debate, the committee will get two opportunities to debate practically the same thing.

Mr. LAGUARDIA. Oh, no.

Mr. DOWELL. Mr. Chairman, I make the point of order that the proposed amendment is not germane, and I submit this proposition: The rules of the House are adopted for the purpose of allowing every Member a fair opportunity to present his questions squarely before the committee. That is the purpose of the rules of the House. Under the rules of the House the gentleman from Louisiana [Mr. ASWELL] will have a fair opportunity to move to strike out the sections he desires to strike out, and I think a point of order would not be sustained to a motion striking them out. Under his substitute amendment the gentleman seeks to operate this bill under a different plan than that submitted in the original committee amendment. I submit the gentleman has the opportunity to offer a separate amendment to strike out the equalization fee. In the present situation the gentleman from Louisiana is offering a substitute which entirely changes the operation of the proposed law, and therefore it is not germane to the original bill, which provides for an equalization fee.

Mr. LAGUARDIA. Mr. Chairman, will the gentleman yield at this point?

Mr. DOWELL. Yes.

Mr. LAGUARDIA. Besides that, Mr. Chairman, the gentleman from Louisiana could not offer his section 1 as an amendment to the present section 1, because they are identical. Therefore, what he hopes by his motion to do is to jump the entire bill up to the paragraph that he is interested in, instead of waiting his turn, when he may move to strike it out. Sections 1, 2, and 3 could not be offered as substitutes for sections 1, 2, and 3 of the bill we are considering, because they are identical.

Mr. DOWELL. Mr. Chairman, the question that is before the Chair just now is one which is not usually presented, because the orderly method is to move to strike out the section. The gentleman is seeking to entirely change the operation of this bill; he is seeking to have it operated under a different plan than that provided by the committee, which is clearly not germane to the original bill. It has been held time after time that no amendment can be offered and sustained that is not germane to the original proposition. His amendment merely amends certain things in the bill, and in that he seeks to entirely change the operation of the bill. When an amendment is offered that changes the entire operation of the bill, I submit his amendment is subject to the point of order.

Mr. FORT. Mr. Chairman, will the gentleman yield?

Mr. DOWELL. Yes.

Mr. FORT. If that were true, would an amendment to strike out section 10 be germane?

Mr. DOWELL. I have just stated that I think it would be.

Mr. FORT. Then why is it not true here?

Mr. DOWELL. It is not true here. I have just stated that the orderly and proper method is to move to strike that out if he does not want it, but it is not in order to offer a substitute which entirely changes this program without waiting in the orderly way to strike out what he desires to strike out.

Mr. Chairman, I think this a very important matter not only in respect to this bill but in respect to every other bill that may come before the Committee of the Whole. The purpose of the rule is to give everyone an opportunity to get his case fairly presented to the committee, and the gentleman has a plain remedy if he wants to accept it, to move to strike out the sections to which he objects. If this be permitted now, I say to the Chair that it will revolutionize the entire rules of the House by permitting amendments to be offered in the form of substitute bills entirely changing the operation of the proposed bill by leaving out the main part of the bill. I submit that

Members must observe the rules and go direct to the motion to strike out any particular portions they desire to strike out.

I insist that in this case the amendment or substitute offered is clearly not germane, because, if adopted, it changes entirely the operation of this bill; and under the general rules and under the rule that has been laid down by the Chair heretofore a bill or a substitute that is not directly in line and not germane can not be sustained.

I insist that this amendment is not germane, because an entire change in the operation of this bill is made by this substitute.

Mr. CHINDBLOM. Mr. Chairman, I ask that the motion of the gentleman from Louisiana may be again reported; not the amendment, but the motion. My understanding is that the motion was to strike out the first paragraph and substitute therefor the amendment offered by the gentleman, with notice that if the amendment be adopted the gentlemen from Louisiana will move to strike out the remaining sections.

Mr. ASWELL. My motion was to strike out all after the enacting clause and insert my amendment.

Mr. CHINDBLOM. If that is the motion, and it is agreed that it is, then, of course, as each succeeding section of the original text will come before the committee, you will have an opportunity to act upon each one.

Mr. DICKINSON of Iowa. Suppose you had a bill under consideration and you offered an identical bill as a substitute, but leaving out the word "money" or the word "and," or leaving out any part of the bill that happened to be essential for the bill to function, and then would come in here and instead of presenting an amendment to strike from the bill you would come in and offer a substitute with that left out. That is what you are running into. [Applause and cries of "Rule!"]

The CHAIRMAN. The Chair thinks that for the most part the procedure is very well settled respecting the questions which have been raised by this point of order. The Agricultural Committee substitute pending before this committee must be considered as an original bill under the rule, and the practice is well fixed that anyone, on the completion of the reading of the first section of a bill, may offer an amendment to strike out the section and insert a complete bill as a substitute, at the same time serving notice that if his substitute is adopted he will move to strike out the remaining sections of the bill as they are read. That is the exact situation before the committee now. There is nothing new or strange in that procedure.

The gentleman from Louisiana [Mr. ASWELL] states that the first few sections of his amendment are identical with the first few sections of the Agricultural Committee substitute and objection is made to his motion for that reason. As the gentleman from Illinois [Mr. CHINDBLOM] has pointed out, the motion of the gentleman from Louisiana is a substitute for the first section of the bill, and his motion incorporates the other sections of his bill in order to make a complete bill.

This question as to how far a substitute amendment has to differ from the original text of the bill was passed upon a few years ago by Chairman Towner in a situation something like this, as the Chair understands it. The committee had been considering some legislation and had taken certain action in regard to it. The gentleman from Illinois, Mr. Mann, did not approve of the action that had been taken, and at the completion of the reading of the bill offered a substitute, eliminating or changing in the entire bill only the word "and." The bill contained two sections. The change of the word "and" was the only change, as the Chair understands, that was made in the substitute from the original bill; and Chairman Towner held that the substitute was in order. In giving his decision Chairman Towner said:

> There are two methods by which substitutes for the entire bill may be offered. The first is to offer, after the first paragraph has been read, a substitute for the entire bill, with the notice that with regard to the succeeding sections of the bill as they are read a motion will be made to strike them out. That method has been used in a good many instances. In that case gentlemen will notice that, of course, there is no opportunity for amending any subsequent section of the bill, providing the substitute is agreed to.
>
> The other method is to offer the substitute for the entire bill at the conclusion of the reading of the entire bill, as was done in this instance by the gentleman from Illinois. Of course, in that case all of the amendments that have been adopted by the committee, whatever they may be, are stricken out if the substitute is adopted. If the substitute contains in effect or in actual language some of the amendments that are already agreed to, that does not deprive the mover of the substitute of the consideration of his substitute. That applies practically to the case that we have before us, in the opinion of the Chair. No matter what the effect of this substitute may be, it is the right of the committee to vote down or to support the motion of the gentleman from Illinois. The point of order is, therefore, overruled.

The Chair appreciates the force of the argument of the gentleman from Iowa [Mr. DOWELL] and recognizes that a situation might arise where, in striking out certain provisions of a bill the entire plan and scope of the bill might be changed. But the Chair does not think that that is the situation here. In this bill there are loan features and insurance features; and contract-agreement provisions which are still left in the bill, and it is a question, not for the Chair but the committee, to decide whether it wants to approve these different provisions with or without the equalization fee.

The Chair, therefore, overrules the point of order and recognizes the gentleman from Louisiana.

Mr. ASWELL. Mr. Chairman, I wish to state very briefly that I have adopted this course not to confuse or to change the procedure of the House but for the specific purpose of placing before the committee a concrete example in exact language so that you will see what the bill is before you vote on it.

And I wish to say, gentlemen, these specific and earnest words, that it is generally recognized that the bill as written can not become a law in this year 1928. The substitute I have offered——

Mr. DICKINSON of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ASWELL. Not now.

The substitute I have offered, it is generally agreed, can and will become a law if adopted. It is a complete bill, and it has been recognized throughout the hearings that with a $400,000,000 revolving fund, to be used partly as a loan feature to the enterprise, the fund is ample to test this plan of action; and Congress will assemble again next December and again the next year, and you will have ample opportunity to include the equalization fee at a later date if it is found desirable. But you would have ample funds to put into operation this bill exactly as it would be put into operation if you had many more millions of dollars. You will have ample funds now without an equalization fee; and my contention is that without the fee we do have a prospect of getting farm legislation at this time. [Applause.] I have made my motion for this purpose in the hope that we may have some farm legislation and not to do the vain and childish thing of putting through the House a bill that can not become a law. [Applause.]

Mr. BLACK of New York. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BLACK of New York. If the Aswell motion prevails and then a motion is made to strike out succeeding sections of the committee bill, sections 2, 3, 4, and so forth, and those motions are not carried, may we not be in the position of having three or four sections identical with three or four sections in the bill?

The CHAIRMAN. That is a matter, of course, for the committee to determine and not for the Chair.

Mr. BLACK of New York. Assuming that the Aswell motion is carried and a motion is then made to strike out section 2 and that motion is not carried, might we not have two sections in the bill of identical language?

The CHAIRMAN. The Chair can not assume the committee would do that, but it is a matter for the committee to determine.

Mr. DICKINSON of Iowa. Mr. Chairman, I rise in opposition to the amendment, and I ask unanimous consent to proceed for 10 minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to proceed for 10 minutes. Is there objection?

There was no objection.

Mr. DICKINSON of Iowa. Mr. Chairman, when you take the equalization fee out of this bill you destroy the heart of the bill. There is no way possible by which you can substitute money for the equalization-fee principle. There is no way by which money can stabilize the price of a commodity. The equalization-fee principle is the thing that is essential for farm relief. It is the one principle we have been fighting for during the last seven years, and the people who want to deny us the privilege of having the equalization-fee principle in the bill are the people who want to make farm relief absolutely nothing but a foolish piece of legislation.

Next, the man who has offered this amendment has been the man who has been bitterly opposed to farm relief ever since its beginning.

The one principle which those of us who are in favor of farm relief have been asking is that we have something that will bring a commodity within the control of the legislation, and if you do not have that you have absolutely nothing but the possibility of having, if you please, a combination that can control enough of the commodity to affect its price, and no one has ever dreamed that you will ever bring within the control of any

cooperative association organization under existing conditions a sufficient percentage of the commodity so that you will be able to have a bargaining power, which is the real basis of the McNary-Haugen equalization-fee principle.

Now, to say that you can have this kind of a law without the equalization-fee principle, and you can not have it with it, is to my mind a foolish statement. I know not the source of the gentleman's information, but I do say this, that no one I know of is authorized to say that this law can not become a law with the equalization-fee principle in it.

I do not know the strength in the Senate; I do not know the strength in the House, and I do not know the action which will be taken at the other end of the avenue, and I do not believe any person knows it, with the result that we have here the possibility of sufficient votes in both the House and the Senate, and we also have the possibility that with a changed piece of legislation complying with the provisions of the veto of last year there may be no veto this year, and to say that we can not have legislation if the equalization fee is left in the bill is reaching a conclusion that is not justified.

I want to say one thing more to you. If you take out the equalization fee you are going to turn the farmers of the country against the Members of the House who have voted to strike it out. I believe this thing has been before this country long enough to show that the great majority of the farmers of this country understand it, and with that understanding they are demanding just plain justice; that they be put within the protective-tariff system of this country, and if they are not, then they are going to take things into their own hands and see whether or not they are not in shape to force something through the legislative halls of this Congress and put men and women in the seats of Congress who will give them what they think they are entitled to. The only way you can give them that equality, the only way you can maintain the American standard, and the only way you can carry it out to the farm is under the principle of the equalization fee. Nobody has offered anything anywhere, at any time, that is a substitute for the equalization fee.

The gentleman from New York says it is unconstitutional. He is the same kind of a lawyer I am, and his conclusion is no better than mine, and the rest of the lawyers in this House have disagreed about it.

Next, the farmers of this country demand one more thing, and that is that the constitutionality of a law be left to that branch of the Government which is set up to determine such a question. Under the organic law of this country, as at present formulated and constituted, there is a judicial body set up to determine the constitutionality of a law. This thing has been before this country so severely and so long that you are not going to satisfy the farmers who are interested in this legislation by coming here and heralding the fact that four or five Members of Congress say it is unconstitutional. They want the Supreme Court of the United States to pass on this principle, and they are not going to be satisfied with anything less. This is not the first great legislative act that came before Congress which was heralded as unconstitutional. You can go back and read the old tariff debates, and you will find that exactly the same charges were made against the protective tariff principle that are now being made against the equalization-fee principle in this bill.

Therefore, if that is the case, we want the one body that was constituted under our organic law to tell us whether this is constitutional or not. We do not want the individual opinion of any Member of Congress. We want the decision of the duly constituted body under our Constitution to say whether it is constitutional or not, and we are not going to be satisfied with any Attorney General's opinion or the opinion of anybody else, because the farmers have been working on this thing for all these years and they know that when you take out the equalization fee you take out the heart of the legislation. Why? Because it is the thing that brings the commodity within the control of the machinery, and the very reason our cooperative organizations have not been able to succeed is because so much of the commodity stays outside of their machinery that it wrecks their whole plan of price stabilization, and for that reason you have got to have some additional machinery that will put the commodities within the control of this legislation.

Just one more thing. Big business is claiming we are doing something for the farmer that we have done for nobody else. Now, this is absolutely untrue, and let me tell you why. Big business has been able to bring within its control a sufficient percentage of their commodities so that they have the exact bargaining power that we are asking here that the farmers shall have.

They also say you can work cotton without the equalization fee. Let me say to you that you can not work cotton without the equalization fee for the reason that the equalization fee is the security they will have in their cooperative organizations against a loss that they can not absorb, and you must either have the equalization fee to overcome this loss or you must pay it out of the public funds, which the farmers of this country do not want you to do.

I was amused the other day to read a press report that the Congresswomen from Massachusetts, [Mrs. ROGERS]—and I am sorry she has just left the room—had stated that the cotton spinners of this country would be at a disadvantage because the cotton spinners of other countries would be spinning cotton and would not have to pay an equalization fee. Let me suggest to you that we produce 60 or 70 per cent of the cotton in the United States and our price determines the price of the world, and for that reason the world price would go into the wheels of the spinners everywhere, and you would have nothing to do with difference between the price in Europe and the price here, but you would have a charge against the producer of the original commodity and it would be equally distributed. This is the very principle we have contended for and is one that would bring the cotton within the control of an organization of this kind. Then you have the whole cotton area of the United States fluctuating along hoping they can borrow enough money against their cotton to carry it over a depressed period, and if they can not do this, then the cooperative organization "busts" and is ineffective in its purpose.

Take the tobacco pool which is the best illustration of this principle that I know. If you had had an equalization fee whereby you created a sinking fund and brought in sufficient money to bridge over the low-priced period, then you would have had an effective piece of machinery which otherwise is absolutely no good whatsoever.

I want to say to you that if you adopt this amendment you are destroying farm legislation. Do you think, either as Republicans or Democrats, you can go out and sell this kind of theory to the country because it can not be done. I have been among them during all these years. I believe I was one of the earliest converts to this legislation and I have been working at it ever since. I want to say to you that the people of this country who are behind the farmers, as well as the farmers themselves, thoroughly believe that they got to have this type of machinery or they might just as well not have any legislation at all.

This means equality for agriculture and that is what we must have. If you are going to go on and continue to centralize and industrialize the United States, then you are going to have deterioration in your farm population all along the line.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. FORT. Mr. Chairman, I rise to offer an amendment to the substitute.

The CHAIRMAN. The gentleman from New Jersey offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. FORT to the Aswell substitute: Page 13, line 14, strike out all of section 9.

Mr. FORT. Mr. Chairman and gentlemen of the committee, the substitute as offered by the gentleman from Louisiana, Doctor ASWELL, with the amendment which I offer, and one or two relatively minor amendments, will meet the situation which a day or two ago I said on the floor would constitute a bill which, in my judgment, could be supported by every Member of the House.

I understand the gentleman from Louisiana does not seriously oppose the amendment which I propose.

Mr. KINCHELOE. Will the gentleman yield for a question?

Mr. FORT. Yes.

Mr. KINCHELOE. Is section 9, the section which the gentleman refers to, the marketing-agreement section?

Mr. FORT. It is the marketing-agreement section.

As I explained to the House the other day, without sections 9 to 12——

Mr. ASWELL. Will the gentleman yield?

Mr. FORT. Yes.

Mr. ASWELL. So far as I am concerned I have no objection to striking it out.

Mr. FORT. If there is no objection, is there need of debate. I will submit that as a parliamentary inquiry.

The CHAIRMAN. The Chair does not feel that is a parliamentary inquiry. It is too much responsibility for the Chair to take.

Mr. FORT. If the gentleman accepts the amendment, is the amendment a part of the gentleman's proposal?

The CHAIRMAN. The gentleman can not accept it, except by unanimous consent of the committee.

Mr. FORT. Then I ask unanimous consent.

The CHAIRMAN. The gentleman from New Jersey asks unanimous concent that section 9 of the Aswell amendment be stricken out. Is there objection?

Mr. SUMMERS of Washington. Mr. Chairman, I object.

Mr. FORT. Mr. Chairman and gentlemen, the purpose of my amendment is this: As was explained to the committee a day or two ago section 9 is the section of the bill and the only section of the bill under which contracts with packers, millers, and other processors is permitted. Section 9 is the only section that puts the Government of the United States squarely in the business for its own account of buying and selling food products. Section 9 of the bill with the equalization fee out submits the Treasury of the United States to a charge far in excess of the entire revolving fund annually.

Unless section 10, the equalization-fee section, is to stay in, I take it that no proponent of the legislation would ask to have section 9 in. If, therefore, the substitute offered by the gentleman from Louisiana which eliminates the equalization fee is to be adopted section 9, which no one would advocate, unless the equalization-fee provision were in, should come out.

Mr. HOCH. Will the gentleman yield.

Mr. FORT. Yes.

Mr. HOCH. I call attention that section 9 refers to the stabilization fund.

Mr. FORT. The amendment of the gentleman from Louisiana strikes out all reference to the stabilization fund and the equalization fee.

Mr. HOCH. I will ask the gentleman from Louisiana if his amendment leaves in the language of the stabilization fund?

Mr. ASWELL. It does not. It strikes out all reference to the equalization fee, and the words "stabilization fund" are not in there.

Mr. ABERNETHY. Will the gentleman yield?

Mr. FORT. Yes.

Mr. ABERNETHY. I understand the gentleman wants farm relief?

Mr. FORT. I do.

Mr. ABERNETHY. Many of us who have honestly supported the bill heretofore, including the equalization fee and all, would like to support a bill containing the provisions of the Haugen bill without the equalization fee.

Mr. FORT. I yielded to the gentleman for a question.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. FORT. Mr. Chairman, may I have five minutes more?

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. FORT. Now, gentlemen, let us be perfectly clear in what we are doing. With section 9 in the bill even in the form the gentleman from Louisiana would leave it, we are definitely giving to the Federal Government the power and the duty of engaging in the trade in commodities for the account of the Treasury of the United States.

The profits and losses of the agency employed are a charge or a credit to the Treasury. With no offset, with no deduction, the charges of the agency employed which include its profits for its services are paid out of the Treasury of the United States.

With this section in, even though section 10 comes out, we are embarking on the wildest program for the Government in business that has ever been considered by anybody—far more so than would be the case if we adopted the bill even with the equalization fee.

Consequently as the proponents have never asked that we engage in the operation without the fee, and as the opponents have objected to our engaging in business without the fee, it seems clear that the section should be stricken from the substitute.

Mr. LEAVITT. Will the gentleman yield?

Mr. FORT. I yield.

Mr. LEAVITT. The gentleman means the Aswell proposition to the House measure is as vicious as the gentleman says it is.

Mr. FORT. In my judgment—through misinformation as to the effect of striking out all of the language which he moves to strike out.

Mr. LEAVITT. That would mean that we should be suspicious of a proposition from the gentleman from Louisiana.

Mr. FORT. I do not think so; I think the gentleman from Louisiana is a sincere, able, hard-working member of the committee.

Mr. ANDRESEN. Does not the gentleman think some part of section 12 should be stricken out?

Mr. FORT. I have an amendment that strikes out four lines which I shall offer later.

Mr. FULMER. Mr. Chairman and gentlemen of the committee, I want to call attention to the argument of the gentleman from New Jersey just made. If you strike out section 9 you will bring the proposition back to the original plan of the gentleman from New Jersey—simply a loan proposition to the farmers. Under section 9 this board will have the privilege of arranging through an agency by advancing of money out of the stabilization fund to enable this agency to go into the market and take all or a part of the surplus off the market so as to be able to hold it and feed it back into the market in an orderly way and thereby stabilize the price. That has been the contention of the gentleman from New Jersey in the committee and all through the proceedings. I hope that the amendment will not be accepted.

Mr. STEVENSON. Mr. Chairman, will the gentleman yield?

Mr. FULMER. Yes.

Mr. STEVENSON. Does the gentleman want us to vote in the equalization fee or take it out?

Mr. FULMER. I make the same statement to the gentleman from South Carolina that I made yesterday in my speech. While I have gone along as earnestly as I could for this bill in the interest of the farmer, yet unless we can adopt certain amendments which we tried to adopt in the committee I shall have to vote to strike out the equalization fee.

Mr. ADKINS. Mr. Chairman, everyone knows that for some years back the fight over this farm-relief legislation has been in respect to the equalization fee. The interests and the people generally who are opposing the bill I believe would favor any sort of a bill or any amount of money to be taken out of the Treasury if we would eliminate the equalization fee. Why all the concern on the part of the opponents of this type of legislation over the equalization fee? If they were paying it, or if the Public Treasury were paying it, there might be some reason for it, but if the farmer himself proposes to pay it, and if it enhances the price and stimulates overproduction, then no one is hurt except the farmer. If all of the things said about it could come to pass, the farmer is the fellow who pays the bill. Why the objection to it?

Gentlemen, you will remember that in the beginning of this Congress I made a speech here stating what I thought Congress should do. I said that Congress should meet every objection raised by the President in his veto message but one, and that we should meet the President more than half way if possible on his objection to the equalization fee. I said that I did not believe it was possible to operate a scheme of this kind, for a few years, at least, unless you could take care of the loss by spreading it out over the entire production through this equalization scheme, that your cooperative associations could not afford to do it or shoulder the load themselves.

Mr. Chairman, there are men here who are just as anxious to secure farm relief as I am. They met me in the cloak room and said, "My God, let us not put the equalization fee up to the President again. If we do, it will be vetoed, and we get no farm legislation at all." Many of them thought that we had better adopt the very "layout" that Doctor ASWELL has proposed rather than go home without anything, and they said that we could then come back again next Congress and make a fight for the equalization fee.

I set that all out in a letter to the leading farmers in my community, and to the heads of the farm organizations and to everyone interested. I specifically set out the statement that unless a large number of Congressmen and the President of the United States changed their minds, if we got any farm-relief legislation we would have to eliminate the fee. What was the result? Out in my country 94 counties were represented in their State farm bureau organization convention at Rock Island. Our Illinois Bankers' Association was in session in the same city at the same time. My letter was out there and the speech I made was out there. They got the people around the table, the representatives of those 94 counties, and read the speech that I had made and the letter that I wrote. They talked over the situation and what it would be in the event that they secured a law without the fee. They were not wild-eyed fellows; they were not men who were there just playing politics. They were there to consider a proposition that meant much to them. What was the universal verdict?

They said, "We will be just like we were 25 years ago when we started the local co-ops, and we applied the penalty clause. If we had not done it, the existing agencies would have put us out of business. Without the fee we are not getting anything outside of the loan and the board that we

have not already got. The only thing Congress would hand us would be this board in Washington and an opportunity to borrow an additional amount of money, and we will lose what we borrowed and be in the same fix that the tobacco men were and the cotton men were and the grain men were who undertook to control the surplus. We will go broke and lose this money."

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. ADKINS. Mr. Chairman, I ask unanimous consent to speak for five minutes more.

Mr. ABERNETHY. Mr. Chairman, reserving the right to object, I am not on the Committee on Agriculture, but like many others I can not get recognition as long as the members of the committee seek it. If we are going to be given some chance to debate the bill, well and good. I would like to have five minutes myself on this proposition at some time during the day.

Mr. ADKINS. As far as I am concerned, the gentleman can have five minutes, and if they will yield me five minutes I will be very glad to yield it to the gentleman.

Mr. ABERNETHY. Oh, I shall not object, but I want an opportunity to say something.

Mr. ADKINS. There is no desire on my part to "ring" anybody off.

The CHAIRMAN. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. ADKINS. Mr. Chairman, those men thought and talked it all over. They were directly affected. They sent their representative down here, as high-class man as there is in this country. We sat down and talked it over. They outlined their objection and they had the picture before them clearly where they would be in the event that they started the proposition without the fee. It took half the night to talk it over. What would happen? They felt that they would lose their loan and be back here next session and that everybody would be laughing at them. They said, "Our whole effort for the past four or five years to work out a program for agriculture, a long-time program, will be gone." Mr. Chairman, that is the situation that exists in my country.

Mr. McKEOWN. Mr. Chairman, will the gentleman yield?

Mr. ADKINS. Yes.

Mr. McKEOWN. What does the gentleman think of the prospects of the approval of legislation with the equalization fee in it? If the gentleman can give us any assurance that it will be approved, we will go along with him.

Mr. ADKINS. Oh, that is not our responsibility. The gentleman will recall that the legislative body that passed the homestead act, and sent it down to the Executive and the Executive disapproved it. But the legislative body believed in the principle and they came back again with more information and passed it, and it eventually became a law. I do not think that our responsibility as one of the coordinate branches of the Government should be swerved or influenced by the attitude of any other branch of the Government.

So it is the merits of this proposition that we are going into. Who knows whether this purpose will be attained? They say there is no stabilization fund provided. Of course not. The big speculative interests do not want the market stabilized. You would have as much chance to go out with a loan to this board to stabilize the market and settle the variations up and down as you would have to win the Kentucky Derby by substituting a jackass for a thoroughbred. [Laughter.] You would not accomplish the things that are sought under the operations of this bill.

Mr. SUMMERS of Washington. Mr. Chairman, will the gentleman yield?

Mr. ADKINS. Yes.

Mr. SUMMERS of Washington. Were the representatives in the 94 counties you speak of for the bill with an equalization fee?

Mr. ADKINS. Yes.

Mr. SUMMERS of Washington. And the bankers of Illinois took what position?

Mr. ADKINS. The bankers at the same time adopted a resolution while they were in session, declaring that if they could not pass the bill with the fee they should not pass any law at all. That was the action of the Illinois Bankers' Association.

Mr. SUMMERS of Washington. They were for the bill with the fee?

Mr. ADKINS. Yes; and without it they said we would be better off without anything.

Mr. LAGUARDIA. I do not think the gentleman should press that argument, because I do not think the farmers have anything particularly in common with the bankers.

Mr. ADKINS. The bankers have their notes. That is the trouble.

Now, here is a man who has sent you all a little book. He has spent 30 years of his life in the grain trade. He is now retired. If you have read it you will notice that he comes to this final conclusion at the end of the little volume here, where he says, in substance, that we do not know whether this will do all that we hope for it, any more than any other legislation; but, my God, we ought to try. And in the wind-up he comments on this bill. This is the exact language from a trader who has spent 30 years of his life in the grain trade. I will read it. He says:

Finally a concerted move is being made to secure Government assistance through legislation in the form of a decree by Congress known as the McNary-Haugen bill. If any legislation can be enacted which carries with it the possibilities of Government appointees taking away from terminal markets the accumulated surpluses which are used as the basis of short selling of futures in pits and can assist in placing grain into consumption and out of storage, to get grain into an invisible supply instead of the visible supply, then farmers should rally to such a movement. With the limited education which now exists among farmers and wage earners and industrial organizations as to present requirements, the McNary-Haugen bill should become effective. It may do some good. There is a chance. The word "chance" is used because there is always a risk involved in Government appointees securing relief for farmers when Government is more likely to be controlled by the terminal rather than rural interests.

To have our Government in the business of merchandising grain is not an ideal method of commercial practice. It may be assumed to be as good or better than present monopolized and promiscuous practices. If we know no better, let us accept the plan which has a chance at least of some improvement.

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. ADKINS. Mr. Chairman, may I have two minutes more?

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for two minutes more. Is there objection?

There was no objection.

Mr. ADKINS. I have read to you the judgment of a man who has made his money under the present system of marketing grain. That is the idea that the farmer himself has in mind. He says, in substance: "Let us try this. We will pay the bill. If it is wrong, it is our funeral. But do not let us start out on a scheme that has fallen down in every effort made heretofore by a small minority." [Applause.]

Mr. KINCHELOE. Mr. Chairman, I have no desire to take the floor at this time. I did not intend to, but I did not know that this substitute would be offered at this time. But I owe a duty to the Members of Congress from the cotton-growing States. The gentlemen who were here will remember that the other day I put in the RECORD some amendments that I desired to offer under the five-minute rule. One of those amendments is the one in which I am especially interested, and I think every man from the cotton-growing States is interested in it. It provides that this board shall not levy an equalization fee upon any commodity unless the advisory council for that commodity shall first agree to it. At my solicitation the drafting service has carefully drafted this amendment. I understand from them that there is no constitutional inhibition against it at all. I will ask the chairman of the Committee on Agriculture if he will agree to this amendment?

Mr. HAUGEN. As the gentleman will recall, in the committee I stated that if he prepared an amendment which was constitutional, I for my part, speaking for myself, would not object to it. I am not now speaking for the committee, but I have conferred with a number of members of the committee, and I understand they will make no objection to the gentleman's amendment. There may be an exception or two on the committee. I have talked with members on this side. I have not spoken of it with those on the other side.

Mr. KINCHELOE. Do I understand the gentleman will make no objection?

Mr. HAUGEN. I will make no objection to the gentleman's amendment.

Mr. KINCHELOE. I thank the chairman. Now, gentlemen, you are going to vote in a few minutes on the question as to whether you will eliminate the equalization fee.

Without an amendment like this on the McNary-Haugen bill, the board can go and levy an equalization fee without the consent of the commodity advisory council; but under this amendment which I have offered, which the chairman says he will accept, they can not levy an equalization fee on the cotton

or any other commodity without the consent of the members of the commodity advisory council agreeing to it.

Mr. BRAND of Georgia. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. BRAND of Georgia. Is the amendment to which the gentleman refers, and to which the chairman of the committee has no objection, identical in language with the one that is printed in the RECORD?

Mr. KINCHELOE. No.

Mr. BRAND of Georgia. Then the gentleman has a revised amendment?

Mr. KINCHELOE. I have a revised amendment from the drafting service.

Mr. BRAND of Georgia. Can we see that?

Mr. KINCHELOE. Yes; I have several copies here. In that connection I have two assurances. The drafting service assures me this will accomplish the same thing that my other amendment would accomplish, and that, in their judgment, there is no constitutional inhibition about it.

Mr. BRAND of Georgia. And that amendment is one that Mr. Haugen agrees to?

Mr. KINCHELOE. Yes.

Mr. STEVENSON. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. STEVENSON. The advisory committee, as I understand it, is to be appointed on the recommendation of the cooperative organizations?

Mr. KINCHELOE. Yes.

Mr. STEVENSON. Does not the gentleman know that the cotton cooperatives are all on their last legs and are doing their utmost to force the cotton farmers into this thing, so they will have to pay their expenses?

Mr. KINCHELOE. No; that is not exactly the provision in this bill. The bill provides that the commodity council shall be appointed from a list submitted by cooperatives and other farming organizations. Of course, I want this amendment in for all commodities, and I simply rose for the purpose of getting information from the chairman of the committee for the benefit of cotton people before they voted on this substitute.

Mr. FORT. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. FORT. Does the gentleman's amendment have reference only to the operation of the equalization fee?

Mr. KINCHELOE. Yes.

Mr. FORT. Then the gentleman's amendment, which would be reached before the reading of the fee section, would be useless if the fee were stricken out, would it not?

Mr. KINCHELOE. Yes; but it would be harmless if it were stricken out.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. HASTINGS. Mr. Chairman, this is a bill to equalize agriculture. Its short title is "The surplus control act."

It is really a bill the purpose of which is to assist the farm producers of the country to market their products. We have been giving close study for a number of years to the principles involved in this bill. The entire country is intensely interested in it. The report shows we have 6,500,000 farmers in the United States, all of whom have gone through a period of unusual depression not shared to anything like the same extent by the other industries of the Nation.

OPPOSED AS CLASS LEGISLATION

It is urged by those who oppose the bill that it is radical legislation, and for that reason should not be enacted. That may be true, but we have enacted legislation for other classes, and therefore because this legislation goes to the relief of the farmers should not be a sufficient reason for opposing the bill.

It is urged that it is class legislation and paternalistic, and some of our friends raise their hands in holy horror at the mention of it. Practically all of the general legislation enacted by Congress benefits some class or industry more than others. We have enacted tariff legislation for the protection of the manufacturing industries of the Nation, necessitating every farmer to pay a higher price for practically everything he buys.

That legislation is declared economically sound by those who oppose this bill, though they must admit that it is in the interest of the manufacturing classes.

LEGISLATION FOR OTHER CLASSES ENACTED

In 1913 we passed the Federal reserve act for the protection of the banks of the country in times of depression, affording them a financial reservoir to which they could go in times of stress. It was a great piece of constructive legislation, but I invite attention to the fact that it was more particularly in the interest of those engaged in banking. That legislation was not denounced as paternalistic, but while it was pending consideration in Congress it was denounced as economically unsound. However, since it has been in operation it has been universally recognized as wholesome legislation.

Congress enacted the interstate commerce act in 1887. This was a radical departure at the time, being for the regulation of the railroads. It was strongly protested, but now its merits are recognized.

We have appropriated $2,150,000,000 in aid of our merchant marine. The contribution of this vast sum out of our Federal Treasury in aid of the shipping industry is hailed as economically sound and not paternalistic by those who oppose this bill.

We created the Tariff Commission which is spending vast sums of money annually to raise duties on imports and thereby enhancing the prices to the consumers of the country, and it has never lowered them except in three minor cases, namely, long-handled paint brushes, bob-white quail, and mill feed.

The fact is, let me repeat, that practically all of the general legislation which Congress enacts is far-reaching and more in the interest of certain classes than of others, and the argument, therefore, that this is class legislation designed to help particularly the farmers of the country, should commend it instead of condemn it.

We gave land grants to railroad companies to build their lines across the continent some 60 years ago. I am not criticizing this legislation, but am inviting attention to it to show that Congress has extended legislative relief to various business interests and industries.

Let me cite another illustration: Through acts of Congress we have restricted immigration, and I voted for that. Under existing laws approximately 150,000 immigrants of the quota class may now be admitted annually to this country. In 1907, 1,207,000 immigrants were admitted. This legislation was in the interest of labor and to the extent of those excluded prevented cheap labor from competing with the labor in this country. Immigrants should not be permitted to enter our country faster than they can be assimilated into our citizenship.

This bill is further opposed because of the financial assistance which it authorizes to be appropriated and used for the benefit of the farmers. We remitted to foreign governments on their war loans $10,705,000,000—all of which I voted against—because it was insisted they were unable to pay. When we insist that the Government should supply a revolving fund to assist the farmers, in the two ways provided for in the bill, in the orderly marketing of their products and to secure a fair price for them, it is criticized as class legislation and paternalistic and is denounced as a subsidy.

It is urged by those opposing the bill that there is no necessity for this legislation. Let us examine that argument and see if it be true.

OTHER REMEDIES PROPOSED

It is insisted, among other things, that diversification of crops is the proper remedy. It is admitted by everyone that the farmers should diversify in so far as conditions will permit. It must be remembered, however, that a number of things must be taken into consideration.

A man writing articles or speeches on agriculture in a 10-story building in the East does not understand the practical problems confronting the farmers. No one emphasizes the advantages of diversification more than I do. I want to stress it in every possible way. I have been urging it upon my farmers in practically every speech on agriculture which I have made. We must recognize, however, that certain conditions, financial and otherwise, prevent ideal diversification. In the first place the climate dictates to a certain extent what may be grown in a particular locality. To illustrate, you can not grow cotton in the Northern States and wheat can not be grown in many fertile valleys or in a sandstone formation. When we stop to think about it we must take into consideration both the soil and the climate when we urge diversification.

In the second place untold thousands of farmers are not in a financial condition to adopt complete diversification. In order to raise on the farm practically everything that is adapted to the soil the farmer must be financially able to own stock that will consume the products he raises. Speaking for the great mass of the farmers they are now in such a deplorable condition financially that but few of them own livestock to which may be fed the diversified products that may be grown upon the farm. These farmers therefore are compelled to raise such products as may be sold upon the market to secure money to meet their immediate needs. Again, a large number of farmers belong to the tenant class and are compelled to move from place to place and can not plant permanent crops demanded by diversification. The tenant farmer can not set out an orchard, nor can he sow alfalfa, clover, or other farm products which produce over a series of years, for the reason that

he does not know how long he is going to remain on that particular farm. These farmers therefore must of necessity, in a large measure, grow money crops.

Of the 197,000 farms in Oklahoma 115,000 are occupied by tenant farmers.

In my State most of the farmers are in distress and must have financial assistance, either from banks or business houses and must mortgage their crops to secure the same, and to do this must raise crops which can be sold for cash to liquidate their debts.

Again, it is urged that cooperation is the proper remedy. This is very strongly urged by the Secretary of Agriculture and by all of those not in sympathy with this bill. I am strongly in favor of cooperative associations, yet in the consideration of this remedy we must meet the actual practical facts. The farmers are scattered from ocean to ocean, some are located in sparsely settled communities, and because of their raising in small quantities the various farm crops, and because of their financial necessities, only about 7 per cent of the farmers have been induced during the past 25 years of strenuous efforts to join cooperative associations. But few of the tenant farmers have been brought into these associations.

TARIFF REDUCTION URGED

It is insisted that the tariff should be reduced. Many of those who oppose the bill, both in Congress and throughout the country, criticize the bill as not being the proper remedy. They insist that we should revise the tariff downward so as to insure lower prices for manufactured articles to the consumers. I favor a material reduction of the tariff duties on necessities and would vote for such a remedy. However, this would only be a partial remedy, and would not completely meet the situation. Everyone here knows that tariff reduction can not be accomplished during the present administration.

I can not understand the reasoning of anyone who attempts to convince the consuming public that tariff duties which raise the price which consumers pay for the necessities of life are for their benefit. Nor do I have any patience with the argument leveled at the farmers to attempt to convince them that a tariff duty on farm products would be to their benefit.

In 1921 the emergency tariff bill was enacted. Instead of the prices of farm products going up they went down. Everyone knows that where we raise an exportable surplus the tariff can be of no benefit on agricultural products. Take cotton for example. We export approximately 60 per cent of our cotton. We are attempting to find not only a domestic but a foreign market. A tariff of 50 cents per pound on cotton would be of no benefit to the cotton producers of the country. What is true of cotton is true of other agricultural products where we raise an exportable surplus.

I was raised on a farm. I own farm land. Every person in my district is either directly or indirectly dependent upon the farmer. They all sympathize with him. They do not believe he gets a square deal from our Government. I share this belief.

REDUCTION OF FREIGHT RATES PRESSED

Again, there are those who insist that freight rates should be reduced and, of course, to the extent of the reduction the farmers would be benefited. They receive the market price at a central point less the freight rates. I think no one believes that Congress, as at present constituted, could be induced to amend the Esch-Cummins Railway Act, which I voted against. If we can not apply the remedy of reduced freight rates, why withhold the remedy provided in this bill?

The truth is that those who are opposed to legislative relief for the farmers make an effort to find some other plausible excuse for opposing legislation for their benefit.

Let me repeat that the idealist in the East does not understand many of the pressing practical problems which face the farmers.

LOSS OF FARMERS (1920–1925) STAGGERING

The necessity for such legislation is recognized and admitted by all, but that admission does not fully present the full picture. When a patient is sick and struggling for life heroic measures are resorted to by his physicians and often a surgeon's knife must be used. The farmers are in that condition to-day. Since 1920 they have gone through a period of depression that is hard to describe and which can not be exaggerated.

What are the facts? During the consideration of this bill in the last session of Congress it was asserted and not denied that during the five years from 1919 to 1925 the exchange value of the farm products of the country had shrunk $13,000,000,000. The shrinkage of farm lands has been from $54,800,000,000 to $37,800,000,000, or $17,000,000,000. In other words, the loss to the farmers in the value of their products and the loss in value of their lands has been $30,000,000,000, or as much as was spent by the United States in the recent World War.

The report of the Secretary of Agriculture shows that the exchange value of farm products for manufactured products in 1925 was 60.3 cents. The farmer lost, in exchange value, 39.7 cents out of every dollar. The farmers contributed that amount out of every dollar to the industrialists of the East. No wonder the manufacturers are prosperous. The farmers of the West and South pay the toll.

FARMER'S INCOME COMPARED

The average income of the farmer, according to the last report, is approximately $730 yearly, and this includes the labor of the farmer, his wife, and other members of his family. Out of the $730 annual income there is deducted $630 for the living expenses of the farmer and his family, leaving him for clothing, education of his children, recreation, and other expenses, the sum of only $100 yearly. Contrast this with the average income of the industrial and clerical workers which is reported to be $1,415 per year, almost double that of the farmer. The industrial and clerical worker, generally speaking, is comfortably housed, and works about eight hours per day, while the farmer and his family work longer hours and all contribute their labor.

HAZARDS OF FARMERS

The farmers are exposed to all kinds of weather conditions—cold and heat, excessive rains and snow, with attendant floods overflowing cultivated fields, destroying fencing, washing away soil, and planted crops, oftentimes necessitating their replanting, and from pests such as boll weevil, pink bollworm, chinch bug, corn borer, and in fact every kind and character of pest imaginable.

The freeze frequently takes the entire fruit crop. Many times maturing crops are lost by drought, excessive rains, or other weather conditions, or pests. These hazards of the farmers, causing loss of time and great and unexpected financial losses, are not appreciated or experienced by the comfortably housed clerical or industrial workers, whose incomes are secure and which are double the incomes of the farmers.

Let us examine with a little more care the losses sustained by the farmers:

The cattlemen during this five-year period lost $2,360,000,000, and without exception every single one of them who did business on a large scale and on borrowed capital went broke. The hog producers during this period lost $2,680,000,000. The corn producers lost over $1,000,000,000 and the wheat farmers over $1,150,000,000. During part of this period cotton sold below the cost of production. Last year, because of the ravages of the boll weevil, a fair price was maintained for cotton, but in many sections—and this is true of my district—little or no cotton was raised, and in some fields not a lock of cotton was picked.

Added to these conditions the report given out on September 15, 1925, through the Department of Agriculture predicting the downward price trend of cotton lost the farmers of the South many millions of dollars. We are trying to prevent this by legislation.

No wonder the farmers of the country are demanding legislation at the hands of Congress because of their deplorable condition. This condition can not much longer continue. The farmers and small business men located in the agricultural communities throughout the South and Middle West will not stand for it. They are demanding and are entitled to the enactment of legislation that will equalize their condition with that of other industries.

I have called attention to the small income of the farmer and the much larger income of the industrial and clerical workers. This inequality is due to the fact that the consumers of the agricultural sections pay tribute on account of special class legislation.

In 1926 the United States Steel Corporation declared a 40 per cent stock dividend in addition to the regular quarterly dividend and placed an enormous amount to its surplus. The duty on pig iron was raised 50 per cent for its benefit.

The statistics show that the average farm dividend is less than 2 per cent. The farmers have been reduced to industrial slavery. They have mortgages upon their farms reported to amount to $12,250,000,000. Is it any wonder, then, that they are earnestly and insistently asking Congress for some relief?

MORTGAGE FORECLOSURES—FARMS SOLD FOR TAXES

The reports show that more farms were sold for taxes in my State during 1927 than in any previous year of our history. Mortgages are being foreclosed in surprisingly large numbers. Everyone who represents the farmers of the Middle West knows that this picture is not overdrawn. Nor are conditions improving. Surely this Congress should not adjourn until this most important question is carefully considered and relief legislation enacted.

Statistics show that 2,150,000 people removed from the farm during 1927, and even taking into consideration removals from

the city to the country and the number of births on the farm, there were 1,000,000 fewer people on the farms at the end of 1927 than during the previous year.

At the close of the Civil War two-thirds of the population of the country lived on the farm and the remainder in the cities. Now the reverse is true. Approximately one-third reside in the country and the remainder in cities and towns. Why is this true? The answer is that the people are trying to better their condition which, on the farm, is almost intolerable.

BANK FAILURES DUE TO FARM CONDITIONS

It should not be necessary to further argue the depressed condition of the farming industry, but let us examine the bank failures from 1920 to 1927. The report of the comptroller shows that during those eight years there were 3,941 bank failures, with aggregate deposits of $1,185,503,104. Of these failures 2,818, with deposits aggregating $726,365,778, were in 12 agricultural States. The great agricultural State of Iowa headed the list with 367 bank failures, with deposits aggregating $142,777,255. My State, I regret to say, had 209 bank failures, with deposits aggregating $45,356,270. The other 12 States were in the following order: North Dakota, 364; Minnesota, 299; South Dakota, 293; Georgia, 253; Missouri, 198; Texas, 189; Montana, 188; South Carolina, 158; Nebraska, 152; and Kansas, 148. The report for the past year shows that instead of conditions improving there were more bank failures than during any previous year—135 national banks and 689 State or private banks having failed, or an increase of 193 State bank failures for the year ending June 30, 1927, over the previous year. Two-thirds of these failures occurred in the 12 agricultural States of the Middle West, and were largely due to the depressed agricultural conditions. The failures in the Western States, including Wyoming and Colorado, because of losses on livestock were proportionally as great.

The commercial failures in the agricultural States reflect the bad condition of the farmers. There were 21,773 commercial failures in 1926 and 23,146 in 1927. There were 48,758 bankruptcy proceedings instituted in 1927, with liabilities of $80,000,000 more than in 1926. This is the result of bad agricultural conditions showing that instead of conditions improving they are growing worse.

ALL FARM ORGANIZATIONS INDORSE IT

This bill has been carefully studied and analyzed by every farm organization throughout the country. Differing as to minor details they all approve it. It has the support of the Members of both Houses reflecting the sentiment of the great agricultural States of the country. Analyze the vote this year in the Senate and in 1927 in both Houses of Congress, and it will disclose that those who represent the great agricultural sections of the country have given it their earnest and hearty support.

This bill should not be viewed from a partisan standpoint. Each Member must make his own record and, if the voters of the country would keep constantly in mind such major questions as this, which so vitally affects them, and not be diverted to questions of lesser importance, they would go to the polls and exert a controlling voice in the affairs of the country.

The farmers have not in the past been sufficiently organized. Many neglect to go to the polls. A large number vote their prejudices. The industrialists of the East are closely and compactly organized, always active and alert, and are able to poll their full vote on election day, and to frequently elect representatives who join in either preventing legislation for the benefit of the farmer or the adding of destructive amendments which will nullify such legislation.

The Cotton Growers Association of my State has heartily indorsed this bill. The State Bankers Association in 1927 indorsed it by resolution. The small business man appreciates that his prosperity is vitally affected by the welfare of the farmers. He has, therefore, deep interest in legislation that will enable the producers to realize the cost of production plus a reasonable profit for their farm products. Their interests are mutual.

Many of the farmers have not had an opportunity to carefully study and analyze the provisions of this bill. They know that it is an effort to legislate for their benefit and better their condition. They therefore welcome any legislation proposed for their advantage.

All kinds of imaginary objections to the bill are presented through the press, in the debates in Congress, and in private conversation. No important legislation has ever been enacted that destructive criticism has not been leveled against it.

When the Federal reserve act was being considered in 1913 almost every banker was opposed to it and predicted all sorts of dire consequences if it were enacted. I know of no outstanding banker in my State who favored it. Now, after it has been in operation for about 14 years, I know of no banker who opposes it. It is universally commended. I might add that this is true of much of the general and far-reaching legislation enacted by Congress.

The language of a bill is more or less technical, not always easy to completely analyze by the average citizen, and not, therefore, fully understandable. He therefore instinctively opposes it. Remember, too, that those who represent special interests and who are against the legislation, use all sorts of publicity to misrepresent the purposes of the bill and its administration.

CHARGE THAT IT IS FOR PARTISAN PURPOSES ANSWERED

Attempts are being made to deceive the people of the country into the belief that those favoring the enactment of this legislation support it for political purposes.

An analysis of the vote in the Senate a few days ago, and the vote in both Houses during the last session of Congress, completely disproves this assertion. All of the representatives from agricultural districts supported the bill. This included the entire delegation from Iowa, all the Members of both Houses from Indiana, those representing the rural communities outside of Chicago, in Illinois, all of the present Members representing the State of Kansas, and all of the Members representing the States of Arkansas and Oklahoma and other agricultural States. Many of these representatives are of the opposite political faith and strong supporters of the administration; but after a detailed study of the principles of this bill, extending over a period of four years, and taking into consideration the condition of the farmers, they give it their earnest support because they believe it will help agricultural conditions. The argument, therefore, that the bill is urged because of political reasons, is entirely disproved.

It is folly to attempt to argue that it is in the interest of any presidential candidate. The complete answer is that the bill has been before Congress and the country for the past four years and long before there were any known outstanding candidates for the Presidency.

I believe if the bill is enacted it will prove workable and will be sustained as constitutional. Neither do I fear a presidential veto. Practically all of the objections urged against the former bill have been eliminated. We must remember that it is the duty of Members of Congress who understand the agricultural question to enact legislation that we believe will be effective, and while I would be glad to agree with the President, we can not afford to enact legislation that will not accomplish the purposes of this bill and that will prove disappointing. We must remember that the responsibility is with Congress—the legislative branch—to originate and pass legislation that will effectively meet conditions and not permit a threatened veto by the executive branch to take the heart out of the bill and force the enactment of a bill that will be a disappointment and a failure. Who better understands the problems of the farmers, the representatives of the people, in close sympathetic touch with them, or the President who has an entirely different viewpoint?

With this background showing the deplorable condition of the farmers of the country, in part painted but not overdrawn, and the business interests of the country dependent upon them, bankrupt, and with conditions gradually growing worse, we are in position to sympathetically consider this bill, and study how the situation is to be remedied and the farmers of the country benefited through the enactment of this legislation.

In my judgment this bill is a great piece of constructive legislation. Its administration may disclose necessity for amendments. Every comprehensive bill passed by Congress for the benefit of other classes has been amended. In behalf of agriculture this bill should be enacted at the present session. If defects appear, the next Congress can amend it. A great emergency is facing the farmers of the country and Congress should not adjourn without making an earnest effort to remedy the situation.

M'NARY-HAUGEN BILL REVIEWED

The first section, entitled "Declaration of policy," defines the purposes of the bill, which should always be kept in mind in the analysis of the sections which follow. The language of the section can not be improved upon, and is as follows:

SECTION 1. In order to stabilize the current of interstate and foreign commerce in the marketing of agricultural commodities and prevent suppression of commerce with foreign nations in such commodities and unjust discrimination against such foreign commerce, it is hereby declared to be the policy of the Congress to promote the orderly marketing of agricultural commodities in interstate and foreign commerce, and to that end, through the execution of the provisions of this act, to provide for the control and disposition of surpluses of such commodities, to preserve advantageous domestic markets for such commodi-

ties, to prevent such surpluses from unduly depressing the prices obtained for such commodities and from causing undue and excessive fluctuations in the markets for such commodities, to minimize speculation and waste in marketing such commodities, and to further the organization of producers of such commodities into cooperative associations.

Section 2 provides for the creation of a Federal farm board consisting of 12 members, one from each of the 12 Federal land-bank districts, appointed by the President, by and with the advice and consent of the Senate, to administer the law. The members of this board in the bill we considered at the last session were to be appointed from a list of three names recommended by a nominating committee, but this provision was eliminated in the present draft to meet an objection of the President. The provision was designed to insure the selection of men to administer the law who were in sympathy with the farmers and interested in the success of the law. In my judgment this provision should have been retained in the bill, as I do not believe that it would have been held to be unconstitutional. The success of any comprehensive measure largely depends upon its administration. Under this bill the members of the board must either be producers of one or more agricultural products or truly representative of agriculture.

Section 3 defines the general powers of the board, their place of meeting, authorizes the use of an official seal, requires the making of annual reports to Congress, and relates to other administrative details.

Section 4 provides for an advisory council of seven members for each agricultural commodity. The members of this council are to be selected annually by the board only from a list submitted by the cooperative associations and other organizations representative of the producers of the commodity in question and by the governors and heads of agricultural departments of the several States where the commodity is produced, and is a governmental agency to act in conjunction with the board to ascertain and declare the existence of and determination of certain facts prior to the commencement or termination of a marketing period authorized to be declared by the board. The commodity advisory councils are the liaison representatives between the board and the producers.

TWO SEPARABLE REMEDIES PROPOSED

The bill proposes two distinct and separable remedies: Section 5 authorizes loans not to exceed $200,000,000 to cooperative associations or corporations created and controlled by one or more cooperative associations out of the revolving fund authorized to be appropriated in this act at 4 per cent interest per annum. This section provides in detail for what purposes loans may be made: First, for the purpose of assisting the cooperative association or corporation created and controlled by one or more cooperative associations in controlling a seasonal or year's total surplus, produced in the United States and either local or national in extent, that is in excess of the requirements for the orderly marketing of any agricultural commodity or in excess of the domestic requirements for such commodity; and, second, loans may be made, not to exceed $25,000,000, for (a) working capital to be used by the cooperative association or corporation created and controlled by one or more cooperative associations, (b) for the assistance of such associations in acquiring necessary facilities, plants, and equipment, (c) to assist such associations in extending and enlarging their membership.

Stripped of technical wording, section 5 authorizes loans to be made to the amount of $200,000,000 to cooperative associations, in aid of their efforts to assist the farmers in marketing their farm products to the very best advantage. While this provision may prove measurably helpful to the extent of the financial assistance extended by the Government, my fears are that it will prove ineffective because of the small percentage of producers who are members of cooperative associations. As to some commodities, the membership does not exceed 7 per cent. Why should this small number borrow money and incur the financial liability for the equal benefit of all producers of any commodity who are not members?

OVERPRODUCTION DISCOURAGED

It has been urged that a higher price for farm products which will be brought about by better marketing facilities will result in increased production.

Section 6 authorizes the board to advise with the producers of any commodity, and if they should disregard the advice of the board and increase the planting of any commodity over the average planting of five years the board may refuse to make further advances or loans for the purchase of such commodity. This section is intended to meet the criticism of a large number who fear that the enactment of this bill would result in overproduction.

Section 7 authorizes the board to assist cooperative associations in establishing (1) clearing-house associations and (2) terminal marketing associations. This section is particularly designed to be of assistance in marketing fruits, vegetables, and perishable crops.

THE REAL CRUX OF THE BILL—MARKETING AGREEMENTS AUTHORIZED

Section 8 provides a plan of surplus control provided the board finds that loans through cooperative associations, as provided in section 5, are ineffective. In that event the board is authorized to resort to the plan of operating through marketing agreements and equalization fees, provided further that the board finds (1) that there may be a surplus of any commodity in excess of requirements for orderly marketing; and (2) that the commodity is of a durable nature, and therefore nonperishable. The investigations by the board, upon which these findings are based, are made upon the request of the advisory council, cooperative associations, or farm organizations with respect to any agricultural commodity or upon its own motion.

In event such findings are made and published a marketing period may be declared and terminated by a majority of the board, and marketing agreements entered into with a cooperative association or a corporation created or controlled by one or more cooperative associations for withholding any part of the commodity delivered by its members or such agreement may provide for the purchase by such associations or corporations of any part of a commodity not delivered by its members and for the withholding and disposal of the commodity so purchased. A stabilization fund for each commodity is to be provided out of the revolving fund of $400,000,000 and the marketing agreement shall provide for the payment from the stabilization fund for that particular commodity the amount of the losses, costs, and charges, and also for the payment into the stabilization fund of any commodity profits arising out of the purchase, withholding, and disposal or out of contracts therefor. The bill provides for discretionary powers to be given the board in the making of such marketing agreements.

The next question arising is, How are these marketing agreements to be financed? First, they are to be financed from the stabilization fund set apart for each commodity out of the revolving fund. The equalization fee which is provided by section 9 is to be assessed against each unit of a commodity to cover the equitable ratable share of the losses, costs, and charges arising out of such agreements. The board is required, at the commencement of any marketing period, to estimate the probable losses, costs, and charges in respect to any commodity and determine and publish the amount of equalization fee for each unit of such commodity.

EQUALIZATION FEE IS A COMMISSION FOR SERVICE RENDERED

Let us examine a little more closely the equalization fee provided in the bill. There is perhaps not a cattle or hog man in the country who, when he ships a carload of hogs or cattle to market, but what ships them through a commission house and pays to the firm a commission or charge, or you might call it an equalization fee. The equalization fee is the commission which the producers pay on each unit of agricultural commodity which comes within the provisions of the bill, to cover the pro rata share of the costs or charges and estimated losses or advancements. He does just what the hog-and-cattle men do when they ship to market. He is paying a commission or equalization fee.

When the Federal reserve bank system was created every member bank was compelled to contribute its ratable share by subscribing for a certain amount of stock and depositing a per cent of its deposits without interest in order to create a financial reservoir or insurance fund which could be used by the Federal Reserve Board to come to the assistance of member banks through loans or rediscounts. The same principle is involved in this bill. Each pays a commission or equalization fee in proportion to the benefits received. No more and no less. The same principle is involved in the farm land bank system. Each borrower is required to subscribe for a certain amount of stock and to pay, in addition to the rate of interest, an amount sufficient to cover the cost of administration. You might call this a commission or equalization fee. If this bill will enable the farmers to get more for their products through the payment of a commission or equalization fee, as one interested in farming, it would be good business to pay it.

The bill provides that the board shall estimate the probable losses, costs, and charges to be paid as an equalization fee under marketing agreements in respect of each commodity and assess the same against each unit ratably, and provides for its collection under rules and regulations of the board on the transportation, processing, or sale of such unit.

These words are clearly defined in the bill. As to cotton, "processing" means spinning, milling, or any manufacturing other than ginning. "Sale" means the disposition of the cotton in the United States for spinning, milling, or manufacturing, or for delivery outside the United States. "Transporta-

tion" means the acceptance of cotton by common carrier for delivery for such purposes.

The board is authorized to make regulations requiring any person engaged in the transportation, processing, or acquisition by purchase of any agricultural commodity, to collect the equalization fee, and to file returns under oath, and become liable in event of the failure to do so. A like equalization fee is collected upon the importation into the United States of any such commodity. In practice, therefore, it will readily be seen that this fee will largely be collected, reported, and paid by corporations transporting, processing, or manufacturing any of the products covered by the bill for which a marketing period is declared.

Section 10 provides for a stabilization fund for each agricultural commodity and that the board shall have exclusive authority over the expenditure of the money in such fund, and the stabilization fund shall consist of advances from the revolving fund, profits arising out of marketing agreements, repayments of advances for financing and purchase, withholding and disposal of the commodities, and the equalization fees collected as provided in the bill.

INSURANCE AUTHORIZED AGAINST PRICE DECLINE

Section 11 provides that the board is authorized and empowered to enter into an agreement upon such terms and conditions as it may prescribe and for a period of not more than 12 months for the insurance of such cooperative associations against price decline with respect to any commodity.

Section 12 authorizes the appropriation of $400,000,000 to be administered under the direction of the board and used as a revolving fund in accordance with the provisions of the act.

Section 13 provides for the examination and audit of the books and accounts of the board.

Section 14 makes it the duty of any governmental establishment to cooperate with the board and render all assistance, furnish all information, and be of any additional service that the various bureaus or departments may be able to render.

HOW THE LAW WILL BE ADMINISTERED

The farmers have a right to inquire just how this bill would enable them to secure a higher price for their farm products.

In the first place, there would be a board of highly intelligent members which would be able to compile data from every available source so as to form the very best estimate as to the amount of each commodity produced not only in the United States but throughout the entire world, and the probable demand for each commodity, and will be able, therefore, to better direct when and where the commodity may be sold to the best advantage. At present the farmers, for the most part, are in financial distress, which compels them to dump their products upon the market in times of depression. That means that cotton when it is picked and ginned is sold. The cotton farmers of the South have little or no option in the matter. Representatives of foreign countries and of the eastern spinners, through their local agents, contract for their supply of cotton in advance. In 1926 as the result of the dumping of the cotton upon the market as it was picked and ginned, it will be remembered that while the price opened around 20 cents per pound it fell to about 11 cents per pound, and that after all the cotton was out of the hands of the small producers it went back to the former price of around 20 cents. If this cotton could have been held off the market, as this bill provides, either through cooperative associations or marketing agreements, and sold in an orderly manner the market would have been stabilized and such great fluctuations would not have occurred. This market, of course, will not only include our domestic market but the foreign demands for the commodity.

To be more specific, and using cotton as an example, when the representatives of the eastern spinners or of the foreign countries attempt to make contracts for their supply of raw cotton for the year the board, acting through the cooperative associations, or two or more of them, or other agencies selected, will withhold from the market and store in warehouses and purchase from the financially distressed farmer a sufficient supply of cotton until the representatives of those desiring to purchase it will pay the cost of production plus a reasonable profit.

The Department of Commerce reports 9,478,000 bales of raw cotton exported to foreign countries in 1927, including 2,611,000 bales to Germany, 1,694,000 bales to Great Britain, 1,437,000 bales to Japan, 975,000 bales to France, 670,000 bales to Italy. Are not our farmers entitled to legislation to assist them against loss in the orderly marketing of their cotton and not compelled, because of their financial condition, to dump it upon a depressed market? The question answers itself to one in sympathy with them.

Under section 5 the charges and costs are to be paid out of the fund borrowed by the cooperatives representing approximately 7 per cent of the producers of the commodity upon which there is an obligation to pay 4 per cent interest to the Government. Under section 8, marketing agreements are authorized to be made by the board with cooperatives or other agencies and these costs, charges, and losses, if any, are to be paid from a stabilization fund set apart from the $400,000,000 revolving fund, and this fund is supplemented by profits and the equalization fee assessed against each unit.

The difference in the two plans provided in the bill is that under the first plan 7 per cent of the producers are behind the cooperatives, whereas under the marketing agreement plan, 100 per cent of the producers of the country combine for the equal and mutual benefit of all. Under the first plan the cooperatives have the bargaining power of 7 per cent of the commodity. Under the second plan they have the bargaining power of 100 per cent of the commodity produced.

In the meantime provision is made to insure the cooperative associations against loss by decline in the price of cotton.

We must always keep in mind the economic truth that all nonperishable staple products, if properly and orderly marketed, whether they be farm or manufactured products, are worth the cost of production plus a reasonable profit. Keep in mind also that the bargaining power as to all of any commodity—100 per cent, not 7 per cent—for which marketing agreements are made is in the hands of or under the direction of the board during the marketing period.

In other words, it will operate with respect to each commodity very largely like the price of wheat was stabilized during the war. Comparatively little wheat was withheld from the market or stored in warehouses. It cost the Government about $42,000,000, but instead of the Government losing, it made a profit. The farmers may rest assured that this intelligent and orderly marketing of their products will insure for them the cost of production plus a reasonable profit. They are entitled to that. This board represents the power and prestige of the Government, which will greatly aid in the administration and the success of the law.

In my district the potato growers are organized 100 per cent, and they get a good price for potatoes through marketing them under the direction of the association. If 100 per cent of the farmers belonged to cooperatives and each commodity was marketed under the direction of cooperative associations, the same result would be realized.

Every one knows the disastrous results of compulsory marketing by financially distressed farmers of all of any commodity without any of it being stored and fed to the market in an orderly manner. The Government lost no money on wheat during the war. When this bill gets into operation it will result in the prices of farm products being stabilized without any loss to the Government.

The provision for an equalization fee is only to cover the costs, charges, and probable losses, so as to supplement the stabilization fund in event of an emergency which but few, if any, who have studied this bill carefully believe will ever be required.

Cotton fell from 8 to 9 cents per pound in 1926, or around $40 per bale. I am sure every farmer in my district would have been glad to have paid an equalization fee of from $2 to $3 per bale, if by doing this he could have been saved his loss of $40 per bale.

The bill passed last year was criticized because it covered only certain basic agricultural commodities; whereas this bill discriminates against no commodity but permits all to be included. It will result to the benefit of the producers of all commodities whether they belong to cooperatives or not.

This is a great piece of constructive legislation, and if efficiently and sympathetically administered I am confident that it will be of very great advantage, not only to every farmer throughout the country, but to the business men who are dependent upon it.

The board, through the agencies provided for, will be able to secure for the producers the cost of production plus a reasonable profit.

Those who live in industrial centers oppose the bill for fear that it will raise the price of farm products to consumers. The answer is twofold. First, it is conceded that the producers are entitled to an increased price. Second, if the board is able to so administer the law as to cut out the spread between the producers and the ultimate consumers, the price to the farmers would be greatly increased. No one denies this. It is the real reason hiding behind every conceivable smoke screen for the opposition to this bill. [Applause.]

Mr. HAUGEN. Mr. Chairman, I rise for the purpose of ascertaining whether we can not reach an agreement to close debate. I would like to know how much time will be required.

Mr. BURTNESS. I would like to have at least 10 minutes.

Mr. QUIN. I want five minutes.

Mr. HOWARD of Nebraska. Will the chairman permit a suggestion?

Mr. HAUGEN. Yes.

Mr. HOWARD of Nebraska. I would like to suggest to the gentleman if he will let the debate go on and have a few more talks like the one just made by the gentleman from Oklahoma [Mr. HASTINGS] the whole fight will be won. [Applause.]

Mr. HAUGEN. I have no desire to cut out anyone; but there are a number here who would like to be excused for a while, and they would like to know when a vote will come on this motion. I ask unanimous consent, Mr. Chairman, that all debate on the substitute and all amendments thereto close in 40 minutes, and that the time be allotted as indicated here.

Mr. BURTNESS. Mr. Chairman, I have not had an opportunity to speak on this measure and I would like to have at least 10 minutes.

Mr. WRIGHT. Mr. Chairman, I offer an amendment to the request and ask that the time be limited to one hour.

Mr. HAUGEN. Just so we can come to an agreement. I ask unanimous consent that we close the debate at 3 o'clock, which would mean 55 minutes.

Mr. FORT. Mr. Chairman, the matter which is pending before the committee is the amendment which I have offered to the substitute, is it not?

The CHAIRMAN. That is correct.

Mr. FORT. Is the request of the gentleman from Iowa, then, that debate on the pending amendment cease in one hour or that debate upon the substitute then cease?

Mr. HAUGEN. On the substitute and all amendments thereto.

Mr. FORT. Mr. Chairman, if that be the case, I have one or two further minor amendments to the substitute and I will want further time.

Mr. HAUGEN. It does not limit the number of amendments.

Mr. FORT. Will the Chair recognize the gentlemen in the order of those who favor or oppose the substitute or the amendment?

The CHAIRMAN. The Chair will do his best to recognize those who want to discuss the proposition in proper order, but the Chair can not give any absolute assurance that there will be time to recognize all who want to speak.

The gentleman from Iowa [Mr. HAUGEN] asks unanimous consent that all debate on the Aswell amendment and all amendments thereto close at 3 o'clock. Is there objection?

Mr. FORT. Reserving the right to object, the other amendments I propose to offer to the substitute I do not desire to offer if the pending amendment to the substitute be voted down. There is no use wasting the time of the committee in debating other prospective amendments which will not be offered if the pending amendment is voted down. It seems to me we would be proceeding in better order if the amendment already offered to the substitute could be voted on before the limitation of debate. Why not have a vote on the pending amendment in advance of this request?

Mr. HAUGEN. We can have a vote on that amendment in 35 minutes.

Mr. ABERNETHY. Mr. Chairman, reserving the right to object, I would like to have five minutes.

Mr. HAUGEN. I do not want to cut out anyone if I can help it. I am simply trying to accommodate some Members who have other matters they want to look after.

Mr. ARENTZ. Regular order, Mr. Chairman.

Mr. HAUGEN. The request is that debate on the amendment now pending close in 35 minutes and that all debate shall be closed at 3 o'clock on the substitute and all amendments thereto.

Mr. FORT. Still reserving the right to object, I suggest that the amendment which I have offered be voted on now, which is the regular order.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that all debate upon the Fort amendment close at 2.40, and that a vote be then taken on that amendment; and that all debate on the Aswell amendment and all amendments thereto close at 3 o'clock. Is there objection?

Mr. ABERNETHY. Mr. Chairman, reserving the right to object, I shall not object, but I would like to have at least five minutes.

Mr. HAUGEN. I would like for the gentleman to have time. I am not undertaking to control the time, but only to expedite matters.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. HARRISON. Mr. Chairman, I would like to have it understood that I am to have five minutes on an amendment I propose to offer after the Fort amendment is disposed of.

The CHAIRMAN. The Chair will do the best he can in that regard.

Mr. WRIGHT. Mr. Chairman, I would like to be recognized on two amendments which I desire to offer.

Mr. BLACK of Texas. Mr. Chairman, I make the point of order that debate on the Fort amendment has been exhausted. Let us vote on that amendment. [Cries of "Vote! Vote!"]

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. WRIGHT. Mr. Chairman, I would like to amend the request and have the debate limited to one hour.

Mr. HAUGEN. I accept that amendment.

Mr. FORT. Mr. Chairman, reserving the right to object, the suggestion already made by the chairman of the committee is that the vote on the pending amendment to the Aswell amendment be taken in 35 minutes.

Mr. QUIN. I object to that, Mr. Chairman. This is a vital matter, and we should not be fooling around here wasting time.

The CHAIRMAN. The gentleman from Texas [Mr. BLACK] makes the point of order that all debate on the Fort amendment is exhausted. The Chair sustains the point of order.

The question is on the amendment offered by the gentleman from New Jersey [Mr. FORT].

The question was taken; and on a division (demanded by Mr. FORT), there were—ayes 48, noes 100.

So the amendment to the substitute was rejected.

Mr. CHINDBLOOM. Mr. Chairman, a parliamentary inquiry. Has there been any agreement about limitation of debate?

The CHAIRMAN. No.

Mr. BURTNESS. Mr. Chairman and gentlemen of the committee, I rise in opposition to the amendment which has for its purpose the striking out of the so-called equalization-fee provisions of the bill under consideration. Not knowing just exactly how much time I may get for the discussion of the merits of the proposal or for a discussion of just what the equalization would do and what the omission of it would eliminate, I am going to put the cart before the horse somewhat in my discussion and touch another aspect of the matter before going into those specific merits. I desire to express my views, briefly, with respect to the position taken by those who argue that the equalization-fee provisions are unquestionably unconstitutional, but who at the same time believe as a number of men have indicated in debate that the balance of the bill would be a good constructive piece of legislation and would be worth while if enacted for the benefit of agriculture. Presumably that is the view of the gentleman from Louisiana [Mr. ASWELL], who has made the motion now pending to substitute a bill similar to the Haugen bill except as he has eliminated the equalization-fee provisions.

Now, of course, I am not here to suggest that anyone who is of the honest opinion that the equalization-fee provisions are unconstitutional should not vote for the pending amendment. I think it is their duty to vote for it if they entertain that sort of a conviction. Believing and hoping, however, that the amendment will fail, I want to emphasize that the practical result of enacting this bill as it is recommended by the agricultural committee, if you who entertain the view that this particular section is unconstitutional are correct, the result of a favorable vote for the bill and thus putting it on the statute book would be identical to what would be accomplished if the bill were passed without the equalization-fee provisions in it. In other words, let me try to emphasize it in this way, that if you are right in the view that the equalization fee is unconstitutional then certainly it does not do any harm to pass the bill with that provision in it and have that question definitely determined by the courts of this country. The bill carries a so-called separability-of-provisions section so that if any provision is declared unconstitutional it will not affect the remainder of the act.

Let me give you another reason why I think it is of great importance to have the question determined by the courts of the country at the earliest possible date, hence advisable to retain the provisions. That is to get that issue settled by the proper tribunal whose judgment will be accepted by all. The people all over this country, and particularly in the agricultural sections, are tremendously interested in the question as to whether the equalization-fee principle, which all of them are discussing and in which most of them believe as a policy—I say that they are greatly interested in the question whether that proposed device is in consonance with our constitutional provisions.

How can we ever get it definitely determined unless you include it in the bill and thus make it possible to have it passed

on by a tribunal that must finally pass on all such questions? As I say, if those of you who claim it is unconstitutional are right, you would in the passage of the bill in the exact form reported, including the equalization fee, accomplish the very thing that the gentleman from Louisiana [Mr. ASWELL] and the gentleman from New Jersey [Mr. FORT] and others have in mind, namely, to get this bill as a valid law without the equalization fee in it. Whether we strike it out or the court declares it invalid, the result would be the same; but those who just as earnestly believe the provisions are constitutional would have had their day in court.

After having settled that legal question you would be rid of that issue in the country, an issue which probably is not auguring particularly well economically for the Nation as a whole, for this issue to-day, and we might as well admit it, is tending to antagonize section against section and to separate class from class. Therefore I urge upon you who can conscientiously do so to vote to retain these provisions in the bill for the reason, if for no other, to get the question and the issue settled in such a way that ultimately all the people will be willing to accept the decision. If it is adverse, those interested in agriculture would then naturally abandon this plan and direct their attention to other methods of solving the farm problem. But until such decision we feel we have the right to insist upon this type of legislation. We believe thoroughly in the method proposed as practical, fair, and sound; and while we are not certain of its constitutionality, we feel that we can make out an excellent case therefor. Will you not therefore give us our day in court? [Applause.]

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. BURTNESS. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection to the request of the gentleman from North Dakota?

Mr. ABERNETHY. Reserving the right to object, and I do not want to object, I did not object a while ago when debate was shut off, but it seems to me that I am not going to get a chance——

The CHAIRMAN. There is no limit on the debate as yet.

Is there objection? [After a pause.] The Chair hears none.

Mr. ADKINS. I ask that the gentleman from North Carolina be allowed five minutes after the gentleman from North Dakota.

Mr. HAUGEN. Mr. Chairman, will the gentleman from North Dakota yield to me to make a request?

Mr. BURTNESS. I will yield for that purpose.

Mr. HAUGEN. I renew my request that all debate on the substitute and all amendments thereto close in half an hour, and that the gentleman from North Carolina be given five minutes.

Mr. EDWARDS. Reserving the right to object, that will not take in half of those who want to speak.

Mr. HAUGEN. We will have another substitute, and we will probably have an hour or two on that.

Mr. EDWARDS. There are a lot of us who want to speak against the equalization fee and we ought to be recognized as well as those who speak for it. I ask unanimous consent that the time be put at 1 hour and 30 minutes.

Mr. HAUGEN. I will compromise with the gentleman and make it 45 minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that all debate on the Aswell amendment and all amendments thereto close in 45 minutes. Is there objection?

Mr. GARRETT of Texas. Reserving the right to object, can the gentleman assure us that there will be something new to be developed in the next 45 minutes? If not I shall object. We have heard this whole thing hashed up over and over again, and I object. Mr. Chairman, I make the point of order that all debate on the amendment under the rules of the House is exhausted.

Mr. BURTNESS. I did not yield to the gentleman for that purpose.

Mr. GARRETT of Texas. The gentleman has not the floor.

The CHAIRMAN. The gentleman from North Dakota has been recognized for five minutes more.

Mr. GARRETT of Texas. Then I will make the point of order at the conclusion of the gentleman's five minutes.

Mr. McKEOWN. Before the gentleman resumes will he yield to me for a question?

Mr. BURTNESS. Yes.

Mr. McKEOWN. Mr. Chairman, I am one of those who believe in the efficiency of the equalization fee and who also believe that it is constitutional. Will not the question of the constitutionality of the equalization fee be deferred over a period of two years, because it will not be taken into the courts until you try to put it into effect?

Mr. BURTNESS. I agree, of course, that the equalization fee will be deferred by an attack in the courts, and if it is held to be unconstitutional, naturally the carrying of the provisions into actual effect will never take place at all. I have tried to emphasize the importance of getting the question of its validity settled at the earliest possible moment, so that agriculture can find out whether it must give up any idea of obtaining legislation embodying that sort of a principle. The sooner that question can be settled so much the better.

Mr. McKEOWN. But this legislation will not put it into effect until they try this other plan, and that will take it over for another year.

Mr. BURTNESS. That is true but the motion now is to strike out the equalization-fee provisions entirely. But let me proceed to the more general discussion.

At the outset I want to make it plain that many of us from the agricultural sections of the country are not interested in what may be termed temporary emergency legislation for farm relief. We are, however, greatly interested in constructive permanent legislation for the benefit of agriculture as a whole. It is from that viewpoint that I desire to discuss the present McNary-Haugen bill.

Naturally, therefore, the first question which arises is the one as to whether there is any need of permanent farm legislation. Much so-called farm legislation has been enacted in former sessions of Congress and some of it has been helpful and I believe all of it has been wholesome legislation. None of it, however, has gone to the crux of the problem which is that of obtaining for agricultural products a price that is sufficient to cover cost of production and a reasonable profit on the investment of the average farmer. True legislation to promote and encourage cooperative marketing has had that subject in mind, but unfortunately the hoped-for accomplishments have not materialized.

The question as to whether general legislation to insure better prices for agricultural products is necessary is pretty well answered by this chart [indicating] prepared by the Bureau of Agricultural Economics of the Department of Agriculture, and which indicates in the two lines shown thereon the index numbers of farm prices and wholesale prices of nonagricultural products for a period commencing with 1910 and ending with the beginning of this year. The heavy line represents farm prices. The dotted line represents the prices of nonagricultural commodities or, in other words, those commodities which agriculture as a whole must buy.

You will first note that from 1910 to 1915, inclusive, the prices of both of these classes stayed very close to the base line of 100, the line of each going back and forth across such base line, sometimes one of the lines being for a few months above the other and then the position would be reversed. As a whole the lines during those five years represented simply normal fluctuations and at no time did one general class have any marked advantage over the other.

Then, what happened in the latter part of 1915? The World War was being waged in Europe and all prices took a sudden spurt upward. Prices of nonagricultural commodities advanced a little earlier than those of farm crops, but the latter did not lag much. Note the spurt from the latter part of 1915 until about the middle of 1917. Nonfarm prices reached a peak of about 200 as compared to 100 in the pre-war period. Farm crops were up to about 187 as compared to 100 in pre-war times. From 1915 to the middle of 1917 the relationship between the two shows farm crops lagging somewhat, but not seriously. At from about the middle of 1917 to the middle of 1919 farm prices were higher than nonagricultural prices, yet the curve of the two lines fluctuated up and down with each other but not very far apart.

Apparently farm prices during that period generally had an advantage of about 5 per cent to 10 per cent above nonagricultural prices. Toward the latter part of 1919 both types took another sudden rise, but this time the nonagricultural commodities went away ahead, reaching a peak of about 260 along about March or April of 1920, when at the same time the highest peak of farm prices was also reached, but they stopped at about 235.

We all recollect what happened at that time, namely, the so-called deflation of 1920. All prices dropped so suddenly that the result was staggering. Note the almost perpendicular drop in farm prices from the middle of 1920 to April, 1921, coming down from the peak of about 235 to about 112, a cut of more than 50 per cent. Nonagricultural prices dropped almost as suddenly, but not so far, for they dropped down to only about 160 in the same time, leaving a disparity of almost 50 points between the two.

From that time on the lines straightened out, both of them indicating some advance in the price and both of them indicating fluctuations from time to time running somewhat parallel. It was the hope of all, and the honest belief of many students, that the two lines would soon come together and that they would thereafter pass and repass each other as they did during the period from 1910 to 1915. But what has been the result? Six, yes, almost seven years have gone by, and they have not gotten together. The disparity of almost 50 points which existed in 1921 continued on through 1922, but had been gradually narrowed down to about 20 or 25 points when we considered the first McNary-Haugen ratio price bill in 1924. Some of the best-known men of this House at that time contended that it would simply be a year or two before these converging lines would meet and the problem would be over, and many so believed and therefore voted against the bill. The lines were a little closer in 1925, but toward the latter part of that year instead of continuing to converge they started to diverge, with the result that by 1926 they were about 30 points apart. It is true that in 1927 there was considerable tendency for these lines to get together again. When we passed the McNary-Haugen bill a year ago my recollection is that the difference in percentage was about 13 per cent, and as indicated by this chart the difference in percentage is now about 9 per cent.

The point that I want to emphasize particularly in that respect is that this disparity does not mean from time to time a reduction of 9 per cent or 13 per cent or 20 per cent from the net income of agriculture, but that it is that much of a reduction from the gross returns of agriculture. I submit in all sincerity that this is a tremendous reduction. Our colleague from New York [Mr. JACOBSTEIN] has estimated that this sort of a reduction has amounted to about $15,000,000,000 for agriculture since 1920. In other words, it has reduced the purchasing power of that industry to that extent as compared to what such purchasing power would have been had these two lines, regardless of the exact range of prices, been on a general parity with each other, as was the case prior to 1915. In other words, it amounts to the same thing as reducing the gross income of any business by that percentage with costs of production remaining fully as much as they were before. Ordinarily if you reduce the gross income of any business by 20 per cent or 13 per cent or 9 per cent, you wipe out all of the profits and make serious inroads on invested capital. Packers, for instance, do business on a profit of less than 2 per cent on their general turnover. Naturally, with this situation the inevitable result in farming and in the many lines of business directly dependent upon farming was bankruptcy for all of those who are the least efficient, and serious inroads upon the savings and capital of those more efficient.

Our conclusion, therefore, is that if we are to accomplish results by legislation we must proceed with the purpose in mind of increasing the gross income of farmers, and this can be accomplished only by increasing the price of what they sell. Is there a fair way in which to do so? We are reminded of certain stabilizing influences for industry generally and for labor. Our attention is called to the immigration laws, which protect labor against the competition that would be caused by the influx of other laborers.

We have our special attention attracted to the tariff in so far as it is used as a device to protect our industries against competition from abroad. In the farm sections we note that there are tariff duties upon all farm products, but on investigation we find that such duty seems to do little or no good in so far as increasing prices is concerned in such crops or products of which we have an exportable surplus. To be more specific we find, for instance, that we get a higher price than the world price for flax, wool, sugar, and the like, and the reason is plain for no one can import these crops or commodities without leaving a specific sum of money at the customhouse, and inasmuch as we consume much more than we produce of these crops naturally our domestic prices are raised above the world prices substantially to the extent of the tariff. This does not seem unfair either to agriculture or to the consumers of these products, for the tariff under our present policy at least is intended to be fixed in such sum as to fairly represent the difference in the cost of production in this country and in competing countries.

When we turn to other important crops, however, what do we find? Take for example, the case of wheat. The price of wheat as shown by this second chart in pre-war times fluctuated back and forth with the cost of nonagricultural products. During the war period from 1916 to 1920 the price of wheat stood above, in its general relationship, the prices of nonagricultural products, but with the deflation of 1920 the price of wheat went way below the relative prices of nonagricultural products, and from 1921 to the latter part of 1924 the wheat producer was at a very serious disadvantage. Throughout 1925 such disadvantage was, as shown by this chart, eliminated, but again about the middle of 1926 the curve representing wheat prices fell below the curve representing nonagricultural prices, and while the disparity has not been as great during the last year or so it has been substantial.

But I started in particularly to discuss the effect of the tariff on wheat on these prices, and I want to get back to that feature. The President upon the report of the Tariff Commission, a few years ago increased the tariff on wheat from 30 cents per bushel to 42 cents per bushel, it having been found that the latter figure represented the average difference in the cost of producing wheat in Canada and in the northwestern spring-wheat States over a period of three years. Some have contended on the floor of this House that this duty is always largely reflected in the price of northwestern spring wheat. Figures and charts have been presented tending to show that such is the fact, but as I have pointed out in colloquies on the subject, the figures and charts submitted have indicated the weekly "high" price at Minneapolis for No. 1 dark northern spring wheat as compared with prices in the Winnipeg market. Of course, that means the highest price received for a single shipment each day in the Minneapolis market and does not represent the average sale price, weighted or otherwise, of No. 1 dark northern wheat. I think you will all agree that the fair comparison is the average price received for all of the wheat sold on the market on a single day and not that one specific carload of grain which by reason of a protein content of 15, 16, or 17 per cent may bring a premium of 50 cents or 60 cents above the regular card price.

The question as to whether the tariff is reflected in the price of wheat or not simmers down to rather a simple question of economics. In the spring-wheat section we do have some chance of getting such tariff reflected, and especially so in certain years. The reason for this is that we raise a wheat of high protein content which is sometimes in very great demand for mixing purposes with soft winter wheats or other grades of low protein content.

In other words, from a viewpoint of commercial economics, the flour wheats raised in the United States can be divided into two classes—wheat of high-protein content and wheat of low-protein content. If the product of the former in any one year is less than the millers of our country need, the result is that some has to be imported and naturally our producers then get the benefit of the tariff. This has generally been the situation in such years as our wheat prices have been the highest.

I have carefully checked prices at our terminals, such as Minneapolis, for a number of years with prices at Winnipeg, which means delivery at Fort William or Port Arthur on Lake Superior, and believe that the conclusions which I have reached with reference thereto are entirely sound and supported by the facts. When the 1923 crop was being harvested Canada had a wonderful crop, but the yield in the spring-wheat section of this country was relatively poor. Our import duty was then 30 cents per bushel, and during that season the American farmer did get a benefit from that duty of some 25 cents or 30 cents per bushel. In the marketing season of 1924, however, not one single penny of the tariff was reflected in the price paid the producer for we had more high protein wheat in the United States than our millers needed. In 1923, for instance, our State mill at Grand Forks imported two shipments of high-protein wheat from Canada and paid the duty thereon as a business proposition. Such could not have occurred in 1924.

When the 1925 crop was harvested the situation had again changed somewhat, and during that season there was a very substantial benefit from the tariff, a benefit averaging possibly 25 cents to 30 cents per bushel, or a greater benefit than in the average year. The outstanding reason therefor was possibly the fact that our total wheat crop that year was only 676,000,000 bushels and the American millers needed all our high-protein wheat.

When the 1926 crop came along we found a large total production amounting to 832,000,000 bushels. The protein content of the southwestern wheat was good, and the result was that the premiums paid for protein were low. My conclusion from examining the market reports is that during that season we had a benefit of about 12 cents per bushel.

The experience under the 1927 crop has again been somewhat different. When we marketed most of our wheat in the Northwest last fall the trade generally believed that there was plenty of high-protein wheat in the country, with the result that the tariff was not reflected in the price paid the American farmer, and, in fact, during much of the time the market at Winnipeg was a little higher than at Minneapolis. Some difficulty is involved in ascertaining just what sort of Canadian

wheat is comparable to No. 1 dark northern spring at Minneapolis. Some say that Canadian northern spring No. 3 has a milling value as high as American dark northern No. 1. Others contend that Canadian No. 2 is substantially the same as American No. 1. I am inclined to the views of the latter, and my general conclusions as to the benefits received are based on that assumption.

I have obtained, and will insert by way of extension of remarks, complete tables showing weekly average prices at Minneapolis and Winnipeg of dark northern spring No. 1 at the former point, and northern spring No. 1 and No. 3 at Winnipeg. No. 2 at Winnipeg naturally brings a price between No. 1 and No. 3. Those interested in the question will be able to study these tables, which are authentic, being furnished by the Bureau of Economics, and will be able to reach their own conclusions. The Minneapolis prices quoted are the weighted average prices.

With this sort of an experience I am sure you will agree that it is but natural that we would like to have the full benefit of the tariff of 42 cents per bushel every year and not only once in a great while, for that amount simply represents the difference in production costs in the two countries. The enactment of the McNary-Haugen bill is intended to give us the full benefit of whatever import duty may be in effect at the time each and every year less the so-called equalization fee. When we have conditions such as we had in 1924 or in 1927 the equalization fee would amount to about 12 cents per bushel, or a net gain of about 30 cents per bushel. In other words, the net gain would probably be less, although in such years the equalization fee would be smaller. If the wheat of lower quality is raised in price there is no doubt but that higher-quality wheat will continue to demand a premium, limited, of course, at the maximum to the world price for such wheat plus the tariff duty and the cost of transportation from the foreign markets to ours.

Let me discuss for just a few minutes more specifically the equalization fee. As has already been explained, that fee amounts in substance to a sort of an assessment upon the entire crop produced in order to take care of the loss on the exportable surplus where such surplus has to be sold in the world's markets at the world price. The fee is paid not by the consumers, but by those who produce the crop. Our farmers will know that the larger crop they raise the greater will be the exportable surplus and the greater the equalization fee. Not only that, but they will also know that the larger the American crop the more depressing will be its effect upon world prices, and that inasmuch as our domestic prices can not exceed the world prices by a figure higher than the tariff, it will continue to be in their interest not to increase production. What we are aiming to get away from, however, is the proposition that the price obtained for the surplus shall not also be the limit of price received for that part going into domestic consumption. We prefer to have the dog wag the tail rather than the tail wag the dog.

I recognize, gentlemen of the House, that most of the votes against the bill in the past have been due to the fact that individual Members have believed that the consumers in their particular districts or States or sections of the country would suffer by its enactment, due to higher prices. Yet it is astonishing that some entertaining those views immediately argue in about the same breath that the farmers of the country ought not to raise an export surplus of such crops. Do not those gentlemen see this, that if the consummation which they desire, namely, no exportable surplus of crops of which we now have such surplus, should come about that their own consumers would pay exactly the same amount for their products as the proponents of this bill believe will be paid by the consumers if it is put into effect? In other words, if the exportable surplus were eliminated the producers of each one of these crops or products would receive the world price plus the tariff, whatever that tariff happens to be, because they would then have that much protection which would be effective. Our production would be on a domestic basis, as in the case of wool, flax, and so forth.

Mr. KETCHAM. And, as a matter of fact, would they not pay a great deal more under the conditions which the gentleman described?

Mr. BURTNESS. Whenever there is a substantial shortage below the amount that is actually sufficient, the tendency, then, of course, always is to raise the price, so that might be possible; but the very most that this bill could do would be simply to charge the same amount and get most of that additional represented largely by the tariff reflected back into the hands of the man who raises the products.

It is, however, the exportable surplus of agricultural products of this country which gives our Nation a favorable trade balance, and our best interests surely do not demand that such favorable balance should be changed to an adverse one. Would it not be better to let our consumers pay the fair cost of these farm products which they need?

No other plan has been devised or proposed to take care of the loss on the exports than the equalization except possibly a direct subsidy in the nature of a debenture or directly out of the Federal Treasury. If the domestic price is to be maintained higher than the world price, funds for the purpose are unquestionably needed. A direct subsidy at best could be only temporary, and would constitute a dangerous precedent. Farmers generally do not want it. Temperamentally they are opposed to all direct subsidies, and we should commend them in that attitude. The President has always opposed subsidies, if I read his messages correctly. Let us not hamper the board by striking out the equalization-fee provisions, but permit it to make use of them whenever they find it necessary to do so. Only in this way can agriculture be placed on a parity with labor and other forms of industry.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. BURTNESS. Under leave to extend my remarks, I submit first an editorial which appeared in the Washington Post with reference to a colloquy between my colleague, Mr. HALL, and myself during the discussion of this bill. It is as follows:

WHAT'S THE CONSTITUTION

The backers of the McNary-Haugen bill think they have developed a splendid plan for circumventing the Constitution. They have inserted a provision to the effect that if any section of the law should be declared unconstitutional the rest of the measure would not be affected. The unconstitutional section they have in mind is that relating to the equalization fee. This illuminating colloquy recently occurred in the House between two constitutional statesmen, Messrs. HALL and BURTNESS, of North Dakota:

"Mr. BURTNESS. Does the gentleman see any reason for not supporting the bill upon the part of anyone who believes the equalization fee is unconstitutional if he likewise believes that the bill otherwise would work?

"Mr. HALL of North Dakota. Not so; not at all."

What's the Constitution when farm politics is involved? It has not often happened in the history of the United States, however, that legislators in either the Senate or House have been so bold as to announce beforehand that they intended to vote for measures which they knew or believed to be in violation of the Constitution.

Considering the fact that legislators now openly support unconstitutional projects, it is well that there is a man in the White House who will use the ax. If these willful violators of the Constitution can muster the strength and courage to pass the bill over a veto, they will then encounter another obstacle that can not be surmounted.

I regarded the foregoing attack upon all supporters of this legislation as unjustified. There has, of course, been no attempt to circumvent the Constitution. We have all our own ideas, possibly, as to the constitutionality of the proposal. Many excellent lawyers regard the equalization fee not as a tax but as a valid exercise of the power of Congress to regulate interstate commerce. In any event we probably revere the Constitution as highly as does the editor of the Post. Under date of May 2, 1928, I set out my views in some detail to the editor in a letter which was published and which, omitting formal parts, reads as follows:

To the EDITOR OF THE POST.

SIR: I have just read the editorial in this morning's Post under the caption "What's the Constitution?" and which relates to a colloquy between my colleague, Mr. HALL, and myself which occurred in the House a few days ago during the discussion of the McNary-Haugen bill. The charge is made in the editorial that the "backers of the McNary-Haugen bill think they have developed a plan for circumventing the Constitution," and the inference of the editorial is that my colleague and myself boldly announce that we intend to vote for measures which we know or believe to be in violation of the Constitution. I submit that such conclusions are unfair and not warranted by the record or the pertinent facts which should be well known to all who have followed the legislation.

In any event, my own view is that a legislator is not justified in voting for a bill which in its general aspects he regards as unconstitutional, and I have never done so. There is, of course, a very decided difference in opinion among legislators and among students of government as to whether legislators should vote for measures as to which there is some doubt as to their constitutionality and where one finds an honest difference in opinion on the subject among good constitutional lawyers. Some take the position that whenever any doubt is entertained as to the constitutionality a legislator should vote against the bill regardless of his belief as to the merits of the policy suggested, while others, and I think a large majority, believe that, although entertaining some doubts as to the constitutionality, they are justified in voting for a measure if they believe in the wisdom of the policy proposed and then let the question of constitutionality be determined by the courts. Naturally that is not

voting for a measure which one believes is unconstitutional. I repeat that if one entertains a conviction that it is unconstitutional, a legislator would not, in my opinion, be justified in voting therefor.

The colloquy referred to should, of course, be construed in the light of the actual situation existing with reference to the bill under discussion. The question of constitutionality has been raised only with reference to one of the general provisions of the bill, namely, the equalization fee. Several of the opponents of the equalization fee have argued very logically and very ably that the bill as a whole is complete without the equalization-fee provisions and have indicated that they would gladly support the measure if such provisions were eliminated therefrom. This is the position taken by Mr. FORT, of New Jersey, and Mr. ASWELL, of Louisiana, members of the Agricultural Committee of the House, who have led the fight against the bill.

My only desire in the colloquy to which you referred was to call attention to the fact that there is a "separability of provisions" section in the bill, so that if the men who believe the equalization fee provisions unconstitutional are right in their view the passage of the bill with such provisions included would eventually mean the adoption into permanent law of the very provisions which they are commending and which they state they are willing to support. In other words, if they are right the courts would declare the equalization-fee provisions null and void, but the balance of the bill would remain valid law, precisely as if such provisions had been struck out of the bill by amendment in Congress.

Naturally, I expect Members of Congress who believe such provisions unconstitutional to support an amendment which would eliminate them from the measure. If, however, they are unsuccessful in such attempt, it strikes me that they have not a substantial reason for voting against the bill just because one provision believed by them to be unconstitutional remains in the whole act, when they concede that if such alleged invalid provision were eliminated the bill would otherwise constitute constructive and worth-while legislation. In any event, that was the only point I tried to make in the colloquy. Neither did it refer to any who regard the general purpose of the bill as unsound and therefore oppose all of it, but they are in a very small minority.

The charge that the "separability of provisions" section in the bill is an attempt to circumvent the Constitution is simply ridiculous. Such a provision is found in almost every major piece of legislation. No argument need be presented to show that it could not possibly circumvent any provision in the fundamental law and that it is not intended to do so. The very bill under discussion is a good illustration as to the proper use thereof, and criticism of the proponents, based on the fact that they have included a provision customarily found in laws more or less involved or technical, does not seem justified.

O. B. BURTNESS.

The tables as to wheat price to which I referred in my speech and which have been furnished by the Bureau of Agricultural Economics in the Department of Agriculture are as follows:

WHEAT

*Weighted average cash sales No. 1 dark northern spring wheat in Minneapolis, and average cash closing No. 1 and No. 3 Manitoba northern wheat in Winnipeg, July, 1923–April, 1928*

| Crop year | Minneapolis dark No. 1 | Winnipeg | | Difference between No. 1 dark northern Minneapolis and No. 1 Manitoba northern Winnipeg |
|---|---|---|---|---|
| | | No. 1 | No. 3 | |
| 1923 | *Cents per bushel* | *Cents per bushel* | *Cents per bushel* | *Cents per bushel* |
| Week ending— | | | | |
| July 7 | 119.0 | 111.9 | 106.4 | 7.1 |
| July 14 | 118.3 | 108.2 | 101.9 | 10.1 |
| July 21 | 115.0 | 106.8 | 99.6 | 8.2 |
| July 28 | 120.0 | 107.6 | 100.4 | 12.4 |
| Aug. 4 | 120.4 | 106.9 | 99.7 | 13.5 |
| Aug. 11 | 120.6 | 108.0 | 101.1 | 12.6 |
| Aug. 18 | 123.3 | 111.5 | 104.4 | 11.8 |
| Aug. 25 | 122.3 | 118.5 | 110.2 | 3.8 |
| Sept. 1 | 125.3 | 117.5 | 107.5 | 7.8 |
| Sept. 8 | 129.4 | 116.3 | 105.9 | 13.1 |
| Sept. 15 | 127.2 | 109.3 | 99.1 | 11.9 |
| Sept. 22 | 123.8 | 101.1 | 95.8 | 22.7 |
| Sept. 29 | 124.5 | 97.9 | 92.1 | 26.6 |
| Oct. 6 | 124.8 | 98.9 | 93.5 | 25.9 |
| Oct. 13 | 127.0 | 99.1 | 93.0 | 27.9 |
| Oct. 20 | 125.3 | 96.5 | 89.0 | 28.8 |

Mr. ABERNETHY. Mr. Chairman, I move to strike out the last word.

Mr. GARRETT of Texas. Mr. Chairman, I make the point of order that all discussion upon this amendment is exhausted under the rules of the House.

The CHAIRMAN. The gentleman from North Carolina has moved to strike out the last word. If the gentleman will confine his point of order to the particular amendment, the Chair would sustain it.

Mr. GARRETT of Texas. Then the gentleman must confine his argument to the last word.

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina.

Mr. ABERNETHY. Mr. Chairman and gentlemen of the House, I have been a consistent supporter of this legislation, including the equalization fee, from its very inception. I was the one man in the southeastern section of the country who voted for it the first time the matter came before the House. My district was the only one in the southeastern section of the United States that voted for the Haugen bill with the equalization fee the first time it was considered. [Applause.] I have followed you gentlemen for all these years with the promise that you were going to get some farm-relief legislation. The thing that concerns me now is that you are going to put this very same thing up to the President of the United States in the same way you have had it before, and that we are going to have a veto and have not sufficient votes to override the veto, and we will not be able to get any legislation.

That is what confronts me. I never have liked the equalization fee, because I could never see the necessity in taxing the farmer when the Government would take care of the losses. I have heretofore voted for the bill because it seemed all we could get. The thing I can see in the insistence of the equalization fee being in the bill is that it may help nominate

somebody for President on the Republican side. [Laughter and applause.] I think I will vote for the bill in the form it reaches the House, in some form or other; but if I can keep the gentleman from Louisiana [Mr. ASWELL] to his text and keep the gentleman from New Jersey [Mr. FORT] from undertaking to change the Aswell substitute, I think the proposition now before us without the equalization fee is the best bill that has been proposed in the House and will give relief and will become a law. [Applause.]

Then if we want the equalization fee in the December session, we can provide it if we find it necessary. Why not do that? Why is not that the sensible thing to do? I do not care whether Mr. Lowden or Mr. Hoover is nominated on the Republican ticket. The Democrats are going to have the next President of the United States, anyhow. [Applause.]

Mr. FULBRIGHT. Mr. Chairman, will the gentleman yield?

Mr. ABERNETHY. I will be glad to yield.

Mr. FULBRIGHT. I have heard the opposite side of the House chided frequently because it was afraid of a veto by the President. I do not understand why we should follow the President on an agricultural bill and not follow him on anything else.

Mr. ABERNETHY. I think the $400,000,000 revolving fund provided in the bill will take care of the cotton and other situations in the South. I can see that.

Mr. ARENTZ. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman from North Carolina can not be taken off his feet by a parliamentary inquiry.

Mr. ARENTZ. Will the gentleman yield?

Mr. ABERNETHY. I will ask the gentleman not to interrupt me now, as my time is so limited.

Gentlemen, I do say in all seriousness that I am going to vote for some kind of farm relief this Congress, and I appeal to you, unless you have some assurance that we can get this bill enacted into law with an equalization fee in it, why do you put us in the position of constantly voting for something and getting nothing through Congress? We ought to get together and get some relief here. If we can get the opponents of farm relief to give us a revolving fund of $400,000,000 and the machinery of the Haugen bill, and it looks as though it would become a law and give us what we need, why not do this?

Mr. FULBRIGHT. Did the gentleman take that position on the flood control bill?

Mr. ADKINS. Mr. Chairman, will the gentleman yield?

Mr. ABERNETHY. Yes.

Mr. ADKINS. You do not think it would be a proper thing, do you, for Congress to go and ask the President whether he would sign a bill that he had never seen, and when we had met 9½ of his 10 objections would we not have a pretty good gambler's chance?

Mr. ABERNETHY. Can you give me the assurance that the President will sign the bill with the equalization fee in it?

Mr. ADKINS. Do you think the President could tell me his opinion of something he had never seen?

Mr. ABERNETHY. It looks to me as though we were just going on and not doing anything. I want farm relief at this session. [Applause.]

Mr. QUIN rose.

The CHAIRMAN. The gentleman from Mississippi is recognized.

Mr. KINCHELOE. Mr. Chairman, I want to make a point of order against the proposed amendment before the gentleman closes.

Mr. QUIN. I will close this debate right now. [Laughter.] The Aswell amendment must be killed.

Mr. Chairman and gentlemen, I never have in my long experience, having joined the Farmers' Alliance in 1887, and worked for the farmers' interests up to this hour, seen anything like unity among the farmers when their safeguards and protection of their rights are concerned. They all want to do what is right. Even their friends, some educated at colleges and universities, and some educated in the schools of adversity, can not agree, after all these years and weary months, on what should be done for the farmer. For my part I am for this McNary-Haugen bill. [Applause.] I am for this bill with an equalization fee in it. [Applause.]

I will tell you what the equalization fee means. Yes; we are going to take the $400,000,000, but that will not do the work unless you have the vitalizing power of a great union. The equalization fee forces the producers of a commodity all the way from the Atlantic to the Pacific Oceans to pay the equalization and thus become members of this union. I belong to a section of country where we produce cotton. Are my cotton friends here afraid to put on an equalization fee? I want this bill to take in and comprehend every bale of cotton in the United States, and an equalization fee will do it. It will do that, and in that way it will guarantee the producers of cotton a fair and just price for their commodity. You can not do it in any other way. This bill will have the same effect on wheat and every other commodity that is embraced in it. It is unity that we need, a great big union of all the farmers of the United States.

And that is my answer to the gentleman from Massachusetts [Mr. LUCE]; and, by the way, he has more sense on this than a lot of the rest of you who say it will not raise the price. He is against the bill because it will add $40 per year to the cost of each family's living in the cities. It goes into the pockets of the farmers, the men who produce the commodity. They will get that additional money. The gentleman knows this bill with the equalization fee in it will raise the price of farm products. We are going to get it through the equalization fee, and you will not get it in any other way. This other method also will do some good. I know it will help a lot. But what good will it do if you have only 10 per cent of the producers of a commodity in the union? The equalization fee will put every single producer in this union. I do not mean he will join, but the fact that the fee is placed on what he sells has the same result and effects, and consequently all of that cotton or other commodity will bring a much higher price. Through the workings of this bill the purchasers are forced to deal and bargain with all of the producers instead of a small per cent as at present.

The equalization fee will put every single producer in this big union and it will have the effect of giving him a fair price for his products. You can drive along and with your whip hit one hornet and it will not hurt anything, but if you hit a hornets' nest with a thousand hornets it it you will be stung to death. When these farmers are organized, like that nest of hornets is organized, they will be able to receive a fair reward for their toil. As it is now, our helpless farmer, by himself, is at the mercy of the purchaser.

Who is it that is afraid to stand up, take a chance, and vote for the farmers of this country? Those of us who live among the cotton producers know that if a farmer realizes that by the payment of a fee of $10 a bale, under the equalization fee, he will recover $25, he will be happy, and that is what is going to be the result. The men who have studied this question know that is true and they are all for this bill. All of the organizers throughout this country, representing sensible and patriotic farm organizations, are for this equalization fee. So do not fall out among ourselves and take the vitals out of this bill. The real, vitalizing force, the real element in here to safeguard the producers of this country, who work in the rain, in the sun, sweat all day long, and wear old, dirty clothes in order to feed us, is the equalization fee. These producers ought to be protected through the equalization fee, and this Haugen bill with the equalization fee in it, is the vitalizing force which will make the farmers of this country receive a fair and just price for their products. [Applause.]

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. HAUGEN. Mr. Chairman, I desire to renew my request that all debate on the pending amendment and on all amendments thereto close at 3 o'clock.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that all debate on the pending amendment and all amendments thereto close at 3 o'clock. Is there objection?

Mr. GARRETT of Texas. Mr. Chairman, I object, and make the point of order that all debate on the pending amendment is closed.

The CHAIRMAN. The gentleman from Texas objects, and makes the point of order that all debate on the pending amendment is closed, and the Chair sustains the point of order.

Mr. LAGUARDIA. Mr. Chairman, I have a perfecting amendment. On the first line of section 1, after the word "interstate," insert a comma and the word "domestic," so it will read "in order to stabilize the current of interstate, domestic, and foreign commerce," and on that I ask recognition.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: On page 31, in line 1, after the word "interstate," insert a comma and the word "domestic."

Mr. FORT. Mr. Chairman, I make a point of order. We are not reading page 31.

Mr. LAGUARDIA. No; this is on the substitute offered by the gentleman from Louisiana.

Mr. FORT. Then it comes on page 1 of the substitute.

Mr. LAGUARDIA. It is an amendment to section 1 of the substitute offered by the gentleman from Louisiana.

Mr. FORT. That is page 1.

Mr. LAGUARDIA. There is no page to a substitute.

Mr. FORT. The gentleman offered it in printed form.

Mr. LAGUARDIA. The gentleman knows what I mean.

Mr. FORT. Well, I want the record straight, so we will know what we are talking about.

The CHAIRMAN. The Clerk will again report the amendment.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: Page 1, line 1, of the Aswell amendment, after the word "interstate" insert a comma and the word "domestic."

Mr. LAGUARDIA. In order to comply with the wishes of the gentleman from Texas [Mr. GARRETT], I will talk only to my amendment, Mr. Chairman. I want to point out to my friends representing farming districts that they are deceived if they take the number of loaves of bread that are baked in the United States every day and seek to ascertain how much flour is consumed. I want to point out to the gentleman from New Jersey, who the other day referred to the possible increase in the price of bread if wheat were placed in operation under the bill, that he fails to take into consideration the fact that the people of the cities—New York and Washington—no longer have wheat bread, but are eating mostly pneumatic bread. Here is a typical loaf that the good women of Washington bought this morning at the market for 9 cents, supposedly for the purpose of giving their families wheat bread. It looks dainty, and it looks sanitary, and is supposed to weigh 1 pound, but, gentlemen, there is your wheat [compressing loaf with his hands]. Here is another brand [compresses loaf, then releases loaf, which blows back to its normal size]. In the old days a mother used to give her child a piece of bread to munch and a rubber ball to bounce, but now the child bounces the bread and munches the rubber ball.

Again, I appeal to the committee to give us the protection we ask when the time comes. In the seven minutes I had yesterday I urged it, and at the proper time permit us to put in an amendment that will protect the consumers of the cities against their own thieves and their own profiteers because we have them in the cities and they are bound to use the farm relief law as a pretext, to further exploit the consumers.

Imagine, gentlemen, under present conditions how the consumers are deceived, imposed upon, and cheated. These loaves of bread are underweight. They are puffed up to look the normal size so as to deceive the eye. The paraffin paper protects the loaf from losing its puffed and inflated size. So that besides getting heavy paraffin paper for the price of bread, the consumer gets air for wheat. Those loaves are typical. I have repeatedly found underweight in the run of bread sold daily in my city.

Once a commodity goes into operation, just as sure as night follows day the profiteers in the cities will get busy and artificially enhance the price of our food and blame your law for it. Just as the baker in this case puts air in the bread and weighs paraffin paper for bread and sells it for white wheat bread, they will put in more air and take out more wheat and charge us more money and blame your law for it.

Mr. BURTNESS. Will the gentleman yield?

Mr. LAGUARDIA. Certainly.

Mr. BURTNESS. Does the gentleman know how much the farmer got for the wheat in that loaf of bread?

Mr. LAGUARDIA. He got about as much as the man got for the paraffin paper.

Mr. BURTNESS. A little over 1 cent, or 1.15 cents at the outside.

Mr. LAGUARDIA. Yes; if it is honest bread; but in such bread as I have here he got much less.

Mr. BURTNESS. Yes; if it is a pound loaf.

Mr. LAGUARDIA. Yes; but the way it is pumped with air and the way it is baked, he did not get that much.

Mr. ANDRESEN. Will the gentleman yield?

Mr. LAGUARDIA. Yes.

Mr. ANDRESEN. Does the gentleman feel that his amendment will take care of this situation?

Mr. LAGUARDIA. I think if we put the amendment on wholesalers, commission merchants, jobbers, and bakers who artificially enhance prices when a commodity is in operation under the law, and provide a punishment for the offense, we will at least do all we can under the circumstances.

Mr. BURTNESS. Will the gentleman again yield?

Mr. LAGUARDIA. I yield to the gentleman.

Mr. BURTNESS. And would not wheat have to increase at least 80 cents a bushel in order to justify an additional 1 cent in the price of a loaf of bread?

Mr. LAGUARDIA. More than that. An honest baker, such as Cushman's Sons (Inc.), of New York City, gets 366 loaves of bread out of one barrel of flour; that is, 366 loaves of honest bread and not pneumatic bread. There are 4 bushels and 10 pounds of wheat, as a gentleman has informed me, in a barrel of flour, and the price would have to go 83 or 84 cents above the highest price we have had since the war; not 83 cents above the price now, but above the highest price we have had since the war, before it would replace 1 cent a loaf, and I am talking of honest bread, both in weight and contents.

Gentlemen, I do not want to take any more time, but I ask the cooperation of the committee when the proper time comes. [Applause.]

I ask unanimous consent, Mr. Chairman, to withdraw my pro forma amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HAUGEN. Mr. Chairman, I move that all debate on the Aswell amendment and all amendments thereto close at 3 o'clock.

The motion was agreed to.

Mr. WRIGHT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Georgia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WRIGHT: On page 7, in line 16, of the Aswell amendment insert the following: "To banks and to associations or corporations organized by farmers or others under the laws of any State."

Mr. WRIGHT. Mr. Chairman and gentlemen of the committee, under the terms of this bill this revolving fund of $400,000,000 can not be loaned except to cooperative associations or to corporations organized by cooperative associations. In other words, the only concerns in the United States that are eligible to borrow one dollar of this revolving fund would be a cooperative marketing association or a corporation organized by such association.

Gentlemen, it has been stated here that the cooperative associations of the United States on the average do not represent over 7 per cent of the commodities produced. Take the State of Georgia as an illustration. They have what is known as a cooperative cotton association and I am informed that perhaps not over 3 or 5 per cent of the cotton produced in Georgia is represented in the membership of that association, and yet this bill provides that no person or company or corporation in Georgia except that cooperative association, or a corporation organized by it, shall be eligible to borrow any of this fund.

My amendment proposes to enlarge the eligibility and include banks and associations or corporations organized by farmers or others under the laws of any State. The loans, of course, to be confined to agricultural products, just as the bill provides; in other words, the banks and other corporations or associations which might borrow from this fund would operate just as a cooperative association would operate under the requirements of the bill; that is, use it for the specific purposes set out in the bill.

You can see, gentlemen, that many farmers might prefer, if they proposed to carry or hold their products, to borrow from a bank or from some association or corporation other than a marketing association.

Mr. ARENTZ. Will the gentleman yield?

Mr. WRIGHT. Yes.

Mr. ARENTZ. Subsection (c) of section 5 specifically provides that any corporation created and controlled by one or more cooperatives shall come under the provisions of the bill.

Mr. WRIGHT. I understand that.

Mr. ARENTZ. How does the gentleman interpret the word "corporation"?

Mr. WRIGHT. I interpret it that no corporation organized under any law can borrow one dollar of this money unless the corporation is organized by a cooperative association; in other words, it would be a subsidiary of some cooperative that would be under the direct control of the cooperatives.

Mr. ARENTZ. The gentleman said that the parent company in existence in the State of Georgia would have to control the organization that would come under these provisions.

Mr. WRIGHT. Absolutely, under the terms of this bill.

Mr. ARENTZ. Was that brought out in the hearings?

Mr. WRIGHT. I do not know. It is in the bill. That is the plain language of the bill.

Mr. ARENTZ. I wish the gentleman would point it out to me, because I would like to see that.

Mr. WRIGHT. If the gentleman will turn to the Aswell amendment, page 7, section 5, he will see that there can not be any question about it. No company, no corporation, and no association in the world is eligible to borrow one dollar of this money except a cooperative association or a corporation organized by such an association.

Mr. FORT. Will the gentleman yield?

Mr. WRIGHT. Certainly.

Mr. FORT. There is also a provision for loans for the purpose of establishing agricultural credit corporations, which meets the exact objection the gentleman is now raising.

Mr. WRIGHT. Point that out in the bill, please.

Mr. FORT. It is subdivision (c) of section 5, I think.

Mr. WRIGHT. Of the Aswell bill?

Mr. FORT. Yes; it is the same section in both bills.

Mr. WRIGHT. Under the provision which the gentleman cites no part of the revolving fund could be borrowed originally except by a cooperative association or corporation created and controlled by one or more cooperative associations for use as capital for any agricultural credit corporation eligible to receive discounts under section 202 of the Federal farm loan act, so that a cooperative association or corporation created and controlled by one or more such associations would first have to borrow from the board and in turn loan for use as capital for an agricultural credit corporation.

Mr. FORT. Subsection 3 of paragraph 2 of 5a. In the original bill it is page 38.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. WRIGHT].

The question was taken; and on a division (demanded by Mr. WRIGHT) there were 32 ayes and 88 noes.

So the amendment was rejected.

Mr. HARRISON. Mr. Chairman, I offer the following amendment, and as I understand there is no objection to it.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment by Mr. HARRISON to the Aswell amendment: Page 23, line 4, after the word "act," insert "agricultural commodities means an agricultural commodity which is not a fruit."

Mr. HARRISON. Mr. Chairman and gentlemen, what I want to do by this amendment is to exclude from the bill the apple industry. That was done in the Senate. I have the consent of the chairman of the committee [Mr. HAUGEN] and I have the consent of the gentleman from Louisiana [Mr. ASWELL] to offer this amendment. It has been submitted to both of them.

Mr. COCHRAN of Missouri. Does the gentleman include vegetables?

Mr. HARRISON. No; but I am perfectly willing that it shall be put into the amendment.

Mr. ANDRESEN. Does the gentleman mean that he does not want fruit in the cooperative provisions?

Mr. HARRISON. Yes; I don't want it to be in the bill at all.

Mr. KINCHELOE. Will the gentleman yield?

Mr. HARRISON. I will.

Mr. KINCHELOE. The gentleman's amendment strikes out the provisions of the equalization fee as applicable to fruit, but does he want it taken out of the loan provisions?

Mr. HARRISON. Yes; I want it to be out of the whole bill.

Mr. BANKHEAD. Will the gentleman yield?

Mr. HARRISON. I yield.

Mr. BANKHEAD. There was so much confusion that we could not hear very well. I understood the amendment of the gentleman to apply to the apple industry.

Mr. HARRISON. No; to fruit. But, of course, it includes the apple industry. I use the words of the Senate bill, and purposely do so.

Mr. BANKHEAD. It applies to fruit of all descriptions.

Mr. HARRISON. Yes.

Mr. BANKHEAD. Now, I understand that that amendment is agreeable to the chairman of the Agricultural Committee [Mr. HAUGEN] and the gentleman from Louisiana [Mr. ASWELL]?

Mr. HARRISON. Yes; I have submitted it to them both.

Mr. HAUGEN. I want to say that a number of people who are apple growers came before the committee and requested that the bill be limited as far as they were concerned. As far as I am concerned I shall make no objection to the gentleman's amendment. I think it should be limited to apples, however, because the apple growers are the ones who requested it. There are also some apple growers who would like to have it in the bill, but I am not taking any position in regard to it.

Mr. HASTINGS. May I inquire whether the Agricultural Committee considered this amendment?

Mr. HAUGEN. There was not very much consideration given to it.

Mr. BOWMAN. Will the gentleman yield?

Mr. HARRISON. Yes.

Mr. BOWMAN. I have had a number of requests from apple growers in my State asking consideration of the Neely amendment, which took the fruit growers out from under the equalization fee, but kept it in the marketing provision of the bill.

Mr. HARRISON. Yes; I had a resolution sent me from the Horticultural Society of the State of Virginia asking that apples be eliminated from all features of the bill. I think I have some telegrams from West Virginia fruit growers. I have from the adjoining territory in Virginia.

The CHAIRMAN. The time of the gentleman from Virginia has expired. All time has expired, and the question is on the amendment offered by the gentleman from Virginia [Mr. HARRISON] to the amendment of the gentleman from Louisiana [Mr. ASWELL].

The question was taken, and the amendment was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Louisiana [Mr. ASWELL].

The question was taken; and on a division (demanded by Mr. CRISP) there were 121 yeas and 101 nays.

Mr. HAUGEN and Mr. ANDRESEN demanded tellers.

Tellers were ordered, and the Chair appointed as tellers Mr. HAUGEN and Mr. ASWELL.

The committee again divided; and the tellers reported that there were 141 yeas and 120 nays.

So the amendment of Mr. ASWELL as a substitute was agreed to.

The Clerk read as follows:

FEDERAL FARM BOARD

SEC. 2. (a) A Federal farm board is hereby created which shall consist of the Secretary of Agriculture, who shall be a member ex officio, and 12 members, one from each of the 12 Federal land-bank districts, who shall be appointed by the President of the United States, by and with the advice and consent of the Senate.

(b) The terms of office of the appointed members of the board first taking office after the approval of this act, shall expire, as designated by the President at the time of nomination, 4 at the end of the second year, 4 at the end of the fourth year, and 4 at the end of the sixth year, after the date of the approval of this act. A successor to an appointed member of the board shall be appointed in the same manner as the original appointed members, and shall have a term of office expiring six years from the date of the expiration of the term for which his predecessor was appointed.

(c) Any person appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

(d) Any member of the board in office at the expiration of the term for which he was appointed may continue in office until his successor takes office.

(e) Vacancies in the board shall not impair the powers of the remaining members to execute the functions of the board, and a majority of the appointed members in office shall constitute a quorum for the transaction of the business of the board.

(f) Each of the appointed members of the board shall be a citizen of the United States, shall not actively engage in any other business, vocation, or employment than that of serving as a member of the board, and shall receive a salary of $10,000 a year, together with necessary traveling expenses and expenses incurred for subsistence or per diem allowance in lieu thereof, within the limitations prescribed by law, while away from the principal office of the board on business required by this act, or if assigned to any other office established by the board, then while away from such office on business required by this act.

Mr. ASWELL. Mr. Chairman, I move to strike out section 2.

The CHAIRMAN. The question is on the motion of the gentleman from Louisiana to strike out the section.

Mr. RAMSEYER. Mr. Chairman, on that I desire to be heard for a moment. I simply wish to explain to the Members of the House just what the parliamentary situation is so that we can vote intelligently upon the different sections as they will be read in the Committee of the Whole under the five-minute rule. The gentleman from Louisiana [Mr. ASWELL] offered an amendment to section 1 by way of a substitute, which has been adopted. He states, and we agree it is the fact, that it is the same as the Haugen bill except that the equalization-fee provisions are eliminated. Under the rules of the House, his amendment having been adopted, it does not do away with the necessity for reading and considering the rest of the bill. In other words, only section 1 of the bill before us is out. The substitute of the gentleman from Louisiana is in lieu of section 1. There is nothing to prevent, and it is entirely in

order as each section is read, to offer perfecting amendments to each section of the bill as it is reached for consideration. You may have the situation at the close of the consideration of the bill in the Committee of the Whole under the five-minute rule of every section in the Haugen bill being retained in the bill with perfecting amendments except, of course, section 1 which has already gone out, and also have the substitute of the gentleman from Louisiana [Mr. ASWELL] in the bill. But the rules will take care of that situation, because when we go back into the House we will have a separate vote or can have a separate vote on the amendments adopted in the Committee of the Whole. We can have a roll call on the amendment just adopted, offered by the gentleman from Louisiana as well as on every other amendment that shall be adopted hereafter. I should think the proper procedure for the proponents of this legislation would be to insist on the retention of the remaining sections of the Haugen bill in the bill, and if any of you have any amendments to offer, you can offer them. Of course the gentleman from Louisiana has served notice, and he will undoubtedly carry out his intentions, as each section is read, that he will move to strike it out. Pending such motion to strike out, perfecting amendments will be in order and may be adopted, and then the Committee of the Whole can vote down the motion of the gentleman from Louisiana to strike out the section.

Mr. HOCH. Mr. Chairman, will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. HOCH. In addition to that, unless we perfect these subsequent sections, when we get into the House and a separate vote is asked for upon these motions to strike out, we would only have the choice between striking out and leaving the section as it is in the bill, and would have no chance then to have the section perfected.

Mr. RAMSEYER. That is the fact. Suppose this is the situation that would get into the House. We have the amendment of the gentleman from Louisiana [Mr. ASWELL]. Then suppose his motion to strike out the sections as we come to them one by one prevail. You can get a separate vote, first, on the amendment offered by the gentleman from Louisiana, which has just been adopted, and you can also get a separate vote on each motion to strike out each separate section of the bill.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. KINCHELOE. And the vote will be, of course, upon the sections as modified, if they are amended in the Committee of the Whole.

Mr. RAMSEYER. That is correct. That is all I care to say.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. BURTNESS. Is there any object in making an issue of the matter in the Committee of the Whole?

Mr. RAMSEYER. Suppose we get back into the House, and we vote down the motion of the gentleman from Louisiana.

Mr. BURTNESS. Then there would be nothing left.

Mr. RAMSEYER. Then, of course, you would have left the bill just as it is without any perfecting amendments.

Mr. BURTNESS. But if you vote down in the House the motion of the gentleman from Louisiana, then naturally we would also vote down in the House the amendments striking out all of the other sections.

Mr. RAMSEYER. That would naturally follow.

Mr. BURTNESS. And that would leave the bill in the form it is in at the present time?

Mr. RAMSEYER. That is correct.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. CANNON. Mr. Chairman, I would not presume to differ with my friend from Iowa [Mr. RAMSEYER] on the position that he has just taken, because the gentleman is one of the best parliamentarians in the House. But in that connection may I suggest that if this were a proper substitute, if it provided a different text from that already in the bill, then it would be necessary to follow the usual routine.

But the amendment which has just been adopted by the committee is identical, word for word, comma for comma, with the original bill. It is a well-established rule that an amendment having once been adopted is not thereafter subject to further modification. You can not modify an amendment after it has been agreed to.

A matter having been once adjudicated may not be again opened for amendment except by unanimous consent.

The committee has passed upon this amendment. It has decided that it will put this amendment in the bill, and it is not now subject to modification.

Mr. RAMSEYER. Mr. Chairman, will the gentleman yield?

Mr. CANNON. Yes.

Mr. RAMSEYER. The Committee of the Whole, it is true, has adopted the Aswell amendment. It is true that in the most part the Aswell amendment is as the bill before us. But how are you going to get rid of section 2 and section 3 when we come to them? You must concede that the only thing that has been stricken out of the bill up to this point is section 1, and the amendment offered by the gentleman from Louisiana [Mr. ASWELL] is only a substitute for section 1. It is not a substitute for the rest of the bill.

Mr. CANNON. Every clause in the substitute is identical with the section under consideration. Adoption of the original language of a section in the form of a substitute is tantamount to striking out such section.

The precedents contain decision after decision, holding that a matter having once been adjudicated can not be opened again for consideration, and the original section having been supplanted by a substitute which can not be amended has in effect been stricken from the bill.

Mr. ADKINS. Section 1 has been stricken out, and the Aswell bill adopted in its stead.

Mr. CANNON. That is right.

Mr. ADKINS. While that amendment was pending it was germane then to offer amendments to the amendment, but after it is adopted, how can you do anything more?

Mr. CANNON. The gentleman is right. Those who desire to propose amendments have had their opportunity, but have slept on their rights, and the substitute having been perfected and adopted it is now too late for further modification.

Mr. RAMSEYER. If the gentleman is correct about that, what is the parliamentary procedure from now on?

Mr. CANNON. The committee reports the section to the House.

Mr. RAMSEYER. But the bill has not been read. Not only the rules of the House, but the special rule under which we are operating directs that the bill shall be treated as an original bill; that is, the committee substitute; and that it shall be read for amendment under the five-minute rule.

You have read the first section under the five-minute rule, and no other section. I do not care how much alike they are. So far as the Committee of the Whole is now informed, we have no information that the substitute is identical with the original bill except as we have been advised by a Member of the House.

Mr. CANNON. That very question was passed upon by the gentleman from Massachusetts [Mr. LUCE] the other day when presiding over the Committee of the Whole. He held——

Mr. BANKHEAD. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BANKHEAD. I would like to inquire what is the parliamentary situation?

The CHAIRMAN. The matter before the House is the motion of the gentleman from Louisiana [Mr. ASWELL], to strike out section 2 of the Agricultural Committee substitute.

Mr. BANKHEAD. Then I demand the regular order under that parliamentary situation.

Mr. CRAMTON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Michigan moves to strike out the last word.

Mr. LAGUARDIA. I think a point of order is pending.

Mr. CRAMTON. If there is a point of order pending, I would like to be recognized to speak on the point of order.

The CHAIRMAN. There is no point of order pending, but gentlemen have discussed the parliamentary situation.

Mr. CRAMTON. I move to strike out the last two words.

Mr. CHINDBLOM. Mr. Chairman, a point of order.

The CHAIRMAN. The gentleman will state it.

Mr. CHINDBLOM. The gentleman may be recognized in opposition to the last motion, but the motion contains no last word.

Mr. LAGUARDIA. Mr. Chairman, I desire to reserve a point of order on the motion made by the gentleman from Louisiana [Mr. ASWELL].

Mr. CRAMTON. Mr. Chairman, I ask unanimous consent to proceed for five minutes.

Mr. Chairman, what I am trying to do is to get a chance to interrogate the gentleman from Missouri [Mr. CANNON] and I think, inasmuch as he has argued at length, the gentleman should not make a point of order against my speaking in opposition to what he has presented. I ask unanimous consent to proceed for five minutes out of order.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to proceed for five minutes out of order. Is there objection?

Mr. BEEDY. I shall object until the House is in order, and I wish to suggest that there is a Sergeant at Arms who can keep order, or at least assist.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

Mr. BEEDY. Mr. Chairman, I object until the House is in order.

Mr. CANNON. Mr. Chairman, I submit the point of order that no motion is now in order except the motion to strike out; no amendment or proposition to perfect the bill is in order except the motion to strike out.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Is there objection?

Mr. CRAMTON. The gentleman from Missouri has argued on the point of order. I want to speak in opposition to his argument.

I do not believe he ought to object to the unanimous-consent request I have made.

Mr. CANNON. I did not object; and I am always glad to hear the gentleman.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan to proceed for five minutes out of order?

Mr. BLACK of New York. Mr. Chairman, reserving the right to object, what is the gentleman going to speak about?

Mr. CRAMTON. I am trying to discuss the business before the House.

Mr. BLACK of New York. Just on what point?

Mr. CRAMTON. On a point of order that has not been made.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. CRAMTON. Mr. Chairman, I am embarrassed to have had so much excitement attendant upon my efforts to contribute just a word or two on the situation before the committee; but the position maintained by the gentleman from Missouri did not impress me as well taken. The motion which has prevailed is simply a motion to strike out the first section of the bill and substitute therefor other matter. Under the rules of the House that is the way the gentleman from Louisiana had to proceed. The argument of the gentleman from Missouri was quite correct, in so far as the ordinary situation before the committee would exist, that when the same matter has been once acted upon it can not be brought up again; but the weakness in the argument of the gentleman from Missouri lies in this, that the committee is confronted with an extraordinary situation, a situation that must always face the committee when the first section of a bill has been stricken out and an entirely new bill put in in its place.

The rules make possible that which otherwise would not be possible, because much of that amendment was not germane to the first section, but the rules make that possible and it has been done.

Mr. CANNON. Will the gentleman yield?

Mr. CRAMTON. Not now, but I will yield later. Now, the rule under which the Aswell amendment or substitute was agreed to provides only for the striking out of the first section. The second section, the third section, and the fourth section have not been stricken out. The gentleman from Missouri argues that having once acted upon the subject matter of those sections in connection with the Aswell substitute the committee can not again act upon that same subject matter, whereas we inevitably must again act upon them, although in what manner we act upon them remains to be seen. That is to say, even the gentleman from Missouri does not propose to leave in section 2 or leave in section 3. Section 2 is now before the committee for consideration and whatever position may be taken we have got to take some action with reference to section 2; that is to say, we must again give consideration to the subject matter in section 2. Now, the gentleman from Iowa says that when we are giving consideration to that, as we must give consideration to it, the committee will have the right, instead of striking it all out, to strike it out, or amend, or even retain the section; in other words, this committee has before it the determination of what it will do with section 2. If it were not for the peculiar conditions under which we are now trying to operate the gentleman's argument would ordinarily control but it does not control at all now.

My argument is, Mr. Chairman, that since under this procedure we have to act upon section 2 the committee has the liberty of action of deciding what it will do with section 2, whether it will retain it or amend it.

Mr. STEVENSON. Will the gentleman yield?

Mr. CRAMTON. I will first yield to the gentleman from Missouri.

Mr. CANNON. Under ordinary circumstances the right to strike out a section necessarily involves the right to modify that section? You can not have the right to strike out without having the subordinate right to modify.

Mr. CRAMTON. And that is my argument exactly.

Mr. CANNON. But there is here a distinguishing difference. The substitute just adopted is identical with the original text. You can not modify this proposition because you have already adopted it. Therefore, the technical right to strike it out is, in this instance, purely a formality.

Mr. CRAMTON. I thought I was yielding to the gentleman for a question; but I thank him for his contribution.

Mr. STEVENSON. Will the gentleman yield?

Mr. CRAMTON. Yes.

Mr. STEVENSON. I would like to ask the gentleman if it would now be competent to amend the amendment offered by the gentleman from Louisiana and adopted?

Mr. CRAMTON. It would not be competent to act upon the substitute offered by the gentleman from Louisiana.

Mr. STEVENSON. Then would it be competent to adopt something subsequently which is an amendment to it? Would not the adoption of something inconsistent with it be an amendment to it?

The CHAIRMAN. The time of the gentleman from Michigan has expired. The Chair would like to see whether he understands the parliamentary situation. As the Chair understands, the gentleman from Missouri makes a point of order? Will the gentleman state his point of order?

Mr. CANNON. That it is not in order to proceed with the reading of the section for amendment for the reason that a substitute has been adopted striking out and substituting identical language.

Mr. CRISP, Mr. DOWELL, and Mr. HOCH rose.

The CHAIRMAN. The Chair recognizes the gentleman from Georgia [Mr. CRISP].

Mr. CRISP. Mr. Chairman, the parliamentary situation it seems to me is clear. There is no question but what under the rules and practice of the House when a bill is up for consideration in the Committee of the Whole under the five-minute rule it is in order to move to strike out all after the enacting clause and propose a new substitute, giving notice that if the motion prevails you will then proceed to strike out the remaining sections as read. This is a parliamentary way of getting before the body the entire question as to whether you are going to adopt the substitute for the original bill that you are considering.

You can not under this parliamentary subterfuge move to strike out all of the remaining sections of the original bill that have not been read, but the practical parliamentary and legislative effect of the motion prevailing to strike out all after the enacting clause and substitute a new text is that the remaining sections of the bill are rejected by the committee.

Mr. CANNON. Will the gentleman yield?

Mr. CRISP. In just a moment.

It is also true that under the precedents of the House after the committee has adopted a bill or an amendment it is not in order then to move to amend or change that, based on the doctrine of res adjudicata, that when the House or the committee has given its judgment on a matter and adopted it, that is final. If it were not, you could go on ad infinitum proposing new amendments.

Mr. HOCH. Will the gentleman yield there?

Mr. CRISP. I would prefer to finish my statement and then I will be pleased to answer any question in the world that I can.

Much has been said about the effect of this legislation doing away with the five-minute rule. It was entirely within the discretion and judgment of the committee as to whether they would do this or not. If they had voted down the substitute, then the bill would have been read under the five-minute rule.

Under the rules of the House it is also in order when you begin the consideration of a bill to move to strike out the enacting clause. If the enacting clause is stricken out, that ends the matter. The committee reports to the House, and that settles it, because why should the committee go and consider a matter when it has a judgment contrary to the bill before it and desires to bring the matter to a conclusion?

Gentlemen, it seems to me the present parliamentary situation is that the Committee of the Whole has adopted a substitute for the original Haugen bill which the committee was considering, and then the parliamentary situation in effect is that the committee has rejected all of the other sections of the bill——

Mr. HAUGEN. Will the gentleman yield?

Mr. CRISP. Yes.

Mr. HAUGEN. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MAPES, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill S. 3555, had come to no resolution thereon.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Craven, its principal clerk, announced that the Senate insists upon its amendments to the bill (H. R. 12875) entitled "An act making appropriations for the legislative branch of the Government for the fiscal year ending June 30, 1929, and for other purposes," disagreed to by the House of Representatives, agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. WARREN, Mr. SMOOT, Mr. CURTIS, Mr. BROUSSARD, and Mr. COPELAND to be the conferees on the part of the Senate.

ENROLLED BILL SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled a bill of the following title when the Speaker signed the same:

H. R. 10151. An act to amend section 9 of the Federal reserve act.

RECESS

EHRENFRIED GÜNTHER VON HUENEFELD, JAMES C. FITZMAURICE, AND HERMANN KOEHL

Mr. TILSON. Mr. Speaker, I ask unanimous consent that the House may stand in recess subject to the call of the Chair in order to receive, during the recess, the distinguished trans-Atlantic flyers, Baron von Huenefeld, Major FitzMaurice, and Captain Koehl. [Applause.]

The SPEAKER. The gentleman from Connecticut asks unanimous consent that the House stand in recess subject to the call of the Chair. Is there objection? [After a pause.] The Chair hears none, and the Chair appoints the gentleman from Connecticut [Mr. TILSON], the gentleman from Texas [Mr. GARNER], and the gentleman from Pennsylvania [Mr. PORTER] to escort our distinguished visitors to the House.

Accordingly (at 3.41 p. m.) the House stood in recess subject to the call of the Speaker.

DURING THE RECESS

Mr. TILSON, Mr. GARNER of Texas, and Mr. PORTER escorted Baron von Huenefeld, Major FitzMaurice, and Captain Koehl to the Speaker's rostrum.

The SPEAKER. Gentlewomen and gentlemen of the House, we are honored to have with us as our guests this afternoon the three heroic and intrepid aviators, representatives of two great and friendly nations, the first of men to conquer the Atlantic by air from east to west. [Applause.]

I am pleased indeed to present to you Baron von Huenefeld [applause], Maj. James FitzMaurice [applause], and Captain Koehl [applause].

These gentlemen will be delighted to meet the Members individually.

Baron von Huenefeld, Major FitzMaurice, and Captain Koehl stood in the well of the House and the Members and officials of the House were presented to them by Mr. TILSON.

AFTER THE RECESS

The SPEAKER called the House to order at 4 o'clock p. m.

APPOINTMENT OF FUNERAL COMMITTEE

The SPEAKER. The Chair appoints the following committee to attend the funeral of the late Representative Sweet.

The Clerk read as follows:

JAMES S. PARKER, BERTRAND H. SNELL, S. WALLACE DEMPSEY, ARCHIE D. SANDERS, CLARENCE MACGREGOR, FIORELLO H. LAGUARDIA, DANIEL A. REED, J. MAYHEW WAINWRIGHT, JOHN TABER, FREDERICK M. DAVENPORT, HARCOURT J. PRATT, JOHN D. CLARKE, CLARENCE HANCOCK, WILLIS C. HAWLEY, ALLEN T. TREADWAY, JOHN CAREW, THOMAS CULLEN, CHRISTOPHER D. SULLIVAN, ANTHONY J. GRIFFIN, JOHN J. BOYLAN, GEORGE W. LINDSAY, D. J. O'CONNELL, ROYAL H. WELLER, WILLIAM W. COHEN, and JOHN J. O'CONNOR.

AGRICULTURAL SURPLUS CONTROL BILL

Mr. ASWELL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ASWELL. The committee having adopted a substitute to the McNary-Haugen bill, who has the right to make the motion to go into the Committee of the Whole?

The SPEAKER. The Chair thinks that the gentleman from Iowa, the chairman of the Committee on Agriculture, would have the right.

Mr. HAUGEN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill (S. 3555) to establish a Federal farm board, and so forth.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with Mr. MAPES in the chair.

The CHAIRMAN. The gentleman from Georgia will proceed.

Mr. CRISP. Mr. Chairman and gentlemen, I will conclude in a few moments. As I stated before a technical motion to strike out the first section and offer a complete substitute with notice that if it prevails it will be moved to strike out the succeeding sections is a motion of legislative entity and when the House votes, in the original substitute for the first section, it in effect gives by implication its acquiescence to striking out all the remaining sections of the bill. The House having adopted in Committee of the Whole a complete legislative substitute for the original Haugen bill the committee is estopped from adopting any amendment that changes in any way the substitute to which the committee has just given its legislative approval.

I think that is clear, but the matter is not complicated so far as the power of the House of Representatives is concerned. The House of Representatives has the power to work its will on this bill now as completely as it had before the substitute was adopted. I think the Committee of the Whole is bound to ratify the motion to strike out the remaining sections as they are read and then report the bill to the House and see whether or not the House will approve of the action of the Committee of the Whole.

Now, suppose that the committee refuses to strike out the remaining sections. Then the chairman of the committee reports back to the House that the Committee of the Whole has adopted a substitute for it, and also reports back the original bill; and suppose the House should see fit to ratify the action of the committee and adopt the substitute, what are you going to do with the original bill that is also hanging there—you have a legislative monstrosity.

But when the bill is reported back to the House with the recommendation of the committee that the substitute be adopted and the remaining sections of the bill be stricken out, if the House refuses to ratify the previous action of the Committee of the Whole House on the state of the Union in adopting the substitute, then the whole original Haugen bill as reported from the Committee on Agriculture is before the House for action. The House has the whole bill before it for consideration. Of course, if the previous question is demanded and sustained by a majority vote then the question would come on a vote to pass the Haugen bill as reported by the Committee on Agriculture without amendment. But if the previous question is not ordered in the House, then in that event the whole original Haugen bill would be before the House, and the House might offer amendments to it and consider it in the House, offering amendments to any section. The House would also have the power if it saw fit in that contingency to refer the original Haugen bill back to the Committee of the Whole House on the state of the Union to be considered under the five-minute rule.

Therefore it seems to me that the whole matter is within the power of the House to work its will without violating any of its rules or legislative precedents in the premises.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. CRISP. Yes.

Mr. KINCHELOE. As the gentleman knows, I have one or two amendments which I propose to offer under the five-minute rule. Does the gentleman maintain that the perfecting amendments to the remaining sections in the original Haugen bill would not take precedence over a motion to strike out?

Mr. CRISP. I do, for the reason that the committee has adopted by a vote a substitute for the whole bill, and the effect of that was to confine the further action of the committee to striking out those sections that remain in the bill. Unquestionably under the rules of the House in ordinary matters a motion to perfect is preferential in the vote to a motion to strike out the section, but I differentiate this case from that because the committee has adopted a complete piece of legislation so far as the committee is concerned, and the effect of that action, and it was so understood or supposed to be understood if the Members knew the rules, that the remaining sections have to be stricken out. The original Aswell substitute was open for all perfecting amendments the Members of the House cared to offer before it was finally voted upon.

Mr. KINCHELOE. Is it the gentleman's contention that if the Aswell substitute be reported to the House and the action of the committee rejected, that then the House could go back into the Committee of the Whole House to consider the McNary-Haugen bill again section by section under the five-minute rule as if we had never gone back into the House?

Mr. CRISP. Unquestionably, in my opinion, if the previous question is not ordered upon the bill to final passage.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. CRISP. Yes.

Mr. BURTNESS. Is there any way to get rid of sections 2 to 21, inclusive, without voting them out, except by unanimous consent?

Mr. CRISP. I do not think so. I think it is a technical legislative proceeding, and the condition in which we find ourselves is that the remaining sections should be read and the pro forma motion to strike them out should be made. I think the committee by adopting the substitute is committed legislatively to approving those motions to strike out those sections.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. CRISP. Yes.

Mr. CRAMTON. My interest in this is the development of proper procedure.

Mr. CRISP. That is all the interest that I have in it.

Mr. CRAMTON. The gentleman from Georgia has stated that in the case of a motion to strike out the enacting clause and the motion prevails, immediately when that motion is adopted the committee rises and reports its action to the House. To continue in such a case to act on sections 1 and 2, and so forth, would be only useless when the enacting clause is taken out. In the case now before us the gentleman is assuming that we have no freedom of action as to the sections remaining in the bill, because under this particular rule a motion has been approved to strike out section 1 and substitute a new bill. The gentleman contends that the committee has no discretion left as to what it will do with 20 sections except to go through the formality of acting on 20 motions and striking out 20 sections. If that is the case, why do not the rules provide that in the event that a motion be agreed to to strike out the first section, with notice, and so forth, that then the committee should rise at once, as they do when a motion to strike out the enacting clause prevails.

Mr. CRISP. Mr. Chairman, the gentleman states my position correctly. I was unfortunate, evidently, in giving the illustration of moving to strike out the enacting clause, and the committee rising immediately and reporting its action to the House. I simply injected that in order to answer some of the arguments that the Committee of the Whole House was compelled to read a bill through section by section under the five-minute rule. I used that as an illustration to show that that contention is not true.

The gentleman states my position exactly in the present case. Having stricken out section 1 and having adopted a substitute, with notice that if the motion prevailed a motion would be made to strike out the other sections, I think the committee is committed to do that. Answering the gentleman about the rule, I am not on the Rules Committee, but I have never known the Rules Committee to bring in a rule anticipating what motions would be made, anticipating the action of the Committee of the Whole House on a bill. The Rules Committee brings in a rule providing for the consideration of a bill under the general rules of the House. This is simply one of the general rules of the House that is applicable when a bill is under consideration.

Mr. CRAMTON. My reference to the rule was not to the special rule under which this bill is considered, but the rule under which a motion is made to strike out the first section, with notice, and so forth. If the gentleman's argument is correct, that we have no discretion left but to vote all the other sections out, it seems to me very peculiar that under the rules we are compelled to read all of the bill and vote on 20 motions to strike out the various sections. Why does not the rule then provide for the committee immediately rising and reporting its action to the House?

Mr. CRISP. If I were in the chair, feeling as I do and believing as I do, I would not hesitate to make a ruling in accordance with the gentleman's suggestion, because parliamentary law is supposed to be common sense. The precedents of the House, however, are the other way.

Mr. RAMSEYER. Mr. Chairman, will the gentleman yield?

Mr. CRISP. Yes.

Mr. RAMSEYER. I do not know that there is as much difference between the gentleman's attitude and my own, as I first thought. We agree that the remaining sections of the bill must be read?

Mr. CRISP. Yes.

Mr. RAMSEYER. A motion must be made to strike them out but the gentleman says that the Committee of the Whole House is bound to strike them out. I am wondering just in what sense he uses the word "bound." Does the gentleman mean that the Committee of the Whole House is morally bound, or is bound from a parliamentary standpoint to strike them out in order to make that action consistent with the action to amend the first section by striking it out and adopting a substitute?

Mr. CRISP. Of course, I meant legislatively, not morally. I would not question the morality or the ethics or the high standing of any man in this House. What I had in mind is a legislative proposition, the legislative effect of the motion adopting the Aswell substitute, and that is, when it prevails, it legislatively commits the committee to carry out the practical effect of the motion, which, of course, means striking out the inconsistent remaining sections of the bill.

Mr. RAMSEYER. Let me ask the gentleman from Georgia one other question.

Mr. CRISP. Yes.

Mr. RAMSEYER. And that is in regard to this motion to strike out and substitute an amendment. Of course, while the Aswell motion was pending it would have been in order to offer perfecting amendments to section 1?

Mr. CRISP. Yes; but to the Aswell amendment. It was in order to offer perfecting amendments ad infinitum to that substitute until it was finally voted on. But when it was finally voted on, then the question of estoppel arose, and you can not change what you have adopted.

Mr. RAMSEYER. I have not heard the rule of estoppel invoked in parliamentary procedure, although it is invoked in law.

Mr. CRISP. In a case where a House committee receives a bill erroneously referred to it, if the committee acts on it, the jurisdiction of the committee can not afterwards be questioned. In such cases the question of estoppel always arises and has been repeatedly so ruled by different Speakers.

Mr. RAMSEYER. That has no application to the situation before us. The gentleman stated the rule a little while ago, I think, correctly. When this bill is reported it will have the Aswell substitute and other amendments that may be adopted. The question comes up on the Aswell motion in the House; and suppose that amendment is lost?

Mr. CRISP. The motion would go further. The Chairman of the Committee of the Whole House on the state of the Union would report to the Speaker that the committee had adopted a substitute and recommended the striking out of the remaining sections of the original Haugen bill; and if the House voted to reject the Aswell substitute, then the House would vote to reject the other motion in the Committee of the Whole to strike out the other original sections, and then the whole original Haugen bill would be before the House.

Mr. ASWELL. One other question.

Mr. CRISP. Come one, come all. [Laughter.]

Mr. RAMSEYER. But you would have the rest of the Haugen bill before you without any perfecting amendments. Would you deny the opportunity to perfect subsequent sections—which was not denied when section 1 was under consideration?

Mr. CRISP. You would not deny the opportunity if the House desires a chance to perfect them, because if the House wanted to consider the bill itself, it having been once in Committee of the Whole for amendment, the House could take it up and consider amendments in the House just as in Committee of the Whole unless the previous question was ordered. The House, in its wisdom, could rerefer the bill back to the Committee of the Whole House on the state of the Union for the further consideration of the original Haugen bill, to be considered again under the five-minute rule.

Mr. BEEDY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman can not take the gentleman from Georgia off the floor by a parliamentary inquiry.

Mr. BEEDY. I would like to ask the Chair if he is ready to rule?

The CHAIRMAN. The Chair will not discuss that.

Mr. HOCH. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman from Georgia yield to the gentleman from Kansas?

Mr. CRISP. Yes.

Mr. HOCH. The gentleman says a motion to strike out the section would be in order?

Mr. CRISP. I think so.

Mr. HOCH. If a motion is offered, presumably the House must vote on the motion?

Mr. CRISP. Yes.

Mr. HOCH. What does the gentleman mean by saying the House is rigidly bound to vote in one particular way? Is it

not free to adopt or to reject the motion to strike out? The power to strike out carries with it the power to modify or to amend. If we have the power to strike out, as the gentleman from Missouri [Mr. CANNON] said, we have the power to amend. Is not this simply an amendment to the first section?

Mr. CRISP. It is not, under the rules of the House. It is a complete substitute for the entire bill.

Mr. HOCH. Section 2 is still in the bill.

Mr. CRISP. Technically, yes; but the action of the committee in adopting the substitute was to eliminate all other sections. This is certainly true by implication.

Mr. HOCH. What was the significance of the motion to strike out?

Mr. CRISP. I do not see any use in it, except the precedents are that way. It seems to me when the Committee on the Whole adopts a substitute for a bill you might let that be construed to a repeal or be tantamount to striking out the other sections of the bill without further voting by the committee.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman from Georgia yield?

Mr. CRISP. Yes.

Mr. COOPER of Wisconsin. It seems to me that the answer to this problem is found in the answer to this question: Did the committee adopt a substitute bill?

Mr. CRISP. It did.

Mr. COOPER of Wisconsin. If that was the motion a substitute bill was offered by the gentleman from Louisiana?

Mr. CRISP. That is exactly what was done, I will say to my friend from Wisconsin.

Mr. COOPER of Wisconsin. If the committee adopted a substitute bill, then that substitute would be in lieu of some other bill, and no other bill can be carried by the committee into the House, because it is a substitute for the bill.

Mr. CRISP. Yes. My friend makes the proposition that I was trying to argue clearer than I made it, and it was on that basis and on that theory that my answer to the gentleman from Michigan and to the gentleman from Kansas was based; that I see no necessity for striking them out. As a matter of fact, I think the Chair would be authorized to entertain a motion for the committee to rise and report the bill to the House with sundry amendments without further action by the committee.

Mr. HOCH. What difference does it make if we call this a substitute bill or not? As a matter of fact, we have simply substituted another matter. To call it a bill does not make any parliamentary difference.

Mr. CRISP. Well, I think a difference in parliamentary law exists. A substitute is to displace the original bill and substitute in lieu of it a complete piece of legislation. [Applause and cries of "Rule!"]

Mr. JACOBSTEIN. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JACOBSTEIN. Is it in order to ask what the exact amendment was that was presented by the gentleman from Louisiana?

Mr. RAMSEYER. I have it here and would like to read it.

Mr. JACOBSTEIN. I would like that read so we may know what we voted upon when we adopted the Aswell amendment.

Mr. RAMSEYER. That is what I want to get before the House. I will read it as it is:

Amendment offered by Mr. ASWELL: Page 31, line 4, strike out all of section 1 of the committee substitute and insert in lieu thereof the Aswell bill H. R. 13269.

It is to strike out section 1 and insert something in lieu thereof. It is an amendment to section 1 and nothing more.

Mr. CHINDBLOM. But the notice is a part of the motion.

Mr. ASWELL. I gave notice that if the substitute prevailed I would move to strike out the other sections.

Mr. RAMSEYER. That is correct, and I agree with the gentleman on that.

The CHAIRMAN. The Chair had in mind asking the gentleman from Georgia the question which the gentleman from Kansas [Mr. HOCH] asked, as to whether it was a matter of parliamentary compulsion or moral compulsion on the part of the committee to vote to strike out the sections. The Chair would like to supplement that a little with this question: What does the gentleman say to this proposition if the committee is bound to strike out the sections why are motions necessary to have them stricken out? Let me call the gentleman's attention to one of the precedents in Hinds'.

On January 22, 1903, the Committee of the Whole House on the state of the Union was considering the bill (H. R. 15520) providing for the Philippine coinage.

The first section was stricken out and a substitute bill was adopted, which brought about a situation somewhat similar to the one we are in here now. Subsequently the sections were stricken out upon motions, and when the committee rose this took place:

The committee having risen, the Chairman reported that the committee had had under consideration the bill (H. R. 15520) to establish a standard of value and to provide a coinage system in the Philippine Islands, and had directed him to report it back to the House, with sundry amendments, with the recommendation that the bill, as amended, do pass.

The House being about to vote on the amendments, a question arose as to the nature of the first one, whereupon the Speaker said:

"The Chair sees no difficulty arising from any statement that has been made. There is only one question now, and that is the demand of the gentleman from Pennsylvania for a separate vote on the amendment offered by the gentleman from Virginia. That is the first amendment; it is not a substitute. It is an amendment by way of substitute to the first section. The only question is on agreeing to the first amendment."

This amendment was agreed to, and then the question was taken on the remaining amendments.

Now, why go through the motion of voting upon all those motions to strike out the different sections?

Let the Chair say further, not for the purpose of expressing an opinion but for the purpose of getting the gentleman's thought on it, that the gentleman has outlined a way, which seems to the Chair quite technical, of perfecting the Haugen bill in the House if the House decides to vote down the motion for the previous question. In this case the previous question is ordered under the rule; the previous question is considered as ordered. It would seem to the Chair that perhaps the only thing which would come before the House, if this Aswell amendment were voted down, would be to vote on the substitute of the Committee on Agriculture as reported. But assuming that the previous question should be voted down, would it not be more technical and more cumbersome to go ahead in the House to perfect the committee substitute than it would to go on here and perfect it in the Committee of the Whole? It may be we are all assuming that something may occur here that is not going to occur because, perhaps, the committee will go ahead and strike out all of these sections.

Mr. CRISP. In answer to the Chair I will say that I have not read the precedent to which the Chair has referred. As a matter of fact, I have not looked up anything; but the precedent which the Chair cites states that the committee reported not one amendment but sundry amendments and, of course, where there are more than one amendment you can have a separate vote; and the fact that sundry amendments were reported in the case cited negatives the idea that it was a substitute. A substitute is one amendment for the entire proposition.

The CHAIRMAN. The Chair did not make himself clear apparently. As the Chair understands the precedent, the sundry amendments were only amendments to strike out the sections.

Mr. CRISP. I was just coming to that. If in this case you refuse to strike out the remaining sections, then when you go into the House you do not have sundry amendments, but just have one amendment. If you strike them out, then you go to the House with sundry amendments; but if the Committee of the Whole should refuse to strike out the remaining sections, then you report the bill to the House with only one amendment, to wit, the Aswell amendment; and if the Aswell amendment is adopted, what are you going to do with the remaining sections of the Haugen bill which are antagonistic to it? You have a legislative absurdity.

Mr. DOWELL. Mr. Chairman, I want to call the attention of the Chair briefly to this question. The gentleman from Georgia [Mr. CRISP] concedes the parliamentary situation and concedes the Chair must hold that the gentleman from Louisiana [Mr. ASWELL] must move to strike out each section as it is reached in the reading of the bill for amendment. If this be true, there is nothing left except the question of what the committee desires to do with the motions when they are presented, because as stated here by the gentleman from Kansas [Mr. HOCH] why would you submit a motion to strike out a paragraph unless you expect the committee to vote upon it? It seems to me it goes without question that there would be no possible reason for submitting the motion unless it follows that it is to be voted upon.

Mr. CANNON. Will the gentleman yield just there?

Mr. DOWELL. Yes.

Mr. CANNON. Under the circumstances which we have here and which are very unusual, where the substitute adopted is identical with the original bill, what choice would the House have in voting to strike out these amendments, to do anything but strike them out?

Mr. DOWELL. I will answer that by saying that is purely a matter for the committee to determine as the motions come up.

I want to call the attention of the Chair to paragraph 5796 of Hinds' Precedents, volume 5, where this identical question was considered by the House and by the committee, and it is in the regular order which was suggested by the gentleman from Georgia that these motions to strike out these sections must be made and that the bill must be continued to be read for amendment. I want to read this authority:

On January 22, 1903——

The CHAIRMAN. The Chair will state to the gentleman from Iowa that is the section which the Chair just called attention to.

Mr. DOWELL. I understand that, but I want to emphasize what was done.

Mr. SINNOTT. Will the gentleman yield there?

Mr. DOWELL. Yes.

Mr. SINNOTT. The Chair in reading that did not read all of the section.

Mr. DOWELL. That is what I want to refer to—the part that was not dwelt upon by the Chair and I want to call attention to just what proceedings were had:

On January 22, 1903, the Committee of the Whole House on the state of the Union was considering the bill (H. R. 15520) providing for the Philippine coinage. The first section had been read under the five-minute rule, when Mr. William A. Jones, of Virginia, proposed a motion to strike out all of the bill after the enacting clause and insert a new text.

Then further on it was modified.

Later, Mr. Jones modified his proposition, and instead of offering the new text as a substitute for the whole bill, offered it as a substitute for all of the first section after the enacting clause, giving notice that if it should be adopted he would then move to strike out the remaining sections of the bill as they should be reached.

Now, listen to this:

The Chairman entertained the amendment, and after debate it was agreed to.

Thereupon the remainder of the bill was read under the five-minute rule, and each of the sections was, on motion made and carried, stricken out.

Now, I want to call attention to the statement of the gentleman from Georgia that when this gets to the House that only the one amendment would be considered. I want to call attention to just what was done in this case.

The committee having risen—

And this after each section had been stricken out as it was read upon proper motion—

The committee having risen, the Chairman reported that the committee had had under consideration the bill (H. R. 15520) to establish a standard of value and to provide a coinage system in the Philippine Islands and had directed him to report it back to the House with sundry amendments, with the recommendation that the bill as amended do pass.

The House being about to vote on the amendments a question arose as to the nature of the first one, whereupon the Speaker said:

"The Chair sees no difficulty arising from any statement that has been made. There is only one question now, and that is the demand of the gentleman from Pennsylvania for a separate vote on the amendment offered by the gentleman from Virginia."

That was the motion to strike out the first section and insert the substitute.

That is the first amendment. It is not a substitute; it is an amendment by way of substitute to the first section. The only question is on agreeing to the first amendment.

The amendment was agreed to, and then the question was taken on the remainder of the amendments.

Mr. CRISP. Will the gentleman yield?

Mr. DOWELL. Yes; certainly.

Mr. CRISP. I do not think that conflicts in the slightest with anything on earth I said, but I think it absolutely confirms all I said. The Chair ruled that that particular amendment was an amendment and not a substitute. I do not know what the text of that amendment was, but this is a complete substitute and the precedent which the gentleman cites confirms the position I have taken.

Mr. SINNOTT. Mr. Chairman, it seems to me we merely complicate matters by discussing what is going to take place when we get into the House. That is not the question for the committee to determine. The question for the committee to determine is what is the committee going to do.

Now, what did the committee do in the case cited in volume 5 of Hinds' Precedents, 5796, which is exactly identical with this case?

The CHAIRMAN. Has the gentleman from Oregon read the RECORD?

Mr. SINNOTT. No; but it is stated here what took place. The Chairman entertained the amendment and after debate it was agreed to.

What was agreed to? The motion to substitute another bill. The Member who made that motion notified the committee that if that was carried then he would move to strike out the other sections—just what was done here to-day. Then the remainder of the bill was read under the five-minute rule, and each of the sections was on motion made and carried stricken out.

If we are going to follow the precedents, that is what we should do here and not confuse the issue by discussing what is going to take place after we get into the House.

The CHAIRMAN. Does the gentleman know whether any amendment to subsequent sections was offered in that case?

Mr. SINNOTT. No.

Mr. CHINDBLOM. I have the RECORD here.

Mr. SINNOTT. Mr. Jones in the case cited in Hinds' 5796 modified his original proposition to strike out all after the enacting clause and instead of offering a new text as a substitute for the whole bill offered it as a substitute for the first section after the enacting clause giving notice that if it should be adopted he would move to strike out the remaining sections of the bill as they would be read. That is the identical motion made by the gentleman from Louisiana [Mr. ASWELL].

The CHAIRMAN. The gentleman understands that the question here is whether perfecting amendments to these sections can be made before the motion to strike out is voted on.

Mr. SINNOTT. The question is, Shall the Chair now entertain the motion to strike out in their order all subsequent sections after the first?

The CHAIRMAN. The Chair is clear on that proposition, but the question here is whether he can entertain a motion to perfect the sections as they are reached.

Mr. SINNOTT. Ordinarily when a motion is made to strike out and amend the perfecting motion is the preferential motion.

Mr. CHINDBLOM. Mr. Chairman, I think it would be interesting to learn what the proceedings were on January 22, 1903. They are to be found in the CONGRESSIONAL RECORD, Fifty-seventh Congress, second session, volume 36, part 1, page 1081. After the first section of the bill then under consideration in Committee of the Whole had been stricken out and the substitute adopted the chairman stated, "The Clerk will read the next section of the bill," and the Clerk thereupon read section 2. Then Mr. Jones of Virginia moved to strike out the section just read, and made the following request:

Mr. Chairman, I ask unanimous consent that a vote may be taken on striking out all of the succeeding sections together.

To that Mr. Grosvenor and Mr. Payne objected. Then Mr. Jones again moved to strike out the section. Mr. Payne said, "Of course that question is debatable," and the Chairman said, "It is debatable," and thereupon Mr. Payne spoke as follows:

Mr. Chairman, according to the usage of parliamentary procedure in the House, when a motion is made to substitute it is always in order, first, to perfect the original text before the substitute can be voted on. Owing to some confusion in the situation to-day, a motion was made to substitute an entire bill for the first section of the pending bill. Now, the gentleman from Virginia proposes to go ahead and strike out each of the remaining sections without perfecting the text. I think it would be in order to first perfect the sections before a vote is taken on striking them out. I do not know whether there are committee amendments to this second section; I have not the bill before me. If there are committee amendments, I submit they should first be voted upon and the text perfected before any vote is taken on the motion to strike out.

Thereupon Mr. Grosvenor, of Ohio, said:

Mr. Chairman, I objected to the proposition of the gentleman from Virginia for unanimous consent, and I did so because under the well-known principles of parliamentary procedure the control of this bill has passed to the other side, and it is for the gentleman from Virginia to make his own motions in his own way, he and his party associates having entire control of the bill itself and all amendments.

Thereupon the Chairman, Mr. Tawney, of Minnesota, replied:

The Chair questions the statement of the gentleman from Ohio [Mr. Grosvenor] as to the control of the bill having passed to the gentleman from Virginia simply because of an adverse vote on one amendment to the bill. The position of the gentleman from New York, however, is primarily correct, that the committee amendments to section 2 of this bill will have to be passed upon and the section perfected before a vote can be taken on the motion of the gentleman from Virginia.

Mr. Jones said that he did not know that there were any committee amendments to section 2. Then the Chairman said: "The Clerk will report the committee amendments," and thereafter the Chairman said: "The question is on the first committee amendment." The question was taken, and the committee amendment was agreed to. Then Mr. Jones said: "I move to strike out the whole of section 2 as amended," and thereupon that motion was agreed to.

Thereupon Mr. Williams of Mississippi asked unanimous consent that the remaining sections of the bill be considered as read and the amendments thereto adopted, and that the question be then taken upon the motion whether they should or should not be stricken from the bill. Mr. Crumpacker objected because he desired to propose an amendment to section 6, which had not been reported as a committee amendment. Mr. Williams thereupon changed his request so that the course he had proposed would be followed with reference to all sections except section 6, and to this request there was no objection. Mr. Crumpacker thereupon offered an amendment of his own to section 6, which after considerable debate was agreed to, and subsequently a committee amendment to section 6 was also adopted. Mr. Payne thereupon called attention to the fact that the committee amendments to section 1 had not been agreed to, and by unanimous consent these amendments were adopted, and thereafter all of the remaining sections, including section 6 as amended, were stricken from the bill.

The committee thereupon rose and reported the bill "with sundry amendments to the House with the recommendation that the bill as amended do pass." A separate vote was taken on the amendment offered by Mr. Jones of Virginia as a substitute for the first section of the bill. In that connection Mr. Cannon, of Illinois, remarked that it seemed to him that if the proposition of the gentleman from Virginia prevailed, then the other amendments, striking out the other sections, "would fall as a matter of course." Mr. Richardson, of Tennessee, argued that the amendments to which Mr. Cannon referred "were amendments added to the original bill," and said:

> The proposition now before the House is the substitute offered by the minority and which was carried in it for the entire perfected bill of the majority, and the question now before the House is the passage of the bill which is a substitute and without amendment. There were no amendments reported with the bill, and the question is on the passage of the substitute bill as reported to the House. There are no amendments to that.

The Speaker held that the only question at that moment was the demand for a separate vote on the first amendment which he said was not "a substitute," but "an amendment by way of substitute for the first section." The amendment was agreed to and thereupon the Speaker put the "other amendments" in gross and without objection all of them were agreed to.

In this connection, there was an interesting discussion before the amendment in the nature of a substitute was offered which discussion closed with the following statement by the chairman of the Committee of the Whole, Mr. Mann, of Illinois:

> The gentleman from Virginia moves to substitute the amendment which he has sent to the Clerk's desk in place of section 1 of the pending bill, giving notice that if this motion be adopted he will move to strike out the other sections of the pending bill. Of course, the gentleman understands that if this motion should be submitted at this time it will require the reading of the rest of the bill for amendment.

During the discussion the chairman, Mr. Mann, held that a motion to strike out all after the enacting clause and to substitute other matter in lieu thereof was not in order until the entire bill had been read, but that a motion to substitute such matter for the first section of the bill, with notice of intention to move to strike out the remaining sections of the bill, if the substitute were adopted, would be in order after the reading of the first section.

Mr. SINNOTT. Mr. Chairman, will the gentleman yield?

Mr. CHINDBLOM. Yes.

Mr. SINNOTT. How do committee amendments change the status? They have no more sanctity or privilege than an amendment offered on the floor of the House.

Mr. CHINDBLOM. It happens in this case that both committee amendments and amendments offered on the floor of the House were considered by the committee before the vote was taken on the motion to strike out. However, there does not appear to have been any point of order made against this procedure.

Mr. CRISP. Mr. Chairman, will the gentleman yield?

Mr. CHINDBLOM. Yes.

Mr. CRISP. Does not the gentleman recognize this as to the case he cites, that the committee amendments were pending in the section of the bill as reported by the committee, and were awaiting action before the original substitute was adopted, and under the general rule, where there is an amendment pending to the text, it has to be perfected before you vote to strike out the entire text. Therefore, in that case, they simply voted to perfect the text as to the committee amendment that was offered before they voted to strike out the entire section.

Mr. CHINDBLOM. On the precedents and upon principle, my disposition is to agree with the gentleman from Georgia [Mr. CRISP] in the position that he takes, but this particular precedent does not bear us out for this reason: In this case the Committee of the Whole first struck out section 1 and adopted a substitute for the entire bill with notice that motions would subsequenly be made to strike out the following sections, and during the consideration of those sections not only committee amendments were considered, but amendments offered from the floor were considered before there was a vote on the motion to strike out.

Mr. LAGUARDIA. But they were all stricken out.

Mr. CHINDBLOM. Yes; they were.

Mr. CRISP. The committee can do anything it wants to do.

Mr. TILSON. Mr. Chairman, I think this may be cleared up by first considering what would be the situation if we reached a vote in the House without having had an opportunity to amend any of the provisions of the original bill, and by the "original bill" I mean the Haugen bill, reported out by the Committee on Agriculture. Unless those sections are amended before they are stricken out, they can not be amended at all, and in case the Aswell substitute should be voted down, then we should be left without an opportunity to amend any of the provisions of the Haugen bill except the first section. If it is intended to amend any of these sections, it seems to me that they should be amended before they are stricken out. They should be stricken out of course. Then in case of the refusal to accept the Aswell substitute in the end, we might also refuse to accept any of the motions to strike out the amended sections. If we do not strike them out, we shall have in the bill two complete sets of sections running parallel to each other and with two or three exceptions substantially identical.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. TILSON. Yes.

Mr. COOPER of Wisconsin. This thought occurs to me. Section 2 of the Haugen bill is identical with section 2 of the Aswell substitute, and so are sections 3, 4, 5, 6, 7, and 8. Those have all been adopted. Is it possible that the committee under the rule can vote, after having adopted those seven sections in their entirety, to amend them?

Mr. TILSON. The fact referred to by the gentleman from Wisconsin makes this a very unusual case. I do not believe that there has ever been a case where so large a number of sections were exactly the same.

Mr. ASWELL. Is it not a fact that several amendments were offered and some of them were adopted during the two hours before my substitute was adopted?

Mr. TILSON. To the gentleman's substitute?

Mr. ASWELL. Before the final adoption.

Mr. TILSON. Yes.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield;

Mr. TILSON. Yes.

Mr. CRAMTON. I am in sympathy with the gentleman's position, but this question arises in my mind. Suppose we adopt several amendments to sections 2, 3, 4, and then strike them out, and suppose that the rest of the sections are amended and then striken out, and that then we report the bill to the House. Suppose then that the House votes down the Aswell substitute. Is it the gentleman's theory that we would then have the perfected Haugen bill before us?

Mr. TILSON. Yes.

Mr. CRAMTON. How would the House have any evidence as to the perfecting amendments? They would not have been reported to the House by the Chairman of the Committee of the Whole House.

Mr. TILSON. Under the special rule there is the privilege of voting on each amendment as if this were an original bill, and a separate vote could be asked on each one of these?

Mr. CRAMTON. The gentleman does not get the point. The report of the Chairman of the Committee of the Whole House will have been that that committee has had under consideration this bill and that the committee has voted to substitute the so-called Aswell bill and to strike out all of the so-called Haugen bill. The House would not have before it these perfecting amendments to sections 2, 3, 4, and so forth, and hence could not concur in them.

Mr. TILSON. The gentleman from Michigan is right. If the House should decline to accept the Aswell substitute, this

would leave the bill just as it was before the substitute was adopted, unless perfecting amendments were reported.

Mr. HASTINGS. Not if we go back into the Committee of the Whole.

The CHAIRMAN. The Chair would like to make a suggestion. The Chair thinks this is an important point of order, and suggests that inasmuch as it is about time for the committee to rise and for the House to adjourn, the decision of the point of order be postponed until to-morrow. In the meantime there will be an opportunity to examine the precedents and to give the matter some mature deliberation.

Mr. CANNON. Mr. Chairman, in order to expedite the consideration of the bill I withdraw the point of order and ask for the regular order.

The CHAIRMAN. The gentleman from Missouri withdraws his point of order.

Mr. LAGUARDIA. Then, Mr. Chairman, I make it. We ought to have this thing decided for once. It might as well be now as at any other time.

The CHAIRMAN. The gentleman from New York renews the point of order.

Mr. HAUGEN. Mr. Chairman, I move that the committee do now rise.

The CHAIRMAN. The gentleman from Iowa moves that the committee do now rise.

Mr. ASWELL. Mr. Chairman, what is the parliamentary situation?

Mr. SABATH. A point of order is pending.

The CHAIRMAN. The question is on agreeing to the motion of the gentleman from Iowa [Mr. HAUGEN] that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the Chair, Mr. MAPES, Chairman of the Committee of the Whole House on the state of the Union, having had under consideration the bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce, reported that that committee had come to no resolution thereon.

LEAVE OF ABSENCE

Mr. CELLER, by unanimous consent, was granted leave of absence, indefinitely, on account of illness.

UNEMPLOYMET

Mr. JACOBSTEIN. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting some correspondence between myself and Secretary Davis and Secretary Hoover.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. JACOBSTEIN. Mr. Speaker, under the unanimous consent granted me, I wish to insert in the RECORD some correspondence between myself and Secretary Davis of the Department of Labor and Secretary Hoover of the Department of Commerce, as follows:

APRIL 27, 1928.

Hon. JAMES J. DAVIS,
*Secretary of Labor, Washington, D. C.*

MY DEAR SECRETARY DAVIS: I hope that you will approve of the specific recommendations which I am making with respect to the gathering and publication of data on unemployment in connection with the taking of the 1930 census, as stated in my letter to Secretary Hoover, a copy of which I am inclosing.

The committee is in session this morning, and if you wish to telephone me your approval of this proposition I shall be very happy to transmit it to the committee.

Yours sincerely,

MEYER JACOBSTEIN.

---

APRIL 27, 1928.

Hon. MEYER JACOBSTEIN,
*House of Representatives, Washington, D. C.*

MY DEAR MR. JACOBSTEIN: Replying to your letter of to-day, I am inclosing you herewith a copy of a letter which I wrote to Secretary Hoover on January 12, together with a copy of his reply, and also a copy of a letter which I am mailing to Secretary Hoover to-day, which not only reiterates the question of making a census of the unemployed in 1930 but also urges him to make a census of aged persons as to their dependency.

Sincerely yours,

JAMES J. DAVIS.

JANUARY 12, 1928.

Hon. HERBERT HOOVER,
*Secretary of Commerce, Washington, D. C.*

MY DEAR MR. SECRETARY: Trusting that you will pardon me for making another suggestion as to the forthcoming census, I would like to call your attention to the importance of including the question of unemployment in the population schedule.

As I understand it, the census of 1910 included a question as to whether or not there were any persons in the family who were usually employed who were out of work on a specific day. I believe in that case it was April 1, or the basic date of the census. This would have given a definite mooring for reckonings or estimates on the volume of unemployment in subsequent times. It would be an invaluable aid if we knew the number of people out of work and seeking employment on any one day in any one year, for there are ways of determining within a reasonable degree of accuracy the comparative industrial conditions in one year with another. The Bureau of the Census never published the figures which it secured in 1910, and I would like to call your attention to the advisability, at least from our point of view, of including that information in the coming census and making provision for its publication and use when secured.

I am, sir, with great respect,

Very sincerely yours,

JAMES J. DAVIS.

---

JANUARY 21, 1928.

Hon. JAMES J. DAVIS,
*Secretary of Labor, Washington, D. C.*

MY DEAR MR. SECRETARY: I have received your letter of January 12 calling attention to the importance of including a question as to unemployment on the population schedule and tabulating the results.

I have called this matter to the attention of the Bureau of the Census and am assured that it will receive consideration in connection with the plan for the census of 1930.

Yours faithfully,

HERBERT HOOVER,
*Secretary of Commerce.*

---

APRIL 27, 1928.

Hon. HERBERT HOOVER,
*Secretary of Commerce, Washington,*

MY DEAR SECRETARY HOOVER: As you are doubtless aware, the Census Committee of the House, of which I am a member, has under consideration a bill providing for the taking of the 1930 census.

I am proposing to the committee that provision be made for the collecting of information regarding employment and unemployment. It is very unfortunate that our Government agencies have not given sufficient attention to the gathering and tabulation of data regarding unemployment. You will recall that the census act of 1900 made provision in its schedules for securing information regarding unemployment. The information was gathered but never published. The census act of 1910 did not make specific provision for the collection of this data, but it was collected, although no specific report was issued on it.

Two things ought to be done in connection with the 1930 census. First, specific direction should be given in the act for the gathering of such unemployment data; and, second, authorization and direction should be given for publication of such information. I hope that when the matter is presented to you both of these items may have your approval.

An early reply would be appreciated as action on the bill may be taken any day. The Census Committee is in session this morning, and if you wish to telephone me your approval I shall be happy to transmit it to the committee.

Very sincerely yours,

MEYER JACOBSTEIN.

---

APRIL 28, 1928.

Hon. MEYER JACOBSTEIN,
*House of Representatives, Washington, D. C.*

DEAR MR. JACOBSTEIN: I inclose the memorandum concerning the census inquiries on unemployment referred to in our conversation. This memorandum was prepared by the gentleman in charge of the population work and is based upon memorandum made at the time of the respective censuses. It is evident there were two reasons for the failure to publish the statistics on unemployment that were collected and for the omission of the inquiry on this subject from the census schedule for 1920, namely, there was not sufficient appropriation to enable the bureau to compile these statistics, and there was grave doubt about the reliability of the data.

Secretary Hoover's office telephoned me yesterday that they had received your letter of inquiry, and I told them that I was conferring with you, and that it was my desire to do everything that could be done by this bureau to develop the statistics on this important subject.

You, of course, are familiar with the work of the Bureau of Labor Statistics of the Department of Labor.

If I can be of further service to you in regard to this matter please advise me.

Very truly yours,

W. M. STEUART, *Director.*

CENSUS INQUIRIES ON UNEMPLOYMENT

Unemployment statistics have been collected by the Bureau of the Census at each of four decennial censuses—1880, 1890, 1900, and 1910.

The question regarding months unemployed was asked first at the census of 1880, but the information thus secured was not tabulated. This was due partly to the large amount of labor required to tabulate the results of that census without mechanical assistance; but another reason for not tabulating the returns of months unemployed was the existence of grave doubt as to the reliability of the information which had been secured.

In 1890 the question was again placed upon the schedule and the returns were tabulated and published for that census. In presenting the results, however, attention was called to the fact that they were the first published statistics upon this subject and should be regarded as approximate. Even with this conservative position many eminent authorities disagreed, declining to accept, even with qualifications, the Eleventh Census returns concerning persons out of employment. Richmond Mayo-Smith, a prominent statistician of that time, made the following statement:

"The census made an effort by direct inquiry to find out whether persons were unemployed in their principal occupations during the year, and for how long they were thus unemployed. The investigation does not seem to have been very successful, and the data are so uncertain that the detailed analysis by occupations seems to me entirely useless. * * * The question in regard to unemployment by months might better be abandoned."

Again in 1900 the importance of this subject led Congress to specify the question regarding unemployment as one of the inquiries to be made at the Twelfth Census. Each of the two census years, 1890 and 1900, was a period of prosperity; therefore the economic conditions, to some extent, were similar, and but little variation in the proportion of unemployed at the two censuses might be expected. But a comparison shows a decided difference in the proportion unemployed in the different occupations.

The census of 1900 reported that 22 per cent of all males engaged in gainful occupations were unemployed during some portion of the census year, and that about one-half of all males unemployed during some part of the year were unemployed from one to three months. In the report attention was called to the fact that the figures concerning nonemployment could not be regarded as definite or final and that caution must be observed in reaching conclusions based solely upon them.

At the Thirteenth Census, 1910, the inquiries relating to unemployment referred to employees only. The schedule contained two inquiries as follows: (a) Whether out of work on April 15, 1910; and (b) number of weeks out of work during the year 1909.

Because of a lack of funds the work on occupation statistics at the Thirteenth Census was practically stopped for an entire year during the regular census period. When the work was again resumed and a part of the occupation cards had been tabulated, it was decided that because of the pressure of the war work the Census Bureau was doing at that time it was best to abandon further work on Thirteenth Census occupation statistics. Hence, the contemplated unemployment statistics for 1910 were never compiled and published.

In view of the unsatisfactory statistics resulting from the unemployment inquiries at the censuses of 1880, 1890, and 1900, and because of the fact that there appeared to be no extensive unemployment in 1920, no inquiry as to unemployment was made at the census of 1920.

At present there is some unemployment, and unemployment may be a real problem at the date of the next census, 1930; but census experience does not indicate that an accurate or satisfactory measure of involuntary or enforced unemployment can be secured through an inquiry on the census population schedule.

As stated in the 1900 census report on occupations (for a full statement with regard to the status of the question on unemployment in 1900, see ccxxv of the special report on Occupations at the Twelfth Census, published in 1904):

"It is of course true that the full working strength of a community or of the nation is never exerted. If steady employment were obtainable in every calling merely upon application, a considerable proportion of those claiming gainful occupations would nevertheless be idle for some part of the year. Old age, illness, travel, bereavement, recreation, competence, a change of employers with interval between, tendency to idleness, and climatic conditions are a few of the causes which together result in a considerable proportion of persons who are without employment during some portion of a year for reasons wholly unconnected with ability or inability to secure employment.

"A second reason for idleness, also in no way associated with industrial conditions, is the fact that certain occupations are what may be termed intermittent, such as glassworking, inland lake and river service, school-teaching, and certain out-of-door callings—notably farm service, stone masonry, etc. In some occupations of the intermittent class compensation is graded to partially cover the period of enforced idleness, but in an enumeration of persons unemployed during some portion of a year, the proportion in such occupations as those mentioned, some of which are extensive, is necessarily high and appreciably affects the final proportions secured for all occupations, although the reasons for nonemployment in other callings may be entirely different."

Experience has shown the great difficulty, if not the impossibility, of so stating an unemployment inquiry on the census schedule and of so instructing census enumerators that the enumerators' returns as to unemployment will be either accurate or comparable. Even greater, however, is the difficulty of census enumerators, in their house-to-house canvass, securing from the housewife, or others who may be at home, even approximately exact information as to the extent of the unemployment of the individual breadwinners of the family—especially if the breadwinners are members of a boarding-house family. In fact, many of the breadwinners themselves probably would not know the number of weeks or months they were unemployed during the census year. And, unfortunately, the workers most commonly unemployed are the ones about whom it is most difficult to get reliable information—unattached men, floating laborers, construction workers, etc.

In view of the difficulties enumerated, and in view of the unsatisfactory returns as to unemployment at preceding censuses, it is recommended that no inquiry as to unemployment be put on the schedule for the census of 1930.

MUSCLE SHOALS

Mr. MARTIN of Massachusetts. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD by printing a letter I have received on the subject of Muscle Shoals.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. MARTIN of Massachusetts. Mr. Speaker, under the leave to extend my remarks in the RECORD I include the following letter received by me on the subject of Muscle Shoals:

THE NATIONAL FERTILIZER ASSOCIATION (INC.),
*Washington, D. C., May 2, 1928.*

Hon. JOSEPH W. MARTIN, Jr.,
*House of Representatives, Washington, D. C.*

DEAR MR. MARTIN: In a certain country, an important world power, there is pending before the highest legislative body a bill establishing a government corporation and containing a provision that—

"Any person who shall receive any compensation, rebate, or reward, or shall enter into any conspiracy, collusion, or agreement, express or implied, with intent to defraud the corporation or to defeat its purposes, shall, on conviction thereof, be fined not more than $25,000 or imprisoned not more than 15 years, or both."

No; the country isn't Soviet Russia; it's our own United States, the land of the free. And the legislative body before which this proposed act is pending isn't the Communist central committee; it's our own House of Representatives. Perhaps, if Congress discovers the true nature of this proposed act, it will have it recommitted to the committee from which it was reported without public hearings, in order that it may be considered by the House after fair hearings.

The quotation is paragraph c of section 20 of the pending House substitute for the Norris Muscle Shoals resolution, previously passed by the Senate. It is known as Union Calendar 324, S. J. Res. 46, for which a special rule is now being sought.

Not only would this bill put the Government into the fertilizer business as a full-fledged competitor with private manufacturers but it would prevent any honest effort at fair competition. If, for instance, such a manufacturer, seeking to protect his legitimate rights, attempted to explain by advertising to farmers why they should buy privately made fertilizers in preference to those made by the Government—an action which would obviously be an attempt to defeat the corporation's purpose—then the Government could impose upon that manufacturer a fine of $25,000 and sentence him to 15 years' imprisonment, or both.

If a salesman for a fertilizer company, in earning his living, honestly tells his customers that his goods are better in certain respects than the Government's, then he, too, would be attempting to defeat the purposes of this proposed act and would be liable to this severe penalty.

The above is only one of many revolutionary proposals in this measure. Do you think that American business should be subjected to such un-American treatment?

Very truly yours,

CHARLES J. BRAND.

EXTENSION OF REMARKS

Mr. ALMON. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by inserting some remarks of my own on Muscle Shoals and some newspaper extracts on the same subject.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

Mr. TILSON. I think, Mr. Speaker, in the general confusion the gentleman should not present a request of that kind at this time. Can not the gentleman present his request to-morrow?

Mr. ALMON. It is two short editorials and my own remarks.

Mr. TILSON. A few gentlemen object to that, if the gentleman from Alabama please.

Mr. ALMON. Mr. Speaker, I withdraw my request.

MUSCLE SHOALS

Mr. ALMON. Mr. Speaker, I renew my request for unanimous consent to extend my own remarks on the pending legislation respecting Muscle Shoals.

The SPEAKER. Is there objection?

There was no objection.

Mr. ALMON. Mr. Speaker, all will agree that agriculture has three great problems—production, preservation of soil fertility, and sale and distribution. While each is important, we have been giving most of our attention to the latter. I want to direct your attention at this time to the first and second.

There is a bill on the calendar which will come before the House at a very early date which provides for real farm relief, viz: The Muscle Shoals bill. Muscle Shoals has been before the Congress continuously for the past eight years and no settlement made as yet. Many bills, some providing for private and others for Government operation, have been considered. All offers and bills providing for private operation have been rejected by Congress. So it is to be Government operation or nothing. At this session the Norris bill providing for Government operation through the Department of Agriculture passed the Senate by a large majority. The Military Affairs Committee of the House more than 30 days ago reported almost unanimously the Morin bill as a substitute for the Senate bill. Eighteen members out of twenty-one of the Military Affairs Committee of the House are supporting the Morin bill and have been urging the Rules Committee of the House for the past 30 days to grant a rule for the consideration of this substitute by the House, but so far without success.

Considering the length of time that this subject has been before Congress, being one of national interest with practically a unanimous report, no one suspected that there would be any hesitancy on the part of the Rules Committee to provide a rule. The Military Affairs Committee and the friends of this legislation continue to insist upon a rule. The refusal to provide such a rule to say the least would seem to be unprecedented, unusual, and undemocratic. I again call upon and urge the committee to grant such a rule in order that the House may be given an opportunity to vote on this measure, which is of very great national interest.

While this measure provides for Government operation, it does not mean that the Government is going into business at Muscle Shoals, because it is already in business there. It owns the development and is operating a part of it—that is, the power plant—not for the benefit of agriculture but for the benefit of the Alabama Power Co., for the reason that this company takes such power as it wants at its own price and the balance is running to waste. The chief competitor will be the Chilean nitrate monopoly, which is a foreign monopoly. The fertilizer industry in this country is engaged in mixing fertilizer after it has purchased the ingredients. They can well afford to continue to buy nitrogen from this foreign monopoly and pass the cost on to the farmer. Private industry is taking no steps to produce air nitrogen and cheaper fertilizer. The passage of this legislation is the only way that the farmer can look for or hope for relief. They have been losing millions of dollars each year while this plant remains idle. If you will bear with me, I will convince you of this fact.

FERTILIZER

Two thousand pounds Chile nitrate contains 310 pounds pure nitrogen.

Two thousand pounds cyanamid contains 470 pounds pure nitrogen. In 1927 Chile exported to world 2,370,662 metric tons Chile nitrate—metric ton equals 2,204.6 pounds.

Of this total Germany imported 26,533 tons, or 1.5 per cent of total; Great Britain imported 87,965 tons, or 3.71 per cent of total; United States imported 838,591 tons, or 35 per cent of total.

| | |
|---|---|
| Total cost of 838,591 tons was | $39,514,777.00 |
| Total cost at cyanamid price would have been | 19,757,112.00 |
| Excess paid | 19,656,665.00 |
| Tax paid to Chile, at $12.53 per ton | 9,381,737.26 |

Nitrate plant No. 2 will produce 212,766 tons of cyanamid containing 50,000 tons pure nitrogen, which equals 38 per cent of total Chile nitrate shipments to America in 1927.

Fifty thousand tons pure nitrogen equal nitrogen content of 325,800 tons Chilean nitrate.

| | Tons |
|---|---|
| World production of cyanamid in 1926 was | 1,204,500 |
| The pure nitrogen content was | 283,057 |

One million two hundred and four thousand five hundred tons cyanamid contains as much nitrogen as 1,826,177 tons Chilean nitrate.

The 1926 world production of cyanamid equaled 77 per cent of exports of Chilean nitrate in 1927.

The capacity of nitrate plant No. 2 added to the 1926 world production of cyanamid equaled 90.6 per cent of the Chilean exports for 1927.

In 1926 Government reports show a sale of 7,496,294 net tons of fertilizer to American farmers. Of this amount the cotton States used for all purposes 5,006,536 tons, or about 70 per cent of the total was used in the cotton States. The cost to these States of the fertilizer used in cotton alone was $76,716,000. The average price of this fertilizer was $32.50 per ton. The total cost of all fertilizer used is not available, but assuming the remainder of fertilizer sold for the same amount of $32.50 per ton, the bill of the entire United States for fertilizer for 1926 was $243,629,555. It is impossible to compute the amount of freight on this tonnage. Nitrogen is the most expensive plant food in fertilizer and 1 ton of usual fertilizer contains 60 pounds. The chief American supply comes from Chile, and for it the farmer is now paying 15.15 cents per pound, port price, or $47 per ton. In the Cotton Belt he is paying from $55 to $64 per ton.

Ammo-phos sells f. o. b. Warners, N. J., now, without limitation of profit except as limited by competition, at $64.40 per ton. Each ton contains 215.8 pounds pure nitrogen and 960 pounds phosphoric acid. The nitrogen content of this product sells at 7.6 cents per pound and the phosphoric-acid content at 5 cents per pound. The capacity of nitrate plant No. 2 with modern methods is 50,000 tons of fixed nitrogen per annum. This equals in nitrogen content about 1,667,000 tons of ordinary 3–8–3 fertilizer. This plant would therefore produce about 23 per cent of all the nitrogen used in fertilizer in the United States, assuming that all contained nitrogen.

Mississippi used in 1925, according to Government reports, 258,078 tons of fertilizer containing 3 per cent nitrogen, or 7,741 tons of pure nitrogen. Mississippi therefore bought at high prices only about one-seventh of the nitrogen capacity of nitrate plant No. 2. Based, however, on present price of fixed nitrogen by the cyanamid process at Warners, N. J., of 7.6 cents per pound, and the port price of Chile nitrate of 15.15 cents per pound, the farmers of Mississippi paid $1,168,891 more for their nitrate than if they had bought it from a cyanamid manufacturer. During this time the Alabama Power Co. bought the power which should have been used to manufacture fertilizer at 2 mills per kilowatt-hour. Computing according to the power now required by the cyanamid process at Niagara Falls, 9,598 kilowatt-years would have produced the amount of nitrogen used by the Mississippi farmers in 1925. The price paid by the Alabama Power Co. for this amount of power at 2 mills per kilowatt-hour was $168,171. If this power had been used at nitrate plant No. 2 in the manufacture of nitrogen on the basis of the selling price of nitrate by the cyanamid company at Warners, N. J., it would have given the farmers of Mississippi the same nitrate for $1,176,632. The Chile nitrate price actually paid by the farmers of Mississippi in 1925 was $2,345,523, figured at $47 per ton, port price. The farmers of Mississippi would have saved in 1925, by using Muscle Shoals power-fertilizer, $1,168,891.

If the Mississippi farmer could have bought nitrogen made at Muscle Shoals at 7.6 cents per pound, he would have saved $40.44 every time he paid the inland retail price of $64 for a ton of Chile nitrate.

The State of Georgia uses three times as much fertilizer as Mississippi. Their saving would therefore have been more than $3,554,993.

Fertilizer used in Alabama in 1925, according to Government reports, was 590,515 tons on a 3–8–3 basis containing 17,715 tons pure nitrogen. The difference in the selling price of nitrogen per pound manufactured by the cyanamide process and the cooperative price paid for Chile nitrate is 7.55 cents per pound. The excess therefore paid by Alabama farmers for nitrogen content in 1925 alone was $2,874,965.

North Carolina used 1,217,628 tons of fertilizer in 1925. This contained on a 3–8–3 basis, as shown by the agricultural figures, 36,529 tons pure nitrogen. Taking the same difference in cooperative price paid for Chile nitrate in Alabama and the price at which the Cyanamid Co. now sells its nitrogen, North Carolina paid for the privilege of purchasing nitrates not fixed by the cyanamide process the stupendous sum of $5,515,979 in one year.

Ohio used 304,480 tons of fertilizer in 1926. Assuming that all of this contained 3 per cent, or 60 pounds, of nitrogen to the ton, Ohio farmers would have saved $1,379,394 if they could have purchased their nitrogen at 7.6 cents per pound instead of 15.15 cents per pound.

New York farmers used 338,250 tons of mixed fertilizer in 1926 and would have saved $1,532,272.

Illinois farmers used 25,227 tons mixed fertilizers in 1926 and could have saved $114,278.

Indiana farmers used 245,000 tons, and could have saved $1,109,850.

Michigan used 109,327 tons, and could have saved $495,251.

Pennsylvania farmers used 330,000 tons, and could have saved $1,494,900.

Massachusetts used 58,920 tons, and could have saved $266,907.

Tennessee farmers used 156,336 tons, and could have saved $708,202.

Saving in freight is not included in above figures. Phosphoric acid is obtained from Tennessee and Florida and nitrate of soda from the ports of the United States, therefore it is not out of line to use freight rates on fertilizer from Muscle Shoals to points in the United States in making the comparison of cost of freight on commercial fertilizer now used, and the concentrated fertilizer which could be made at Muscle Shoals.

To illustrate, 460 pounds ammo-phos contains as much plant food as 2,000 pounds of mixed fertilizer. The freight on 2,000 pounds from Muscle Shoals to Lowell, Mass., is $12.64; on 460 pounds ammo-phos the freight is $2.90; saving, $9.74, equal to 77 per cent.

The freight from Muscle Shoals to Raleigh, N. C., on 2,000 pounds of commercial fertilizer is $6.05; on 460 pounds of ammo-phos is $1.39; on each ton, saving $4.66, equal to 77 per cent.

This saving is effected on each ton of ordinary fertilizer used in the State. Multiply the number of tons used in the State, 1,217,628, by the amount saved per ton, $4.66, and the result is the almost unbelievable sum, $5,674,146.48. Add to this the saving on nitrogen, $5,515,979; total, $11,190,125.48.

| | |
|---|---|
| The freight rate to Columbus, Ohio, per ton is | $8.85 |
| On 460 pounds ammo-phos the freight is | 2.03 |
| Saving (equal 77 per cent) | 6.82 |
| Freight per ton to Springfield, Ill | 7.55 |
| On 460 pounds ammo-phos | 1.73 |
| Saving (equal 77 per cent) | 5.82 |
| Freight per ton to Indianapolis, Ind | 6.65 |
| Saving by shipping ammo-phos | 5.12 |
| Freight per ton to Lansing, Mich | 8.85 |
| Saving by shipping ammo-phos | 6.81 |
| Freight per ton to Nashville, Tenn | 2.55 |
| Saving by shipping ammo-phos | 1.96 |
| Freight per ton to Harrisburg, Pa | 11.60 |
| Saving by shipping ammo-phos | 8.93 |
| Freight per ton to Albany, N. Y | 12.10 |
| Saving by shipping ammo-phos | 9.31 |

The total saving in freight by the farmers of each of the States above mentioned can be obtained by multiplying the number of tons used by the saving in freight per ton. To that total add the amount saved on nitrogen purchased and the result will be the total amount that could be saved by using the cheaper and more concentrated form of fertilizer.

The saving in fertilizer cost and in freight can be accomplished in the United States in the same way that it has been done in Germany, by the fixation of nitrogen from the air. The operation of nitrate plant No. 2 at Muscle Shoals as provided in the Morin bill is the initial step necessary to accomplish this result.

On March 26, 1925, a committee was appointed to investigate the entire Muscle Shoals situation and assemble information with reference to it. This board considered the operating costs of nitrate plant No. 2, basing the operating expenses upon figures reported by Maj. Gen. C. C. Williams and Colonel Burns after a test run of the plant in 1918. Taking into consideration all costs of operation and the freight, this committee reported what would be the saving to the farmers in various States from continued operation of the plant. The average saving to the various States figured at 43.4 per cent.

This committee further said:

The study shows that the farmer can buy the average grade of mixed fertilizer at $36.78 per ton, conveniently bagged for use. He can buy the same amounts of the plant foods in the form of unmixed ingredients for $26.82, while the estimated cost delivered of the same plant foods in a concentrated mixture from Muscle Shoals would average $20.74 per ton, with a resulting average saving of $16.08 per ton, or about 43 per cent of the present cost.

General Williams in his report made February 19, 1927, after the test figured that nitrogen could be made at Muscle Shoals for 8.57 cents per pound. While this is 1 cent more than it actually sells for at Warners, N. J., manufactured by the cyanamide process, it is 6.58 cents cheaper than the farmer actually pays to-day for Chile nitrate. It is also interesting to note that the Muscle Shoals Commission in reaching its conclusions of 43 per cent saving to the farmers in the use of ammonia phosphates figured its cost at $70.40. (P. 59, Report Muscle Shoals Inquiry, H. Doc. 116, 69th Cong., 1st sess.)

In the estimate by General Williams of cost at Muscle Shoals, he includes royalties and operating fees. If these are excluded, his figures for the cost of pure nitrogen is 7.9 cents. The nitrogen actually sells now at 7.6 cents and Chile nitrate at 15.15 cents per pound. A ton of Chile nitrate contains 310 pounds pure nitrogen. On the basis of 7.6 cents per pound, a ton of 2,000 pounds of Chile nitrate would cost only $23.56.

Each penny's reduction in price of nitrogen, on the maximum production of 50,000 tons at nitrate plant No. 2, means $1,000,000 saved to American farmers. If, therefore, General Williams is correct in his report, the American farmer would save $7,000,000 every time the plant produced 50,000 tons. If Colonel Burns is correct in his report of 1920 as to the cost of producing ammonia gas, the production price of pure nitrogen would be 8.3 cents, or 6.85 cents less than the price of Chile nitrate. On the output of plant No. 2 this would save the American farmer $6,850,000 on each 50,000 tons produced at Muscle Shoals. [Applause.]

### ADJOURNMENT

Mr. HAUGEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 58 minutes p. m.) the House adjourned until to-morrow, Thursday, May 3, 1928, at 12 o'clock noon.

## COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Thursday, May 3, 1928, as reported to the floor leader by clerks of the several committees:

### COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To authorize an increase in the limit of cost of alterations and repairs to certain naval vessels (H. R. 13249).

To authorize the increase in the limit of cost of one fleet submarine (H. R. 13248).

### COMMITTEE ON THE DISTRICT OF COLUMBIA

(10.30 a. m.)

To authorize the merger of street-railway corporations operating in the District of Columbia (H. J. Res. 276).

(10.30 a. m.—caucus room)

To provide security for the payment of compensation for personal injuries and death caused by the operation of motor vehicles in the District of Columbia (H. R. 9688).

### COMMITTEE ON MINES AND MINING

(10.30 a. m.)

Authorizing an appropriation for development of potash jointly by the United States Geological Survey of the Department of the Interior and the Bureau of Mines of the Department of Commerce by improved methods of recovering potash from deposits in the United States (H. R. 496).

### COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To amend the act approved December 23, 1913, known as the Federal reserve act; to define certain policies toward which the powers of the Federal reserve system shall be directed; to further promote the maintenance of a stable gold standard; to promote the stability of commerce, industry, agriculture, and employment; to assist in realizing a more stable purchasing power of the dollar (H. R. 11806).

## EXECUTIVE COMMUNICATIONS, ETC.

476. Under clause 2 of Rule XXIV, a communication from the President of the United States, transmitting supplemental

estimate of appropriation for the Federal Trade Commission for the fiscal year ending June 30, 1929, amounting to $85,000, was taken from the Speaker's table and referred to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. GARRETT of Texas: Committee on Military Affairs. H. R. 10478. A bill providing retirement for persons who hold licenses as navigators or engineers who have reached the age of 64 years and who have served 25 or more years on seagoing vessels of the Army Transport Service; without amendment (Rept. No. 1466). Referred to the Committee of the Whole House on the state of the Union.

Mr. GARRETT of Texas: Committee on Military Affairs. H. J. Res. 224. A joint resolution to ascertain which was the first heavier-than-air flying machine; without amendment (Rept. No. 1467). Referred to the Committee of the Whole House on the state of the Union.

Mr. COOPER of Ohio: Committee on Interstate and Foreign Commerce. H. R. 12894. A bill granting the consent of Congress to the board of county commissioners of Trumbull County, Ohio, to construct a free overhead viaduct across the Mahoning River at Niles, Trumbull County, Ohio; with amendment (Rept. No. 1468). Referred to the House Calendar.

Mr. MAPES: Committee on Interstate and Foreign Commerce. H. R. 13065. A bill authorizing the Detroit River Canadian Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Detroit River at or near the township limits of Grosse Isle, Wayne County, State of Michigan; with amendment (Rept. No. 1469). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13141. A bill authorizing T. S. Hassell, his heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Tennessee River at or near Clifton, Wayne County, Tenn.; with amendment (Rept. No. 1470). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13203. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the North Fork of the Cumberland River at Burnside, Pulaski County, Ky.; with amendment (Rept. No. 1471). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13203. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near the mouth of Indian Creek in Russell County, Ky.; with amendment (Rept. No. 1472). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13205. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Creelsboro, in Russell County, Ky; with amendment (Rept. No. 1473). Referred to the House Calendar.

Mr. ROBINSON of Iowa: Committee on Interstate and Foreign Commerce. S. 3693. An act authorizing the city of Council Bluffs, Iowa, and the city of Omaha, Nebr., or either of them, to construct, maintain, and operate a free highway bridge across the Missouri River between Council Bluffs, Iowa, and Omaha, Nebr.; without amendment (Rept. No. 1474). Referred to the House Calendar.

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. S. 3808. An act to authorize the construction of a temporary railroad bridge across Bogue Chitto River at or near a point in township 5 south, range 13 east, St. Helena meridian, St. Tammany Parish, La.; with amendment (Rept. No. 1475). Referred to the House Calendar.

Mr. FENN: Committee on the Census. H. R. 393. A bill to provide for the fifteenth and subsequent decennial censuses; with amendment (Rept. No. 1476). Referred to the Committee of the Whole House on the state of the Union.

Mr. PORTER: Committee on Foreign Affairs. H. J. Res. 292. A joint resolution authorizing the President to invite the States of the Union and foreign countries to participate in the Annual International Petroleum Exposition at Tulsa, Okla., to begin October 20, 1928; with amendment (Rept. No. 1477). Referred to the House Calendar.

Mr. PARKS: Committee on Interstate and Foreign Commerce. H. R. 13380. A bill authorizing D. T. Hargraves and John W. Dulaney, their heirs, legal representatives, and assigns, to construct, maintain, and operate a bridge across the Mississippi River at or near Helena, Ark.; without amendment (Rept. No. 1478). Referred to the House Calendar.

Mr. PORTER: Committee on Foreign Affairs. H. R. 12955. A bill to amend an act entitled "An act creating the United States Court for China and prescribing the jurisdiction thereof" (Public, No. 403, 59th Cong.), and an act entitled "An act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1921" (Public, No. 238, 66th Cong.); without amendment (Rept. No. 1479). Referred to the Committee of the Whole House on the state of the Union.

Mr. PORTER: Committee on Foreign Affairs. H. J. Res. 266. A joint resolution authorizing an appropriation of $100,000 for the expenses of participation by the United States in the international conference for the revision of the Convention of 1914 for the Safety of Life at Sea, to be held in London, England, in 1929; without amendment (Rept. 1480). Referred to the Committee of the Whole House on the state of the Union.

Mr. PORTER: Committee on Foreign Affairs. S. J. Res. 97. A joint resolution authorizing the President to appoint three delegates to the Twenty-third International Congress of Americanists, and making an appropriation for the expenses of such congress; without amendment (Rept. No. 1481). Referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. SPEAKS: Committee on Military Affairs. S. 2673. An act for the relief of James E. Trussell; without amendment (Rept. No. 1460). Referred to the Committee of the Whole House.

Mr. SPEAKS: Committee on Military Affairs. S. 2966. An act for the relief of Oliver C. Sell; without amendment (Rept. No. 1461). Referred to the Committee of the Whole House.

Mr. CHRISTOPHERSON: Committee on the Judiciary. H. R. 10908. A bill for the relief of L. Pickert Fish Co. (Inc.); with amendment (Rept. No. 1462). Referred to the Committee of the Whole House.

Mr. UNDERHILL: Committee on Claims. H. R. 12714. A bill for the relief of the Rocky Ford National Bank, Rocky Ford, Colo.; without amendment (Rept. No. 1463). Referred to the Committee of the Whole House.

Mr. McSWAIN: Committee on Military Affairs. H. R. 3278. A bill for the relief of Richard A. Chavis; without amendment (Rept. No. 1464). Referred to the Committee of the Whole House.

Mr. WAINWRIGHT: Committee on Military Affairs. H. R. 4811. A bill to reinstate Frank W. Simpson, formerly lieutenant, Coast Artillery, United States Army, as a first lieutenant in the United States Army; without amendment (Rept. No. 1465). Referred to the Committee of the Whole House.

## CHANGE OF REFERENCE

Under clause 2 of Rule XXII, the Committee on Claims was discharged from the consideration of the bill (H. R. 5222) for the relief of Robinson Newbold, and the same was referred to the Committee on Military Affairs.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BUSBY: A bill (H. R. 13479) to amend the act of December 11, 1926 (44 Stat. 918), entitled "A bill to require the filing of an affidavit by certain officers of the United States"; to the Committee on the Judiciary.

By Mr. HOWARD of Oklahoma: A bill (H. R. 13480) to provide that four hours shall constitute a day's work on Saturdays throughout the year for all employees in the Government Printing Office; to the Committee on the Civil Service.

By Mr. OLIVER of Alabama: A bill (H. R. 13481) granting the consent of Congress to the Alabama State Bridge Corporation to construct bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama; to the Committee on Interstate and Foreign Commerce.

By Mr. GUYER: A bill (H. R. 13482) authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Kansas City, Kans.; to the Committee on Interstate and Foreign Commerce.

By Mr. KELLY: A bill (H. R. 13483) providing for the purchase of addition to the site of public buildings at Tarentum in the State of Pennsylvania; to the Committee on Public Buildings and Grounds.

By Mr. REID of Illinois: A bill (H. R. 13484) authorizing preliminary examinations of sundry streams with a view to the control of their floods, and for other purposes; to the Committee on Flood Control.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BRAND of Ohio: A bill (H. R. 13485) granting an increase of pension to Lizaetta Stuckey; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13486) granting an increase of pension to Samantha Coburn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13487) granting an increase of pension to Elizabeth Ginn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13488) granting an increase of pension to Bliss Evans Paul; to the Committee on Invalid Pensions.

By Mr. COHEN: A bill (H. R. 13489) to reimburse Dampskib Aktieselshap Roskva, owners of the steamship *Roskva*, for damage to said vessel; to the Committee on Claims.

By Mr. DAVEY: A bill (H. R. 13490) for the relief of Ralph Rhees; to the Committee on Claims.

By Mr. DOMINICK: A bill (H. R. 13491) for the relief of Charles S. Gawler; to the Committee on Claims.

By Mr. GASQUE: A bill (H. R. 13492) granting an increase of pension to Grace Graves Herring; to the Committee on Pensions.

By Mr. GOODWIN: A bill (H. R. 13493) granting a pension to Lottie C. McConnell; to the Committee on Invalid Pensions.

By Mr. MAGRADY: A bill (H. R. 13494) granting an increase of pension to Ellen O'Neill; to the Committee on Invalid Pensions.

By Mr. MAJOR of Missouri: A bill (H. R. 13495) granting a pension to Mary E. Dutton; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13496) granting a pension to Finis R. Wilhite; to the Committee on Invalid Pensions.

By Mr. ROMJUE: A bill (H. R. 13497) granting an increase of pension to Elizabeth Miller; to the Committee on Invalid Pensions.

By Mr. SMITH: A bill (H. R. 13498) for the relief of Clarence P. Smith; to the Committee on Claims.

By Mr. WELLER: A bill (H. R. 13499) granting an extension of patent to Walter D. Johnston; to the Committee on Patents.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk are referred as follows:

7364. By Mr. BLOOM: Petition of the American Legion and all other veterans' organizations, indorsing Senate bill 777; to the Committee on World War Veterans' Legislation.

7365. By Mr. COCHRAN of Pennsylvania: Petition of Florence M. Smith and numerous other residents of Franklin, Pa., urging the passage of the Sproul bill (H. R. 11410) to amend the national prohibition act; to the Committee on the Judiciary.

7366. By Mr. CRAIL: Petition of the faculty of Jefferson Street School, of Los Angeles, Calif., for the passage of the Curtis-Reed education bill; to the Committee on Education.

7367. Also, petition of Tri-Counties Reforestation Committee, for the passage of the McSweeney bill (H. R. 6091); to the Committee on Agriculture.

7368. By Mr. DARROW: Petition of 16 residents of Philadelphia, Pa., urging passage of House bill 13143, increasing salaries of customs employees; to the Committee on Ways and Means.

7369. By Mr. DOUGLAS of Arizona: Petition signed by 45 residents of Glendale, Ariz., urging the passage of House bill 9685, increasing the pensions of Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

7370. By Mr. EATON: Petition of John McGuire, 913 Southard Street, Trenton, N. J., and 31 other residents of Mercer County, urging increase in Civil War pensions; to the Committee on Invalid Pensions.

7371. By Mr. ESTEP: Petition of the Pittsburgh Coal Exchange, Pittsburgh, Pa., by their secretary, J. Frank Tilley, setting forth imperative need of new and larger locks and a new dam to replace Dam No. 4, Monogahela River; to the Committee on Rivers and Harbors.

7372. By Mr. GARBER: Petition of Mid-Continent Oil and Gas Association, 308 Tulsa Building, Tulsa, Okla., in opposition to Senate bill 3151; to the Committee on the Judiciary.

7373. Also, petition of William Green, president American Federation of Labor, Washington, D. C., in regard to Senate bill 744 with certain amendments recommended; to the Committee on Interstate and Foreign Commerce.

7374. By Mr. JOHNSON of Texas: Petition of Ernest C. Cox, assistant adjutant American Legion, Department of Texas, Austin, Tex., and Joseph G. Emerson, of El Paso, Tex., indorsing the Tyson-Fitzgerald bill (S. 777, H. R. 500) for the retirement of disabled emergency officers; to the Committee on Rules.

7375. Also, petition of Dr. E. D. Strong and Dr. J. T. McLean, of El Paso, Tex., indorsing the Tyson-Fitzgerald bill (S. 777, H. R. 500) for the retirement of disabled emergency officers; to the Committee on Rules.

7376. Also, petition of Joseph H. Byers, of Mexia, Tex., favoring House bill 9496, to recognize commissioned service in the Philippine Constabulary in determining rights of officers of the Regular Army; to the Committee on Rules.

7377. By Mr. LOZIER: Petition of 55 citizens of Linn County, Mo., urging the enactment of more liberal pension legislation; to the Committee on Invalid Pensions.

7378. By Mr. McSWEENEY: Petition of American citizens of Limaville, Ohio, and vicinity, favoring the passage of the Jones bill (S. 2901) and the Stalker bill (H. R. 9588); to the Committee on the Judiciary.

7379. By Mr. MILLER: Petition of citizens of Seattle, Wash., indorsing legislation for increase in pension for veterans and widows of the Civil War; to the Committee on Invalid Pensions.

7380. By Mr. O'CONNELL: Petition of the United Veterans of the Republic, Los Angeles, Calif., favoring the passage of the Tyson bill (S. 777); to the Committee on World War Veterans' Legislation.

7381. Also, petition of the national headquarters, Military Order of the World War, New York City, favoring the passage of the Tyson-Fitzgerald bill (S. 777), without amendments; to the Committee on World War Veterans' Legislation.

7382. Also, petition of Post No. 169, American Legion, United States Veterans' Hospital, Outwood, Ky., favoring the passage of Cutting and Blanton bills (S. 4041 and H. R. 5477), extending the time for presumption of service connection for tubercular to September, 1928; to the Committee on World War Veterans' Legislation.

7383. By Mr. SINNOTT: Petition of numerous citizens of Milton, Oreg., advocating increase of pensions for veterans of the Civil War and widows of veterans; to the Committee on Invalid Pensions.

7384. By Mr. STRONG of Pennsylvania: Petition of citizens of Reynoldsville, Pa., in favor of legislation to provide for national flood control by the impounding of unrestricted waters; to the Committee on Flood Control.

# SENATE

THURSDAY, *May 3, 1928*

The Chaplain, Rev. ZeBarney T. Phillips, D. D., offered the following prayer:

Blessed Lord, who hast given us a new commandment, that we should love one another as Thou hast loved us, teach us to love our world: The splendor of the night, the silver of the dawn, the evening's clouds of molten gold, and earth, now beauty-crowned by the artistry of spring. Give us such understanding of our fellow men that, turning from all harsh and cruel thoughts, we may embrace that ampler creed of life that finds no room for selfishness or hate, that threatens no revenge, that pities those who fall, and even dares to look on sin as stumblings of the blind. And though we seem to fail in countless ways, draw us ever closer to Thyself by the mystic power of thy cross, the one sublime fulfillment of God's love. Amen.

The Chief Clerk proceeded to read the Journal of yesterday's proceedings, when, on request of Mr. CURTIS and by unanimous consent, the further reading was dispensed with and the Journal was approved.

### CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Cutting | Greene | McMaster |
| Barkley | Dale | Hale | McNary |
| Bayard | Deneen | Harris | Mayfield |
| Bingham | Dill | Harrison | Metcalf |
| Black | Edge | Hawes | Moses |
| Blaine | Edwards | Hayden | Neely |
| Blease | Fess | Heflin | Norbeck |
| Borah | Fletcher | Howell | Norris |
| Brookhart | Frazier | Johnson | Nye |
| Broussard | George | Jones | Oddie |
| Bruce | Gerry | Kendrick | Overman |
| Capper | Gillett | Keyes | Phipps |
| Caraway | Glass | King | Pine |
| Copeland | Goff | La Follette | Pittman |
| Couzens | Gooding | Locher | Ransdell |
| Curtis | Gould | McKellar | Reed, Pa. |

| | | | |
|---|---|---|---|
| Robinson, Ark. | Simmons | Swanson | Walsh, Mass. |
| Sackett | Smith | Thomas | Walsh, Mont. |
| Schall | Smoot | Tydings | Warren |
| Sheppard | Steck | Tyson | Waterman |
| Shipstead | Steiwer | Vandenberg | Wheeler |
| Shortridge | Stephens | Wagner | |

The VICE PRESIDENT. Eighty-seven Senators having answered to their names, a quorum is present.

ENROLLED BILL SIGNED

The VICE PRESIDENT announced his signature to the enrolled bill (H. R. 10151) to amend section 9 of the Federal reserve act, which had previously been signed by the Speaker of the House of Representatives.

PETITIONS AND MEMORIALS

Mr. SHEPPARD presented resolutions of the Texas conference, Woman's Missionary Society, Methodist Episcopal Church South, pledging support in elections only of law observers, which were referred to the Committee on the Judiciary.

He also presented resolutions of the Texas Press Association, protesting against the Government printing envelopes for private business purposes, which were referred to the Committee on Post Offices and Post Roads.

Mr. COPELAND presented a resolution adopted by the Old Fort Club of the Church of the Saviour, of Brooklyn, N. Y., favoring the passage of legislation providing for the reorganization of the bituminous coal mining industry on a sound and constructive basis, which was referred to the Committee on Interstate Commerce.

Mr. WALSH of Massachusetts presented petitions numerously signed by citizens of the State of Massachusetts, praying for the prompt passage of legislation granting increased pensions to Civil War veterans and their widows, which were referred to the Committee on Pensions.

TAX ON NARCOTIC DRUGS

Mr. BLACK. Mr. President, the Finance Committee report on the revenue bill shows that the Harrison narcotic tax has been increased from $1 to $3. I desire to have read by the clerk telegrams from Dr. S. W. Welch, State health officer, and Dr. E. V. Caldwell, president of the State Medical Association, both of Montgomery, Ala.

There being no objection, the telegrams were read and ordered to lie on the table, as follows:

MONTGOMERY, ALA.

Senator HUGO BLACK,
*Senate Building, Washington, D. C.:*

Note Senate committee recommends increase in Harrison narcotic tax of $3 on physicians. This is great injustice to profession. Please defeat it. One dollar is enough. License should not be made source of revenue.

S. W. WELCH.

---

MONTGOMERY, ALA.

Senator HUGO BLACK,
*Senate Building, Washington, D. C.:*

In name of Alabama's 2,000 physicians I protest against increase in Harrison narcotic tax as recommended by Senate committee. Will appreciate your effort to defeat it.

E. V. CALDWELL,
*President State Medical Association.*

Mr. COPELAND. Mr. President, I simply want to say that I hope the committee will give consideration to the protest offered by the junior Senator from Alabama [Mr. BLACK]. Doctors are complaining about that increase in the narcotic fee. I can see no reason in the world why it should be placed upon them, and I hope the committee in due time will give consideration to it.

I see a smile upon the face of the senior Senator from Utah [Mr. SMOOT], who always feels that the doctors somehow or other are going to get something. But that is no reason why the Senate, representing the great medical profession of the United States, as well as the rest of the citizens, should not give consideration to the protest presented by the Senator from Alabama, and I hope that he will offer such an amendment to the revenue bill and insist upon its adoption.

REPORTS OF COMMITTEES

Mr. JONES, from the Committee on Indian Affairs, to which was referred the bill (S. 4273) authorizing certain Indian tribes and bands, or any of them, residing in the State of Washington, to present their claims to the Court of Claims, reported it without amendment and submitted a report (No. 983) thereon.

Mr. BINGHAM, from the Committee on Territories and Insular Possessions, to which was referred the joint resolution (S. J. Res. 110) to provide for annexing certain islands of the Samoan group to the United States, reported it with amendments and submitted a report (No. 984) thereon.

Mr. WAGNER, from the Committee on Interstate Commerce, to which was referred the bill (S. 1251) to regulate the marking of platinum imported into the United States or transported in interstate commerce, and for other purposes, reported it without amendment and submitted a report (No. 985) thereon.

Mr. SMITH, from the Committee on Privileges and Elections, to which was referred the bill (H. R. 7373) providing for the meeting of electors of President and Vice President and for the issuance and transmission of the certificates of their selection and of the result of their determination, and for other purposes, reported it with amendments and submitted a report (No. 986) thereon.

Mr. EDGE, from the Committee on Interoceanic Canals, to which were referred the following bills, reported them each without amendment:

A bill (H. R. 11245) to cancel certain notes of the Panama Railroad Co. held by the Treasurer of the United States; and

A bill (H. R. 11475) to revise and codify the laws of the Canal Zone.

Mr. STEPHENS, from the Committee on Claims, to which was referred the bill (S. 3931) for the relief of Augusta Cornog, reported it without amendment and submitted a report (No. 987) thereon.

Mr. CAPPER, from the Committee on Claims, to which were referred the following bills, reported them each without amendment:

A bill (H. R. 4357) for the relief of William Childers; and

A bill (H. R. 4619) for the relief of E. A. Clatterbuck.

Mr. HALE, from the Committee on Naval Affairs, to which was referred the bill (H. R. 11526) to authorize the construction of certain naval vessels, and for other purposes, reported it with an amendment and submitted a report (No. 988) thereon.

Mr. MOSES, from the Committee on Post Offices and Post Roads, to which were referred the following bills, reported them severally without amendment:

A bill (S. 3800) to carry out provisions of the Pan American Postal Convention concerning franking privileges for diplomatic officers in Pan American countries and the United States;

A bill (S. 3912) for the relief of Gustave Hoffman;

A bill (H. R. 5681) to provide a differential in pay for night work in the Postal Service;

A bill (H. R. 7900) granting allowances for rent, fuel, light, and equipment to postmasters of the fourth class, and for other purposes;

A bill (H. R. 8337) to amend the air mail act of February 2, 1925, as amended by the act of June 3, 1926; and

A bill (H. R. 12383) to amend section 11 of an act approved February 28, 1925 (43 Stat. 1064, U. S. C., title 39), granting sick leave to employees in the Postal Service; and for other purposes.

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 860) allowing credit to postal and substitute postal employees for time served in the Army, Navy, or Marine Corps of the United States, reported it without amendment and submitted a report (No. 989) thereon.

FLOOD CONTROL (S. DOC. NO. 91)

Mr. JONES submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendments numbered 13, 17, 18, 19, and 20.

That the Senate recede from its disagreements to the amendments of the House numbered 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 21, 22, 24, 25, 26, 27, 28, 29, 30, 32, and 33, and agree to the same.

Amendment numbered 9: That the Senate recede from its disagreement to the amendment of the House numbered 9, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "but nothing herein shall prevent, postpone, delay, or in any wise interfere with the execution of that part of the project on the east side of the river, including raising, strengthening, and enlarging the levees on the east side of the river"; and the House agree to the same.

Amendment numbered 14: That the Senate recede from its disagreement to the amendment of the House numbered 14, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"; (C) provide without cost to the United States, all rights of way for levee foundations and levees on the main stem of the Mississippi River between Cape Girardeau, Mo., and the Head of Passes.

"No liability of any kind shall attach to or rest upon the United States for any damage from or by floods or flood waters at any place: *Provided, however*, That if in carrying out the purposes of this act it shall be found that upon any stretch of the banks of the Mississippi River it is impracticable to construct levees, either because such construction is not economically justified or because such construction would unreasonably restrict the flood channel, and the lands in such stretch of the river are subjected to greater overflow and damage by reason of the construction of levees on the opposite banks of the river it shall be the duty of the Secretary of War and the Chief of Engineers to institute proceedings on behalf of the United States Government to acquire either the absolute ownership of the lands so subjected to overflow and damage or floodage rights over such lands."

And the House agree to the same.

Amendment numbered 15: That the Senate recede from its disagreement to the amendment of the House numbered 15, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"SEC. 4. The United States shall provide flowage rights for destructive flood waters that will pass by reason of diversions from the main channel of the Mississippi River: *Provided*, That in all cases where the execution of the flood-control plan herein adopted results in benefits to property such benefits shall be taken into consideration by way of reducing the amount of compensation to be paid."

And the House agree to the same.

Amendment numbered 16: That the Senate recede from its disagreement to the amendment of the House numbered 16, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "which, in the opinion of the Secretary of War and the Chief of Engineers, are"; and the House agree to the same.

Amendment numbered 23: That the Senate recede from its disagreement to the amendment of the House numbered 23, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"including levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on the outlets and tributaries of the Mississippi River between Rock Island and Head of Passes in so far as such outlets or tributaries are affected by the backwaters of the Mississippi: *Provided*, That for such work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on such tributaries the States or levee districts shall provide rights of way without cost to the United States, contribute 33⅓ per cent of the costs of the works, and maintain them after completion: *And provided further*, That not more than $10,000,000 of the sums authorized in section 1 of this act shall be expended under the provisions of this section.

"In an emergency, funds appropriated under authority of section 1 of this act may be expended for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by the State or levee district."

And the House agree to the same.

Amendment numbered 31: That the Senate recede from its disagreement to the amendment of the House numbered 31, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "The sum of $5,000,000 is hereby authorized to be used out of the appropriation herein authorized in section 1 of this act, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers for the preparation of the flood-control projects authorized to be submitted to Congress under this section: *Provided further*, That the flood surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act: *And provided further*, That the President shall proceed to ascertain through the Secretary of Agriculture and such other agencies as he may deem proper, the extent to and manner in which the floods in the Mississippi Valley may be controlled by proper forestry practice"; and the House agree to the same.

W. L. JONES,
DUNCAN U. FLETCHER,
CHAS. L. MCNARY,
JOS. E. RANSDELL,
HIRAM W. JOHNSON,
*Managers on the part of the Senate.*

FRANK R. REID,
C. F. CURRY,
ROY G. FITZGERALD,
RILEY J. WILSON,
W. J. DRIVER,
*Managers on the part of the House.*

Mr. JONES. I ask that the report be printed and that it lie on the table.

Mr. NORRIS. Mr. President, may I ask the Senator from Washington just what is his intention with reference to taking action on the report?

Mr. JONES. It will have to be acted on in the House first. I am simply filing the report.

Mr. NORRIS. There is probably no intention to take it up soon?

Mr. JONES. Not before next week, about the middle of the week. I do not know when the House will act on the report.

Mr. NORRIS. I am mentioning it only because a great many Senators want to have time enough to read the report.

Mr. JONES. They will have plenty of time.

The VICE PRESIDENT. The conference report will be printed and lie on the table.

## LANDS OF FIVE CIVILIZED TRIBES

Mr. PINE. I report back favorably with an amendment from the Committee on Indian Affairs the bill (S. 3594) to extend the period of restriction in lands of certain members of the Five Civilized Tribes, and for other purposes, and I submit a report (No. 982) thereon.

Mr. THOMAS. Mr. President, my colleague the senior Senator from Oklahoma [Mr. PINE] has just reported a bill which very much concerns our State. I ask unanimous consent for the immediate consideration of the bill.

The VICE PRESIDENT. Is there objection to the request of the Senator from Oklahoma?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 3594) to extend the period of restrictions in lands of certain members of the Five Civilized Tribes, and for other purposes, which had been reported from the Committee on Indian Affairs with an amendment, on page 5, line 10, after the word "taxation," to strike out "during the extended period of restrictions and while the land remains restricted as to alienation, lease, or encumbrance" and insert "while the title remains in the Indian designated in such approved and recorded certificate, or in any full-blood Indian heir of devisee of the land: *Provided*, That the tax exemption shall not extend beyond the period of restrictions provided for in this act: *And provided further*, That the tax-exempt land of any such Indian allottee, heir, or devisee shall not at any time exceed 160 acres," so as to make the bill read:

*Be it enacted, etc.*, That the restrictions against the alienation, lease, mortgage, or other encumbrance of the lands allotted to members of the Five Civilized Tribes in Oklahoma, enrolled as of one-half or more Indian blood, be, and they are hereby, extended for an additional period of 25 years commencing on April 26, 1931: *Provided*, That the Secretary of the Interior shall have the authority to remove the restrictions, upon the applications of the Indian owners of the land, and may remove such restrictions, wholly or in part, under such rules and regulations concerning terms of sale and disposal of the proceeds for the benefit of the respective Indians as he may prescribe.

SEC. 2. That the provisions of section 9 of the act of May 27, 1908 (35 Stat. L. 312), entitled "An act for the removal of restrictions from part of the lands of allottees of the Five Civilized Tribes, and for other purposes," as amended by section 1 of the act of April 12, 1926 (44 Stat. L. 239), entitled "An act to amend section 9 of the act of May 27, 1908 (35 Stat. L. 312), and for putting in force, in reference to suits involving Indian titles, the statutes of limitations of the State of Oklahoma, and providing for the United States to join in certain actions, and for making judgments binding on all parties, and for other purposes," be, and are hereby, extended and continued in force for a period of 25 years from and including April 26, 1931, except, however, the provisions thereof which read as follows:

"*Provided further*, That if any member of the Five Civilized Tribes of one-half or more Indian blood shall die leaving issue surviving, born since March 4, 1906, the homestead of such deceased allottee shall

remain inalienable, unless restrictions against alienation are removed therefrom by the Secretary of the Interior for the use and support of such issue, during their life or lives, until April 26, 1931; but if no such issue survive, then such allottee, if an adult, may dispose of his homestead by will free from restrictions; if this be not done, or in the event the issue hereinabove provided for die before April 26, 1931, the land shall then descend to the heirs, according to the laws of descent and distribution of the State of Oklahoma, free from all restrictions: *Provided*, That the word "issue," as used in this section, shall be construed to mean child or children: *Provided further*, That the provisions of section 23 of the act of April 26, 1906, as amended by this act, are hereby made applicable to all wills executed under this section:"

which quoted provisions be, and the same are, repealed, effective April 26, 1931: *Provided further*, That the provisions of section 23 of the act of Congress approved April 26, 1906 (34 Stat. L. 137), as amended by the provisions of section 8 of the act of Congress approved May 27, 1908 (35 Stat. L. 312), be, and the same are hereby, continued in force and effect until April 26, 1956.

SEC. 3. That all minerals, including oil and gas, produced on or after April 26, 1931, from restricted allotted lands of members of the Five Civilized Tribes in Oklahoma, or from inherited restricted lands of full-blood Indian heirs or devisees of such lands, shall be subject to all State and Federal taxes of every kind and character the same as those produced from lands owned by other citizens of the State of Oklahoma; and the Secretary of the Interior is hereby authorized and directed to cause to be paid, from the individual Indian funds held under his supervision and control and belonging to the Indian owners of the lands, the tax or taxes so assessed against the royalty interest of the respective Indian owners in such oil, gas, and other mineral production.

SEC. 4. That on and after April 26, 1931, the allotted, inherited, and devised restricted lands of each Indian of the Five Civilized Tribes in excess of 160 acres shall be subject to taxation by the State of Oklahoma under and in accordance with the laws of that State, and in all respects as unrestricted and other lands: *Provided*, That the Indian owner of restricted land, if an adult and not legally incompetent, shall select from his restricted land a tract or tracts, not exceeding in the aggregate 160 acres, to remain exempt from taxation and shall file with the Superintendent for the Five Civilized Tribes a certificate designating and describing the tract or tracts so selected: *And provided further*, That in cases where such Indian fails, within two years from date hereof, to file such certificate, and in cases where the Indian owner is a minor or otherwise legally incompetent, the selection shall be made and certificate prepared by the Superintendent for the Five Civilized Tribes; and such certificate, whether by the Indian or by the Superintendent for the Five Civilized Tribes, shall be subject to approval by the Secretary of the Interior and, when approved by the Secretary of the Interior, shall be recorded in the office of the Superintendent for the Five Civilized Tribes and in the county records of the county in which the land is situated; and said lands, designated and described in the approved certificates so recorded, shall remain exempt from taxation while the title remains in the Indian designated in such approved and recorded certificate, or in any full-blood Indian heir of devisee of the land: *Provided*, That the tax exemption shall not extend beyond the period of restrictions provided for in this act: *And provided further*, That the tax-exempt land of any such Indian allottee, heir, or devisee shall not at any time exceed 160 acres.

SEC. 5. That this act shall not be construed to reimpose restrictions heretofore or hereafter removed by the Secretary of the Interior or by operation of law, nor to exempt from taxation any lands which are subject to taxation under existing law.

Mr. CURTIS. Mr. President, may I ask the Senator from Oklahoma if the period of restriction is 25 years?

Mr. THOMAS. It is.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The bill was ordered to be engrossed for a third reading. read the third time, and passed.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. McNARY:

A bill (S. 4328) granting an increase of pension to Josephine Mulligan; to the Committee on Pensions.

A bill (S. 4329) for the relief of Homer Harrington;

A bill (S. 4330) for the relief of Walter Haeper;

A bill (S. 4331) for the relief of J. C. Glover; and

A bill (S. 4332) for the relief of La Roy Young; to the Committee on Claims.

By Mr. WALSH of Montana:

A bill (S. 4333) to further the administration of justice in the Federal courts (with an accompanying paper); to the Committee on the Judiciary.

By Mr. SMITH:

A bill (S. 4334) for the relief of Willis Davis (with an accompanying paper); to the Committee on Civil Service.

A bill (S. 4335) for the relief of St. Stephen's Church (with an accompanying paper); and

A bill (S. 4336) for the relief of D. B. Traxler, president the Realty Corporation of Greenville, S. C.; to the Committee on Claims.

By Mr. TYSON:

A bill (S. 4337) for the relief of Booth & Co. (Inc.), a Delaware corporation; to the Committee on Claims.

By Mr. SHIPSTEAD:

A bill (S. 4339) to protect trade-marks used in commerce, to authorize the registration of such trade-marks, and for other purposes; to the Committee on Patents.

By Mr. SIMMONS:

A bill (S. 4340) for the relief of J. R. and Eleanor Y. Collie; to the Committee on Claims.

By Mr. GOFF:

A bill (S. 4341) granting an increase of pension to Mary J. Shinn (with accompanying papers); to the Committee on Pensions.

By Mr. BARKLEY:

A bill (S. 4342) for the relief of American-La France & Foamite Corporation; to the Committee on Finance.

By Mr. FLETCHER:

A bill (S. 4343) for the relief of Capt. Louis C. Brinton; to the Committee on Claims.

By Mr. GILLETT:

A joint resolution (S. J. Res. 141) authorizing the president and fellows of Harvard College to erect on public grounds in the District of Columbia a monument to Maj. Gen. Artemus Ward; to the Committee on the Library.

By Mr. SHORTRIDGE:

A joint resolution (S. J. Res. 142) authorizing the erection of a Federal reserve bank building in the city of Los Angeles, Calif.; to the Committee on Banking and Currency.

GOLD MEDALS FOR CREW OF THE "NC–4"

Mr. BINGHAM. Mr. President, the other day it was brought out in debate that Congress had never done anything for the crew of the first airplane to go across the ocean, the *NC–4*. I have prepared a bill, mentioning the crew by name and authorizing the President to award gold medals to them. I ask that it be printed and referred to the Naval Affairs Committee, in order that it may receive early consideration, as within a few days we shall reach the ninth anniversary of the starting of that historic first trans-Atlantic flight.

The bill (S. 4338) to authorize the President to award in the name of Congress gold medals of appropriate design to Albert C. Read, Elmer F. Stone, Walter Hinton, H. C. Rodd, J. L. Breese, and Eugene Rhodes was read twice by its title and referred to the Committee on Naval Affairs.

AMENDMENTS TO TAX REDUCTION BILL

Mr. BINGHAM submitted three amendments intended to be proposed by him to House bill 1, the tax reduction bill, which were ordered to lie on the table and to be printed.

Mr. BLAINE. I desire to propose an amendment to the revenue bill and will ask that it be printed and lie on the table, and that there be printed with the amendment the schedule relating to the articles entering principally into the cost of farm operations and agricultural articles, raw or manufactured, and processes wholly within the United States, which schedule in a horizontal column gives the paragraphs of the revenue act of 1922, and opposite the paragraphs an abbreviated statement of the contents of those paragraphs, as a mere matter of convenience for reference

There being no objection, the amendment and accompanying schedule were ordered to be printed and to lie on the table.

DIVERSION OF COMMERCE FROM UNITED STATES PORTS

Mr. WALSH of Massachusetts submitted the following resolution (S. Res. 220), which was read:

Whereas during the past 10 years there has been diversion of commerce from United States ports to Canadian ports, particularly in grain and other farm products, so great as to threaten the foundation of the future commerce and prosperity of the ports of the United States and to affect seriously the agricultural and transportation interests of this country, including the development of its merchant marine; and

Whereas this diversion of commerce is the result of (1) more favorable railroad rates between points in the United States and Canadian ports than between the same points and United States ports; (2) more stringent regulations as to grading and inspection of grain at ports of the United States than at Canadian ports, especially the higher grain standards and the dockage rules of the United States; (3) the preferential customs regulations of Canada, giving lower tariffs

on products imported into Canada directly through Canadian ports than on those routed through ports of the United States; and (4) the preferential schedules of other parts of the British Empire, imposing lower duties or more favorable regulations on products of the United States routed through Canadian ports than on those shipped from United States ports; and

Whereas the adoption by Congress of constructive legislation to meet these conditions is imperative and depends on the solution of problems within the respective provinces of the Department of State, the Department of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission: Therefore be it

*Resolved*, That the Secretary of State, the Secretary of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission are requested (1) to investigate, in cooperation with each other, the factors which are contributing to the diversion of commerce from ports of the United States to Canadian ports and practicable remedies for preventing such diversion, and (2) to report thereon to the Senate at the beginning of the next regular session of the Seventieth Congress.

Mr. WALSH of Massachusetts. I ask that the resolution be printed and lie on the table. To-morrow I shall address myself to it briefly.

The VICE PRESIDENT. The resolution will go over under the rule and be printed.

INTERMEDIATE CREDIT BANK, COLUMBIA, S. C.

Mr. BLEASE. Mr. President, I have a letter which I received this morning to which I desire to call the attention of the Senate, but I first want to read an article from the New York Journal of Commerce, which is as follows:

FARM-LOAN SCANDAL REPORTS DISCOUNTED

(Bureau of the Journal of Commerce)

WASHINGTON, April 30.—There is no such serious situation in the Federal farm-loan system as has been charged by Senator BLEASE (Democrat), of South Carolina, it was asserted at the Treasury Department to-day.

Claims that Farm Loan Board reports on the situation have been suppressed likewise were denied. Officials said that there are no conditions in the farm-loan system which have not been given publicity and upon which official reports have not been made.

A complete report on the activities of the system during the last year is in the course of preparation, and will be submitted to Congress prior to the close of the present session, officials said.

It has been charged that conditions in several banks of the system amount to a national scandal. Difficulties have arisen in a number of the banks, but steps have been taken by the Farm Loan Board looking to improvement. In the case of one bank a 100 per cent assessment against stockholders was made; another is in receivership, but an effort is being made to adjust its affairs without large assessment, officials said.

Mr. President, the letter to which I referred is from a prominent lawyer in the money center of this Nation. I read from it excerpts as follows:

MAY 2, 1928.

Hon. COLEMAN L. BLEASE,
*Senate Office Building, Washington, D. C.*

DEAR SENATOR BLEASE: It is with great interest that I saw a news item that you introduced a resolution for a Senate investigation of the joint-stock land bank situation and the Federal Farm Loan Board.

I am very familiar with the situation and was to have been called before the McFadden committee last year to testify at the request of Congressman ———. I was in readiness for several months, but was never called. On a recent trip to Washington about a month ago I was informed by Congressman ——— that Chairman MCFADDEN whitewashed the matter, as he did not want the information to get out to the public as to the conditions of the banks, and that it was a reflection on the present administration.

When I first saw Congressman ——— I came to Washington at the suggestion of Hon. John W. Davis, who was to have acted as counsel for a protective committee of one of the banks. I conferred with Hon. O. C. Luhring, Assistant Attorney General, who was in charge of the criminal prosecutions of some of the directors of some of the banks; also Mr. Pagan, of his office. At the request of Mr. Luhring I stayed over another day in Washington to go over more fully the evidence I had. Some of this evidence was used by the Government, and in some cases obtained convictions, such as Mr. Guy Huston, of New York.

I first took this matter with Senator DAVID I. WALSH over a year ago about a Senate investigation, that the matter was very serious and scandalous. Over a half billion dollars have been lost by investors in the joint-stock land bank securities in the past three years due to the inefficiency of the old Federal Farm Loan Board and the crookedness of some of the directors of some of the banks.

I also wrote a letter to Senator WAGNER, of New York, whom I met while in Washington; among other things advised him of the joint-stock land bank situation so that it could be used by some of the leading Democrat Senators in the coming campaign, showing some of the other scandals of the Republican administration besides the oil, etc.

Should you desire to have me come to Washington, I will be glad to do so, and go over the whole matter with you.

All my evidence is in a safe deposit box in Washington at present. Inasmuch as I must come to Washington in the very near future on other matters, I will not be inconvenienced by the trip in case you desire to see me.

Very truly yours,

(Signed) ——— ———.

That is signed by a very prominent lawyer in the money center of the Nation. That letter I shall be glad to show at any time to any gentleman whose name is mentioned. I did not read the entire letter, as there are some personal references in it which it is of no use for me to make public.

I also received this morning a letter from a prominent attorney who resides not so very far from Columbia, S. C.:

MAY 1, 1928.

Hon. COLE L. BLEASE,
*Washington, D. C.*

DEAR SIR: I notice that you have made assertions recently that the Federal land bank at Columbia are crooks, or something to that effect.

If you have not sufficient proof for your contentions, I have some evidence and will be glad to furnish same to you. Go after them.

Yours truly,

(Signed) ——— ———.

It seems, Mr. President, that at last somebody has gotten under the hide of Mr. Mellon and some of his associates, because, if we can not get anything else, we will at least get some newspaper reports dealing with this subject.

ANITA W. DYER

Mr. STEPHENS. Mr. President, I ask unanimous consent to take up and consider, out of order, House bill 10536, Order of Business 999.

The VICE PRESIDENT. The Secretary will state the title of the bill.

The CHIEF CLERK. A bill (H. R. 10536) granting six months' pay to Anita W. Dyer.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. SMOOT. Mr. President, what is the bill?

Mr. CURTIS. It is the usual bill granting six months' pay to the dependent mother of a late ensign in the Navy.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That the Secretary of the Navy be, and he is hereby, authorized and directed to pay, out of the appropriation "Pay of the Navy, 1928," to Anita W. Dyer, dependent mother of the late Ensign William Lansdale Dyer, United States Navy, who died on board the U. S. S. *Relief* February 20, 1927, an amount equal to six months' pay at the rate said Ensign William Lansdale Dyer was entitled to receive at the date of his death: *Provided*, That the said Anita W. Dyer establishes to the satisfaction of the Secretary of the Navy the fact that she was dependent upon her son, the late William Lansdale Dyer, at the time of his death.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

ADDRESS BY DR. NICHOLAS MURRAY BUTLER ON "PROBLEMS OF THE EIGHTEENTH AMENDMENT"

Mr. BROUSSARD. Mr. President, I ask unanimous consent to have printed in the RECORD an address made by Dr. Nicholas Murray Butler, entitled "The problems of the eighteenth amendment."

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is here printed, as follows:

THE PROBLEMS OF THE EIGHTEENTH AMENDMENT—POLITICAL, SOCIAL, MORAL

Mr. Chairman and my fellow Americans, this great and representative audience, typical of many that I have had the honor and privilege to meet in all parts of this land, is surely indicative that the mind of the people is turning toward a demand for the quick solution of the most pressing domestic question of your time and mine. It is the most fundamental and far-reaching question with which we had to deal since the discussion over slavery and the right of secession. The subject is so vast, it has so many points of contact with our public life, our social order, and our private morals, that it is difficult to know either where to begin or when to leave off. My purpose will have been achieved if I am able in a brief time to impress you with my own sense of the grave seriousness of this question, and of its fundamental importance to the life of the Nation.

Let me say first how difficult it is to secure its discussion upon the high plane of principle. Since I began my own presentation of this question to our people, first before the Ohio State Bar Association at Columbus, in January, 1923, and next, after a becoming interval, before the Missouri Society of the State of New York, in April, 1924, I have been favored with an amount and variety of abuse which it is difficult either to define or describe. This abuse has come from most unexpected sources. Some of it has come from women, many of whom have forgotten to sign their names or to give their addresses. Some of the worst of it has come—God save the mark!—from men who call themselves ministers of Christian churches, and who write on the stationery of the church over which they preside and to which they minister. What these correspondents expect to accomplish I do not know, for I am one of those fortunate persons who, desiring nothing, can be deprived of nothing. [Applause.] And one whom it is quite impossible to disturb by abuse, by blackguardism, or by blackmail. [Applause.] They have all been tried. [Applause.]

As illustrative of the temper in which this subject is approached, I have in my hand a cutting from a newspaper published at a point not remote from St. Louis, in reference to this very meeting. The announcement that it was to be held attracted the attention of the editor of the Times, published at Leavenworth, Kans. [Laughter.] Leavenworth is a community which boasts all the resources of civilization, from a great cathedral on the one hand to a penitentiary on the other. This is the reflection of the editor of the Times on the company assembled before me:

"It is announced that Nicholas Murray Butler, president of Columbia University, is to come to St. Louis soon to start 'a dignified campaign' for the restoration of the saloon in this country. This campaign is to be 'carried on through the mails and by public meetings.' And who is to foot the bills? Such a campaign will cost money, and a very large amount of money. Who furnishes it? Manifestly, the liquor interests. Great business for a university president to be in." [Laughter.]

And then this charming touch with reference to this company:

"Every bum and thug and guttersnipe in St. Louis will be ready to applaud the 'dignified' address." [Laughter.]

That, Mr. Chairman, is the outgiving of one presumably a defender of Christian morals, and of a habit of kind and sympathetic dealing with his fellows and insistent on an open-minded consideration of great public questions. I was interested in it because it showed that there in the Missouri Valley yonder they manifest the same gentle, kindly, Christian touch that is revealed to me in correspondence from points nearer home. [Applause.] I have selected from several hundred of these epistles two or three. This one came a few weeks ago from the City of Churches—the Borough of Brooklyn, in the city of New York. The form of greeting is somewhat familiar, more so than my lack of acquaintance with the writer would justify, since he starts, "Nick Butler." [Laughter.]

"Sooner than see you destroy my sons with rum, I have decided to kill you at my first opportunity." Signed, "A father of southern blood who upholds the laws of his country."

Evidently the writer lacks a sense of humor!

Then a very gentle one from the City of Brotherly Love—Philadelphia:

"You have three months in which to change your ideas to decent ones. You belong to the filthy hog type, but no doubt this is because you are afflicted just now. Three men are dead who did not take the warning of the writer, and unless you work for a clean, decent America from now on you will not last one year."

Looking at the date of this letter, I see that I have about four months to go. [Applause.]

And this one, couched again in terms of Christian gentleness and brotherly love from Charlotte, N. C.:

"My dear Bolshevik"—

The grammar is weak but the sentiment is clear.

"From your stand on prohibition proves you unfit to be a college president to teach the youth to disobey the law, sending their souls to hell. Why, if you do not wish to obey our laws, why in hell don't you go to Russia, where you belong? You are working for the devil, but he has damn poor material. You are a nice one, on a par with Big Bill Brennan, Thompson, Flynn, VARE and EDWARDS—a nice bunch of old hogs you are. Your picture in the papers classes you with apes and monkeys."

This could not have come from Dalton, Tenn., anyhow:

"One thing, you have no following but bums, bootleggers, and soviets. Don't let the Russians know you are coming or they will close the door against you. Sincerely yours, Ed."

Now, Mr. Chairman, those are very funny, but they are very, very sad. The writers of those letters—and they are typical of many hundreds—the writers of those letters are American citizens, with the right to vote, sharing responsibility for the Government and good order of the United States. How is it possible for us to approach any such great question as this from that point of view or on that plane?

I have read those letters because I want to say that that is the general type of answer that I receive to my argument. The only man to favor the eighteenth amendment, and to stand up like a man and say so, in reasonable, polite, and courteous terms, is Senator BORAH, of Idaho. [Applause.] He is a public man with whom you can debate a question of principle. But the writers of these letters, and hundreds of thousands of persons who are in that state of mind, are utterly hopeless, either as antagonists or as friends.

Mr. Chairman, you will not hear from me save in these two or three sentences the words "wet" and "dry." I do not use them, first, because they are vulgar, and, second, because they are meaningless. I could not, with my sense of humor, apply the word "dry" to a defender of a policy that has flooded this country with illegal liquor, a policy that has poured into States like Vermont, Kansas, and Georgia a liquor that had almost passed out of use in large sections of those communities; nor can I use the word "wet" to describe the hundreds of thousands, the millions, of total abstainers who never have touched intoxicating liquor and never will, but who are profoundly and earnestly opposed to this revolution in the Government of the United States.

Mr. Chairman, the least important element in this problem is liquor. The important question is government [applause], social order, public morals, and a constructive and permanent method for dealing with the evils of the saloon and the liquor traffic.

My relation—if you will pardon a personal word—my relation to this question is a long one. When just able to vote I was chosen delegate from my county to the Republican State convention of New Jersey in the year 1886. I was placed upon the committee on resolutions, which consisted of 21 members. In that committee I cast the eleventh and deciding vote to put into the party platform a declaration against the saloon and against the domination of the liquor traffic in our State politics, and I have been working to that end ever since. [Applause.]

We are now faced, however, after years of progress, years of education, years of steady growth in temperance all over this land, with a new and terrible situation. The saloon was rapidly disappearing in many parts of the country and under greatly increased control in other parts. Drunkenness was decreasing with great rapidity, and a general sense of responsibility, personal responsibility, for temperance was increasing by leaps and bounds. Then came this literally stupendous blow, which, in my judgment, in addition to all its other ills, has put back the cause of temperance in this country for at least one long, long generation of men. [Applause.]

On a dull, dark day in March, 1920, it was my good fortune, through the courtesy of the Chief Justice, to sit in the Supreme Court of the United States and listen to the closing argument of a great lawyer and statesman—Elihu Root, of New York—against the validity of the eighteenth amendment. He had concluded his argument on the brief, and looked up at the clock that hung over the head of the Chief Justice. He saw that it was six minutes to 4.30, when the court would rise. It was important for the psychological situation that he occupy those six minutes, and not permit them to be given over to some extraneous case. Mr. Root put his glasses in his pocket, and, drawing himself up to his full height, pointing his finger at the Chief Justice, with the whole nine Justices fixing their eyes upon him, he concluded his argument with these memorable words, which have burned themselves forever into my memory: "If your honors," said Mr. Root, "shall find a way to uphold the validity of this amendment, the Government of the United States, as we have known it, will have ceased to exist." [Applause.] "Your honors will have found a legislative authority hitherto unknown to the Constitution and untrammeled by any of its limitations. Your honors will have decided that two-thirds of a quorum in each House of the Congress, with the support of a majority of a quorum in each house of the legislatures of three-fourths of the States, may enact any law relating to the life, the liberty, or the property of the citizen, to the form and fabric of this Government, or to the bill of rights itself, without recourse and without repeal. In that case, your honors, John Marshall need never have sat upon your bench." [Applause.] The clock was at half past 4. The court rose, and, Mr. Chairman, I passed out of that room, the room in which Hayne made his two great speeches and Webster his still greater replies; the room whose walls had echoed to the voices of Clay and Calhoun and Benton and Seward and the rest, determined that, so far as God gave me strength, every ounce of it should be devoted to getting that amendment out of the Constitution should the court decide to uphold it. [Applause.]

The Supreme Court has decided that the eighteenth amendment is law. They overruled Mr. Root without answering him, and his friends have always said that that was one of the greatest forensic triumphs of his career, since they did not attempt to answer him, because they could not. [Applause.]

But the eighteenth amendment is the law; it is a part of the Constitution of the United States, and as such claims our obedience. But because it has been declared to be in the Constitution it is none the less anticonstitutional. Sometimes, when we propose to amend the Constitution by taking something out, we are told that we are unpatriotic, nullificationists; but what about those who want to amend the Constitution by putting something in? If you can put in, why can you not take out? as Weber and Fields used to say about a bank. As a matter of fact, Mr. Chairman, we have already taken three things out of the Constitution. It is not true to say that nothing has ever

been taken out. In the eleventh amendment we took out the language which admitted of an interpretation permitting an individual to bring suit against a State. In the twelfth amendment we took out the original provision for the election of President and Vice President. In the thirteenth amendment we took out slavery, which had been in the Constitution from the beginning. So that it is possible, even by precedent, to amend the Constitution by taking things out. And all that is needed now is the shortest amendment ever proposed—"*Resolved*, That the eighteenth amendment be, and hereby is, repealed." [Applause.]

That there may be no misunderstanding as to the fundamental point at issue here, let me rest my case, as I am very fond of doing, upon the authority of Abraham Lincoln. This is his answer, in his first inaugural, to the legalists, who then, as now, tell us that we must let the law alone. "I do not forget," said Lincoln, "the position assumed by some that constitutional questions are to be decided by the Supreme Court; nor do I deny that such decisions must be binding, in any case, upon the parties to a suit, as to the object of that suit, while they are also entitled to very high respect and consideration in all parallel cases by all other departments of the Government. * * * At the same time, the candid citizen must confess that if the policy of the Government, upon vital questions affecting the whole people, is to be irrevocably fixed by decisions of the Supreme Court, the instant they are made, in ordinary litigation between parties in personal actions, the people will have ceased to be their own rulers, having to that extent practically resigned their Government into the hands of that eminent tribunal."

So Abraham Lincoln interpreted into precise terms the exact problem which faces us. That means that we must give respect to the law as law, but use every effort that we legally and honorably can to change the law; because, after all, courts and executives and legislatures belong to the people and serve the people. The time has come for the sovereign power in this Republic, the people of these United States, to assert their authority.

It is not necessary, before an audience such as this, to restate at length the objections from a political point of view to the eighteenth amendment. Surely by this time they must be well known. It stands all by itself as an offense against the Constitution. That Constitution sets up a Government, defines its powers, sets limits to its authority, indicates what are the reserved rights of the States and the people, and offers protection to those rights. Every other amendment—whether one agrees with it or not—every other amendment save the eighteenth has been a proper amendment. It has dealt with the organization and functions of government. The eighteenth amendment has nothing to do with the organization and functions of government. It is an ordinary statute or ordinance which might be passed by any legislature or any board of aldermen. It has no more place in the Constitution than an amendment fixing the rate of tariff duty on imported cotton goods. [Applause.]

But, you say, it was submitted and ratified in proper form. Can not the people put into the Constitution anything they like? Kindly observe the form in which I state that question—it was ratified—it was submitted and ratified in proper form. Can not the people put into the Constitution anything they like? The people can, but the Congress and the legislatures can not! [Applause.]

To show you how far that fallacy goes, let me tell you an experience I had with a very high officer of the Government of the United States, who found fault with me for the position which I am now holding. I said, "Let me ask you this question, that we may clearly understand each other: If two-thirds of a quorum of each House of the Congress should propose, and a majority of a quorum of each of the two houses of the legislatures of three-fourths of the States should ratify, an amendment to provide that the term of the President should not expire on Maroh 4, 1929, but should continue for the term of his natural life, and that then the office of President should descend in the person of his heirs male forever, would that be a valid amendment?" This gentleman, true to his logical position, said, "Yes; of course." What can you do with a mind like that? To be told that our Government can be turned into a hereditary monarchy by the simple process of constitutional amendment, participated in by but some 3,000 persons sitting in Congress and in the State legislatures, and without any appeal to the people whatever, is startling, to say the least. This shows what happens when legalism gets the better of common sense.

Mr. Chairman, it is fundamental and elementary parliamentary law that an amendment must be germane to the proposal which is pending and that is to be amended. If you will read the history of the Constitutional Convention, you will discover that that great body of men understood this question perfectly. In providing for amendments they had in mind the betterment of the machinery that they were constructing. They could not foresee every contingency; they could not foresee how this Government would work in every detail. Therefore they provided for the proposal and ratification of amendments; but it never entered their heads that under the guise of amendment the Government could be transformed into a monarchy or a bureaucracy, or into anything but an indestructible union of indestructible States. That very question came up in the argument of the prohibition cases to which I have already alluded. At one point Chief Justice White interrupted Mr. Root and said, "Would you hold, Mr. Root, that if the people of the United States want to have prohibition they can not have it?" Quick as a flash Mr. Root said, "No; your honor, there are two ways in which they can have it; they can make a new Constitution on new principles and put prohibition in it, or they can amend Article I, section 8, and give the Congress power to deal with the liquor question in this way, but they can not amend this Constitution fundamentally and in a revolutionary spirit, as is now proposed." And that is true. [Applause.]

Mr. Chairman, there is just one other aspect of this matter that I must allude to before passing on, and that is the precedent that is established. One of the great weaknesses of the legal profession is that it regards a precedent as a principle. If we permit the eighteenth amendment to remain in the Constitution, it will not only do the damage which it is doing but 100 years from now, believe me, it will have paved the way to a dozen other like statutes which, it will be said, are built upon it as a foundation and a principle. Then your Federal Government will have disappeared and the State of Missouri will be like one of the provinces of France or one of the counties of England. Therefore, from the political point of view, without any regard to liquor at all, from the political point of view, the eighteenth amendment is an offense. It affronts our form of government, and it opens the way to as complete a destruction of that form of government as did secession. Secession would have destroyed our Government by breaking it to pieces. This method will destroy our form of government by consolidating it into a single imperial bureaucracy at Washington.

In the second place, from what may be called the larger social point of view, the eighteenth amendment and the policy which it imposes wholly misconceive the purpose and limitations of the law. We have become a statute-passing people. When Senator Thomas, of Colorado, was about to leave the Senate some years ago he made a most admirable speech on that subject, and said that while he had been in the Senate 70,000 statutes had been enacted in the United States—by legislatures, Congress, and the like. The fact of the matter is that law is something which operates under very distinct and very obvious limitations. Law is that ordering of the social relations which commands the support of the general will. Legislatures only lay the foundation of law. Every time a law of any importance is passed there is a silent referendum in the hearts and minds of men, and they either accept it or they do not accept it, and that is the end of it. If they believe it to be reasonable, to be in the common interest, to accord with public policy, even if not representing their own primary judgment, they accept it and obey it; but when the supposed law takes hold of a subject which comes close home to matters of personal belief, of personal conduct, personal habit, that have no public reference, then beware! Mr. Chairman, no one known to me has stated the case in respect to that more concisely, more correctly, or more completely than the President of the United States. This is what President Coolidge said, speaking before the American Bar Association at San Francisco, Calif., when he was yet Vice President, on August 10, 1922: "There is danger of disappointment and disaster unless there be a wider comprehension of the limitations of the law. The attempt to regulate, control, and prescribe all manner of conduct and social relations is very old. It was always the practice of primitive peoples. Such governments assumed jurisdiction over the action, property, life, and even religious convictions of their citizens down to the minutest detail. A large part of the history of free institutions is the history of the people struggling to emancipate themselves from all of this bondage. * * * Real reform does not begin with a law; it ends with a law. [Applause.] The attempt to dragoon the body when the need is to convince the soul will end only in revolt." And it has! [Applause.]

The fact of the matter is, Mr. Chairman, that the purpose of the eighteenth amendment is not at all what it declares itself to be. The purpose of the eighteenth amendment is to enforce compulsory total abstinence, which is wholly impossible and ought to be so. Senator Hardwick, of Georgia, when the eighteenth amendment was pending in the Senate, moved to amend it to that effect. But the proponents of the amendment said it would not be necessary, and they defeated Senator Hardwick's amendment. They omitted to make the purchase or the use of intoxicating liquor for beverage purposes a prohibited act, and dealt only with its manufacture, transportation, and sale. Had they uncovered their real purpose in the beginning, none would be so blind as not to see that it was a most shocking and tyrannical invasion of the private life of every family in the United States. Therefore, when we come to this larger social question, we find that we are confronted by an attempt to control by law the most private and personal habits and happenings that have no public relationship whatsoever.

What is the true function of the law in this respect? From time immemorial the food and drink of the civilized man has been substantially uniform. Flesh of animals, the product of the fruit and vegetable growths of the earth, the fish of the sea, and those liquors, alcoholic or otherwise, which have been prepared for thousands of years from the fruits of the earth and used for every sort of purpose,

sacred and profane. That is a personal matter. When those personal activities, liberties, habits, are abused by excess the individual so abusing becomes a public nuisance and falls under the category of those who are arrested and treated as public nuisances. Then it is entirely a proper function of the community, the State, the organized political body, to say that it will not permit, it will not license these public drinking places where men, and women, too, waste their time, spend their money, learn bad habits, become intoxicated, and often go home to unhappiness and brutality. We will not have that. That is entirely within the jurisdiction of the organized body politic, and as the experience of Canada and Scandinavia shows, there is not the least difficulty in dealing with that problem in terms that are wholly consistent with civil and political liberty.

Then, third, there is the moral question. It requires a good control of one's temper to be told that the nonuse of liquor in the domestic circle, in the most modest quantity and for the ordinary purpose of food and drink, is immoral. It is just about as immoral as the eating of a potato or a beefsteak. If those who hold that extraordinary view are interested enough to turn to the Bible, they will discover that there are two very serious sins and evils condemned in that sacred book, and that they are on a par with each other; one of them is gluttony and the other is drunkenness. If you are going to prohibit private and domestic consumption of that which leads to drunkenness, surely you must prohibit, logically, the private and domestic consumption of that which leads to gluttony. Starvation would be the simple, quick, and easy end. No, Mr. Chairman, no; moral questions are not stated quite so superficially and so nonchalantly as that. The essence of morality is the building of character, and no man can have his character built for him. [Applause.] Every human being born into this world has to build his own character, and when you put a pistol to his head and march him off to punishment you are not building his character; you are only satisfying by force your own differences of opinion. [Applause.]

What is the solution? The liquor problem and the saloon have become important all over the world during the last 50 or 75 years, and, curiously enough, they have become increasingly important as drinking has declined, by which I mean, excessive drinking. This was not only common but fashionable in the eighteenth and well down into the nineteenth century. Public opinion began to be set against it after our Civil War. There were many, many public men, whom I forbear to mention, but whose names will perhaps occur to some of you, who overindulged in intoxicating liquor in a manner that would not now be permitted by public opinion for a moment. Therefore, fundamentally, the problem is one for personal example and the education of the people. Teach them to build their characters on so firm a foundation of religious faith, moral principle, and sound ethics that they will control, each for himself, the use and prevent the abuse of any article of food or drink. Remember that in so doing you are building at the foundation; but the moment you begin with your prohibitions or your compulsions—they are on the same plane—the moment you begin with your prohibitions or compulsions and your punishments, you not only deprive the individual of a chance to build his character, but you teach him to revolt not only against your compulsion and prohibition but against all compulsion and prohibition. You have set your foot on the road to lawlessness, and you have set it there firmly and surely.

I respect the question, What is the solution? There are only three possible ways of settling this grave and far-reaching question—I say possible, because I do not believe one of them is practicable, but, theoretically, it is possible. You may have absolute, strict, and successful enforcement—theoretically you may have it—or you may have nullification, or you may have repeal. No other path is open. I am very much pleased to find that my friend Senator BORAH, in his speech at Cleveland, Ohio, a few weeks ago, came to the point where I was on April 8 last when we met in debate at Boston, Mass. I then stated that we must have either enforcement or repeal, and that enforcement was impracticable. Senator BORAH has now gotten to the point where he says we must have enforcement or repeal. I give his strong mind 90 days to add the qualification that enforcement is impracticable. [Applause.]

So far as I am concerned, Mr. Chairman, no candidate for public office in 1928 is going to be permitted to hide himself behind the papier-mâché bulwark of law enforcement. [Applause.] The phrase "law enforcement" sounds as if it meant something, but it does not. I myself question very much whether any law can be enforced, because it really does not enforce a law to punish those who violate it. Laws must be respected and obeyed, and when they are not respected and obeyed they cease to be laws, no matter what name you put on them. [Applause.] Just a word about this "law enforcement" as a political slogan. If law enforcement means the enforcement of the eighteenth amendment regardless of any other provision of the Constitution, then law enforcement means lawlessness. It means the kind of murder that has been going on over this land for four years. [Applause.] It means the invasion of the right of privacy; it means search without warrant; it means the abolition or limitation of trial by jury. It means overturning all sorts of things which we have supposed to be fundamental, if by law enforcement you mean—get my condition—enforcement of the eighteenth amendment regardless of the bill of rights or anything else. Abraham Lincoln had something to say about that also. On July 4, 1861, in his message to the Congress, he asked this question: "Are all the laws but one to go unexecuted, and the Government itself go to pieces, lest that one be violated?" Why, Mr. Chairman, Lincoln could not have framed a question more pertinent to the issues of this moment. But suppose law enforcement does not mean that; suppose law enforcement means the enforcement equally of all the laws that are in the Constitution. Then the cry of "law enforcement" is sheer hypocrisy and cowardice, because under those conditions the eighteenth amendment can not be enforced, and every intelligent man must know it. [Applause.]

We have left nullification and repeal. Nullification is proceeding with so great rapidity that it may reach the goal before repeal is possible. But the reason I prefer repeal is that I like to be straightforward and honest and square with the American people. [Applause.] I do not want to be a hypocrite and smile and shrug my shoulders and keep this provision in the Constitution to please one set of people, while joining in its absolute nullification to please the great majority. Nullification is the easy way; there is no doubt about that; it is the easy way, and if it proceeds at its present rate, the eighteenth amendment will be safely laid to sleep by the side of the fifteenth within a very short term of years. We have recently had some very interesting discussions on this subject. I was greatly pleased with the advent into the debate of Senator GLASS, of Virginia. Senator GLASS said some charming things. He is very much in favor of enforcing the eighteenth amendment, but the fifteenth amendment affects him—I speak moderately—differently! He says that "the white people of Virginia, within the limitations of the Federal Constitution, have complete control of their State affairs, without the least fear of disturbance by the blacks." Senator GLASS boasts—boasts, if you please—that they have found a way to nullify the fifteenth amendment without getting into trouble with the Supreme Court of the United States. And he points out that, anyhow, the Congress has passed no law to enforce the fifteenth amendment. Why, Mr. Chairman, if the Congress should endeavor to pass a law to enforce the fifteenth amendment, Senator GLASS would have apoplexy. When after the Civil War the Congress did try that—the legislation was called a force bill—Senator GLASS's constituents were up in arms about it. The last force bill was introduced into the House of Representatives by Henry Cabot Lodge when he came there for his first term in 1890, 37 years ago. The Committee of One Thousand on Law Enforcement has waited all this time before repeating an effort to enforce an amendment which deals with fundamental political rights. They are very much concerned about an ordinary police statute that deals with something which does not even rise to the height of murder or arson or perjury. I am rather gratified at Senator GLASS's advent into the discussion, because he has laid down the very interesting proposition that if, without taking the trouble to repeal the eighteenth amendment, we wipe the Volstead Act off the statute book and pass nothing else, the eighteenth amendment will, like the fifteenth, become a museum piece. That is a suggestion that had not occurred to the rest of us. We had thought we must have nullification or repeal; Senator GLASS adds the bright thought, Why nullify; why repeal; just forget it! [Applause.]

Mr. Chairman, this great question might detain us here forever; it has no end of complications, points of interest, and applications. But for myself, I want to stand on the firm ground of the principles that underlie the Federal Constitution. I want to stand on the historic doctrines of the fathers. I want to preserve for my children and my grandchildren, and their children and grandchildren, the precious rights of local self-government and civil liberty. [Applause.] I do not want any representative of mine to use this language, uttered on the floor of the Senate on November 15, 1921, by Senator JONES of the State of Washington. He said this: "Another objection that is made to the prohibition law is that it infringes the personal liberties and rights of the individual. This is a very common plea that is made. I have been surprised to hear it made upon the floor of the United States Senate. Mr. President, there is no such thing as personal liberty in a Republic." Shades of Samuel Adams and Patrick Henry and Washington and Jefferson, and John Adams and John Marshall—no such thing as personal liberty in a Republic! And spoken, Mr. Chairman, in debate on the floor of the Senate of the United States of America, when our Government was nearly 150 years old!

Mr. Chairman, we are face to face, you and I, with a very grave responsibility. We are expected by those astute in political management to assent to the keeping quiet of all of us on this great subject, because it splits the parties; because there are Republicans who are for prohibition or who say they are, and because there are Democrats who are against prohibition or who say they are. If my experience and observation count for anything, the people of the United States—north, east, south, and west—are deeply stirred on this question. We had a referendum vote in the State of New York in November, 1926. Of our 62 counties, 42 were carried against the present policy by a majority of 1,200,000; 20 counties, having only a population of 700,000 among them, were carried in favor of the present policy by a total majority of about 20,000. The total majority in the State, rural counties, urban counties, suburban counties, was therefore over 1,150,000; and yet there are some politicians who are so hard of hearing that

that fact has not yet completely penetrated their intelligence. The other day they had a congressional election in Denver on this issue, and on this issue alone. A Republican majority of 7,000 was turned into a Democratic majority of 5,000 on this issue. Having just come from Denver, I can say to you that every man and woman whom I met, in any relation of life, regardless of party, had voted for the opponent of the eighteenth amendment.

We have had some experience in this country with what happens to cowards; they have a short life, but a busy one. When the Whig Party met in national convention at Baltimore in June, 1852, its task was like that of some conventions which will meet next June—to find a formula that would avoid taking any ground as to the fugitive slave law, which was the Volstead Act of that day. So they declared with great solemnity and satisfaction that they had received and acquiesced in the series of acts of the Thirty-second Congress, the act known as the fugitive slave law included, "as a settlement in principle and substance of the dangerous and exciting questions which they embrace; and, so far as they are concerned, we will maintain them, and insist upon their strict enforcement, until time and experience shall demonstrate the necessity of further legislation to guard against the evasion of the laws on the one hand and the abuse of their powers on the other; not impairing their present efficiency; and we deprecate all further agitation of the question thus settled, as dangerous to our peace, and will discountenance all efforts to continue or renew such agitation, whenever, wherever, or however the attempt may be made." Could pussyfooting go further than that?

They did not dare nominate a candidate who was either for the fugitive slave law or against it. So they hunted about until they came upon a respectable, colorless gentleman, of good military record, who had no known convictions on this subject, and they nominated him—Gen. Winfield Scott, of New Jersey. They went to the election. There were 276 electoral votes cast; Winfield Scott received precisely 42 and the Whig Party was never heard of again. Being a Republican, I am commending that example to the attention of some of my associates in the Republican Party. If they desire to write the word "exit" over the hall in which their convention is to be held at Kansas City in June next, they will imitate the Whig Party of 1852.

One question more and I am done. Senator BORAH asked me this question in Boston; it is a perfectly fair question: "Suppose you have your repeal, what are you going to do?" What we are going to do is this: The question is then back where it belongs, in the hands of each of the 48 States. Each State will have that system of legal control which it prefers, and the United States Government has complete control over the interstate-commerce feature of the problem. Statutes are upon the books that have all been upheld by the United States Supreme Court; they would all work perfectly well if the eighteenth amendment were repealed. When that amendment was adopted there were 12 States with 11 per cent of the population that had very strict State-wide prohibitory laws; they have them still; they may wish to keep them. There were 18 States, with 33 per cent of the population, that had restrictive laws which were not of similar character to these prohibitory laws, because they permitted importation and use of intoxicating liquors as beverages. Those States would continue to have such laws, unless they cared to change them. But there were 18 States, with 56 per cent of the population, that did not have these laws. I live in one of those States; so do you. For my part, I should urge by every power I possess the adaptation to our needs and habits of the principles of the Quebec liquor law. I have been in that Province to study it, and I am convinced that for people like our own it represents the most successful, the most progressive, the most advanced method of dealing with this problem, of getting rid of the saloon and abolishing the private traffic in intoxicating liquor, that has yet been reached anywhere. Other people may have other views, but that would be mine.

On the question of civil and political liberty we should then be free to stop complaining and criticizing, and to call upon the young, middle-aged, and old, having had this great measure of their civil and political liberty returned to them, to show themselves worthy of it and to go on to build a great, fine, temperate, liberty-loving, self-controlled people. Take off the hand of the prohibitor and the compulsionist; take off the hand of the bureaucrat, and let us resume our march toward liberty, each man and each woman under self-control and self-guidance.

Mr. Chairman, I have no illusions about the obstacles we meet; we do not meet any very serious obstacles in the way of rational argument. I hear nothing save the abuse of which I gave you some examples; but what we meet chiefly is indifference, stolidity, unwillingness to take hold and help. Among a free, self-governing people that will not do; nobody can save us but ourselves, and this great advance has got to be made by the votes of men and women who never touch intoxicating liquor. [Applause.]

There are not enough people in the United States who habitually use liquor to bring about this reform; it has got to be brought about by total abstainers, who realize that a terrible mistake has been made; that instead of aiding temperance, we have obstructed it; that instead of building character, we have torn it down; that instead of promoting public honesty, we have multiplied political hypocrisy; and that with it all, we have struck a heavy blow at our Government which it is not too late to withdraw and to remedy. We must bring to the minds of these people, men and women, God-fearing, upright, total-abstaining citizens of this country, the meaning of the fight, in legislative halls, in the Congress, and wherever our political representatives congregate. When a man in public life cries out extra loud for prohibition and law enforcement, tap him on the hip. [Applause.] The appeal must be made to the righteous, God-fearing people of this land to remedy this dreadful mistake before it is too late.

My appeal, Mr. Chairman, is to the public sentiment of America. Over yonder, at Ottawa, in Illinois, Abraham Lincoln in his first great debate with Douglas, used these words: "Public sentiment is everything; with it, nothing can fail; without it, nothing can succeed." In the spirit of Lincoln, I appeal to the public sentiment of America, to preserve the foundations, to be true to the faith of the fathers, and once more to return to the path that leads to temperance, to liberty, and to righteousness of public life. [Continued applause and demonstration.]

## NATIONAL UTILITY ASSOCIATIONS

Mr. WHEELER. Mr. President, I present for publishing in the RECORD a proposal by Mr. David Lawrence of a community development advertising campaign, and a memorandum for Philip H. Gadsen, chairman executive committee, Joint Committee of National Utility Associations.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

[Docket No. (commission) Respondent's Exhibit No. 944 in the matter of SR 83. Date, April 26, 1928. Witness, C. J. D., reporter]

JOINT COMMITTEE OF NATIONAL UTILITY ASSOCIATIONS,
*New York City, September 17, 1927.*

Senator JOSIAH T. NEWCOMB,
*New York Avenue and Fifteenth Street NW.,*
*Washington, D. C.*

DEAR MR. NEWCOMB: Inclosed is a copy of the proposal of Mr. David Lawrence relating to a proposed community development advertising campaign.

Very truly yours,

JOINT COMMITTEE OF
NATIONAL UTILITY ASSOCIATIONS.
By J. S. S. RICHARDSON, *Director.*

---

[Memorandum for Philip H. Gadsen, chairman executive committee, joint committee of National Utility Associations]

SUGGESTED PROGRAM OF EDUCATIONAL ADVERTISING ON THE PUBLIC-UTILITY INDUSTRY

### I. LOCAL RESPONSIBILITY

The theme of this campaign is the local company, how it has developed, and what it is doing to serve its community. The argument would be so constructed as to show by contrast that no other system of regulation or ownership would achieve as good a result. Since Federal regulation is in the offing, the purpose of this campaign would be to prove how interwoven is the development of the utility with the life of the community and how the present efficiency is due to the localization of the industry.

### II. COMMUNITY DEVELOPMENT

Every utility is interested in the development of the community and in aiding in any program which tells the rest of the country what are the advantages of a particular city, community, section, or State. Community advertising has been growing rapidly in recent years. In fact, last year more than 135 different cities conducted advertising campaigns in various national publications to attract new industries and stimulate local development. What, therefore, is more apropos than the signing of a local company of an advertisement which discusses objectively the merits of the particular city, section, or State in which that utility is located. It is a natural thing for a local company to do, and hence the justification for an advertisement of this kind in a national publication.

### III. THREE PAGES A YEAR

Each local company would sign a full-page advertisement, which would appear three times during the year. No other signature would appear on the advertisement, and the local company would be in a position to state to the whole country the merits of a particular community, section, or State. The effect of this would be twofold, namely, to cultivate good will in the local community for the utility and at the same time to do a practical job of attracting the attention of business executives and others who are interested in the advantages of a particular community.

### IV. COPY FOR THE ADVERTISEMENTS

While the forepart or the theme of the advertisement would be the community, the argument backing it up would be doctrine vital to the problem of possible Federal regulation. In other words, it would be shown how, as each community developed, men of vision were compelled to look ahead and judge the needs of the community, how the

growth of a city or community depended upon efficient utility service, and how all the elements which make for the prosperity of a community have grown out of efficient planning in community development. Thus it would be possible to tell the story of the public utility and its service to the community. This will open up opportunities to explain central stations, dependence on near-by communities, assistance to small communities by reason of interconnection, and the merits of holding company organization, through which alone local community development was really made possible.

State regulation as against Federal would be continuously emphasized, and there would be ample opportunity to show how private initiative and incentive was the governing influence in the development of the communities, thus erasing in the background any thoughts that might be lurking there on municipal operation. Also, since the securities of local companies are held throughout the country, much of the copy could be devoted to show how the money actually could not have been raised from other parts of the country except by reason of the soundness of local operation. This gives another general theme for the advertisements themselves, namely, a report to stockholders all over the country who are interested in the soundness of the utility operation in the local communities.

There are other points, of course, which would be worked into the story so that the series of advertisements would present the effect of a serial in doctrine but not necessarily connected the one with the other.

Copy would be coordinated at one point in New York, and the draft approved in the public-relations office of the joint committee. The copy would be sent, of course, to the local company and a representative would consult with the local company so as to get the essential points in its story as they relate to the national doctrine.

V. CONTINUITY OF COPY

For 52 weeks throughout the year there would appear every week three full pages of copy telling a connected story, giving by constant example from the local companies practical illustrations of what is meant by local responsibility as contrasted with any other system. The name of no one company would appear more than three times during the whole year, so that there would be no possible criticism on the ground that any one organization or institution was conducting a general campaign. The art work in the advertisements would be different, different styles of type would be used, different methods of approach to the same argument would be employed; the community idea would be subject to many variations and the whole plan worked out so that the cumulative effect on the mind of the reader would be that the public-utility problems of to-day are absolutely and entirely local, and that any other method of handling them would mean chaos and confusion as well as serious interference with community development of our prosperous cities and towns. The plan, therefore, involves participation by 52 different local companies, each of whom signing three pages. This would mean a total of 156 full pages for the year, or an average of 3 pages a week.

VI. BENEFITS TO THE LOCAL COMPANY

Each local company, by having a full page three times a year—that is, at least three or four months apart—would have an opportunity to mail marked copies of the publication in which the advertisement appears to at least 20,000 of its best customers, thus showing the people in that particular community what a fine thing the utility has done to make that city or town or section better known to the rest of the country. The extra copies, cost of mailing lists, addressing, etc., is included in the cost given below.

VII. COST OF PLAN

Each of the 52 local companies would agree to pay $75 a week for a year. This amount would cover every cost, including the preparation of the copy, art work, cost of publication, cost of mailing extra copies, etc. Contracts would be signed by the local companies who would be billed directly and would pay this sum out of their local budgets. This would obviate the necessity of any pooling of funds or the existence of any large advertising fund, which is often objectionable from many standpoints.

VIII. PRACTICAL OPERATION

A representative of the publication would devote his time entirely to carrying on this plan, signing up of necessary contracts with each local company, gathering the essential ideas for the copy, and seeing to it that the proofs are sent to the local company before the advertisements bearing the name of the local company appear.

All costs for traveling expenses, salary, etc., of the representative of the publication engaged in carrying out the plan are to be borne by the publication out of the $75 a week received from each local company.

IX. SELECTION OF COMPANIES

The joint committee, through its affiliations, holding companies, etc., will provide a list of 52 key companies to which an indorsement and recommendation of the plan would be sent and to whom the representative of the publication would go for the consummation of the details.

X. WHY THIS COPY SHOULD APPEAR IN THE UNITED STATES DAILY

First of all, the United States Daily must not be looked upon as a Washington newspaper. The United States Daily is national in scope and reaches important people in more than 6,000 different communities from coast to coast. It has a circulation in excess of 35,000. It has more circulation in California than in the District of Columbia, and more in New York City than in Washington.

The United States Daily is read by every member of the Senate and House and there are abundant letters showing that they read it just as closely when they are away from Washington between sessions of Congress as when they are in Washington. This is because the United States Daily is the only link between the executive and the legislative branches of the Government—it affords the only way by which the Members of the House and Senate can keep track of the many important things affecting him which are going on in the vast machinery of the executive establishment.

The United States Daily also reaches the important officials in the executive branch of the Government in its commissions and bureaus as well as the Federal judiciary generally.

Apart from this, the United States Daily reaches more than 70 per cent of the members of the State legislatures of the 48 States, members of the regulatory commissions of the several States, the editorial writers of practically every important newspaper in the United States, business men and bankers, educational institutions, etc.; in fact, all classes of intelligent people to whom the story of public utility industry should be constantly told.

The United States Daily is held in high esteem because it is a fact newspaper, containing no editorials or interpretation of its own, and, being absolutely nonpartisan, it carries an extraordinary amount of prestige and influence. The advertising in its columns is of a dignified character and it so happens that because of its national scope and the fact that it reaches so many different business executives a great deal of community advertising is already scheduled for appearance in the United States Daily. City campaigns will appear in the United States Daily throughout the year, thus blending with the plan outlined above as the basis for the public-utility story. It is important that the business executives outside of Washington, including many who are not in the utility industry at all, should know the soundness of the industry and should be able to throw off implications which may come to them from time to time concerning the future of utility securities.

The cumulative effect of this advertising campaign should be not only to convince Congress that the utility problem is a local one—thus discouraging interference—but to emphasize to the States that the utilities should be kept in their own hands, and to explain to the editorial writers of the country just why the utility problem is essentially a local one and that it is to their interest to keep it local. All these objectives can be successfully combined by having the copy coordinated at one place, although the funds are provided separately, and the actual localization of the copy is achieved by sending an individual representative to consult with the local companies in question.

Mr. HARRISON subsequently said: Mr. President, earlier to-day the junior Senator from Montana placed in the RECORD a memorandum purporting to be a proposal for advertising in the United States Daily, and he attributed the authorship thereof to Mr. David Lawrence. I ask that there be printed in the RECORD along with that memorandum a letter sent yesterday to the Federal Trade Commission by Victor Whitlock, director of advertising of the United States Daily, which specifically states that neither Mr. Lawrence nor any officer of the United States Daily is responsible for the views expressed in the memorandum, and that according to its rules the United States Daily submitted its advertising columns to both sides in the utility controversy and that the United States Daily assumes no responsibility for the views expressed in its advertising columns.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

[Letter of Victor Whitlock, director of advertising of the United States Daily, to the Federal Trade Commission, placed in the record of the public-utilities inquiry by the commission on May 2]

APRIL 30, 1928.

FEDERAL TRADE COMMISSION,
*Washington, D. C.*

GENTLEMEN: I notice that some incorrect press reports have been published concerning a memorandum which was inserted as an exhibit in your proceedings of Thursday, April 26.

In the first place, the memorandum which was inserted was prepared by our advertising department and contains a solicitation for advertising to be placed in the United States Daily. Press reports have erroneously attributed the views in the memorandum to David Lawrence, president of the United States Daily. That memorandum does not represent the views of David Lawrence, nor does it represent the views of our newspaper, which has no editorial page and expresses no opinion of its own.

I am the responsible head of the advertising department of the United States Daily, and the memorandum which is in your files, containing an advertising solicitation, was prepared in our advertising copy department as a summary of various ideas taken from pamphlets, advertisements, documents, etc., issued by various utility companies. It was specifically stated in the memorandum that the advertisements were to be signed by the various utility companies, so that no responsibility for the various views expressed would attach to anyone but the companies who signed the advertisements.

A good advertising solicitation is not complete unless it includes the arguments which the advertiser himself should say over his own signature in the medium to be used. But the furnishing of such suggestions is the regular work of an advertising department. It does not in any way commit the publication to the views to be stated. For instance, in a political campaign, a Republican newspaper may accept advertising from a Democratic candidate without in any way subscribing to the views of that candidate.

In line with its rules, the United States Daily, through its advertising department, solicited advertising from the National Popular Government League, Boulder Dam Association, constituting those opposed to the utilities, and also made suggestions with respect to copy. In fact, in soliciting the National Popular Government League, our representatives pointed out that display advertisements of their pamphlets could be made by the National Popular Government League, which claimed that a power lobby existed in Washington and which argued the merits of municipal ownership.

Our advertising columns are open to all advertisers at regular rates, and we endeavor to give both sides in a controversy equal opportunity to use white space. This is all the more important in a newspaper like ours, because we do not accept for publication any news releases or, in fact, any other announcements, except from Government sources.

I notice one press report to the effect that this memorandum was a proposal to conduct an advertising campaign for the Joint Committee of National Utility Associations. This is erroneous, for we did not ask the association to appropriate money for an advertising campaign in our paper. We sent the memorandum to the joint committee in order that the national headquarters of the utility industry might be familiar with the solicitation which was to be carried on in other cities by our representatives. It is a well-known fact that when soliciting advertising from members of a trade association or organization, such solicitation is frequently objected to by the national headquarters, especially if they are not familiar with the project. If they favor it, they usually furnish data as to their members or letters of indorsement. In this case the solicitation was to be made to 52 of the largest local companies with the hope, but no assurance, that all would participate. But the joint committee did not indorse the idea.

We, however, believe firmly in the use of white space for the telling of a story to the public by institutions and industries engaged in public controversies. This form of advertising has increased in recent years in all American newspapers, because it is recognized as a legitimate and open and aboveboard method of presenting to the people the merits of public questions. We have solicited advertising from various organizations engaged in controversies and expect to continue to do so in the future, but we wish to make it clear that we solicit advertising from all sides of a controversy and the views as expressed in our advertising solicitations and advertising copy which is to be signed by the prospective advertisers are not in any way the expression of an opinion on the part of our own newspaper or any individual or officer connected therewith.

Sincerely yours,

VICTOR WHITLOCK,
*Director of Advertising.*

## IMPORTS OF PLYWOOD

Mr. WALSH of Massachusetts. Mr. President, I have recently had some correspondence with the United States Tariff Commission with reference to recent increases in imports of plywood. The information transmitted to me is in the form of a brief table showing imports for the year 1927, and the increase in imports for January and February of this year, together with other information with respect to this subject, which is now being investigated for the purposes of section 315 of the tariff act of 1922.

I ask that this letter from the manufacturing company who called the matter to my attention and the letter and table of the United States Tariff Commission be inserted in the CONGRESSIONAL RECORD and referred to the Committee on Finance.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

ATLAS PLYWOOD CORPORATION,
*Boston, Mass., April 23, 1928.*

Senator DAVID I. WALSH,
*United States Senate, Washington, D. C.*

DEAR SIR: We are manufacturers of plywood used in making packing cases. We need your assistance in helping us to meet a problem which has become quite serious, and which is now threatening the successful existence of the plywood industry in this country. Poland, Finland, and Russia are exporting to this country constantly increasing quantities of plywood and veneers.

Through the Plywood Manufacturers' Association a petition has been filed with the United States Tariff Commission asking that the present duty be increased. From the information at hand the labor wage in the above foreign countries is on an average of about 10 per cent of what is paid in American plants.

The present ad valorem duty based on foreign-port price is delivering this product in New York City at prices that are less than it costs us to produce. The present duty is 33⅓ per cent on the f. o. b. foreign-port price. We should have a tariff of 100 per cent on the f. o. b. foreign-port price or 50 per cent on the American selling price. This because we can not and do not compete in foreign markets, and must, therefore, depend entirely on our domestic market.

For your information and to give you an idea of the important place plywood in the United States plays we would state that the reports from 70 plants show:

| | |
|---|---|
| Total production of plywood, 1926 | $47,981,196 |
| Total pay roll, 1926 | 14,156,703 |
| Total employees | 11,140 |

As all of this corporation's manufacturing plants are located here in New England, we naturally have to bear the brunt of this foreign competition due to proximity to ports of entry.

Any assistance which you can render us in supporting our petition before the Tariff Commission will be appreciated.

Very truly yours,

E. W. SONCY, *Treasurer.*

---

UNITED STATES TARIFF COMMISSION,
*Washington, April 28, 1928.*

Hon. DAVID I. WALSH,
*United States Senate, Washington, D. C.*

MY DEAR SENATOR WALSH: Reference is made to your letter of April 23, inclosing a letter from the Atlas Plywood Corporation, Boston, Mass., with respect to an investigation of plywood for the purposes of section 315 of the tariff act of 1922.

Import statistics of plywood were combined with veneer up to June 30, 1927. For the six months July 1 to December 31, 1927, the total value of plywood imports was $34,399. The value of the imports in January, 1928, was $11,960, and in February, $10,711. Detailed figures by countries are shown in the inclosed table.

Exports of plywood during the last three calendar years have averaged $741,000 annually.

The Plywood Manufacturers' Association estimated the total sales of 70 domestic plants in 1926 to have been approximately $48,000,000.

A preliminary study of the situation and the examination of invoices of imports at New York indicate that the imported plywood is of a relatively low grade, not directly comparable with grades produced in the United States, and that it has been sold at a price several cents per square foot less than the nearest comparable grade of domestic plywood. The commission is continuing its study with a view of obtaining all the pertinent information available before it takes definite action on the application.

The problem offered the commission, should a cost investigation in the United States and foreign countries be instituted, would be a complex one. Plywood is made of many species of wood in a multiplicity of thicknesses, plys, grades, sizes, faces, rough and sanded, which do not readily lend themselves to a common basis of comparison.

The letter addressed to you by the Atlas Plywood Corporation is reinclosed for your files.

Very truly yours,

THOMAS O. MARVIN, *Chairman.*

*Imports of plywood, by countries, July–December, 1927, and January and February, 1928*

| | July–December, 1927 | | January, 1928 | | February, 1928 | |
|---|---|---|---|---|---|---|
| | Quantity | Value | Quantity | Value | Quantity | Value |
| | *Sq. feet* | | *Sq. feet* | | *Sq. feet* | |
| Germany | 270,951 | $7,105 | 19,790 | $445 | 67,291 | $1,461 |
| Finland | 523,719 | 15,643 | 27,585 | 1,488 | 193,007 | 4,340 |

## PORTRAIT OF CHIEF JUSTICE MARSHALL

Mr. BRUCE. Mr. President, never since I have been a Member of this body have I asked that any committee be discharged

from the consideration of a bill; but it becomes my duty, as I see it, reluctantly to do this now.

As long ago as December 13, 1927, a joint resolution was introduced into this body by me authorizing the Joint Committee on the Library to purchase a portrait of Chief Justice John Marshall. After that joint resolution was introduced I addressed a letter to every member of the committee and courteously requested him to do me the favor to give the joint resolution his attention as soon as he could conveniently do so. Then I had the portrait brought over from Baltimore—it is owned by a citizen of Maryland, Mr. Thomas Marshall Smith, a descendant of Chief Justice Marshall—and had it conveyed to the committee room of the Committee on the Library, so that it could be inspected by each and every member of the committee. Then I arranged for a hearing at which the authenticity of the portrait, if required, could be duly established.

A very considerable degree of interest in it was manifested by the members of the Supreme Court of the United States; and, if I am correctly informed, it has been inspected by at least some of them. I happen to know that one of them has evidenced an extraordinary degree of interest in it.

Mr. DALE. Mr. President, will the Senator yield?

Mr. BRUCE. Yes; I will say to the Senator that as retaliation is entirely foreign to my nature, I will do so with pleasure.

Mr. DALE. I do not understand the Senator's reference.

Mr. BRUCE. The Senator will recollect that when I asked permission to interrupt him yesterday he felt that it was his right to decline; but I gladly yield to the Senator.

Mr. DALE. I was simply going to suggest to the Senator, in view of his many protestations that he is interested in the retirement bill, that we are very anxious to get it up this morning.

Mr. BRUCE. I have not the slightest objection to its being brought up. I had almost completed the remarks I was making in reference to this matter of the portrait; and I should not have made them at all if I had known that the Senator had any intention of bringing up the retirement bill this morning.

Mr. DALE. That is my assumption, and that is why I asked permission to make this statement to the Senator from Maryland.

Mr. BRUCE. I yield at this point, at the request of the Senator from Vermont; but I notify the Senate that as soon as I have the opportunity again I shall bring up this matter of the portrait of Chief Justice Marshall.

Mr. DALE. Mr. President, allow me to say to the Senator from Maryland that I am not in order now. The Senator from Maryland is not in order. I did not have any disposition to retaliate, as he uses the phrase, by calling for the regular order. I simply wanted to suggest to him that the joint resolution to which he refers is not pending, and leave the matter to his own judgment; that is all.

Mr. BRUCE. The Senator, I suppose, expects now to bring up his retirement bill, if he can, does he not?

Mr. DALE. Yes, sir; just as soon as I am in order.

Mr. BRUCE. The Senator expects to do so now? Then I yield the floor to the Senator from Vermont.

### RIKER MISSISSIPPI SPILLWAY PLAN

The VICE PRESIDENT. The Chair lays before the Senate a resolution coming over from a preceding day, which will be read.

The Chief Clerk read Senate Resolution 217, submitted by Mr. FRAZIER on the 1st instant, as follows:

*Resolved*, That Maj. Gen. Edgar Jadwin, Chief of Engineers, United States Army, having replied to a recent request of the Senate for "an immediate report upon the merits of the Riker Mississippi spillway plan for flood control" by a statement solely presenting his opinions upon its demerits without one word respecting its merits, be hereby again requested to report more specifically upon the merits of the proposed plan for flood control.

Mr. CURTIS. Mr. President, I understand that the Senator from North Dakota desires that the resolution shall go over without prejudice.

The VICE PRESIDENT. The resolution will go over without prejudice.

The morning business is closed.

### RETIREMENT OF CIVIL-SERVICE EMPLOYEES

Mr. DALE. I move that the Senate proceed to the consideration of Senate bill 1727, to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof, approved July 3, 1926.

The VICE PRESIDENT. The question is on the motion of the Senator from Vermont.

The motion was agreed to; and the Senate, as in Committee of the Whole, resumed the consideration of the bill.

### BOULDER DAM

Mr. SMOOT. Mr. President, it is very seldom that I call the attention of the Senate to any charge that may be made against me. I am going to take a few moments of the Senate's time this morning just to refer to two questions growing out of the remarks I made on Boulder Dam.

The Washington Herald this morning, in suggesting why I was violently opposed to the bill in regard to Boulder Dam, says:

> Let's take a look at REED SMOOT. Who is he? Who's Who for 1928 says that Senator SMOOT is president of the Electric Co. of Provo, Utah, a coal and iron town.

I simply want to say that there is not a word of truth in that statement. In 1900, I think, Mr. L. L. Nunn, Mr. C. E. Loose, and myself hired power from the Telluride Power Co. and put a pole line into a few of the streets of the little town of Provo. We paid the power company for the power, and after a while the town grew, and we had educated the people at that time to use electric light. We never drew a single, solitary penny from it as dividends but lost money for years. I think this occurred in 1902, before I came to the Senate; we sold it out.

I care nothing about that, Mr. President; but what I really rose to speak about was this.

I find in the same paper the following statement:

> ODDIE, of Nevada, asked PHIPPS if he had heard the rumor that "an earthquake" had damaged the mountains which would form the natural basin for the great dam.
>
> "I have never heard of such a report, and I believe there is absolutely no foundation for it," PHIPPS replied.
>
> "There is such a rumor," said ODDIE, "and I agree with you that it is entirely in error."

Mr. President, I want to say to the Senate of the United States that there is not a single quotation that I have made but that I have, and can get in a few minutes if Senators want it, the exact place where it was stated, and the exact words that I quoted.

I quoted from Mr. W. G. Clark, consulting engineer, New York City, N. Y., an associate of General Goethals during his lifetime. This is what he says in the House hearings on House bill 11499 and Senate bill 727:

> The dam proposed by the Reclamation Service would give an average head of 500 feet and would generate between 600,000 and 700,000 horsepower. It is possible at this location to construct a dam of unprecedented height—a dam with a crest 1,064 feet above the present water surface and 1,200 feet above bedrock.
>
> The dam which I am proposing is a rock-fill dam, constructed with a steel diaphragm. This dam has been designed after many years of study. I was in Boulder Canyon when an earthquake occurred. At that time there was a decided movement of the north wall of the canyon, but there was no movement of the south wall. Thousands of tons of rock fell along the north wall of the canyon, but there was no fall along the south wall. I was camped on the south side of the canyon; and if it were not for the fact that I could see and hear the rock falling on the other side of the canyon, I would not have known that an earthquake was in progress.
>
> Mr. RAKER. The north wall is on the right-hand side going downstream?
>
> Mr. CLARK. Yes, sir. Some years later, in 1913, I believe, an earthquake occurred which affected the Imperial Valley. I was in southern California at the time, so went immediately to Boulder Canyon. The same condition had been repeated. I found that thousands of tons of rock had been shaken from the north wall of the canyon, but the south wall remained undisturbed.

I could go on and read his whole testimony; but I again say to the Senator from Nevada that I am not in the habit of standing upon the floor of the Senate and claiming to make a quotation from any one without getting the exact words; so there is some truth in it, notwithstanding the statement of the Senator from Nevada.

Mr. ODDIE. Mr. President, I refer to the quotation the Senator from Utah has just referred to. Mr. Clark, to whom he refers, stated that he was in Boulder Canyon when an earthquake, as he says, occurred. He said:

> At that time there was a decided movement of the north wall of the canyon, but there was no movement of the south wall. Thousands of tons of rock fell along the north wall of the canyon, but there was no fall along the south wall. I was camped on the south side of the canyon; and if it were not for the fact that I could see and hear the rock falling on the other side of the canyon, I would not have known that an earthquake was in progress.

Mr. President, could any child make a more foolish statement than that—that an earthquake occurred on the other side of the canyon, and he was within a few hundred feet of it and could not feel it?

Mr. President, those canyon walls rise for many hundreds of feet almost precipitously; and in the regular order of nature some of the rock in those walls is liable to fall, not necessarily as the result of earthquake but by gravity; and possibly some of the loose portions of the canyon wall might have been in suspense, so that even the weight of a bird might have brought down those rocks. Mr. Clark does not prove that there was an earthquake there.

Furthermore, Mr. President, when the Senator from Utah commented on this matter on the floor of the Senate a few days ago he stated:

> God knows there is danger enough without trimming it down; for I say now that if that dam is built, with all the water back of it, and an earthquake comes, and it goes out, it will be the greatest disaster that has ever happened in all the world; and the poor people in Imperial Valley will be the very first ones that will be murdered.

Mr. SMOOT. I say so yet.

Mr. ODDIE (reading):

> On page 210 of the hearings on H. R. 11449, February 21, 1923, Committee on Irrigation of Arid Lands, House of Representatives, I find that the committee of the House was warned by Mr. W. G. Clark, consulting engineer of New York City, that this dam was to be built in an earthquake area and that a masonry dam such as proposed would therefore be inadvisable and subject to the danger of destruction by earthquake.

Mr. President, I repeat what I said yesterday, that I do not believe there is any truth in the statement made by Mr. Clark. I believe that he was drawing on his imagination. He had a method in opposing this legislation. I favor this legislation, the Swing-Johnson bill, very strongly; but that is beside the point. I am arguing now on the state of facts that exists. It never has been proved that an earthquake occurred in that canyon; and I believe that a statement of that kind is doing material harm to a piece of legislation that is of the greatest importance and life-saving in character.

Mr. SMOOT. If the Senator from Nevada is satisfied with that statement, I am perfectly willing that the Senators themselves shall judge as to whether one of the greatest engineers in this country is correct in his statement, or whether the supposition of the Senator from Nevada is correct.

Mr. JOHNSON. Mr. President, I do not desire to enter into the discussion which has just ensued, because, in common with those who are interested in the bill that the Senator from Vermont has in charge, we were to let him have this morning in the endeavor, during the morning hour, to have that bill passed. However, I want to make it plain that what has been stated by the Senator from Utah I have here the means of answering, and the answer will be complete, both from the engineering standpoint and from every other standpoint, too. When opportunity presents itself hereafter that answer will be made in detail. I do not respond now solely because I desire the Senator from Vermont to have the opportunity to bring his bill before the Senate.

### GOV. ALFRED E. SMITH

Mr. HEFLIN. Mr. President, I have been absent from the Senate a couple of days, and during my absence a presidential primary election was held in California. I observe that less than half of the Democratic voters of California turned out and availed themselves of the opportunity of expressing their choice for President. That is a bad sign, I want to say to my Democratic colleagues. When half of the party refuses to go to the polls it looks as if they are afraid that somebody would be nominated whom they will not support.

I trust that the committee created by the Senate to investigate corruption in elections will get busy. I want them to summon Governor Smith's managers from California, and the managers of the various other candidates, Democrats and Republicans. I read in the Senate the other day a letter from a citizen of California who said they must be spending millions. I have observed the tactics employed by the Smith supporters in the various States, and they are very reprehensible.

I have just returned from the State of North Carolina, where I had two of the greatest public meetings I have ever addressed—9,000 people at Winston-Salem and 3,000 at Durham. I want to say to the two able and faithful Senators of the Old North State that the Democrats of that State are with them against Governor Smith, with them and their governor, and with their congressional delegation. I believe all of the delegation but one is opposing him.

I recall that a little while back the Smith people misrepresented the Senators from North Carolina and published all over that State that those Senators had ceased their opposition to Governor Smith and were going to acquiesce in his nomination. They both repudiated that statement, saying they had not ceased to oppose Governor Smith, and would not cease to oppose him, giving out strong statements as to why he should not be nominated.

Mr. President, I have never seen just such a situation. The best Democrats in the United States now declaring openly that they would not support the Tammany candidate if he were nominated. In the face of that they are using tremendous sums of money, a slush fund, I think perhaps the largest ever used in any one man's campaign, organizing the precincts and the counties and the districts and the States at tremendous cost. They are doing that in North Carolina, moving heaven and earth to get that nomination, when Democrats who never scratched a ticket are openly declaring that if Governor Smith is nominated they will not vote for him; when Democrats are pointing out in advance that it would be hard to carry certain Southern States for him. Even in the Gibraltar of Democracy stalwart Democrats are giving notice in advance that they will not have this man from Tammany crammed down their throats.

Tammany is perhaps the most corrupt political organization under the sun. Grover Cleveland, great Democratic President, denounced it and repudiated it. Bryan, the great commoner, denounced it all over the country. Woodrow Wilson, one of the greatest Presidents who ever sat in the White House, drew a terrific indictment against Tammany. He denounced and repudiated Tammany.

Graft and corruption are intimately associated with Tammany history, and out of that Tammany is coming a man now who demands that he be placed at the head of the hosts of Democracy in the Nation. Senators, we Democrats have fallen upon strange times.

I recall in 1924 when Governor Smith and his Roman Catholic political machine in New York were in action, his followers were openly saying that if McAdoo were nominated they would not vote for him. What else did they do? They lugged issues into the convention that helped to defeat the Democratic Party. They bolted John W. Davis after he was nominated, and Tammany gave Coolidge in the city of New York nearly as large a majority as it gave to Smith. There was a deal between the so-called Democracy of Tammany and the Republican national machine. They bartered away national Democracy in order to elect Governor Smith and to dispose of young Teddy Roosevelt. They knew that if they elected him governor he would be elected again in 1926 and would be a candidate for President in 1928, so the Republicans who did not want Roosevelt traded with the Tammany bunch and they got rid of Roosevelt as a presidential candidate and they succeeded in carrying the State of New York by nearly a million majority for Coolidge and in putting Governor Smith over by about 100,000.

Senators, can we conscientiously give our support to the nomination of a man who has thus betrayed the Democratic Party? They bolted the party in 1916 because Woodrow Wilson would not go to war with Mexico to restore the Pope to power there. They bolted Cox in 1920; they bolted Davis in 1924. Three times out of the three last presidential elections they have betrayed the Democratic Party of the Nation. Yet now there are some Senators who are quietly conniving, perhaps, with that crowd to foist Governor Smith upon the Democracy of the Nation, and in the face of truths that will not down. Democrats of the South and the West and the North, men and women, are saying that if he is nominated they will not vote for him. Then why are they seeking to tie the Democracy of the Nation to this Tammany body of death in advance when we know that certain and overwhelming defeat awaits us?

I am frank to tell you that I do not believe Governor Smith, if nominated, can carry 12 States of the Union. I do not think he could carry New York for President, or begin to, because he has not anything to trade on in that race. As a candidate for governor he could swap off Democratic votes to the Republican national machine and get Republican votes to help him be elected governor, but when he runs for President he has not anything to trade on; he is running, then, for the thing that the Republicans were trading for when they were getting Democrats to help them elect a Republican President.

What is the truth about this California victory of Smith's? His fight was led by two of his close brethren in his church, Senators Phelan and Dockweiler, and they are the ones who are leading and will go to the convention at Houston. What is he doing in these little States that have not a handful of Democrats in them, no chance to elect the party ticket in those

States, and in some instances it has been charged that they are an aid society to the big Republican interests, and that they frequently help to select our nominees?

We have not many Democrats in Wisconsin, and what happened up there? Senator REED, I am informed, polled 35,000 votes, but Governor Smith's church brethren took the delegation for him, and Smith polled less than 8,000 votes.

Senators, how are you going to get around all this skullduggery business in our Democratic politics? Put on top of that the fact that Governor Smith is a Tammanyite and he can not shake that off. Take into consideration the fact that he is a wringing wet, he is a nullifier of the Constitution of the United States, and he has withdrawn New York from the Union so far as the eighteenth amendment is concerned. He stands on the side of the whisky interests, and the New York World is demanding that he come out and declare himself where he belongs. Then they insist on flaunting him in the face of the great moral Democratic forces of the Nation and tell us we have to take him.

I want to tell you to-day that he is not going to be nominated. He may get 500 votes, or 550, or 600; he will never get 734. As they said at the gates of Verdun, "They shall not pass." I do not hesitate to say I think any Republican can beat him 10,000,000 votes if he is nominated.

Why does the virile Democracy of the Nation, the Democracy whose record is white as the driven snow, now surrender its convictions and go crawling over to Tammany to pick up a candidate to be leader of the great party of Jefferson?

Suppose Governor Smith were nominated; what would happen with Mexico and Nicaragua? He never has told what he would do with regard to Mexico. He has been challenged on this floor by me, and newspapers have asked him, "What is your position?" He is as silent as the tomb. Suppose the Pope should come up to him and tell him that the Holy Father wanted him to take the Army and go over there and relieve the "faithful." What do you reckon Alfred would do? What do you think?

I saw that some of his followers said, when California acted yesterday, "That settles it; that settles it." It has not settled it by a good deal; not by a good deal!

They went down into North Carolina and tried to inaugurate a fight against the two Senators of that great State. They brought great pressure to bear on them to lie down, but the people are with the little giant, the leader of the Democracy of North Carolina, who led them victoriously in 1898 when they cleaned up the last remnant of the scalawag and carpetbagger and gave back to North Carolina home rule and self-government. They believe in their Senators and their delegation and their governor, and they are not for Governor Smith.

Yet these little States that have a very few Democrats, where 55 and 60 per cent of them are Roman Catholics, and where the Democratic machinery of those States is in their hands, are pulling off these stunts, rolling up these Smith delegates, and then telling the great, unterrified Democracy that they have got to fall in line for Smith.

A New York State officer, Tremaine, a member of Governor Smith's cabinet, went down into Virginia and deliberately made the threat to the Democrats of that State that if they did not fall in line and support Smith's nomination they would punish them in Congress by voting against measures that they wanted passed that would help their section.

Senators, think of that. Think of the Tammany tactics that are being brought out upon the stage where the world can see them, threatening the very stronghold of the party, threatening that section that goes Democratic year in and year out. The party there has held the line when it has been lost in every other section, and now they come with the threat, and what did the Irish World and the Roman Catholic political papers and others say?

They say, "If you do not nominate him, 3,000,000 Catholics will bolt." Has our party lost its courage? Has it ceased to resent and resist such miserable tactics? Think of that bunch parading themselves up and down the line of Democrats in the country, like old Goliath defying the armies of Israel, and saying, "If you do not take Governor Smith we are going to bolt the ticket."

I have said before, and I repeat, "That is nothing new for you. You have done it in every presidential election since 1916, and including 1916." Now they come with these tactics and with corrupt money. I want to suggest to the Senator from North Carolina that they are using a lot of money down there, and I hope he will have their managers summoned before this committee. I want them to tell who are paying the precinct leaders, the district leaders, the county leaders, and the State leaders. It costs a lot of money, and they spent a lot of it in California. And yet out of a party vote in California of over 400,000 Governor Smith only got 132,000. Does that look like he is a strong and popular candidate? Two hundred thousand Democrats stayed away from the polls. They declined to vote. Hoover, with nobody running against him to stir up interest and bring out his full following, polled 500,000 votes and Governor Smith polled less than one-fourth of the number that Hoover polled, Hoover being without opposition to bring out his real strength. What are we coming to in the Democratic Party?

I am satisfied that Governor Smith's vote in California represents the vote of the Roman Catholic political machine.

Mr. SIMMONS. Mr. President, may I suggest to the Senator that Governor Smith's vote in California was just 18 per cent of the vote polled by the two parties?

Mr. HEFLIN. Eighteen per cent! And they stand up and say he is the only man who can be elected. Senators, I owe it to myself, and I owe it to my country, and I owe it to my party to try to warn against the dangers and pitfalls that confront us at this time. They have been interrogating Democrats like myself, who never have scratched a ticket. I have bared my breast to the battle fire of the enemy in every presidential campaign since 1904, and yet they had me interrogated. They wanted to know if I would vote for him if he was nominated. I told them that I would cross that bridge when I got to it. What right have these party deserters and betrayers, these leaders of the Roman Catholic party, to question a Democrat in the present situation?

That is the Tammany plan now, going around and asking Democrats, "What will you do?" And I ask, What did Tammany do? They bolted the party in 1924 and did everything in their power to destroy it. They rolled up a tremendous majority against it in New York, where Governor Smith was fortunate enough to climb up, by trick and trade, to the governorship, to keep him in waiting to be their Roman candidate again for the Presidency in 1928.

But they say he is the only man who can be elected. He can not be elected. His candidacy will hurt the Democratic Party, hurt it worse than any campaign that has come in my day, and I am warning against it. I want Senators to take note of what is happening and what may happen. I want to bring to their attention something very interesting that they have never heard of before.

Mr. President, a few days ago in the Senate I criticized Mr. Hoover for changing the segregation plan put into effect in the Department of Commerce by a Democratic administration, under which white girls and boys worked in offices separate and apart from the negro employees. Mr. Hoover issued an order abandoning the system which separated the whites and negroes. He ordered them to be placed side by side in the various rooms.

Senator Hoar, of Massachusetts, one of the ablest of all of New England's Senators, said, in substance, in the last public speech that he ever made, that the statesmen of the South knew more about this negro problem and better how to handle it than the statesmen of the North, who were far removed from the great bulk of the negro population.

Mr. President, we of the South have this problem with us always and we are trying to solve it to the good of both races—to the highest and best interest of all concerned. The white man who suggests social equality and race amalgamation is seeking to use the negro for some sordid and sinister purpose. He is a wolf in sheep's clothing and the deadly enemy of both races. He is advocating the worst solution possible, and in doing it he is holding out false hope to the negro and putting dangerous thoughts in the heads of the very worst negroes of the race. And these thoughts express themselves in negro assaults upon white women and they result in the execution of the brutes who commit the assaults. And they produce race hate and bitterness. Then come race riots and bloodshed. So the politician, Democrat or Republican, who will condone and encourage the teaching and practice of things that are harmful, degrading, and dangerous touching the sound, sensible, and proper relation of these two separate and distinct races is an undesirable citizen and a dangerous enemy to both races, for his contemptible conduct will bring nothing but trouble to both.

The South believes that the white race is superior to every other race under the sun; that as one star differs from another star in glory, so one race differs from another in right to rule.

The South believes that in the firmament of human affairs in America the white man is the sun and all other bodies are held in place by his majesty and power. The South is established in this faith, and upon the Ararat of this principle she has rested the ark of her social and civic covenant.

The South points with pride to her great treasure—her priceless jewel of beautiful, splendid, and spotless womanhood—and the curse of God Almighty will rest upon the southern white man who will not protect and defend it from African in-

sults and assaults. Those mean and selfish white men who pretend to think and who boldly assert that they are in favor of race amalgamation and social equality care nothing for the well-being, safety, and happiness of the white women of the South. They are aggravating and creating trouble in the race problem in the South and encouraging attacks by brutal negroes upon white women in the South and elsewhere. They do not understand or they have no sympathy with us regarding this serious problem. They are walking with firebrands amongst powerful combustibles, and they are sowing dragons' teeth in the path of the white women of the South and in other sections of the country. No man who is willing to barter the honor and integrity of the great white race and subject its women to insults and assaults and drag the banner of white supremacy in the dust in order to obtain negro votes to elect him to office is entitled to receive the votes of the white people of the South or of any other section of our great country.

I have in mind a case in the South where a white man and his neighbors were being tried for lynching a negro who had assaulted and murdered the white man's wife. And during the trial he admitted that he had shot the negro who had assaulted and murdered his wife, and with tears in his eyes he turned to the judge and said, "Judge, I could not help it. What would you have done under the same circumstances?" The judge turned his head, bit his lip, looked out at the window, and said nothing.

They who play politics with this negro question care nothing for the southern men and women who are troubled and menaced by it. Governor Smith, how do you and your Tammany backers stand on this all-important question to the South?

The Bible tells us that "By their fruits ye shall know them."

Governor Smith, a few months ago the negro political clubs of New York, Boston, and Chicago demanded that Congress pass an antilynching bill. It was intended and boldly provided for the protection of negroes who brutally attacked and criminally assaulted and murdered white women in the South and elsewhere. Under the provisions of that bill, if a negro assaulted a white woman and murdered her and had been apprehended or arrested by an officer and was in jail, or on the way to jail, or was being tried in a court, and if the outraged, enraged, and the distracted members of the family of the woman assaulted and murdered should take him and kill him, the taxpayers of the county—the white people—were compelled to pay to the family of the negro committing the crime $10,000. That bill encouraged the crime and put a premium on the crime of rape and murder of a white woman by a negro and required the race insulted and offended—the white race in the county—to pay the premium for the commission of that crime by the negro. They passed that bill through the House. Governor Smith, you were not with us in that hour when we needed you and your Tammany Democrats to help us defeat that bill. Southern Democrats in the House appealed to your Tammany Democrats, but they appealed in vain. You, all of you, thought more of the negro vote that you were controlling in New York City and State than you thought of us and the protection of white women in the South. Your Tammany Democrats in the House refused to give us a helping hand. Not a one of them voted with the southern Democrats on that question. Not a one of them cast his vote against the negro Republican politicians' antilynching bill.

Governor Smith, what is your position and the position of your so-called Tammany Democrats—Mayor Walker and others—on the question of social equality between negroes and white people? "By their fruits ye shall know them."

The Manufacturers Record, published at Baltimore, Md., a clean and honorable publication, has drawn a severe indictment against you as Governor of New York and against your Tammany government in New York City. The Manufacturers Record article says that its representative visited three public dance halls recently in New York City and that he saw negro men dancing with white women and white men dancing with negro women, and that they were conversing and carrying on in the most intimate and hilarious fashion. Governor Smith, that is social equality in an ugly and shocking form in the State of which you are governor and in the city where your Tammany organization is in full and complete control.

Governor Smith, your utter indifference to the negro problem as it affects us in the South, your lack of sympathy with the white women of the South, who must suffer by your sanction and permission, and the sanction and permission of Tammany of social equality in the city and State of New York, brand you and them as enemies of the things we cherish and hold most dear in the South.

I ask to have printed in the RECORD, following my speech, the article from the Manufacturers Record of December 7, 1927, to which I referred and another article following that from America of February 11, 1928.

The PRESIDING OFFICER (Mr. MCNARY in the chair). Without objection, leave is granted.

The matter referred to is as follows:

[From the Manufacturers Record of December 1, 1927, p. 64]

WHITE WOMEN IN NEW YORK ASSOCIATE AND DANCE WITH NEGROES

In New York one sees apparently respectable and well-to-do white men and women dancing with negro partners in negro cabarets. In three negro cabarets I found each one filled with a crowd of patrons, about 50 per cent each, black and white. White women with every appearance of refinement danced and chatted almost intimately with negro men; white men with every appearance of prosperity and social standing danced and chatted—often really intimately—with negro girls and women. Negro girl dancers circled the rooms, making suggestive movements of their bodies and suggestive gestures to the white men. The sight was too repulsive for detailed description in a decent publication.

Speaking as a veteran newspaper man who knew New York inside and out in the old "wide-open" days, I can say with emphatic confidence that old New York would not have tolerated such dives and such racial intercourse, and if there had been any lynching the white offenders would have been the victims.

Mr. HEFLIN. The Manufacturers Record is published in Baltimore, Md., and is one of the oldest and most conservative publications in America. Its owner and editor, Richard H. Edmonds, is one of Baltimore's most prominent and outstanding citizens. He was for years trustee of the Southern Baptist Theological Seminary in Louisville, Ky.; is the author of a number of books that are authorities on the subjects discussed; he would not permit the publication in his magazine of anything not absolutely true.

New York State has a Tammany governor; New York City has a Tammany mayor and city council.

Query: If Tammany permits such scenes in a city and State which it controls, will similar scenes become national if the Presidency turned over to Tammany and one of its protégés and products?

Mr. President, the next article is written by a Roman Catholic, and is printed in a Catholic magazine called America. It proves what I have said in the Senate—that Catholics intimidate newspapers and suppress the truth.

The PRESIDING OFFICER. Without objection, the article will be printed in the RECORD.

The matter referred to is as follows:

[From America of February 11, 1928]

DOES IT PAY EDITORS TO ATTACK CATHOLICS?

By Charles J. Mullaly, S. J.

The editors of some secular magazines and newspapers seem to believe that it pays to attack the Catholic Church. The belief is not new. Magazines and newspapers in various parts of the United States have often opened their pages to attacks on the church with the intent to increase circulation. At times they were not disappointed. Bigoted non-Catholics gloated over the attacks, and many foolish Catholics, out of curiosity, bought the periodicals to see what was written, while some injudicious ones unwittingly fell in with the editor's plans and, by answering the attacks in print, fostered controversies which were very profitable to the business departments of the publication.

History often repeats itself, and in this matter of attack on the church it is now repeating itself. But another bit of history may also be made to repeat itself. The story of how the Catholics in Washington, D. C., back in 1913 showed the owners of a prominent newspaper that it was bad business policy to insult them may interest the readers of America, and the tale will point the moral.

In the summer of 1913 a young girl, an inmate of the House of the Good Shepherd in Washington, D. C., attempted to escape by tying some clothing together and lowering herself from a window of an upper story. She fell and was killed. Immediately the bigoted element in the city demanded, in the pages of a prominent newspaper, an investigation of the conditions in the institution which would cause "a good girl" to lose her life in an attempt to escape. One of the editors, already noted for his hostility to Catholics, opened his columns to letters from bigots of every type and class. Evidently he thought it paid to attack the Catholic Church. Why should he not take advantage of this sensation and increase the circulation of his daily? What happened was the unexpected.

There was, fortunately, in the city an organization known as the Washington Truth Society. It had been started to meet just such situations, and it met the attack with a counter onslaught that quickly caused consternation to the business management of the offending paper. Instead of writing an indignant defense of the Sisters of the Good Shepherd and thus stimulating a controversy which would have

been financially profitable to the offending paper, this Catholic society followed a more practical method of action. Its strategy was aimed at the business office and not at the editorial department. Pastors of prominent Catholic churches were visited by officers of the Washington Truth Society. As a result many spoke to their people at the masses on Sunday somewhat as follows:

"There is a newspaper in this city that is attacking the Sisters of the Good Shepherd. I will not mention its name. This paper is opening its columns to bigots who are insulting the purity of our Catholic sisterhoods. I do not know what kind of Catholic each of you may be, but, as for me, I will fight insults to holy mother church. I do not know what you will do, but I will fling any offending newspaper from my house, and I will never buy it again."

The effect was magical. A news stand opposite one church had 400 copies for sale. At nightfall the 400 copies were still untouched. In every part of the city it was the same story. Catholics refused to buy the paper. As the days passed even the newsboys refused to handle it. In a large parish, on the Sunday after the pastor had spoken to his people, one of the parishioners who had been away from the city for several weeks and had returned only that morning, called a newsboy and requested the paper. The little fellow looked at the would-be purchaser first in surprise and then with withering scorn.

"Mister, don't you know we won't sell that sheet around here?"

At the same time the officers of the Washington Truth Society privately interviewed priests in charge of young ladies' sodalities in the various parishes of the city. They knew that women are more active workers than men in matters of this kind, provided they have leadership. As a result, letters began to pour in to the business manager, pledging the writers never to buy his paper again. These young ladies persuaded friends to do the same, and these, in turn, spoke to their friends. The business office of this newspaper admitted the loss of 40 per cent of its circulation in two weeks. The counterattack did not stop here. An even more tender spot was hit.

Members of the society interviewed merchants who advertised in the paper and suggested that they demand an immediate change of editorial policy if they hoped to keep Catholic trade. No intimation of boycott was given, but these business men understood perfectly well that the paper was supported by their advertising and they hastened to show sympathy for their insulted Catholic patrons. In one instance an advertiser, who daily used a page and a half, immediately cut his space, with the warning to the business office that if any more insults were published against his Catholic customers, he would withdraw all advertising. The Jewish merchants, who were prominent advertisers, were quick to see that the blow would fall upon them, and they insisted that the insults and controversy cease. The 40 per cent loss in circulation now meant also a 40 per cent fall in the rates for advertising. The only dissenting note came from a weak-kneed Catholic advertiser who declared that he did not believe in mixing business and religion.

In the meantime, as the name of the offending newspaper had not been mentioned in the churches, the rival dailies in the city, fearing that this counterattack might injure them, secured statements from one of the prominent pastors, declaring that Catholics had no complaint to make against them, for the slogan was sounding through Washington: "Do not buy any paper that insults the Catholic religion, and do not buy from any store that advertises in such a paper."

The lesson was a lasting one. This was shown several years later. One of the other Washington papers had changed its editor. This new editor requested the vice president of the Washington Truth Society kindly to give him the history of the whole affair.

"I do not mind telling you," he said, "that the owners of the paper have warned me not to publish anything which might be considered objectionable by you. They believe it does not pay to insult Catholics."

History often repeats itself. Since some secular magazines and newspapers now believe, as this Washington editor believed in 1913, that it pays to insult the Catholic Church and to foster religious controversy, why can not Catholics in every city let the history of this counterattack repeat itself for them? They can follow the example of the Catholics in Washington in 1913.

Some one may object that it is difficult to conduct a Truth Society; they fancy that such an organization is not easily established and that meetings are held only with difficulty. The Washington Truth Society may be taken as a model, for it is exceedingly simple. In the beginning the mistake was made of trying to have a large membership group, with regular meetings. In 1912 and 1913 meetings were dispensed with. The Washington Truth Society consisted of one active priest in charge, two zealous laymen, and a Catholic lawyer or two, ready to give legal advice free of charge. The letterhead was formidable with names of prominent men, but this heavy artillery was brought to bear only when urgently needed. In any city of the United States one zealous pastor with two or three active laymen, together with a legal adviser, could form a truth society that would batter to pieces bigotry when found in the pages of any local newspaper.

The lessons learned in Washington in 1913 may briefly be summed up as follows:

1. Do not attack a magazine or newspaper through its editorial department, but act through its business office.

2. When a magazine or newspaper is attacking your religion, write to the business manager and inform him that you will not buy the offending periodical again and mean it.

3. Call the attention of your friends to the insult and request them to call the attention of their friends. They, too, should write and pledge themselves not to buy any offending paper and mean it.

4. Call the attention of the merchants with whom you deal to the insults and tell them that as long as they advertise in any offending paper you will not buy their goods and mean it.

5. Call the attention of your pastor to the insults and suggest that he have his people pledge themselves never to buy any magazine or newspaper that insults the faith and never to deal with merchants who advertise in such periodicals and mean it.

6. Tell your news dealer that as long as you see the magazine or newspaper on his stand, an open insult to you, you will not buy from him and mean it.

7. Call the attention of your local Catholic paper to the insult, but suggest to the editors not to give free publicity by naming the offender, rather to sound the slogan, "We will never buy a paper or magazine that insults our faith. We mean it."

This plan is based on the simple fact that nobody, Catholics included, has to buy a magazine or newspaper if he does not want to.

If Catholics follow the example of the Catholics in Washington in 1913, we shall soon decisively answer the question which the editors of some secular periodicals are now asking themselves: "Does it pay to insult Catholics?"

## RETIREMENT OF CIVIL-SERVICE EMPLOYEES

The Senate, as in Committee of the Whole, resumed the consideration of the bill (S. 1727) to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof, approved July 3, 1926.

Mr. NORBECK. Mr. President, I have no desire to filibuster against this bill. It is only fair that the Senate should express itself on such important legislation. I do want to offer an amendment and speak briefly. The amendment has just been sent to the desk.

Mr. DALE. Mr. President, may the amendment be reported?

The PRESIDING OFFICER (Mr. MCNARY in the chair). The amendment will be reported by the clerk.

The LEGISLATIVE CLERK. The Senator from South Dakota proposes to amend the committee amendment, on page 6, line 4, after the word "twelve" and before the period, insert the following proviso:

*Provided*, That after July 1, 1930, the annuity shall not exceed the average net income of the farmers as determined by the Department of Commerce.

Mr. NORBECK. Mr. President, this amendment will not become operative for two years. The Department of Commerce will have two years in which to determine the average net income of the American farmer. If the department should at that time find that the net income of the American farmer, including the earnings of his investment and the work of his family, is less than received as retirement pay for Government employees, then such pay or annuity would be reduced accordingly.

There is really a declaration of principle involved, and it is this, that the net earnings of the farmer must be equal to the retirement pay of a Government clerk. If at the end of two years it is found that the farmer is still getting less, it will be necessary to either improve the farmer's situation or reduce the annuity. Will anybody contend there is anything unfair about this?

The fight for economic justice for the producers of the great agricultural staples has been slow. Big business can get a hearing in Washington, so can small business. Government employees, even though they may have no vote, will be given a hearing and their just demands will be recognized by Congress.

The farmer seems to be the exception, and if he lives in the interior of the country, he seems to have the ill-will of both parties. He is told by the leaders of both parties that he is not wanted.

The McNary-Haugen bill is the only measure pending that has the indorsement of farm organizations generally. Yesterday a combination of Republicans and Democrats in the House, under the leadership of the ranking Democratic member on the Agricultural Committee, voted to strike out the equalization fee from the McNary-Haugen bill. In other words, they amended the bill so it is of no importance. Rather than amend it in this way, they should simply have killed it.

If this bill is returned to the Senate without the equalization fee I, for one, will deem it a duty to vote against same. These political leaders should understand they can not fool the farmers with anything as coarse as that. It is a fake, a camouflage, and crudely done at that.

Mr. BLEASE. Mr. President, on page 7513 of the CONGRESSIONAL RECORD of May 1 it appears that I started to read a paper which contains a reply to the points raised in the circular letter of March 23 of the Standard Mailing Machines Co. soliciting letters to Mr. Frank Mondell in favor of Senate bill 3890. I now ask that the paper may be printed in the RECORD without reading.

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

REPLY TO POINTS RAISED IN CIRCULAR LETTER, MARCH 23, OF THE STANDARD MAILING MACHINES CO. SOLICITING LETTERS TO MR. FRANK MONDELL IN FAVOR OF S. 3890

(1) The postal regulations have always required 300 pieces of nonmetered first-class permit matter. The machines of the Standard users were purchased under these conditions, and there is therefore no just cause for complaint.

(2) It is uneconomical for the Post Office Department to accept less than 300 pieces of nonmetered permit matter because of the counting and bookkeeping required with each mailing. The Post Office Department has testified to this point.

(3) The mailer who goes to an expense to so prepare his mail that it can be handled more economically by the Post Office Department is entitled to superior service, as, for example, the mailer who spends 10 cents for a special-delivery stamp or who sorts and faces his mail before delivery to the post office. The users of postage meters have gone to some expense in using an authorized device of this kind in lieu of an ordinary printing device, which saves the department the necessity of counting their mail, and much of the bookkeeping involved in the nonmetered system. They are, therefore, entitled to more liberal arrangements.

(4) If other concerns choose to purchase an inferior type of device which requires the Post Office Department to count their mail, they can hardly expect additional privileges now, merely for the asking. These individual concerns who have written in are not interested in the cost of mail handling or jeopardy to the postal revenues, but are only interested in securing the greatest convenience at the lowest cost to themselves, irregardless of the entire mailing public, who constitute the taxpayers of the country. Any concern writing in reply to this circular appeal has everything to gain and nothing to lose by so doing. Nevertheless, in spite of the fact that this circular was undoubtedly followed up by the personal calls of the Standard Co.'s representatives throughout the country, only about 150 out of 700 users replied.

(5) As for the rental of meters, the Post Office Department do not permit the outright sale of any devices of this kind authorized to print and record postage. The public might as well expect to purchase stamp-printing presses from the Bureau of Printing and Engraving. The manufacturers of meter devices are held directly responsible to the Government at all times for their location, operation, maintenance, and replacement when necessary. In return for the service charge of $10 per month, a monthly inspection and supervision service is rendered which keeps the entire machine in proper efficient working order and which also protects the Government.

(6) Contrary to the insinuation of abnormal profits, the Pitney-Bowes Postage Meter Co., representing an investment of $2,000,000 and 20 years of effort, has as yet been unable to give one cent of return to its stockholders.

(7) The Post Office Department has testified that, contrary to saving $48 per annum, each user of a Standard machine or any other printing device actually causes the department to lose 10 cents per thousand letters as compared to mail bearing adhesive stamps. Each user of an authorized meter device saves the department 10 cents per thousand over mail bearing adhesive stamps.

(8) The hearings on this bill plainly show that Congress never intended ordinary printing devices with no protective features whatever to be used by the public on mixed business mail, in lieu of adhesive stamps. If such had been the case, what would be the purpose of adhesive stamps under any conditions except perhaps for personal and private use; and even then why not have each small mailing handled as an individual transaction and counted at the post office? The entire system of handling first-class mail without stamps affixed was brought about, as the records plainly show, because of the successful development of a device which could be brought to the post office, set by them for a given amount of postage, locked and sealed, and becoming inoperative to the user when the amount of postage paid for had been exhausted.

(9) This metered system of prepaying postage has been taken up by almost every country of any size throughout the world. In no other country is the use of ordinary printing devices, not meeting the Government specifications, permitted under any conditions. In no other country is any minimum mailing for metered mail prescribed, and the use of this system has been encouraged for the small mailers as well as for the large.

Mr. BLEASE. I also ask that a statement of objections to S. 3890, giving seven reasons why the bill should not be passed, be printed in the RECORD.

The PRESIDING OFFICER. Without objection, the same order will be entered.

The matter referred to is as follows:

STATEMENT OF OBJECTIONS TO S. 3890

1. No legislation is necessary as the matter is entirely within the regulatory authority of the Postmaster General, who is strongly opposed to the bill.

2. It would cause the Post Office Department unnecessarily to lose money in handling first-class mail matter. The department has testified that it costs 13.3 cents to handle 1,000 pieces of metered mail, 23.3 cents to handle 1,000 pieces of mail bearing adhesive stamps, and 32.8 cents to handle 1,000 pieces of nonmetered permit matter.

3. It would jeopardize the postal revenues.

4. It would unnecessarily limit the mailings of 2,500 nationally known concerns.

5. It would absolutely prevent the extension of the metered permit system—on the figures of the Post Office Department, the most economical way of handling first-class mail—to smaller mailers by means of devices already authorized by the Post Office Department and about to be placed on the market.

6. It would break down the system that already exists and cause the substitution of ordinary printing devices of all sorts in replacement of the meters now in use. This would place a tremendous burden and expense on the Post Office in counting the mail, delay the mail of the general public, and cause loss of revenue.

7. It would discourage originality in the invention and perfection of new labor-saving devices in any way connected with the United States Government.

Mr. BLEASE. Mr. President, I shall not talk very long, because I have no desire, to use the common expression, to filibuster against the pending bill. I am opposed to the bill. I expect to vote against it, but if a majority of the Senate wishes to pass it, I have not any inclination to prevent it, although I could very easily talk until 2 o'clock and then hardly feel that I had said anything.

But before I go any further I want to congratulate the senior Senator from Alabama [Mr. HEFLIN] on his remarks, especially those which he read from his manuscript in reference to dealing with the question of the negro in the South.

I presume the Senator has observed that the scene is shifting. Just a few days ago the Republican keynoter, the very distinguished Senator from Ohio [Mr. FESS], was defeated for delegate to the Republican National Convention by a negro. Wonderful! And it was done by an order of Herbert Hoover to put white people and negroes working side by side in the Department of Commerce. They took that to the State of Ohio; they heralded it in all of their newspapers; they published it all over the State; they took the pictures of the negro delegates, put Mr. Hoover's picture at the top and these two negroes right at the bottom; and the negro speakers and negro papers appealed especially to the colored vote to support this man who had issued this order attempting to force social equality between the two races.

The Senator from Alabama has spoken, and spoken well. The day is coming in this country when the white people are either going to take one side of the line or the other. They are either going to associate on the one side with the colored people, or they are going to join the great majority of the white people and stand on the other side of the line with the white majority. There can be no middle ground in this question. In all Bible history and in all profane history you will find that the superior race has ruled and controlled; and the white people of this country are going to rule it and control it if it be necessary to wipe the black race off the face of the earth. Mark that prediction.

I warn you people that when you turn the negro man loose in a riot with whatever arms he may be able to accumulate, and turn the negro woman, the virago, loose with a torch, God save you people who are acting as you are toward them to-day! While he is out fighting you with whatever weapons he may get, she is with a torch under the house where your wife and children are sleeping, for when aroused these women are more dangerous than their men. You may smile at it to-day and think it is a small matter; but we people who have faced it warn you that you are playing with fire, that you are playing with serpents; and when that day comes, do not forget that the solid South will stand on the rock of white supremacy upon which she has ever stood, and that if you call as white man to white man we will respond to your assistance, notwithstanding the fact that we have warned you against this situation.

I hope Illinois will send a nigger to Congress. I want to walk over and see one of Hoover's black chocolates sitting around with some of the white people over there who seem to love him so well. I want to see one. I hope New York will send one down here. The more you rub them into those people that love them the better I like it. You can not make them associate with us. There are not enough marines in or outside of the United States Army and Navy, in Nicaragua, and all combined, to make us associate with them. We never expect to. We never have; but we treat them fairly. If you promise one of them $5 for a day's work, if he does the day's work, I believe you should pay him.

I believe in giving him equal accommodation on the railroad trains. I believe in giving him nice, clean places in which to eat. I believe in giving him equality along that line. If they pay for service, give them the service; but I do not believe, nor will I ever believe, nor does any other white man who has 100 per cent true-blooded American stock in him believe, in placing them socially on an equality with the white people; and you do not believe in it.

There are men, I know, to-day who talk about them, and use them when they can, who would not any more let one of them sit down at the table and eat by the side of his wife and daughter than he would put a moccasin in a soup dish and set it before one of them. No; you would not do it. It is for political purposes. I have been told—I do not know that it is true; I do not assert it as the truth, and I do not believe that any candidate for President himself would be guilty of it—but I have been told in the last few days that certain friends of two of the candidates making this race for the Presidency have held out to the colored race the promise that if they are elected President of the United States a negro will be put in the Cabinet. I do not think the candidate himself is responsible for that, but it is being talked; and it is being talked about one Alfred Smith and one Herbert Hoover. I do not think they know it, but some of their friends are saying it; but I will tell you this much: If they are elected, I would not be very much surprised if they carried out the promise—either one of them. If a man will make a white woman sit down at a desk and work right side by side or in between two big, black buck niggers, I would not be at all surprised to see him put one in his Cabinet.

The Senator from Texas [Mr. MAYFIELD] has called my attention to a matter in the CONGRESSIONAL RECORD of March 7, 1928, by Mr. TARVER, of Georgia:

> Mr. Speaker and gentlemen of the House, I hold in my hand a newspaper which is called the Afro-American, published in the city of Baltimore. This particular issue was published on March 3. I desire to read to you from an article appearing on the front page which declares for African equality. It is as follows:
>
> "HOWARD PREXY DECLARES FOR FULL EQUALITY—SCIENTISTS AGREE, HE SAYS, THAT NO HARM CAN COME FROM INTERMARRIAGE
>
> "WASHINGTON, D. C.—Dr. Mordecai W. Johnson, president of Howard University, stands for full race equality, including amalgamation and social equality.
>
> "Doctor Johnson expressed his views before the Community Church in New York recently.
>
> "Speaking in New York, Doctor Johnson said he did not believe in intermarriage just for the sake of a negro marrying a white woman, but he thought that when two sane persons wanted to marry, there should be no law to prevent them; and that while he could not stop amalgamation of the races, he did not believe that negroes should wait for amalgamation to give him full manhood rights.
>
> "It is too long a process, he said. He wanted his rights black, just as he is, which included social equality without equivocation or retreating a single inch, which, in turn, included intermarriage.
>
> "Doctor Johnson emphasized the fact that anthropologists and other scientists are agreed that no harm can come from intermarriage."
>
> This damnable doctrine which I have read is that promulgated by the man at the head of Howard University, to which a few days ago you appropriated the sum of $390,000. He is going around about the country spreading among the members of the Negro race, and, of course, among the students of Howard University, this rotten, indecent doctrine on marriage between the white and African races.
>
> On the 28th of February, in this Hall, 253 Members of this House voted for an appropriation of $390,000 to the institution, of which this negro is the head, and it goes without saying that every dollar of that appropriation which directly or indirectly goes by the furtherance of the propaganda that I have referred to is an injury to the Negro race instead of a benefit.
>
> On the front page of this paper, almost side by side with the article that I have read, appears the news that southern Members of Congress voted for that appropriation. May God have mercy on them! [Applause.] In a short while the House will be called upon to vote upon H. R. 279, which provides for the legalizing of appropriations of this character in the future, they having been heretofore made in violation of the law. I call attention to this fact in order that every fair-minded man may study the situation and determine for himself whether or not he wants to vote in favor of a law legalizing appropriations to a university whose head is engaged in teaching among the members of the Negro race the damnable doctrine of social equality and of intermarriage with the white people.

This man is the president of Howard University, up here, that you unconstitutionally every year give so much money to help create more negroes of his opinion.

Let me give you just a little case which I know to be absolutely true; and I will say to the Senator from Vermont [Mr. DALE] that I am not going to pass over the time. I want you gentlemen to listen to this, and I can prove every word of it:

There was a boy in South Carolina whom I knew from his boyhood quite well. He rolled the mail in a town there from the depot to the post office in a cart, away back, years before they had automobiles. He was as white, so far as color of skin was concerned, as any man in this building. He came up here to Washington, got an appointment through the man who was then Postmaster General, a Republican from the North, went to work in one of the departments, and met a girl in the department whose father was a very splendid white man, a man of standing and influence here in the community. He came from one of the far Western States. This boy and this girl married. About 14 or 15 months aftey they had been married this girl gave birth to a child. The father was walking up and down with the husband on the outside, anxiously waiting, as I suppose parents generally are. The boy walked around into his room. About that time the doctor opened the door. The girl's father said, "Doctor, how is everything—all right?" The doctor looked down, and he said, "No." The father said, "My God! Is it dead?" The doctor said, "No; worse than that." The father said, "What in the h—— could be worse?" He said, "The baby is a nigger."

That happened in Washington City. The father rushed back into the room and saw the little black baby lying by the side of its white mother. He dashed out and got this boy and dragged him into the room and demanded to know what that meant, and demanded from the girl. The reply was, which was the truth, that the boy was the son of a negro woman by a white doctor. When this child was brought into the world it reverted to type, as any physician will tell you it will do.

That man took that boy and that daughter and sent them away out to his home, out yonder. So far as I know, they are there yet. That boy was born and reared in the county of Newberry, where I was born and reared. I knew his father, I knew his mother, and I know that the census is correct; and I once more warn you white people who are pleading for intermarriage to be careful that you do not have in your cradles at home a little black baby.

Now, Mr. President, on this bill for a minute: As I say, I shall not attempt to defeat it by talking it to death.

I introduced a bill in the first part of this session to do away with foreigners in our public works. You talk about unemployment. I made some remarks on that bill the other day and on a bill which I had introduced. I learned this morning that there is a family in the city drawing $17,000 a year from the Government. The father and the mother and three children are working in the departments, and the total salaries of that family aggregate $17,000. The father was cursing yesterday because I had introduced that bill. A gentleman said to him, "Why, you ought to be satisfied. You are getting over $7,000 yourself. Why do you not let some other poor person have some of these jobs, and feed their children, and educate them, and clothe them?" His reply was with a curse against me for having brought the matter before the Senate.

Why should we have these foreigners, people who are not American citizens, people who never came here to be American citizens, people who never expect to be American citizens, working in the departments of our Government and drawing salaries? As soon as they get what money they want to accumulate or feel that they have got all they want or all they can get, they take the boats and go back across the water. While that is going on, our American people are going around here hungry and begging for clothes.

What happened? Just to show you that my bill was along the right line I read from the Greenville News, of Greenville, S. C., Saturday morning, August 20, 1927:

> PHILADELPHIA, August 19.—After confessing that he had stolen and hidden plans of a United States cruiser, and leading Department of Justice officials to the place he had secreted them, Svn Dan Berg, 24-year-old Danish draftsman, was held under $50,000 bail to-day by United States Commissioner Long.
>
> His confession followed a severe grilling by Claude O. Lancianno, assistant United States district attorney, who had lured Berg to the

Federal building under the pretext that he was to look over his naturalization papers.

Berg's confession came after the arrest and questioning of Hans Christian Frederik Rethamer, 44, of Copenhagen, Denmark, in connection with the Government's search of the missing plans. Rethamer is a draftsman employed by a shipbuilding concern in this city.

There you are—a man working in the department, not an American, a foreigner, trusted with these very important plans by this department of the Government which at any moment may become of the most important character; and yet this boy goes in there where he has a right to go, where the United States Government says, "Dane, you go," and says to some poor American who needs the money to make a living, to pay for his own support and for his wife and possibly for his children, "You can not get in, Mr. American. This Dane is going in." Then the Dane steals these plans, and carries them away and gives them to this fellow from Copenhagen, Denmark, who says that he is working as a draftsman for a shipbuilding concern in the city of Philadelphia.

Mr. President, that is what I wish to bring to the attention of the Senate—that we are not dealing fairly with our own people. We complain about unemployment; we indict them for vagrancy; and yet we are bringing in these foreign hordes from other countries, and not even waiting until they get to be American citizens or even file naturalization papers, but we are putting them in jobs all over this country and keeping the American boy and girl out.

It reminds me of what happens in a State sometimes. They will whoop and holler and write newspaper articles and make speeches and preach sermons and beg and plead with the boys and girls to stay at home. "Stay at home, boys and girls. Stay in your own State." Yet if they want a preacher or a teacher they will go right straight and send across the line and bring somebody else down there. They will say, "This is just a little home boy. We do not want him to preach. We want to send up North and get a big Yankee preacher, who will have a big name and draw a congregation on Sunday." That has happened in my State; I suppose it has happened in all of the States; and I guess the northern people have to send down South, because there are some mighty good southern preachers up in the North. A southern preacher, one of the best in the country, is up in Philadelphia, and there are several others up there.

I want to call the Senate's attention to this fact: I introduced this bill away back in the early part of this session. The very bill the Senator from Vermont is pushing now is a bill to pension thousands of people who are not American citizens, people employed in these departments who never expect, possibly, to become American citizens. If you would shut that gate over in Europe and stop these foreigners from coming here, this element that is of no account, it would be better for this country. I welcome a good foreigner. I love him. I love to see people rise up and do something. I would like to have in my State now several hundred families of real good, honest people who are willing to produce and not be entirely consumers. We have too many people in this country who consume all the time and produce nothing. We want working people, we want good people, God-loving and God-fearing people in this country. But the Senate ought to wake up to the fact that we are not dealing fairly and squarely with our American boys and girls when we are bringing these people here by the thousands, putting them in these positions, and allowing them to drive out from those positions boys and girls, Americans, who ought to be working in them and ought to be receiving their support from them.

As I said, I repeat, I am opposed to this bill. Of course, I know the Senate is going to pass it. That is all right. I can only do my duty and do my part. I shall not resort to a filibuster for the purpose of keeping it from passing, but it is a dangerous bill, and I would like to ask my friend the Senator from Vermont just one question. How much will this bill cost the Government within 30 years?

Mr. DALE. The Senator knows very well that if he gets me into a discussion, with only about 17 minutes left, he will have accomplished his purpose. I do not know how much the bill will cost; but I will say to the Senator that it does not make any difference what it costs, if this Government can not give these men who have worked 30 years, performed hard labor for the Government, annual retirement pay of $800 on the average, when they pay 3½ per cent and the Government pays only 1 per cent, the Government had better go out of business.

Mr. BLEASE. Why does not the Government raise the pay of these people and not work them at these starvation wages instead of pensioning them after 30 years?

Mr. DALE. I am not going to enter into a discussion.

Mr. BLEASE. I did not ask the Senator to enter into a discussion. I have already told him that his bill could pass. I was told yesterday that this bill would cost the Government about $600,000,000 in 30 years. I say we should raise the wages of these people and give them enough to live on and enough so that they can lay up something and save it if they are of the saving kind, but not continue to pension people and to pension people whom we have already fed for 30 years.

Mr. DALE. The man who told the Senator that, as it relates to this bill, and the Senator himself know that it can not be so.

Mr. BLEASE. I could not tell you about that. A man told me so, but I know what is so. You are paying millions of dollars to people for pensions who were never in any war, and here is another pension burden on our people, to which I am opposed.

Mr. KING. Mr. President, I presume that if I should talk for 10 minutes the Senator from Vermont would say that I prevented the passage of the bill, which, of course would be very unfair, and I hope he will not make that charge.

Mr. NORBECK. Mr. President, may I interrupt the Senator?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from South Dakota?

Mr. KING. I yield.

Mr. NORBECK. I have no desire to prevent a vote on this bill, but I think it is too important a bill to be voted on with just a dozen Senators here. I really think we should get an expression of the Senate on it, and I would like to get such an expression as to whether the Senate is going to give any consideration to the farmers or not. I think if the labor group came to see that there was a relation between their wages and those of the farmer we would get some support.

The amendment I have offered would not interfere for the next two years; for the next two years the bill would take effect as it is written, but the amendment provides that within two years the Department of Commerce must determine what the farmer's average income is, and after that, if it is found that the average income of the farmer is lower than the retirement pay it will have the effect of reducing the retirement pay. I think people are agreed in this country that a man working on a farm should have as much pay as one who has retired and quit work. That is all I am contending for.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from South Dakota to the amendment of the committee.

Mr. WALSH of Massachusetts. Mr. President, has the Senator from Vermont made any comments upon the amendment offered by the Senator from South Dakota?

Mr. DALE. Not a single comment. If the Senate wants to adopt the amendment of the Senator from South Dakota, all right; I have no objection.

Mr. NORBECK. Then I shall not ask for a quorum, if there is no objection to the amendment.

Mr. DALE. I did not say that at all.

Mr. NORBECK. Then, if that is not the understanding, I shall ask that a quorum be called.

Mr. DALE. The Senator knows that if he calls for a quorum for a vote on the amendment, the time it will take will defeat the bill.

Mr. NORBECK. And the Senator knows that if he will accept this amendment, the Senate will accept it, and there will not be any need to have a quorum called.

Mr. DALE. The Senator knows I can not accept the amendment. I would be glad to accept it if I possibly could. The Senator knows I could not accept the amendment.

Mr. NORBECK. Why not?

Mr. DALE. The Senator does not want to draw me into that kind of a discussion.

Mr. NORBECK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Couzens | Glass | Kendrick |
| Barkley | Curtis | Goff | Keyes |
| Bayard | Cutting | Gooding | King |
| Bingham | Dale | Gould | La Follette |
| Black | Deneen | Greene | Locher |
| Blaine | Dill | Hale | McKellar |
| Blease | Edge | Harris | McMaster |
| Borah | Edwards | Harrison | McNary |
| Brookhart | Fess | Hawes | Mayfield |
| Broussard | Fletcher | Hayden | Metcalf |
| Bruce | Frazier | Heflin | Moses |
| Capper | George | Howell | Neely |
| Caraway | Gerry | Johnson | Norbeck |
| Copeland | Gillett | Jones | Norris |

| | | | |
|---|---|---|---|
| Nye | Robinson, Ark. | Steck | Wagner |
| Oddie | Sackett | Steiwer | Walsh, Mass. |
| Overman | Sheppard | Stephens | Walsh, Mont. |
| Phipps | Shipstead | Swanson | Warren |
| Pine | Shortridge | Thomas | Waterman |
| Pittman | Simmons | Tydings | |
| Ransdell | Smith | Tyson | |
| Reed, Pa. | Smoot | Vandenberg | |

The PRESIDING OFFICER. Eighty-five Senators having answered to their names, there is a quorum present. The question is on agreeing to the amendment offered by the Senator from South Dakota to the committee amendment.

Mr. NORBECK. Mr. President, I desire to explain my amendment briefly. I want to say to the Senator from Vermont that I have no desire to prevent a vote on his bill. All I want is a fair expression of the Senate.

This amendment does not change the bill for the next two years. It does provide that within two years the Department of Commerce must determine the farmer's average income. If it is found at that time that the farmer's average income is lower than the retirement pay, it will have the effect of reducing the retirement pay. It may be that in the meantime Congress will give the farmers justice, and then it will have no effect at all. It will tie organized labor in with the farmer. That is what I am trying to do. Anyhow, if a Senator thinks that a man retired from office on a Government pay roll should have a larger income than a farmer who is working and has not retirement pay, I want him to say so. I am willing to have a vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from South Dakota to the committee amendment.

Mr. NORBECK. I ask for a division.

Mr. SIMMONS. Let the amendment be stated.

The PRESIDING OFFICER. The clerk will state the amendment to the amendment.

The CHIEF CLERK. After the word "twelve," in line 4, page 6, add the following to the committee amendment:

*Provided*, That after July 1, 1930, the annuity shall not exceed the average net income of the farmers as determined by the Department of Commerce.

On a division, the amendment to the amendment was rejected.

Mr. NORBECK. Mr. President, I merely want to observe that on this vote the farmers had very little support from the northwestern part of the country, where the grain is raised.

The PRESIDING OFFICER. The clerk will state the amendment offered by the Senator from Vermont to the committee amendment.

The CHIEF CLERK. On page 5, line 18, after the word "act," insert "or former acts."

Mr. DALE. I withdraw the amendment to the amendment.

Mr. SIMMONS. Mr. President, I want to say that I did not vote on the amendment offered by the Senator from South Dakota. I think the amendment is too important to be voted on so suddenly. I think it requires a great deal of discussion, and I would not be willing to vote upon it until I understood it more thoroughly than I did at the time the vote was taken.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment in the nature of a substitute.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

Mr. HARRISON. Mr. President, did the Senator from Vermont offer his amendment to the amendment?

Mr. DALE. That will be taken care of on the other side. I have arranged that.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend the act entitled 'An act to amend the act entitled "An act for the retirement of employees in the classified civil service, and for other purposes," approved May 22, 1920, and acts in amendment thereof,' approved July 3, 1926, as amended."

## MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House insisted upon its amendments to the bill (S. 710) entitled "An act conferring jurisdiction upon the Court of Claims to hear, adjudicate, and render judgment in claims which the Northwestern Bands of Shoshone Indians may have against the United States," disagreed to by the Senate, agreed to the conference requested by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. LEAVITT, Mr. SPROUL of Kansas, and Mr. EVANS of Montana were appointed managers on the part of the House at the conference.

## TAX REDUCTION

The PRESIDING OFFICER. The calendar, under Rule VIII, is in order.

Mr. SMOOT. Mr. President, I ask unanimous consent that House bill No. 1, known as the revenue bill, be laid before the Senate.

The PRESIDING OFFICER. Is there objection?

Mr. JOHNSON. Mr. President, my understanding is that the design of the Senator from Utah is that the bill shall be before the Senate until 2 o'clock, when the unfinished business will be laid before the Senate, and then temporarily laid aside.

Mr. SMOOT. That is the understanding.

The PRESIDING OFFICER. Is there objection?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes, which had been reported from the Committee on Finance with amendments.

Mr. SMOOT. Mr. President, I ask unanimous consent that the formal reading of the bill be dispensed with and that the committee amendments be considered first and as they are reached in the reading of the bill.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BORAH. Mr. President, I want to ask the Senator in charge of the bill a question. I understand that the bill does not carry a clause repealing the inheritance tax. Is that correct?

Mr. SMOOT. The bill as we report it does not propose to repeal the inheritance tax.

Mr. BORAH. The answer of the Senator suggests another question. He said "as we report it." I understand that it is proposed by certain Senators to offer an amendment to that effect.

Mr. SMOOT. I understand that to be the case.

Mr. BORAH. Is the committee committed to opposition to that amendment or will the committee support it?

Mr. SMOOT. Some will support it and others will vote against it.

Mr. KING. Mr. President, if my colleague will yield, my opinion is that the overwhelming majority of the committee—and I say it with a good deal of regret—were in favor of repealing the estate tax, but certain considerations led them to take a different course. I am inclined to think that some of them will support the amendment when offered.

Mr. SIMMONS. To what amendment is the Senator referring?

Mr. KING. To repeal the inheritance tax. Speaking for myself, I am very much opposed to the repeal of that tax, and I am very much opposed to the existing provision of the law which permits a return to the State of a considerable portion of the tax which is collected.

The PRESIDING OFFICER. The hour of 2 o'clock having arrived, the Chair lays before the Senate the unfinished business, Senate bill 728, the Boulder Dam bill.

Mr. JOHNSON. Mr. President, I ask unanimous consent that the unfinished business be temporarily laid aside in order that the Senate may proceed with the consideration of H. R. 1

The PRESIDING OFFICER. Is there objection to the request of the Senator from California?

Mr. HAYDEN. Mr. President, it is not my desire to object, but I should like to inquire of the Senator from California as to when he expects again to take up the Boulder Dam bill?

Mr. JOHNSON. My expectation is to take it up at the conclusion of the consideration of the tax bill.

Mr. HAYDEN. If there should be any apportunity in the meantime to take it up, will the Senator from California be kind enough to give the Senators from Arizona notice?

Mr. JOHNSON. Absolutely. No attempt will be made to take up the measure without due notice. The expectation that we have now is that the tax bill will remain before the Senate until its conclusion. If anything should arise so that there would not be a conclusion on the tax bill, we would proceed with the unfinished business which has been temporarily laid aside. When there is a vote upon the tax bill, as we expect there will be, of course, then we will proceed with the unfinished business.

The PRESIDING OFFICER. Is there objection to the request of the Senator from California? The Chair hears none, and the unfinished business is temporarily laid aside. The Chair lays before the Senate House bill 1.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. SMOOT. Mr. President, perhaps I ought to say to the Senate at this time that the Senator from North Carolina [Mr. SIMMONS], the ranking member of the minority on the Finance Committee, stated to me a short time ago that he was not prepared to proceed with discussion of the bill this afternoon, and doubted whether there was anyone else on the Democratic side of the Chamber who wanted to speak.

I felt that I ought to call that fact to the attention of the Senator from California [Mr. JOHNSON] and of the Senate, and I do not expect to speak more than an hour on the bill, because the report which I made covers nearly every point in the bill in relation to which there is any kind of dispute.

Mr. JOHNSON. If the Senator will permit me, the Senator from Mississippi [Mr. HARRISON] stated to me a few moments ago that he expected to proceed this afternoon after the Senator from Utah had finished his remarks.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. LA FOLLETTE in the chair). Does the Senator from Utah yield to the Senator from North Carolina?

Mr. SMOOT. Certainly.

Mr. SIMMONS. I did have the conversation with the Senator from Utah which he has just stated. I was under the impression at that time that there was no one representing the minority on the committee who was ready to proceed this afternoon. However, I now understand the Senator from Mississippi is ready to proceed.

Mr. HARRISON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Mississippi?

Mr. SMOOT. I yield.

Mr. HARRISON. I much prefer that the Senator from North Carolina should proceed first as representing the minority, but if he does not desire to proceed this afternoon I shall be glad to do so. Whether or not I shall talk at all depends on what the Senator from Utah may say. If he confines himself to the subject matter and does not wander away too far, I shall not talk; otherwise I shall.

Mr. SMOOT. I assure the Senator from Mississippi that the Senator from Utah is not going to say one word that is not a fact in the case.

Mr. SIMMONS. I desire to say to the Senator from Mississippi that it is not my purpose to make any set speech at all. I shall be very glad if he himself, if he sees fit to do so at any time to-day or to-morrow, will open the debate on behalf of the minority. Before the general debate is ended I may make some general observations. It is my purpose to confine my discussion chiefly to the matters of difference between the two sections of the Finance Committee at the time the amendments are taken up for consideration.

Mr. SMOOT. Mr. President, I am happy, indeed, to call up for the consideration of the Senate the fourth downward revision of our internal revenue taxes during the present administration. The insistent adherence to the rigid rule of strict but true economy, the effect of the guiding hand of a genius over the finances of our Government since 1921, the era of unprecedented prosperity enjoyed by our people, and the former reductions in our tax rates to a point where they do not materially throttle business transactions and where, as in accordance with prediction, they produce more revenue, are the underlying factors occasioning our present fortunate position.

THE BASIS OF A REVENUE REDUCTION

A surplus exists only when our receipts exceed our expenditures. A reduction in receipts or an increase in expenditures may well wipe out all possibility of a surplus. Time does not permit me to give a detailed and analytical review of our receipts and expenditures and the innumerable items and factors affecting them. A summary, however, seems rather essential to an understanding and appreciation of the pending bill. Inasmuch as but three months remain of the fiscal year 1928, we must be governed by the estimated receipts and expenditures for 1929. In so far as the pending bill affects the fiscal year 1930, it is assumed that the conditions as to receipts and expenditures for 1929 will exist.

ESTIMATED RECEIPTS

Our receipts come from four sources—income taxes, miscellaneous internal-revenue taxes, customs duties, and miscellaneous. The total receipts for 1929 are estimated at $3,854,721,000. This amount is made up as follows:

| | |
|---|---|
| Current income tax | $1,890,000,000 |
| Back income tax | 220,000,000 |
| Miscellaneous internal revenue | 630,000,000 |
| Customs (including tonnage tax) | 587,000,000 |
| Miscellaneous receipts | 527,721,000 |

ACCURACY OF THE ESTIMATES

The committee report discusses in detail the basis and reliability of the above estimates. The majority of the committee, at least, believes in their accuracy and has relied upon them. No one has questioned the accuracy of the estimates of the receipts from customs, miscellaneous internal-revenue taxes, or miscellaneous sources. The sole issue which has been involved in the recent discussions is directed toward the income-tax estimates.

All the criticism of past estimates submitted by the Treasury—and it may be assumed that my friends across the aisle will attempt to confuse the situation by discussing past estimates—misses the point of the present situation completely. We now have the actual collections made on March 15. We no longer have to "guess" in making our determination of the receipts for the first half of 1929. We no longer have to determine the soundness of the "guess" made by those criticizing the Treasury estimates. We now have the actual figures. Thus the issue between the Treasury and its critics is reduced to purely a mathematical proposition. Of a total collection of current income taxes up to April 1 of this year, amounting to more than $1,425,000,000, the Treasury estimates missed the amount by $3,000,000. This is indeed a remarkable confirmation. If the distinguished Senator from North Carolina [Mr. SIMMONS], or any other minority member of the committee, can produce estimates proved by actual experience and by dollars on hand to be more accurate, I will be glad to accept them. He has not done so as yet, and I predict that he will not do so.

EXPENDITURES

The total expenditures for 1929 are estimated by the Director of the Budget to be $3,642,021,000. Again I wish to emphasize the fact that this estimate does not include whatever additional expenditures may be necessary by reason of new legislation.

It may be of interest to point out briefly how this vast sum of money is expended. For 1927, 51.1 per cent of the entire expenditures were on account of the public debt; 31.8 per cent were attributable to military functions; and but 17.1 per cent were devoted to the ordinary civil functions of the Government. In other words, one-half of each tax dollar is used for the service of the public debt, the equivalent of 20 cents being used for interest and premium payments and 30 cents for debt retirement. Every penny devoted to the retirement of the public debt results in a saving to the taxpayer. Our debt-retirement program should be adhered to. At the same time there is a very proper ground midway between a denial of all tax reduction in order to accelerate debt retirement beyond our present program, and a use of funds for tax reduction which should be devoted to debt retirement.

Our public-debt transactions may be divided into two classes: First, the retirement of the debt; and second, its refunding. The debt retirement obviously reduces the interest burden. A brief description of a recent refunding operation will indicate the tremendous annual savings which have been accomplished. Early last year the Treasury undertook the tremendous task of refunding all the outstanding second Liberty loan bonds, aggregating $3,104,000,000, all but $20,000,000 of which bore interest at the rate of 4¼ per cent. As a result of this stupendous undertaking, $575,000,000 have been permanently retired; $245,000,000 have been refunded into long-term bonds bearing 3⅜ per cent interest; $1,729,000,000 have been refunded into five-year 3½ per cent notes; and the balance has been retired from the proceeds of short-term borrowings at approximately a 3⅛ per cent rate.

The annual interest saving on the above securities as a result of this one operation amounts to over $21,000,000. If the interest saving on the bonds retired, both for the account of the sinking fund and from surplus funds—amounting to $24,000,000—is added, it will be seen that the total annual interest saving resulting is $45,000,000. It is quite unnecessary to state that this operation could not have been effected but for the enviable credit of our Government as the result of the public confidence in the policies and ability of the President and the Secretary of the Treasury. To illustrate further, the average interest rate on our public debt in 1921 was 4.29 per cent per annum. The average rate at the present time is 3.88 per cent. Applying this difference in interest rate to our debt on April 30 of this year—$17;547,000,000—we see an immediate saving of $71,945,000 a year.

THE ESTIMATED SURPLUS

Deducting the estimated expenditures for 1929 from the estimated receipts we find that we have an estimated surplus of $212,700,000. I see nothing which would justify the Congress in relying upon an increase in our receipts. We know

that there will be some increases in expenditure. The majority of the committee accordingly have reported a bill to the Senate carrying a maximum reduction but slightly in excess of $200,000,000.

The surplus for 1928 will be about $401,000,000. The surplus for 1927 was $635,000,000. Those desirous of increasing our proposed reduction have argued that we should carry over the surplus accumulated in 1927 or 1928 and have it available to apply upon any deficit which may arise in 1929 or 1930. This suggestion is based upon a total lack of knowledge of the actual operations of the Treasury. The above figures represent but a "paper" surplus. These huge sums of money are not piled up in gold in the Treasury. As a matter of fact, the actual operations of the Treasury in this respect are not hard to understand. The due dates of our various obligations are arranged to fall upon the dates on which our income-tax payments are received. In preparing to meet a maturing obligation the Treasury estimates the amount of cash which will be received on the date on which the obligation matures and the amount it will need for the ensuing quarter. It then arranges to apply the excess cash receipts against the maturing obligations and to issue new obligations in an amount sufficient to make up the difference. Consequently the suggestion that the surplus should be carried over is nothing more than a veiled suggestion that a deficit in 1929 be cared for by increasing the public debt.

It may be that unexpected receipts will prove the estimate wrong. It may be that expenditures will decrease. Upon the facts now available, however, any tax reduction in excess of that proposed by the majority of the Finance Committee will produce a corresponding deficit. We have witnessed the tragedies accompanying unbalanced budgets. Let us not let political expediency tempt us to risk the present condition of our Treasury and to abandon principles of public finance proved to be sound, the foundation of which is a balanced budget.

BRIEF OUTLINE OF THE BILL

All the provisions of the bill are discussed in detail in the committee report, which has been very carefully prepared. Accordingly, it is not necessary for me to do more than outline the more important provisions.

Briefly, the bill accomplishes the following:

First. The corporation rate is reduced to 12½ per cent, effective January 1, 1928, amounting to a loss of $82,000,000. The House bill proposes to reduce the rate to 11½ per cent, amounting to a loss of $164,600,000.

Second. The exemption to corporations is increased from $2,000 to $3,000, at a cost of $12,000,000, as in the House bill.

Third. The graduated tax on corporations contained in the House bill is eliminated, resulting in a saving over the House bill of $24,000,000.

Fourth. The intermediate surtax brackets are readjusted so as to relieve the disproportionate burden now imposed upon certain classes of taxpayers. The readjustment is so arranged that it will not cost more than $25,000,000. The House bill contained no relief for the individual taxpayers in the classes involved.

Fifth. The automobile sales tax is repealed, with a consequent loss of $66,000,000, as in the House bill.

Sixth. The admissions-tax exemption is increased from 75 cents to $3, at a cost of $17,000,000. The House bill increased the exemption to $1, reducing revenues by $8,000,000. The tax of 25 per cent on admissions to prize fights in the case of tickets costing $5 or more, contained in the House bill, is retained, however, by the Senate.

Seventh. The tax upon dues paid to social, athletic, or sporting clubs was reduced by the House bill from 10 per cent to 5 per cent. The committee recommends that the rate imposed by the present law be restored. The reduction proposed by the House bill would cost $5,000,000.

Eighth. The stamp tax on capital stock transfers which the House bill reduced from 2 per cent to 1 per cent, causing a loss of $8,800,000, is restored to 2 per cent.

Ninth. The stamp tax on "future" sales of produce on exchange, which was repealed by the House bill, is restored, saving $3,000,000.

Tenth. The House bill changed existing law relating to withholding at the source in the case of nonresident aliens and foreign corporations, so that in the case of 2 per cent tax-free covenant bonds the full amount of tax will be withheld. The bill as reported to the Senate retains this provision, and it is estimated that about $2,000,000 additional revenue will be received as a result.

Eleventh. The additional tax on prize fights will yield approximately $750,000.

Twelfth. The license fee of practitioners prescribing narcotics is increased from $1 to $3 a year, producing additional revenue in the sum of $290,000.

Thirteenth. The privilege granted to affiliated corporations of filing consolidated returns, which the House bill denied after 1928, is restored in the case of so-called "class A" affiliations—that is, affiliations through corporate ownership—and is denied to "class B" affiliations (affiliations resulting from ownership of two or more corporations by the same individuals). In addition, in order to eliminate the administrative problems of the present law, it is proposed to grant to the Commissioner of Internal Revenue power to prescribe regulations covering the entire subject. This matter is discussed in detail in the committee report.

Fourteenth. The provisions of the present law relative to dividends out of surplus accumulated prior to March 1, 1913, which were eliminated by the House bill are restored.

Fifteenth. The section of the House bill (section 104) attempting to strengthen the provisions of existing law relative to the attempted evasion of surtaxes by incorporation, through an arbitrary definition of a "personal holding company," is stricken out, and the provisions of existing law—section 220—are restored.

Sixteenth. Most of the retroactive administrative provisions of the House bill are eliminated or made effective only as to the future. For example, section 611 of the House bill, reopening cases in which the statute of limitations has run, is stricken out.

REDUCTION OF THE CORPORATION RATE

Corporations last received relief from taxation in the revenue act of 1921, which repealed the excess-profits and war-profits taxes, but also increased the income-tax rate. In 1926 the rate was again increased, so that under the present law the Federal Government exacts 13½ per cent of their profits. In 1924, for every dollar paid in dividends, 54 cents were paid in taxes to the Federal Government by corporations reporting a net income. When State taxation is also considered it will be seen that corporations are contributing a tremendous sum. For example, including both the Federal and State taxes, the percentages of taxes to net income ranges from 26.25 per cent in Michigan to 41.04 per cent in Connecticut, 47.72 per cent in Minnesota, and 49.78 per cent in Massachusetts. Again, it must be borne in mind that the stockholder of the corporation is subject to a surtax which he must pay to the Federal Government upon the dividends which he receives from the corporation.

It requires no argument to convince a thinking person that the corporation rate is out of line with the individual rates, is imposing an undue hardship, particularly in the case of small corporations, and should be reduced. The only issue is as to the extent of the reduction. Each one of us, admittedly, would like to see the rate reduced to 10 per cent. Unfortunately, however, we are limited rigidly by the revenue demands of the Government. Each 1 per cent reduction in the corporation rate involves a loss of revenue of $82,000,000. The increase in the exemption adds $12,000,000. Accordingly, $94,000,000 of the $200,000,000 reduction carried by the bill, or almost one-half, are devoted to corporations.

REPEAL OF THE AUTOMOBILE TAX

The tax upon the sale of automobiles produces $66,000,000 a year. It is easy of administration and the cost of collection is slight. The tremendous number of automobiles sold produces a large revenue with a very small rate and affords a revenue protected from violent fluctuations. The tax, in so far at least as the amount involved is material, is imposed upon those able to pay. The Secretary of the Treasury has recommended that the tax be retained. Although I personally would be glad to see it retained, it is rather difficult to answer the arguments of those advocating its repeal. It is the only tax imposed during the war producing any substantial revenue which remains. The automobile manufacturers have pledged themselves to reduce the delivered price of their cars so that the benefits of the repeal will be passed on to the purchaser. Under all the circumstances, the majority of the committee believed it expedient to approve the repeal of the tax.

READJUSTMENT OF INTERMEDIATE SURTAX BRACKETS

Certain classes of individuals are still paying more taxes than they were during 1917, and many are paying disproportionately greater taxes than other taxpayers. An unprejudiced examination of our present surtax brackets compels the conclusion that in all fairness the intermediate surtax brackets—that is, those particularly ranging from $28,000 to $80,000—should be readjusted, and the rates reduced.

There will be found in the committee report several tables showing the reductions recommended by the bill as reported by the committee. I have also had prepared for use in the Senate a chart showing the rates under the various laws and a table giving a comparison of the proposed surtaxes with the 1926 act surtaxes. It will be observed that the principal reduction applies to net incomes of $28,000 to $80,000, averaging about 10

per cent, and being distributed fairly uniformly. It will also be observed that the tax reduction in the case of incomes in excess of $150,000 is insignificant, amounting only to $470. The increases in incomes above this amount are not based primarily upon a desire to decrease the tax burden but rather upon a desire to retain a reasonably sound and scientific surtax schedule. A reduction of $470 to a man paying a tax of $100,000, for example, certainly can not be criticized as being excessive.

GRADUATED TAX ON CORPORATIONS

The House bill contains a provision for a graduated tax of 5 per cent, 7 per cent, and 9 per cent upon the taxable net incomes of corporations of $7,000, $12,000, and $15,000, respectively.

It is admitted by everyone that the only justification for a graduated tax is that it is based upon the theory that the greater the income the greater the ability to pay. In general, this proposition is, of course, true in the case of individuals. Notwithstanding the fact that a man with an income of $500,000 has proportionately greater expenses than a man with an income of $50,000, for example, the former does have a much greater balance out of which to make his contribution to the costs of the Government. But this is not the situation at all in the case of corporations. A corporation with a $500,000 income may have millions invested in the business, and its income may represent but a small percentage of actual profit, while a $50,000 corporation may actually be earning a much greater return upon its investment. It is the amount of the return upon the money invested, and not the number of dollars, which determines ability to pay. We must not overlook the fact that in essence the corporation tax is merely an expedient device for collecting at the source the tax upon the profits of the stockholders.

During the war we imposed a graduated tax upon corporations, but we did not select net income as the measure of the tax. Because of the fact that the ability to pay in the case of corporations depends to a large extent upon the capital invested in the business, we have provided that invested capital should be taken into consideration in computing the amount against which the rate was to be applied. I think we are all quite willing to admit that this tax is impossible of administration. We should not refuse to profit by our war experiences, close our eyes to the facts, and again attempt to restore the graduated tax on corporations as a part of our permanent tax policy.

CONSOLIDATED RETURNS

The subject of consolidated returns is discussed in detail in the committee report and the action of the committee fully explained. I do not believe it is necessary at this time for me to enlarge upon the remarks in the early part of my speech. I hope that the Senators interested in the provisions will find time to read the committee report. There is no gain in revenue to result from striking out the provisions of the present law. No real advantages are obtained, no taxes are saved by filing a consolidated return. The committee was unanimous, except possibly for one vote, in its decision that the present law should be retained, with the amendments heretofore discussed.

INSTALLMENT SALES

We have heard a great deal about the unfairness of the law and the regulations applicable to the taxation of gains from installment sales. The criticism is directed toward what is called the "double-tax" theory. I believe that practically everyone now admits that this theory is sound in so far as it is applied to the future. The criticism—and I am sure that most of you here have heard the rumblings—is directed toward the application of the theory to the past. The entire subject is discussed in detail in the committee report. If there were any sound principle upon which we could base relief for those taxpayers who relied upon the regulations of the Treasury, I should be glad indeed to assist in obtaining its enactment into law. Up to the present time, however, no satisfactory policy has been evolved.

The "double-tax" rule presents one of the strangest situations I have ever witnessed. Everyone upon hearing the matter discussed for the first time becomes almost enraged at the thought of taxing the same income twice. After a further study, however, the first reaction suffers a complete reversal. In an effort to present the picture in as brief a time as possible, I have had prepared a table showing the actual results of the application of the rule and of the refusal to apply the rule. I do not believe it is necessary to do more than point out to the Senate the actual facts.

INCOME-TAX SIMPLIFICATION

There has been considerable discussion about the possibility of simplifying our income tax laws. Simplification may be considered from three points of view: (1) Simplification of form; (2) simplification of language; and (3) simplification of policies.

The bill as passed by the House and as reported to the Senate to-day represents a decided step forward in simplification of form. This is accomplished in two ways. First, the bill differs materially from the revenue acts of 1918, 1921, 1924, and 1926. Each of those acts reenacted all the provisions of the preceding acts, with such amendments and omissions as changes in the policy required, and then repealed the preceding act, except as to rates and with certain other exceptions. A continuation of this policy will merely heap complexities upon complexities. There must be a fresh start. Accordingly, the pending bill is drafted so as to apply to 1928 and succeeding years. The taxpayer in 1928 or 1929 will not have to wade through the many complicated provisions which are of interest only to a taxpayer settling his case for 1927 or prior years. The next step toward simplification in form is presented by a rearrangement of the law. Eighty per cent of the taxpayers are not interested in the complicated provisions necessary for the proper determination of the tax liability of a large corporation, for example. Accordingly, general provisions, adequate for the vast number of ordinary taxpayers, are placed in the first part of the bill, and the provisions relating to extraordinary classes of taxpayers or which apply only to extraordinary transactions are placed in supplements.

The opportunity for simplification in language, it seems to me, is not so real as might be supposed. The real opportunity will be found only in changes of policies. Our present tendencies are toward further complications in policies rather than the elimination of the present complexities. Personally, I would hesitate to predict any substantial simplification in policies, at least until our tax rates are materially reduced.

SIMPLIFICATION OF ADMINISTRATION

It is my opinion, however, that a very real opportunity exists for a simplification in the administration of our internal revenue laws. Heretofore we have been proceeding upon the theory that an income tax can be determined by the application of ordinary mathematics. We have supposed that each class could be settled with absolute mathematical accuracy. We have insisted that every doubtful point be decided against the taxpayer, in order that the answer could be found through litigation.

As a matter of fact, it should be apparent that the only items which are really susceptible of exact determination are gross income and gross expenditures, in so far as each is reflected by actual cash. All valuations, allowances for depreciation or depletion, the charging off of bad debts, the reasonableness of expenses, and in fact practically every deduction from gross income, must be based upon more or less accurate estimates and the application of sound judgment.

As a direct result of this policy we are facing congestion in the courts, congestion before the Board of Tax Appeals, and congestion in the office of the general counsel. On March 1, 1928, there were pending before the Board of Tax Appeals 21,381 cases, involving asserted deficiencies aggregating more than $635,000,000. Working with the utmost expedition, the board can not be expected to dispose of more than 3,000 cases a year, otherwise than by stipulation. From July 1, 1927, to February 29 of this year the board had decided cases involving $81,000,000 in deficiencies asserted and had rendered decisions sustaining only 41 per cent of this aggregate amount.

From the point of view of the taxpayer, I do not believe that he can be expected to consent much longer to delays and postponements in the settlement of his tax liability for prior years. He should not be called upon to pay additional taxes several years after the transaction giving rise to the liability. He can justly complain of the tremendous cost imposed upon him in a settlement of his case through litigation. From the point of view of the Government it can well afford to settle cases administratively. In no other form of taxation have we insisted upon judicial determination. It is my opinion that the continued existence of the income tax depends upon our ability to produce a reasonably simplified and effective administration. The settlement of cases must be withdrawn from litigation. They must be settled administratively. In appreciation of the situation the Treasury last summer created a committee known as the special advisory committee. The primary function of this committee is to settle cases involving questions of fact. The Treasury is about to create a similar committee for the settlement of cases involving mixed questions of law and fact. A fundamental requirement, however, is that an adequate personnel be developed and retained, for the responsibility of settling cases can not be imposed upon inexperienced men and the policy can not extend further than the personnel permits.

I earnestly hope that the policy as outlined will prove successful in its application.

In furtherance of the desire to simplify the administration of cases and to close tax cases once and for all the pending bill contains a section permitting a closing agreement to be entered into by the taxpayer and the duly authorized representative of the bureau. If this agreement is approved by the Secretary of the Treasury, the Undersecretary, or an Assistant Secretary, the case can not be reopened, either administratively or judicially, in the absence of fraud or malfeasance or misrepresentation of a material fact. A second provision which has been inserted by the committee and which should prove effective in the final closing of cases permits a change in a regulation or Treasury decision to be given only on future application.

CONCLUSION

In conclusion, I may say that I hope to keep the bill before the Senate until it is finally disposed of, and that it will be acted upon in adequate time to permit agreement between the House and the Senate and final approval by the President. I sincerely trust that the amount of the reduction will be kept within the $200,000,000 mark determined upon by the committee.

Mr. BROOKHART. Mr. President, I would like to ask the Senator a question or two before he takes his seat. The estimated surplus would be about $400,000,000?

Mr. SMOOT. That was last year.

Mr. BROOKHART. What will it be?

Mr. SMOOT. It will be $212,000,000 in the coming year.

Mr. BROOKHART. The surplus will be $212,000,000?

Mr. SMOOT. Based upon existing law.

Mr. BROOKHART. And the total expenditures about four billion?

Mr. SMOOT. I gave the exact figures.

Mr. BROOKHART. A little less than four billion.

Mr. SMOOT. The exact figures are $3,642,021,000.

Mr. KING. Mr. President, that does not include, of course, the postal expenditures; there is a deficit there.

Mr. SMOOT. I will say to the Senator that in all the estimates the postal expenditures are taken care of by the postal receipts, and are not counted on either side. Whatever the deficit is we will make an appropriation for it, and that is in the estimate of the amount of expenditures.

Mr. BROOKHART. That is in the estimate?

Mr. SMOOT. Yes; whatever deficit there may be.

Mr. BROOKHART. It seems to me with as large an expenditure as that, and with as narrow a margin as that, there is not much chance for tax reduction at all.

Mr. SMOOT. No; not in that.

Mr. BROOKHART. If the farm bill with its four hundred million shall pass, there will be a considerable deficit.

Mr. SMOOT. If all the bills that are spoken of, and have been partially agreed to, and some of them completely agreed to, should become law, of course, there would be a deficit.

Mr. REED of Pennsylvania. There would not be a surplus.

Mr. SMOOT. No; there would not be a surplus.

Mr. BROOKHART. Not only would there not be a surplus but there would be a deficit. I am speaking of some of the bills that ought to pass.

The Senator spoke of refunding by the Treasury for a long time at 3⅜ per cent.

Mr. SMOOT. That was as to the bonds that fell due in 1928.

Mr. BROOKHART. What is the length of time those run under the new arrangement, if the Senator remembers? It was not in his statement; that is why I am asking the question.

Mr. SMOOT. They are divided up. If the Senator from Pennsylvania has the statement there, it will give the Senator from Iowa the exact amount.

Mr. REED of Pennsylvania. The 3⅜ per cent Treasury bonds issued in 1927 amounted to $494,000,000, and they fall due in 1947, but are callable in 1943.

Mr. BROOKHART. That was cited by the Senator as a saving.

Mr. SMOOT. It certainly was.

Mr. BROOKHART. But they can not be called until 1943.

Mr. SMOOT. Not until 1943.

Mr. BROOKHART. And if the interest rate drops down to 2⅜ per cent we will have a big loss on them.

Mr. SMOOT. If such a thing ever happens.

Mr. BROOKHART. That is what is was before the World War, and that is what it ought to be right now.

Mr. SMOOT. That was only as to short-time securities. There was no bond ever issued at that rate at any time.

Mr. BROOKHART. They were not issued, but they were sold.

Mr. SMOOT. They were not sold. They were short-time certificates, they were not bonds. They were purchased by the large investors, with a view of holding them until the time they had to raise the money invested, rather than keep the money on hand to meet the bonds.

Mr. BROOKHART. We send a vast amount of our money abroad at a high rate of interest.

Mr. SMOOT. That is not Government money; it is American money, but of business interests.

Mr. BROOKHART. That tends to keep the interest rate up in the United States, both on Government bonds and every other kind of bonds.

Mr. SMOOT. I assure the Senator he need not worry about that, because next year $2,000,000,000 of bonds will fall due.

Mr. BROOKHART. Two billion?

Mr. SMOOT. They are third Liberty loan bonds.

Mr. BROOKHART. Will they be refunded at a long time at 3⅜ per cent?

Mr. SMOOT. They will be refunded at a much lower rate of interest than they bear.

Mr. BROOKHART. It seems to me 3⅜, under the present circumstances, is too high a rate of interest.

Mr. SMOOT. It is a lower rate of interest than is paid by any other country in the world.

Mr. BROOKHART. That is no argument.

Mr. SMOOT. I say it is an argument.

Mr. BROOKHART. We are about the only solvent country in the world.

Mr. REED of Pennsylvania. Mr. President, within the next five years we shall have $14,000,000,000 worth of obligations falling due.

Mr. SMOOT. And next year two billion.

Mr. REED of Pennsylvania. If the rate of interest goes down, as suggested by the Senator from Iowa, we shall have ample opportunity to take advantage of it.

Mr. BROOKHART. We can do a great deal toward bringing that interest rate down if we handle this matter with that in view. We have not done that.

Mr. SMOOT. Even next year we will have $2,000,000,000 to work on.

Mr. BROOKHART. The general policy of the Federal reserve system and all the other economic combinations is to maintain the higher interest rate, to keep it high, and they have succeeded in doing that, I think. I am not sure whether this 3⅜ per cent is a good thing or a bad thing.

Mr. KING. Mr. President, I might suggest to the Senator from Iowa that English consols have been sold with an interest rate of 2 per cent, and with our superior credit——

Mr. SMOOT. Two per cent?

Mr. KING. Some English consols bear 2 per cent.

Mr. SMOOT. I have never seen one of them in my life, before the war, during the war, or after the war.

Mr. KING. I agree with the Senator from Iowa that there should be a reduction of the present interest rate paid by the Government of the United States when the next bonds are refunded. I think there should be a material reduction.

Mr. SMOOT. In one year there will be $2,000,000,000 due.

Mr. KING. I understand. I feel assured that when the refunding takes place there should be a material reduction.

Mr. BROOKHART. If English consols sell at 2 per cent, our bonds ought to sell better than that.

Mr. KING. With the superior credit of the United States over most countries, we should, of course, have a lower rate of interest for Government securities than any other country in the world.

Mr. BROOKHART. One of the complaints I have to make about the present economic situation is the high rate of interest being charged not only to agriculture—that industry is paying the highest, and it ought to pay the lowest—but to business generally. The interest rates are too high. The stock gamblers are the only ones who get a low rate of interest in the present situation.

Mr. SMOOT. That is on call money, and, of course, anybody who has credit can get the cheap rate of interest.

Mr. BROOKHART. That is call money, but it is called under circumstances that ought to be prohibited by law, not allowed at all.

Mr. SMOOT. That is another question entirely.

Mr. BROOKHART. We have outlawed that character of loans for rediscount purposes in the Federal reserve system. They have no right to rediscount them. Yet those same outlawed loans in the highest banking institutions of the country are getting generally the lowest rate of interest in stock operations.

Mr. REED of Pennsylvania. The Senator knows that over $100,000,000 is being loaned in Wall Street at the present time by banks in Iowa, does he not?

Mr. BROOKHART. There is probably three or four times that much, and that is one of the complaints I have to make. A banker in this city called on me to-day and said, "If I have surplus money to put in call loans up in New York and the bank examiner comes along and sees it is in call loans, that is all right; he says no more." I said, "What would he say if it was a loan to a farmer?" He said, "He would mark it up on the slow list, or something of the kind."

Mr. SMOOT. What would the Senator suggest to the Iowa bankers? Would he want them to hold the money in their banks and get no interest whatever on it? No bank in the United States, I do not care where located, is sending money to New York or to Chicago or to San Francisco unless it is doing it to secure some interest, even though small, on money that otherwise would have to be held as a reserve under the law.

Mr. BROOKHART. I will explain that a little later to the Senator, since he has asked the question.

Mr. SMOOT. I know about it; I do not need any explanation of it.

Mr. BROOKHART. One of the biggest bankers of my State, and as strong a standpatter as the Senator himself; one who would not talk to me about these matters until recently—several of them are getting so they will talk even to a "bolshevik" like me now—came to me and said he had $3,000,000 of deposits in his bank. He had $1,600,000 of that invested in New York. Part of it was on bank balances, or call, at 1¾ per cent, and the balance was in long-time bonds down there, the so-called liquid bonds they sell on the stock exchange, and he was getting a yield of about 4¼ per cent on that. He said:

> I am charging for the best business loans in my city 6 per cent, and I am charging the farmers 7 per cent. I am compelled to do that to keep my bank open. I am not doing it of my own choice. The bank examiner comes along, and if I lend this money to farmers or to business men who can not pay—and the farmer can not pay, under the bank rules, but has to renew all the time, and it is a short-time loan—it is marked as slow and no longer subject to rediscount under the Federal reserve system, and I am under suspicion. In order to keep my bank clean and up to the bank examiner's rules and the Federal reserve rules I am compelled to send that money into this big gambling mill in New York.

Mr. SMOOT. There is no place to send it in any other part of the country.

Mr. BROOKHART. That is what I am objecting to.

Mr. SMOOT. If the Senator was a banker and had piled up in his bank a million dollars in gold, and he knew there was no place to invest it or he could not invest it because of the fact that the million dollars was perhaps public money and could be called at any time, and he did not know whether it would be transferred in one week or two months or three months, and he was paying 1½ per cent upon it because it was public money, he would send it some place where he could get at least the amount of the interest he was paying on the money. Where would it go? It would go to the banks that would pay the highest rate for it, and they are in Chicago, San Francisco, and New York.

Mr. BROOKHART. If the economic situation in the whole country has destroyed the land values in my neighborhood, which it has done in my State, and destroyed the other values and the other earnings so that our securities are no longer reliable, I would like to see some change in the economic power at the top which is working that wreck and ruin of those banks.

Mr. SMOOT. Was there ever a time in the world when a banker could make a demand loan to a farmer or when a farmer would try to make a demand loan? He can not do it, and the Senator knows he can not do it. The bank gets just as much as it can get, and it has to keep a certain percentage of actual deposits on hand.

Mr. BROOKHART. Let me call the Senator's attention to the fact that the redepositing by one bank into another bank is reserve-bank business. That is not ordinary banking at all. That is the biggest function of the reserve bank. It is the biggest item of reserve-bank business. But under our reserve bank laws we have not allowed the Federal reserve bank to pay anything to a member bank for redeposit, not any rate whatever. We have compelled them to put the reserves in the Federal reserve bank without any compensation, and then they may deposit over and above the reserve, but get nothing for it. That gives the stock gamblers of the New York banks a virtual monopoly on all redeposit business in the country except the reserves that are compelled to go in the reserve bank by law. They put on their rate of 1¾ per cent and there is no place, as the Senator said, for that money to go except to go down to New York and take that 1¾ per cent in a gambling business that ought to be prohibited by law.

Mr. SMOOT. The banks do not conduct gambling, because the banks send their money to the banks of New York, which are perfectly sound. The Senator never heard of a bank failure of that kind.

Mr. BROOKHART. No; a gambling house, so far as I know, never loses money, only what it loses in the game.

Mr. SMOOT. They never lose any in the game.

Mr. BROOKHART. A good gambling house is never known to lose any money. But this is unlawful gambling that we have written into the Federal reserve law.

Mr. SMOOT. I am not saying anything about gambling houses in New York——

Mr. BROOKHART. We have denied them the rediscount privilege.

Mr. SMOOT. The Senator time and again has said on the floor of the Senate that he does not want the banks in his State to send their money to New York and deposit it there. I do not know what he would want done with it.

Mr. BROOKHART. I have just explained why, under this economic system, they are forced to do that thing.

Mr. SMOOT. Where would the Senator, if he were the president of one of the banks in Iowa, use that surplus money?

Mr. BROOKHART. I would be compelled, the same as these bankers are under the rules of the Federal reserve system and the rules of the bank examiners, to do just as they are doing.

Mr. SMOOT. There is no such rule. A bank does not have to send a dollar to New York unless it wants to do so. It can keep every dollar in its own safe if it sees fit to keep it there.

Mr. BROOKHART. If a situation is created where there is no place else to go and get any return, I would do as they have to do to get a little return.

Mr. SMOOT. If the Senator is going to get a return on his money, he would have to put it to work.

Mr. BROOKHART. The Senator from Utah has said there is absolutely no other place in the country where they can get any return on their surplus credit or surplus money. That economic situation is created by these laws and by the administration of the law to which I have referred.

Mr. SMOOT. No; that is just a natural result of natural laws. If the Senator is going to run a bank and the law requires him to keep 25 per cent of his deposits on hand, and he would allow that 25 per cent to contain the amount of money he put on call where he could call it and be absolutely sure that he could get it when he wanted it, he would adopt that exact plan. He would not have his 25 or 40 per cent of the deposits lying idle in his vault, would he?

Mr. BROOKHART. If the Senator wants me to suggest a remedy, I can say that the Federal reserve system could loan its long-time investment bonds to farmers as well as to the gamblers in New York, and this could be done through the reserve system itself.

Mr. REED of Pennsylvania. If the Senator had his way and required the Federal reserve banks to pay interest on the deposits of member banks, what would he suggest that the Federal reserve banks could do with those extra deposits which they would receive?

Mr. BROOKHART. I would suggest that they invest them in legitimate business and lower the interest rate generally in the country. That is the biggest function of the reserve banks to the public—to lower the interest rate generally. But in their book of questions and answers, at page 135, they have explained that if they paid interest on those redeposits they would then have to go out and invest them in order to get any money. That would increase the credit supply and do this thing that they ought to do, lower the interest rate, and that they do not propose to do.

Mr. REED of Pennsylvania. It seems to me it would increase the credit supply in one place and fail to diminish it in another, and the ordinary laws of business dealings are such that it would not change the general effect at all.

Mr. BROOKHART. So far as gambling in New York is concerned, that has created the biggest bubble of all history, and it can not do otherwise than burst. It would have burst long ago except for the fact that the situation is drawing in the surplus credit from the whole country to support that gigantic gambling bubble that is going on down there.

Mr. SMOOT. The world has been gambling ever since man was created, I think. I think when the second man came along they went right to gambling.

Mr. BROOKHART. Can the Senator state any bubble that did not burst as the result of such gambling operations?

Mr. SMOOT. They all do when they get to a certain limit and when they step over the bounds. When they get to a cer-

tain point they blow up, but that would not be settled by any proposition the Senator has made. The only proposition the Senator has submitted here to-day, and which he has submitted time after time upon the floor of the Senate, is that where a bank has a million dollars on deposit and the law requires that bank to keep 20 per cent of that deposit on hand, or $200,000, then out of the $800,000 remaining he may lend 60 per cent. He dare not go even that high, because he does not know when he may have a call made upon him. He may have it to-morrow or it may not be for a month. That changes the situation, and if he has any money lying there he says to himself, "I can not keep this money here. I have to get something out of it."

I call the Senator's attention to the fact that there is hardly a county or a city that makes a deposit in a bank that does not receive some remuneration for it in the way of interest upon the deposit. The bank can not lend every dollar of that deposit. The banker does not know how soon it may be called. So what does he do? He must have some way in which he can earn enough money at least to pay what he pays for the deposit. That is the reason why the money is in New York.

Mr. BROOKHART. Let us go back to the illustration I gave the Senator of the reserve which he is required to keep, which is 7 per cent.

Mr. SMOOT. No banker is going to run his deposits down and hold only 7 per cent.

Mr. BROOKHART. He had $3,000,000 of deposits, but $1,600,000 of it down in this gambling mill because it was unsafe under the rules of banking operations to lend that money on what used to be the best credit in the country, the Iowa farm.

Mr. SMOOT. There is not a State in the Union that would require more than 25 per cent of the amount of the deposits held as reserve.

Mr. BROOKHART. I am talking about a national bank.

Mr. SMOOT. Yes; a national bank or a State bank, either one. The law requires the same of each of them.

Mr. BROOKHART. The lowest per cent is 7 per cent, I believe, that is required to be held as a reserve.

Mr. SMOOT. There is no such thing as holding only 7 per cent.

Mr. BROOKHART. Of reserve?

Mr. SMOOT. Oh, yes. That is the reserve. That is not the amount that must be kept on hand, however.

Mr. BROOKHART. That is what I am talking about.

Mr. SMOOT. That is another thing entirely. No bank is going to have a million dollars of deposits and immediately lend it all out but 7 per cent. No bank would loan out the $930,000 and only have $70,000 on hand to meet demands. Any banker who would do that would go broke, of course.

Mr. BROOKHART. I think it does run somewhat higher than 7 per cent. The highest percentage under the Federal reserve law is only 15, I believe.

Mr. FLETCHER. Mr. President——

Mr. BROOKHART. I yield to the Senator from Florida.

Mr. FLETCHER. The Senator from Utah spoke about sending money into New York from other parts of the country in order to put it on call. The very purpose of the Federal reserve act was to keep the money in different localities and not have it go to New York.

Mr. SMOOT. But they can not loan it in the different localities.

Mr. FLETCHER. If they want to loan it there, why can they not do so?

Mr. SMOOT. So far as my State is concerned, I can tell the Senator why. We are allowed in the State to loan to any individual or any corporation only a certain percentage of the stock and surplus of the bank. If a bank has a capital of $100,000 and it has a surplus of $100,000, that bank can not loan in the State of Utah more than $30,000 to any corporation or any individual at any time, no matter whether they had $1,000,000 or $2,000,000 on deposit.

Mr. REED of Pennsylvania. The same is true of the national banks.

Mr. FLETCHER. That is, to any one borrower?

Mr. SMOOT. Yes.

Mr. BROOKHART. The time was when we could loan the surplus of the banks in Iowa.

Mr. SMOOT. They loan it out until nearly all of them went broke.

Mr. BROOKHART. Yes; after we got the help of the Federal reserve system and the War Finance Corporation and a few other schemes which were created down here in Washington. But before that we could lend it there in Iowa. We had the best credit in the world. Our values were the most stable, both our land values and the prices of our products. Then came along the high interest rates and high railroad rates and high returns to public utilities and high tariff rates and all, and now our values have broken down until our bankers do not dare lend their money to their own neighbors, but send it down to New York at a low rate of interest that break the banks finally because they send their money into the gambling game in New York.

Mr. SMOOT. If the banks lend to the farmers within the amount limited under the law that they are permitted to lend, they are perfectly safe in carrying it and they will never force a loan on the farmers. The only time they have ever been forced is when a situation existed such as has existed in the last year or two in Idaho and Iowa and other sections, where they loaned more money than the land was worth, and when the call came they could not get the money back and they could not sell the lands.

Mr. BROOKHART. The banks loaned very little money on land in Iowa.

Mr. SMOOT. Oh, Senator!

Mr. BROOKHART. The land loans are not made by the banks. The banks make short-time loans.

Mr. SMOOT. I know that so far as Idaho was concerned it broke over 100 banks in that little State, and their loans were all real estate. There was not any doubt about it.

Mr. BROOKHART. They made their loans on those lands, and then they had to take the real estate, which was the only security, and that closed the banks. That happened in Iowa, too; but that was not the original loan. It was not the original real-estate loan at all.

Mr. SHORTRIDGE. Mr. President, may I inquire of the Senator whether there are savings banks in Iowa?

Mr. BROOKHART. Yes.

Mr. SHORTRIDGE. Under the law and under their charters they may loan on real property—farm lands?

Mr. BROOKHART. But that is not the general loan business.

Mr. SHORTRIDGE. From whom does the farmer borrow?

Mr. BROOKHART. From the insurance companies and the trust companies and the land-mortgage companies.

Mr. SHORTRIDGE. Is the Senator complaining of the rates there?

Mr. BROOKHART. Yes; I am complaining all along the line. Those rates are too high.

Mr. SHORTRIDGE. How is the Senator going to correct or reduce the rates which he says are too high?

Mr BROOKHART. If the Government would fix a lower rate that would help.

Mr. SHORTRIDGE. But what is the Senator's remedy? Can he state it in a few words?

Mr. BROOKHART. I introduced a bill to remedy that and got five votes for it.

Mr. SHORTRIDGE. I do not recall what that proposed remedy was.

Mr. SMOOT. The Government will never loan money on real estate.

Mr. BROOKHART. No; but the rates could be reduced. That would have a tendency to reduce rates generally. That is where the proposition is material.

Mr. SMOOT. Perhaps the Senator can get money at less than 3⅜ per cent, but I do not know where it could be done.

Mr. SHORTRIDGE. I do not accept the statement, with great deference to the Senator, that Iowa is broke or that everybody is poor, ragged, and looking in vain for work. I think Iowa is one of the best States in the Union, and that if the true picture were drawn it would appear to be about as prosperous as any of the Mississippi Valley States. I think, indeed, it has the most fertile soil of all of the Mississippi Valley States, the best climate, ample water, and a growing population made up of the finest men and women in the land. I do not wish to appear to indulge in levity. Very seriously I object to the Senator's picture of conditions in Iowa, and I think, with due deference, that the Senator renders no service to his State by picturing it as bankrupt or upon the brink of bankruptcy.

Mr. BROOKHART. I remember the grand State of Iowa, which is the best agricultural spot in this big, round world, producing more out of the soil than any other spot in the world, when nearly all its farmers owned their homes. The 1925 census showed that 45.7 per cent of the farmers of Iowa were then tenants, and that percentage has largely increased since 1925. The Senator from Connecticut [Mr. McLEAN], to show the prosperity of Iowa, put figures in the RECORD showing that the farmers got $60,000,000 more for their crops in 1927 than they did in 1926, and he gave $712,000,000 as the total value. The farmers of Iowa were entitled to more than $900,000,000 in order to get a fair return and pay the cost of their production. They are still behind, and every sheriff's sale board in the State is plastered over with notices of foreclosures

of mortgages at this time. I practiced law for 30 years in Iowa and did not know what a foreclosure was. We did not have them.

No; the Senator does not need to tell me about Iowa. I know when our farmers were able to save enough money so that in their old age they could go to California and stay through the winter, and some of them stayed there and even came back to the United States Senate. I know enough about the farmers of Iowa to know that they are not going to California now and have not gone to California since 1920. I think California had better get behind Iowa and help Iowa back on the level where she once was, because Iowa was the best contributor of all to the prosperity of California.

Mr. SHORTRIDGE. And a solid Republican State.

Mr. BROOKHART. Yes; though I remember when California voted for Woodrow Wilson.

Mr. SHORTRIDGE. She faltered once or twice. If Iowa is in such a deplorable condition, perhaps the Senator has put his finger on the reason, namely, that her more progressive and intelligent and capable people have gone to live in California.

Mr. BROOKHART. That may be the reason, but there are some other reasons why the intelligent farmers of Iowa went to California. Those reasons are the discriminations against agriculture in railroad rates. The Esch-Cummins law, for which the Senator voted here in the Senate——

Mr. SHORTRIDGE. No!

Mr. BROOKHART. The Senator did not? I am glad he did not. It is one good thing we can say about his record here.

Mr. SHORTRIDGE. I was not here then. [Laughter.]

Mr. BROOKHART. That is the only reason, then. I take it all back. [Laughter.]

Here are the bank rates. The national banks of the United States are earning 8.34 per cent while Iowa national banks were earning nothing, and going broke besides. The railroads are earning 5¾ per cent by law on a valuation that amounts to more than 9 per cent if we should value them as we did the farms. Public utilities are getting court decisions for 7 per cent return on their capital investment, and that often inflated. The protected industries are earning all kinds of percentages, clear up to the sky, under the protection of the law. The patented industries, again, have a protection of the law that gives them a profit. On the other hand, the whole people of the entire country are only producing 5½ per cent; and Iowa, with a $3,000,000,000 reduction in her capital values since 1920, has not receipts enough to pay her expenses and taxes.

Mr. SHORTRIDGE. If Iowa, then, is in such a depressed and regrettable condition, I am curious to understand why, just across the Mississippi River, to the east, Illinois is not in like condition, or Missouri, to the south, or Nebraska, to the west, or Minnesota, to the north. Is it possible that all this evil has fallen right upon the sacred soil of Iowa?

Mr. BROOKHART. It is not. The condition in Illinois is almost as bad as in Iowa. The Senator has not looked around. He has not studied the agricultural question. He knows nothing about this situation.

Mr. SHORTRIDGE. I was born on a farm and reared on a farm.

Mr. BROOKHART. Yes; and the Senator has kept away from it ever since.

Mr. SHORTRIDGE. No, indeed; I have not. I was about to tell a story on that point, but I will leave that to the Senator from Alabama [Mr. HEFLIN].

Mr. BROOKHART. The Illinois farmers are but little better off than those of Iowa. Some of them, being tributary to Chicago and having a special market, are a little better off; and yet I rode out 20 miles from the center of the city of Chicago and found abandoned farms within the last six months.

In Minnesota the agricultural situation is no better. I have been through that State. It is no better in Nebraska. It is the same everywhere. There is a general discrimination against agriculture, and even the Senator from Connecticut, who put in the RECORD the figures about the prosperity of Iowa, told me himself that 90 per cent of the farmers of his State were on the verge of bankruptcy.

Mr. SHORTRIDGE. I can not believe that Iowa is in such a sad condition.

Mr. BROOKHART. It is not Iowa; it is agriculture, and it is agriculture everywhere.

Mr. SHORTRIDGE. Your poultry industry certainly is most profitable.

Mr. BROOKHART. And yet you want in this bill to reduce the taxes on the millionaires of the country who have gained their profits from the farmers of Iowa.

INVESTIGATION OF PUBLIC UTILITY CORPORATIONS

Mr. SHIPSTEAD. Mr. President, I report from the Committee on Printing a resolution, and ask for its present consideration.

Mr. SMOOT. What is the resolution?

Mr. SHIPSTEAD. It provides for the printing of the report of the Federal Trade Commission on the water-power investigation that is now being conducted in compliance with the resolution of the Senate.

Mr. SMOOT. I have no objection.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair). Is there objection to the consideration of the resolution?

Mr. CURTIS. Let it be read.

The legislative clerk read the resolution (S. Res. 221), and there being no objection, it was considered by the Senate and agreed to, as follows:

*Resolved*, That the reports submitted to the Senate, or which may hereafter be filed with the Secretary of the Senate, pursuant to Senate Resolution 83, current session, relative to the investigation by the Federal Trade Commission of certain electric power and gas utility companies, be printed, with accompanying illustrations, as a document.

REFUND OF TAXES ON DISTILLED SPIRITS

Mr. BARKLEY. From the Committee on Finance I report back favorably, without amendment, House bill 12733, and ask unanimous consent for its present consideration.

Mr. SMOOT. Mr. President, is that the House bill dealing with the rate on distilled spirits?

Mr. BARKLEY. Yes, sir.

Mr. SMOOT. I have no objection.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which was read, as follows:

*Be it enacted, etc.*, That in addition to the authority contained in the act entitled "An act to refund taxes paid on distilled spirits in certain cases," approved February 11, 1925, the Commissioner of Internal Revenue may allow the claim of the owner (whether the distiller or his successor or other person) for the refund of taxes paid (whether by such owner or any other person) in excess of $2.20 per proof gallon on any domestic distilled spirits which are now in a tax-paid warehouse operated in connection with and contiguous to an internal-revenue bonded warehouse, if proof satisfactory to the Commissioner of Internal Revenue is furnished of the ownership and identity of the distilled spirits as to which the refund is claimed, and of the amount of tax paid thereon. The Commissioner of Prohibition may direct that any spirits on which a refund of tax is paid under this act shall be removed to and stored in a warehouse designated by him.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

CALL OF THE ROLL

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Barkley | Frazier | King | Sheppard |
| Bayard | George | La Follette | Shipstead |
| Bingham | Gerry | Locher | Shortridge |
| Black | Gillett | McKellar | Simmons |
| Blaine | Glass | McNary | Smoot |
| Blease | Goff | Mayfield | Steiwer |
| Brookhart | Gooding | Moses | Stephens |
| Broussard | Gould | Neely | Swanson |
| Bruce | Hale | Norbeck | Thomas |
| Capper | Harris | Norris | Tydings |
| Caraway | Harrison | Nye | Tyson |
| Couzens | Hawes | Overman | Vandenberg |
| Curtis | Hayden | Phipps | Walsh, Mass. |
| Cutting | Heflin | Pine | Warren |
| Deneen | Howell | Reed, Pa. | Waterman |
| Edge | Johnson | Robinson, Ark. | |
| Edwards | Kendrick | Sackett | |
| Fletcher | Keyes | Schall | |

The PRESIDING OFFICER (Mr. SACKETT in the chair). Sixty-nine Senators having answered to their names, a quorum is present.

COMMENTS ON SPEECH OF SENATOR HEFLIN IN WINSTON-SALEM, N. C.

Mr. SIMMONS. Mr. President, I ask unanimous consent to insert in the RECORD, without reading, an editorial from the Winston-Salem Journal, edited by Mr. Santford Martin, one of the ablest editorial writers in my State, entitled "The same Senator HEFLIN." It has reference to the speech made by the senior Senator from Alabama in that town a few nights ago.

The PRESIDING OFFICER (Mr. VANDENBERG in the chair) Without objection, it will be so ordered

The matter referred to is here printed, as follows:

THE SAME SENATOR HEFLIN

Senator HEFLIN is the same Senator HEFLIN he was in 1922 and in 1914 when he spoke in Winston-Salem upon the invitation and under the auspices of the Forsyth County Democratic executive committee. He is the same Democratic leader now that he was then. He is a bit older, but he still speaks with the same fire and enthusiasm and logic that characterized his unanswerable address here during the Wilson administration—a speech that the Democratic county executive committee thought so much of that they had a stenographer present to take down every word of it and later had it published in full for wide distribution. HEFLIN hasn't changed. He is fighting the same insidious foes of democracy now that he was fighting then.

In 1914 and 1922 HEFLIN was fighting the enemies of Woodrow Wilson and all that Wilson stood for, of which Tammany Hall was chief. HEFLIN is still fighting Tammany Hall and correctly brands it as the most deadly enemy the Democratic Party has now or ever has had in this Nation.

HEFLIN is the same HEFLIN and Tammany is the same Tammany. HEFLIN is the man who stood by Cleveland, and Bryan, and Wilson, and Cox, and Davis. Tammany is the corrupt organization that betrayed and deserted and knifed Cleveland, and Bryan, and Wilson, and Cox, and Davis. HEFLIN has always been true to the Democratic Party. Tammany has never been true to the Democratic Party.

The Journal submits this in justice to Senator HEFLIN, who has been denounced and abused and vilified from one end of this country to the other by the agents and emissaries of Tammany Hall for no other reason than that he will not cringe and crawl to do the bidding of Tammany, which has made up its mind to nominate a candidate for President at any price.

But the agents and supporters of Tammany will not get anywhere in North Carolina with denunciation of Senator HEFLIN. The only way they can ever make headway against HEFLIN among the rank and file of North Carolina Democrats is to answer him. HEFLIN'S Winston-Salem speech was filled with facts from the official records. In the light of these facts, The Journal submits that the people want argument, not abuse.

Tammany agents had told us HEFLIN was an intolerant bigot. For 2 hours and 10 minutes he held 8,000 people hanging on his words, and not one intolerant or bigoted sentence did he utter in this city. They told us he was coming to Winston-Salem to attack the religious faith of good people. Not one word did HEFLIN say against anybody's religious faith. On the contrary, he went out of his way to assure his audience that he stood four-square on the Constitution of the United States, which guarantees to every person free and equal opportunity to worship God according to the dictates of his own conscience.

The main theme of HEFLIN'S address here was the first amendment to the Constitution of the United States—that amendment so dear to all good Americans which guarantees separation of church and state, free speech, free press, and the right of peaceful assembly.

HEFLIN did attack with all the logic and eloquence at his command the political activity of the Knights of Columbus when that organization, which claims to represent 800,000 Roman Catholics in the United States, recently passed a resolution denouncing our Government's peaceful policy of dealing with Mexico and demanding that our Government send an army to Mexico to restore the Roman Catholic Church to power in that country.

HEFLIN planted both feet on the first amendment to the Constitution when he said that he would never vote to send the Army of the United States anywhere to fight for the supremacy of any church or secret order, not even for the great Methodist Church, of which he is a member, or for the Masonic Order, of which he is also a member.

Now, is HEFLIN right or wrong in taking this position? The issue is fundamental. It involves the one most vital section of the Constitution. It involves the very life and liberty of the American people.

Do Al Smith and Tammany Hall agree with HEFLIN and a majority of the Senate of the United States on this issue? Or do Al Smith and Tammany Hall agree with the Knights of Columbus? Smith has not said. Smith has not said anything about any issue except prohibition. Tammany has not spoken. By their silence, in the face of such a resolution, by their refusal to condemn the un-American spirit of such a resolution, both Smith and Tammany must be judged.

If Tammany and Smith do not hesitate openly and brazenly to nullify and spurn the eighteenth amendment to the Constitution of the United States, why should they not also favor nullification of the first amendment? One section of the Constitution is no more sacred than another.

Should the Army of the United States ever be used to aid any particular religious sect in a foreign country? HEFLIN is a Member of the United States Senate. He is one of the men who must decide that question. The Senate can declare war or it can declare peace.

Not until the Knights of Columbus came forward with its denunciation no American organization had ever openly demanded nullification of the first amendment and abrogation of the principle of separation of church and state. For a century Methodists were persecuted in Mexico, but no Methodist organization ever demanded that the United States Army be used against the then Roman Catholic government of Mexico. Baptists were persecuted in Rumania, but no Baptist organization asked for the American Army. They appealed to Queen Marie. The Moravians have had trouble in Nicaragua, but the Moravians have demanded no army. Masons are being persecuted in Italy, but no Masonic organization has demanded that our Army be sent to Italy. Under the constitution of the Argentine Republic no Protestant is permitted to govern that country, but no American Protestant organization ever demanded war with that Republic.

This is a vital question. It strikes deep into the very foundation of all that we know as Americanism. If Al Smith is going to speak out on anything, he should let the American people know where he stands on this issue. Tammany Hall should take a stand. It is not enough to merely abuse Senator HEFLIN.

FARMERS' PRODUCE MARKET

Mr. GLASS. Mr. President, I ask unanimous consent to take up Order of Business No. 689, being House bill 8298, relating to the location of the farmers' produce market.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Virginia?

Mr. HEFLIN. I have no objection to the Senator getting the bill up. I hope his request will be granted. Then I want to ask the Senator to let me call up a bill, if there is no objection to it.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 8298), authorizing acquisition of a site for the farmers' produce market, and for other purposes.

The PRESIDING OFFICER. The Senator from Virginia [Mr. GLASS] is entitled to the floor.

Mr. HEFLIN. Mr. President, now will the Senator from Virginia permit me to call up a calendar bill, Order of Business No. 866, Senate bill 3845?

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from Alabama for that purpose?

Mr. HEFLIN. It will take only a moment.

Mr. GLASS. I yield if I do not thereby lose the floor, and if the farmers' produce market bill is not displaced.

The PRESIDING OFFICER. The Chair can not guarantee that, if any Senator raises the point of order.

Mr. HEFLIN. I was asking unanimous consent.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alabama?

Mr. HEFLIN. It is a bill providing a penalty against predictions on the price of cotton. If we do not get it over to the House promptly, it will not go through.

Mr. BRUCE. Mr. President, I object. That really is a question, it seems to me, which calls for some discussion.

Mr. GLASS. If the bill is going to lead to discussion, I can not consent to its consideration at this time.

Mr. BRUCE. I am sorry, I will say to the Senator from Alabama, but I really do not feel that I can unite in that unanimous-consent agreement. I should like to have an opportunity to consider the bill to which the Senator refers. I have been disposed to favor it.

Mr. HEFLIN. The Senator from Maryland now objects to allowing a penalty to be provided against those who predict the price of cotton against the cotton farmers of the South.

Mr. BRUCE. I want to read the bill and weigh it a little bit.

The PRESIDING OFFICER. Objection is made.

Mr. GLASS. Mr. President, I am ready to vote on this bill, if nobody else desires to speak on it.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Maryland [Mr. TYDINGS].

Mr. GLASS. I am willing to vote on the amendment. I am not inclined to speak further on the bill at this time.

Mr. BRUCE. Mr. President, the Senator from Virginia reminds me of a man who sits down to a table, is in a state of complete repletion, and then does not see any reason why anybody else should be hungry. He spoke for about two hours.

Mr. GLASS. Mr. President, I spoke exactly 40 minutes, and I have not half finished my meal.

Mr. BRUCE. It seemed two hours.

Mr. GLASS. I wanted to give the Senator from Maryland an opportunity to regale himself somewhat.

The PRESIDING OFFICER. The Senator from Maryland [Mr. BRUCE] is recognized.

Mr. BRUCE. I hope the Senator from Virginia will continue his very able and most interesting argument. I understand that he had not entirely completed it.

Mr. GLASS. Mr. President, it is my purpose to conclude the debate on the question. If the Senator from Maryland does not care to proceed, I have presented reasons enough to justify the rejection of the amendment and the passage of the bill; and therefore I call for a vote on the amendment.

The PRESIDING OFFICER. The question is upon the amendment of the Senator from Maryland [Mr. TYDINGS].

Mr. LA FOLLETTE. Let it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. The Senator from Maryland [Mr. TYDINGS] proposes to strike out all after the enacting clause and to insert in lieu thereof the following:

The Commissioners of the District of Columbia are hereby authorized and directed to acquire by purchase or by condemnation, or partially by purchase and partly by condemnation as they may deem best in the public interest, suitable land, north of Pennsylvania Avenue, within the District of Columbia, for use by the District of Columbia in conducting and operating a market devoted to the wholesale and retail purchase and sale of products of the farm and such other market purposes as the said commissioners may deem proper. There shall be constructed on said land, after same has been acquired, buildings, structures, rest rooms for women, dormitories, and such other improvements and facilities as the said commissioners may deem necessary for the operation of a market and for the public convenience and comfort.

SEC. 2. For the acquisition of said land for said market, there is authorized to be appropriated the sum of $300,000, or so much thereof as may be necessary, payable out of any funds in the Treasury of the United States not otherwise appropriated, and charged against the revenues of the District of Columbia as are other appropriations to cover the expenses of the government of the District of Columbia. There is also authorized to be appropriated in the same manner such sum as may be necessary for clearing, grading, removing buildings from the said lands, and all incidental expenses in connection with preparing said land for use as a market, for construction of necessary buildings and other improvements thereon, and for expenses of conducting and operating said market, including personal services.

SEC. 3. The said commissioners are authorized and directed to fix and establish such reasonable rents, fees, and charges for use and occupancy of space on said market for the sale of commodities as they may determine and to change same from time to time. The said commissioners are also authorized to make and promulgate, and to amend when they deem desirable, all necessary rules and regulations regarding the operation of said market and the use or occupancy thereof, and to provide for the enforcement of such rules and regulations by prescribing reasonable penalties for violations thereof, not to exceed $25 for each offense; and said commissioners may enforce in any court of the District of Columbia having jurisdiction of minor offenses, and in the same manner as such minor offenses are now by law prosecuted and punished. The regulations herein provided for shall when adopted be published in one or more daily newspapers published in the District of Columbia and no penalty for violation of same shall be enforced until 30 days after such publication.

SEC. 4. Selection of the land acquired under the provisions of this act shall be made jointly by the Commissioners of the District of Columbia, the Director of the Office of Public Buildings and Public Parks of the National Capital, and the Secretary of Agriculture or some official of the Department of Agriculture designated by the said Secretary for that purpose.

SEC. 5. All moneys collected under the provisions of this act shall be paid into the Treasury of the United States to the credit of the District of Columbia.

Mr. GLASS. Mr. President, I think I presented sufficient reasons to the Senate against the adoption of this amendment, which would preclude every consideration of sites except what is known as the Patterson tract, which is an impossible site, and I am ready to vote on the amendment.

Mr. BRUCE. Mr. President, I understood that the Senator from Kansas [Mr. CAPPER] and the Senator from Wisconsin [Mr. BLAINE] wished to say something in relation to this amendment, but neither of them seems to be present, so I will submit a few observations with regard to it myself.

It seems to me that nothing could be more clearly demonstrated by testimony than the unfitness of the southwest site, on which the Senator from Virginia [Mr. GLASS] has laid so much stress, for the purposes of a farmers' produce market. Nothing, it further seems to me, could be more completely established by testimony than the fact that this market should be established somewhere north of Pennsylvania Avenue.

It has been my wish not only that it should be established north of Pennsylvania Avenue, but that it should be established upon some site selected by the District Commissioners, and quite a number of such sites have been offered, of which any one, in my judgment, whatever may be its limitations or imperfections, would be a better site, for the purposes of a farmers' produce market, than the southwest site.

The Senator from Virginia has denied that the influence of the Pennsylvania Railroad or any other railroad has had anything to do with the formation of his views with respect to the expediency of selecting the southwest site as the site of the farmers' produce market. Of course, I accept that denial without the slightest degree of reservation, because nobody knows better than I do the finality, so far as accuracy and truthfulness are concerned, of any such statement when made by my friend the Senator from Virginia [Mr. GLASS]. But it is my belief, nevertheless, that the controversy involved in this bill as to whether this site shall be the southwest site or some site north of Pennsylvania Avenue resolves itself into a controversy between the Pennsylvania Railroad and the southern roads affiliated with it, on the one hand, and the farmers of Maryland, Virginia, and the District of Columbia, the commission merchants of Washington, and the great body of the citizens of Washington represented in the Federation of Citizens' Associations of the District of Columbia, which includes some 55 civic organizations of one sort or another on the other hand. In other words, on one side of the controversy, as I look at it, we find the Pennsylvania Railroad, the Southern Railway Co., the Seaboard Air Line, the Atlantic Coast Line, all railroads which use the Potomac Yards; and on the other, the mercantile interests of the city of Washington, the great body of its citizens, and the farmers for whose benefit, to a great extent, at any rate, a farmers' produce market is supposed to exist.

There has been much talk here, in one connection and another, about the claim that the farmer has to the consideration of Congress, and, as we all know, there is no subject that lends itself more readily to demagoguery and claptrap than that, despite the fact that there is none which more justly calls for both sober and generous treatment. But I take it for granted that there is no public representative who would not be prompt, whenever the proper occasion arose, to do something, to use the phrase that is so often employed, for the farmer, for the man who is the very heart, the very backbone, in the final analysis, of the American body politic.

Of the number of farmers who bring in farm produce to the farmers' produce market of Washington, 465 are Maryland farmers, 81 are Virginia farmers, and 55 are District of Columbia farmers. I am warranted by the testimony in saying that every single one of those farmers has appeared in person or by proxy before the Senate District Committee asking that the site of the new farmers' produce market be somewhere north of Pennsylvania Avenue. It is they, mind you, who bring the fresh celery, the fresh asparagus, the fresh peas, and the other fresh vegetable products in their trucks to the present farmers' produce market in this city. It is their business that is supposed, and justly supposed, to keep down the retail cost of such vegetable products for the citizens of Washington.

I wish Senators could have seen that group of farmers. A sturdier, a more splendid body of men I have never seen in my life, for they are true sons of the soil, bronzed by the wind and the sun, deriving their strength, as Antæus of old did, from the soil, and fully answering in every respect the description of Thomas Jefferson when he said that the most virtuous and the most useful of all citizens is the husbandman.

There they were before the Senate committee in an absolutely solid, unbroken phalanx, and I especially call the attention of the Senator from Idaho [Mr. GOODING] to this fact, because he is a friend of the farmer, if there is one upon the floor of the Senate, asking that this market be placed nowhere except upon some location north of Pennsylvania Avenue.

Is the voice of all those farmers to go for nothing? Is the little finger of the Pennsylvania Railroad to be stronger than their loins, those sturdy loins which are girded up each day for toil, from sunrise to sunset, and at the present time under harsh, distressing conditions. Whatever may be the proper remedy for those conditions surely must make an affecting appeal to every feeling heart in Congress.

Many of those farmers come in with their trucks from the north and the northeast areas that border upon Washington, and if the southwest site is selected as the site for the proposed produce market, they will have to pass through the most congested portion of the city to get to it. Indeed, they would not reach the location where their produce was to be disposed of until they should have traversed the city to the extent of one mile and a half south of the present site of the southwest market.

An attempt was made in committee by some of the advocates of the southwest site to turn to controversial advantage the fact that a part of those Maryland farmers come from the southern part of Maryland, and not from the territory in Montgomery County, Md., north or northeast of Washington. But I ask Members of the Senate to remember in this discus-

sion that, no matter from what point of the compass these Virginia, these Maryland, these District of Columbia farmers come to the produce market, each and all of them wish the site of the market not to be the southwest site, but some site north of Pennsylvania Avenue.

I repeat, is that great unanimity of desire upon the part of the farmers who are to stock this new produce market with fresh vegetables to be disregarded, to be ignored? No; not under any circumstances; but certainly not when the wishes of the farmers are reinforced by the wishes of 85 per cent of all the commission merchants of the city of Washington with whom these farmers deal to no small extent. They, too, wish to have the market located north of Pennsylvania Avenue.

It is said that the present farmers' produce market was intended originally to be a wholesale as well as a retail market, and that to-day it is largely a wholesale market. That wholesale marketing now exists south of Pennsylvania Avenue is, it seems to me, a point that should have no decisive weight in this case. All the marketing activities of the city of every kind should be assembled in the same place. Only in that way can a proper relation of coordination be established between them. If it is wise that the other market activities of the city should be seated north of Pennsylvania Avenue, to the north of that avenue should also gravitate the wholesale marketing activities of Washington.

There and only there can the wishes of the farmers be gratified. There and only there can the wishes of the commission merchants be fulfilled. There and only there can the wishes of the members of some 55 civic organizations of the city of Washington be carried out. There alone can the convenience of the hotels and boarding houses, of the restaurants and lunch rooms, and of the retail grocery stores and other patrons of the Washington market be fully met, and there and there alone should this new farmers' produce market be established.

We do not have to resort to railroad experts or to sources of one sort or another, deeply tinged with self-interest, to determine where this new produce market, if it is to be disinterestedly placed, should be placed. The whole matter has been made the subject of special study by two thoroughly scientific agencies whose views about it would seem to be highly entitled to respect. One of those agencies is the National Capital Park and Planning Association, a body to whose judgment certainly a high degree of deference might well be accorded. It believes that the new farmers' produce market should be established north of Pennsylvania Avenue.

The other agency is the United States Bureau of Efficiency, whose business it is to be influenced alone by considerations of efficiency in arriving at its conclusions, and what, pray, are the conclusions of this bureau in the matter of the new farmers' produce market? They have been summed up in a report made by them and which was brought out in the course of the consideration of the pending bill. They have reached certain specific conclusions, and I do not see how I could possibly bring stronger or more convincing persuasion to bear upon the Senate than merely to read those conclusions. Here is what they say:

The farmers' produce market should not be located south of Pennsylvania Avenue for the following reasons——

Mr. TYDINGS. Whose report is that?

Mr. BRUCE. The report of the United States Bureau of Efficiency.

1. Because nearly every customer of this market would be compelled to go through the downtown congested zone of the city to reach the market.

Mr. GLASS. Mr. President, will the Senator be good enough to give me the reference?

Mr. BRUCE. I am reading from a part of the minority report of Mr. GIBSON, of the House Committee on the District of Columbia.

Mr. GLASS. Is the Senator reading from the report of Mr. GIBSON or reading from the report of the Bureau of Efficiency, because I have a statement from Mr. Brown, of the Bureau of Efficiency, that the Bureau of Efficiency had taken no position with respect to it?

Mr. TYDINGS. I would like to say that I had a talk with Mr. Brown only two or three days ago, in which he said that we are right on this question, that the market ought not to be built now, but its location ought to be left to experts, as the Senator from Maryland has stated.

Mr. GLASS. Mr. Brown twice within 10 days, and I make no mistake because there could be no mistake about it, stated differently to me. I sent for him to come to my office and catechised him on this question, and he has twice within 10 days explicitly stated to me that the Bureau of Efficiency had taken no position whatsoever upon this market.

Mr. BRUCE. Mr. Brown has placed himself upon record, and what he believes and what he does not believe depends upon his testimony in this case.

Mr. GLASS. I repeat, is the Senator reading from the report of Mr. GIBSON or is he reading from an official report of the Bureau of Efficiency?

Mr. BRUCE. I am reading from the report entitled "Report on relocation of farmers' produce market by the United States Bureau of Efficiency," which was attached as an appendix or exhibit to the minority report prepared by Mr. GIBSON of the Committee on the District of Columbia of the House of Representatives, and filed on February 15, 1928.

Mr. TYDINGS. Mr. President, will my colleague yield?

Mr. BRUCE. Certainly.

Mr. TYDINGS. Inasmuch as he has been shown that the Bureau of Efficiency are opposed to the bill as outlined by the Senator from Virginia, I trust now that the Senator from Virginia will withdraw his support from the bill and let the Bureau of Efficiency recommend where they think the market should go.

Mr. GLASS. Oh, no; because the proof on the other side of the question is so conclusive as that the Bureau of Efficiency would be humiliated if they have made any such recommendation. Mr. Brown told me explicitly they have not made any recommendation.

Mr. TYDINGS. We have his written recommendation.

Mr. GLASS. Let us see whether we have or not.

Mr. BRUCE. I have read the first reason given in the report of the United States Bureau of Efficiency why the new farmers' produce market should not be located south of Pennsylvania Avenue, and I will proceed:

2. Because every farmer coming into the city from the north and west would have to go through the down-town congested zone of the city.

3. Because the Federal development of the Mall triangle will further add to the congestion of the so-called down-town congested zone.

4. Because there are only four north-and-south highways running through the Mall that would be convenient to southwest sites Nos. 1 and 2, viz, Sixth, Seventh, Twelfth, and Fourteenth Streets.

5. Because it is impossible to extend either Eighth, Ninth, Tenth, Eleventh, or Thirteenth Streets through the Mall on account of existing public buildings or projected ones.

6. Because the Federal building program for the Mall triangle will undoubtedly necessitate the changing of existing car tracks and the rerouting of all street-car lines traversing this area.

7. Because four-fifths of the entire population of the District of Columbia live north of Pennsylvania Avenue.

8. Because more than nine-tenths of the hotels and boarding houses, more than four-fifths of the restaurants and lunch rooms, and more than three-fourths of the retail grocery stores are located north of Pennsylvania Avenue.

9. Because the future expansion of the city—in population and in the number of hotels and boarding houses, restaurants and lunch rooms, and retail grocery stores—will in a large measure be north of Pennsylvania Avenue.

10. Because at least 20 per cent of the business of the farmers' produce market is a retail business, which in a large measure would be lost to the farmers if the market is located in southwest Washington. This retail business amounts to more than $600,000 per year.

11. Because it would send through the Mall triangle and the Mall a lot of the objectionable traffic.

12. Because the southwest area lacks in street-car facilities as compared with other sections of the city.

Indeed, as I understand, there is only one street-car line that contributes to the accessibility of the southwestern site.

There they are, no less than 12 sound, specific reasons given by the United States Bureau of Efficiency why in no event should the site of the new farmers' produce market be south of Pennsylvania Avenue.

It is true that the District Commissioners did, though in a rather halting manner, it seems to me, at one time express a preference in favor of the Southwest site; but, as I understand it at the present time, they are declining to commit themselves upon the subject.

It has been said that this market should be located in the southwest part of Washington, in that remote location there, because the southwest site is on the shore of the Potomac River, and because there is already a fish market there. When these reasons are examined they will be found, I apprehend, to be without any substantial force. No produce worth speaking of is brought to Washington by way of the Potomac River, except such as is brought up from Norfolk and points on the Potomac

River in the Norfolk boats, most of which is taken away from those boats, when they are moored at their wharf in the city of Washington, directly to the business houses of one description and another which are in the habit of getting their produce from those boats. Apart from that produce, none but a negligible amount of produce finds its way to Washington by water.

There was a time when the Potomac might have furnished an extremely convenient agency of transportation for marketing purposes, but that day is past. Now produce from regions as remote as the lower regions of the Potomac and beyond can far more satisfactorily be brought to Washington by trucks over the improved highways of our time than by water. So, without a moment's hesitation, the Senate may dismiss from its mind any supposed advantage to the city of Washington derivable from the fact that it abuts the waters of the Potomac River.

Nor need the Senate pay any attention to the fact that there is a fish market at the present time at the southwest site. It is not, I imagine, an uncommon thing in cities to find a fish market totally detached in point of proximity from the other marketing facilities of the city. That is true in the city of Baltimore. Before the great fire which laid flat a considerable part of that city in 1904 there was a general market, called the Marsh Market, which was located near the water front of Baltimore. That market was destroyed by fire. When the city came to rebuild a fish market, under the very best architectural and engineering advice, it built it all to itself.

But, aside from such considerations as a fact like that suggests, it so happens that the expectation that this fish market at the southwest site would be a retail fish market has been all but entirely falsified by experience. It is a wholesale fish market.

The far greater part of the fish purchased at it are conveyed to the stores in Washington that sell fish, and get it to their premises with the aid of the ordinary vehicles of transportation that ply the streets of Washington. So the fact that there is already a fish market at the southwest site furnishes no reason of any true importance why the farmers' produce market or any other market should be located at that site.

Besides, some of the Members of the Senate are doubtlessly aware of the fact that, after all, only a small percentage of the fish that are consumed in the city of Washington are brought up the Potomac River. Fish are mainly brought to Washington in refrigerator cars, some from the Chesapeake Bay and its tributary streams, some from points still farther south, some from the West, some from the Great Lakes, and some from waters as far north as Maine. So, as far as I can see, there are no countervailing considerations to offset the considerations that so definitely, so persuasively, so conclusively point to some location north of Pennsylvania Avenue as the proper location for the new farmers' produce market. There it should be—there, where the geographical center of Washington is; there, where the center of population of Washington is; there, where the great mass of the population of Washington is; there, where a still greater mass of population will be as the future of the city unfolds; there, where the commission merchants are ready to go; there, where the farmers are ready to go; there, where the hotels and the boarding houses, the restaurants and lunch rooms, the retail grocery stores, and the individual patrons of markets already are in great numbers; and there where in process of time they will be in still greater numbers.

In conclusion, I will say that in my humble judgment no case ever was made out more unanswerably than that of the farmers and of those who are affiliated with them in point of interest is made out by the testimony in this case.

It is no part of my purpose to point to any particular site north of Pennsylvania Avenue as the proper one for this new market. A number of sites have been offered for the purpose. The United States Bureau of Efficiency has declared that one of the proposed sites at Eckington is a site admirably adapted to the purposes of the new market. The best kind of street-railroad facilities lead up to it. In close proximity to it are two of the great trunk lines of the country, the Pennsylvania Railroad and the Baltimore & Ohio Railroad, and virtually all the southern railroads through their close connection with the Pennsylvania Railroad.

But be the proper site for this market what it may, it is north of Pennsylvania Avenue that the market should go. Just where it should be established there is a matter that my colleague and I, and, so far as I know, all those interested in having the market established north of Pennsylvania Avenue, are willing should be determined by the District Commissioners after the most sedulous and exhaustive consideration of the subject. The one thing that we ask is that the market shall not be established south of Pennsylvania Avenue at a remote spot, a mile and a half from where the present farmers' produce market is, and not accessible to anybody except the Pennsylvania Railroad and its allied railroad interests, a comparatively few residents of Washington living in the neighborhood of the site, and possibly a cold-storage warehouse or so.

It is proposed to go there in face of the opposition—think of it!—of the members of some 55 of the civic organizations of this city, and of practically the whole mass of market patrons of this city, and in defiance of the wishes of the farmers, of the wishes of the commission merchants, of the wishes of practically everybody who has any sort of truly civic or commerciai reasons for expressing an opinion or making a choice as between the different market sites that are mentioned in the testimony in this case.

Mr. LOCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Ohio?

Mr. BRUCE. I do.

Mr. LOCHER. What has the Senator to say about the contention that the amendment of his colleague would exclude all the sites except one?

Mr. BRUCE. I have not heard that suggested. Is that suggested?

Mr. LOCHER. The Senator from Virginia [Mr. GLASS] suggested that several times.

Mr. BRUCE. I can not imagine on what grounds he makes the suggestion. That amendment, as I understand it, was drafted by my colleague. I know that he has no particular preference of any sort to promote.

Mr. TYDINGS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to his colleague?

Mr. BRUCE. I do.

Mr. TYDINGS. Three or four days ago—I have forgotten the exact date—in order to clear up any contention from the Senator from Virginia, who is supporting the bill now before the Senate, I prepared an entirely new bill asking the Secretary of Agriculture, the Director of Public Buildings and Public Parks of the National Capital, and the chairman of the Board of Commissioners of the District of Columbia, the three of them, to look over the entire city and to select the site for this market, naming no site whatsoever.

Mr. BRUCE. I am very glad to hear that. I was not familiar with the new bill.

Mr. TYDINGS. If the Senator from Virginia will let the commissioners and the Secretary of Agriculture and the Director of Public Buildings and Public Parks of the National Capital select this site, I shall have nothing further to say.

Mr. GLASS. The Secretary of Agriculture has nothing whatsoever to do with locating this market. As far as the commissioners of the District are concerned, they are unqualifiedly on record in favor of the southwest site. Now, I shall expect the junior Senator from Maryland to prepare still another bill, and then perhaps another bill, and to give another interview and still another interview to the public press, because drowning men usually catch at straws.

Mr. TYDINGS. I have not given any interviews to the public press.

Mr. BRUCE. No; that was simply because in the State of Maryland we have a craving for perfection.

Mr. TYDINGS. Mr. President, will my colleague yield?

The PRESIDING OFFICER. Does the Senator from Maryland yield to his colleague?

Mr. BRUCE. Certainly.

Mr. TYDINGS. I have given no interviews to the public press. That is just another one of the erroneous statements which the Senator from Virginia has made in connection with this bill. I further dispute the point that the commissioners are unqualifiedly in support of it. I read into the RECORD from the Senator's own report that they are against locating the market at this time. The Senator from Maryland who has just been speaking has shown that the Bureau of Efficiency is opposed to this site——

Mr. GLASS. Oh, no; he has not.

Mr. TYDINGS. And, as far as I can find out, the only person who is really in favor of it is the Senator from Virginia.

Mr. GLASS. If the Senator will just let us have a roll call on this proposition now he will find who is in favor of it.

Mr. TYDINGS. I know that the Senator has talked in private to a lot of Senators and lined them up; but I propose to show what the real facts are, regardless of the roll call.

Mr. GLASS. There is not a Senator here who can say that I have approached him in private on this matter. It is not necessary to do it, because four-fifths of the Senate are for the bill that I am speaking for. Maryland has developed one thing here to-day. It developed a fairy-story teller in the junior

Senator, who exceeded the accomplishments of Hans Andersen and Grimm, and now it has suddenly developed a Cincinnatus at the plow.

Mr. BRUCE. All I have to say is that if the Senator has ever been a friend of the farmer I think he has justly forfeited his reputation as such in this case; because there are some 81 Virginia farmers who bring produce into this market, and no less than 48 of them have actually signed a paper asking that this farmers' produce market be established north of Pennsylvania Avenue. We have no reason to believe that any of the remainder desire the selection of a different site.

Mr. GLASS. The Senator is a progressive arithmetician. The last time he had the number 38, and that was far from the fact——

Mr. BRUCE. No; 48.

Mr. GLASS. Now he has it 48. Give him a little while longer and he will have it 58.

Mr. GOODING. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Idaho?

Mr. BRUCE. I do.

Mr. GOODING. This is purely a domestic question so far as the location of the market is concerned, is it not?

Mr. BRUCE. I should think so—purely domestic.

Mr. GOODING. Why do we not let the people of the District of Columbia settle their own problems? They will likely settle them in their own interest, will they not?

Mr. BRUCE. Yes; I should say so.

Mr. GOODING. I do not know why we undertake to do for the people of the District of Columbia things that they can do for themselves and do them better than we can do them. Surely they know their own interests and their own wants. Why do we take up time here with trying to force down the throats of the people of this District something that apparently they do not want at all?

Mr. BRUCE. That is just what my colleague and I have been asking.

Mr. GLASS. Mr. President, addressing myself to the Senator from Maryland, I regret very much that he is willing to say that this is purely a domestic question when 90 per cent of the produce that comes to this market comes from outside of the District of Columbia and outside of the State of Maryland and the adjacent State of Virginia. It is not a purely local question—far from it.

Mr. BRUCE. I think the Senator is mistaken when he places the percentage as high as 90 per cent. That is not my recollection of the testimony.

Mr. GOODING. Mr. President, do I understand, then, from the Senator from Virginia that it is a railroad question?

Mr. GLASS. No; I do not understand that it is a railroad question. I understand that it is a farmers' question. There are some farmers in the United States located outside of the District of Columbia and the States of Maryland and Virginia, and those farmers outside send vastly more produce to this market than the farmers of either Virginia or Maryland, or both of them together.

Mr. GOODING. I want to say to the Senator from Virginia that on two different occasions I went down and viewed the site in the southwest part of the city that he is proposing, and there is not room enough down there to park the trucks of the farmers who will come there. There will be no room left for the buildings. It will be a serious mistake to locate the market there, and I am satisfied that if it is located there the Senator himself in time will regret it.

Mr. GLASS. The Senator from Idaho simply demonstrates the fact that he does not know a thing in the world about this problem.

Mr. GOODING. I know as much about it as the Senator from Virginia, because I have made it my business to know something about it and assume responsibility when I vote for it, and I have made two visits down there. And what do we find? It is the end of everything, as far as the city is concerned. It is bordered by the Potomac on the south and on the west by the Tidal Basin or the southern railroads. There is not room enough for anything down there. It is down in a pocket at the end of the street-car lines. It can not be served properly by street-car lines. There are only three avenues for trucks to travel to go into the southwest part of the city, where this market is to be located, namely, Seventh Street, Twelfth Street, and Fourteenth Street. Light cars, of course, may pass through the Government property down there, but as far as trucks are concerned they have all got to traverse those three streets. There is not even respectable car service down there.

Mr. GLASS. I may say to the Senator from Maryland that I have no desire to modify my statement that the Senator from Idaho shows that he does not know anything about the problem.

Mr. BRUCE. It seems to me the Senator from Idaho is speaking from very full familiarity with the bearings of the point that he is discussing, because my recollection is that the present farmers' produce market affords sufficient accommodations for upward of 500 farmers, and the site to which the Senator from Idaho is referring affords accommodations for only 304.

Mr. TYDINGS. Mr. President, will my colleague yield?

Mr. BRUCE. Yes; I will.

Mr. TYDINGS. In line with what the Senator from Idaho has said, I wish to say that if the Members of the Senate would go down there and look at that site, and talk to the marketmaster, Mr. Roberts, and talk to the officials of the Bureau of Efficiency, and talk to the Secretary of Agriculture, and talk to the chairman of the Committee on the District of Columbia of the House and the chairman of the Committee on the District of Columbia of the Senate, both of whom are opposed to it, and talk to the citizens' organizations of Washington who are going to put up the money, there would not be a Senator in this body who would vote for it—not even the Senator from Virginia himself.

Mr. GOODING. Mr. President, I became interested in this matter because four different commission merchants called on me at my office. I do not know why they called on me, but they seemed to be so earnest and so insistent in the position that if the market were located in the southwestern part of the city it would be a failure, that I went down of my own accord, looked over the ground. I know a little something about marketing. I have been down to the present market in the morning and have seen the hundreds, and you might say thousands, of vehicles that are jammed together down there. I do not know, if a lady should go down to the proposed site in a machine, if the market were located in the southwest part of the city, where she would park her car. She could not get to the market at all; it would all be cluttered up and jammed up. To my mind it would be an outrage to locate the market down there.

Mr. BRUCE. Mr. President, if I am not mistaken, the Senator himself is a shipper to that market. He has a special reason for being familiar with its operations.

Mr. GLASS. Does he ship in his automobile that he can not park down there, or does he ship by train?

Mr. GOODING. I am not personally interested in any market, but I do believe that the people of Washington ought to be permitted to locate their own market. There is a district here about 10 miles square, and it is proposed that we go down to land's end, to the elbow, to the end of all things, and locate the market along the Potomac. Why should we do that? Have not the people of this District some rights, and should they not be given some consideration, and when every civic organization in the city is opposing this, why should Senators continue to want to jam it down their throats?

Mr. GLASS. Mr. President, this matter is not to be determined by sound and fury, and by statements that have no place in the RECORD at all and nothing to substantiate them. For the full length of this proposed market, and for blocks on either side, their is a street down there as wide to-day as Pennsylvania Avenue is, and it is in contemplation to make it 10 feet wider. Talking about parking space, there is four times the parking space there that there would be at any one of the other proposed sites north of Pennsylvania Avenue. The Senator from Maryland says that the accommodations afforded would be one-half of those of the existing market when the District Commissioners themselves said they would be double those of the existing market. We ought to confine ourselves to statements of fact.

Mr. TYDINGS. Mr. President, I would like to state this fact: That I had a survey made by one of the District engineers of the four corners of this square upon which the market will be located, and I have the levels for each one of those corners, which I read into the RECORD the other day, as well as the actual space. It is shown by the engineer's report that it will take 46 steps to go from one side of the market to the other. Further than that, it was shown that there would not be stalls enough there to take care of the people. Further than that, this is a farmers' market, and not a railroad market, as the Senator from Idaho has properly said; and if it is a farmers' market, and the people are to be permitted to buy from the farmers, then it ought to be located where they can get to it.

Further than that, this bill came into the House of Representatives without any report of the Commissioners of the District of Columbia whatsoever. The Commissioners of the District of Columbia reported three weeks after the bill was introduced, and then they said they were opposed to locating the market at this time, but that if it must be located at this time, then they favored the southwest site; but that the whole food

distribution problem should be considered at one time, and they recommended that no action be taken. I have the printed report on my desk at this time.

Here is a bill with no one knowing who the author is, without the approval of the Commissioners of the District of Columbia as they would like to have it approved, with the Secretary of Agriculture against it, with Colonel Grant, the head of the Public Buildings and Parking Commission, against it, with Chairman GIBSON, of the House of Representatives, against it, with Senator CAPPER, of the Senate committee, against it, with most all the citizens' organizations in town against it, the names of 35 of which I put in the RECORD the other day. Yet, without a sponsor, with no one of these in favor of it, it is proposed to put it down on the edge of the town, away from the people. We are going to tax the people $400,000 for what? To build a market that they can not get to unless they cross G Street, F Street, Pennsylvania Avenue, and go all the way down to the rim of Washington, buy the produce, and carry it all the way back again. It is so ridiculous; it is hardly worthy of argument.

I said the other day, and I repeat, that if Washington had a mayor and city council, who would be responsive to the peoples' will, there would be no question that the market would not go down on the southwest site. Rather than that, the people would get the market where they could avail themselves of its opportunities. I deny now that the Commissioners of the District of Columbia are in favor of locating the market where it is proposed to locate it, and to prove that statement I would like, if the senior Senator from Maryland will indulge me a moment, to read the report of the commissioners.

Mr. BRUCE. Certainly.

Mr. TYDINGS. Here is the report of the commissioners:

> Attention has been directed, therefore, to determining a temporary site to accommodate the farmers' market for the next few years, not only because of the urgent necessity for removing from the present farmers' market at such an early date but because it is felt that the course of the development of a large new produce distribution center would proceed in a more orderly and satisfactory manner if the change of location of the farmers' market, commission and other merchants, and perhaps the Center Market, were effected at substantially the same time.

I do not want to speak in my colleague's time. I just wanted to bring out those points.

Mr. BRUCE. The Senator from Virginia took me very severely to task for being, as he supposed, reckless in my statements. I desire to read just a few paragraphs from the report of the Bureau of Efficiency, which dwell upon the contracted nature of this southwest site area. They say:

> Squares 354 and 355 would afford space for only 378 stands under 40-foot sheds with 30-foot roadways between sheds without encroaching upon the parking or without the closing of F Street. It is not thought advisable to close F Street. In fact, to close F Street would be a fatal mistake.

In other words, as I have said, upward of 500 farmers at the present time are accommodated by the present farmers' produce market, and these two squares in the southwest site would afford space for only 378 stands. So it was not I but the Senator from Virginia who was inaccurate. Then, in another place, referring to this southwest site, the bureau says:

> The area is too small upon which to locate the farmers' produce market without closing F Street, the closing of which is opposed by the National Capital Park and Planning Commission.

Mr. GOODING. Mr. President, will the Senator yield?

Mr. BRUCE. I yield.

Mr. GOODING. I think we will all agree that the great problem of every city is its traffic. Every city is eliminating congestion in traffic as much as possible, and must do so with the increase in the number of automobiles. It is proposed to locate this market in the southwest corner of the city, forcing everything practically across the heavy traffic lines in Washington. If there were no other question to be considered in settling this problem, we ought to take the market away from the southwest corner of the city on account of the traffic congestion, to say nothing about the inconvenience of that site down there to the people who are going to patronize it, and to those who are going to come there to bring produce to the market.

Mr. GLASS. All of which shows that the Senator from Idaho has not even read the report of the District Commissioners and the hearings, where it is shown that two successive directors of traffic of this District have declared in favor of the southwest site as being the better site, taking into consideration the traffic of the District.

Mr. GOODING. That does not change my judgment at all.

Mr. GLASS. Of course, it does not change the Senator's judgment.

Mr. GOODING. Not a bit.

Mr. GLASS. The Senator has not any judgment.

Mr. GOODING. My judgment is based on common sense, and I know enough about the city of Washington to know where the heavy traffic is.

Mr. GLASS. I rather think that the directors of traffic of the District of Columbia are better entitled to form a judgment about traffic matters than is the Senator from Idaho.

Now, if the Senator will permit me, I will respond to a question asked. I do not think we get anywhere by these constant interruptions of one another. I said a while ago that the Senator from Maryland was not reading from the report of the Bureau of Efficiency, and upon examining the document I find that I was precisely right; he was not. He was reading from a report of one single member of the Bureau of Efficiency, and, as I have stated to the Senate, the chairman of the Bureau of Efficiency, Mr. Brown, has told me that that body has not taken any position in the matter at all.

Mr. BRUCE. That is just in keeping with the statement of the Senator that we should pay no attention at all to the voice of these 55 civic organizations, because that voice happened to issue from the lips of a comparatively few members of those organizations. The Senator knows perfectly well that after all it is always only a comparatively small percentage of the membership of any organization that speaks for it, but it is always fair to presume that if a more or less limited number of members of an organization do not truthfully express its sentiments a protest will very soon be made by its other members. What care I whether it was one or all of the members of this Bureau of Efficiency who rendered that report? If one member of it rendered it, it is reasonable to infer that he did not do so except with the consent of his colleagues or associates. Just what their number is I am not prepared to say.

Mr. GLASS. It is an inference not based upon fact.

Mr. TYDINGS. Mr. President, will my colleague yield?

Mr. BRUCE. I yield.

Mr. TYDINGS. The Senator several times has asked for documentary evidence. I say that the statement that the Bureau of Efficiency is not opposed to this site should stand until there is some documentary evidence contrary to that report. The Senator can not make inferences when we have a written report before us.

Mr. GLASS. Mr. President, if the Senator will permit me just a moment right there, the junior Senator from Maryland said a while ago that the District of Columbia Commissioners had not indorsed this site, and undertook to read from their report to establish that statement. I am going to read from the report——

Mr. BRUCE I object.

Mr. GLASS. If course, when it comes to getting the facts——

Mr. BRUCE. I object, because I myself stated that the District Commissioners made a recommendation in favor of this southwest site. What more would the Senator from Virginia ask?

Mr. GLASS. The Senator's colleague stated just positively the reverse of that, that is all. I want to show that he was mistaken.

Mr. BRUCE. I do not recall what my colleague said upon the subject, but I know what I said, and I know what the Senator from Virginia must have heard.

Mr. GLASS I am not trying to convict the senior Senator from Maryland of an inaccurate statement. I was just prepared, from the documentary evidence, to convict his colleague of an inaccurate statement.

Mr. BRUCE. I know the Senator stated what he did in the utmost good faith, and I do not know anybody whose reputation for verity is more thoroughly established than his, but I think I have been so fortunate as to point out one inaccuracy in his statement, such as might well mark the statement of any of us, and now I am going to point out another.

The Senator has dwelt most confidently upon the views of Major Brown about this controversy. I want to read just a few words from some of the testimony of Major Brown in relation to the question:

> Major BROWN. Well, Mr. Chairman——

Mr. GLASS. Mr. President, if I may interrupt——

Mr. BRUCE. I yield. The Senator sees what is coming.

Mr. GLASS. No; I want to warn the Senator from Maryland that he is about to fall into his own trap. I have not quoted Major Brown.

Mr. BRUCE. That is very considerate and kind of the Senator.

Mr. GLASS. I want to say to the Senator that he is now proposing to read from the testimony of a Mr. Brown who is a totally different Mr. Brown from the Mr. Brown whom I quoted.

Mr. BRUCE. There are so many Browns I might very naturally fall into that state of confusion.

Mr. GLASS. The Senator should not make the statement that I have quoted the man he is now quoting, when I have not at all.

Mr. BRUCE. Then the Senator had in mind one Brown, and I had in mind another.

Mr. GLASS. Yes. Do not put your Mr. Brown off on me. I do not care anything about your Mr. Brown.

Mr. BRUCE. Brown is a very dubious family. That reminds me of a conversation that some of my friends once had with a friend of ours named Jones. They were talking about the extinction of families; and, by the way, Jones was from Virginia.

Mr. GLASS. Then he should favor the southwest site.

Mr. BRUCE. No; nearly all the Virginia farmers favor a location north of Pennsylvania Avenue. The Senator from Virginia [Mr. GLASS] is the only Virginia farmer, so far as I know, who favors the southwest site.

Mr. GLASS. That shows how limited the Senator's knowledge is of the situation.

Mr. BRUCE. But to get back to the Jones family. These friends of mine were talking with Jones, and the topic was the extinction of families, and Jones spoke up very mournfully and said, "You know, I am the last of my name," meaning that he was the last survivor of his branch of the Jones family. There was, of course, a tremendous guffaw of laughter from his friends. Now, the Brown family is about as numerous as the Jones family, and I am sure my friend from Virginia will pardon me for having confused one Brown momentarily with another.

Mr. GLASS. I will say to the Senator that the Brown about whom I was talking is of the Efficiency Bureau, and the Brown from whom he is now proposing to quote is an entirely different man.

Mr. BRUCE. He is a Major Brown, anyhow, and he seems to be regarded as an authority on this subject. This is Maj. Cary H. Brown. Perhaps the Senator can tell me just who he is.

Mr. GLASS. He was connected with the Park and Planning Commission.

Mr. BRUCE. He was connected with a very scientific and intelligent commission, and therefore, of course, his views would seem to be entitled to an unusual measure of respect.

Mr. GLASS. Nevertheless, I did not rely upon them, as the Senator from Maryland was assuming.

Mr. BRUCE. That is very true. His views are so very sound that they would hardly be in keeping with the general tenor of the Senator's conclusion, if I may be allowed to say so.

Mr. GLASS. His later views might be.

Mr. BRUCE. Mr. Brown said:

Major BROWN. Well, Mr. Chairman, personally I was a little bit surprised at what Mr. Eldridge said a while ago, because, as to the question of a market in southwest Washington, the question of traffic back and forth across the Mall where the streets are fairly few in number, where north of the Mall they will be very much congested, due both to the public buildings area and to the business area, that it would be decidedly objectionable to introduce any further traffic going through those streets. Vehicles going to market will not stand in that area, but they must pass back and forth through that area. The situation with regard to this market in south Washington is, in my opinion, this, as Mr. HUDSON says. What railroad terminals are there now where produce is brought from the South and over the Pennsylvania Railroad will continue to be used to a certain extent, no matter where the produce market is located, and it is logical to assume that farmers will go to that place if there is any business there for them. A point which we attempted to make in our report is that up around Eckington there is a very busy place. There is bound to be business there, and that is one reason why it is a good location for a wholesale market, besides its accessibility to the railroads and the highway facilities that are there afforded. I do not disagree, certainly, with the idea that a farmers' market in south Washington would be a good thing, but I think it would be decidedly secondary, compared to a market in Eckington. I believe, whether or not we intend it should be, it will be the natural trend of business. That has been borne out by the experience of the fish market.

Mr. MOORE. What has been their experience?

Major BROWN. The experience of the fish market is this, as I am informed: It was contemplated by the municipal government at the time the fish market was located that there would be a very large retail business in fish and sea food that would come down to that market. That has not been borne out by experience. People do not go down there to buy fish and sea food, because it is too far, too inconvenient.

I ask to have printed in this connection the views of the minority of the House Committee on the District of Columbia.

There being no objection the matter was ordered to be printed in the RECORD, as follows:

[H. Rept. No. 451, Part 2, 70th Cong., 1st sess.]

ACQUISITION OF A SITE FOR THE WHOLESALE FARMERS' PRODUCE MARKET

Mr. LAMPERT, from the Committee on the District of Columbia, submitted the following minority report (to accompany H. R. 8298):

Mr. Chairman and Members of the House of Representatives, being unable to subscribe to the majority report of the subcommittee which has held extended hearings upon the relocation of the farmers' market and recommended the southwest site, we hereby submit a minority report recommending the selection of square 669 in the Eckington area. We consider the southwest site highly undesirable for the following reasons:

1. The area presented to the committee for consideration is entirely too small. According to the evidence submitted, it will not provide for the number of farmers now patronizing the market on any plan that permits adequate facilities. Testimony, supported by plans adapted to the southwest site, showed that only 304 of the more than 500 farmers could be accommodated with any reasonable allowance of space for market stalls, unloading, display, and reloading of produce and the general automobile and truck traffic incident to the conduct of the market. Moreover, the plans adapted to this site represent the minimum requirements as indicated by those in charge of the present market and as are borne out by experience in similar markets in other cities. It is clear, therefore, that the southwest site does not provide for any further growth, and the congestion that would follow its use will seriously add to the cost of handling produce in the market, which, in turn, will be borne by the ultimate consumer, not to mention the great inconvenience to both buyer and seller.

2. The southwest site is undesirable by virtue of its relation to the geographical and population centers of Washington City. It is essential, as we see it, for the farmers' market to be located in close proximity to the geographical center and in a convenient section of the city. A farmers' market is a service institution. It is for use every day in the year and must be located not only where it can be used, but used conveniently. We are opposed to the location of the farmers' market in the southwest on account of its inaccessibility, being located on the extreme edge of the city and District of Columbia a mile and one-half by air line from the center of population, approachable from three sides only. It is acknowledged that the southwest is not a residential section, that its present population is small, and its limitations prohibit development along these lines.

3. The southwest site is inaccessible to the great majority of producers who supply fresh produce to the people of Washington. This was clearly indicated by the farmers who testified before the committee and by the evidence submitted. It should be emphasized in this connection that the farmers as a whole are unalterably opposed to the southwest site because of its inaccessibility. It is very questionable, in our opinion, whether the farmers will patronize a market located in this section of the city. It is equally inaccessible to those who buy on the farmers' market. Testimony has shown that a great majority of the grocery stores and hotels which patronize the market, to say nothing of boarding houses, restaurants, etc., are located in the northeast and northwest sections of the city.

4. We are opposed to the southwest site because of traffic conditions surrounding the area. It is deemed impracticable and undesirable to compel automobile and truck traffic, totaling 60,000 loads of farm products per year, to pass through the densest traffic area of the city, only to be unloaded at an inaccessible point and then redistributed in smaller volume by many more vehicles through the same congested area in order to reach the consuming sections of the city.

We believe the suggestion of by-passing this traffic away from the congested area to be visionary and impracticable. This not only applies to the farmers coming to the market, but to a still greater degree to the traffic involved in the delivery of food to consuming centers.

5. The location of the farmers' market on the southwest site is not in accord with the plans and recommendations of the National Capital Park and Planning Commission as submitted in testimony before the committee. Further, the location of the market upon this site will place it in close proximity to a large number of Government buildings now in use and to additional buildings being erected. Obviously, placing the farmers' market in this area will not promote the program of Congress for the beautification of the Mall. It must be remembered that the development of the Mall will in itself develop peculiar traffic conditions. It is possible, and very probable, as is now the case in other parked areas of the city, that heavy traffic will be debarred from this region or greatly restricted. Further, the erection of additional Government buildings in the Mall will greatly complicate the traffic and parking conditions by virtue of the additional number of Government employees concentrated in this area.

6. We believe that the only possible advantage of the southwest site, namely, water transportation, is a negligible factor in the movement of food products to the city. There has been abundant testimony before the committee to prove this assertion. Furthermore, the farmers' market is in no way influenced by water facilities or the lack of them. Water transportation of fresh produce is steadily losing ground in all sections of the Chesapeake Bay and the rivers flowing into it.

7. The southwest site offers no advantages in railroad facilities that are not to be found in the Eckington area.

8. Some years ago the fish market was established on the water front in the southwest section, and it was expected that there would be a very large retail business in fish and sea foods in this market. This has not been borne out by experience and the fish market has become almost exclusively wholesale, as the retail buyer will not make the long journey necessary to patronize this market.

We therefore feel that, in view of the above reasons, the southwest site for a farmers' market is unsuitable and undesirable as being too small in area, too distant from the geographical center of the city, too far removed from the center of population, too inaccessible to the producers and consumers, too difficult of access except through the densest traffic areas of the city, and not in accord with the plans and recommendations of the National Capital Park and Planning Commission.

The careful analysis of all the testimony submitted in behalf of the sites proposed for the relocation of the farmers' market leads us to the belief that square 669, in the Eckington area, offers the best site not only for the immediate relocation of the farmers' market but for the development of an ultimate market area suited to the growing needs of Washington and providing facilities for the wholesale and retail dealers, commission men, and the allied business interests. Square 669 is bounded by North Capitol Street, First Street, Florida Avenue, O and P Streets NE.

The following reasons for this opinion were established by the testimony submitted to the committee:

First. Square 669 contains an area of approximately 6½ acres. This fact is borne out by an official plat of square 669 prepared in the office of the surveyor of the District of Columbia which shows that this square is approximately 852.23 feet long and 358 feet wide with a total area included within curb lines of 301,023 square feet, or about 6.9 acres. The plat further shows that of this total area there is an area of 201,514.30 square feet in lots not including alleys, which is private property and which must be secured by purchase or condemnation. This is nearly twice the size of the southwest site. The committee has in its possession, as a part of the record, a plan showing how a farmers' market can be adapted to this area to accommodate at least 521 farmers, with ample provision for stall space, display room and facilities for transfer of produce, and space for vehicular traffic and parking. The area involved in this square, and in those immediately adjacent thereto, is sufficiently large to permit of the erection of buildings and the installation of equipment which will adequately provide facilities for the truckers and farmers in the immediate vicinity of Washington for many years to come.

Second. The Eckington site, square 669, is located close to the center of population and close to the geographical center of the city of Washington. The site is so situated as to be easily reached by a large and growing population, and the natural development of Washington is toward the northeast and northwest. Testimony submitted by expert engineers emphasized the fact that a farmers' market should be placed in a section where there is a large consuming population. Evidence before the committee has shown that 80 per cent of the retail grocery stores, 97 per cent of the hotels and a large percentage of the boarding houses, restaurants, and other large buyers on the farmers' market are located in the northeast and northwest sections of the city. Further evidence presented showed that one of the largest chain-store systems purchased 50 per cent of its fresh farm produce on the farmers' market, and that a vast majority of its stores are located in the northeast and northwest. This company has its warehouse located in the Eckington area, relatively close to square 669.

Third. The Eckington site, square 669, is accessible to the great majority of farmers and truckers regardless of the territory from which they come. Evidence presented showed that the total acreage devoted to fruits and vegetables by farmers who sell on the farmers' market is 14,227. The acreage under production by Maryland farmers totals 11,572, by Virginia farmers 1,835, and by the District of Columbia farmers 820 acres. The Maryland farmers who bring produce to the farmers' market are principally from Prince Georges and Montgomery Counties. A knowledge of the topography of the District and the two counties, Prince Georges and Montgomery, which grow 85 per cent or more of the produce brought to the farmers' market, shows that the routes used by these farmers enter the city from the northeast and northwest.

The same routes which make this location easily accessible to the farmers and truckers will provide easy access to the market for wholesale buyers and for such consumers as may travel by automobile. Those who make use of the street cars will be able to reach this market site easily from any part of the city over the three lines now operating on New York Avenue, Florida Avenue, and North Capitol Street. From the buyer's standpoint, square 669 is the best location that can be found.

Fourth. This location is away from the down-town office and business section, close enough to well traveled and broad thoroughfares to promote business, and yet sufficiently far from the heavily congested traffic area to prevent traffic complications. Ample parking space is available in this vicinity and the many different streets radiating to all sections of the city make it an ideal distribution point. It is at the junction of two of the city's broad thoroughfares—New York and Florida Avenues, and is served by another important highway, North Capitol Street. An easy flow of traffic in all directions is thus assured.

Fifth. We believe that a farmers' market site should be adjacent to railroad facilities principally on account of its relation to the wholesale produce and commission houses. We are of the opinion that the railroad facilities in the Eckington area are equal to or superior to those in the southwest area. Figures from the United States Department of Agriculture for 1926 show that the entire movement of fruits and vegetables into Washington amounted to 7,100 cars. Of these, 6,993 cars were from known points of origin. The receipts by boats amounted to the equivalent of 577 cars or about 8 per cent of the total. Of the 6,992 cars, about 33 per cent originated in States from which the shipment would necessarily pass through the Potomac yards. About 12 per cent originated in the States where the shipment need not necessarily be through the Potomac yards. The grand total is 45 per cent of all possible movements through the Potomac yards. About 34 per cent of the total movement into Washington was from Western States and 21 per cent from Eastern States, or a grand total of 55 per cent, the greater portion of which would come over the Baltimore & Ohio Railroad, as its main lines run into Washington and tap the great industrial centers of St. Louis and Chicago, which are the great converging points for freight consigned to Washington.

In 1926 the Baltimore & Ohio handled at its Eckington yard, or for sidetrack delivery in that section, 34 per cent of this total rail movement. It is not without its significance that an increasing number of large industrial and supply companies, which are absolutely dependent upon quick and ample railroad facilities for their shipments, have located in northeast Washington, in the vicinity of square 669, and have established warehouses, some with track-side facilities. It should be pointed out, in this connection, that freight rates to Washington are the same regardless of whether shipments are consigned to the Eckington yards or the Potomac yards, and that it is just as easy and logical to transfer consignments from the Potomac to the Eckington yards as it is to transfer them from the Eckington to the Potomac yards.

Sixth. It is recognized by all parties that the success of a farmers' market is largely dependent upon its relation and proximity to the wholesale commission business. In fact, in the District Commissioners' report to Congress it is asserted that the farmers' market should not be removed until it is learned where the great wholesale produce and commission business houses are going to locate. Evidence before this committee showed that 85 per cent of the wholesale commission merchants desire and intend to locate in the Eckington area. If this is a determining factor in the relocation of the farmers' market, then the great majority of the commission men prefer the Eckington area for their business.

Seventh. We believe that the recommendation of the National Capital Park and Planning Commission deserves primary consideration. After making a careful study of the principal sites involved, the National Capital Park and Planning Commission, assisted by representatives from the United States Department of Agriculture and the Bureau of Markets in the District, and the foremost landscape architects and consulting engineers in this country, recommended the site next to the Eckington yards as their preference.

At the hearing before the Committee on the District of Columbia, United States Senate, on January 25, 1927 (H. R. 15668, 2d sess., 69th Cong., p. 14), Brig. Gen. Edgar Jadwin, chairman of the National Capital Park and Planning Commission, stated, in part, the following:

"After discussion the following motion was offered by Mr. Olmstead:

"(a) That this commission recommends that the farmers' market and the commission houses be moved simultaneously to one of the following sites, given in order of preference:

"(a1) To the site next to the Eckington yards.

"(a2) To the southwest near the river front.

"(a3) To the mid-city site.

"(b) That this move be made not later than May 1, 1927, in the meantime final determination of site to be based on the working out of details in consultation with the commission houses and farmers. Carried."

At the same hearing and on the same day the following testimony was presented by Maj. Carey H. Brown (H. R. 15668, 2d sess., 69th Cong.):

"Page 16: At the meeting of the National Capital Park and Planning Commission, July 16, 1926, motion was made and unanimously carried that the question of locating the produce market be referred to the coordinating committee for investigation and report, this committee for this purpose to include Mr. G. M. Roberts, superintendent of weights and measures of the District of Columbia, and a representative of the United States Department of Agriculture.

"Accordingly this question has been studied by a subcommittee consisting of Mr. Roberts, Mr. Kitchen—who, as superintendent of Center Market, was designated by the Department of Agriculture as its representative—and Major Brown, the chairman of the coordinating committee. Mr. Tenny, the head of the Bureau of Agricultural Economics of the Department of Agriculture, met with the subcommittee at its early meetings. Mr. H. A. Spillman, of the Department of Agriculture, has assisted the subcommittee in the collection of data.

"Page 18: Highway facilities are, of course, absolutely essential, both to farmers and commission men, as all produce is trucked from, if not both to and from, the market. Space must be available about the market for several hundreds of vehicles, and highways permitting distribution of traffic in all directions are needed.

"Page 19: The shipments by water at the present time are very small, and there does not seem to be much prospect of their increase. The slowness of river transportation prevents its use for perishable goods. Trucks are used instead.

"Page 20: All things considered, it is the opinion of the committee that under present conditions the Eckington site is the best.

"Pages 20–21: Now, I would like to call your attention to the fact that in drawing up this report we secured the help of Mr. Kitchen, of the Department of Agriculture, who was not picked by us, but was designated by the Secretary of Agriculture; and that in this study we also had the help of one of the statistical men of the department. Furthermore, that Mr. Tenny, who is the head of the Bureau of Economics of the Department of Agriculture, sat in with us on a considerable number of these meetings.

"Page 21: The local produce farmer brings to market the following: In vegetables: Turnips, sweet potatoes, carrots, peas, peppers, lettuce, string beans, greens, squash, spinach, beans, onions, corn, potatoes, tomatoes, cabbage, cucumbers, asparagus, kale, parsnips, and beets.

"In fruits: Grapes, apples, pears, peaches, cantaloupes, strawberries, rhubarb, melons, cherries, and small fruits.

"Miscellaneous: Poultry, eggs, sausage, and butter.

"Page 21: While some produce is brought from as far as 40 or 50 miles, the average hauling distance probably does not exceed 18 or 20 miles. Therefore the farmer is able to display his products in their pristine freshness without going to the expense of careful selection and icing in transit.

"Pages 26–27:

"Major BROWN. Well, Mr. Chairman, personally I was a little bit surprised at what Mr. Eldridge said a while ago, because, as to the question of a market in southwest Washington, the question of traffic back and forth across the Mall, where the streets are fairly few in number, where north of the Mall they will be very much congested, due both to the public buildings area and to the business area, that it would be decidedly objectionable to introduce any further traffic going through those streets. Vehicles going to market will not stand in that area, but they must pass back and forth through that area. The situation with regard to this market in south Washington is, in my opinion, this, as Mr. Hudson says: What railroad terminals are there now where produce is brought from the South and over the Pennsylvania Railroad will continue to be used to a certain extent, no matter where the produce market is located, and it is logical to assume that farmers will go to that place if there is any business there for them. A point which we attempted to make in our report is that up around Eckington there is a very busy place. There is bound to be business there, and that is one reason why it is a good location for a wholesale market, besides its accessibility to the railroads and the highway facilities that are there afforded. I do not disagree, certainly, with the idea that a farmers' market in south Washington would be a good thing, but I think it would be decidedly secondary compared to a market in Eckington. I believe, whether or not we intend it should be, it will be the natural trend of business. That has been borne out by the experience of the fish market.

"Mr. MOORE. What has been their experience?

"Major BROWN. The experience of the fish market is this, as I am informed: It was contemplated by the municipal government at the time the fish market was located that there would be a very large retail business in fish and sea food that would come down to that market. That has not been borne out by experience. People do not go down there to buy fish and sea food, because it is too far, too inconvenient.

"Page 28: In the design of farmers' markets, more conveniences should be provided for both men and women. They should be able to rest in comfort while waiting for the market to open. More parking space for customers' cars is desirable, and better protection for produce is necessary.

"Page 29:

"Major BROWN. I think it would be a decided disadvantage to the District of Columbia if public markets were abolished at the present time, and particularly the farmers' market, places for the farmers to go and dispose of their produce. I do not think that there is very much in the District of Columbia owning market buildings in which stalls are rented out to grocers and meat dealers, etc., but I do think that the amount of material that the farmers bring in, and its freshness, etc., and the ability of the farmers to keep down prices is of decided advantage to the District of Columbia."

Eighth. Further, we believe that the recommendations of the United States Bureau of Efficiency, as submitted to the committee, should also be given every consideration. The report of this bureau covers the history of the market problem and studies of the area, population, hotels, boarding houses, retail grocery stores, and the location of existing markets as a background for the specific study of proposed sites. Twelve reasons are given in a summary of this report why the farmers' produce market should not be located south of Pennsylvania Avenue. These are as follows:

"1. Because nearly every customer of this market would be compelled to go through the downtown congested zone of the city to reach the market.

"2. Because every farmer coming into the city from the north and west will have to go through the downtown congested zone of the city.

"3. Because the Federal development of the Mall triangle will further add to the congestion of the so-called downtown congested zone.

"4. Because there are only four north-and-south highways running through the Mall that would be convenient to Southwest sites Nos. 1 and 2, viz, Sixth, Seventh, Twelfth, and Fourteenth Streets.

"5. Because it is impossible to extend either Eighth, Ninth, Tenth, Eleventh, or Thirteenth Streets through the Mall on account of existing public buildings or projected ones.

"6. Because the Federal building program for the Mall triangle will undoubtedly necessitate the changing of existing car tracks and the rerouting of all street-car lines traversing this area.

"7. Because four-fifths of the entire population of the District of Columbia live north of Pennsylvania Avenue.

"8. Because more than nine-tenths of the hotels and boarding houses, more than four-fifths of the restaurants and lunch rooms, and more than three-fourths of the retail grocery stores are located north of Pennsylvania Avenue.

"9. Because the future expansion of the city—in population and in the number of hotels and boarding houses, restaurants and lunch rooms, and retail grocery stores—will in a large measure be north of Pennsylvania Avenue.

"10. Because at least 20 per cent of the business of the farmers' produce market is a retail business, which, in a large measure, would be lost to the farmers if the market is located in southwest Washington. This retail business amounts to more than $600,000 per year.

"11. Because it would send through the Mall triangle and the Mall a lot of objectionable traffic.

"12. Because the southwest area lacks in street-car facilities as compared with other sections of the city."

In its conclusion the Bureau of Efficiency says:

"If the farmers' produce market is to serve the people it should be so placed as to be convenient to them. Four-fifths of the entire population of the District of Columbia lives north of Pennsylvania Avenue."

Ninth. The Committee on the District of Columbia recommends the passage of bill H. R. 8298. Such action by this body would indeed discriminate against the more than 500 farmers bringing fresh food products to the city of Washington and impose a hardship upon the citizens of the National Capital. This bill authorizes and directs the Commissioners of the District of Columbia to acquire a certain specific area of the District of Columbia to be used and occupied by the District of Columbia as and for the purpose of a wholesale farmers' produce market. The passage of this bill would establish a wholesale farmers' produce market and not a farmers' produce market on which farmers would be permitted to sell at both wholesale and retail. As shown in the report of the United States Bureau of Efficiency, at least 20 per cent of the business of the farmers' produce market is a retail business, which amounts to more than $600,000 per year. Restricting the farmers' market to wholesale would not only prevent the farmers from making this amount of retail sales but it would likewise prevent that part of the consuming public of Washington who purchase to this amount from making direct purchases from the producer.

Tenth. No one considering the problem of relocating the farmers' market can ignore the united plea of the responsible producers who are the regular space holders on the farmers' market and who are producing the great bulk of fresh produce sold on this market. Their plea before this committee was in behalf of square 669 in the Eckington area. Moreover, the preponderance of evidence submitted to this committee by the consumers of Washington was for a location of this market north of Pennsylvania Avenue.

Eleventh. Finally, how can Congress in considering this matter ignore the united plea of the responsible producers who are the regular

space holders on the farmers' market and who are producing the great bulk of fresh produce sold in this market? How can Congress ignore the plea of the consumers represented by the citizens' associations for a site north of Pennsylvania Avenue, and finally how can Congress ignore the disinterested recommendations of the expert agencies that it has set up for the proper planning and beautification of Washington City such as the National Capital Park and Planning Commission and the Bureau of Efficiency, which have studied the situation from the standpoint of service, convenience, and practical use to the citizens of Washington?

Finally, we, the minority of the subcommittee, regretting our nonconcurrence in the majority report, respectfully recommend that the farmers' market be located on block 669, in the Eckington area, and that this recommendation be adopted by the House of Representatives in Congress now assembled.

Respectfully submitted.

FLORIAN LAMPERT.
CLARENCE J. MCLEOD.
FRANK L. BOWMAN.

Mr. GLASS. Now let me read what Mr. Brown said.

Mr. BRUCE. I will relinquish the floor at this time. I promised the Senator from Kansas [Mr. CURTIS] that I would bring my remarks to a conclusion.

Mr. GLASS. Very well. I will read it at a later time.

RECESS

Mr. CURTIS. I move that the Senate take a recess until 12 o'clock noon to-morrow.

The motion was agreed to; and the Senate (at 5 o'clock p. m.) took a recess until to-morrow, Friday, May 4, 1928, at 12 o'clock meridian.

## HOUSE OF REPRESENTATIVES

THURSDAY, *May 3, 1928*

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

O sweet is the truth, dear Father, that Thou givest us. Through shortsighted vision, the way is often uncertain; let us trust Thee. When we least expect it, Thou art near. There always comes a rift in the cloud, and faith grasps a new courage and we repossess our souls. Again we would strike eternal covenant with Thee. Reconcile our wills with Thy will and our hearts with Thy heart; then what beautiful harmony there shall be. How determined and vitalized our decisions shall be as this union regulates our thoughts. However numerous our contests, however aggressive their devices, and however vigorous they may be, O Lord, bless us with a multiplied sense of courageous faith and charity, understanding, and wisdom. Through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Craven, its principal clerk, announced that the Senate had passed without amendment bills of the House of the following titles:

H. R. 3216. An act for the relief of Margaret T. Head, administratrix;

H. R. 7475. An act to provide for the removal of the Confederate Monument and tablets from Greenlawn Cemetery to Garfield Park;

H. R. 11482. An act to amend section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes," approved February 24, 1925; and

H. R. 11723. An act to provide for the paving of the Government road, known as the La Fayette Extension Road, commencing at Lee & Gordon's mill, near Chickamauga and Chattanooga National Military Park, and extending to La Fayette, Ga., constituting an approach road to Chickamauga and Chattanooga National Military Park.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House of Representatives was requested, a bill of the House of the following title:

H. R. 12030. An act to amend Title II of an act approved February 28, 1925 (43 Stat. 1066, U. S. C., title 39), regulating postal rates, and for other purposes.

The message further announced that the Senate had passed bills of the following titles, in which the concurrence of the House was requested:

S. 1781. An act to establish load lines for American vessels, and for other purposes;

S. 3752. An act to amend section 3 of an act entitled "An act authorizing the use for permanent construction at military posts of the proceeds from the sale of surplus War Department real property, and authorizing the sale of certain military reservations, and for other purposes," approved March 12, 1926; and

S. 4216. An act to authorize the adjustment and settlement of claims for armory drill pay.

REFERENCE OF SENATE JOINT RESOLUTION 135

Mr. REID of Illinois. Mr. Speaker, I ask unanimous consent to rerefer Senate Joint Resolution 135, making an emergency appropriation for flood protection on White River, Ark., to the Committee on Appropriations.

The SPEAKER. The gentleman from Illinois asks unanimous consent to rerefer Senate Joint Resolution 135 from the Committee on Flood Control to the Committee on Appropriations. The Chair understands this resolution carries an appropriation.

Mr. REID of Illinois. It does.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

CONQUEST OF THE NORTHWEST TERRITORY BY GEN. GEORGE ROGERS CLARK AND HIS ARMY

Mr. LUCE. Mr. Speaker, since yesterday there has been a conference in the matter of Senate Joint Resolution 23, providing for the participation of the United States in the celebration in 1929 and 1930 of the one hundred and fiftieth anniversary of the conquest of the Northwest Territory by Gen. George Rogers Clark and his army, and authorizing an appropriation for the construction of a permanent memorial of the Revolutionary War in the West, and of the accession of the old Northwest to the United States on the site of Fort Sackville, which was captured by George Rogers Clark and his men February 25, 1779, and I renew the unanimous-consent request for its immediate consideration.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to call up Senate Joint Resolution 23 and pass the same. The Clerk will report the resolution.

The Clerk read the title of the resolution.

Mr. SNELL. Mr. Speaker, what is the proposition before the House? We do not know.

The SPEAKER. The gentleman from Massachusetts asks unanimous consent to discharge the Committee of the Whole House on the state of the Union from the further consideration of the resolution just reported and consider the same in the House as in Committee of the Whole.

Mr. SNELL. What is the resolution? We could not hear the reading of it.

The SPEAKER. Without objection, the Clerk will again report the resolution.

There was no objection.

The Clerk again read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. BLACK of Texas. Mr. Speaker, I reserve the right to object. On yesterday I objected to the unanimous-consent request that the resolution be considered. The Senate resolution authorizes an appropriation of $1,750,000; the House committee has amended that and made the amount $1,000,000. If it can be agreed that the five members of the Committee on the Library be appointed conferees and will stand by the House figure of $1,000,000, I shall not object to the consideration of the resolution.

Mr. LUCE. Mr. Speaker, of course the appointment of conferees is wholly in your hands; but I am quite willing to recommend that the full membership of the Committee on the Library, five in number, be appointed as conferees.

Mr. CRAMTON. And, Mr. Speaker, if the gentleman from Texas will yield, in the event the Senate should not accept the House amendment to which the gentleman refers, and the question of going to conference should come up, the gentleman from Texas would be able to prevent the resolution from going to conference.

Mr. BLACK of Texas. Yes; that is very true.

Mr. GARNER of Texas. But the gentleman from Texas wants it distinctly understood—and we should not mislead anyone—that if he gives his consent at this time that this resolution shall be passed, $1,000,000 will be the total carried in the resolution when it becomes a law?

Mr. CRAMTON. Of course, I can not speak for the conferees——

Mr. BEEDY. Mr. Speaker, I make the point of order that the gentlemen are out of order; that they did not address the

Chair, and that they are holding a conversation between themselves, which the other Members are not able to follow.

Mr. CRAMTON. Mr. Speaker, I have not noticed that the Chair is greatly concerned about the failure to address him.

Mr. BEEDY. Well, one Member of the House is, and I make the point of order that the gentlemen are out of order.

Mr. CRAMTON. Mr. Speaker, I will ask the gentleman from Texas to yield.

Mr. BLACK of Texas. I yield to the gentleman.

Mr. CRAMTON. I only desire to suggest to the gentleman from Texas, as a matter of additional assurance, that the gentleman would have no difficulty in preventing this resolution from going to conference unless he then gets the kind of assurance he wants.

Mr. BLACK of Texas. That is true, and I will say that the assurance of the chairman [Mr. LUCE] is satisfactory to me. I feel that the House committee has been liberal in recommending $1,000,000, and that figure should not be exceeded. If it is agreed that the five members of the Committee on the Library will be the conferees and that they will insist upon the House figure of $1,000,000, then I shall not object to the immediate consideration of the resolution.

Mr. GILBERT. Mr. Speaker, reserving the right to object, as a member of the Committee on the Library, and being the ranking minority member, I would like to say to my Democratic colleague that the Committee on the Library has given this legislation perhaps greater consideration than any measure that has been before it in the seven years I have been a member of the committee. Other acquisitions of territory to the United States have been memorialized by much larger appropriations, for instance, the Louisiana Purchase and the Oregon Purchase, with great outlays of money. The last embarkation of this kind was the Philadelphia exposition where the money, $2,500,000 if I remember correctly, was thrown away in an unattended exposition.

This proposal commemorates one of the outstanding achievements in all history. It may be a broad, but not an inaccurate, statement to say that in daring initiative, stoic heroism, and magnificent accomplishment Clark's campaign is without a parallel in the world's history.

We have decided on $1,000,000, but I personally favored more than $1,000,000 in the committee, and in answer to the gentleman from Texas, as an assurance, I, as one of the members who if the Chair accepts the suggestion of the gentleman from Massachusetts [Mr. LUCE] will be one of the conferees, would not like to bind myself that I would not agree to the bill as it passed the Senate.

Mr. BLACK of Texas. If the gentleman will not agree to stand by the committee, then he will not get the bill up by unanimous consent.

Mr. GILBERT. That may be; that is a responsibility that is the gentleman's. But I will say to the gentleman that I will agree this far, not to make any further agreement other than that which the House committee agreed upon without coming back to the House and giving the gentleman further opportunity; but I have my responsibilities and the gentleman has his. I do not like to bind myself to support a position as conferee and to insist irrevocably upon that position when it is different from that which I have always taken; but I will come back without any agreement and give the gentleman an opportunity to exercise the rights he has now.

Mr. BLACK of Texas. The gentleman is asking that the bill be brought up by unanimous consent, and his own committee has agreed upon a figure of $1,000,000. I think it is a perfectly reasonable request to have the assurance of the gentleman that he will stand by the House figures. If we can not have that assurance, I shall object to the consideration of the bill.

Mr. GILBERT. I give the gentleman assurance that I shall not agree without further coming back to the House.

Mr. BLACK of Texas. I would not be willing to take that sort of responsibility. There might be some reason why I could not be on the floor of the House.

Mr. GARNER of Texas. In addition, I may say to the gentleman from Kentucky, the gentleman now is in a position where he can control the matter by one vote, whereas if the matter comes back from the Senate with an agreement on $1,250,000 the House could vote it up or down in the face of the objection of the gentleman from Texas [Mr. BLACK]. The position which the gentleman takes is that if it is necessary to get his consent he wants assurance now that the amount will not be larger than $1,000,000.

Mr. BLACK of Texas. I do not wish to be arbitrary, I will say to the gentleman from Kentucky, but I have my responsibility and now is the time to exercise it.

Mr. WOODRUFF. Mr. Speaker, I ask for the regular order.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts [Mr. LUCE]?

Mr. BLACK of Texas. Mr. Speaker, I would like to have a more explicit declaration on the part of the gentleman from Kentucky [Mr. GILBERT].

Mr. WOODRUFF. Mr. Speaker, I ask for the regular order.

Mr. BLACK of Texas. Mr. Speaker, I object.

### AGRICULTURAL SURPLUS CONTROL BILL

Mr. CLARKE. Mr. Speaker, in my speech against the McNary-Haugen bill I stated I would later have information regarding the expenditures of the Federal Government and of State governments for agriculture. I now ask leave to extend my remarks by inserting in the RECORD a summary of expenditures for agriculture by the Federal Government and by the State governments, as far as we have such a record.

The SPEAKER. The gentleman from New York asks unanimous consent to extend his remarks heretofore made by inserting statements with regard to expenditures of the Federal and State Governments. It there objection?

There was no objection.

Mr. CLARKE. Mr. Speaker, in my address against the McNary-Haugen bill I cited the great contributions now being made through the Federal Government and through the States, as well as individual contributions of many, in support of our farm organizations.

At the time I was working on obtaining a general statement regarding Federal and State funds appropriated for agriculture. I submit herewith as a part of the record of Federal Government the amount for last complete fiscal year in assisting agriculture and regret I can not also insert, State by State, the amount the States raised to assist.

### FEDERAL FUNDS FOR AGRICULTURE

Taking the last completed fiscal year, that which ended June 30, 1927, the total of Federal funds expended for work under the supervision of the United States Department of Agriculture was approximately $153,000,000, as indicated by the financial statement beginning on page 87 of the report of the Secretary of Agriculture for 1927. Of this total, however, about $92,000,000 consisted of payments to State highway departments for Federal-aid road construction, as well as expenditures for the building of forest roads and trails, and nearly $3,300,000, in the form of national-forest receipts, was used principally for road-construction purposes, making a total of over $95,000,000 for roads. Deducting this $95,000,000 from the total expenditure of $153,000,000 for all purposes, there remains $58,000,000, distributed as follows:

| | |
|---|---|
| For the regular or ordinary work of the department (that is, its research and extension activities, eradication or control of animal and plant pests, law-enforcement work, and service activities, as set forth in the table at the top of page 89 of the annual report of the Secretary for 1927) | $47,000,000 |
| Special forestry and wild-life conservation work (includes expenditures for acquisition of forest lands; cooperation with States in protection of privately owned timberlands under Clarke-McNary Act; acquisition of lands for upper Mississippi fish and wild-life refuge, etc.) | 2,000,000 |
| Payments to State agricultural experiment stations for research work in agriculture and home economics under the Hatch, Adams, and Purnell Acts | 3,000,000 |
| Payments to State colleges of agriculture for extension work in agriculture and home economics under the Smith-Lever Act | 6,000,000 |
| Total Federal expenditures, 1927, exclusive of road funds | $58,000,000 |

The $47,000,000 shown above as expended for the regular or ordinary activities of the department was distributed approximately as follows (see p. 89 of the annual report):

| | |
|---|---|
| Research (the scientific study or investigation of the fundamental problems of agriculture, horticulture, forestry, etc.) | $10,600,000 |
| Extension work (educational work or the dissemination of information developed by the department's experiments and discoveries through county agents, exhibits, motion pictures, etc.) | [1] 2,400,000 |
| Eradication or control of plant and animal diseases, insects, and other pests through organized campaigns | 9,000,000 |
| Service activities, or work of a constructive character for the benefit of the public, not primarily involving research, including such activities as national-forest administration, weather service, crop estimating, market news service, market inspection service, etc | 15,000,000 |
| Regulatory or law-enforcement work | 10,000,000 |
| Total expenditure, 1927, for ordinary work of department | $47,000,000 |

It is impossible to state definitely just how much of the expenditures of the Department of Agriculture are specifically or exclusively in the interest of the farmer. As a matter of

[1] Special department funds, the bulk of which is applied to cooperation with State agricultural colleges in connection with extension activities under the Smith-Lever Act.

fact, many of the benefits of the department's work go to the entire public and not merely to the farmer, such, for example, as its weather service, much of its law-enforcement work relating to the inspection of meat, food products, the administration of the national forests, and so forth. (This matter of public benefits from the department's work is discussed at some length on pages 37 to 39 of the 1927 Annual Report of the Secretary of Agriculture.)

The foregoing figures include only Federal funds provided for or administered by the Department of Agriculture. Other branches of the Government have supervision over certain appropriations which may be regarded as related to the promotion of agriculture in the United States, such as the Bureau of Reclamation, Bureau of Education, and Office of Indian Affairs, in the Department of the Interior; the Federal Farm Loan Bureau and Public Health Service, in the Treasury Department; the Bureau of the Census, in the Department of Commerce; the War Finance Corporation; and the Federal Board for Vocational Education. In most of these cases no statistics relative to expenditures are available in the Department of Agriculture. However, it is understood that during the fiscal year 1927 the Board for Vocational Education expended $2,800,000 in Federal money for agricultural education and $500,000 for home-economics education under the Smith-Hughes Vocational Act, or a total of $3,300,000. Federal expenditures by way of endowment of the land-grant agricultural and mechanical colleges in the various States aggregated approximately $4,000,000 during the same period, under the Morrill-Nelson and other acts.

STATE FUNDS

Although persistent efforts have been made in the past to obtain from State departments, boards, and commissions of agriculture statements of moneys expended by these institutions, we have met with indifferent success in securing dependable information, and complete data on the subject are not available. A total of $5,000,000 annually would perhaps be a fairly approximate estimate of the amount expended by the various State departments of agriculture for carrying on their functions, which concern chiefly regulatory and pest-control work.

For the support of the State agricultural experiment stations, from funds derived from State and local sources, there was expended during the fiscal year 1927 approximately $10,000,000; and during the same period the State colleges of agriculture expended from money appropriated by the States and counties and contributed by various independent local agencies, for demonstration and other extension work in agriculture and home economics under the terms of the Smith-Lever Act, a total of about $13,000,000.

Figures furnished by the Federal Board for Vocational Education indicate that during the fiscal year 1927 expenditures by State boards of education from State and local sources under the Smith-Hughes Act aggregated $4,700,000 for agricultural education and $2,800,000 for education in home economics subjects, or a total of $7,500,000 for both items.

According to the latest available statistics, State funds for the support of the land-grant colleges of agriculture amount to some $10,000,000 annually. It should be mentioned, however, that the scope of these colleges is not limited to the teaching of agriculture, but comprehends as well the mechanic arts, engineering branches, medicine, dentistry, pharmacy, and other subjects. Certain indeterminate funds are also made available by the States for their secondary and intermediate agricultural schools.

The most recent figures available show that in excess of $500,000,000 was expended from State funds during the fiscal year 1926 for the construction of State highways throughout the country, including the Federal-aid highway system.

In some States sanitary or livestock boards are maintained for the control of infectious or contagious animal diseases; others have bureaus of markets, forestry departments, and so forth. The Department of Agriculture has no comprehensive data regarding expenditures by these agencies.

SUMMARY

The foregoing information may be summarized as follows:

| | Federal funds | State funds |
|---|---|---|
| Federal funds under Department of Agriculture: | | |
| Work under supervision of Department of Agriculture, exclusive of road construction and Federal aid to State colleges and experiment stations | $49,000,000 | |
| Research work of State agricultural experiment stations (Hatch, Adams, and Purnell Act funds) | 3,000,000 | $10,000,000 |
| Extension work of State colleges of agriculture (Smith-Lever Act funds) | 6,000,000 | 13,000,000 |
| Road construction | 95,000,000 | 500,000,000 |
| Total as above | 153,000,000 | 523,000,000 |
| Federal funds under Department of the Interior: Support of State colleges of agriculture | $1,000,000 | $10,000,000 |
| Federal funds under Federal Board for Vocational Education: Agricultural and home economics education (Smith-Hughes Act) | 3,300,000 | 7,500,000 |
| State departments, boards, and commissions of agriculture | | 5,000,000 |
| Grand total | 160,300,000 | 545,500,000 |
| Deducting amount for road construction | 95,000,000 | 500,000,000 |
| Total, exclusive of roads | 65,300,000 | 45,500,000 |

INDEPENDENT OFFICES APPROPRIATION BILL

Mr. WOOD. Mr. Speaker, I call up the conference report on the bill (H. R. 9481) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes, and ask unanimous consent that the statement may be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The Clerk read the statement.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) "making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes," having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 3, 5, 12, 13, and 14.

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ", of which $1,000,000, or so much thereof as may be necessary, may be used for reconditioning and operating ships for carrying coal to foreign ports"; and the Senate agree to the same.

The committee of conference have not agreed on amendments numbered 1, 4, 7, 8, 9, 10, and 11.

WM. R. WOOD,
EDWARD H. WASON,
THOMAS H. CULLEN,
*Managers on the part of the House.*

F. E. WARREN,
REED SMOOT,
W. L. JONES,
LEE S. OVERMAN,
CARTER GLASS,
*Managers on the part of the Senate.*

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices for the fiscal year ending June 30, 1929, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conference committee and embodied in the accompanying conference report, as to each of such amendments, namely:

On No. 2: Inserts the language proposed by the Senate, including in the appropriation for the National Advisory Committee for Aeronautics the sum of $5,000 for procurement and development of a design for a wind tunnel suitable for research on full-sized airplanes.

On No. 3: Strikes out the appropriation of $14,347, inserted by the Senate, for a utility building and the lighting of the grounds of the Perry Victory Memorial.

On No. 5: Restores the language, stricken out by the Senate, providing for the location of a bathing pool on the site of the McKinley High School.

On No. 6: Inserts the language proposed by the Senate, relative to the use of the appropriation for the Merchant Fleet Corporation for reconditioning and operating ships for carrying

coal to foreign ports, modified so as to reduce the amount to be so available from $1,400,000 to $1,000,000, to strike out reference to the number of ships to be so used, and to make the authority permissive instead of mandatory.

On No. 12: Strikes out the appropriation of $65,000, inserted by the Senate, for an additional amount for the Water Boundary Commission, United States and Mexico.

On No. 13: Corrects a section number in the bill to conform to the action of the conferees.

On No. 14: Inserts the total of the bill in the amount as passed by the House instead of the amount as passed by the Senate.

The committee on conference have not agreed to the following amendments:

On No. 1: Extending the duties of the Bureau of Efficiency to include investigations in connection with the municipal government of the District of Columbia.

On No. 4: Providing pay at per diem rates for certain classes of employees under the Office of Public Buildings and Public Parks of the National Capital.

On Nos. 7 and 8: Relating to compensation of attorneys for the Shipping Board.

On No. 9: Relating to the discontinuance of the sea-service bureau of the Merchant Fleet Corporation.

On No. 10: Relative to the use of not to exceed $10,000,000 from the construction and loan fund of the Shipping Board in reconditioning the steamships *Mount Vernon* and *Monticello.*

On No. 11: Relating to the amount to be expended for attorneys' fees by the Shipping Board.

WILL R. WOOD,
EDWARD H. WASON,
THOMAS H. CULLEN,
*Managers on the part of the House.*

Mr. WOOD. Mr. Speaker, I move the adoption of the conference report.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Amendment No. 1: On page 9 of the printed bill, after line 18, insert: "That the duties of the Bureau of Efficiency prescribed by law with reference to investigations in the executive departments and independent establishments of the Federal Government are hereby extended to include the municipal government of the District of Columbia."

Mr. WOOD. Mr. Speaker, I offer an amendment, which I send to the desk.

The SPEAKER. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WOOD to amendment No. 1: Mr. WOOD moves that the House recede from its disagreement to the amendment of the Senate No. 1 and agree to the same with an amendment as follows: In line 1 of the matter inserted by said amendment, after the word "duties," insert the words "and powers."

Mr. BYRNS. Will the gentleman yield for a question?

Mr. WOOD. I yield.

Mr. BYRNS. I want to ask the gentleman whether or not it is contemplated that this amendment, if adopted, will result in an increase in appropriations?

Mr. WOOD. I will state that this will give the Bureau of Efficiency the same power and duties that they have now to apply to the Federal Government.

Mr. BYRNS. I understand that, but my inquiry is on a different line. Is it contemplated that the adoption of the amendment will result in any increase of appropriation for the Bureau of Efficiency for the next fiscal year?

Mr. WOOD. It will not; the appropriation has already been made.

Mr. BYRNS. May I say to the gentleman, if he will permit in his time, that I am not particularly opposed to the motion proposed by the gentleman from Indiana. I am well aware under all the circumstances that the Bureau of Efficiency has rendered a distinct service in the District of Columbia. I have been wondering by what authority that was done during the past year.

Mr. WOOD. I will state that our good friend who has gone on was of the opinion that they had the right to do this thing under the law. We had the same provision in the House bill, but took it out. There are some who have expressed some doubt about it, and the Senate, for the sake of clarifying the thing and in order that there might not be any doubt about it, put this in.

Mr. BYRNS. Does the gentleman know what the position of the Comptroller General is as to the right and authority of the Bureau of Efficiency to make the past investigation?

Mr. WOOD. From the fact that no objection has been made from time to time, I think the Comptroller General is confident that what they have done is all right. No question has been raised by him or anyone else.

Mr. BYRNS. I will say frankly that I think the Bureau of Efficiency has rendered a greater service for the District of Columbia than it has for many of the Departments of the Government. I have always felt that the duties now being performed by the Bureau of Efficiency in some departments of the Government are in a sense a duplication—that they were duties that could and should be performed under the Budget law by either the Director of the Budget or the Comptroller General. For this reason I have felt that there was a duplication. I do think that the Bureau of Efficiency has rendered a distinct service in the District of Columbia. I was told by a Member of the House, who is a member of the Committee on the District of Columbia, that it cost the Bureau of Efficiency something like $105,000 out of its present appropriation to perform the service for the District of Columbia. I have an idea that after this amendment is adopted you are going to find that the bureau will come here next year and ask for three or four hundred thousand dollars instead of $210,000, the present appropriation.

Mr. WOOD. We will take care of that when it comes up. We have the assurance that it will not cost any more. They have been doing it under the present appropiration.

Mr. BYRNS. Having the idea that I do with reference to the Bureau of Efficiency's duplication of work in many departments, I should hate to see any great increase in the present appropriation by reason of this amendment.

Mr. WOOD. They will not do it as long as I have anything to do about it, and I think, with the assistance of the gentleman's watchful eye, we can prevent it.

Mr. CULLEN. Mr. Speaker, in reference to the Bureau of Efficiency, in so far as it relates to the appropriation for the next fiscal year, we will take care of that when it comes before the committee. They are not going to get away so easy with an increased appropriation.

The SPEAKER. The question is on agreeing to the motion of the gentleman from Indiana.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 4: Page 27, line 24, beginning at page 28, insert "at rates of pay approved by the director, not exceeding current rates for similar employment in the District of Columbia;"

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 7: Page 36, line 22, strike out the word "three" and insert in lieu thereof the word "two."

Mr. WOOD. Mr. Speaker, I ask unanimous consent that amendments numbered 7 and 8 be considered together.

The SPEAKER. The gentleman from Indiana asks unanimous consent that amendments numbered 7 and 8 be considered together. Is there objection?

There was no objection.

The SPEAKER. The Clerk will report amendment No. 8.

The Clerk read as follows:

Amendment No. 8: Line 23, after the figures "$12,000," insert "*Provided,* That no attorney shall be paid more than $10,000 per year."

Mr. WOOD. Mr. Speaker, I move that the House further insist upon its disagreement to these two amendments.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 9: Page 37, after line 5, insert "No part of the funds of the United States Shipping Board or the United States Shipping Board Merchant Fleet Corporation shall be available for the maintenance of a sea service bureau."

Mr. WOOD. Mr. Speaker, I move that the House further insist upon its disagreement to amendment numbered 9.

Mr. LAGUARDIA. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LAGUARDIA. Is not a motion to recede and concur in the Senate amendment preferential?

The SPEAKER. It would be.

Mr. LAGUARDIA. I so moved.

The SPEAKER. The question is on the motion of the gentleman from New York to recede and concur in the Senate amendment numbered 9.

The motion was rejected.

The SPEAKER. The question now is on the motion of the gentleman from Indiana to further insist upon the disagreement to the Senate amendment numbered 9.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 10: Page 37, strike out lines 10 and 11 and insert: "For the reconditioning of the steamships *Mount Vernon* and *Monticello* at a total cost not in excess of $12,000,000, not to exceed $10,000,000 is made available from the construction loan fund and shall be reimbursed to such fund with interest at such rate and within such period as the board may determine, but not exceeding 10 years after the date of commission of such reconditioned vessels: *Provided*, That neither of said steamships shall be sold for less than the cost of reconditioning, less a deduction of 5 per cent per annum for depreciation from the date of completion of such reconditioning to the date of sale."

Mr. WOOD. Mr. Speaker, I offer the following motion, which I send to the desk and ask to have read.

The Clerk read as follows:

Mr. WOOD moves that the House recede from its disagreement to the amendment of the Senate No. 10, and agree to the same with an amendment as follows: In line 8 of the matter inserted by such amendment, after the word "That," insert the following: "after such reconditioning."

Mr. LAGUARDIA. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. LAGUARDIA. Is that amendment now open to amendment?

The SPEAKER. The Chair thinks it would be necessary first that the gentleman from Indiana yield for that purpose.

Mr. LAGUARDIA. Will the gentleman from Indiana yield for the purpose of my offering an amendment to this amendment?

Mr. WOOD. I do not think so. I do not know what the amendment is.

Mr. LAGUARDIA. If the gentleman would yield for that purpose, I would offer an amendment, at the end of the Senate amendment, to strike out the period and to add the following:

*Provided*, That such reconditioning of said ships shall be done in a Government navy yard.

Mr. WOOD. Mr. Speaker, I would not agree to that. In all probability, that is where the work will be carried on, but I can not agree to an amendment of that kind.

Mr. LAGUARDIA. The gentleman is within his rights.

The SPEAKER. The question is on the motion of the gentleman from Indiana to recede and concur with an amendment.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Amendment No. 11: Page 37, after the words "Shipping Board," line 23, strike out the figures "$13,688,750" and insert "$13,538,750: *Provided*, That no more than $113,200 be paid out of this appropriation for lawyer fees for the 12 months next following the passage of this act."

Mr. OLIVER of Alabama rose.

The SPEAKER. Does the gentleman from Indiana yield to the gentleman from Alabama?

Mr. WOOD. I yield to the gentleman from Alabama.

Mr. OLIVER of Alabama. Mr. Speaker, I have sent to the desk a preferential motion which I ask the Clerk to read.

The Clerk read as follows:

Amendment by Mr. OLIVER of Alabama to amendment No. 11: In lieu of the matter inserted by said amendment, insert the following: "$13,688,750: *Provided*, That of the sums herein made available under the United States Shipping Board, not to exceed an aggregate of $350,000 shall be expended for compensation of regular attorneys employed on a yearly salary basis and for fees and expenses of attorneys employed in special cases."

The SPEAKER. The question is on the motion of the gentleman from Alabama to recede and concur with an amendment.

Mr. OLIVER of Alabama. Mr. Speaker, I understand the gentleman from Indiana consents to that amendment.

Mr. WHITE of Maine. Mr. Speaker, will the gentleman yield?

Mr. OLIVER of Alabama. Yes.

Mr. WHITE of Maine. I am not sure what is meant by the language either in the original draft or in the amendment which the gentleman has offered. When the gentleman speaks of "attorneys' fees," does he have reference to those employed regularly in the legal staff of the Shipping Board and the Fleet Corporation, or does this refer to outside legal talent which may be employed for particular cases from time to time?

Mr. OLIVER of Alabama. This amendment is so drawn as to apply to all, both on the legal staff here as well as those on the outside. It is a matter on which the chairman and I have reached an agreement.

The SPEAKER. The question is on the motion of the gentleman from Alabama to recede and concur with an amendment.

The motion was agreed to.

SHOSHONE INDIANS

Mr. LEAVITT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (S. 710) conferring jurisdiction upon the Court of Claims to hear, adjudicate, and render judgment in claims which the Northwestern Bands of Shoshone Indians may have against the United States, with House amendments thereto, insist on the House amendments, and agree to the conference.

The SPEAKER. The gentleman from Montana asks unanimous consent to take from the Speaker's table the bill S. 710, with House amendments thereto, insist on the House amendments, and agree to the conference.

Is there objection?

There was no objection.

The Chair appointed the following conferees: Mr. LEAVITT, Mr. SPROUL of Kansas, Mr. EVANS of Montana.

AGRICULTURAL SURPLUS CONTROL BILL

Mr. HAUGEN. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3555.

The motion was agreed to.

The SPEAKER. The gentleman from Michigan will please take the chair.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3555, with Mr. MAPES in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the further consideration of the bill S. 3555, which the Clerk will report by title.

The Clerk read as follows:

A bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce.

The CHAIRMAN. When the committee rose yesterday it was considering a point of order which had been raised by the gentleman from Missouri [Mr. CANNON]. The gentleman from Missouri withdrew his point of order, but the gentleman from New York [Mr. LAGUARDIA] renewed it.

The point of order, as stated by the gentleman from Missouri, was that it is not in order to proceed with the reading of the sections for amendment for the reason that a substitute had been adopted, striking out and substituting the identical language. The committee will recall the situation. The gentleman from Louisiana [Mr. ASWELL], after the reading of the first section of the Agricultural Committee substitute, which is being considered under the rule as a separate bill, moved to strike out the section and to insert in lieu thereof the language of the bill which he introduced, and he served notice that if that amendment was adopted, upon the reading of the subsequent sections of the Haugen bill he would move as each was read to strike it out. The amendment of the gentleman from Louisiana was subsequently adopted, and the Clerk proceeded to read the other sections of the committee bill, the so-called Haugen bill, when the gentleman from Missouri made his point of order.

The discussion of the point of order took a somewhat broader field than the exact point raised by the gentleman from Missouri, and the Chair will endeavor to touch upon the different points raised in the discussion of the point of order.

There are two well-defined methods of moving a substitute to a bill. We speak of the motion made by the gentleman from Louisiana [Mr. ASWELL] as a substitute to the bill. While that perhaps is not technically correct, it answers the purpose and conveys the general idea of what is sought to be accomplished. As a matter of fact, the motion of the gentleman from Louisiana was, as the usual motion is, after the reading of the first section, to strike out the section and insert an amendment in the nature of a substitute. That, I think, is the correct technical statement of the situation.

The two methods of offering a substitute are to make such a motion as the gentleman from Louisiana made after the completion of the reading of the first section, and the practice is to serve notice upon its introduction that if such amendment is adopted, the mover will move to strike out the subsequent sections of the original bill as they are read. The gentleman from Louisiana [Mr. ASWELL] made that announcement in the case here.

The other method is that on the completion of the reading of the bill, after it is perfected by amendment, to move to strike out all after the enacting clause and substitute the amending bill. As the Chair understands it, these are the two methods that may be adopted or used to offer a substitute. The practice, as it seems to the Chair, is well established; and it is in the discretion of the Members to follow whichever method they think desirable under the circumstances. There is no particular rule of governing the matter in the Manual, but the Chair thinks the practice is well established.

Now, it seems to the Chair that the only purpose to be gained by the method adopted here is in the announcement which the mover of the motion made: That if his amendment is adopted he will move to strike out the subsequent sections as they are read, for the purpose, if the committee sees fit to adopt his substitute or amendment, of avoiding the work and delay and controversy which naturally arise in perfecting the subsequent sections of the bill, if the committee sees fit to strike them out without perfecting amendments. That, in the judgment of the Chair, is a matter for the committee. In fact, the Chair is inclined to think that the main reason for the emphasis laid upon this point of order at this time is the interest which is taken in the question before the committee and the rather close division which exist on the controversial point in this farm-relief legislation.

The Chair is inclined to believe that if there was any great preponderance of sentiment in the House on one side or the other of this question that this point of order probably would not be raised, or at least would not be emphasized as much as it is now. But it does not seem to the Chair that that is any reason for changing the parliamentary situation or that it should affect the parliamentary question. The Chair does not think that he should take that into consideration in passing upon this point of order. That is a matter for the House and the committee itself to work out as it thinks best. The Chair has no right to assume that the committee will do a vain or idle or foolish thing, but must assume that it will work in a reasonable and sensible sort of way.

The argument of the gentleman from Georgia [Mr. CRISP] appealed, I think, to all of us. The gentleman from Georgia said that the Committee of the Whole must act upon the motion to strike out the subsequent sections and was bound to strike them out. While the Chair is inclined to agree with him that it is the logical and sensible and proper thing to do to strike them out, the mere fact that the committee has to vote on the motion to strike them out is an indication that it may not, as a matter of fact, vote to strike them out. The Chair can not tell whether the partisans on the one side or the other on this controversial question will predominate here at any particular time. If the committee votes on the motion it may not vote to strike them out, or it may; and the Chair can not be put in the attitude of saying that the sections are stricken from the bill unless the committee decides so to do.

The gentleman from Missouri [Mr. CANNON] makes the point of order, as I understand it, that the Aswell amendment having been adopted and containing, as it does, several sections identical in language with some of the sections of the Haugen bill, that to read the subsequent sections of the Haugen bill, which are identical in language with the Aswell bill, under the five-minute rule and permit the adoption of perfecting amendments, would, in effect, be amending the Aswell amendment after that amendment has been adopted; that the Aswell amendment can not be amended and it is upon that basis that, therefore, the gentleman from Missouri [Mr. CANNON] makes his point of order. The Chair does not think that is quite the situation. The Aswell amendment is adopted, to be sure, and can not be amended now. It was subject to amendment before the final vote and adoption of it, but it can not be amended now. The Aswell amendment having been adopted by the committee, of course, the logical thing would be to reject all subsequent sections of the Haugen bill, but a situation might arise in the House after the committee rises and makes its report, where the Aswell amendment would be voted down by the House, and then, with the previous question ordered, the Chair thinks the vote would come upon the Haugen bill. It would then be desirable to have the Haugen bill perfected by desirable amendments, and amendments to the subsequent sections of the Haugen bill have no reference at all to the amendments to the Aswell bill and do not affect it in any way, as the Chair thinks. The Chair believes the sections in the Haugen bill can be perfected and amended even though they are the same, some of them, as in the Aswell substitute.

The Chair has had an opportunity to examine some of the precedents since the committee rose, and he thinks the precedent referred to yesterday, and cited in Hinds' is on all fours with the situation before us now. However much we may disagree with the logic of the thing, the Chair believes it is his duty to follow the practice and the precedents which, the Chair thinks, are well established.

Back in the Fifty-seventh Congress, in considering the Philippine bill, which was referred to yesterday, the gentleman from Virginia, Mr. Jones, offered, in the first instance to strike out everything after the enacting clause—

And to substitute the bill I have offered as an amendment, with the modification offered by the gentleman from Connecticut.

The Chairman of the committee at the time was the gentleman from Illinois, Mr. Mann, and he stated:

The gentleman from Virginia will understand that his motion is not in order at the present time. He can offer it and have it pending.

That is, the motion to strike out all after the enacting clause and to substitute his bill. Subsequently the gentleman from Virginia, Mr. Jones, stated:

If it be permissible to move to strike out all after the enacting clause, or to strike out the first section and substitute therefor the minority bill—

That is the situation we have here—

with the understanding that if this motion prevails I shall subsequently move to strike out the other sections of the majority bill, then I make that motion, if the Chair recognizes me to make it.

The Chairman, Mr. Mann, said:

The gentleman from Virginia moves to substitute the amendment which he has sent to the Clerk's desk in place of section 1 of the pending bill, giving notice that if this motion be adopted he will move to strike out the other sections of the pending bill.

The same as the gentleman from Louisiana did here.

The Chairman continues:

Of course, the gentleman understands that if this motion should be submitted at this time, it will still require the reading of the rest of the bill for amendment.

Subsequently in the proceedings the gentleman from Indiana, Mr. Crumpacker, raised a parliamentary inquiry:

I rise to inquire whether the amendment proposed by the gentleman from Virginia is to be voted upon before the balance of the bill has been read. I desire to submit a few suggestions upon that proposition if the Chair has not clearly satisfied himself in regard to the matter.

The Chairman said:

The Chair will state to the gentleman that on the point of order the Chair has already held that the substitute offered by the gentleman from Virginia may be offered as a substitute to section 1 of the pending bill. That is the question now before the House.

Then the motion was made, and the amendment offered by the gentleman from Virginia was adopted. Then this colloquy took place.

The CHAIRMAN. Debate being closed, the question is now on agreeing to the motion of the gentleman from Virginia to strike out all after the enacting clause, in section 1, and substitute in place thereof the amendment offered by him.

Then Mr. Tawney raised this question—Mr. Tawney appears to have presided during a part of the time, but during these proceedings the gentleman from Illinois, Mr. Mann, was in the chair.

Mr. TAWNEY. I rise to a parliamentary inquiry. Was the motion of the gentleman from Virginia to strike out all after the enacting clause of the bill and substitute that which he has offered?

The CHAIRMAN. The motion of the gentleman from Virginia is to strike out, in section 1, all after the enacting clause and insert in place of it the substitute which he has offered, he having given notice that he will move to strike out the other sections of the bill.

Then the motion was put and adopted and the second section of the bill was read, when the following colloquy took place:

Mr. JONES of Virginia. I move to strike out the section just read.

Mr. RICHARDSON of Tennessee. I ask for order, so that we may hear what is going on.

The CHAIRMAN. The Chair recognizes the gentleman from Virginia (Mr. Jones).

Mr. JONES of Virginia. Mr. Chairman, I ask unanimous consent that a vote may be taken upon striking out all of the succeeding sections together.

The CHAIRMAN. The gentleman from Virginia asks unanimous consent that the Committee of the Whole vote upon striking out all of the sections of the pending bill after section 1.

Mr. Grosvenor and Mr. Payne objected.

Mr. JONES of Virginia. I move, then, to strike out this section.

Mr. PAYNE. Mr. Chairman, that question is debatable, of course.

The CHAIRMAN. It is debatable.

Then, subsequently, there was an attempt to secure an agreement for voting upon all the subsequent sections en bloc. An objection was made to that. As was indicated here yesterday, there were several committee amendments pending, but the gentleman from Indiana, Mr. Crumpacker, objected to the unanimous-consent request to vote upon all the remaining sections en bloc because he had a personal amendment to one of the sections, section 6, I believe, which he desired to offer, so that unanimous consent was not granted. Subsequently, Mr. Crumpacker offered his amendment from the floor, it was adopted, and upon motion of the gentleman from Virginia, Mr. Jones, the section, after it was perfected, was stricken from the bill, as all the others were.

That, in short, was the procedure followed at that time and, as the Chair understands, that has been the constant practice from that day to this.

When the committee rose and went into the House the situation was gone over again under proper parliamentary procedure, and the Speaker differentiated between the Jones amendment and a substitute and said it was before the House the same as any other amendment; that it was an amendment to section 1 and should be voted upon separately as an amendment.

The Chair thinks this is the exact situation here. It is for the committee to decide whether it wants to go ahead and perfect the subsequent sections of the Haugen bill or to strike them out, either before or after they are perfected.

The Chair therefore overrules the point of order, and the question is——

Mr. KETCHAM, Mr. BURTNESS, and Mr. JONES rose.

Mr. KETCHAM. Mr. Chairman, I offer a preferential motion.

The CHAIRMAN. The gentleman from Michigan offers a motion which the clerk will report.

Mr. KETCHAM. I move, Mr. Chairman, to strike out section 2 of the McNary-Haugen bill and insert section 2 of the Aswell bill, and I propose if this amendment shall prevail to move that succeeding sections likewise be stricken out and the corresponding sections of the Aswell bill be inserted until section 13 shall have been reached, when I propose to offer the export debenture plan as an additional amendment.

Mr. DOWELL. Against which I make a point of order, Mr. Chairman.

Mr. JONES. Why does not the gentleman simply offer the debenture plan? The Aswell bill is already in.

Mr. KETCHAM. As I understand the Chair, we are now about to engage in the perfecting of the McNary-Haugen bill.

Mr. BLACK of Texas. Mr. Chairman, I make the point of order that section 2 of the Aswell bill has already been adopted.

Mr. DOWELL. I make the further point of order, Mr. Chairman, it is not germane.

Mr. KETCHAM. Mr. Chairman, I ask that the amendment be reported.

Mr. ASWELL. Mr. Chairman, I would like to submit a parliamentary inquiry.

The CHAIRMAN. The clerk will report the amendment of the gentleman from Michigan.

The Clerk read as follows:

Amendment offered by Mr. KETCHAM: Strike out section 2 of the bill and insert section 2 of the Aswell bill.

Mr. DOWELL. Mr. Chairman, I make the point of order that that is not germane.

Mr. BLACK of Texas. Mr. Chairman, I make the further point of order that section 2 of the Aswell bill having already been adopted, the motion is not in order.

Mr. BURTNESS. Mr. Chairman, I wish to make the additional point of order that the amendment proposed is not an amendment at all, because there is not the change of one single word, a comma, or any other punctuation mark of any sort, and the amendment therefore is simply to strike out one thing and reinsert identical language, with similar punctuation marks and everything of that sort, and therefore plainly can not be considered as an amendment.

Mr. RAMSEYER. Mr. Chairman, I wish to submit a further point of order.

The CHAIRMAN. The Chair would like to hear the gentleman from Michigan on what would be the difference in effect between the gentleman's motion and to vote down the motion of the gentleman from Louisiana to strike out the section.

Mr. KETCHAM. So far as the material effect there would be none, except under the decision of the Chair I understood this is the only way in which the debenture proposition may be brought to the consideration of the committee, and that is what I desire to do.

The CHAIRMAN. The Chair does not understand how that would affect the debenture plan at all.

Mr. KETCHAM. By the giving of notice that if this motion is agreed to the subsequent sections will be offered.

I ask unanimous consent, Mr. Chairman, to withdraw my motion and to submit another preferential motion.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to withdraw his motion. Is there objection?

There was no objection.

Mr. KETCHAM. Now, Mr. Chairman, I submit a preferential motion. I move to strike out section 2 of the McNary-Haugen bill and substitute therefor the bill (H. R. 12892) known as the export debenture plan.

Mr. RAMSEYER. Mr. Chairman, I make the point of order that this is not the place in the bill where a substitute can be offered. The Chair made that very clear in his ruling and I do not care to argue the matter. The Chair stated that one place is after the reading of the first section and the other place is after the bill is completed.

Mr. JONES. Mr. Chairman, I desire to be heard on the point of order.

Mr. BURTNESS. Mr. Chairman, I desire to make the additional point of order that the amendment proposed is not germane to the section that is now under consideration.

Mr. JONES. Mr. Chairman, the motion, as I understand it, which the gentleman intends to offer is to strike out section 2 of the McNary-Haugen bill and insert the debenture plan beginning with section 5 on page 10. In other words, the Aswell bill up to that point carries the features of both bills. This has already been inserted. The motion of the gentleman is to strike out section 2 and thus follow the Aswell bill with the debenture feature of the other plan; is not that what the gentleman wants to do?

Mr. KETCHAM. That is correct.

Mr. ASWELL. Mr. Chairman, it will be recalled by the RECORD that yesterday before the parliamentary discussion opened, I had already moved to strike out the second section of the Haugen bill.

Mr. JONES. And this is a preferential motion to strike out and insert. It takes the place of the Aswell motion and would be voted upon first. It would simply mean that the Aswell bill would be followed with the debenture feature of this bill. That is what the gentleman is offering, as I understand, and I would like to be heard on the point of order.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Mr. KETCHAM moves to strike out section 2 and insert H. R. 12892 and gives notice that if this motion prevails he will move to strike out the succeeding sections and insert the corresponding sections of the Aswell bill until section 13 is reached and then he will propose the export debenture plan as an additional amendment.

Mr. CHINDBLOM. Mr. Chairman, I make the point of order that the Aswell substitute has been adopted, and is a substitute for the entire bill; that any amendment of the Aswell substitute should have been proposed at the time that substitute was before the House, and it is now too late at any time, at any point, to offer an amendment to the Aswell substitute.

Mr. JONES. This is not an amendment to the Aswell substitute. It is to section 2 of the McNary-Haugen bill and follows the Aswell substitute.

Mr. CHINDBLOM. But the substitute has been adopted to the entire bill.

Mr. KETCHAM. Mr. Chairman, in the motion I offered I was endeavoring to act in the brief time I had to think of the application of the Chair's ruling to the situation, but I have been advised that this is not the best procedure and I therefore ask unanimous consent to withdraw again my amendment and will offer another in its place.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

Mr. KETCHAM. Now, Mr. Chairman, I move to strike out section 2 of the McNary-Haugen bill and insert in lieu thereof the export debenture plan.

Mr. BURTNESS. And to that, Mr. Chairman, I make the same point of order that I made to the last amendment proposed, that the provisions thereof are not germane to the section and therefore not germane at this point in the bill.

Section 2 relates only generally to the establishment of a farm board.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Michigan.

The Clerk read as follows:

Mr. KETCHAM moves to strike out section 2 and insert in lieu thereof the export-debenture plan, as follows:

Mr. DOWELL and Mr. LAGUARDIA reserved points of order.

Mr. JONES. Mr. Chairman, I think the membership is familiar with the provisions of the export-debenture plan, and I ask that it be considered as read.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that the motion of the gentleman from Michigan be considered as read.

Mr. BURTNESS. Reserving the right to object.

Mr. RAMSEYER. A point of order. Does the Chair consider that all points of order that have been made against the amendment are now pending against the amendment read?

The CHAIRMAN. No; because the other amendments were withdrawn. After this amendment is reported opportunity will be given for anybody to make a point of order.

Mr. BURTNESS. Reserving the right to object to the request of the gentleman from Texas, I want to call attention to the fact that the Aswell amendment was not included in the RECORD yesterday, and those who wanted to find out what it was could not do so. I want this debenture-plan amendment printed in the RECORD, in which event I shall not object.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas that the motion of the gentleman from Michigan be considered as read and printed in the RECORD at this point?

Mr. CANNON. Reserving the right to object, this is one of the most indefinite motions. It is to strike out a section and insert the debenture plan. We do not know whether it includes sections 5, 7, or all the rest of the bill.

Mr. JONES. I will say that it carries the rest of the Ketcham bill without the corporation feature.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas that the motion be considered as read and printed in the RECORD at this point?

There was no objection.

The motion of Mr. KETCHAM is as follows:

Strike out section 2 and insert in lieu thereof the following:

"EXPORT DEBENTURES

"SEC. —. (a) On and after the 1st day of July next following the approval of this act the Secretary of the Treasury, under regulations prescribed by the board, shall, subject to affirmative findings under subdivisions 1 and 2 of paragraph (j) of section 3, issue an export debenture to any farmer, cooperative association, and other person, in respect of any quantity of a debenturable agricultural commodity or of any quantity of any debenturable product of such commodity, that is exported from the United States to a foreign country by such farmer, cooperative association, or other person. The export debenture shall be in an amount computed at the debenture rate for such commodity or product, respectively, effective at the time of the exportation.

"(b) In order to procure the issuance of an export debenture such farmer, cooperative association, or other person shall, within a reasonable time prior to the exportation, to be prescribed under regulations of the board, make application for such debenture and submit proofs satisfactory to the board either (1) that the quantity of the debenturable agricultural commodity to be exported was produced in the United States and has not previously been exported therefrom, or (2) that the agricultural commodity used in making the quantity of the debenturable product to be exported was produced in the United States and the agricultural commodity and the debenturable product have not previously been exported therefrom.

"(c) Any export debenture, when presented by the bearer thereof within one year from the date of issuance of the debenture, shall be receivable at its face value by any collector of customs, or deputy collector of customs, or other person authorized by law or by regulation of the Secretary of the Treasury to perform the duties of collector of customs, in payment of duties collectible against articles imported by such bearer.

"(d) Title to any export debenture shall be transferable by delivery.

"DEBENTURABLE COMMODITIES AND PRODUCTS

"SEC. —. For the purposes of this act, wheat, corn, rice, swine, cattle, cotton, tobacco, and any other agricultural commodity which is designated by the board under section — (b), shall be known and are herein referred to as debenturable agricultural commodities. Any food product of wheat, corn, rice, swine, or cattle, or any manufactured product of cotton or tobacco, or of any other agricultural commodity designated by the board under section — (b), shall be known and is herein referred to as a debenturable product if a debenture rate is prescribed for such product either specifically in section — (a) or by the board under section — (c).

"EXPORT DEBENTURE RATES

"SEC. —. (a) The following export debenture rates are hereby prescribed:

"(1) Swine, one-quarter of 1 cent per pound; fresh pork, three-eighths of 1 cent per pound; bacon, hams, shoulders, and other pork, prepared or preserved, 1 cent per pound; lard, one-half of 1 cent per pound.

"(2) Cattle weighing less than 1,050 pounds, three-fourths of 1 cent per pound; cattle weighing 1,050 pounds or more, 1 cent per pound; fresh beef and veal, 1½ cents per pound.

"(3) Corn or maize, including cracked corn, 7½ cents per bushel of 56 pounds; corn grits, meal, and flour, and similar products, 15 cents per 100 pounds.

"(4) Paddy or rough rice, one-half of 1 cent per pound; brown rice (hulls removed), five-eighths of 1 cent per pound; milled rice (bran removed), 1 cent per pound; broken rice and rice meal, flour, polish, and bran, one-quarter of 1 cent per pound.

"(5) Wheat, 21 cents per bushel of 60 pounds; wheat flour, semolina, crushed or cracked wheat, and similar wheat products not specially provided for, 52 cents per 100 pounds.

"(6) Cotton, 2 cents per pound.

"(7) Tobacco, 2 cents per pound.

"(b) If the board finds (1) that the cost of producing in the United States any agricultural commodity (other than wheat, corn, rice, swine, cattle, cotton, and tobacco) of which a surplus above domestic requirements is produced in this country is greater than the cost of producing such commodity in competing foreign countries, and (2) that the domestic prices for such commodity are unduly depressed by world prices for such commodity, then the board, after publicly declaring its findings, may designate such commodity as a debenturable agricultural commodity and may prescribe such export debenture rate for the commodity as it finds sufficient to equalize the difference between the cost of producing such commodity in the United States and the cost of producing such commodity in competing foreign countries. Such export debenture rate shall not exceed any rate of tariff duty that may be in effect in respect of such commodity.

"(c) In order to promote the effectiveness of export debentures in respect of any debenturable agricultural commodity, the board may prescribe an export debenture rate upon products of the commodity as follows:

"(1) If the debenturable agricultural commodity is wheat, corn, rice, swine, or cattle, an export debenture rate may be prescribed for any food product made wholly or in part thereof.

"(2) If the debenturable agricultural commodity is a commodity other than wheat, corn, rice, swine, or cattle, an export debenture rate may be prescribed for any manufactured product made wholly or in part thereof. Any export debenture rate under this subdivision shall be sufficient to produce an export debenture in an amount equal to the debenture that would be issuable upon exportation of the quantity of the debenturable commodity consumed in the manufacture of the unit of the product upon which the export debenture is issued.

"FLEXIBLE RATE PROVISIONS

"SEC. —. (a) Whenever the board finds—

"(1) That because of a change in the rate of tariff duty upon any debenturable agricultural commodity or debenturable product an increase or reduction in the existing export debenture rate for such commodity or product is necessary in order effectively to carry out the policy declared in section 1; or

"(2) That an increase or reduction in the existing export debenture rate for any debenturable agricultural commodity or debenturable product is necessary in order to equalize the difference between the cost of producing the commodity or product in the United States and the cost of producing the commodity or product in competing foreign countries—then the board, after publicly declaring its finding, shall, subject to the limitations hereinafter provided, prescribe such increase or reduction in the existing export debenture rate for the commodity or the product as the board finds necessary, respectively, to carry out the policy declared in section 1 or to equalize the difference between the cost of producing the commodity or product in the United States and the cost of producing the commodity or product in competing foreign countries, respectively. Such increase or reduction shall become effective upon a date fixed in the proclamation, which shall not be less than 60 days from the date of the issuance of the proclamation. The aggregate increase or reduction, under this subdivision, in the export debenture for any commodity or product shall not exceed 50 per cent of the amount of the export debenture rate prescribed for the commodity or product either specifically in section — (a) or by the board under section — (b) or section — (c), and the export debenture rate for any commodity or product shall not be increased under this subdivision so as to exceed at any time the rate of tariff duty that may be in effect in respect of the commodity or the product at such time.

"(b) In order to prevent undue stimulation of the production of any debenturable agricultural commodity, whenever the board finds that the average annual production of any debenturable livestock commodity or the average annual acreage of any other debenturable agricultural commodity for the last two preceding years has exceeded the average annual production or acreage, respectively, of such commodity for the period from the seventh to the third preceding year—then the board, after publicly declaring its finding, shall prescribe that the export debenture rates for the commodity and the debenturable products thereof shall be reduced or that the issuance of debentures therefor shall be suspended, as hereinafter prescribed for the amount of increase in production or acreage which the board finds has occurred. Any such reduction or suspension shall become effective at the commencement of the next calendar year and shall continue throughout such calendar year. No such reduction or suspension shall be made unless notice thereof is published at least 30 days before the commencement of such calendar year. At the end of such calendar year the export debenture rates which were in effect immediately prior to the commencement thereof shall again become effective unless the board under the provisions of this act prescribes a change in such rates. Reductions of debenture rates or suspensions of the issuance of debentures, under this subdivision, shall be in accordance with the following limitations:

"(1) For a computed increase in production or acreage of less than 5 per cent, there shall be no reduction.

"(2) For a computed increase in production or acreage of 5 per cent but less than 10 per cent, there shall be a reduction of 25 per cent.

"(3) For a computed increase in production or acreage of 10 per cent but less than 15 per cent, there shall be a reduction of 50 per cent.

"(4) For a computed increase in production or acreage of 15 per cent or more, the issuance of debentures shall be suspended for a period of one year.

"(c) In computing reductions in export debenture rates fractions of a cent less than one-eighth shall not be used.

"(d) The power of the board under this section in respect of any agricultural commodity shall be exercised in such manner as will in its judgment carry out the policy declared in section 1.

"EXPORT CORPORATIONS

"SEC. —. (a) Whenever the board finds that, in order to afford the maximum benefits under this act to the producers of debenturable agricultural commodities, it is necessary to have an agency under the control of the board to purchase, store, sell, export, and deal in or market in an orderly way any one or more debenturable agricultural commodities or debenturable products, the board may organize under the law of any State or the District of Columbia one or more export corporations for such purposes.

"(b) The incorporators and directors of any such corporation shall be selected by the board.

"(c) Any such corporation shall have such capital stock as the board may determine. All of such capital stock is hereby subscribed by the United States. Upon payment of any part of the amount subscribed, shares fully paid up shall be issued to the United States and delivered to the board in the amount so paid. Shares shall be nonassessable and nontransferable. The United States shall not be liable, directly or indirectly, in respect of any share or bond, note, or other evidence of indebtedness issued by any corporation organized by the board under this section, and all such bonds, notes, and other evidences of indebtedness shall so state on their face.

"(d) Any such corporation is authorized, subject to such restrictions as the board may by regulation prescribe—

"(1) To purchase, store, export, and sell or market in an orderly way any or all of the debenturable agricultural commodities and debenturable products.

"(2) To lease and operate storage warehouses for such commodities and products purchased by the corporation, and facilities for transportation (otherwise than as a common carrier) in connection with the storage of such commodities and products.

"(3) To receive, use, and dispose of export debentures and to use any proceeds therefrom for the purpose of conducting the business of the corporation authorized by this act.

"(e) The board may make expenditures, not in excess of $50,000,000 in the aggregate, from the revolving fund, for the purpose of paying subscriptions for the capital stock of all such corporations as the board may organize under this section.

"(f) Any profits derived by any export corporation organized under this section from operations in respect of any debenturable agricultural commodity or debenturable product shall be used only for further operations in respect of such commodity or product, or for such other purposes as the Congress may hereafter prescribe.

"INSURANCE

"SEC. —. (a) Upon request of any cooperative association or associations, the board is authorized to loan, from time to time out of the revolving fund, to such association or associations, funds requisite for subscription to and payment of the capital stock of a corporation to be organized under the laws of any State, for the purpose of entering into contracts of price insurance. If there is more than one such subscribing association, such loans shall be in such proportions as the associations may agree, or on failure of such agreement, then in such proportions as the board may determine. Such loans shall be made upon such terms and conditions as the board may prescribe except that no such loan may be made unless the cooperative association or associations receiving the loan have entered into an agreement with the board that the corporation to be formed will, in its charter or by-laws, be subject to the following requirements:

"(1) That the corporation will insure the price only of those agricultural commodities which, in the judgment of the board, are regularly traded in upon an exchange in sufficient volume to establish a recognized basic price for the market grades of such commodities, and then only when such exchange has accurate price records for the commodity covering a period of years of sufficient length, in the judgment of the board, to serve as a basis upon which to calculate the risks of the insurance.

"(2) That subsequent to the organization of the corporation any cooperative association handling a commodity insured by the corporation may become a stockholder in such corporation upon such terms and conditions as the board may prescribe, and that all stock in the corporation will be subject to such restrictions upon its alienation as will insure the retention of both such stock and all beneficial interests therein by cooperative associations.

"(3) That the corporation will insure any cooperative association, a stockholder in the corporation, for any 12 months' period commencing with the delivery season for the commodity, against loss to such association or its members due to decline in the average market price of the agricultural commodity handled by the association during the period of sales by the association, from the average market price for the commodity during the period of delivery to the association. The duration of such periods shall be specified in the policy of insurance. In computing such average market prices the policy shall provide for the use of daily average cash prices paid for a basic grade of the commodity in an exchange designated in the policy.

"(4) That the corporation will insure only so much of the commodity delivered to the association as is produced by the members of the association and as is reported by the association for coverage under the policy.

"(5) That the corporation will issue policies of insurance only at rates of premium fixed by the corporation and approved by the board as being adequate to cover the risk assumed under the policies issued.

"(6) That the corporation will keep such accounts, records, and memoranda, and make such reports in respect of its transactions, business methods, and financial condition as the board may from time to time prescribe.

"(7) That the corporation will permit the board, on its own initiative or upon written request of any cooperative association, a stockholder in the corporation, to investigate the financial condition and business methods of the corporation.

"(8) That whenever the board finds that private insurance agencies are able to provide the insurance offered by the corporation upon terms which the board deems satisfactory, then the corporation will thereupon repay to the board the amount of all outstanding loans under this section and interest thereon.

"(b) No more than one corporation shall be maintained at any one time under this section.

"(c) The cooperative association or associations to which loans are made under this section shall pledge with the board their stock in the corporation as security for the loans. Loans under this section shall bear interest at the rate of 4 per cent per annum on the unpaid principal. Dividends upon the stock pledged with the board shall be applied, first, to interest due upon the loans, and then to the principal of the loans. No distribution shall be made by the corporation otherwise than by cash dividends upon its stock until such time as such loans and the interest thereon have been paid in full. No cooperative association or its members shall be liable for any such loans or interest thereon.

"(d) Whenever under the terms and conditions of any loan under this section a default occurs in the repayment of the amount of the principal or interest thereof, the board, upon 10 days' notice to the corporation, shall be held to have title to the stock held by it as security for the loan. The board may sell or otherwise dispose of the stock to any cooperative association or may exercise all voting rights of such stock for the purpose of liquidating the affairs of the corporation. Upon any such sale or other disposition or upon any such liquidation the board shall, after deducting from the proceeds thereof the amount of principal and interest in default upon the loan secured by the stock, pay the remainder of such proceeds to the cooperative association from which the stock was acquired.

"EXAMINATION OF BOOKS AND ACCOUNTS OF BOARD

"SEC. —. Expenditures by the board shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the board. Any action of the board in issuing export debentures and vouchers so made for expenditures from the revolving fund shall be final and conclusive upon all officers of the Government; except

that all financial transactions of the board shall, subject to the above limitations, be examined by the General Accounting Office, at such times and in such manner as the Comptroller General of the United States may by regulation prescribe. Such examination in respect of expenditures from the revolving fund shall be for the sole purpose of making a report to the Congress and to the board of action in violation of law, together with such recommendations as the Comptroller General deems advisable concerning the receipts, disbursements, and application of the funds administered by the board.

"ADMINISTRATIVE AND PENALTY PROVISIONS

"SEC. —. (a) Regulations requiring that metal tags or other appropriate markings be placed on all bales of cotton produced in foreign countries and allowed transit through the United States for exportation may be prescribed by the board. Every person who violates any such regulation of the board shall be liable to a civil penalty of $100 for each such offense. Such penalty may be recovered in a civil suit brought by the board in the name of the United States.

"(b) The board shall prepare and issue, or cause to be prepared and issued, all export debentures, and shall prescribe the terms and conditions in respect of export debentures. The Secretary of the Treasury, upon request of the board, is authorized to have such debentures prepared at the Bureau of Engraving and Printing.

"(c) Export debentures issued under authority of this act shall be obligations of the United States within the definition in section 147 of the act entitled 'An act to codify, revise, and amend the penal laws of the United States,' approved March 4, 1909, as amended.

"(d) Any person who shall make any false statement for the purpose of fraudulently procuring, or shall attempt in any manner fraudulently to procure, the issuance or acceptance of any export debenture, whether for the benefit of such person or of any other person, shall be fined not more than $2,000 or imprisoned not more than one year, or both.

"COOPERATION WITH EXECUTIVE DEPARTMENTS

"SEC. —. (a) It shall be the duty of any establishment in the executive branch of the Government, upon request by the board or upon Executive order, to cooperate with and render assistance to the board in carrying out any of the provisions of this act and the regulations of the board. The board shall, in cooperation with any such establishment, avail itself of the services and facilities of such establishment in order to avoid preventable expense or duplication of effort.

"(b) Upon request by the board the President, by Executive order, (1) may transfer any officer or employee from any establishment in the executive branch of the Government, irrespective of his length of service in such establishment, to the service of the board, and (2) may direct any establishment in the executive branch of the Government to furnish the board with such information and data pertaining to the functions of the board as may be contained in the records of the establishment; except that the President shall not direct that the board be furnished with any information or data supplied by any person in confidence to such establishment, in pursuance of any provision of law or any agreement with such establishment.

"DEFINITIONS

"SEC. —. As used in this act—

"(a) The term 'person' means individual, partnership, corporation, or association.

"(b) The term 'United States,' when used in the geographical sense, means continental United States and the Territory of Hawaii.

"(c) The term 'tobacco' means leaf tobacco, stemmed or unstemmed.

"(d) The term 'cotton' means cotton of any tenderable grade under the United States cotton futures act.

"(e) The term 'wheat' means wheat not below grade No. 3 as prescribed by the Secretary of Agriculture under the United States grain standards act.

"SEPARABILITY

"SEC. —. If any provision of this act is declared unconstitutional or the applicability thereof to any person or circumstance is held invalid, the validity of the remainder of the act and the applicability thereof to other persons or circumstances shall not be affected thereby.

"REVOLVING FUND

"SEC —. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $200,000,000. Such sum shall be administered by the board and used as a revolving fund in accordance with the provisions of this act. The Secretary of the Treasury shall deposit in the revolving fund such portions of the amounts appropriated therefor as the board from time to time deems necessary.

"ADMINISTRATIVE APPROPRIATIONS

"SEC. —. For expenses in the administration of the functions vested in the board by this act there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $200,000, to be available to the board for necessary expenses incurred prior to July 1, 1929."

Mr. DOWELL. I make the point of order that the amendment is not germane; it is indefinite and can not be considered at this time. It contains extraneous matter.

Mr. RAMSEYER. A point of order, Mr. Chairman. There was so much confusion I could not tell whether the gentleman from Iowa made a point of order or not. I make the point that this is not the place to offer a substitute; that a substitute can only be offered as the Chair indicated this morning in his able ruling—at the conclusion of the reading of the first paragraph or at the close of the reading of the bill.

Mr. LAGUARDIA. A point of order, Mr. Chairman. The amendment is in the nature of a substitute, and it offers several sections in lieu of section 2. Section 2 has been adopted by the House as a substitute.

Mr. JONES. Mr. Chairman, I want to address myself to the point of order. If section 1 as originally in the Haugen bill were all that was in the bill as amended this might not be germane to such section; but as it has now been acted on by the committee, all the features of both the McNary-Haugen and the Aswell bills in identical form are in it up to the method of raising the money.

In the declaration of policy in section 1 there is set out the purpose of the bill, and that is to give equality by putting agriculture into a price parity with industry and to eliminate waste. Other purposes are also named in that provision. That is the declaration. That is followed with three distinct features—one, a provision for a board; two, a provision for a loan feature; and, three, a provision for insurance. If just one substantive proposition were contained in the bill, it might not be all right to offer a distinct substantive proposal, but there are three distinct substantive propositions, all following in line with the declaration of policy set out in section 1. Since that declaration of policy is set out and you have three distinct substantive methods of operation, according to all of the precedents it is permissible to offer another substantive program.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. CRAMTON. Is the gentleman arguing that because there were three substantive propositions in the Aswell amendment, it is now permissible to add a fourth one as a substitute for section 2 of the Haugen bill? Is that the position of the gentleman?

Mr. JONES. If it is germane to the bill and to the paragraph before it or just following.

Mr. CRAMTON. In other words, if it is germane to the Aswell amendment, it can be offered as a substitute for section 2 of the Haugen bill?

Mr. JONES. I have not yet come to that proposition. I was covering one matter at a time. That itself would not make it germane, but if it is germane to the Aswell bill on its merits, which it will follow, I think that would answer the contention of the gentleman. I was just showing in the first part of my statement to the Chair that there is already more than one distinctive proposition inserted in the bill prior to the place at which this is offered. Under the declaration of policy several things are named. In order to carry out that declaration of policy, they have a board, they have loan features, they have insurance features. The tariff is written into not only section 1, if not in name, then in fact, but the tariff is written all through the Aswell bill and all through the McNary-Haugen bill. The main purpose of the whole bill, not only of the McNary-Haugen bill, but of the Ketcham bill, is to remove the surplus and thus cause the domestic price of a commodity to be automatically lifted up. It is to do that behind the tariff wall. The debenture plan undertakes to assist, to effect the exact main purpose, namely, to help by removing the surplus, by assisting in removing the surplus and effect the same purpose that the insurance feature is to effect, the same purpose that the loan feature is to effect, which is to remove the surplus, though it is done by just a little different method of assisting in doing that. The loan feature is not primarily a loan feature for the purpose of making a loan, but it says it is to make a loan so that the surplus may be removed and thus the price brought up.

The same is true of the insurance feature. It is not to put this board into the insurance business, but it is to adopt insurance as an incident to the main purpose, which is to remove the surplus. The removal of the surplus is the main feature and the main purpose of the bill. These others are incidental. In removing that surplus we have two or three different plans. This will aid in doing that very thing in other ways, all of which are incidental to the main purpose. The tariff is effective on all of the commodities specifically named in this bill with one exception.

The CHAIRMAN. Will the gentleman permit the Chair to suggest a point which the Chair thinks is material?

Mr. JONES. Certainly.

The CHAIRMAN. Of course, the amendment which the gentleman offers must be germane to the section under consideration.

Mr. JONES. Yes.

The CHAIRMAN. And if the amendment contains any matter which is not germane to that section the whole amendment must go out. This section 2 relates to the creation of the Federal Farm Board and nothing else.

Mr. JONES. But the point I make is that the other feature of the Aswell bill being in, it being complete up to that point, this follows the provisions that are already set out, and already inserted, and, therefore, it is in the same status as if it came at the end of the section named in the Aswell bill; and if it follows as the only place where it can be offered, it does not have to be germane as a whole to section 2, because there is a complete bill before it. When you come to the last paragraph of the bill an amendment is in order the effect of which is germane to any part of the bill going on before.

Mr. BURTNESS. Mr. Chairman, will the gentleman yield?

Mr. JONES. I will.

Mr. BURTNESS. Does the gentleman claim that this is offered as a new section when it is actually offered by way of amendment to section 2 which has just been read?

Mr. JONES. It is offered as any amendment may be offered at the end of the bill. The amendment of the gentleman from Louisiana [Mr. ASWELL] having been adopted by the committee, it is in order, it seems to me, to offer an amendment to immediately follow which is germane to the previous section as a whole.

Mr. DOWELL. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. DOWELL. The gentleman now is suggesting, or rather stating, that he desires to amend the Aswell bill. That is what he is trying to do. That is your amendment.

Mr. JONES. I can offer any amendment which logically follows the amendment, and this is as germane to the Aswell amendment as the Aswell amendment was to the other amendment.

Mr. DOWELL. It is not germane to this section.

Mr. JONES. It does not make any difference whether this stays in or goes out. Section 2 is standing there in a shape where it would not mean anything except in connection with other parts of the bill. This amendment that we are offering is in the same position as any amendment that might be offered at the end of the bill, and it being germane to the previous feature or section, we think it can be offered as a new section immediately following the previous section. It is always in order to offer a new section following the previous section, offering it as a new section.

It is true that the gentleman from Louisiana, by virtue of a preferential recognition, offered a motion, but a preferential motion has been offered which stands in the same status as a new section, following the amendment just adopted. A new section is offered immediately following. An amendment has been adopted. A new section is always germane if it is germane to what has gone on before, and it is offered as a new section, and if the new section is germane to the section which precedes it, it is in order.

This is the first chance I have had, the first opportunity, to offer it. The gentleman from Louisiana secured the floor, and that is the way his proposal was offered. I think it is on an entirely different status from what it would be if it were merely to strike out and insert. That is the plan that would have been followed if the bill had been considered in an orderly way.

The CHAIRMAN. The Chair is ready to rule.

Mr. CANNON. Just one word, Mr. Chairman.

The CHAIRMAN. The Chair will hear the gentleman from Missouri.

Mr. CANNON. Mr. Chairman, the pending motion is a motion to strike out the section.

Now, how was the gentleman able to secure recognition? By offering a preferential motion to amend. His amendment is to perfect the text proposed to be stricken out. Otherwise he could not have secured the floor. It follows then that his amendment must be germane to the pending section.

But the gentleman's entire argument has been devoted to proving that his amendment is germane to the bill as a whole. That is not sufficient. Under the rules the amendment must be germane not only to the bill but it must also be germane to the pending section.

That fact he has failed to establish for the simple reason that these numerous provisions which he has enumerated can have no possible relation to the section under consideration. The amendment is not germane to the section and is therefore not in order.

Mr. RAINEY. Mr. Chairman, may I be heard on the point of order?

The CHAIRMAN. The Chair will hear the gentleman from Illinois.

Mr. RAINEY. Mr. Chairman, there is nothing new in this question. It was passed on in the Sixty-eighth Congress, as I remember it, by the present Chairman. At the first session of the Sixty-eighth Congress this identical question came up, and I myself presented the question to this present Chairman. He will find the matter discussed and settled on May 24, 1924, on page 9444 of the CONGRESSIONAL RECORD of the Sixty-eighth Congress, first session. I prepared the very first debenture bill, and I sought to substitute it for the McNary-Haugen bill of that year. It was a complete plan. It was not different in the method by which it sought to apply relief.

This is what the Chairman said with reference to my effort to get that debenture plan substituted for the McNary-Haugen bill, when a point of order was made against it by the gentleman from Missouri [Mr. CANNON]. This is what the Chairman said:

> The CHAIRMAN. The Chair is ready to rule. The amendment offered by the gentleman from Illinois [Mr. RAINEY] as a substitute for the entire bill is more nearly germane than the former amendment, but the Chair is of opinion that it does not come within the rule of germaneness. The object sought, of course, is farm relief, but that does not necessarily make the bill germane. The method is so entirely different in the bill offered by the gentleman from Illinois from the method of the bill under consideration that it seems to the Chair that it is not germane. Both bills recognize that the question of price is determined somewhat upon the exportable surplus, but the bill which the Chair has rather hastily read, offered by the gentleman from Illinois by way of substitute, proposes to deal with this question of exportable surplus by giving a bounty to the exporter, evidently with the view that if the export brings a fair price, a fair price would result in the domestic market; but that is such a departure from the plan of the bill which creates a Government corporation, giving it power and authority to export, that it would not come within the rules of the House to hold it germane. The Chair therefore sustains the point of order.

The CHAIRMAN. The Chair is ready to rule. The gentleman from Illinois does the present occupant of the chair too much honor. The decision which he has just read is the decision of 1924 by Chairman Sanders, of Indiana, not the present occupant of the chair.

The Chair does not think that it is necessary to go into the question as to whether the present motion is a perfect or full substitute motion or not. It is made as an amendment to section 2.

The Chair thinks that the gentleman from Texas [Mr. JONES] was not quite accurate when he said this is the first opportunity he has had to offer this amendment. We have passed section 1, and section 2 has been read, and the gentleman from Louisiana [Mr. ASWELL] has made a motion to strike out section 2.

I think it is a well-settled rule that amendments must be germane to the subject under consideration and to the section under consideration; and the section which is under consideration at present is section 2, which relates to the creation of a Federal farm board.

Without going into the general question of germaneness, there certainly are items in the amendment offered by the gentleman from Michigan which are not germane to section 2 of the Haugen bill and, therefore, the Chair sustains the point of order.

Mr. JONES. Mr. Chairman, I offer another amendment. I move to strike out section 2 and to insert the bill which I send to the Clerk's desk, beginning with section 2, which, I will state, takes up the board feature of the Ketcham bill and follows it with the remaining part of the bill.

Mr. LAGUARDIA. Do you offer the whole bill?

Mr. JONES. And I give notice that if this is adopted I will move to strike out the remaining sections of the bill.

Mr. BURTNESS. Mr. Chairman, I desire to interpose the same point of order I made before, that this is not germane to section 2.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Amendment offered by Mr. JONES: Strike out all of section 2 and insert in lieu thereof H. R. 12893, beginning with section 2 on page 2, line 7.

Mr. DOWELL. Mr. Chairman, I make the same point of order, that it is not germane.

Mr. JONES. Mr. Chairman, I ask unanimous consent that my amendment may be considered read and printed in the RECORD as if read.

Mr. LAGUARDIA. Mr. Chairman, under the ruling just made by the Chair it is not in order.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that his amendment may be considered read. Is there objection?

Mr. CRAMTON. Mr. Chairman, reserving the right to object, that means printing again just what was printed a few minutes ago, with the exception of the first section of the bill; is not that correct?

Mr. JONES. Yes.

Mr. CRAMTON. I will not object, but I think it is a waste of good paper.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The amendment referred to is as follows:

FEDERAL FARM BOARD

SEC. 2. (a) A Federal farm board is hereby created which shall consist of the Secretary of Agriculture, who shall be a member ex officio, and four members, who shall be appointed by the President of the United States, by and with the advice and consent of the Senate.

(b) The terms of office of the appointed members of the board first taking office after the approval of this act shall expire, as designated by the President at the time of nomination, one at the end of the first year, one at the end of the second year, one at the end of the third year, and one at the end of the fourth year, after the date of the approval of this act. A successor to an appointed member of the board shall be appointed in the same manner as the original appointed members, and shall have a term of office expiring four years from the date of the expiration of the term for which his predecessor was appointed.

(c) Any person appointed to fill a vacancy in the board occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term.

(d) Any member of the board in office at the expiration of the term for which he was appointed may continue in office until his successor takes office.

(e) Vacancies in the board shall not impair the powers of the remaining members to execute the functions of the board, and a majority of the appointed members in office shall constitute a quorum for the transaction of the business of the board.

(f) Each of the appointed members of the board shall be a citizen of the United States, shall not actively engage in any other business, vocation, or employment than that of serving as a member of the board, and shall receive a salary of $10,000 a year, together with necessary traveling expenses and expenses incurred for subsistence or per diem allowance in lieu thereof, within the limitations prescribed by law, while away from the principal office of the board on business required by this act, or if assigned to any other office established by the board, then while away from such office on business required by this act.

GENERAL POWERS

SEC. 3. The board—

(a) Shall annually designate an appointed member to act as chairman of the board.

(b) Shall maintain its principal office in the District of Columbia, and such other offices in the United States as it deems necessary.

(c) Shall have an official seal which shall be judicially noticed.

(d) Shall make an annual report to Congress.

(e) May make such regulations as are necessary to execute the functions vested in it by this act.

(f) May (1) appoint and fix the salaries of a secretary and such experts, and, in accordance with the classification act of 1923 and subject to the provisions of the civil service laws, such other officers and employees, and (2) make such expenditures (including expenditures for rent and personal services at the seat of government and elsewhere, for law books, periodicals, and books of reference, and for printing and binding) as may be necessary for the execution of the functions vested in the board.

(g) Shall meet at the call of the chairman, or of the Secretary of Agriculture, or of a majority of its members.

(h) Shall keep advised, from any available sources, of crop prices, prospects, supply and demand, at home and abroad, with especial attention to the existence or the probability of the existence of a surplus of any agricultural commodity or any of its food products, and it may advise producers through their organizations or otherwise in matters connected with the adjustment of production, distribution, and marketing of any such commodity, in order that they may secure the maximum benefits under this act.

(i) Shall advise producers, through their organizations or otherwise, in the development of suitable programs of planting or breeding, so that burdensome crop surpluses may be avoided or minimized, in order that they may secure such benefits.

(j) May, upon request by any cooperative association handling the agricultural commodity or upon its own motion, investigate the conditions surrounding the marketing of any agricultural commodity produced in the United States and determine:

(1) Whether a surplus of such commodity exists or threatens to exist;

(2) Whether the existence or threatened existence of such surplus depresses or threatens to depress the price for such commodity below the average cost of the actual production of such commodity in the United States during the preceding five years; and

(3) Whether the conditions of durability, preparation, processing, preserving, and marketing of such commodity, or the products therefrom, are such that the commodity or products are adapted to storage and future disposal.

LOANS

SEC. 4. (a) The board is authorized to make loans, out of the revolving fund hereinafter created, to any cooperative association or corporation created and controlled by one or more cooperative associations, upon such terms and conditions as, in the judgment of the board, will afford adequate assurance of repayment and carry out the policy declared in section 1, and upon such other terms and conditions as the board deems necessary. Any such loan shall be for one of the following purposes:

(1) For the purpose of assisting the cooperative association or corporation created and controlled by one or more cooperative associations in controlling a seasonal or year's total surplus produced in the United States, and either local or national in extent, that is in excess of the requirements for the orderly marketing of any agricultural commodity or in excess of the domestic requirements for such commodity.

(2) For the purpose of developing continuity of cooperative services from the point of production to and including the point of terminal marketing services, if the proceeds of the loan are to be used either (A) for working capital for the cooperative association or corporation created and controlled by one or more cooperative associations, or (B) for assisting the cooperative association or corporation created and controlled by one or more cooperative associations in the acquisition, by purchase, construction, or otherwise, of facilities and equipment, including terminal marketing facilities and equipment, for the preparing, handling, storing, processing, or sale or other disposition of agricultural commodities, or (C) for furnishing funds to the cooperative association or corporation created and controlled by one or more cooperative asscIations for use as capital for any agricultural credit corporation eligible to receive discounts under section 202 of the Federal farm loan act, as amended, or (D) for furnishing funds to the cooperative association or corporation created and controlled by one or more cooperative associations for necessary expenditures in federating, consolidating, merging, or extending the membership of cooperative associations or corporations created and controlled by one or more cooperative associations.

(b) In case of a loan to a cooperative association under paragraph (2) of subdivision (a), the notes or other obligations representing the loan (1) may be secured by marketing contracts of members of the cooperative association, and be required to be repaid, together with interest thereon, within a period of 20 years, by means of a charge to be deducted from the proceeds of the sale or other disposition of each unit of the agricultural commodity delivered under the members' marketing contracts, or (2) may be secured in such other manner as the board deems adequate.

(c) Any corporation created and controlled by one or more cooperative associations shall be eligible to receive loans under this section if the corporation is organized under the laws of any State, has the minimum capital required by the laws of the State of its organization, and agrees with the board:

(1) To adopt by-laws satisfactory to the board in accordance with which any cooperative association handling the same commodity may become a stockholder in such corporation and putting such restrictions upon the alienation of stock in such corporation as will insure the retention both of such stock and of all beneficial interest therein by cooperative associations.

(2) To keep such accounts, records, and memoranda, and make such reports in respect of its transactions, business methods, and financial condition as the board may from time to time prescribe.

(3) To permit the board upon its own initiative or upon written request of any stockholder in the corporation to investigate its financial condition and business methods.

(4) To set aside a reasonable per cent of its profits each year for a reserve fund; which reserve fund may be transformed into fixed capital and certificates representing its ownership issued to the cooperative associations, stockholders in the corporation, with the assent of the board and under terms and conditions approved by the board.

(5) Distribute the balance among its cooperative association stockholders ratably, according to the amount of such commodity produced in the current year that has been marketed through such associations by the producers thereof.

(d) If the board finds that its advice as to a program of planting or breeding of any agricultural commodity, as provided in section 3 (i), has been substantially disregarded by the producers of the commodity, or that the planting or breeding of any agricultural commodity for any year is substantially greater than a normal increase, as determined by the board, over the average planting or breeding of such commodity

for the preceding five years, the board may refuse to make loans under paragraph (1) of subdivision (a).

(e) Any loan under this section shall bear interest at the rate of 4 per cent per annum. The aggregate amount of loans under this section outstanding and unpaid at any one time shall not exceed $150,000,000 but—

(1) The aggregate amount of loans for all purposes under paragraph (2) of subdivision (a), outstanding and unpaid at any one time, shall not exceed $25,000,000; and

(2) The aggregate amount of loans for the purpose of expenditures in federating, consolidating, merging, or extending the membership of cooperative associations or corporations created and controlled by one or more cooperative associations, outstanding and unpaid at any one time, shall not exceed $2,000,000.

EXPORT DEBENTURES

SEC. 5. (a) On and after the 1st day of July next following the approval of this act the Secretary of the Treasury, under regulations prescribed by the board, shall, subject to the limitations of this act, issue an export debenture to any farmer, cooperative association, and other person (including any export corporation organized by the board under section 9), in respect of any quantity of a debenturable agricultural commodity or of any quantity of any debenturable product of such commodity, that is exported from the United States to a foreign country by such farmer, cooperative association, or other person. The export debenture shall be in an amount computed at the debenture rate for such commodity or product, respectively, effective at the time of the exportation.

(b) In order to procure the issuance of an export debenture, such farmer, cooperative association, or other person shall, within a reasonable time prior to the exportation, to be prescribed under regulations of the board, make application for such debenture and submit proofs satisfactory to the board either (1) that the quantity of the debenturable agricultural commodity to be exported was produced in the United States and has not previously been exported therefrom, or (2) that the agricultural commodity used in making the quantity of the debenturable product to be exported was produced in the United States and the agricultural commodity and the debenturable product have not previously been exported therefrom.

(c) Any export debenture, when presented by the bearer thereof within one year from the date of issuance of the debenture, shall be receivable at its face value by any collector of customs, or deputy collector of customs, or other person authorized by law or by regulation of the Secretary of the Treasury to perform the duties of collector of customs, in payment of duties collectible against articles imported by such bearer.

(d) Title to any expert debenture shall be transferable by delivery.

DEBENTURABLE COMMODITIES AND PRODUCTS

SEC. 6. For the purposes of this act, wheat, corn, rice, swine, cattle, cotton, tobacco, and any other agricultural commodity which is designated by the board under section 7 (b), shall be known and are herein referred to as debenturable agricultural commodities. Any food product of wheat, corn, rice, swine, or cattle, or any manufactured product of cotton or tobacco, or of any other agricultural commodity designated by the board under section 7 (b), shall be known and is herein referred to as a debenturable product if a debenture rate is prescribed for such product either specifically in section 7 (a) or by the board under section 7 (c).

EXPORT DEBENTURE RATES

SEC. 7. (a) The following export debenture rates are hereby prescribed:

(1) Swine, one-quarter of 1 cent per pound; fresh pork, three-eighths of 1 cent per pound; bacon, hams, shoulders, and other pork, prepared or preserved, 1 cent per pound; lard, one-half of 1 cent per pound.

(2) Cattle weighing less than 1,050 pounds, three-fourths of 1 cent per pound; cattle weighing 1,050 pounds or more, 1 cent per pound; fresh beef and veal, 1½ cents per pound.

(3) Corn or maize, including cracked corn, 7½ cents per bushel of 56 pounds; corn grits, meal, and flour, and similar products, 15 cents per 100 pounds.

(4) Paddy or rough rice, one-half of 1 cent per pound; brown rice (hulls removed), five-eighths of 1 cent per pound; milled rice (bran removed), 1 cent per pound; broken rice, and rice meal, flour, polish, and bran, one-quarter of 1 cent per pound.

(5) Wheat, 21 cents per bushel of 60 pounds; wheat flour, semolina, crushed or cracked wheat, and similar wheat products not specially provided for, 52 cents per 100 pounds.

(6) Cotton, 2 cents per pound.

(7) Tobacco, 2 cents per pound.

(b) If the board finds (1) that the cost of producing in the United States any agricultural commodity (other than wheat, corn, rice, swine, cattle, cotton, and tobacco) of which a surplus above domestic requirements is produced in this country is greater than the cost of producing such commodity in competing foreign countries, and (2) that the domestic prices for such commodity are unduly depressed by world prices for such commodity—then the board, after publicly declaring its findings, may designate such commodity as a debenturable agricultural commodity and may prescribe such export debenture rate for the commodity as it finds sufficient to equalize the difference between the cost of producing such commodity in the United States and the cost of producing such commodity in competing foreign countries. Such export debenture rate shall not exceed any rate of tariff duty that may be in effect in respect of such commodity.

(c) In order to promote the effectiveness of export debentures in respect of any debenturable agricultural commodity, the board may prescribe an export debenture rate upon products of the commodity as follows:

(1) If the debenturable agricultural commodity is wheat, corn, rice, swine, or cattle, an export debenture rate may be prescribed for any food product made wholly or in part thereof.

(2) If the debenturable agricultural commodity is a commodity other than wheat, corn, rice, swine, or cattle, an export debenture rate may be prescribed for any manufactured product made wholly or in part thereof. Any export debenture rate under this subdivision shall be sufficient to produce an export debenture in an amount equal to the debenture that would be issuable upon exportation of the quantity of the debenturable commodity consumed in the manufacture of the unit of the product upon which the export debenture is issued.

FLEXIBLE RATE PROVISIONS

SEC. 8. (a) In order to prevent undue stimulation of the production of any debenturable agricultural commodity, whenever the board finds that the average annual production of any debenturable livestock commodity or the average annual acreage of any other debenturable agricultural commodity for the last two preceding years has exceeded the average annual production or acreage, respectively, of such commodity for the period from the seventh to the third preceding year, then the board, after publicly declaring its finding, shall prescribe that the export debenture rates for the commodity and the debenturable products thereof shall be reduced or that the issuance of debentures therefor shall be suspended, as hereinafter prescribed in subdivision (b) for the amount of increase in production or acreage which the board finds has occurred. Any such reduction or suspension shall become effective at the commencement of the next calendar year and shall continue throughout such calendar year. No such reduction or suspension shall be made unless notice thereof is published at least 30 days before the commencement of such calendar year. At the end of such calendar year the export debenture rates which were in effect immediately prior to the commencement thereof shall again become effective unless the board under the provisions of this act prescribes a change in such rates.

(b) Reductions of debenture rates or suspensions of the issuance of debentures, subdivision (a), shall be in accordance with the following limitations:

(1) For a computed increase in production or acreage of less than 5 per cent there shall be no reduction.

(2) For a computed increase in production or acreage of 5 per cent but less than 10 per cent there shall be a reduction of 25 per cent.

(3) For a computed increase in production or acreage of 10 per cent but less than 15 per cent there shall be a reduction of 50 per cent.

(4) For a computed increase in production or acreage of 15 per cent or more the issuance of debentures shall be suspended for a period of one year.

(c) In computing reductions in export debenture rates fractions of a cent less than one-eighth shall not be used.

(d) The power of the board under this section in respect of any agricultural commodity shall be exercised in such manner as will in its judgment carry out the policy declared in section 1.

INSURANCE

SEC. 10. (a) Upon request of any cooperative association or associations, the board is authorized to loan, from time to time out of the revolving fund, to such association or associations, funds requisite for subscription to and payment of the capital stock of a corporation to be organized under the laws of any State, for the purpose of entering into contracts of price insurance. If there is more than one such subscribing association, such loans shall be in such proportions as the associations may agree, or on failure of such agreement, then in such proportions as the board may determine. Such loans shall be made upon such terms and conditions as the board may prescribe, except that no such loan may be made unless the cooperative association or associations receiving the loan have entered into an agreement with the board that the corporation to be formed, will in its charter or by-laws, be subject to the following requirements:

(1) That the corporation will insure the price only of those agricultural commodities which, in the judgment of the board, are regularly traded in upon an exchange in sufficient volume to establish a recognized basic price for the market grades of such commodity, and then only when such exchange has accurate price records for the commodity covering a period of years of sufficient length, in the judgment of the board, to serve as a basis upon which to calculate the risks of the insurance.

(2) That subsequent to the organization of the corporation any cooperative association handling a commodity insured by the corporation may become a stockholder in such corporation upon such terms and conditions as the board may prescribe, and that all stock in the corporation will be subject to such restrictions upon its alienation as will insure the retention of both such stock and all beneficial interests therein by cooperative associations.

(3) That the corporation will insure any cooperative association, a stockholder in the corporation, for any 12 months' period commencing with the delivery season for the commodity, against loss to such association or its members due to decline in the average market price of the agricultural commodity handled by the association during the period of sales by the association, from the average market price for the commodity during the period of delivery to the association. The duration of such periods shall be specified in the policy of insurance. In computing such average market prices, the policy shall provide for the use of daily average cash prices paid for a basic grade of the commodity in an exchange designated in the policy.

(4) That the corporation will insure only so much of the commodity delivered to the association as is produced by the members of the association and as is reported by the association for coverage under the policy.

(5) That the corporation will issue policies of insurance only at rates of premium fixed by the corporation and approved by the board as being adequate to cover the risk assumed under the policies issued.

(6) That the corporation will keep such accounts, records, and memoranda, and make such reports in respect of its transactions, business methods, and financial condition, as the board may from time to time prescribe.

(7) That the corporation will permit the board, on its own initiative or upon written request of any cooperative association, a stockholder in the corporation, to investigate the financial condition and business methods of the corporation.

(8) That whenever the board finds that private insurance agencies are able to provide the insurance offered by the corporation upon terms which the board deems satisfactory, then the corporation will thereupon repay to the board the amount of all outstanding loans under this section and interest thereon.

(b) No more than one corporation shall be maintained at any one time under this section.

(c) The cooperative association or associations to which loans are made under this section shall pledge with the board their stock in the corporation as security for the loans. Loans under this section shall bear interest at the rate of 4 per cent per annum on the unpaid principal. Dividends upon the stock pledged with the board shall be applied, first, to interest due upon the loans, and then to the principal of the loans. No distribution shall be made by the corporation otherwise than by cash dividends upon its stock until such time as such loans and the interest thereon have been paid in full. No cooperative association or its members shall be liable for any such loans or interest thereon.

(d) Whenever under the terms and conditions of any loan under this section a default occurs in the repayment of the amount of the principal or interest thereof, the board, upon 10 days' notice to the corporation, shall be held to have title to the stock held by it as security for the loan. The board may sell or otherwise dispose of the stock to any cooperative association or may exercise all voting rights of such stock for the purpose of liquidating the affairs of the corporation. Upon any such sale or other disposition or upon any such liquidation the board shall, after deducting from the proceeds thereof the amount of principal and interest in default upon the loan secured by the stock, pay the remainder of such proceeds to the cooperative association from which the stock was acquired.

EXAMINATION OF BOOKS AND ACCOUNTS OF BOARD

SEC. 11. Expenditures by the board shall be allowed and paid upon the presentation of itemized vouchers therefor approved by the chairman of the board. Any action of the board in issuing export debentures and vouchers so made for expenditures from the revolving fund shall be final and conclusive upon all officers of the Government; except that all financial transactions of the board shall, subject to the above limitations, be examined by the General Accounting Office at such times and in such manner as the Comptroller General of the United States may by regulation prescribe. Such examination in respect of expenditures from the revolving fund shall be for the sole purpose of making a report to the Congress and to the board of action in violation of law, together with such recommendations as the Comptroller General deems advisable concerning the receipts, disbursements, and application of the funds administered by the board.

ADMINISTRATIVE AND PENALTY PROVISIONS

SEC. 12. (a) Regulations requiring that metal tags or other appropriate markings be placed on all bales of cotton produced in foreign countries and allowed transit through the United States for exportation, may be prescribed by the board. Every person who violates any such regulation of the board shall be liable to a civil penalty of $100 for each such offense. Such penalty may be recovered in a civil suit brought by the board in the name of the United States.

(b) The board shall prepare and issue, or cause to be prepared and issued, all export debentures, and shall prescribe the terms and conditions in respect of export debentures. The Secretary of the Treasury, upon request of the board, is authorized to have such debentures prepared at the Bureau of Engraving and Printing.

(c) Export debentures issued under authority of this act shall be obligations of the United States within the definition in section 147 of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909, as amended.

(d) Any person who shall make any false statement for the purpose of fraudulently procuring, or shall attempt in any manner fraudulently to procure, the issuance, or acceptance of any export debenture, whether for the benefit of such person or of any other person, shall be fined not more than $2,000 or imprisoned not more than one year, or both.

COOPERATION WITH EXECUTIVE DEPARTMENTS

SEC. 13. (a) It shall be the duty of any establishment in the executive branch of the Government, upon request by the board or upon Executive order, to cooperate with and render assistance to the board in carrying out any of the provisions of this act and the regulations of the board. The board shall, in cooperation with any such establishment, avail itself of the services and facilities of such establishment in order to avoid preventable expense or duplication of effort.

(b) Upon request by the board the President, by Executive order, (1) may transfer any officer or employee from any establishments in the executive branch of the Government, irrespective of his length of service in such establishment, to the service of the board, and (2) may direct any establishment in the executive branch of the Government to furnish the board with such information and data pertaining to the functions of the board as may be contained in the records of the establishment; except that the President shall not direct that the board be furnished with any information or data supplied by any person in confidence to such establishment, in pursuance of any provision of law or any agreement with such establishment.

DEFINITIONS

SEC. 14. As used in this act—

(a) The term "person" means individual, partnership, corporation, or association.

(b) The term "United States," when used in the geographical sense, means continental United States and the Territory of Hawaii.

(c) The term "fiscal year of the United States" means the 12-month period ending June 30.

(d) The term "tobacco" means leaf tobacco, stemmed or unstemmed.

(e) The term "cotton" means cotton of any tenderable grade under the United States cotton futures act.

(f) The term "wheat" means wheat not below grade number 3 as prescribed by the Secretary of Agriculture under the United States grain standards act.

SEPARABILITY

SEC. 15. If any provision of this act is declared unconstitutional or the applicability thereof to any person or circumstance is held invalid, the validity of the remainder of the act and the applicability thereof to other persons or circumstances shall not be affected thereby.

REVOLVING FUND

SEC. 16. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $200,000,000. Such sum shall be administered by the board and used as a revolving fund in accordance with the provisions of this act. The Secretary of the Treasury shall deposit in the revolving fund such portions of the amounts appropriated therefor as the board from time to time deems necessary.

ADMINISTRATIVE APPROPRIATION

SEC. 17. For expenses in the administration of the functions vested in the board by this act there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $200,000, to be available to the board for necessary expenses incurred prior to July 1, 1929.

Mr. LAGUARDIA. Mr. Chairman, I make the point of order that it is offering an entire bill, that it is in conflict with the ruling just made by the Chair, and is not germane.

Mr. BANKHEAD. Mr. Chairman, I would like to know just what was the point of order made by the gentleman from New York.

Mr. RAMSEYER. Mr. Chairman, I could not hear, and I do not think anybody else heard, what points of order were interposed. I would like to know what point of order has been interposed, if any.

Mr. BANKHEAD. We could not hear on this side and we would like to know.

Mr. DOWELL. Mr. Chairman, I will state my point of order. The point of order I make is that the amendment or substitute can not be offered at section 2 and that the amendment or substitute offered is not germane to section 2, nor to any part of the bill.

Mr. BANKHEAD. Mr. Chairman, I would like to be heard very briefly on that point of order.

Mr. CANNON. Mr. Chairman, we are not aware yet what has been offered. Nobody seems to know exactly what is before the committee or what sections of the Ketcham bill are included.

Mr. BANKHEAD. Mr. Chairman, as I understood the ruling of the Chair just now, or, rather, the effect of the ruling, regardless of the merits of the proposal now submitted, it was that, although the Aswell bill had been agreed to in the committee as a whole and stands now upon the RECORD as a legislative entity, that nevertheless under the precedents which the Chair cited it would be in order to continue to read the original Haugen bill for perfecting amendments. Assuming that conclusion is true, what is the parliamentary attitude of the motion just made by the gentleman from Texas? He is assuming, as I understand it, the identical attitude assumed by the gentleman from Louisiana when he offered his substitute to section 1 of the original bill.

The gentleman from Texas [Mr. JONES] offers to strike out section 2 of the McNary-Haugen bill and offers as an amendment to it or as a substitute for it section 2 of the Ketcham-Jones bill, and gives notice that if it is adopted then he will subsequently move to strike out the other sections of the pending McNary-Haugen bill.

If the Chair should decide that the substitute is germane—I am not going to argue the question of germaneness because it has already been submitted by the gentleman from Texas when he pointed out the identical structure of the two bills, when he pointed out that they were seeking to effectuate the same purpose by the same character of machinery, and that the only essential difference is the method of accomplishing this purpose, one by a fee and the other by the issuance of debentures. In my opinion it is germane as a substitute for the McNary-Haugen bill, but the parliamentary situation with which the Chair is now confronted, as I see it, is that having ruled that the McNary-Haugen bill is open to the committee for perfection or for amendment, if the reasoning of the Chair upon yesterday that the Aswell amendment is germane is correct, then by parity of reasoning I say, except on the question of germaneness which the Chair would have to decide, the motion made by the gentleman from Texas is germane regardless of the real merits of the proposition which I am not discussing. I have simply undertaken to submit the parliamentary phase of the question as it occurs to me.

Mr. ASWELL. Will the gentleman yield?

Mr. BANKHEAD. Certainly.

Mr. ASWELL. In view of the fact that the Aswell substitute has been adopted and I have already moved to strike out section 2, what would be the status if the Jones substitute was adopted? Where would the Aswell substitute be then?

Mr. BANKHEAD. I think if the Jones substitute were adopted that would eliminate the McNary-Haugen bill, and if the committee followed up the adoption of the Jones-Ketcham substitute when we went back into the House, the McNary-Haugen bill would be absolutely eliminated from the picture.

Mr. ASWELL. Where would the Aswell substitute be?

Mr. BANKHEAD. The Aswell substitute would be in the same attitude that the Chair has held it is in now. It is a perfected measure that will be reported to the House for the determination of that body.

Mr. ASWELL. Then there would be two substitutes.

Mr. BANKHEAD. No; I do not think so. I think the effect of the adoption of the Ketcham substitute would be absolutely to take the place of the McNary-Haugen bill, and then the issue would be between the Aswell substitute and the Jones-Ketcham proposition.

Mr. ASWELL. How could there be such an issue when mine is already adopted?

Mr. BANKHEAD. The Chair has already ruled upon that.

Mr. LAGUARDIA. It has not been adopted by the House.

Mr. BANKHEAD. No; it has not been adopted by the House; only in the committee.

Mr. CANNON. Mr. Chairman, the amendment is proposed just 24 hours too late. This motion might properly have been offered as a substitute for the Aswell bill when that proposition was offered yesterday and before its adoption by the Committee of the Whole. But it is now too late. They have sinned away their day of salvation.

We have presented here exactly the parliamentary proposition presented when the last amendment was offered and ruled out of order. This amendment, like that offered by the gentleman from Michigan, is out of order for the reason cited by the Chair in his opinion just rendered on the point of order against that amendment. The amendment is not germane to the subject under consideration.

The CHAIRMAN. The Chair is ready to rule.

It seems to the Chair that the gentleman from Alabama [Mr. BANKHEAD] overlooks in his argument the fact that there are two natural places for offering substitute bills; one is at the end of the reading of the first section, and the other is at the end of the reading of the bill.

The matter under consideration now is section 2 of the Haugen bill, and amendments of section 2 of the Haugen bill must be germane to that section. The Chair thinks there are a great many items, without reference to the question of its germaneness to the bill as a whole, in the Jones motion which are not germane to section 2 of the Haugen bill, and therefore sustains the point of order.

Mr. JONES. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JONES. If the measure is otherwise germane, would it be in order to offer it after we have finished reading the McNary-Haugen bill?

The CHAIRMAN. The Chair prefers to cross that bridge when he comes to it.

Mr. BURTNESS. Mr. Chairman——

Mr. CHINDBLOM. Mr. Chairman, a parliamentary inquiry. What is the question before the House?

The CHAIRMAN. The question before the committee is the motion of the gentleman from Louisiana [Mr. ASWELL] to strike out section 2 of the Haugen bill.

Mr. BURTNESS. And I rise in opposition to that motion.

Mr. CHINDBLOM. Let me ask one further question, if the gentleman will permit. There is nothing left of all the Ketcham motions?

The CHAIRMAN. There is nothing else pending.

Mr. BURTNESS. I oppose the amendment to strike out the section. Gentlemen, I feel we have come to a very important point in our considerations, and I hope you will bear with me for a few moments while I try to present the situation as I see it, in view of the adoption by the committee yesterday of the so-called Aswell substitute, and in view of the various motions that will be made to-day to strike out each and every section as they are read. I believe, if you will follow me, practically all of you will agree with my conclusion that the sections as they are read should not be stricken out, but should remain in the bill.

Mr. HASTINGS. And perfected.

Mr. BURTNESS. And, of course, as the gentleman from Oklahoma [Mr. HASTINGS] suggests, perfected in the discretion of the committee.

Now, I doubt whether the membership of the committee generally realized exactly the result of the action that was taken yesterday when the Aswell substitute was adopted, and at the same time the Fort amendment, which would have stricken out section 9, was rejected. I submit in all seriousness and frankness to you, gentlemen, and particularly to those of you who come from the cotton States, that the elimination of sections 10 and 11, without at the same time eliminating section 9, is unfair and is not consistent with any logic or reason whatever that can be presented to any body of men upon the questions that are before us.

I call to your attention the arguments made by the gentleman from New Jersey [Mr. FORT] in that respect when he moved to strike out section 9 in connection with sections 10 and 11. If the other sections are to go out, the arguments of the gentleman are unanswerable; but what is the situation? Let me ask the men who come from the grain States, the Corn Belt, the hog-producing section of the country, or from any other section which produces any agricultural product whatever, if they realize what the real situation is?

The marketing provisions of section 9 can in all probability not be used in the case of your products at all without the equalization fee, but that is not the case with cotton. You can not raise the price of wheat or hogs, for instance, above world prices without some loss on the surplus. The equalization fee was intended for that purpose. No one contemplated that Treasury funds would be used. With cotton the situation is different. The world has to have our cotton. With plenty of funds and with domestic control the world price can probably be raised. They can still use the marketing provisions of section 9, but you growers of corn or wheat or hogs with a relatively small export surplus, you can not take care of the loss on that product and make use of the marketing arrangements set up in that section and as included in the Aswell amendment. I wish you would turn to section 9 and see what

the gentleman from Louisiana did. Section 9 is the one which gives such tremendous powers to the board—it gives them power when they find certain facts to exist to arrange to market any particular commodity and make arrangements with cooperative associations and corporations that may be established therefor, pay losses, take care of expenses, make deals, and if there are no cooperatives to make arrangements for processing of various kinds with other agencies.

Now, in the McNary-Haugen bill as originally introduced there was set up a stabilization fund to take care of the expenses. Such stabilization fund was to be made up of the equalization fee by money contributed by the producers themselves. In the Aswell bill, substituted yesterday, there were changes in this section, but they were not called to the attention of the House and you can not find it in the RECORD; but in the Aswell substitute the words "stabilization fund" were stricken out and the words "revolving fund" were inserted in lieu thereof.

What does it mean? It means, of course, that the Members of the committee, by such action, if finally approved, make it possible to spend all of the $400,000,000 provided for in the revolving fund on one sole commodity or crop, the crop which can be practically used in connection with the marketing arrangements that are contemplated by section 9.

Let us correct this situation by voting down each amendment to strike out the remaining sections and then in the House vote to reject the Aswell substitute.

The CHAIRMAN. The time of the gentleman from North Dakota has expired.

Mr. BURTNESS. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. The gentleman from North Dakota asks unanimous consent to proceed for five minutes. Is there objection?

Mr. EDWARDS. I object.

Mr. RAMSEYER. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 32, line 15, strike out the words "any person" and insert in lieu thereof the words "all persons."

Mr. NEWTON. Mr. Chairman, I will reserve a point of order on that. We have not read section 2.

Mr. RAMSEYER. We have read section 2, and the motion is to amend section 2. Now I want a few minutes' time to get before the House the parliamentary situation. I would like the attention of the gentleman from Louisiana and those who oppose the Haugen bill.

Mr. ASWELL. I am in favor of the Haugen bill if the equalization fee is left out.

Mr. RAMSEYER. I want the attention of both those in favor of the Aswell bill and those who favor the Haugen bill with the equalization fee. The chairman ruled this morning in an able opinion just what the situation is. We have the Aswell bill here as an amendment to section 1. I think it behooves the friends of the Haugen bill, which, of course, differs from the Aswell plan in that it carries the equalization fee, to vote against every motion to strike out the remaining sections as they are reached for consideration. You are going to have an opportunity to perfect the sections, you are going to have an opportunity to vote on each one of them as perfected, and if you can hold your forces here and succeed in voting down the motions to strike out when the committee rises you will have an opportunity to vote once more on the Aswell proposition, and——

Mr. ASWELL. Mr. Chairman, I make the point of order that the gentleman has not permission to speak out of order. He is not discussing any amendment. He is giving a lecture to his side of the House. [Laughter.]

Mr. RAMSEYER. My amendment has to do with "all persons" and I am addressing myself to all persons interested in this legislation, and if all persons will heed what I say and vote accordingly when the bill gets before the House, the House will then have a chance to vote on the Aswell bill and on the Haugen bill as perfected.

Mr. BURTNESS. In other words, the gentleman is showing why the motion to strike out should not prevail.

Mr. RAMSEYER. Exactly.

Mr. ASWELL. Will the gentleman yield?

Mr. RAMSEYER. I will yield.

Mr. ASWELL. Does the gentleman feel so discouraged that he has to lecture his side of the House?

Mr. RAMSEYER. I want to be sure that they understand the situation. I feel that on yesterday the gentleman from Louisiana succeeded in confusing them, and I want to unconfuse them. [Laughter.]

Mr. ASWELL. I am sorry that the gentleman is so discouraged.

Mr. RAMSEYER. I am not discouraged; I never felt better or more hopeful in my life.

Mr. ASWELL. The gentleman looks all right, but he seems to have no heart in it.

Mr. RAMSEYER. I have put in as much heart as I have and if I have not as much heart as the gentleman from Louisiana it is not my fault.

Having gotten what I intended to say before the Committee of the Whole, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent to withdraw his amendment. Is there objection?

There was no objection.

The CHAIRMAN. The question is on the motion of the gentleman from Louisiana to strike out the section.

The question was taken.

Mr. ASWELL. Mr. Chairman, I demand tellers.

Tellers were ordered; and the Chair appointed Mr. ASWELL and Mr. HAUGEN to act as tellers.

The committee again divided; and the tellers reported—ayes 119, noes 159.

So the motion was rejected.

The Clerk read as follows:

GENERAL POWERS

SEC. 3. The board—

(a) Shall annually designate an appointed member to act as chairman of the board.

(b) Shall maintain its principal office in the District of Columbia, and such other offices in the United States as it deems necessary.

(c) Shall have an official seal which shall be judicially noticed.

(d) Shall make an annual report to Congress.

(e) May make such regulations as are necessary to execute the functions vested in it by this act.

(f) May (1) appoint and fix the salaries of a secretary and such experts, and, in accordance with the classification act of 1923 and subject to the provisions of the civil-service laws, such other officers and employees, and (2) make such expenditures (including expenditures for rent and personal services at the seat of government and elsewhere, for law books, periodicals, and books of reference, and for printing and binding) as may be necessary for the execution of the functions vested in the board.

(g) Shall meet at the call of the chairman, or of the Secretary of Agriculture, or of a majority of its members.

(h) Shall keep advised, from any available sources, of crop prices, prospects, supply, and demand, at home and abroad, with especial attention to the existence or the probability of the existence of a surplus of any agricultural commodity or any of its food products, and it may advise producers through their organizations or otherwise in matters connected with the adjustment of production, distribution, and marketing of any such commodity, in order that they may secure the maximum benefits under this act.

(i) Shall advise producers through their organizations or otherwise in the development of suitable programs of planting or breeding, so that burdensome crop surpluses may be avoided or minimized, in order that they may secure such benefits.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Louisiana.

The Clerk read as follows:

Amendment by Mr. ASWELL: Page 33, line 14, strike out all of section 3.

Mr. JONES. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Mr. JONES offers the following amendment: Page 34, line 25, after the word "benefits," insert a new subsection, to be known as subsection (k), as follows:

"The board shall have power to prohibit speculation and manipulation in respect to any agricultural commodity on what is commonly known as the cotton or grain exchanges and boards of trade, and forbid any person, corporation, or association of persons to sell any contract for future delivery of any cotton, grain, or other products within the United States which may enter into interstate commerce, unless such seller is actually the legitimate owner of the cotton, wheat, or other agricultural commodity so contracted for future delivery at the time such sale or contract is made; and upon the entering of such order by the board it shall be unlawful for any person, corporation, or association of persons to sell such commodity in violation of such order forbidding the same; and upon the issuance of such order it shall also be unlawful for any person to send or cause to be sent any message offering to make or enter into

a contract for the sale for future delivery of any such commodity in violation of the provisions of such order. Anyone violating the provisions of any such order or the regulation issued thereunder shall be punished as provided in subdivision (b) of section 20 of this act."

Mr. DOWELL. Mr. Chairman, I make the point of order that the amendment is not germane to the section and is not germane to the bill.

Mr. JONES. Mr. Chairman, I do not think that the gentleman will contend that it is not in order if he will read the declaration of policy as set out in section 1. In the declaration of policy one of the purposes of the act is to minimize speculation and waste. All of the witnesses, the proponents of the bill and the different ones who have advocated it, have said that one of the effects of the provisions of this bill would be to eliminate speculation and manipulation. This is to be a farm board. That farm board is given certain powers. The bill enumerates the number of different powers which the board is given. I simply give it additional powers which are named in the declaration of purposes of the main bill, and thinking that as this is to be a farm board and as one of the things that a great many people think is wrong about the present situation is the fact that there is undue speculation in farm commodities, especially on the exchanges, I thought the board might well be given the power, if there was undue speculation or manipulation, to forbid such speculation. You will find that there is no question but that it is within the main purposes of the bill. In the general enumeration of powers there are something like seven or eight different powers given to the board. These additional powers are no more different from the other provisions than they are different among themselves. These different powers are to be found in paragraphs (a), (b), (c), (d), (e), (f), (g), (h), and (i). Those separate powers being named, any other power that comes within the purview of the bill is also in order. There is no question that it comes within the purview of the bill. It is named in the declaration of policy, and it has been discussed by practically everyone who has spoken here at any length in behalf of the bill. It was mentioned by the witnesses who assisted in the preparation of certain provisions of the bill, and shining all the way through the bill the evident purpose to take charge of the machinery of distribution, and this is a part of the machinery of distribution of farm products—the exchanges. Every avenue of commerce in the country is affected by this bill. Representatives from different concerns came and said the bill would affect their businesses, some favorably, some unfavorably, but all agreed that every channel of commerce in the country is affected by this bill. That being true, and several different powers being enumerated, it certainly is in order to enumerate another power.

Mr. DICKINSON of Iowa. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. DICKINSON of Iowa. The gentleman ought to realize that because a statement of policy is made in one paragraph or in the preamble of the bill, he can not, therefore, bring in every remedy for every possible evil that may exist in the agricultural situation, and that is what the gentleman is trying to do.

Mr. JONES. Yes; but——

Mr. DOWELL. That is what the gentleman says.

Mr. JONES. This is named in the declaration of policy. All those who have argued for the bill have said that to be the effect. There is not any question, Mr. Chairman, but that every element of business machinery that is now being operated in commerce will be affected by the operation of this bill. For instance, the cotton and grain exchanges are operating on farm commodities, not only on general farm commodities but upon the surplus of those commodities; and that being true, it is directly involved in a measure that turns over to other organizations the privilege of handling the various commodities.

Mr. ADKINS. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. ADKINS. The gentleman from Texas is a member of the committee, is he not?

Mr. JONES. Yes.

Mr. ADKINS. No member of the committee ever thought of such a thing.

Mr. JONES. The gentleman is one who has argued all through the hearings before the committee that the immediate effect of the adoption of the McNary-Haugen bill would be to minimize and perhaps to eliminate speculation and waste.

Mr. ADKINS. Yes.

Mr. JONES. And the other day, on the floor of this House, the gentleman argued that the speculators and manipulators and those who are engaged in transactions on the exchanges were opposing the bill because it would have the effect of putting them out of business.

Mr. ADKINS. Nobody knows if it will stop them until it has been tested.

Mr. JONES. This bill gives the farm board the power, if it finds that it is necessary to exercise it. Why should anybody object to that? I do not put it into force. I simply give them the power to enforce it. I want to make it clear that this farm board is given the power to stop gambling and speculation in farm products. That is the purpose of my amendment.

I simply want to give the board the power, not necessarily to exercise the power. I can not see why this great farm board, which it is proposed shall be created, shall have power to abolish speculation, gambling, and manipulation when the board thinks it advisable. What right has any speculator to interfere with the orderly working out of the program of the farm board? What does the speculator contribute to farm prices anyway.

Mr. CANNON. Mr. Chairman, in the consideration of this point of order it is only necessary to call attention to the rule which provides that if any portion of an amendment is not in order, no part of it is in order.

There are many provisions in the proposed amendment which subject it to the point of order. Choosing, for example, at random one of the provisions obviously repugnant to the rule, there is a paragraph proposing to inflict a penalty involving both fines and imprisonment. Nobody would seriously contend that such a provision is germane to this section; and that portion being out of order, of course the entire amendment is out of order.

The CHAIRMAN. The Chair is ready to rule. The purpose of this particular section now under consideration is to define the general powers of the farm board and to provide for its organization. It seems to the Chair that this amendment introduces an entirely new subject into the section, and therefore the Chair sustains the point of order.

Mr. JONES. Mr. Chairman, is it ruled out on the ground suggested by the gentleman from Missouri [Mr. CANNON] or on the general ground that it is not germane? If it is on the general purpose, I can modify my amendment.

Mr. CANNON. That is one of the reasons.

The CHAIRMAN. The Chair thinks it is not germane to the section.

Mr. JACOBSTEIN. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JACOBSTEIN: Page 34, line 25, after the word "benefits," insert a new paragraph as follows: "The term 'agricultural commodity' used in this and all other sections of this act shall mean an agricultural commodity which is not a fruit or vegetable."

Mr. RAMSEYER. Mr. Chairman, I make a point of order that it is not germane to this section. Definitions of terms have a later place in the bill.

Mr. JACOBSTEIN. Mr. Chairman, I would like to be heard on that.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. JACOBSTEIN. Mr. Chairman, I believe my amendment is strictly in order at this point, because it is a limitation on the general power of the Federal Farm Board provided for in this section. This section sets forth the organization as well as the specific powers of the board. In paragraph (h) of this section the board has power to deal with the "surplus of any agricultural commodity." I am seeking to limit the power of the board by stating that its powers shall be confined to an agricultural commodity which is not a fruit or vegetable. It is strictly and clearly a limitation on the power of the board. If declared out of order, I serve notice that I shall introduce the amendment at another place in the bill. Fruits and vegetables should be excluded from the operation of this act. Perishable farm products can not be cared for or benefit by the operation of this farm bill. I hope the House will agree to my amendment or other similar amendment when it is in order.

The CHAIRMAN. It seems to the Chair that the argument of the gentleman from New York is quite ingenious, but his amendment goes to one of the vital sections of the bill. In the judgment of the Chair it is not germane to this section of the bill. The Chair, therefore, sustains the point of order.

The question is on the motion of the gentleman from Louisiana [Mr. ASWELL] to strike out the section.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. ASWELL. A division, Mr. Chairman.

The CHAIRMAN. The gentleman from Louisiana calls for a division.

The committee divided; and there were—ayes 47, noes 108.

So the amendment was rejected.

The CHAIRMAN. The Clerk will read the next section.

The Clerk read as follows:

COMMODITY ADVISORY COUNCILS

SEC. 4. (a) For each agricultural commodity, which the board from time to time determines may thereafter require stabilization by the board through marketing agreements authorized by this act, the board is hereby authorized and directed to create an advisory council of seven members fairly representative of the producers of such commodity. Members of each commodity advisory council shall be selected annually by the board from lists submitted by cooperative associations or other organizations representative of the producers of the commodity. Members of each commodity advisory council shall serve without salary but may be paid by the board a per diem compensation not exceeding $20 for attending meetings of the council and for time devoted to other business of the council and authorized by the board. Each council member shall be paid by the board his necessary traveling expenses to and from meetings of the council and his expenses incurred for subsistence, or per diem allowance in lieu thereof, within the limitations prescribed by law, while engaged upon the business of the council. Each commodity advisory council shall be designated by the name of the commodity it represents, as, for example, "The cotton advisory council."

(b) Each commodity advisory council shall meet as soon as practicable after its selection at a time and place designated by the board and select a chairman. The board may designate a secretary of the council, subject to the approval of the council.

(c) Each commodity advisory council shall meet thereafter at least twice in each year at a time and place designated by the board, or upon call of a majority of its members at a time and place designated in the call, notice of such call being sent by registered mail at least 10 days before the date of the meeting.

(d) Each commodity advisory council shall have power, by itself or through its officers, (1) to confer directly with the board, to call for information from it, or to make oral or written representations to it, concerning matters within the jurisdiction of the board and relating to the agricultural commodity, including the amount and method of collection of the equalization fee, and (2) to cooperate with the board in advising the producers through their organizations or otherwise in the development of suitable programs of planting or breeding so that burdensome crop surpluses may be avoided or minimized, in order to secure the maximum benefits under this act.

Mr. ASWELL rose.

The CHAIRMAN. The gentleman from Louisiana is recognized.

Mr. ASWELL. Mr. Chairman, I move to strike out section 4.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: On page 35, beginning in line 1, strike out all of section 4.

Mr. KINCHELOE. Mr. Chairman, I offer a perfecting amendment.

The CHAIRMAN. The gentleman from Kentucky offers a perfecting amendment, which the Clerk will report.

Mr. KINCHELOE. Mr. Chairman, there are two amendments to the same section, and for the information of the committee I ask unanimous consent that the Clerk may be permitted to read both amendments.

The CHAIRMAN. Without objection, the Clerk will report both amendments.

There was no objection.

The Clerk read as follows:

Amendment offered by Mr. KINCHELOE: Page 35, line 2, after "(a)," strike out down through "create," in line 6, and insert in lieu thereof the following:

"Prior to the commencement of a marketing period in respect of any agricultural commodity the board is directed to create for such commodity."

And on page 36, after line 21, insert the following:

"(e) Prior to the commencement or termination of a marketing period with respect to any agricultural commodity and prior to the publication of the amount of any equalization fee with respect to any agricultural commodity, the board shall submit to the advisory council for the commodity a statement of the respective findings or estimate which the board is required to make and of the evidence and facts considered by the board in making such findings or estimate. Within 15 days after receiving such statement the advisory council shall consider such findings or estimate and shall notify the board of its determination with respect thereto. No marketing period with respect to any agricultural commodity shall be commenced or terminated and no equalization fee with respect to the commodity shall be collected unless the advisory council for such commodity has determined (1) that the findings or estimate which the board is required to make are supported by the evidence and facts considered by the board and (2) that the board has considered substantially all the material facts and evidence available for making the findings or estimate."

Mr. BANKHEAD. Mr. Chairman, I have an amendment to the amendment, which I would like to have read and considered as pending.

The CHAIRMAN. Will the gentleman from Kentucky yield?

Mr. KINCHELOE. If it is not taken out of my time I will yield.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to have read a proposed amendment for information. Is there objection?

There was no objection.

The Clerk read as follows:

Proposed amendment offered by Mr. BANKHEAD: At the end of the Kincheloe amendment strike out the period, insert a comma, and add the following: "(3) That in the opinion of the council the operating period in such commodity shall commence."

Mr. KINCHELOE. Mr. Chairman and gentlemen, as we all know, in the bill that passed both the House and the Senate last year there was a provision which forbade and prohibited the farm board from declaring an operating period and levying an equalization fee on any commodity without the consent of the advisory commodity council. In the Haugen bill as reported from the Committee on Agriculture of the House, and which we are now considering section by section, there is not a line which prevents the board from declaring an operating period on any commodity, notwithstanding the fact that every grower of that commodity and the advisory council for that commodity may protest, and under the present Haugen bill this board has the power to levy an equalization fee and declare an operating period whether they want it or not.

Now, the purpose in offering the first amendment to section 4 is because of the fact that there was some question as to whether this board did not levy the equalization fee before it created the advisory council, and in order to obviate that I have offered the first amendment. Under the terms of that amendment they must have a commodity council before they declare an operating period at all.

The second amendment, if it is adopted, provides in substance that they can not declare an operating period on any commodity without first procuring the consent of the advisory council for the particular commodity.

Mr. NEWTON. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. NEWTON. Does the gentleman provide for the initiation, in the first instance, by the council and for the ending of the period by the council?

Mr. KINCHELOE. No; it is simply a veto power. Under my amendment, if it is adopted, the board can not declare an operating period without the consent of the commodity advisory council, and it can not terminate one without its consent. The board itself determines whether in its judgment, setting out certain facts, an operating period shall be declared and an equalization fee levied, but before they can carry them into execution they have got to have the consent of this commodity advisory council.

Mr. NEWTON. That is equally true of the termination of the control?

Mr. KINCHELOE. Yes; this advisory council is appointed by the board, under the Haugen bill, upon the recommendation of cooperative associations and other organizations interested in the particular commodity. The members of this advisory council are appointed on the recommendations made by these organizations to the board. I can not see why anybody should object to this amendment, and I am glad that the chairman yesterday agreed to the amendment.

I do not believe that any friend of the farmer—and I am speaking as a friend of this bill—would be in favor of creating a board here in Washington and giving it plenary power to declare an operating period and to levy an equalization fee on a commodity when every grower of that commodity and the members of the advisory council who are the intermediaries between the farmers and the board would object to it. If this should happen there would absolutely be a revolution in this country and you would have more bootlegging in order to get rid of the equalization fee than anything that ever happened in the world and therefore I want to see these two amendments adopted so that the farmer can have his say and can be heard

by this board through the commodity council which he has recommended and which has been appointed by the board.

When this is done I think the bill will be a workable one.

I have not anything to say against the amendment proposed by the gentleman from Alabama [Mr. BANKHEAD] except this. The legislative drafting service is composed of as efficient men as there are in the world in their line, and they have been kind enough to help me, and this is the third draft of this amendment, because when the President vetoed the bill before, through the advice of his Attorney General, he held that the provision as it was then drawn was unconstitutional. I am told by the drafting service that this board could not declare an operating period unless the advisory council agrees to it. They inform me that that is exactly the import of this amendment and they also inform me that in their opinion it is constitutional, and as I have stated, the chairman of the committee has agreed to it.

I want to also say right here that as we proceed to-day under the ruling of the Chair this morning, it seems to me every man who wants farm legislation passed, whether he is for the McNary-Haugen bill or for the Aswell bill, the only sensible parliamentary thing to do is to keep in all the sections of the McNary-Haugen bill. We are now reading the bill, and if the various sections of the bill can be perfected or made better by amendment, then that is all right and we should agree to such amendments. This is the reason I want to amend the bill at this point, because at last, when the committee rises and we go into the House, then the Aswell bill will be voted on; and if it is defeated, I would think everybody, even those who are for the Aswell substitute, would want the Haugen bill in as good shape and as perfect as the committee can make it. So why should you murder this bill by striking out any of its sections? If in the judgment of the committee any amendments are necessary, let us then amend the bill. The gentleman from South Carolina [Mr. FULMER], for instance, has an amendment which he will offer which is one that I think ought to be adopted.

Mr. HAUGEN. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. HAUGEN. I understand the gentleman has offered the amendment which he suggested yesterday.

Mr. KINCHELOE. The same one; yes.

Mr. HAUGEN. The amendment has been drafted with great care.

Mr. KINCHELOE. Yes.

Mr. HAUGEN. My understanding is that the amendment would be held constitutional, and I understand the amendment offered by the gentleman gives the board the veto power which was believed to be unconstitutional in respect of the last bill.

Mr. BANKHEAD. Oh, no.

Mr. HAUGEN. As I stated yesterday, I have no objection to the amendment offered by the gentleman from Kentucky, but I trust the other amendment will not be agreed to.

The CHAIRMAN. The time of the gentleman from Kentucky has expired.

Mr. KINCHELOE. Mr. Chairman, I ask unanimous consent to proceed for two additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

Mr. KINCHELOE. As I have said, we ought to keep this bill intact so we go into the House with the Aswell substitute intact and with the McNary-Haugen bill amended and perfected as best it can be in the judgment of a majority of the committee. Then you have a straight vote on the two propositions.

As to the amendment offered by the gentleman from Alabama [Mr. BANKHEAD] I am not saying anything about it because it is the gentleman's amendment, but I do say and repeat that in the judgment of the drafting service, after making three drafts of this proposition, these amendments are constitutional and will prevent this board from declaring an operating period or levying an equalization fee upon any commodity without the consent of the producers.

Mr. BRAND of Georgia. And it meets with their approval?

Mr. KINCHELOE. The legislative drafting service does not express any opinion as to the merit of proposed legislation.

Mr. WRIGHT. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. WRIGHT. Under the provisions of the gentleman's amendment, could the board levy an equalization fee unless the advisory council consented?

Mr. KINCHELOE. No. That is what I am trying to get at exactly.

Mr. BANKHEAD. If that is the effect of the gentleman's amendment and that is constitutional, how would it be unconstitutional to assert it in affirmative terms?

Mr. KINCHELOE. The drafting service has used phrases to evade, in their judgment, the unconstitutional feature of it and for that reason I am for the amendment.

Mr. FORT. Mr. Chairman and gentlemen of the committee, we are now reading the bill for the perfecting of its clauses. In my view this is truly a perfecting amendment in that it finally and completely perfects the unconstitutionality of the whole measure.

With this section inserted in the bill there can be no shadow of doubt in the mind of anyone who has examined the law in regard to the delegation of legislative powers but that the bill is completely and absolutely unconstitutional either with or without the amendment of the gentleman from Alabama [Mr. BANKHEAD].

The opinion of the Attorney General attached to the veto message of the President in the last session of Congress specifically rested one of his reasons for holding the bill unconstitutional upon the ground that it constituted an illegal delegation of legislative power to the board. And it recites the further fact that a delegation of power to the board could not support a further delegation to a mere debating society, unofficial in its nature, such as the advisory council.

I call to the attention of the House that the advisory council created under the act is not even composed of officers of the Government of the United States. They are a nonofficial body, and by this amendment it is proposed to leave to them the review and determination as to whether the officers of the Government of the United States have acted correctly.

If we could not leave all this to the board, we certainly can not go an additional step and leave to an unofficial group the veto power over a group of officials sworn under the law to perform their functions.

Mr. KINCHELOE. Will the gentleman yield?

Mr. FORT. I will.

Mr. KINCHELOE. If perchance my amendment was constitutional, does not the gentleman think the effect would be to give the commodity council a veto on the board's declaring an equalization fee?

Mr. FORT. Yes, if constitutional; but I want to point out another thing. Is not it a legislative absurdity for the Congress of the United States to create a great board of 12 members drawing $10,000 a year, and then say that all of their important actions are subject to review by a group of seven men not officers of the United States—it is a perfectly absurd legislative proposal in this case, and I renew the statement I made that it would not be proposed in this part of the legislation by anyone who wanted to see the bill become operative as to any commodity produced in his district.

Mr. BRAND of Georgia. Will the gentleman yield?

Mr. FORT. Yes.

Mr. BRAND of Georgia. Will the gentleman point out in the amendment the language which he claims gives the council the veto power?

Mr. FORT (reading):

No marketing period with respect to any agricultural commodity shall be commenced or terminated—

By the way, the termination is fixed in the bill in another section and depends immediately on the decision of the board that it is no longer necessary or advisable—

and no equalization fee with respect to the commodity shall be collected unless the advisory council for such commodity has determined (1) that the findings or estimate which the board is required to make are supported by the evidence and facts considered by the board.

In other words, that the board is actually right in the facts considered.

(2) That the board has considered substantially all the material facts and evidence available for making the findings or estimates.

The CHAIRMAN. The time of the gentleman from New Jersey has expired.

Mr. BRAND of Georgia. Mr. Chairman——

The CHAIRMAN. Is the gentleman in favor of the amendment?

Mr. BRAND of Georgia. I am. I say, Mr. Chairman, that the gentleman from New Jersey, though one of the ablest logicians in this Congress, is putting the wrong construction on this amendment. There is no veto power in it. It is more or less a milk and cider proposition and not at all satisfactory to me, but it is not unconstitutional. I want to read the amendment without interruption.

I want all to understand what it is, because it does not take a lawyer to construe correctly its language:

No marketing period with respect to any agricultural commodity shall be commenced or terminated, and no equalization fee with respect to the commodity shall be collected unless the advisory council has de-

termined (1) that the findings or estimates which the board is required to make are supported by the evidence and facts considered by the board, and (2) that the board has considered substantially all the material facts and evidence available for making the findings or estimates.

It does not say that the advisory council has to concur in this. It does not give the advisory council any power to veto it. It is just a friendly act upon the part of the board and without any mandatory authority. The board, under this amendment, simply confers with the advisory council by submitting to the latter the two propositions set forth in the amendment, and reserves to itself the power to act as it chooses. That is all there is in the amendment. If the question at issue in an action at law was presented to any judge of any court in this Union having jurisdiction as to the validity of the amendment he would not even give a hearing upon the question of its constitutionality. He would not issue a rule nisi upon the petition calling upon the defendant to show cause whether it is constitutional or not. There is not enough on its face, there is not sufficient power conferred by the board upon the advisory council to make a legal issue out of it. The gentleman from New Jersey [Mr. FORT] knows more about this bill than I do, but I think I know as much about the construction of this language as the gentleman does. You Members who are in favor of this bill and who expect us over here in the minority to help you pass the bill, ought to be in favor of this amendment. It does not hurt your constituents, and therefore I think, in all good conscience and equity, you should support the amendment, so that our people, the cotton growers, may stand on an equal footing with your corn and wheat growers.

Mr. GARBER. Mr. Chairman, will the gentleman yield?

Mr. BRAND of Georgia. Yes.

Mr. GARBER. I am in sympathy with the position of the gentleman, but is the gentleman sure that the amendment does not in effect cause the exercise of a power that is only permissible for the board to act upon?

Mr. BRAND of Georgia. I honestly do not. It simply submits this question to the advisory council and asks them if they think they, the board, have arrived at a proper conclusion.

Mr. GARBER. The law looks through the words to the substance, and it will look through this subterfuge to the effect and the substance. I only ask for information. The gentleman has carefully considered the language?

Mr. BRAND of Georgia. I have been considering it for three or four days.

Mr. GARBER. I am willing to defer to the gentleman's judgment.

Mr. BRAND of Georgia. That is very kind. There is no power conferred by the board upon this advisory council requiring them to concur in whatever action the board may finally take. It certainly gives the advisory council no authority to veto what the board does.

Mr. RAMSEYER. Mr. Chairman, this is the third time that a bill bearing the name "McNary-Haugen" has been before this House, and each time I have been called upon to answer some of the constitutional objections urged against the bill. Each time the constitutional objections were presented in minority reports and on the floor of this House in debate. One of the principal objections heretofore stressed against the bill was that the equalization fee is a tax and as a tax was unconstitutional. This objection has been so completely answered that the more thoughtful opponents of the bill no longer seriously press it.

The McNary-Haugen bill passed both Houses of Congress during the second session of the last Congress and was vetoed by the President on February 25, 1927. Accompanying the veto message of the President was the opinion of the Attorney General setting forth his constitutional objections to that bill as submitted to the President. The Attorney General in a carefully considered opinion urged as one of his objections—

that Congress delegates its constitutional power of legislation to private cooperative associations and corporations, and individuals acting collectively, and a board created by the statute.

In a speech before this body on December 7 last, reviewing the Attorney General's opinion, I said on this point:

This objection against the constitutionality of the McNary-Haugen bill as it was framed in the Senate and passed by the House without amendment during the closing days of the last Congress presents, in my opinion, the most dangerous issue that has been raised against the constitutionality of the bill in the form it was submitted to the President. * * * In drafting a new bill due weight and careful consideration should be given to this constitutional objection of the Attorney General.

For discussion of what is and what is not a delegation of legislative power, I cite you to two leading cases, to wit: Field *v.* Clark (143 U. S. 649, at 693, 694), and J. W. Hampton, jr., & Co. *v.* U. S., decided by the Supreme Court on April 9, 1928. This case is available in pamphlet form. For the guidance of Members of this House, I insert in the RECORD here quotations from older decisions cited in the two cases to which I just referred:

The true distinction is between the delegation of power to make the law, which necessarily involves a discretion as to what it shall be, and conferring authority or discretion as to its execution, to be exercised under and in pursuance of the law. The first can not be done; to the latter no valid objection can be made. (Cincinnati, Wilmington, etc., Railroad *v.* Commissioners, 1 Ohio St. 88.)

Half of the statutes on our books are in the alternative, depending on the discretion of some person or persons to whom is confided the duty to determine whether the proper occasion exists for executing them. But it can not be said that the exercise of such discretion is the making of the law. (Moers *v.* City of Reading, 21 Penn. St. 188, 202.)

The legislature can not delegate its power to make a law, but it can make a law to delegate a power to determine some fact or state of things upon which the law makes, or intends to make, its own action depend. To deny this would be to stop the wheels of government. There are many things upon which wise and useful legislation must depend which can not be known to the law-making power and must, therefore, be a subject of inquiry and determination outside of the halls of legislation. (Locke's appeal, 72 Penn. St. 491, 498.)

The Congress may not delegate its purely legislative power to a commission, but, having laid down the general rules of action under which a commission shall proceed, it may require of that commission the application of such rules to particular situations and the investigation of facts, with a view to making orders in a particular matter within the rules laid down by the Congress. (Interstate Commerce Commission *v.* Goodrich Transit Co., 224 U. S. 194, 214.)

The bill before us is a Senate bill. The House Committee on Agriculture took this Senate bill, struck out everything after the enacting clause, and substituted its own bill. The House committee in drafting its bill addressed itself seriously and intelligently to the task of making this bill free from the Attorney General's objection against delegating legislative power. There is nothing more clearly established in constitutional law than that Congress can not delegate its power to legislate. But Congress, having laid down the general rules of action under which an official board shall proceed, it may require of such official board the application of such rules to particular situations and the investigation of facts, with a view to making orders in a particular matter within the rules laid down by Congress. That is exactly what the House Committee on Agriculture undertook to do in the bill before us. That is what Congress did in the flexible provision of the tariff act, which the Supreme Court recently held constitutional. In the latter act the power to determine the facts and to make the order was delegated to the President.

Now, we have before us the amendment of the gentleman from Kentucky [Mr. KINCHELOE] and also the amendment of the gentleman from Alabama [Mr. BANKHEAD]. The Kincheloe amendment undertakes to make the commencement or termination of a marketing period and the collection of the equalization fee contingent upon the advisory council for such commodity determining—

(1) That the findings or estimate which the board is required to make are supported by the evidence and facts considered by the board; and (2) that the board has considered substantially all the material facts and evidence available for making the findings or estimate.

The proponent of this amendment frankly states that the purpose of the amendment is to require the consent of the advisory council for the commencement and termination of a marketing period and the levying of the equalization fee, or, in other words, as he puts it, "it is simply a veto power." The Bankhead amendment in substance provides that no action of the board shall be taken in this respect unless "in the opinion of the council the operating period in such commodities shall commence."

We have here two bodies recognized in this bill—the farm board, appointed by the President with the consent of the Senate, and removable by the President; and advisory councils, with the appointment and removal of whose members the President has nothing to do. The rules laid down to determine the action of the farm board are analogous to the rules laid down in the flexible-tariff provision for the guidance of the President and the rules laid down in the interstate commerce laws for the guidance of the Interstate Commerce Commission. The rules laid down for the guidance of the farm board, an official body, follow the precedents in a number of acts of Congress heretofore held constitutional.

The duty imposed upon the farm board under specific rules laid down in the House bill to determine particular situations and the investigation of facts, the Kincheloe amendment seeks

to impose a like duty upon the advisory council. In other words, the amendment seeks to make the operation of the law depend upon two bodies concurring in the findings of particular situations and state of facts. Of course, if you can create two bodies to find the same situations and facts, and to require the two bodies to concur in their findings thereon, you can create three or four or even five such bodies, and make the operation of the law contingent upon all such bodies concurring in the same findings and conclusions.

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield?

Mr. RAMSEYER. My time is about gone. The council here is an unofficial body. The second provision of the Kincheloe amendment is that there shall be no marketing period, and so forth, unless the advisory council finds that the board has considered substantially all of the facts, and so forth. The advisory council can find that under the facts considered by the board an operating period should be declared, and then they can, for reason or no reason, find that the board has not considered all the facts, and thereby veto any action by the board.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. RAMSEYER. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. RAMSEYER. Heretofore, when this Congress has passed a law, the going into effect of which was dependent upon the findings of facts or of particular situations, the duty to make such findings was delegated to some official, the President, a Cabinet officer, or some official board or commission, the Interstate Commerce Commission, for example. Officers who were appointed by the President with the consent of the Senate, under the Myers case, are removable by the President. You remember the Myers case where the court held unconstitutional a law requiring the consent of the Senate before the President could remove a postmaster. The Supreme Court held that law unconstitutional for the reason that it interfered with the President's duty to see that the laws are faithfully executed. He had to appoint the postmasters with the consent of the Senate, but he had the power to remove without the consent of the Senate.

Officers upon whom the laws heretofore enacted delegated a power to determine some facts or state of things upon which the law intends to make its own action depend were officers appointed by the President, with the consent of the Senate, and under the holding in the Myers case are removable by the President. That is, the President can remove them if he thinks they are not giving him proper assistance in executing and administering the laws.

Now, here you have in this bill the farm board, an official body the members of which are appointed by the President, with the consent of the Senate, and are removable by the President. In this bill you provide for advisory councils, unofficial bodies, the members of which are not appointed by the President and not removable by him. Article II, section 3, of the Constitution provides:

He—

The President—

shall take care that the laws be faithfully executed.

The amendment before us, in determining the commencement and termination of marketing periods and the imposition of the equalization fee, undertakes to give the advisory council at least coordinate powers with the board. The question arises, can you delegate this power to an unofficial body with the appointment and removal of whose members the President has absolutely nothing to say? Would not the Attorney General find that to clothe an unofficial body with such powers as the amendment contemplates would interfere with that provision of the Constitution making it the duty of the President to see that the laws are faithfully executed?

Mr. JOHNSON of Texas. Mr. Chairman, will the gentleman yield there?

Mr. RAMSEYER. Yes; I yield first to the gentleman from Texas. He has been on his feet, I notice, for some time waiting an opportunity to ask a question.

Mr. JOHNSON of Texas. I was wondering whether in the case of an office created by Congress it would be considered technically an official office.

Mr. RAMSEYER. No. The term "officer of the United States" has a very definite meaning in law. The courts have held that unless a person in the service of the Government holds his place by virtue of an appointment by the President, or one of the courts of justice, or heads of departments authorized to make such an appointment, he is not, strictly speaking, an officer of the United States. The Constitution provides that superior officers shall be appointed by the President with the consent of the Senate.

Mr. JOHNSON of Texas. But Congress could eliminate that necessity or that difficulty by having the officers appointed by the President.

Mr. RAMSEYER. If members of the advisory council were appointed by the President with the consent of the Senate that would constitute them officers of the United States and such council would become an official body.

Mr. KINCHELOE. Mr. Chairman, will the gentleman yield?

Mr. RAMSEYER. Yes.

Mr. KINCHELOE. I understand the gentleman voted in favor of the Haugen bill with an equalization fee in it.

Mr. RAMSEYER. Certainly I did.

Mr. KINCHELOE. The gentleman says the Attorney General will jump at that. But the gentleman from Iowa voted for the bill containing the equalization fee, which the Attorney General has stated is unconstitutional.

Mr. RAMSEYER. No. The Attorney General said that the bill in the shape it was in was unconstitutional. But the bill reported by the House committee is in an entirely different shape from that submitted to the President and vetoed by him.

Mr. KINCHELOE. So is this amendment.

Mr. RAMSEYER. If the gentleman's amendment is to confer upon the advisory council a veto power, as he has stated, then I fear it will inject into this bill the weakness that was found by the Attorney General in the bill submitted to the President last February. The gentleman from New Jersey [Mr. FORT] stated that the Kincheloe amendment, which he considers unconstitutional, would invalidate the entire bill. I do not agree with him on that point. I think the marketing agreement and equalization fee provisions which the Kincheloe amendment will affect and taint with unconstitutionality are clearly separable from the rest of the bill. If those provisions should be found unconstitutional by the Supreme Court the rest of the bill will stand with all its machinery intact, without the marketing agreements and the equalization fee. I am against the Kincheloe amendment, because I have grave doubts as to its constitutionality. If I thought that this amendment, if adopted, were not separable from the rest of the bill, I would not hesitate to vote against the entire bill. I hope that gentlemen will not vote to put this amendment in here, which will accomplish nothing except to make a veto of the entire bill more probable. The amendment offered by the gentleman from Alabama [Mr. BANKHEAD] I think is clearly unconstitutional. If you send this bill to the President as the House committee reported it out, free from the Kincheloe and Bankhead amendments, and the bill is referred to the Attorney General for his opinion as to its constitutionality, he will have confronting him quite a different situation from what he had last February. I urge that both amendments be voted down.

Mr. BANKHEAD. Mr. Chairman, I offer an amendment to the amendment.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent that debate on this section and all amendments thereto close in 15 minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that all debate on the section and all amendments thereto close in 15 minutes. Is there objection?

Mr. KINCHELOE. I have two amendments here. Would I be entitled to recognition again? Am I precluded from speaking on the second amendment?

Mr. HAUGEN. Mr. Chairman, I modify my request and make it 20 minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that all debate on the section and amendments thereto be closed in 20 minutes. Is there objection?

There was no objection.

Mr. BANKHEAD. Mr. Chairman, I formally offer the amendment, which was read.

The CHAIRMAN. The gentleman from Alabama offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. BANKHEAD to the amendment offered by Mr. KINCHELOE: At the end of the Kincheloe amendment strike out the period, insert a colon and the following: "3. That in the opinion of the council the operative period in such commodity shall commence."

Mr. BANKHEAD. Mr. Chairman and gentlemen of the committee, I am not offering this amendment in any obstructive or critical way at all. I voted for the McNary-Haugen bill in the last session of Congress, but I voted for it only after the bill as presented to the House gave to the commodity producers a reasonable opportunity to determine whether they thought an equalization fee should be applied to their commodity. The bill

presented by the committee leaves that question entirely to the Federal board without any restriction. I understand that on account of the objections on the part of a number of Members this compromise proposition contained in the amendment of the gentleman from Kentucky [Mr. KINCHELOE] has been proposed and accepted by the chairman of the committee in effect.

Now, what is the purpose of the Kincheloe amendment? What is the heart of it? If it means anything, gentlemen, it means that before an equalization fee shall be applied by the Federal board, the producers, through the advisory council, shall have the opportunity to say whether or not in their opinion it should be applied.

Mr. GARBER. Mr. Chairman, will the gentleman read it?

Mr. BANKHEAD. Yes; I will read it. The Kincheloe amendment says:

No classification fee with respect to a commodity shall be collected unless the advisory council for such commodity has determined that the findings or estimate which it is required to make are supported by the evidence and facts considered by the board, and that the board has considered substantially all the material facts and evidence.

Now, if the purpose and real intent and meaning of the Kincheloe amendment are to give the advisory council and the producers, through the advisory council, a voice in this matter, why should it not be affirmatively expressed in this amendment? I am not going into the constitutionality of this question, but if the Kincheloe amendment proposes anything, as its author says, it means that the advisory council shall have the veto power over the decision of the farm board.

If that is what it means, then my amendment simply further proposes that in addition to the finding of facts, as represented to the board, no fee shall be applied unless the advisory council, representing the cotton, wheat, and corn growers, shall render an opinion that an operating period in that commodity shall apply. That is all there is in this amendment. I do not know whether you want to adopt it or not, but if you are going to do what the Kincheloe amendment in spirit and in purpose, if not in essence, means to do, then it seems to me that in all fairness you ought to make it speak what you mean it should speak.

Mr. WILLIAM E. HULL. Will the gentleman yield?

Mr. BANKHEAD. Yes.

Mr. WILLIAM E. HULL. If the gentleman's amendment be adopted, would it not take all of the power away from the board?

Mr. BANKHEAD. I do not think so. My whole argument is predicated upon the fact that if this means anything it gives the advisory council some power and some power to do what? It gives the advisory council the power to veto the declaration of an operating period unless they recommend that an operating period be declared.

Mr. WILLIAM E. HULL. In other words, if your amendment carries, nobody has got to go into this unless they want to?

Mr. BANKHEAD. Oh, no.

Mr. WILLIAM E. HULL. I can not see it any other way.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. BANKHEAD. Yes.

Mr. COOPER of Wisconsin. Is it not a misnomer to call a body having a veto power an advisory body?

Mr. BANKHEAD. Well, I do not know as to that; it may be.

Mr. COOPER of Wisconsin. It strikes me that way, because you can not give a body much greater power than the veto power. It seems to me a misnomer to call this an advisory body.

Mr. BANKHEAD. What is the purpose of this amendment which I understand the Agricultural Committee has agreed to? What is the purpose of it? Now, gentlemen, answer that question yourselves. If the purpose is to give them power then what objection can there be in saying what the power is on the face of the bill? I have no pride of opinion at all in this proposition, but it seems to me that if you are going to say what you mean you ought to say it in the language as expressed in my amendment.

Mr. ADKINS. Mr. Chairman and gentlemen of the committee, the gentleman from Kentucky had this proposition before the committee and discussed it at great length. The reason the committee did not adopt the amendment was the fact of the constitutional objection, and with me, and I think with the majority of the committee, it was left to be presented to the House, with the understanding that if the drafting service could work this out so it would meet the constitutional objection of the Attorney General we would give it consideration.

Now, lawyers are going to disagree on these things. I think the gentleman from Kentucky has very earnestly tried to avoid the constitutional objection and is giving this advisory council all the powers that could be given it under the Constitution. I think our drafting service is about as good an authority on constitutional law as any of you lawyers, and that is not saying anything disrespectful about you either. I am well satisfied that through Mr. KINCHELOE—and he is somewhat of a lawyer himself—and the drafting service they have worked out the proposition and given this advisory council as much power as can be given under the Constitution.

I think it would be unfortunate to adopt the amendment offered by the gentleman from Alabama [Mr. BANKHEAD], because I am satisfied, with all the discussions we have had by the legal lights on our committee, that that would make it absolutely unconstitutional.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. ADKINS. Yes.

Mr. DICKINSON of Iowa. This is the outgrowth of a principle which was started several years ago, wherein we created advisory councils for commodity organizations in the cooperative marketing bill. As I understand it, this has the approval of the drafting service, and with their approval it has been presented by the gentleman from Kentucky.

Mr. BANKHEAD. Will the gentleman yield?

Mr. DICKINSON of Iowa. I yield.

Mr. BANKHEAD. What does the gentleman understand to be the real essence of the Kincheloe amendment?

Mr. DICKINSON of Iowa. That the friends and representatives of the farmers have a right to pass upon the facts as presented to the board.

Mr. ADKINS. We are not pretending to do something that the Constitution does not allow us to do.

Mr. DICKINSON of Iowa. I hope the gentleman from Alabama will withdraw his amendment.

Mr. ADKINS. All of those matters have been thoroughly discussed, and we were all in sympathy with Mr. KINCHELOE's idea; but we did not want to go out with something that would be considered unconstitutional. We have a hard hurdle to get over in connection with the equalization fee, and I think the majority of this committee worked earnestly and hard to avoid all of the President's constitutional objections. I think the Kincheloe amendment goes as far as it is possible to go under the Constitution and have the bill stand. I hope the Bankhead amendment will be defeated and that the Kincheloe amendment will be adopted.

Mr. FULMER, Mr. KINCHELOE, and Mr. LOZIER rose.

Mr. FULMER. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The Chair thinks the pending amendments ought to first be disposed of.

Mr. KINCHELOE. Then, Mr. Chairman, I ask recognition.

The CHAIRMAN. The Chair recognizes the gentleman from Kentucky [Mr. KINCHELOE].

Mr. KINCHELOE. Mr. Chairman and gentlemen, I am only going to detain the committee a moment. I simply want to refer to the inconsistency of the position of the gentleman from Iowa [Mr. RAMSEYER]. The gentleman says he is against this amendment because he thinks it is unconstitutional. The drafting service and myself, as well as a few other lawyers around here, differ from the gentleman.

The gentleman wants the amendment defeated because he thinks it is not constitutional, and yet the President vetoed the last bill because his Attorney General said that the equalization fee is unconstitutional, although the gentleman from Iowa is going to vote for the Haugen bill and wants an equalization fee provision in the bill.

Mr. RAMSEYER. Will the gentleman yield?

Mr. KINCHELOE. Just for a question.

Mr. RAMSEYER. I think I am reasonably familiar with the Attorney General's opinion. I have reviewed it several times. The Attorney General gives his reasons why the bill is unconstitutional and does not state among his reasons that it is because of the equalization fee but because of the equilization-fee machinery.

Mr. KINCHELOE. Everybody knows that that is one of the reasons the President of the United States vetoed the bill, and the Attorney General said so.

Mr. RAMSEYER. Everybody does not know what the gentleman has just stated.

Mr. KINCHELOE. Let us see just what this amendment is. It is a limitation. You now have a limitation on this board under this very provision because this board can not appoint the members of this advisory council unless it appoints men who have been previously recommended by farm organizations and other organizations interested in the growing of that particular commodity. This limitation is upon them now. The gentleman from Iowa is for that provision. You can delegate the power of the board to farm organizations and limit the

right of the board to appoint these men, except from names submitted by these farm cooperatives and other organizations, and we say in one breath that the Congress has the power to create this board and has the power to fix its limitations, and we do fix them, and yet in accordance with the statement of the gentleman from Iowa, it can not go one step further and put a limitation on one of the powers of the board. That is all this amendment does.

You will find every enemy of agriculture on the floor of this House voting like the gentleman from Iowa against this amendment. Why? Because it is perfecting this bill, and this amendment, if it is adopted, will get more votes for the bill with the equalization fee in it than any other amendment, which is what you want so much.

If this amendment is defeated, you have a bill here; and under the terms of the bill the farmers of this Nation have not even the right of petition to this board or the right to say to them not to levy an equalization fee, because they do not think it is necessary. They have not the right to say to this board, "Our advisory council, which we recommended and you appointed, does not think this is necessary." The board can do it anyhow.

I am talking as a friend of this bill, and I am appealing to every friend of the bill to adopt this amendment which means so much in the final result on the passage of the bill.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. COOPER of Wisconsin. Does the gentleman's amendment confer the power of veto?

Mr. KINCHELOE. It is a limitation. The effect of this amendment, I am frank to say to the gentleman, is that this board will not have the power to levy an equalization fee unless the advisory council agrees with the facts and findings, and that is what I want.

Mr. LOZIER. Will the gentleman yield?

Mr. KINCHELOE. Yes.

Mr. LOZIER. Is it not true that, if this amendment is adopted and if it should be declared unconstitutional, that would leave in full force and effect the other sections of the bill?

Mr. KINCHELOE. Yes; just the same.

Mr. LOZIER. They are separable provisions, and the court might declare this amendment unconstitutional and yet sustain the other provisions.

Mr. KINCHELOE. Certainly; which is the same point that the gentleman from Iowa made with respect to the equalization-fee provision. There is a section in this bill which provides that if any section of the bill is declared unconstitutional it shall not impair the force and effect of the other provisions of the bill; and I appeal to every Member here who is truly in favor of the bill and who is sympathetic toward its purpose to vote this amendment in the bill. [Applause.]

The CHAIRMAN. The Chair would like to ask the gentleman from Kentucky whether the gentleman wants his two amendments voted on as one amendment or voted upon separately, and if voted upon separately, which amendment does the gentleman desire to be voted upon first?

Mr. KINCHELOE. I have no particular preference about it, but I shall ask unanimous consent that the two amendments may be voted upon as one amendment.

Mr. RAMSEYER. Mr. Chairman, I object.

Mr. BANKHEAD. I offered an amendment not to both of the gentleman's amendments, but only to one of them.

Mr. KINCHELOE. I will not prefer the request, Mr. Chairman.

The CHAIRMAN. The Clerk will report the first amendment offered by the gentleman from Kentucky [Mr. KINCHELOE].

The first amendment offered by the gentleman from Kentucky [Mr. KINCHELOE] was again reported.

The amendment was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Alabama [Mr. BANKHEAD].

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question is on the second amendment offered by the gentleman from Kentucky [Mr. KINCHELOE].

The question was taken, and the amendment was agreed to.

Mr. FULMER. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from South Carolina.

The Clerk read as follows:

On page 35, line 8, strike out through the period in line 11 and insert in lieu thereof the following:

"Members of each commodity advisory council shall be selected annually by the board only from a list submitted by the cooperative associations and other organizations representative of the producers of the commodity in question and by the governors and the heads of the agricultural departments of the several States where the commodity is produced."

Mr. FULMER. Mr. Chairman and gentlemen of the committee, the amendment that we adopted a minute ago is a very important amendment and one we agreed upon that would give some check on the board by the advisory council. I want to call the attention of my friends on this side of the aisle representing the cotton farmers that under my amendment the producers or other organizations of producers not in the cooperative association, governors, and the heads of the agricultural departments representing a commodity, district, or section will be able to say, along with the cooperatives, who will be appointed an advisory council. The cooperative associations will have full power to cooperate with these in submitting a list to the board from which to make their selection of the advisory council.

Under the present bill the cooperative associations of South Carolina, Texas, and other States represent from 3 to 5 per cent of the producers and will have full power to nominate out of the 3 per cent men of their type, representing their own ideas, to pass on this question in the action of the board in going in or out of an operating period. Under my amendment we will have a further check on the board. Instead of appointing the men out of the 3 or 5 per cent, the other 95 per cent will have some say so as to the selection of the advisory council through their governors and agricultural departments.

I want to say to my friends on this side that this amendment has been accepted by friends of the bill on the other side, and there is nothing in the amendment that can interfere with the working of the bill. It simply puts in the governors and heads of these institutions who represent the class of people that would not be represented under the cooperative associations. I hope the amendment will pass, because of the reasons I stated the other day. The amendment of the gentleman from Kentucky [Mr. KINCHELOE] has given us some protection, but without this amendment I will have to vote against the equalization fee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina.

The question was taken; and on a division (demanded by Mr. WILLIAMS) there were 106 ayes and 32 noes.

So the amendment of Mr. FULMER was agreed to.

The CHAIRMAN. The question is on the motion of the gentleman from Louisiana to strike out section 4.

The question was taken, and the motion was lost.

The Clerk proceeded with the reading of the bill, as follows:

LOANS

SEC. 5. (a) The board is authorized to make loans, out of the revolving fund hereinafter created, to any cooperative association or corporation created and controlled by one or more cooperative associations, upon such terms and conditions as, in the judgment of the board, will afford adequate assurance of repayment and carry out the policy declared in section 1, and upon such other terms and conditions as the board deems necessary. Such loans shall be for one of the following purposes:

(1) For the purpose of assisting the cooperative association or corporation created and controlled by one or more cooperative associations in controlling a seasonal or year's total surplus, produced in the United States and either local or national in extent, that is in excess of the requirements for the orderly marketing of any agricultural commodity or in excess of the domestic requirements for such commodity.

(2) For the purpose of developing continuity of cooperative services from the point of production to and including the point of terminal marketing services, if the proceeds of the loan are to be used either (A) for working capital for the cooperative association or corporation created and controlled by one or more cooperative associations, or (B) for assisting the cooperative association or corporation created and controlled by one or more cooperative associations in the acquisition, by purchase, construction, or otherwise, of facilities and equipment, including terminal marketing facilities and equipment, for the preparing, handling, storing, processing, or sale or other disposition of agricultural commodities, or (C) for furnishing funds to the cooperative association or corporation created and controlled by one or more cooperative associations for use as capital for any agricultural credit corporation eligible to receive discounts under section 202 of the Federal farm loan act, as amended, or (D) for furnishing funds to the cooperative association or corporation created and controlled by one or more cooperative associations for necessary expenditures in federating, consolidating, merging, or extending the membership of cooperative associations or corporations created and controlled by one or more cooperative associations.

(b) In case of a loan to a cooperative association under paragraph (2) of subdivision (a), the notes or other obligations representing the loan (1) may be secured by marketing contracts of mem-

bers of the cooperative association, and be required to be repaid, together with interest thereon, within a period of 20 years, by means of a charge to be deducted from the proceeds of the sale or other disposition of each unit of the agricultural commodity delivered under the members' marketing contracts, or (2) may be secured in such other manner as the board deems adequate.

(c) Any corporation created and controlled by one or more cooperative associations shall be eligible to receive loans under this section if the corporation is organized under the laws of any State, has the minimum capital required by the laws of the State of its organization, and agrees with the board:

(1) To adopt by-laws satisfactory to the board in accordance with which any cooperative association handling the same commodity may become a stockholder in such corporation and putting such restrictions upon the alienation of stock in such corporation as will insure the retention both of such stock and of all beneficial interest therein by cooperative associations.

(2) To keep such accounts, records, and memoranda, and make such reports in respect of its transactions, business methods, and financial condition as the board may from time to time prescribe.

(3) To permit the board upon its own initiative or upon written request of any stockholder in the corporation to investigate its financial condition and business methods.

(4) To set aside a reasonable per cent of its profits each year for a reserve fund; which reserve fund may be transformed into fixed capital and certificates representing its ownership issued to the cooperative associations, stockholders in the corporation, with the assent of the board and under terms and conditions approved by the board.

(5) To distribute the balance among its cooperative association stockholders ratably, according to the amount of such commodity produced in the current year that has been marketed through such associations by the producers thereof.

(d) Any loan under this section shall bear interest at the rate of 4 per cent per annum. The aggregate amount of loans under this section, outstanding and unpaid at any one time, shall not exceed $400,000,000, but—

(1) The aggregate amount of loans for all purposes under paragraph (2) of subdivision (a), outstanding and unpaid at any one time, shall not exceed $25,000,000; and

(2) The aggregate amount of loans for the purpose of expenditures in federating, consolidating, merging, or extending the membership of cooperative associations or corporations created and controlled by one or more cooperative associations, outstanding and unpaid at any one time, shall not exceed $2,000,000.

Mr. ASWELL. I move to strike out section 5.

The CHAIRMAN. The gentleman from Louisiana moves to strike out the section.

The question was taken, and the motion was lost.

Mr. KINCHELOE. Mr. Chairman, I move to strike out the last word. I want to ask the chairman of the Agricultural Committee in view of the fact that some gentlemen want to go to a funeral and others to the primaries, what is the reason we can not finish this bill to-night?

Mr. HAUGEN. I am doing the best I can to do that very thing.

Mr. KINCHELOE. Then the gentleman intends to go ahead and finish it?

Mr. HAUGEN. Yes.

Mr. KINCHELOE. Mr. Chairman, I withdraw the pro forma amendment.

Mr. BRAND of Georgia. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. BRAND of Georgia: Page 37, line 1, after the word "associations" insert "or corporations created by the law of any State, members thereof to be composed of bona fide farmers who are not members of any cooperative association or any corporation created by a cooperative association, provided such corporations created by the laws of the State are given no more or other authority than the cooperative associations possess."

Mr. LAGUARDIA. Mr. Chairman, I reserve the point of order.

Mr. HAUGEN. Mr. Chairman, I reserve the point of order.

Mr. BRAND of Georgia. Mr. Chairman, on account of the confusion in the Chamber at the time the amendment was read, I will reread it, with your permission. The amendment is to that part of the bill which provides for cooperative associations creating corporations to be controlled by them. I add to it this [reading]:

or corporations created by the laws of any State, members thereof to be composed of bona fide farmers who are not members of any cooperative association or any corporation created by a cooperative association, provided such corporations created by the laws of the State are given no more or other authority than the cooperative associations possess.

In Georgia, for instance, and it is true of almost every cotton-growing State, we have not 30 farmers out of a thousand who belong to a cooperative association. Nine hundred and seventy farmers out of a thousand will not get the benefits of this bill in so far as the loan privileges are concerned unless you adopt an amendment like this or something similar to it, so that they can, under the laws of Georgia, form a corporation and become eligible to receive the full benefits of this bill. I provide that the State, the general assembly, or the superior courts shall give these corporations the same but no more authority or power than is possessed by the corporations created by the cooperative associations. I put them on the same level. It will bring into close touch with members of the present cooperative association 970 out of every thousand farmers in the State of Georgia who are not members of the cooperative association. Under the bill these cooperative associations and the corporations created and controlled by the cooperative associations are the only ones, so far as borrowing money by farmers is concerned, who are taken care of. All I ask of you is to let our farmers who are not members of cooperative associations or any corporation created by them cooperate and participate with them in working out this legislation, so that all could get the benefit of the provision of the bill in a corporation of their own.

Mr. DICKINSON of Iowa. Does the gentleman not think, if the benefits of this law are what we think they will be, that his farmers would organize under cooperative organizations?

Mr. BRAND of Georgia. I answer the gentleman frankly by saying that the nonmembers will never join the cooperative association in Georgia, unless they can see some favorable and definite results and actual benefits coming to them from the operation of this bill, if it becomes a law.

Mr DICKINSON of Iowa. They would have the experience of other organizations to guide them, and, if it was necessary for them to organize a cooperative association, it would be easy for them to organize one of their own, if they did not want to join the one that now exists.

Mr. BRAND of Georgia. All I want done is to give them an opportunity to form one of their own.

Mr. WHITTINGTON. The gentleman does not ask for the formation of a cooperative association.

Mr. BRAND of Georgia. No; I want a corporation or association of farmers who are not members of the cooperative association, and who will not become members, but who are willing to organize in one of their own.

Mr. WHITTINGTON. The gentleman asks for the formation of corporations that would have to pay taxes.

Mr. BRAND of Georgia. No; I do not. I ask for an organization of farmers not members of cooperative associations, but independent of them, who may form an organization of their own, and who will become eligible to receive the benefits of this bill. So far as loans and marketing agreements are concerned, you are legislating for about 3 or 4 per cent of the farmers of Georgia, and 4 or 5 per cent of the farmers in South Carolina, North Carolina, Alabama, and Tennessee. The great body of farmers who till the soil, composed of 90 per cent or 95 per cent of the people of my State and other States, as to borrowing money and selling their cotton to the cooperative association, are excluded from the operation of this bill. They are denied all these privileges. They are outcasts, so far as this legislation is concerned. How would such an amendment as I propose hurt the cooperative associations? How would it hurt the corporations created by the cooperative association to let us form corporations of members who do not belong to it? I do not want to deprive the members of the cooperative association of any of their rights. I do not care to do or say anything to prevent them from successful operation. The object of my amendment is to give the same privileges and rights to those farmers of Georgia and other States who refuse to become members of the cooperative association, so that all farmers may get the full benefits which those of us who favor this legislation hope and believe will result in the enactment of this bill, and I think it is wholly inexcusable and indefensible on the part of any Republican or Democrat to vote to deprive them of such benefit.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. LAGUARDIA. Mr. Chairman, I withdraw the point of order.

Mr. HAUGEN. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. BRAND of Georgia) there were—ayes 22, noes 72.

So the amendment was rejected.

Mr. NEWTON. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. NEWTON: Page 37, beginning in line 20, strike out all of subdivision (b) ending in line 2 on page 38.

Mr. NEWTON. Mr. Chairman, this is one of the loan provisions in section 5 whereby the board is authorized to loan out of the revolving fund for certain purposes. Among those purposes set forth in paragraph (2) of the section is subdivision (B). This provision authorizes the board to make loans for the acquiring, by purchase or otherwise, terminal marketing facilities. It ought not to be in this bill unless it is safeguarded so as not to be used to put over the financing of the Grain Marketing Corporation of Chicago or anything like it.

When the 1927 Haugen bill was under consideration I called the attention of the House in Committee of the Whole to a similar provision. It was not in the House bill. It had originated over in the Senate. At that time I said:

Mr. Chairman, the amendment I have offered strikes out a provision that has never been considered in a committee of the House or in the Senate. Some two or three years ago there was formed an organization of a so-called grain marketing company in Chicago that took over the elevators and other facilities of Armour Grain Co., J. Rosenbaum & Co., and Rosenbaum Bros.

Some of the facilities were out of date, poorly located, and nonfireproof in construction. The total elevator capacity was upward of 20,000,000 bushels. The literature gotten out by this grain-marketing company described the property as being worth at a fair appraisal $17,000,000. One of the properties was sold to Armour years ago at a knockdown price of $325,000. My understanding is that this particular property was valued in this appraisal at between one and one-half and two million dollars. Just how far the other units were overvalued I do not know.

I do know that they did not make a success in their efforts to induce the farmers of the country to subscribe to the stock of this company. After one year of operation the properties went back to those who were trying to unload them. The then head of this Grain Marketing Corporation is still its president. He has been active at the other end of the Capitol in endeavoring to get this provision into the bill, and the only conclusion is that this fund of $25,000,000 will be put at the disposal of this organization for the purpose of acquiring this property at an excessive price. I would like to know why the Committee on Agriculture of the House is supporting a provision of that kind.

It will be found in the debates on February 17, 1927.

The plan of financing that concern was so bad that the blue-sky commissions of at least two, and possibly three, States refused to permit the Grain Marketing Corporation to sell its stock within the jurisdiction of their respective commissions. And yet those people who were instrumental in forming that corporation were instrumental in trying to sell this stock to the unsuspecting public, including the farmers, and were the foremost in promoting the passage of this measure through the Senate one year ago.

Now, anybody who knows anything about the Armour and Rosenbaum properties knows that they were put into the Grain Marketing Corporation at figures far beyond what they were worth. However, with this provision in the bill they could go before the board and get Government money to finance them. I want to renew the protest I made a year ago against the inclusion of a provision of this kind. [Applause.]

Mr. Chairman, my time is up. I do not want to ask for additional time. Under leave to extend, I want to make these further observations on the loan features. The unwise extension of credit can not help the farmer. That was one of the causes of the inflation and deflation in farm values.

Section 5 of the bill provides that the board may make loans to cooperative associations (or corporations organized or controlled by them) for the following purposes:

First. To assist cooperatives in marketing operations to control seasonal, yearly, national, or local surpluses of any farm commodity.

Second. To provide working capital for cooperatives.

Third. To provide funds for the purchase, construction, or otherwise of facilities and equipment for marketing operations.

Fourth. To furnish cooperatives with funds for use as capital for agricultural-credit corporations.

Fifth. To provide funds for the promotion, merger, or consolidation of cooperative associations.

These loan provisions go far beyond those incorporated in the so-called Jardine plan in 1926, which was in the Fess bill. It provided for loans for the purposes specified under "First" above. To appreciate the effect of these additional provisions it is necessary to briefly outline the legal status of cooperatives and their members.

All but two States now have laws authorizing the organization of cooperative marketing associations and fixing the relationship and responsibilities of the association and its members. In approximately 35 States these laws authorize the cooperatives to own and hold stock in corporations created for the purpose of carrying out their general objects. The association may be either a stock association or a nonstock association. By far the large majority including some of the largest are nonstock membership organizations. The capital stock of such as are stock organizations is in most cases nominal in amount. With two or three exceptions, notably in my own State of Minnesota and in Illinois, the members are not liable for the debts or obligations of the association except to the extent of the membership fees or stock subscriptions contributed by them.

The board may make loans to cooperatives for any or all of the purposes above specified. It will thus be obvious that the board may provide credit for cooperatives covering not only 100 per cent of the value of the commodities handled by them, but also working capital for the payment of services, rents, warehousing, and other expenses, and for the purchase of facilities, without security and without contribution or liability on the part of the membership or management of the cooperative except to the extent of the membership fees or nominal capital. Thus the Government might furnish all of the capital for the marketing operations, facilities, and promotional work of a cooperative association, the members participating in the profits of the operations but not contributing except nominally to the capital or participating in the losses which would fall upon the Government. In addition, the Government can and will be asked to supply to a cooperative capital fund for the organization of an agricultural credit corporation to be managed and directed without participation or control by the Government, which would use this capital as the basis of loans discountable with intermediate credit banks. Here again neither the management nor the stockholders of the credit corporation would furnish directly any capital or assume any responsibility for losses incurred.

It is obvious to anyone having to do with credits that responsibility for risk of loss is an inseparable corollary to the opportunity of making profits in every sound business or economic enterprise. The lack of financial responsibility for the funds used in any business on the part of the stockholders and management is an incentive to speculation, mismanagement and even of fraud.

It may be urged that the board will not make such loans without adequate assurance of repayment, but it is apparent that all of the loans contemplated, with the exception of those under paragraph 1, are of a character which no sound banking or business institution would make, and in view of the direct authorization of Congress for the making of these loans it would certainly be difficult for the board to refuse to make them and practically impossible for the board to adequately insure their repayment. Repayment would rest wholly upon the success of the enterprise as the cooperative would have only nominal capital assets to cover losses or expenses incurred.

The general authorizations are, in effect, directions to the board to make unsound loans. They are vague and indefinite in terms and uncertain in scope and purpose. They omit all of the restrictions, limitations, and safeguards usually imposed upon the loaning and use of public or semipublic funds.

Subdivision (b) of section 5 provides that loans under paragraph (2) of subdivision (a) of section 5 (2, 3, 4, and 5 above) may be secured by "marketing contracts" of members of the cooperative association and be repaid with interest within a period of 20 years by means of a charge to be deducted from the proceeds of the sale of the members' product by the cooperative. The validity of "marketing contracts" of the sort contemplated by this provision have been sustained by the courts. These agreements, however, have not run for longer periods than five years, and the present tendency is to make them for three years with the privilege of withdrawal. Such agreements ordinarily provide for the deduction from returns made to the member of expenses, reserves, and so forth. This provision is the only basis for assessment of the repayment of the loans and interest upon the member. However, as these contracts run only for short periods and are subject to withdrawal of the member, it is difficult to see how they can safely be taken as security for the repayment on an amortization basis over a period of 20 years of the loans secured by them.

Under subsection (c) of section 5 a corporation created and controlled by cooperatives to which a loan is made under this

section may be required by the board (1) to keep accounts, memoranda, records, and make reports as required by the board; (2) to permit audit and investigation by the board; (3) to establish reserves as required by the board; and (4) to distribute dividends ratably to the associations controlling it and their members. No such requirement is made with respect to cooperatives to whom loans may be made. In view of the fact that the corporation will probably have capital stock of more than nominal character while the cooperatives will not, this distinction scarcely seems justified. It might be contended that similar requirements could be made by the board of cooperatives as a condition upon the loan, but the inclusion of such requirements as to corporations and their exclusion as to cooperatives would seem to indicate the intent of the committee to exempt the cooperatives from these requirements. I do not see the occasion for the distinction.

In considering the scope and character of the powers given by the board and the safety of the loans which may be made by them by these provisions it must be remembered that while conditions can be made precedent to making the loans, once the loan has been made the money is beyond the control of the board and subject to the use and management of the cooperative as though it had been contributed by its members subject only to repayment in terms of the contract. The loan features of this bill are far more extensive than any the administration has ever indicated it could approve. Some are exceedingly unwise. Their inclusion only presents additional grounds for Executive disapproval.

Mr. STRONG of Kansas. Mr. Chairman, I offer a perfecting amendment.

Mr. NEWTON. Mr. Chairman, let us first have a vote on my amendment.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Minnesota [Mr. NEWTON].

Mr. HAUGEN. Mr. Chairman, let us have the amendment again reported. This is a very important amendment. I suppose the gentleman had reference to the $2,000,000 and suggested that we reduce that $1,000,000?

Mr. NEWTON. No. This relates to subdivision (B), and this involves not $2,000,000 but something like $18,000,000 or $20,000,000.

Mr. HAUGEN. Does the gentleman propose to strike out the appropriation?

Mr. NEWTON. No. I propose to strike out the language on page 37, commencing with (B), on line 20, down to the end of the page and from the top of page 38 down to the middle of line 2.

Mr. HAUGEN. I ask that this amendment be not adopted. It should have more consideration.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Minnesota [Mr. NEWTON].

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. NEWTON. A division, Mr. Chairman.

The CHAIRMAN. The gentleman from Minnesota asks for a division.

The committee divided; and there were—ayes 14, noes 62.

So the amendment was rejected.

Mr. STRONG of Kansas. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Kansas offers an amendment, which the Clerk will report.

The Clerk read, as follows:

Amendment offered by Mr. STRONG of Kansas: Page 38, line 14, strike out down through line 23, and insert in lieu thereof the following:

"(b) Any loan to a cooperative association under paragraph (2) of subdivision (a) may be required to be repaid, together with interest thereon, within a period of 20 years, by means of a charge to be deducted from the proceeds of the sale or other disposition of each unit of the agricultural commodity handled by the association."

Mr. STRONG of Kansas. Mr. Chairman and gentlemen of the committee, this does not change the section except to leave out the words "the notes or other obligations representing the loan may be secured by marketing contracts of members of the cooperative association."

The first part of the section provides that the board may make these loans "upon such terms and conditions as in the judgment of the board will afford adequate assurance of repayment and carry out the policy declared in section 1 and upon such other terms and conditions as the board deems necessary.

The words my amendment strikes out would limit loans to be secured on marketing contracts of members. Many of the farm organizations do not have marketing contracts, and none of them have them for a period exceeding five years. Yet this section provides that such loans shall be liquidated in a period of 20 years. So I offer the amendment. The farmers' organizations of my State have asked me to offer this amendment in their behalf, with one other that I will present.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kansas.

The question was taken, and the amendment was rejected.

Mr. STRONG of Kansas. Mr. Chairman, I have another amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Kansas.

The Clerk read as follows:

Amendment offered by Mr. STRONG of Kansas: Page 40, line 18, strike out "$2,000,000" and insert in lieu thereof "$1,000,000."

Mr. STRONG of Kansas. That amendment, I think, has the support of the committee.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mr. STRONG of Kansas. Mr. Chairman, I ask for a division.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 22, noes 49.

So the amendment was rejected.

Mr. FORT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New Jersey offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. FORT: On page 38, beginning in line 2, strike out subsection (c), ending in line 7.

Mr. FORT. Mr. Chairman, on page 38 I have moved to strike out subsection (c) for the purpose of explaining to the committee the meaning and effect of subsection (c).

Subsection (c) authorizes the making of loans to cooperative associations or corporations created or controlled by them for use as capital by any agricultural credit corporation eligible to receive discounts under section 202 of the Federal farm loan act, as amended. Now, the agricultural credit corporation, under section 202, is a corporation on whose indorsement Government funds, provided in the Federal farm loan act, may be loaned. It is a corporation created for the purpose of making loans to farmers, which loans are thereafter made eligible for rediscount on the strength of the indorsement of the credit corporation. The effect of this provision is that the Government loans to the indorser so as to make its indorsement good, when it loans to the borrower. The whole purpose of the agricultural credit corporation provision is to furnish an indorsement, on the faith of which indorsement, Government money may be loaned. This is a provision to loan money with which to make the indorsement good. It seems to me it is an exceeding stretch of Government liberality when it agrees to loan to an individual, if he gets a good indorser, and then loans to the indorser so as to make the indorser good and so the borrower's loan is made good. It seems this is a little strong, gentlemen.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New Jersey.

The question was taken; and on a division (demanded by Mr. FORT) there were—ayes 10, noes 65.

So the amendment was rejected.

The CHAIRMAN. The question is on the Aswell motion to strike out the section.

The motion was rejected.

The Clerk read as follows:

INCREASED PRODUCTION

SEC. 6. If the board finds that its advice as to a program of planting and breeding of any agricultural commodity as hereinbefore provided has been substantially disregarded by the producers of the commodity, or that the planting or breeding of any agricultural commodity for any year is substantially greater than a normal increase, as determined by the board, over the average planting or breeding of such commodity for the preceding five years, the board may refuse to make advances for the purchase of such commodity.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Page 40, line 19, strike out all of section 6.

Mr. HAUGEN. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Iowa offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAUGEN: Page 41, line 3, after the word "make," strike out the word "advances" and insert in lieu thereof the word "loans."

Mr. FORT. Mr. Chairman, again I want simply to explain to the committee the meaning of this amendment. This is the one section in the bill that puts upon the board any authority or power whatever, in the event of a continuing and increasing overproduction. This section does not require the board, in the event of a continuing overproduction, to cease advances, but it gives them the power to cease advances if the planting or breeding of the commodity increases over the five-year average.

Now, the purpose of the amendment striking out the word "advances" and inserting the word "loans," if the committee pleases, is to fix the bill so that the provisions of section 9, the marketing agreement section, and the equalization fee provisions of the bill, designed for the deliberate enhancement of prices, must be continued by the board no matter how far production is advanced. If the amendment proposed by the chairman is adopted, the board loses all power to stop operations, no matter how high the production goes. As we have already understood in the discussions, the board is required to begin operations when there is a surplus and, if this amendment is adopted, they are required to keep on operating permanently if the surplus keeps on growing.

Mr. JACOBSTEIN. Will the gentleman yield?

Mr. FORT. Yes.

Mr. JACOBSTEIN. Why does the board surrender its power? I am just asking that for information.

Mr. FORT. Because the section as it is now in the bill gives them the power to stop advances, which would apply both to section 9, the marketing agreement section, and to section 5, the loan section. The chairman proposes to take out the word "advances" and insert the word "loans" so that the power of the board to suspend its use of Government money would be operative only under section 5 and not under section 9.

Mr. HAUGEN. Mr. Chairman, the purpose of this amendment is that they may not make loans under this provision. We have section 5, which reads:

The board is authorized to make loans.

And back here it says "advances," which is a different thing altogether. Then, if we want to give the board authority to make loans, let us state it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Iowa.

The amendment was agreed to.

The CHAIRMAN. The question is now on the motion of the gentleman from Louisiana [Mr. ASWELL] to strike out the section.

The motion was rejected.

The Clerk read as follows:

INVESTIGATIONS BY BOARD

SEC. 7. The board, upon the request of any cooperative association or upon its own motion, may investigate the conditions surrounding the marketing of any agricultural commodity produced in the United States and determine:

(1) Does a surplus of any such commodity exist or threaten to exist;

(2) Does the existence or threat of such surplus depress or threaten to depress the price of such commodity below the average cost of the actual production of such commodity in continental United States during the preceding five years; and

(3) Are the conditions of durability, preparation, processing, preserving, and marketing of such commodity, or the products therefrom, adaptable to the storage or future disposal of such commodity.

Before declaring or entering its finding upon the foregoing matters the board shall consult with the advisory council for the commodity.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Page 41, line 4, strike out all of section 7.

The amendment was rejected.

The Clerk read as follows:

CLEARING HOUSE AND TERMINAL MARKET ASSOCIATIONS

SEC. 8. The board may assist in the establishment of, and provide for the registration of, in accordance with such regulations as it may prescribe, (1) clearing house associations adapted, in the opinion of the board, to effect the more orderly production, distribution, and marketing of any agricultural commodity, to prevent gluts or famines in any market for such commodity, and to reduce waste incident to the marketing of such commodity, and (2) terminal market associations adapted, in the opinion of the board, to maintain public markets in distribution centers for the more orderly distribution and marketing of any agricultural commodity. Only cooperative associations or corporations created or controlled by one or more cooperative associations shall be eligible for membership in any clearing house association or terminal market association registered under this section. Rules for the governance of any such association shall be adopted by the members thereof with the approval of the board.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Page 41, line 23, strike out all of section 8.

The amendment was rejected.

The Clerk read as follows:

MARKETING AGREEMENTS

SEC. 9. (a) From time to time, upon request of the advisory council for an agricultural commodity, or upon request of leading cooperative associations or other organizations of producers of any agricultural commodity, or upon its own motion, the board shall investigate the supply and marketing situation in respect of such agricultural commodity.

(b) Whenever upon such investigation the board finds—

First. That there is or may be during the ensuing year a seasonal or year's total surplus, produced in the United States and national in extent, that is in excess of the requirements for the orderly marketing of any agricultural commodity or in excess of the domestic requirements for the commodity;

Second. That the operation of the provisions of section 5 (relating to loans to cooperative associations or corporations created and controlled by one or more cooperative associations) will not be effective to control such surplus because of the inability or unwillingness of the cooperative associations engaged in handling the commodity, or corporations created and controlled by one or more such cooperative associations, to control such surplus with the assistance of such loans; and

Third. That the durability, the conditions of preparation, processing, and preserving, and the methods of marketing of the commodity are such that the commodity is adapted to marketing as authorized by this section—

then the board, after publicly declaring its findings, shall arrange for marketing any part of the commodity by means of marketing agreements with cooperative associations engaged in handling the commodity or corporations created and controlled by one or more such cooperative associations. Such marketing shall continue during a marketing period which shall terminate at such time as, in the judgment of the board, such arrangements are no longer necessary or advisable for carrying out the policy declared in section 1.

(c) A marketing agreement shall provide either—

(1) For the withholding by a cooperative association, or corporation created and controlled by one or more cooperative associations, during such period as shall be provided in the agreement, of any part of the commodity delivered to such cooperative association or associations by its members. Any such agreement shall provide for the payment from the stabilization fund for the commodity of the costs arising out of such withholding; or

(2) For the purchase by a cooperative association, or corporation created and controlled by one or more cooperative associations, of any part of the commodity not delivered to such cooperative association or associations by its members, and for the withholding and disposal of the commodity so purchased. Any such marketing agreement shall provide for the payment from the stabilization fund for the commodity of the amount of the losses, costs, and charges arising out of the purchase, withholding, and disposal, or out of contracts therefor, and for the payment into the stabilization fund for the commodity of profits (after repaying all advances from the stabilization fund and deducting all costs and charges, provided for in the agreement) arising out of the purchase, withholding, and disposal, or out of contracts therefor.

(d) The board may, in its discretion, provide in any such marketing agreement for financing any withholding, purchase, or disposal under such agreement, through advances from the stabilization fund for the commodity. Such financing shall be upon such terms and conditions as the board may prescribe, but no such advance shall bear interest.

(e) If the board is of the opinion that there are two or more cooperative associations or corporations created and controlled by one or more cooperative associations capable of carrying out any marketing agreement, the board in entering into the agreement shall not unreasonably discriminate against any such association or corporation in favor of any other such association or corporation. If the board is of the opinion that there is no such cooperative association or corporation created and controlled by one or more cooperative associations capable

of carrying out any marketing agreement for purchase, withholding, and disposal, then the board may enter into the agreement with other agencies but shall not unreasonably discriminate between such other agencies.

(f) During a marketing period fixed by the board for any commodity, the board may enter into marketing agreements for the purchase, withholding, and disposal of the food products of such commodity, and all provisions of this section applicable to marketing agreements for the purchase, withholding, and disposal of the commodity, shall apply to the agreements in respect of its food products.

(g) Any decision of the board relating to the commencement, extension, or termination of a marketing period shall require the affirmative vote of a majority of the appointed members in office.

(h) The powers of the board under this section in respect of any agricultural commodity shall be exercised in such manner, and the marketing agreements entered into by the board during any marketing period shall be upon such terms, as will, in the judgment of the board, carry out the policy declared by section 1.

(i) The United States shall not be liable, directly or indirectly, upon agreements under this act in respect of agricultural commodities, in excess of the amounts available in the stabilization, premium insurance, and revolving funds.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Page 42, beginning at line 17, strike out all of section 9.

Mr. STEVENSON. Mr. Chairman, I offer a preferential amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. STEVENSON: Page 46, line 1, strike out the word "food" and insert the words "manufactured or processed."

Mr. STEVENSON. Mr. Chairman, I think the gentlemen of the committee will agree that while we may disagree about an equalization fee and about the handling of the food products from exported articles, they do not care to begin to discriminate as between the products of different agricultural commodities.

Frankly, I am opposed to the equalization fee, as you all know. I am for the bill, but for that provision I can not vote.

This is a proposition that they enter into marketing agreements and further on they provide for an equalization fee on the imported articles and on the manufactured food products arising from them. Now the proposition is that the manufactured products arising from any of the articles that come under agricultural commodities should have the same treatment, and my motion is merely to strike out "food" and insert "manufactured or processed" products.

There is no use in mincing words about it. The cotton manufacturer is here along with the farmer and they are all bound up together.

You have a provision that cotton, when it comes in, shall have an equalization fee. You have a provision that when wheat comes in it shall have an equalization fee. You have a provision that when the food products of wheat and other things come in they shall have an equalization fee and they shall be subject to these marketing contracts, but you have left out the products of other things.

Now, we wear clothing as well as eat flour, so far as that is concerned, and the cotton-mill people of this country have the right to have the same protection on that which is brought in here that the flour manufacturer has—nothing more and nothing less—and this is a proposition to put that in the bill.

Oh, you may say that the manufacturer of cotton goods is protected. I take it for granted that the amount of his tariff would be taken into account when you come to fix the equalization fee and when you come to fix your marketing agreement, but the fact there is a tariff on cotton goods does not put that article in a class to be outlawed.

Mr. WRIGHT. Will the gentleman yield?

Mr. STEVENSON. Yes.

Mr. WRIGHT. Is there not also a tariff on wheat?

Mr. STEVENSON. Yes; and on flour, too. Why should there be this discrimination between the cotton goods and the flour and the meat? There is absolutely no justice in a refusal to include the processed and manufactured goods of cotton as well as the processed and manufactured products of wheat and of cattle and of hogs and all that kind of thing. For this reason I moved to strike out the word "food" and insert "manufactured or processed" products from any agricultural commodity dealt with in this bill.

Mr. BURTNESS. Will the gentleman yield?

Mr. STEVENSON. Yes.

Mr. BURTNESS. Would not that include dealings in calico, gingham, cloth, overcoats, and shoes?

Mr. STEVENSON. Let me ask the gentleman a question. Does not this other provision include dealing with hog products, lard, chitlings, and everything of that kind? Why, of course it does, and we should include the products of every agricultural commodity that comes in here if we are going to include any of them.

As I have said, I am in favor of some of this legislation. I am not in favor of this feature of it, but if you are going to put it in here I am going to put it squarely up to you as to whether you are going to treat everybody alike or not.

Mr. DICKINSON of Iowa. Will the gentleman yield?

Mr. STEVENSON. Yes.

Mr. DICKINSON of Iowa. Have you not a tariff on cotton textiles now, and is not the whole policy of this bill one of putting the other commodities on an equality?

The CHAIRMAN. The time of the gentleman from South Carolina has expired.

Mr. STEVENSON. Mr. Chairman, I ask unanimous consent to proceed for five minutes more.

The CHAIRMAN. The gentleman from South Carolina asks for five minutes more. Is there objection?

Mr. HAUGEN. Mr. Chairman, I shall have to object, although I dislike to do so very much.

Mr. STEVENSON. Can the Chair give me one minute more to answer the question?

The CHAIRMAN. The gentleman asks for one minute more. Is there objection?

There was no objection.

Mr. STEVENSON. There is a tariff on flour and all other things you are putting in but you say you want to put the farmer on an equality with everybody else when the tariff protects the manufacturer and yet you are providing in this bill to make the farmer pay the expense of his protection while in the tariff the whole people pay it, and the railroads unload the whole advance of rates allowed them on the people. You are going to put the farmer on an equality when you put him in a hole and make him pay for every protection you are professing to give him. My colleague from South Carolina [Mr. FULMER] has stated that it is not the idea of this bill to raise the price of cotton in this country above the world price. Then what is the bill for and why is it contemplated to put a tax of $10 or more a bale on cotton? It is idle to say we can raise the world price. In the last five years we exported 37,000,000 bales while the balance of the world sold in the world markets 47,000,000 bales. But the question is, Why do you discriminate in favor of the products of wheat and hogs against the products of cotton? With that discrimination in the bill and an equalization fee on cotton which you refuse to limit to $10 a bale, I can not vote for the bill. I would vote for it without the fee. I regret my inability to go along with my friends who favor it, but can not defend it in that shape, and we have been unable to amend it substantially.

Mr. HAUGEN. Mr. Chairman, the bill relates to agricultural commodities and we do not contemplate covering shoestrings or pins.

Mr. CRISP. Mr. Chairman, I know the House is impatient, and I shall take but a moment. I am opposed, as you know, to the equalization fee. I will vote against the bill with the equalization fee in it, and I will vote for it with it out. If you are going to give the benefit of the equalization fee to the processors of wheat, corn, and meats I feel that the textile industry is entitled to the same consideration at the hands of Congress. Therefore, I shall vote for the Stevenson amendment. I ask unanimous consent to extend my remarks by publishing a telegram from the Georgia Cotton Manufacturers Association, signed by leading cotton manufacturers in Georgia.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent to extend his remarks in the manner indicated. Is there objection?

There was no objection.

The telegram is as follows:

ATLANTA, GA., *May 1, 1928.*

Hon. CHARLES R. CRISP,

*House of Representatives, Washington, D. C.:*

Undersigned directors Georgia Cotton Manufacturers Association met to-day and considered McNary-Haugen bill. We believe present bill permits serious injury to southern cotton mills, which was never in-

tended. Under this bill cotton may be sold at lower prices in foreign countries, giving foreign mills lower raw material and lower costs. At same time equalization fee may be added to price of our cotton, increasing inequality in cost of cotton between foreign and southern mills. Foreign mills can then sell in both American and foreign countries below our cost, seriously affecting American market and destroying large export trade of southern mills. We ask same protection as provided for packers. We know nothing which can be put in bill to prevent injury to southern export trade. This sale of cotton in foreign countries not only is permitted but will almost inevitably take place in operating under present bill. These features are very serious and we urge your assistance to prevent this injury and injustice. If this bill must pass, we implore you in the name of justice and fairness to have rider attached to McNary-Haugen bill providing for duty on importation of foreign jute, which would help condition of southern cotton farmers immeasurably.

J. J. SCOTT, *President.*
GEO. S. HARRIS.
D. A. JEWELL, Jr., *Treasurer.*
CLIFFORD J. SWIFT, *Vice President.*
CASON J. CALLAWAY.
FULLER E. CALLAWAY, Jr.

W. H. HIGHTOWER.
P. E. GLENN.
P. K. MCKENNEY.
D. W. ANDERSON.
HATTON LOVEJOY, *General Counsel.*
S. A. FORTSON.
T. M. FORBES, *Secretary.*

Mr. HAUGEN. Mr. Chairman, I move that all debate on this section and all amendments thereto close in seven minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

There was no objection.

Mr. FULMER. Mr. Chairman and gentlemen of the committee, I merely rise to say that my colleague from South Carolina [Mr. STEVENSON] is unnecessarily alarmed and also is the lady from Massachusetts [Mrs. ROGERS]. I have a telegram here from a cotton mill in Boston saying that we propose to make two prices on cotton, one price in the United States and a lower price in foreign countries, and thereby when we dump cheap cotton into the foreign countries that they would be enabled to manufacture it into goods and ship them back and undersell the manufacturers in this country. As a matter of fact there is nothing of that kind contemplated. We only propose to take care of the surplus and stabilize the price. The price in the foreign countries will be identically the same price as in this country with the freight, insurance charges added for carrying it to the foreign country. In the case of grain, if you dump a certain amount in the foreign countries cheaper than in America, then they would be able to ship it back in competition, but not so with cotton.

Last year we had a telegram from the cotton mills in North Carolina stating that they objected to the passage of the bill for that reason—putting a higher price on cotton in the United States and a cheaper price on what we export to foreign countries they said would ruin our mills. When asked what they would offer as a substitute they said if you want to do anything create a fund whereby you might take the surplus of cotton off the market and feed it back into the market in an orderly way, and that is what we are trying to do.

Mr. LOZIER. Will the gentleman yield?

Mr. FULMER. Yes.

Mr. LOZIER. Is it not true that the effect of the bill would be to take the surplus and feed it back into the world market in an orderly manner and thereby increase the world price?

Mr. FULMER. Absolutely; and if you had an equalization fee on manufactured goods coming into the country it would be an additional tariff in the interest of the manufacturer and against the consumer of the manufactured products.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Carolina [Mr. STEVENSON].

The question was taken, and the amendment was rejected.

Mr. BLACK of New York. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. BLACK of New York: Page 43, after line 14, insert "If, in the opinion of the board, the prices of agricultural products are, or would be, favorably affected thereby, the board shall provide the marketing of commodities for the manufacture of beverages containing not more than 2¾ per cent of alcohol by volume. Shall make and promulgate rules and regulations by, and with the consent of, the Secretary of the Treasury for the manufacturing, storing, disposing of, and selling of such products. All acts or parts of acts inconsistent herewith are hereby repealed."

Mr. DOWELL. Mr. Chairman, I reserve the point of order.

Mr. BLACK of New York. Mr. Chairman, gentlemen will remember that I proved the other day that prohibition is the cause of the farmer's trouble. If you adopt this amendment you will make the bill popular. Moreover, if you adopt the amendment, I guarantee you enough votes to pass the bill over the President's veto. This is just as constitutional as the equalization fee or anything else in the bill.

Mr. DOWELL. Mr. Chairman, I make the point of order that the amendment is not germane.

The CHAIRMAN. The point of order is sustained. The question is on the motion of the gentleman from Louisiana [Mr. ASWELL] to strike out the section.

The motion was rejected.

The Clerk read as follows:

EQUALIZATION FEE

SEC. 10. (a) In order to carry out marketing and nonpremium insurance agreements in respect of any agricultural commodity without loss to the revolving fund, each marketed unit of such agricultural commodity produced in the United States shall, throughout any marketing period in respect of such commodity, contribute ratably its equitable share of the losses, costs, and charges arising out of such agreements. Such contributions shall be made by means of an equalization fee apportioned and paid as a regulation of interstate and foreign commerce in the commodity. It shall be the duty of the board to apportion and collect such fee in respect of such commodity as hereinafter provided.

(b) Prior to the commencement of any marketing period in respect of any agricultural commodity, and thereafter from time to time during such marketing period, the board shall estimate the probable losses, costs, and charges to be paid under marketing agreements in respect of such commodity and under nonpremium insurance agreements in respect of such commodity as hereinafter provided. Upon the basis of such estimates, the board shall from time to time determine and publish the amount of the equalization fee (if any is required under such estimates) for each unit of weight, measure, or value designated by the board, to be collected upon such unit of such agricultural commodity during any part of the marketing period for the commodity. Such amount is referred to in this act as the "equalization fee." At the time of determining and publishing any equalization fee the board shall specify the time during which the particular fee shall remain in effect and the place and manner of its payment and collection.

(c) Under such regulations as the board may prescribe, any equalization fee determined upon by the board shall be paid, in respect of each marketed unit of such commodity, upon one of the following: The transportation, processing, or sale of such unit. The equalization fee shall not be collected more than once in respect of any unit. The board shall determine, in the case of each class of transactions in the commodity, whether the equalization fee shall be paid upon transportation, processing, or sale. The board shall make such determination upon the basis of the most effective and economical means of collecting the fee with respect to each unit of the commodity marketed during the marketing period.

(d) Under such regulations as the board may prescribe, the equalization fee determined under this section for any agricultural commodity produced in the United States shall in addition be collected upon the importation of each designated unit of the agricultural commodity imported into the United States for consumption therein, and an equalization fee, in an amount equivalent as nearly as may be, shall be collected upon the importation of any food product derived in whole or in part from the agricultural commodity and imported into the United States for consumption therein.

(e) The board may by regulation require any person engaged in the transportation, processing, or acquisition by purchase of any agricultural commodity produced in the United States, or in the importation of any agricultural commodity or food product thereof—

(1) To file returns under oath and to report, in respect of his transportation, processing, or acquisition of such commodity produced in the United States or in respect of his importation of the commodity or food product thereof, the amount of equalization fees payable thereon and such other facts as may be necessary for their payment or collection.

(2) To collect the equalization fee as directed by the board and to account therefor.

(f) The board, under regulations prescribed by it, is authorized to pay to any such person required to collect such fees a reasonable charge for his services.

(g) Every person who, in violation of the regulations prescribed by the board, fails to collect or account for any equalization fee shall be

liable for its amount and to a penalty equal to one-half its amount. Such amount and penalty may be recovered together in a civil suit brought by the board in the name of the United States.

(h) As used in this section—

(1) In the case of grain the term "processing" means milling of grain for market or the first processing in any manner for market (other than cleaning or drying) of grain not so milled, and the term "sale" means a sale or other disposition in the United States of grain for milling or other processing for market, for resale, or for delivery by a common carrier—occurring during a marketing period in respect of grain.

(2) In the case of cotton the term "processing" means spinning, milling, or any manufacturing of cotton other than ginning, the term "sale" means a sale or other disposition in the United States of cotton for spinning, milling, or any manufacturing other than ginning, or for delivery outside the United States, and the term "transportation" means the acceptance of cotton by a common carrier for delivery to any person for spinning, milling, or any manufacturing of cotton other than ginning, or for delivery outside the United States—occurring during a marketing period in respect of cotton.

(3) In the case of livestock, the term "processing" means slaughter for market by a purchaser of livestock, and the term "sale" means a sale or other disposition in the United States of livestock destined for slaughter for market without intervening holding for feeding (other than feeding in transit) or fattening—occurring during a marketing period in respect of livestock.

(4) In the case of tobacco, the term "sale" means a sale or other disposition to any dealer in leaf tobacco or to any registered manufacturer of the products of tobacco. The term "tobacco" means leaf tobacco, stemmed or unstemmed.

(5) In the case of grain, livestock, and tobacco, the term "transportation" means the acceptance of a commodity by a common carrier for delivery.

(6) In the case of any agricultural commodity other than grain, cotton, livestock, or tobacco, the board shall, in connection with its specification of the place and manner of payment and collection of the equalization fee, further specify the particular type of processing, sale, or transportation in respect of which the equalization fee is to be paid and collected.

(7) The term "sale" does not include a transfer to a cooperative association for the purpose of sale or other disposition by such association on account of the transferor; nor a transfer of title in pursuance of a contract entered into before, and at a specified price determined before, the commencement of a marketing period in respect of the agricultural commodity. In case of the transfer of title in pursuance of a contract entered into after the commencement of a marketing period in respect of the agricultural commodity, but entered into at a time when, and at a specified price determined at a time during which, a particular equalization fee is in effect, then the equalization fee applicable in respect of such transfer of title shall be the equalization fee in effect at the time when such specified price was determined.

Mr. ASWELL. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. ASWELL. Mr. Chairman, the committee yesterday, according to the ruling of the Chairman to-day, adopted the Aswell substitute. I believe every Member will readily agree that in voting yesterday on the Aswell substitute he voted not with reference to section 1, but with reference to the equalization fee. My inquiry is this: Having been stricken out by the vote of yesterday, is it not the proper procedure now not to consider or amend this section? It has once been stricken out in the voting, and everyone knows that this is what was voted on, and not the first section of the bill.

Mr. CHINDBLOM. The gentleman means to make the point of order?

Mr. ASWELL. Yes; I do make the point of order.

Mr. CANNON. Mr. Chairman, not only were those sections not stricken out, but they were the only sections that were not stricken out by the Aswell amendment. The Aswell amendment as finally agreed to strikes out every other portion of the bill and provides a substitute. But those portions relating to the equalization fee have not yet been considered and no action has been taken affecting them in any way. The Aswell substitute does not mention them, and the first proposal touching them is the motion to strike out which the gentleman from Louisiana [Mr. ASWELL] gave notice of his intention to make at the time he offered his first amendment.

Mr. ASWELL. That is not a fair statement. The committee has expressed its judgment against the equalization fee.

Mr. CANNON. The equalization proposition has not yet been before the committee. That is the one proposition in the entire bill upon which the committee has not yet expressed itself. The committee has expressed itself upon every other proposition in this bill by agreeing to the motion proposed by the gentleman to strike out and substitute. But up to this time no action whatever has been taken affecting sections 10 and 11.

Mr. ASWELL. That is not a fair statement.

Mr. CANNON. It is a fair statement, because it is the only statement which could be made in accordance with the facts.

The CHAIRMAN. The Chair does not understand that there is anything before the committee.

Mr. ASWELL. I make the point of order that it is not in order to vote upon section 10.

The CHAIRMAN. No motion is before the committee.

Mr. LAGUARDIA. Mr. Chairman, I have a perfecting amendment which I desire to submit.

Mr. ASWELL. Is it not proper to make the point of order at this place that it is not in order to vote on this section of the bill?

Mr. DOWELL. Not until a motion is made.

The CHAIRMAN. The Chair thinks that this section is in the bill. The Aswell amendment struck out the first section of the bill. The Chair thinks this section is in the bill.

Mr. ASWELL. I move to strike it out.

The CHAIRMAN. The gentleman from Louisiana moves to strike out section 10.

Mrs. ROGERS. Mr. Chairman, I offer the following amendments, which I send to the desk.

The Clerk read as follows:

Amendments offered by Mrs. ROGERS: Page 46, line 4, strike out the word "food" and in lieu thereof insert the words "manufactured or processed"; page 48, line 21, strike out the word "food" and insert in lieu thereof the words "manufactured or processed"; page 49, line 7, strike out the word "food" and insert in lieu thereof the words "manufactured or processed."

Mr. DOWELL. Mr. Chairman, on that I reserve the point of order.

Mrs. ROGERS. Mr. Chairman, I know that the Members are all tired and restless. I know the western Members want to help their farmers. Frankly, I can not see how this bill will help them except for a brief period.

I want to help my manufacturers and the people who work in the mills, as well as the stockholders. [Applause.] I am pleading for the farmers, the bankers, the manufacturers, the operators, the shopkeepers, and for everyone in the North, the South, the East, and the West. I wonder if you realize just what you will do if you take away the purchasing power from the wage earners employed in our cotton mills. There are over 450,000 wage earners in the cotton mills to-day. There are over 1,600 cotton establishments, and the cotton-mill operatives' pay roll at the present time is over $375,000,000. In the textile mills there are over 1,110,000 wage earners to-day. There are over 7,000 textile establishments, and the textile-mill operatives' pay roll at the present time is over $1,066,000,000. You can imagine just what would happen to the farmers as well as to the salespeople in the towns and cities if you take away—if you cripple or completely demolish—the purchasing power of the wage earners, and take away also the money that the stockholders receive from the dividends on stocks in these mills; and the consumer, if this bill should be enacted, would have to pay a higher price for the staples of life than ever before in the history of this country.

No doubt a good many of you own mill stock and perhaps you do not remember that fact to-day.

We do not all agree about the equalization fee. I am afraid I can not go along with you in voting for that. But if you impose the equalization fee on raw-cotton imports and thereby increase the cost of cotton for our manufacturers who import raw cotton from Egypt, China, or Peru, it seems to me that in all fairness you ought to impose the fee on the imported manufactured or processed products. You ought not to place our mills at such a terrible disadvantage. Under the present bill you can sell raw cotton, I am told by experts, to foreign countries at a lower price than would be paid for it in this country. Those foreign mills would purchase that raw cotton at a cheaper price than we pay for it, and compete with the mills in this country in manufactured cotton goods, thereby placing our mills at a great disadvantage. We could not possibly compete successfully, either in our country or in foreign countries, with those foreign countries if that were the case. At the present time we import about 150,000,000 yards of cotton cloth a year. Think how this would be increased with no equalization fee on imported finished goods.

Mr. FULMER. Mr. Chairman, will the lady permit an interruption?

Mrs. ROGERS. I am sorry I can not; I have such a short time.

You all know that this Congress has spent money for trade commissioners to try to develop our export trade in cotton and other finished commodities, and we have succeeded in increasing that trade steadily. We export nearly 600,000,000 square yards a year. I do not see how in your conscience and in your hearts you could entirely kill any continental export trade we might have.

I am pleading for everybody in the entire country; not only for the cotton manufacturers but for everybody, because if they fail many others will fail.

The gentleman spoke of the tariff on cotton goods. It is true that there is a tariff, but does that tariff allow for the fluctuation of prices which the equalization fee would bring about? It would not, and you would have to change your tariff very frequently, because the present tariff would not take care of the conditions that would arise as a result of the equalization fee on raw-cotton imports and no equalization fee on the manufactured cotton goods. We would be subsidizing foreign trade. I was talking only last night with some foreigners, and they seemed to be very much amused by this injustice that we are planning to inflict upon our cotton manufacturers. They are only too glad to secure our trade. [Applause.]

Will you tell the people of your State that they will be thrown out of work if the mills close—that you gave their chance for work to foreign labor in foreign countries?

Will you not give the cotton manufacturers a fair chance to keep alive this industry? Once more I bring to the attention of the Members of the House the table showing the number of States that have cotton mills in them. How can the Members of those States answer their constituents if the vote on my amendment is not "aye"? They are here to pass laws to assist these industries, not to cripple and annihilate them.

I have received messages from manufacturers and people all over this country asking that this amendment be introduced and passed. Boots and shoes and tobacco also would be included in the amendment. The makers of these commodities would be vitally hurt without this amendment.

The following is the National Association of Cotton Manufacturers' resolution, unanimously adopted, which has been sent to me:

The board of government of the National Association of Cotton Manufacturers to-day considered certain features of the McNary-Haugen bill which affects the cotton-textile industry.

The board of government appreciates the unfortunate economic conditions which have adversely affected the position of the farmer, but believes that the present bill is uneconomic, unsound, and will not afford the relief to the farmer for which it is designed. Furthermore, certain features of the bill, if put into operation, would so seriously affect the cotton-manufacturing industry as well as other branches of the textile industry as to cause further serious depression, if not actual disaster.

If, however, this type of legislation has prospects of favorable consideration by Congress and the administration, the board believes that an amendment should be offered by which the textile industry, whose interests are very closely related to the farmer, would not be so seriously damaged. The damage thus caused to the American textile industry, the cotton farmer's best customer, would in turn react on and seriously damage the cotton farmers themselves. The amendment suggested is that of including cotton goods within the operations of the act and to apply the equalization-fee plan to cotton goods in respect to both imports and exports.

Following are outlined some effects upon the textile industry which would result from the enactment of the legislation passed by the Senate and now before the House, unless an amendment to include cotton goods is added.

The present bill provides that raw cotton be exported at world market prices, which means at prices below those current in the domestic market and that the losses on such exports of cotton would be made up out of equalization fees collected on sales of cotton to domestic mills. In effect, this means that foreign mills could secure American cotton at prices less than that paid for it by domestic mills.

Foreign mills, therefore, could convert the American cotton into yarns and cloth, and because such were made out of cotton obtained at prices oftentimes considerably below that paid for it by domestic mills, could export these yarns and cloths to the United States at prices low enough to undersell with the yarns and cloths from American mills in spite of any tariff. Furthermore, foreign mills would make yarns and cloths out of their cheaper American cotton and export them to the world's markets in competition with American exports of such commodities, thus almost entirely killing our own export trade in cotton textiles which now amount to nearly 600,000,000 square yards a year.

The disastrous effects of the operation of such a law on the chief consumer of farm products has been recognized in the provisions for the protection of the packers and flour mills, their most important customers.

The flour mills and the packers process and distribute grain and animal products. The cotton mills process and distribute raw cotton, the product of the cotton farmer. The cotton mills should, therefore, be included in the McNary-Haugen bill in order to protect the cotton farmer's chief market.

In view of the serious consequences to the textile industry which would follow from the operation of the McNary-Haugen bill as now

before Congress your board of government recommends that this association urge the adoption of such an amendment, and that a committee of four be appointed to bring this situation to the attention of Members of the House and Senate.

The CHAIRMAN. The time of the lady from Massachusetts has expired. The question is on agreeing to the amendment offered by the lady from Massachusetts.

The question was taken, and the Chairman announced that the noes appeared to have it.

Mrs. ROGERS. I ask for a division, Mr. Chairman.

The CHAIRMAN. A division is called for.

The committee divided; and there were—ayes 54, noes 81.

So the amendment was rejected.

Mr. JONES. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Texas offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JONES: Page 47, line 25, after the word "collection," insert the following: "*Provided*, That when any equalization fee is levied in respect to cattle or swine or the processing or sale thereof, a similar fee of not less than the same amount per pound shall also be levied on the first sale of any stock of food products made from cattle or swine on hand and owned by any individual or corporation at the time of the beginning of such period of operation: *Provided, however*, That the board shall exempt all of such commodities owned in good faith by retail dealers at the time of the declaring of such operative period from the operation of this clause."

Mr. JONES. Mr. Chairman, I would like to have the attention of the Members of the House on this amendment. This amendment was adopted two years ago when I offered it to the McNary-Haugen bill of that date. According to the testimony of the packers who appeared before us in connection with the packing houses and stock yards, they keep somewhere from $150,000,000 to $200,000,000 value in food and meat products on hand. If you put an equalization fee on live cattle and live pork, and the bill has the effect you think it will have, it will raise the price of those cattle and swine, let us say, for example, 2 or 3 cents per pound. I do not know that it will have that effect, but that is the hope of the bill. If it does, $200,000,000 worth of packers' products on hand in storage warehouses will be increased in value many millions of dollars. My amendment provides that when you levy an equalization fee on the cattle and on the swine there shall be levied a similar fee of not less than the same amount per pound upon the stock held in storage by the packeries and those who engage in wholesale transactions. I exempt the retail dealers because the amount in their hands would be so small that it would not be worth price of collecting.

Mr. Chairman, I think the chairman of the Committee on Agriculture ought to agree to this amendment. After full discussion, this same amendment became attached to and became a part of the bill which passed this House two years ago. The undisputed testimony of the packers themselves when they appeared before the Committee on Agriculture but two years ago was to the effect that they kept on hand constantly and continuously from $150,000,000 to $200,000,000 in value in meat products. Anyone who will stop to think for a moment will see that if they have $150,000,000 in value in meat products, when a fee is levied on the cattle owner and on the hog owner and it is not levied on the processed product then on hand and in the storage warehouses, which my amendment covers, you will present to the packers from $20,000,000 to $30,000,000 as a present at the expense of the farmer-stockman. Do you think that is right?

Mr. CRISP. Mr. Chairman, will the gentleman yield?

Mr. JONES. Yes.

Mr. CRISP. I am in sympathy with the gentleman's amendment. Can the gentleman tell the committee whether or not the Committee on Agriculture considered it; and if so, why it was not included in the bill?

Mr. JONES. I do not know why it was not included in this measure.

Mr. ADKINS. There was not anything that was not talked over in the committee.

Mr. JONES. I do not know whether it was or not; it was not considered while I was there; and I do not think this was considered in the committee.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in five minutes.

Mr. LaGUARDIA. Mr. Chairman, I have two amendments which I want to offer.

Mr. LANKFORD. And I have an amendment which I want to offer.

Mr. EDWARDS. I suggest that the gentleman make it one hour.

Mr. HAUGEN. Mr. Chairman, I will make it 10 minutes.

Mr. CHINDBLOM. Mr. Chairman, reserving the right to object, I want to know whether there are more things coming in here that were not considered by the committee at the request of the members of the committee.

Mr. HAUGEN. There are none that I know of.

Mr. JONES. Mr. Chairman, I ask for a vote on my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Iowa?

Mr. ASWELL. I object, Mr. Chairman.

Mr. HAUGEN. Then, Mr. Chairman, I move that all debate close in 15 minutes.

The CHAIRMAN. Will the gentleman from Iowa withhold his motion until a vote is taken on the Jones amendment?

Mr. HAUGEN. I will.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas.

The question was taken; and on a division (demanded by Mr. JONES) there were—ayes 121, noes 54.

So the amendment was agreed to.

Mr. HAUGEN. Mr. Chairman, I move that all debate on this section and all amendments thereto close in 15 minutes.

Mr. ASWELL. I hope that motion will not be adopted.

The CHAIRMAN. The question is on agreeing to the motion made by the gentleman from Iowa.

The motion was agreed to.

Mr. NEWTON. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Minnesota offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. NEWTON: Page 47, line 3, after the word "agreements" strike out the rest of the line, and all of lines 4, 5, 6, and 7.

Mr. NEWTON. Mr. Chairman, this is the fourth time that Congress has had under consideration the so-called McNary-Haugen bill. The first one was in 1924, immediately preceding a presidential election. The second one was in 1926, immediately preceding a congressional election. The third was in 1927, when plans were being made for the presidential election the coming year. This, the fourth bill, is presented to us in 1928, during a preconvention presidential campaign and immediately preceding another presidential election. I voted against each and every one of the preceding McNary-Haugen bills, because they involved governmental price fixing of certain commodities and otherwise projected the Government into business, violated other economic laws, and, in addition, were unquestionably unconstitutional.

Following the presidential veto of the 1927 Haugen bill, I was in hopes that the Committee on Agriculture would report out a bill this year which was economically sound and in keeping with our Constitution. While I come from a city district, I realize that the people whom I represent appreciate the fact that in a large measure they can not prosper unless there is prosperity in the large farming community which they serve. There can be no question but what there has been a slump in agriculture, which commenced either late in 1920 or in the summer of 1921. There can be no question but what there has been a marked improvement in the condition of agriculture since this slump. This improvement can be traced, in part, to the operation of economic laws, while some of the improvement can be justly credited to at least some of the 23 laws, including the emergency tariff act of 1921 and the Fordney-McCumber Protective Tariff Act of 1922, which Congress has passed in an endeavor to improve the situation. Every effort, therefore, should be put forth, which can legitimately be put forth, to still further improve the situation.

However, if we are going to be frank with ourselves and with the country, we must recognize a limitation surrounding any attempt to cure economic ills by statutory enactments.

INFLATION OF FARM VALUES

For example—and I shall only enumerate several factors—Congress can not restore land values which in fact never existed. The farmer has experienced in the past 15 years, first, an inflation of farm-land values, and then later a substantial deflation. According to figures given in the Government census of 1910, the average sales value of farms in Minnesota was $36 per acre; in 1920 that had been increased to $90 per acre. In the State of Iowa the advance was from an average of $82 per acre in 1910 to $200 per acre in 1920. Under the natural stimulus of

increasing values there was much buying and selling of land. Generally this involved a cash payment for a portion of the purchase price, with a mortgage, and a very substantial one, for the balance. As a result total farm indebtedness jumped from $1,750,000,000 in 1910 to $4,000,000,000 in 1920. This, of course, resulted in not only substantially increasing the farmers' indebtedness but his investment, rate of interest, and general overhead as well. I submit that there is nothing that we can do in a legislative way which will put back those values which in fact never existed. Some one has to take a loss.

POOR FARMING

There has been some poor farming in this country of ours; land has been put too often to one crop. Scientific principles of crop rotation have not been followed. As a result the average yield per acre in certain portions of the country is substantially less than what it would have been if better farming methods had prevailed. Congress can not put back fertility into an impoverished soil nor make a good farmer out of a poor one, nor an ambitious or industrious farmer out of a lazy one.

INCREASED TAXES

During the inflation period taxes on farms were greatly increased. The farmer's overhead expenses were thereby multiplied. He must pay his taxes in cash. It must be apparent that an increase in taxes has a more far-reaching effect upon the farmer than that of the man engaged in other lines of business. Notwithstanding the deflation there has been no appreciable decrease in taxes. In 1913 farmers of the United States were paying in direct taxes for State and local purposes $315,000,000. In 1922 they were paying $861,000,000. This constitutes an increase of 175 per cent. It is apparent that a much greater percentage of his income is now payable in taxes than was the case during the pre-war period. These taxes are not paid to the Federal Government. Generally speaking, the farmer pays practically no direct taxes to the Federal Government. These taxes are levied by States, counties, and so forth. It is, of course, perfectly obvious that Congress can not do anything to meet that kind of a situation.

Some of the people who have been advocating this type of farm-relief legislation to the exclusion of all others might well devote some of their time and energy to the study of State and local taxation and the farmer, with the idea of finding out whether there should not be a readjustment of State and local tax burdens.

WHAT WE CAN DO

However, Mr. Chairman, we can enact legislation which will tend to relieve, at least in part, some of the difficulties confronting agriculture and the country during this period of readjustment. I have the time to refer to them but briefly. For example:

First. Transportation costs have substantially increased during the last 10 years. This has been due to substantial increases in the cost of materials and to substantial wage increases to employees. Ours is a country of magnificent distances. Any increase in transportation costs has its inevitable effect upon products of factory and farm. This is particularly true of the farm, because, generally speaking, the farmer is farther away from the points of consumption. Every legitimate effort should be put forth to lessen transportation rates. In view of the substantial increase in the cost of doing business, it is doubtful whether railroad freight rates on farm products can be substantially lessened. I hope, however, that some reduction can be made under the proceedings now pending before the Interstate Commerce Commission. There is a way out for us, however, if we will hasten the development of our inland waterways, including the Great Lakes-St. Lawrence Waterway project and the extension of the present barge line service upon the Mississippi River and its tributaries so that it can handle much greater tonnage of farm products. For example, wheat for export can be sent to Liverpool via the Mississippi River and the port of New Orleans for 10 cents less—that is, from the Northwest—than the present rail-lake and rail route via New York to Liverpool.

Second. The farmer is receiving very substantial benefits under existing protective-tariff legislation. Ninety-five per cent of the food products produced in this country are consumed in this country. When the Fordney-McCumber tariff bill was under consideration, Congress practically let the farmers write their own schedules. As a result the farmer enjoys the benefit of the substantial protection of this great domestic market. You will find that the imports of farm products are negligible, excepting as to a few commodities. The value even as to those commodities in dollars and cents is infinitesimal compared to the value of all of the farm products produced in this country. It must be apparent, therefore, that he is receiving very substantial benefits from the protective tariff. No greater misstatement of the facts could be made than that the farmer buys in a protective market and sells in a free market.

Third. For the time being we should stop spending Government moneys for reclaiming lands in order to produce a greater surplus. This should be apparent to all, yet some of the proponents of the McNary-Haugen bill, both in and out of Congress, are advocating the expenditure by the Government of millions upon millions of dollars to develop further reclamation projects in the West. The effect of the development of these projects would be to increase acreage substantially and to greatly increase the surplus. It is estimated that one of these projects will cost $350,000,000; the others will involve an expenditure ranging all the way from $175,000,000 to $250,000,000.

Fourth. There are those who have studied this question who are of the opinion that some sort of a governmental agency should be formed for the purpose of stabilizing the market in a given commodity whenever there is an abnormal surplus. The President has recommended this. If such an effort is made, a great deal of care would have to be exercised by that agency in order not to stimulate overproduction and thereby aggravate existing difficulties. In my judgment the efforts of such an agency should be confined to the disposition of an abnormal or seasonal surplus.

Mr. Chairman, it must be apparent to any who have examined this measure that this bill, like all of its predecessors, does not meet the situation at all. It only attempts to deal with a surplus; it does not attempt to remove any of the causes, but confines itself to removing the consequence or effect produced by certain causes which it does not attempt, in any way, to remove. Furthermore, in dealing with effects and consequences, it does so in such a manner as to aggravate the problem by increasing the surplus. I submit that any measure to relieve the farmer should conform to the Constitution, be economically sound, practical in operation, and be reasonably certain to improve, rather than aggravate, existing conditions.

The measure before us does not meet any one of these tests. To enact it into law would be to injure rather than to help the farmer. The improvement which has been going on for the past several years would be stopped. There is grave danger that the scheme proposed would revolutionize our entire marketing and distributing systems. There is no way of fully predicting its probable consequences.

GENERAL PROVISIONS

Mr. Chairman, briefly stated, the present McNary-Haugen bill in its fundamental principles is substantially the same as the 1926 and 1927 bills. It seeks to raise the price of any agricultural commodity whenever there is an exportable surplus or a surplus in excess of the requirements for orderly marketing, so that the domestic price received by the farmer will be substantially higher than the world's price. Under the bill, as it has been amended by the Kincheloe amendment, this domestic price can be fixed at any figure which the Federal farm board may set, subject only to approval by a commodity advisory council. The Federal farm board is composed of 12 members appointed by the President. They receive a salary of $10,000 per year. There is a commodity advisory council for each commodity that is proposed to be controlled; there are seven members on each commodity council—these members are selected by the board, but only from lists submitted by farm organizations. Members of these councils are paid $20 per day when attending meetings of the councils and when otherwise engaged upon their duties. In addition, they receive their expenses. Once the control of a given commodity has been instituted by the Federal farm board and approved by the commodity council of that commodity, the control can not be terminated in any way whatsoever, excepting by the consent of the commodity council. This, notwithstanding how high the price may be or what conditions may result. I shall refer to this latter aspect later.

With the idea of raising the domestic price to at least a point where it will equal the world's price, plus the tariff, the Federal farm board is authorized and directed to contract with farm organizations, or otherwise, for the purchase and withholding for sale, or purchase and sale, or purchase and manufacture of the probable surplus over domestic needs at whatever increased price the Federal farm board may fix. They are then to dispose of the surplus or the manufactured produce thereof abroad at whatever price can be obtained for it. This price would, of course, generally speaking, be substantially less than what was paid for it. That is admitted. This would involve a substantial loss. The bill contemplates this and provides that losses incurred in purchasing and sale abroad, or in purchasing and manufacturing and sale abroad, would be paid for in the first instance by money in the Treasury; $400,000,000 is authorized to be set aside for that purpose. Eventually these losses are to be paid from a replenishment of this

stabilization fund. This will be obtained from the collecting of a so-called "equalization fee" or tax from every unit of the commodity sold. For example, upon every bushel of wheat sold an equalization fee or tax would be collected. To illustrate: The average crop of wheat in this country is 800,000,000 bushels per year. The domestic consumption is 600,000,000 bushels. The average surplus is about 200,000,000 bushels. It would be the duty of the Federal farm board under this act to make arrangements with farm organizations, or otherwise, for the purchase of this surplus and its sale abroad either as wheat or as flour. For the purposes of illustration we will assume that the domestic price of wheat is $1.50 and that the world's price is $1.50. The tariff duty is 42 cents per bushel. The freight by lake and rail from Port Arthur to Minneapolis is about 8 cents per bushel.

The total is $2. The purpose is to purchase the surplus wheat in the domestic market and sell it abroad for whatever price can be obtained, even if it depresses the world market. In that event there would be only enough wheat left in the country for our own needs. The domestic price would then rise to the level of the world's price, plus the tariff duty, plus the freight, which, according to the illustration, would be $2. That is the theory of the bill. In this way it is claimed that the farmer can only receive the full benefit of the tariff on a commodity where he produces an exportable surplus. So far as I know, there is no producer of any commodity, farmer or manufacturer, who produces a surplus beyond domestic requirements who receives the full benefit of protection if his production is not gauged by the world's demand. However, this is the theory of the bill, and it is on that theory that we are discussing it.

In my judgment the theory of the bill is economically unsound, the plan of operation is impractical, and the general scheme is unconstitutional. I shall briefly summarize my several objections, as follows:

STIMULATES OVERPRODUCTION

First. Like its predecessors, this bill would stimulate overproduction. Take wheat, for example, it will be apparent from a reading of the scheme that the farmer is given to understand that through this plan he will be able to realize a substantial additional price for his wheat. He is now producing a surplus. The consumption of wheat to-day is about 25 per cent less per capita in this country than it was 25 years ago. This scheme leads him to believe that notwithstanding the fact that he is now producing a surplus, that somehow, in some way, he is going to be able to avoid the consequences of overproduction of a commodity. With this thought in mind there can be no question that he will undoubtedly put more acres into wheat. High prices of wheat one year have almost invariably produced increased acreage the following year.

It is inevitable that this scheme will add to the number of bushels raised, thereby increasing the surplus. It is true, the board is given the power to "advise" the farmers about their planting. You will note, however, that it is merely advice. What will the farmer generally follow—the advice of the board or the invitation in the bill to increase acreage in order to realize upon the advanced price? To ask the question is to answer it. It is obvious, or at least it should be obvious, that you can not meet a situation calling for disposition of a surplus by adding to that surplus.

PUTS GOVERNMENT INTO BUSINESS

Second. This bill projects the Government into business on a tremendous scale. It embraces "any agricultural commodity." The previous bills to which I have referred limited the control to particular commodities. These commodities were set forth. This bill confers this power over any commodity. Unless the bill should be amended in conference to exclude fruits, vegetables, and beef, it will take in any commodity. The Federal farm board is created with authority to appoint without limit, employees and experts and fix their salaries. The board is to have authority whenever it finds a seasonal or normal surplus in any commodity to put this control of the marketing of this commodity into operation. This is to be done and, as I have indicated, the losses, costs, and charges involved in the sale of the commodity or in the manufacture thereof, or in the sale of the manufactures thereof abroad, are to be paid for out of this so-called stabilization fund. Like its predecessors, the bill does not say whether the agency of the Federal farm board is to commence buying wheat, for example, at the then market price, thereby gradually causing the price to rise until it finally reaches the figure that the board thinks the American consumer should pay, or whether this agency is to go into the market immediately, and buy up the surplus at a price to be fixed by the Federal farm board.

In either case it is governmental price fixing. If the latter plan is used every seller of wheat will be treated fairly; the man who has to sell early would obtain the same price as if he had been able to hold it until the price had reached the maximum. If the former plan is used, the man who has to sell early will not get the benefit of any material advance in price. However, he will have to pay the same kind of an equalization fee that his more fortunate competitor will have to pay. In other words, the farmer with limited capital and with debts to pay will have to market early with but an immaterial increase in price, and he will have to pay the same equalization fee as his more fortunate neighbor who does not have to market early. I have never yet been able to get one of the proponents of this scheme to agree with another proponent as to just what plan will be carried out.

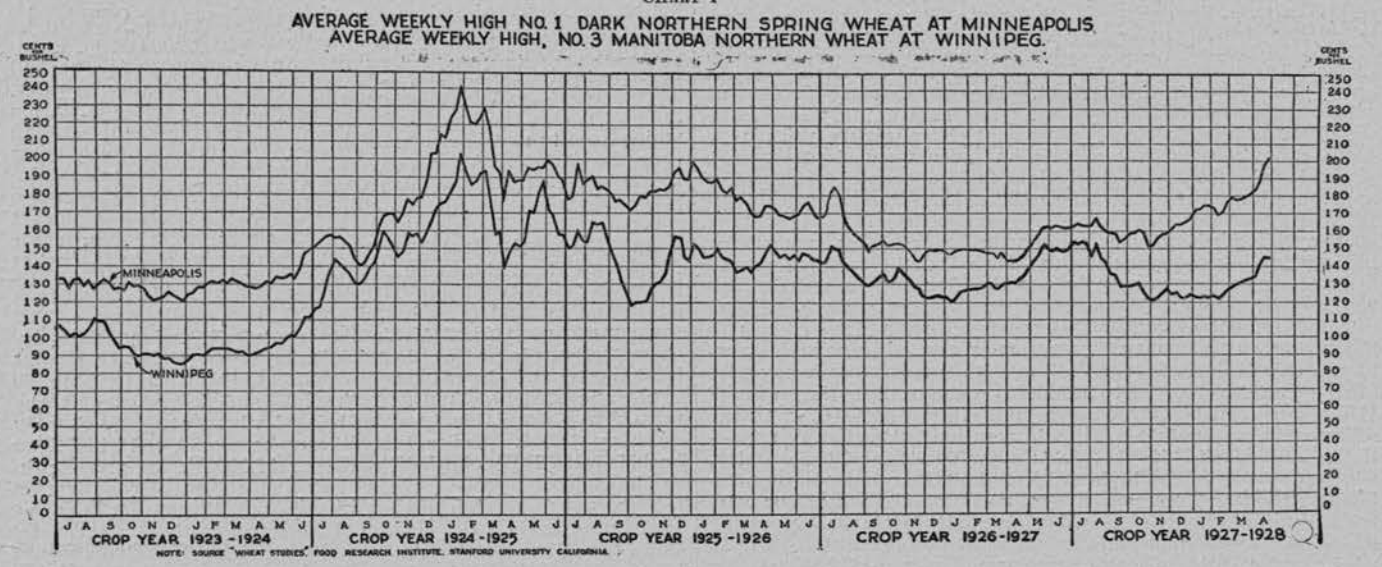
DISCRIMINATION AGAINST SPRING WHEAT

Third. This bill discriminates particularly against the hard spring wheat farmer. The hard spring wheat farmer is already getting very substantial benefits from the present tariff duty on wheat which is 42 cents per bushel. There is very little Canadian wheat coming into this country. This is due to the tariff wall. You will recall that one year ago in a debate on the then Haugen bill I produced certain charts showing the difference on comparable grains—hard spring wheat—between the Winnipeg market and the Minneapolis market. These charts covered a three-year period of 157 weeks and showed the average weekly high price on No. 1 dark northern at Minneapolis and the average weekly high price of No. 3 Manitoba northern at Winnipeg. These are comparable grades and so recognized by leading authorities, including the Minnesota Railroad and Warehouse Commission. The average over the Winnipeg price the first year was 34.2 cents. In the second year—Canada had a crop failure that year—it was 26.15 cents; the last year it was 36.42 cents.

In 72 weeks out of 157 the differential in favor of Minneapolis was over 35 cents. During the year 1925 to 1926, the Minneapolis price was in excess of the Winnipeg price by 40 cents in 20 weeks, by 35 cents in 29 weeks, and by 30 cents in 34 weeks. During 121 weeks out of the 157 weeks the Minneapolis market was over the Winnipeg market by over 25 cents. Its average throughout the period was about 30 cents in favor of the Minneapolis market. There can be no question, therefore, but what the hard spring wheat farmer received very substantial protection during that period by reason of the protective-tariff duty upon wheat; neither can there be any question but what the equalization fee would not have worked during that period, simply because—that is, as to hard spring wheat—the Minneapolis cash market averaged so well above the Winnipeg market.

Mr. BURTNESS. Will the gentleman yield for a short question?

Mr. NEWTON. Yes.



Mr. BURTNESS. What has been the situation during the past year with reference to the Winnipeg market and the Minneapolis market?

Mr. NEWTON. That is what I want to show by the exhibit which I have here.

This exhibit is a continuance of the exhibit used by me one year ago and covering crop years 1923 to 1926, inclusive. Note on this exhibit, or Chart I, the crop year 1926–27. The difference in favor of the Minneapolis market during the fore part of the year was 30 cents; there were fluctuations throughout the year and at one time it was about 12 cents. Now, note the crop year 1927–28; the table shows the weekly average closing prices of both markets; the difference in favor of Minneapolis since January 1 this year is practically 50 cents per bushel. In other words, it is the tariff of 42 cents plus the freight from Port Arthur to Minneapolis.

The average difference in favor of the Minneapolis market during this current crop year throughout the entire period from July 4 to April 28, inclusive, is about 40 cents per bushel. This is not the futures market, gentlemen; this is the cash market. There is not anything speculative about this—this is actual wheat sold for actual cash, for which actual money is paid. Minneapolis is a cash market. It is a great milling center. We handle there on the average throughout a given year about 175,000,000 bushels of wheat. The actual cash transactions involve that many bushels of wheat. It is the good wheat that commands the high price; it is the good or the high price that brings the good high protein American wheat to that market and which sends Canadian wheat over the border. It is the tariff of 42 cents which protects the northwestern spring-wheat farmer against this invasion of his Canadian competitor. It must be apparent, therefore, that the hard spring-wheat farmer is already deriving substantial benefits from this tariff on wheat. It should also be apparent from these figures that if the McNary-Haugen bill had been in operation away back in 1924, or say in 1927, that the hard spring-wheat farmer could not

CHART I

have benefited therefrom even if the scheme had worked generally throughout the country.

I have used cash wheat for comparison, because that is a fairer basis for comparison than the futures market of Winnipeg and Minneapolis. Winnipeg future prices are based upon Manitoba No. 1 Northern wheat as a contract grade. Minneapolis future prices are based upon Minnesota No. 1 Northern grade. While both these contract grades are called No. 1 Northern, they are similar in no respect except the name. Manitoba No. 1 Northern wheat is very much superior in its protein content and milling value than Minnesota No. 1 Northern.

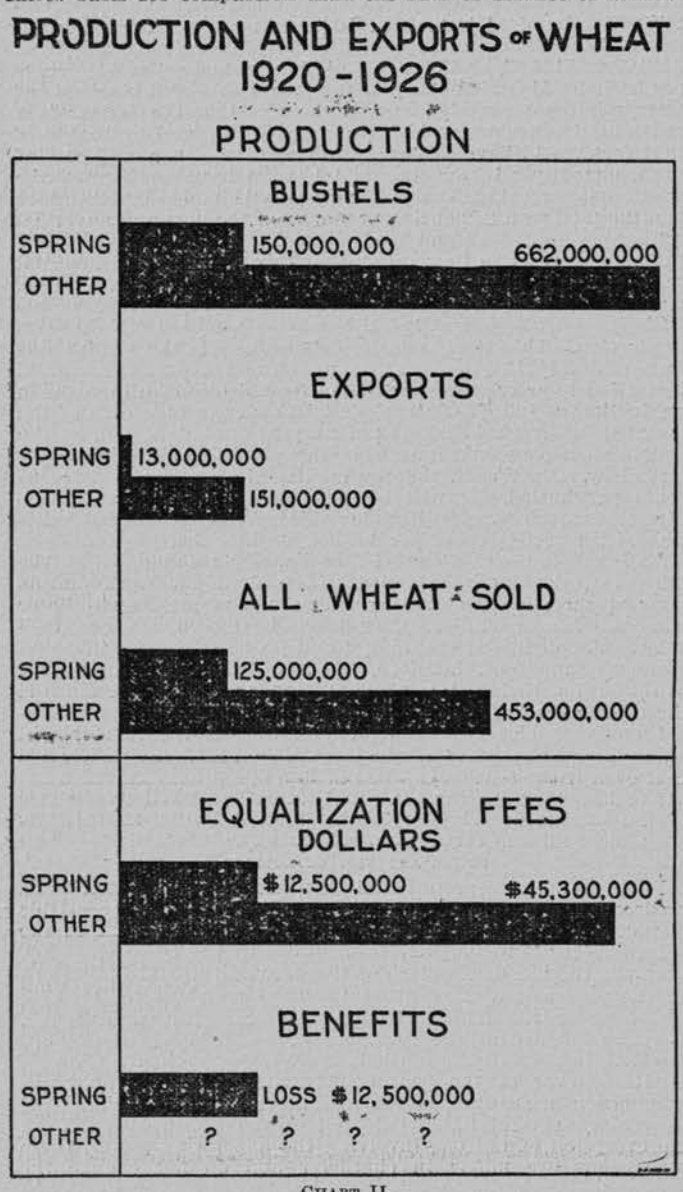


CHART II

The inspection of Manitoba No. 1 Northern wheat requires higher test wheat and represents in fact only a small percentage of the wheat which passes into Winnipeg. The comparable grades are Canadian No. 3 Northern wheat with our choice No. 1 Dark Northern wheat. Winnipeg future price is based upon the average quality of No. 1 Manitoba Northern, while the Minneapolis future price is based upon the poorest quality of Minnesota No. 1 Northern wheat. It is apparent, therefore, that the No. 1 grades are not comparable. This also should be taken into consideration in comparing prices between Minneapolis and Winnipeg. The Winnipeg prices are not based upon delivery at Winnipeg, but delivery at Fort William or Port Arthur. These are points on Lake Superior approximately 400 miles east of Winnipeg. The all-rail export rate from these ports to Quebec is 10 cents per bushel less than the all-rail export rate from Minneapolis to New York. In other words, the Winnipeg futures price is based upon delivery at a point 400 miles east of Winnipeg at 10 cents per bushel closer to the world's markets than Minneapolis.

I shall now show this other exhibit, or Chart II, before us, covering production and exports of wheat of all kinds for the period 1920–1926, inclusive, why the hard spring-wheat farmer can not benefit from this scheme. The average annual production of wheat in the United States during that period was 812,000,000 bushels. The average annual spring wheat production during this period was 150,000,000 bushels. So much for that part of the chart pertaining to production. The average annual exports of wheat of all kinds during that period was 164,000,000 bushels. Of this total only 13,000,000 bushels was spring wheat, while 151,000,000 bushels was other wheat. In other words, less than 10 per cent of the spring wheat crop found its way across the sea—that is, less than 10 per cent of the spring wheat produced is exported, while about 25 per cent of our other wheat was exported.

It is apparent, therefore, that there is very little of spring wheat sold abroad. Most of it is consumed in this country. I have just shown that the spring wheat farmer is deriving already substantial benefits from the protective tariff on wheat. He is selling such a small percentage of his hard wheat abroad that he is only incidentally interested in exporting his product.

Proceeding further with Chart II: Not all the wheat that is produced in this country goes to market. Some of it is consumed on the farm. I am assuming that out of about 150,000,000 bushels of spring wheat that is produced here on the average, about 125,000,000 bushels is marketed and the remainder is consumed for one purpose or another on the farms. Some of it, of course, is seed wheat. I am also assuming that of the other wheat about 453,000,000 out of the 662,000,000 bushels finds its way to the domestic or export market. Let us assume that the equalization fee is 10 cents per bushel. The spring wheat farmer would, therefore, pay to the stabilization fund $12,500,000. He would pay the same equalization fee as would the

farmer who produced largely for export. If this scheme works, the farmer who produced for export would stand to have the price for his particular wheat, which is consumed in this country, increased to a figure where it would at least equal the world's price, plus the tariff and freight. The spring wheat farmer, as I have shown, already receives a price substantially above the world's price and at least approaching the world's price, plus the tariff. In some instances it has even reached the world's price plus the tariff and the freight to Minneapolis. It must be apparent, therefore, that when the spring-wheat farmer pays in by way of an equalization fee $12,500,000 he is making a contribution to the farmer raising the other kind of wheat, for he is paying an equalization fee for which he receives practically no benefit whatever; the benefit, if there is a benefit, goes to the other fellow.

This payment of $12,500,000 is, therefore, a distinct loss to the spring-wheat farmer. Therefore, I ask, what possible benefit can this McNary-Haugen bill give to the farmers in my part of the country who are producing this hard spring wheat? What benefit will they receive from this scheme even if the scheme can be put into practical operation? Practically none—the benefit goes to the farmer in other portions of the country, who by reason of the higher prices during or immediately following the war, commenced again to produce wheat, or who opened up new land in the West or Southwest, thereby putting thousands upon thousands of increased acreage into winter wheat. The spring-wheat farmer would pay in $12,500,000 for which he receives practically no benefit, while the other wheat farmer would pay in $45,000,000 and receive practically all of whatever benefit there was.

Mr. BURTNESS. Will the gentleman yield for a question with reference to the tariff?

Mr. NEWTON. I regret that my time is limited.

PRACTICAL EFFECTS

Fourth. The farmer is not only a producer but a consumer. He and his family constitute about 30 per cent of the consuming population of the country. As a consumer it must be perfectly apparent to us all that if the scheme did work and the price was advanced then he as a part of the consuming public would have to stand his share of the advance in living costs. Let us assume that the world's price of wheat is $1.50 per bushel and the domestic price is $1.50 per bushel. This plus the tariff and freight is $2 per bushel; that the total production of wheat is 800,000,000 bushels during the year and that the domestic consumption is 600,000,000 that year. This would leave a surplus of 200,000,000 bushels. It will be agreed by all, I think, that this is a fair average.

We will now assume that the control is put into effect and the surplus is purchased—200,000,000 bushels at $2 per bushel would amount to $400,000,000. This would, of course, have to be sold abroad at whatever price could be obtained for it. Let us assume that the price obtained is the then world's price of $1.50 per bushel. This is allowing nothing whatever for a depression in the price which might be caused abroad by knowledge that the surplus would be marketed abroad for whatever could be obtained for it. Two hundred million bushels, sold at $1.50 per bushel, would bring in $300,000,000. This would show a loss in the transaction amounting to $100,000,000. This money would in the first instance come out of the Treasury, unless the Treasury moneys were replenished by the collection of the equalization fee. An equalization fee of 16⅔ cents per bushel would have to be levied on all wheat sold. About 25 per cent of the wheat produced in this country is not marketed, but is consumed upon the farms. I think the figure would go slightly above that. I would figure about as follows:

| | Bushels |
|---|---|
| For seed | 80,000,000 |
| For chicken feed | 30,000,000 |
| For mill feed | 120,000,000 |
| Total | 230,000,000 |

The above quantity, if consumed upon the farm and not thereby going into channels of trade, would not have to pay the equalization fee. This would leave approximately 570,000,000 bushels to pay the equalization fee. That would bring in nearly $100,000,000; that would just be enough to take care of the loss. It would allow nothing for expenses or anything of that character. However, he gets on the wheat sold in this country, which is 370,000,000 bushels, 50 cents a bushel more for his wheat. This would appear to be a difference in his favor of 34⅓ cents per bushel. Therefore, would it not pay? Let us see.

After deducting the approximately 230,000,000 bushels consumed on the farm, and the 200,000,000 bushels which is sold abroad, we have remaining about 370,000,000 bushels of wheat which are marketed and consumed in this country. Of this, the farmer as a consumer would undoubtedly consume 30 per cent, or 110,000,000 bushels. This would leave 290,000,000 bushels to be consumed for domestic purposes by the rest of the country. Therefore, it must be apparent that the farmer will pay out of his own pocket the increased price on all but 290,000,000 bushels which goes to and is consumed by the domestic consumer, other than the farmer. As a matter of fact, it will be observed that he consumes a greater percentage than that consumed by the other domestic consumers for the obvious reason that he has a consumption not common to the others; that is, for seed, and so forth. Let me illustrate: Here is a farmer raising 1,000 bushels of wheat. We will assume that the world price is $1.50 and the domestic price is $1.50. The McNary-Haugen bill becomes a law. The Federal farm board and the commodity council put the control into effect. Marketing agreements are made to purchase the surplus. The domestic price is thereby raised to at least the sum of $2 per bushel, which is the world price plus the tariff and freight. Without the bill and its provisions the farmer would sell his 1,000 bushels of wheat at $1.50, thereby realizing $1,500. Under this scheme he would sell this 1,000 bushels at $2 per bushel, realizing $2,000. The gross gain would amount to $500. We will assume the same equalization fee which has heretofore been used in my illustration; that is, 16⅔ cents per bushel. He would have to pay this on each and every bushel marketed—this would cost him $83.33. This would leave a theoretical net gain on the transaction of $416.67.

However, in practice we have seen that this farmer would consume in seed, mill feed, chicken feed, and flour a little over one-half of his 1,000 bushels. For this he would pay on the basis of the new domestic price of $2 along with other consumers. Five hundred bushels at 50 cents more per bushel would mean $250. This would reduce the above theoretical profit from $416.67 to $166.67, or 16⅔ cents per bushel instead of 34⅓ cents per bushel. Most, if not all, of the proponents of this scheme of farm relief have wholly ignored the fact that the farmer is a substantial consumer of his own commodities, and by reason of that fact would have to bear his share of the increased cost of the commodity. In figuring as I have, I have not figured the additional percentage that will naturally be added by the miller and the feed man in figuring profits upon the new and advanced selling price on flour and feed. I am, of course, assuming for the purposes of this illustration that this intricate and involved scheme can be worked out in a practical manner. Furthermore, my illustration is based upon the normal surplus of 200,000,000 bushels. I have shown that this scheme would stimulate overproduction. This would add to the surplus. If the surplus was increased only 12½ per cent by reason of this stimulation and invitation to grow more wheat, that would mean an increase in production of 100,000,000 bushels. In order to take care of the losses in selling this additional surplus abroad at a loss, the equalization fee would have to be increased from 16⅔ cents per bushel by 50 per cent, thereby making the equalization fee 25 cents per bushel. It will be seen that this would cut this farmer's margin of profit, under this scheme, from 16⅔ cents per bushel to 8⅓ cents per bushel, or less than 10 cents per bushel net increase. That is, of course, assuming that the scheme works out as planned. If it does not work out as planned, there is no estimating what the consequences will be or what this farmer will lose. My figures have been conservative—I have not deducted anything for depressing the world price. It must be apparent, therefore, that under the scheme the farmer can profit but little if it works, and stands ready to lose much if these theorists are wrong.

I am very clearly of the opinion that if the farmer will study this question carefully he will come to the conclusion that even if the scheme can be put into operation that the benefits to him after paying the equalization fee, paying his share of the increased cost of operation and of living, the benefits are almost nil and certainly problematical.

OTHER AND NEW OBJECTIONS

Fifth. In some respects I said that this bill was better than its predecessors and in some respects worse. It is better in this respect that it has been drawn so as to meet several of the objections made to the 1927 Haugen bill by the President. For example, the bill does not place the unconstitutional limitations on the present power of appointment of members to the Federal farm board. This provision was clearly unconstitutional. That was denied at the time, but seems to be apparent now. The new bill omits the rather cumbersome method of invoking the power of the board. It prohibits unreasonable discrimination in granting marketing agreements and it limits the Government's total liability to not exceed $400,000,000. With the exception of the one involving the appointing power, these concessions are minor in character and do not change the

measure materially. It is to be regretted that the committee did not endeavor to meet the President's criticisms on other points. For example, they have left in the equalization fee, which is economically unsound and which can not be levied or collected constitutionally. The present bill is far more objectionable than any of its predecessors in reference to the widening of the authority of the board. I have already pointed out that the board has jurisdiction to put this governmental control into effect upon any agricultural commodity. This means the setting up of a potential bureaucracy far more powerful and far more unbridled than that which any of the other bills would have created. Furthermore, the way the other bills were drawn there was an automatic limitation upon the Federal farm board in the fixing of prices on any of these commodities. If they got the price up above that of the world's price plus the tariff, then commodities could be imported into the country.

This acted as a natural restraint upon the discretionary power of the Federal farm board so as not to fix the price too high. Under this bill the equalization fee is levied not only upon commodities produced and marketed in this country, but on the commodities produced elsewhere and imported into this country. For example, assume the price of wheat in Winnipeg to be $1.50; it is likewise $1.50 in this country. Before the Canadian wheat can enter this country it would have to pay the duty of 42 cents per bushel. This would make the price to the American importer $1.92. If the Federal farm board got the price up over $1.92, Canadian wheat would come in here and thereby keep the price down to that figure. Under the present bill wheat imports would have to pay an equalization fee. The importer of Canadian wheat would have to pay not $1.92, but that price plus an equalization fee of, say, 15 cents, or $2.07 per bushel. The board could then run the price of wheat up to $2.07, and if they wanted to run it up further all they would have to do would be to raise the equalization fee, say, to 25 cents, and then the importer would have to pay $2.17 to bring wheat in here. What I have said as to wheat would, of course, be true as to all other commodities. Therefore we have Congress creating a Federal farm board with absolute power to fix and control the prices of any agricultural commodity without restraint or restriction whatever. Therefore I again say that in some respects this bill is worse than any of its predecessors. Such power over prices of the necessities of life should never be left unrestrained or unrestricted in any man or group of men in the Government or outside the Government.

UNCONSTITUTIONALITY

Sixth. I have been discussing economic principles and have analyzed certain features of the bills. As I have already said, this bill is, in my judgment, unconstitutional. First, there is the levying of an equalization fee or tax. This is to be levied by the Federal farm board providing the commodity council approves, and for as long a period as the commodity council desires it to remain. Under the Constitution only Congress has the power to tax. This is a tax, notwithstanding that it is called an equalization fee. We have always claimed it to be a tax. That originally was admitted by the proponents of the bill; it was later denied when the constitutional question was raised.

It will be observed that the present bill levies this fee on every import of the commodity controlled; it is to be levied in addition to the regular import duty. For example, wheat imports would have to pay not only the tariff duty of 42 cents but whatever equalization fee was levied by the board. When the board and the council determined upon increasing the fee the imported commodity would have to pay the additional tax. Congress can not delegate the tax-making power unless it prescribes a well-defined rule and standard for doing so. This it has not done, and in the nature of things it could not do. Of the several unconstitutional features referred to by the President in his veto message last year but one of them has been removed. That I have already referred to. In my judgment the nonpremium insurance provisions—a new feature—is not only grossly unfair but unconstitutional in that it deprives certain people of their property without due process of law. Neither does this bill any more than its predecessors bring the levy of an equalization fee under the commerce clause.

EXORBITANT PRICES TO CONSUMER

Seventh. In common with others who have spoken, I have been discussing this question from the viewpoint of the farmer. I have endeavored to show the impracticability of the scheme. It must be apparent that if the scheme is put into operation there would be built up necessarily a vast bureaucratic machine tremendously expensive in itself. There would be the equalization fee to pay; its size or amount would be gauged or measured by the losses sustained in marketing the surplus abroad at considerably less than what the commodity would sell for in this country. I have endeavored to show how little likelihood there would be, even if the scheme were practical of operation, of ultimately benefiting the farmer.

However, we must recognize the fact that there are others to be considered beside the farmer. At some time in the course of this discussion something should be said for the consumer as well. What about that vast army of wage earners? What about the thousands and thousands of workmen in our towns and cities and villages who with their dependents consume such a substantial portion of the products of the farm? How are they going to fare if this scheme is practical and can be put into operation? What is it going to cost this workman and his wife and children? This is admittedly a scheme to raise the domestic price upon any farm commodity in this country. In order to successfully do this the Federal farm board is given authority in its discretion and through its agents to buy up this surplus or any portion of the commodity produced and sell it abroad for whatever can be obtained for it. How much will the price of wheat be raised? If the price of wheat is raised, that will be immediately reflected in an increase in the price of flour. The American housewife uses 65,000,000 barrels of flour annually. There are about 4¾ bushels of wheat in a barrel. This means approximately 300,000,000 bushels of wheat that are used directly by the American housewife made into bread, and so forth. What about the price of corn? How much is that to be raised? Corn is fed to hogs. If the price of corn is raised substantially, that, of course, will be immediately reflected in the price of pork. What about the price of mutton and lamb, poultry, butter, and eggs? How much are the prices of these commodities to be raised if this McNary-Haugen plan goes into operation?

Mr. Chairman, fortunately, we are not in the dark about this. The so-called Corn Belt Committee, which has been most active in directing the fight to put over the McNary-Haugen bill, at Des Moines, Iowa, July 21, 1926, unanimously adopted a resolution claiming that the actual cost of producing certain farm commodities in Iowa was as follows:

| | | |
|---|---|---|
| Corn | per bushel | $1.42 |
| Oats | do | .79 |
| Wheat | do | 2.49 |
| Hay | per ton | 21.44 |
| Hogs (on the hoof) | per hundred | 16.32 |
| Veal (on the hoof) | do | 17.82 |
| Wool | per pound | .65 |
| Lambs (on the hoof) | per hundred | 20.45 |
| Chickens | per pound | .28 |
| Butterfat | do | .98 |
| Eggs | per dozen | .61 |

The so-called cost of producing a bushel of corn in Illinois was $1.43; in Nebraska, $1.40; in Minnesota, $1.41; in North Dakota and Wisconsin, $1.42. If it costs $2.49 to produce a bushel of wheat, those people who have been advocating this Haugen bill, once it is put into effect, will at least insist upon operating this scheme until the price at least reaches what they claim is the actual cost of production, or $2.49 per bushel. That figure is considerably in excess of the average price of wheat during the past several years. One dollar and forty-two cents, the claimed cost of producing a bushel of corn, is far in excess of what most farmers know is the cost of production. I want you to compare the above figures with the average farm prices during the years 1920 to 1926, inclusive. This table is made up of figures obtained from the Department of Agriculture Yearbook for 1926 and will be found at the top of the following page.

By comparing the average of these years from 1922 to 1926, inclusive, which are the normal years, you will observe that corn would have to be increased 75 per cent; oats, 100 per cent; wheat, 100 per cent; hogs, 75 per cent; veal, 100 per cent; wool, nearly 100 per cent; lambs, 200 per cent; chickens, 50 per cent; eggs, over 100 per cent; and butter, over 100 per cent.

Bear in mind that these increases will have to be put into effect in order to get what the members of this Corn Belt Committee unanimously found to be the cost of production. They will not be content while prices are below this figure. The consumer in this country, of course, will have to pay this increased price. How is he going to pay it? How can the average wage earner, whether in factory, shop, or office pay any such advance in the cost of living? Of course, he can not do it. In many, many instances any such increase in the prices of these commodities means lessened consumption and undernourishment. Lessened consumption in this country means increasing the surplus that will have to be sold abroad to the European workmen who is competing with the American workman. This increased surplus to sell abroad means still lower prices abroad for the American workman's foreign competitor. This means cheaper

cost of living abroad which means lower manufacturing costs—that means keener competition from the European manufacturers and the product of the European laborers. Under this scheme it is proposed to substantially raise the cost of living in this country, while at the same time we make possible a still lower cost of living abroad. Furthermore, when we increase the surplus to sell abroad at a loss, we thereby automatically necessitate the raising of the equalization fee upon say every bushel

[5] Year beginning Apr. 1.

NOTE.—The Corn Belt Committee price of 98 cents is for butter fat. A comparison of monthly prices of butter and butter fat over several years will show that they run closely together. They do not vary more than a cent or two.

of wheat sold and marketed in this country. That means still further increasing the cost of production here and ultimately increasing the cost to the American consumer. It necessarily creates an endless circle which will constantly expand.

NO LIMIT TO RAISING OF PRICES

Under the preceding Haugen bills there was a limit to which the Federal farm board might raise the price. The moment that the price got above the world price, plus the tariff and freight, the American consumer could import wheat, for example, from Canada. This would automatically prevent the price from ever getting above the Canadian price, plus the tariff duty and plus the freight. Under the present Haugen bill, every unit of a commodity coming in from abroad must pay the same equalization fee as the commodity produced and sold in this country. For example, if the world price was $1.50 on wheat, the importer would have to pay $1.50 plus the tariff of 42 cents, the freight of 8 cents, and the equalization fee, which we fix for the purpose of illustration at 15 cents; that would would make a total of $2.15. Whenever the price of wheat got above that figure, then the American consumer could import wheat from Canada and keep the price at $2.15. However, under the terms of this bill, the Federal farm board could thereupon raise the equalization fee from 15 cents to 25 cents, thereby shutting out any imports from Canada. If the price got up to $2.25, they could again increase the equalization fee and thereby prevent imports coming in from Canada. This could be repeated. In other words, the present bill gives the Federal farm board an absolute and unqualified right to prevent any imports whatever from coming into this country. In other words, it gives them the power to embargo. This power should never be given to any group of 12 men.

Suppose that the scheme is put into effect and the Federal farm board, with the aid and assistance of the commodity council, composed of seven members from farm organizations, should boost the price of any one of these commodities to any unreasonable figure, could not the Federal farm board then terminate the control? No. This particular measure is so drawn that once this control is put into effect by the Federal farm board it can not be terminated without the consent of the commodity council representing that particular commodity. In other words, seven members representing farm organizations interested in growing a particular commodity which is under this control have the absolute veto power to prevent any termination of the control. Gentlemen of the House, such power should never be lodged in any commodity council or in any other group interest of similar character. It is destructive of our institutions. What would anyone think if such a scheme were proposed in reference to coal, for example? Suppose we let a Federal coal board fix the price of coal at what the coal men thought was the price of production, and then not permit that control to be terminated until a commodity coal council, composed of seven coal owners, voted to terminate the control? To ask the question is to answer it.

Mr. Chairman, to sum it all up, the McNary-Haugen bill of 1928 presents a plan of so-called farm relief the unconstitutionality of which is perfectly apparent. This intricate, involved, and unprecedented plan projects the Government into business, provides for governmental price fixing, stimulates overproduction, thereby increasing and aggravating the existing surplus problem, very substantially raises prices to the consumers in this country, and lowers them to the consumers abroad without substantial benefit to the farmer and with the almost certainty of doing him immeasurable harm.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. ADKINS and Mr. LAGUARDIA rose.

Mr. ADKINS. Mr. Chairman and gentlemen, I will be very brief. I did not have any idea that this display would be made here as it was two years ago and the argument made about wheat being higher in Minneapolis than in Winnipeg, because I get the market reports every day from the Daily Trade Bulletin which comes to my desk, and I have taken particular pains to note the price of wheat in Winnipeg, in Duluth, in St. Louis, in Chicago, in Liverpool, and every other trade center in the world. Now, here is the situation with respect to prices on the 25th of last month. I got one of these reports this morning, and when the gentleman made his statement I put my hand in my pocket and found this trade bulletin of April 25, which shows the following prices:

Minneapolis, hard winter wheat, 1.52⅛; Kansas City, 1.51⅞; Winnipeg, 1.54⅛; Liverpool, 1.58⅛.

I have been noticing the prices in the Trade Bulletin every day for the last two months and I have not seen a single instance in which wheat in Minneapolis has been higher than in Winnipeg.

Mr. BURTNESS. Will the gentleman in his time permit me to point out the joker in the figures submitted by the gentleman from Minnesota? The Members will find it in the top line of the statement on the chart:

Average weekly high, No. 1 dark, northern spring wheat, at Minneapolis.

That is not an indication of the weighted average cash price, but the figures that are picked out and put into the red curve there pretending to show a higher price at Minneapolis are a composite of the highest sales upon the market each day, the sale which brings the very highest price on that particular day, of which a weekly average is taken, and on some of those days the premium on that sort of sale amounts to as much as 50 cents per bushel, and does not represent average sales. The only fair comparison is weighted average cash sales.

Mr. ADKINS. And I am sure we can all rely on the prices that are sent out to us in the Daily Trade Bulletin.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Minnesota [Mr. NEWTON].

The question was taken, and the amendment was rejected.

Mr. WRIGHT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. WRIGHT: After the last word in line 7, on page 47, add the following: "*Provided, however,* No equalization fee shall ever be estimated, levied, or collected on cotton."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. WRIGHT) there were 26 ayes and 74 noes.

So the amendment was rejected.

Mr. WRIGHT. Mr. Chairman, I offer another amendment.

The Clerk read as follows:

Page 47, line 9, after the word "provided," insert "*Provided, however,* The equalization fee on cotton shall never be more than $10 per bale."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. WRIGHT) there were 22 ayes and 65 noes.

So the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 48, line 5, after the word "unit," strike out the period and insert the following: "And upon all sales or contracts for future deliveries of any such commodities made on any exchange, curb, board of trade, or by whatever name said exchange may be known."

Mr. LAGUARDIA. Mr. Chairman, I want to state to my friends, the farmers of the House, that for the last 11 or 12 years you have taken the floor and complained about gambling in agricultural commodities on the exchanges. Every time you discussed this bill, in talking about the condition of the farmer you have complained about the gambling going on in the various exchanges in New York and other cities. Here, gentlemen, is a chance to make the gamblers pay the equalization fee the same as the farmers will be required to pay. Do you want to do it? More cotton is sold on the cotton exchange of my city than is produced in all of the Southern States. More wheat is sold on the exchange in New York and the Board of Trade of Chicago than goes to a mill. If these sales are bona fide sales of agricultural commodities, whether wheat, corn, cotton, or whatever it may be, and not gambling, then I submit it is a good place to collect the equalization fee. If they are not bona fide sales, but mere gambling, all the more reason to compel the payment of the fee. It is up to you.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken; and on a division (demanded by Mr. EDWARDS) there were 33 ayes and 84 noes.

So the amendment was rejected.

Mr. LAGUARDIA. Mr. Chairman, I have a further amendment.

The Clerk read as follows:

Page 49, line 12, strike out all of subdivision (f).

Mr. LAGUARDIA. Mr. Chairman, I want to point out that there is great danger in this section. I feel it is unwise to authorize any private citizen to collect the fee and pay such private individual for making the collection. Taxes or other Government assessments are not collected in that way. This is a sort of collection system on a contingent basis. I warn the sponsors and friends of the bill that there is real danger in this paragraph. I surely would strike it out. If the bill becomes a law this provision is not workable and I have grave doubts as to its validity. I advise the friends of the bill to strike it out.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The question was taken, and the amendment was rejected.

Mr. LANKFORD. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Beginning on page 50, line 24, strike out all of subdivision (4) of subsection 8 of section 10 and insert in lieu thereof the following:

"(4) in the case of tobacco, the term 'sale' means a sale or other disposition in wholesale quantities of manufactured or prepared tobacco by any manufacturer of cigarettes, cigars, or smoking tobacco, the term 'tobacco' means manufactured or prepared tobacco in the form of cigarettes, cigars, and smoking tobacco, and the term 'transportation' means the acceptance of cigarettes, cigars, or smoking tobacco by a common carrier for delivery. All other taxes or license fees on cigars, cigarettes, chewing tobacco, and other tobaccos in any form are hereby repealed."

Mr. LANKFORD. Mr. Chairman and gentlemen of the committee, to those of us living in the tobacco sections this is a very important amendment. The equalization fee is a dangerous proposition when the farmer pays the fee. We know, of course, that wherever the fee is assessed at all it is eventually charged back to the farmer. In fact, most of the taxes are eventually charged back to the farmer, but the equalization fee in the case of other commodities in this bill is not charged to the farmer direct, but is charged when the commodity is placed in interstate commerce, or when the commodity is sold to a manufacturer, or when placed in transportation to the manufacturer, or when placed in transportation for export purposes. In the case of tobacco the fee is charged on the sale of the leaf tobacco. It is charged on the tobacco that is placed in the barns by the grower. Down in my section of the country the people are growing a considerable amount of tobacco. About half of the money crop is tobacco. They bring the tobacco in and place it on the floor of the warehouse, and after it is placed there in hundreds and thousands of piles the auctioneer sells the tobacco to the highest bidder. The export people have a bidder there. R. J. Reynolds & Co. have a bidder on the floor. These buyers bid on that leaf tobacco and buy it from the farmers.

Mr. EDWARDS. Is the equalization fee on tobacco limited or unlimited in the bill?

Mr. LANKFORD. It is unlimited.

Mr. EDWARDS. The same as in the case of cotton?

Mr. LANKFORD. Yes. Some people say that it will not be very high. If it is not going to be high, why not put a limit on it? Tobacco, of all farm products, has borne a greater burden of taxes in the past than any other one farm commodity. Ever since the Civil War there has been a tax on tobacco. It has always been borne by this commodity, and under this bill you seek to put a heavier and more direct tax on tobacco than upon any other one commodity. It is not fair, it is not just. I will not vote for the bill if it stays in. [Applause.]

Mr. GREEN. Mr. Chairman, will the gentleman yield?

Mr. LANKFORD. Yes.

Mr. GREEN. Does the gentleman not think it would be well to let the equalization fee on all products be collected from the manufacturer?

Mr. LANKFORD. Yes. But even when a tax is assessed against the manufacturer it is either passed back to the producer or is passed on to the ultimate consumer. The common people bear the burden after all.

Millions of dollars in taxes have been collected out of those who use tobacco each year since the Civil War, and yet when we propose to pass some legislation for the benefit of the tobacco growers there is placed in the measure an additional tobacco tax of the most vicious form. This presents a splendid illustration of the unfair legislation which is pushed through Congress almost every day. Much is said and done for tax reduction for the immensely rich, but any effort to relieve the taxes of the poor—the man who chews tobacco, if you please—is promptly refused and an additional tax is proposed to be assessed against the user and the producer of tobacco.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia.

The question was taken; and on a division (demanded by Mr. EDWARDS) there were—ayes 18, noes 75.

So the amendment was rejected.

Mr. LANKFORD. Mr. Chairman, I offer the following amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. LANKFORD: Page 51, beginning at line 3, strike out all of subsection (5) of subsection (h) of section 10 and insert in lieu thereof the following:

"(5) In the case of grain and livestock the term 'transportation' means the acceptance of a commodity in wholesale or carload lots by a common carrier for delivery in interstate commerce."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Georgia.

The amendment was rejected.

Mr. LANKFORD. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. LANKFORD: Page 46, strike out all of section 10 and insert in lieu thereof the following:

"SEC. 10. In order to carry out marketing and nonpremium insurance agreements in respect to any agricultural commodity without loss to the revolving fund it is provided—

"(a) On and after the 1st day of July next following the approval of this act the Secretary of the Treasury, under regulations prescribed by the board, shall, subject to the limitations of this act, issue an

export debenture to the board in respect of any quantity of a debenturable agricultural commodity or of any quantity of any debenturable product of such commodity, that is exported from the United States to a foreign country by any firm, corporation, or other person. The export debenture shall be in an amount computed at the debenture rate for such commodity or product, respectively, effective at the time of the exportation."

Mr. RAMSEYER (interrupting the reading). Mr. Chairman, I make the point of order against the amendment that it is not germane.

Mr. EDWARDS. I make the point of order against the point of order. The gentleman from Iowa can not interrupt the Clerk's reading to make a point of order.

Mr. LANKFORD. I have a right to have the amendment read in order to determine whether it is subject to the point of order.

Mr. RAMSEYER. Mr. Chairman, I am well within my rights. A point of order is in order just as soon as it becomes apparent that a proposed amendment is not germane. I make the point of order that the amendment is not germane.

The CHAIRMAN. The Chair thinks that sufficient of the amendment has been read upon which to base a point of order.

Mr. LANKFORD. Mr. Chairman, I would like to be heard upon the point of order.

The CHAIRMAN. The Chair will hear the gentleman on the point of order.

Mr. LANKFORD. Mr. Chairman and gentlemen of the committee, it is my contention that this is not subject to the point of order. I am seeking only to strike out the section of the McNary-Haugen bill which deals with the equalization fee. I am seeking to insert in lieu of the equalization fee the debenture plan as set up in the Ketcham bill, except that at the beginning of my amendment I provide the same reasons and purposes for the debenture plan that are set up for the equalization fee. I set up in the beginning of my amendment that in order to create a fund to take care of marketing conditions and to stabilize the price of farm products the debenture plan shall be set up.

Mr. ADKINS. Mr. Chairman, will the gentleman yield?

Mr. LANKFORD. Yes.

Mr. ADKINS. Did the gentleman think that all out by himself as a new idea that comes in under this debenture plan or did he take it from some other bill?

Mr. LANKFORD. It makes no difference what I thought out. I never thought out the alphabet, but a part of the alphabet is used in my amendment. If I can think out something that is worth while when the gentleman fails to do it, I have not committed any great crime.

Of course, I do not contend that I originated the debenture plan. The idea is not at all new and there have been introduced several farm relief bills containing the idea in one form or another. I have several times stated on this floor that I was favorably impressed with the plan. I believe it would help the farmer, but it is objectionable, to some extent, because the help is too indirect. The debentures are issued to the exporter of cotton or other products, and he sells them and eventually some of the money arising from the sale may find its way to the farmer's pocket.

I reintroduced in the House some time ago the McNary-Haugen bill, with the equalization-fee provisions stricken out and the debenture plan inserted in lieu of the equalization provision, except that in my debenture plan I provided that the money arising from the sale of debentures should be paid to the board provided in the McNary-Haugen plan, so as to make unnecessary any equalization fee. This idea, so far as I know, is original with me, and is not incorporated in any other debenture plan.

The amendment now offered by me, if adopted, would put into effect the McNary-Haugen bill with the debenture plan inserted into it, so as to make unnecessary the vicious equalization-fee provisions. I am seeking to take all that is worth saving of the McNary-Haugen bill, trimming out the evil portion of the bill and inserting in lieu thereof all that is good of the debenture plan, after a humble effort on my part to further purify the borrowed portion of the debenture plan.

Mr. Chairman, if you will observe, the first part of my amendment which is offered is identical with the first part of the equalization-fee provision which is stricken out, and provides that "in order to carry out marketing agreements and nonpremium-insurance agreements in respect to any agricultural commodity, it is provided that"; then there follows the debenture plan as incorporated in the Ketcham bill and as heretofore incorporated by me in my bill, combining the McNary-Haugen bill with the debenture plan.

It seems to me that my amendment is clearly in order, thus providing for a plan to raise money by the sale of debentures to build up and maintain the stabilization fund, rather than attempt to raise this money by any sort of taxes, either direct or indirect, on the farmers of the Nation.

More briefly stated, I provide for the debenture plan of the gentleman from Michigan [Mr. KETCHAM] to raise this money to be used to build up the stabilization fund rather than levy an equalization fee.

The debenture plan of the gentleman from Michigan provides that the debentures shall be issued to the exporter. This plan here provides that the debentures shall be issued to the board set up under the McNary-Haugen bill, and that the money arising from the debentures shall go to this board instead of to the exporter and thus be used by the board instead of an equalization fee. [Applause and cries of "Vote!"]

The CHAIRMAN. The Chair is ready to rule. The Chair will not undertake to give any extensive reasons for his ruling under the circumstances. He is not taken by surprise, because this matter has been discussed in the corridors and on the floor for a great many weeks.

It seems to the Chair, briefly, that the decision of Chairman SANDERS in 1924 on the substitute proposed at that time by the gentleman from Illinois [Mr. RAINEY] is on exact fours with the situation that we have here. In the Rainey substitute, instead of a "debenture," the exporter was paid in "customs scrip." The equalization fee was the same in substance in the Haugen bill of 1924 as it is in the Haugen bill that is before us now. Chairman SANDERS held the Rainey amendment out of order as not being germane; and the present occupant of the chair, sustained by that precedent and also by the logic of the rule which says that a matter foreign to the subject under consideration can not be introduced by way of amendment, sustains the point of order and declares the amendment out of order.

Mr. ASWELL. I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment of the gentleman from Louisiana.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Strike out all of section 10.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Louisiana [Mr. ASWELL] to strike out the section.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

STABILIZATION FUNDS

SEC. 11. (a) For each agricultural commodity as to which marketing agreements are made by the board there shall be established, in accordance with regulations prescribed by the board, a stabilization fund. Such fund shall be administered by and exclusively under the control of the board, and the board shall have the exclusive power of expending the moneys in such fund.

(b) There shall be deposited to the credit of the stabilization fund for any agricultural commodity (1) advances from the revolving fund as hereinafter authorized, (2) profits arising out of marketing agreements in respect of the commodity, (3) repayments of advances for financing the purchase, withholding, or disposal of the commodity, and (4) equalization fees collected in respect of the commodity and its imported food products.

(c) In order to make the payments required by a marketing or nonpremium insurance agreement in respect of any agricultural commodity, and in order to pay the salaries and expenses of experts, the board may, in its discretion, advance to the stabilization fund for such commodity out of the revolving fund such amounts as may be necessary.

(d) The deposits to the credit of a stabilization fund shall be made in a public depositary of the United States. All general laws relating to the embezzlement, conversion, or to the improper handling, retention, use, or disposal of public moneys of the United States shall apply to the profits and equalization fees payable to the credit of the stabilization fund and to moneys deposited to the credit of the fund or withdrawn therefrom but in the custody of any officer or employee of the United States.

(e) There shall be withdrawn from the stabilization fund for any agricultural commodity (1) the payments required by marketing or nonpremium insurance agreements in respect of the commodity, (2) the salaries and expenses of such experts as the board determines shall be payable from such fund, (3) repayments into the revolving fund of advances made from the revolving fund to the stabilization fund, together with interest on such amounts at the rate of 4 per cent per annum, and (4) service charges payable for the collection of equalization fees.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Louisiana moves to strike out the section. The question is on agreeing to that motion.

The question was taken, and the motion was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

INSURANCE

SEC. 12. (a) In order that a cooperative association handling any staple agricultural commodity may with reasonable security make payments to its members at the time of delivery of such commodity by the members, fairly reflecting the current market value of such agricultural commodity, the board is authorized to enter into an agreement, upon such terms and conditions as it may prescribe, for the insurance of such cooperative association against price decline as hereinafter provided. Such insurance agreement may be entered into by the board only with respect to any such agricultural commodity which, in the judgment of the board, is regularly traded in upon an exchange in sufficient volume to establish a recognized basic price for the market grades of such commodity, and then only when such exchange has accurate price records for the commodity covering a period of years of sufficient length, in the judgment of the board, to serve as a basis upon which to calculate the risks of the insurance.

(b) Any such agreement for insurance against price decline shall provide for the insurance of the cooperative association for any 12 months' period commencing with the delivery season for the commodity against loss to such association or its members due to decline in the average market price for the commodity during the time of sale by the association from the average market price for the commodity during the time of delivery to the association. The measure of such decline, where a decline occurs, shall be the difference between the average market price weighted for the days and volume of delivery to the association by its members and the average market price weighted for the days and volume of sales by the association. In computing such average market prices the board shall use the daily average cash prices paid for the basic grade of such commodity in the exchange designated in the agreement. Any such agreement shall cover only so much of the commodity delivered to the association as is produced by the members of the association and as is reported by the association for coverage under the agreement.

(c) Whenever in the judgment of the board the use of such insurance agreements in respect of any commodity will stabilize the market substantially in the interest of the producers of the commodity whether or not members of a cooperative association dealing in the commodity, then the board, during the continuance of any marketing period for the commodity as provided in section 9, may enter into nonpremium, or if the board deems it advisable, premium insurance agreements with cooperative associations dealing in the commodity. Whenever in the judgment of the board the use of such insurance agreements will not so stabilize the market, then the board may enter into premium insurance agreements only with the cooperative associations.

(d) Payments required under nonpremium insurance agreements in respect of any commodity shall be made out of the stabilization fund for the commodity. Payments under premium insurance agreements in respect of any commodity shall be made out of the premium insurance fund for the commodity to be established by the board under such regulations as it may prescribe.

(e) For insurance under a premium insurance agreement the cooperative association shall pay a premium, to be determined by the board prior to the making of the insurance agreement, upon each unit of the commodity reported by the association for coverage under the insurance agreement. Such premium shall be calculated with due regard to the past price records in established markets for the commodity. The premiums applicable to the commodity in the successive 12 months' period shall be adjusted with due regard to the experience of the board under preceding insurance agreements. There shall be deposited in the premium insurance fund for any commodity the premiums paid by cooperative associations under premium insurance agreements in respect of the commodity, and advances from the revolving fund in such amounts as the board deems necessary for the operation of the fund. There shall be disbursed from the premium insurance fund for any commodity (1) the payments required by any premium insurance agreement in respect of the commodity, and (2) repayments into the revolving fund of advances made from the revolving fund to such premium insurance fund, together with interest on such advances at the rate of 4 per cent per annum.

Mr. FORT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New Jersey offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. FORT: Page 54, line 22, strike out the line and all of lines 23, 24, 25, and line 1, on page 55, through the word "association."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from New Jersey.

The question was taken, and the amendment was rejected.

Mr. ASWELL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Louisiana.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Strike out all of section 12.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

REVOLVING FUND

SEC. 13. There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $400,000,000. Such sum shall be administered by the board and used as a revolving fund in accordance with the provisions of this act. The Secretary of the Treasury shall deposit in the revolving fund such portions of the amounts appropriated therefor as the board from time to time deems necessary.

Mr. WRIGHT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Georgia offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. WRIGHT: On page 57, line 4, after the figures "$400,000,000," strike out the period, add a colon, and insert the following: "*Provided*, That at least $200,000,000 of said revolving fund is hereby made available and shall be used as a stabilization fund for financing the purchase, withholding, or the disposal of agricultural products in the event that a marketing period shall be declared for one or more of such products as hereinbefore authorized, and that said fund shall be allocated ratably to the stabilization funds of the several products according to the values of their respective exportable surpluses."

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Georgia.

The question was taken, and the amendment was rejected.

Mr. ASWELL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: Page 57, line 1, strike out all of section 13.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

EXAMINATIONS OF BOOKS AND ACCOUNTS OF BOARD

SEC. 14. Expenditures by the board from the stabilization or premium insurance funds shall be made by the authorized officers or agents of the board upon receipt of itemized vouchers therefor, approved by such officers as the board may designate. All other expenditures by the board, including expenditures for loans and advances from the revolving fund, shall be allowed and paid upon the presentation of itemized vouchers therefor, approved by the chairman of the board. Vouchers so made for expenditures from the revolving fund or from any stabilization or premium insurance fund shall be final and conclusive upon all officers of the Government; except that all financial transactions of the board (including the payments required by any marketing or insurance agreement) shall, subject to the above limitations, be examined by the General Accounting Office at such times and in such manner as the Comptroller General of the United States may by regulation prescribe. Such examination in respect of expenditures from the revolving fund or from any stabilization or premium insurance fund shall be for the sole purpose of making a report to the Congress and to the board of expenditures and agreements in violation of law, together with such recommendations as the Comptroller General deems advisable concerning the receipts, disbursements, and application of the funds administered by the board.

Mr. ASWELL. Mr. Chairman, I move to strike out all of section 14.

The CHAIRMAN. The Clerk will report the motion of the gentleman from Louisiana.

The Clerk read as follows:

Motion offered by Mr. ASWELL: Page 57, line 10, strike out all of section 14.

The CHAIRMAN. The question is on agreeing to the motion of the gentleman from Louisiana.

The question was taken, and the motion was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

COOPERATION WITH EXECUTIVE DEPARTMENTS

SEC. 15. (a) It shall be the duty of any governmental establishment in the executive branch of the Government upon request by the board, or upon Executive order, to cooperate with and render assistance to the board in carrying out any of the provisions of this act and the regulations of the board. The board shall, in cooperation with any such governmental establishment, avail itself of the services and facilities of such governmental establishment in order to avoid preventable expense or duplication of effort.

(b) Upon request by the board the President, by Executive order, (1) may transfer any officer or employee from any department or independent establishment in the executive branch of the Government, irrespective of his length of service in such department or independent establishment, to the service of the board, and (2) may direct any governmental establishment to furnish the board with such information and data pertaining to the functions of the board as may be contained in the records of the governmental establishment; except that the President shall not direct that the board be furnished with any information or data supplied by any person in confidence to any governmental establishment, in pursuance of any provision of law or of any agreement with the governmental establishment.

(c) The board may cooperate with any State or Territory, or department, agency, or political subdivision thereof, or with any person.

Mr. LAGUARDIA. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from New York offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LAGUARDIA: On page 59, after line 11, add the following as a new section:

"It is hereby made unlawful for any person, other than a cooperative association engaged as in this act described, willfully to destroy any agricultural commodity for the purpose of enhancing the price or restricting the supply thereof, knowingly to commit waste, or willfully to permit preventable deterioration of any agricultural commodity in or in connection with their production, manufacture, or distribution; to hoard any agricultural commodity; to monopolize or attempt to monopolize, either locally or generally, any agricultural commodity; to engage in any discriminatory and unfair or any deceptive or wasteful practice or device, or to make any unjust or unreasonable rate or charge in handling or dealing in or with any other persons (a) to restrict distribution of any agricultural commodity; (b) to prevent, limit, or lessen the manufacture or sale of any agricultural commodity in order to enhance the price thereof; or (c) to exact excessive price for any agricultural commodity; or to aid or abet the doing of any act made unlawful by this section.

"Any person convicted of any of said unlawful acts shall be punished as in section 20, paragraph (b) provided."

Mr. DICKINSON of Iowa. Mr. Chairman, I make a point of order against the amendment.

Mr. LAGUARDIA. May the proponent of the amendment be advised on what the gentleman from Iowa bases his point of order so I may argue intelligently?

The CHAIRMAN. The Chair thinks the amendment is not germane to this section and sustains the point of order.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The CHAIRMAN. The gentleman from Louisiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. ASWELL: On page 58, line 10, strike out all of section 15.

The amendment was rejected.

The Clerk read as follows:

GENERAL DEFINITIONS

SEC. 16 (a) As used in this act—

(1) The term "person" means individual, partnership, corporation, or association.

(2) The term "United States," when used in a geographical sense, means continental United States and the Territory of Hawaii.

(3) The term "cooperative association" means an association of persons engaged in the production of agricultural products, as farmers, planters, ranchers, dairymen, or nut or fruit growers, organized to carry out any purpose specified in section 1 of the act entitled "An act to authorize association of producers of agricultural products," approved February 18, 1922, if such association is qualified under such act.

(b) Whenever any agricultural commodity has regional or market classifications or types which in the judgment of the board are so different from each other in use or marketing methods as to require their treatment as separate commodities under this act, the board may determine upon and designate one or more such classifications or types for such treatment.

Mr. SUMMERS of Washington. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Washington offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SUMMERS of Washington: On page 60, after line 2, insert:

"(4) The words 'agricultural commodity' shall not include apples, peaches, pears, plums, cherries, nor grapes."

Mr. HAUGEN. Mr. Chairman, I ask unanimous consent that all debate on this section and all amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from Iowa asks unanimous consent that all debate on this section and all amendments thereto close in 10 minutes. Is there objection?

Mr. TAYLOR of Colorado. Mr. Chairman, a parliamentary inquiry. Does that prevent the offering of amendments?

The CHAIRMAN. No. Is there objection?

There was no objection.

Mr. SUMMERS of Washington. Gentlemen, if I may have your attention for a moment, amid this tumult, I want to say this amendment is not opposed by the committee. It is desired by the fruit men of the United States and the representatives from the different districts which are heavy producers of fruits. I will not consume your time, but I want you to support the amendment.

Mr. LAGUARDIA. Mr. Chairman, I have an amendment to the amendment.

Mr. JACOBSTEIN. Mr. Chairman, and I have an amendment to the amendment.

Mr. BEEDY. Mr. Chairman, I make the point of order that the committee is not in order. Members are standing in the pit; they are conversing in the rear of the Hall, and I again suggest that we have a Sergeant at Arms who ought to assist in maintaining order.

The CHAIRMAN. The Chair thinks the point of order of the gentleman is well taken. The committee will be in order. The gentleman from New York [Mr. JACOBSTEIN] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. JACOBSTEIN as a substitute to the amendment offered by Mr. SUMMERS of Washington: On page 60, in line 3, insert a new paragraph to read:

"The words 'agricultural commodity' mean an agricultural commodity which is not a fruit or vegetable."

Mr. JACOBSTEIN. Mr. Chairman and members of the committee, I believe many Congressmen are well agreed that fruits ought to be excluded from the operation of this bill, as provided for in the amendment offered by Mr. SUMMERS of Washington. I am providing in my amendment that vegetables likewise shall be excluded and for a very good and similar reason. The reason why you exclude fruits is because they are perishable; vegetables are also perishable. The very purpose of the McNary-Haugen bill is to exercise control over the surplus.

You can not do that with fruits and vegetables. You can not carry them over until the next crop season, and therefore we should logically exclude all fruits and all vegetables from the operation of this bill. I may say that if you adopt my substitute the bill will be in exactly the same form that it came from the Senate, so far as fruits and vegetables are concerned. The Senate amendment, known as the Copeland amendment, excluded fruits and vegetables from the operation of this bill, and therefore I hope you will accept the substitute I have offered.

Mr. BURTNESS. Will the gentleman yield?

Mr. JACOBSTEIN. Yes.

Mr. BURTNESS. Does the gentleman know that the word "fruit" in Webster's International Dictionary is defined as being:

Whatever is produced for the nourishment of man or animals by the processes of vegetable growth, as corn, grass, cotton, flax, etc.

Now, the gentleman surely does not want to exclude cotton and these other products?

Mr. JACOBSTEIN. I want to exclude all fruits specified in the Summers amendment, including apples, peaches, pears, plums, grapes, and so forth, as well as vegetables, including potatoes, cabbages, carrots, celery, onions, lettuce, and so forth. It is unthinkable that the authors or proponents of this measure should want this bill to embrace these farm commodities.

Mr. LAGUARDIA. I can answer the gentleman from North Dakota. If the gentleman will put after the word "vegetables" the words "known as garden truck," that will answer the gentleman from North Dakota.

Mr. JACOBSTEIN. That may be so for the purpose of clarifying the definition, but I believe we all know what is intended. Of course, we do not include cotton in our definition of vegetables.

Mr. O'CONNOR of Louisiana. That is not necessary. The gentleman ought to look up the word "vegetable" in the dictionary.

Mr. KINCHELOE. Will the gentleman yield?

Mr. JACOBSTEIN. Yes; with pleasure.

Mr. GREEN. That does not go in unless the vegetable growers want it to go in, anyway. They have to petition in order to get it in.

Mr. JACOBSTEIN. Mr. Chairman, I first yielded to the gentleman from Kentucky.

Mr. KINCHELOE. I can understand why gentlemen do not want an equalization fee levied on fruits and vegetables, but does the gentleman want to get them out of the operation of the provisions with respect to the $25,000,000 loan?

Mr. JACOBSTEIN. Yes; and I will tell the gentleman why. People who raise fruits and vegetables in my country are now overequipped with facilities for handling them, and under the operation of the bill you are going to overstimulate the erection of these warehouses and storage plants which will actually do more harm to the farmers than good. You merely make possible the extension of credit to fly-by-night speculators who may desire to come in and fleece the farmer.

Mr. KINCHELOE. Then you have plenty of credit.

Mr. JACOBSTEIN. We do not want any more credit. We have enough credit now and sufficient credit facilities are available for our fruit and vegetable producers.

Mr. ADKINS. You do not need to use it.

Mr. JACOBSTEIN. We do not want the bill to so operate that outsiders may use this new credit to further stimulate the production of fruits and vegetables. If you will read my speech of last week, you will find in that RECORD the names of many representative organizations in my State and other States who have definitely stated that they prefer to be exempted from the bill.

Mr. CHINDBLOM. I would like to ask the gentleman if he thinks this bill will do more harm to fruit and vegetable farmers than to other farmers.

Mr. JACOBSTEIN. I do not know with any degree of certainty how this bill is going to affect other commodities, but I do say it will harm fruits and vegetables because they are perishable products and not susceptible to the favorable operations of the bill, and are exposed to its dangers.

Mr. GREEN. Does not the gentleman realize that fruits and vegetables can not be included in the bill unless the growers of fruits and vegetables petition that they be brought within the provisions of the bill.

Mr. JACOBSTEIN. There is nothing in the bill to prevent cooperatives from being organized by outsiders for the expressed purpose of coming within the bill and using the Government's financial credit.

Mr. COCHRAN of Missouri. May I ask the gentleman if this is similar to the Copeland amendment? If it is, then I am heartily in favor of the amendment and I hope it prevails. If you do not exempt fruits and vegetables, you are adding a further burden to that already placed on the consumer by the terms of this bill. Perishable products have no place in this measure and the House should follow the lead of the Senate, where the Copeland amendment was unanimously adopted, and let fruit and vegetables alone.

Mr. JACOBSTEIN. Yes. The gentleman asks whether this is similar to the Senate amendment. It is absolutely the language of the Senate amendment so far as it relates to fruits and vegetables. My amendment simply retains the language of the Senate amendment, and I hope the House will adopt the amendment.

Mr. CANNON. Mr. Chairman, I desire to be heard in opposition to the amendment.

Mr. EDWARDS. Mr. Chairman, a parliamentary inquiry. Was not the word "fruits" stricken from this bill yesterday under an amendment offered by the gentleman from Virginia [Mr. HARRISON]?

Mr. JACOBSTEIN. That was in the Aswell bill.

Mr. HARRISON. Yes. We want to get the amendment in this bill now.

Mr. CANNON. Mr. Chairman, this is the most remarkable proposition that has been presented in the consideration of this entire bill. Here is a measure applying to every agricultural commodity produced in the United States. It provides for the cotton and corn of the South, for the wheat and flax of the North, for the cattle and hogs of the West, and for the peanuts and tobacco of the East. It applies to absolutely everything produced on field and fallow, and here they come in and want to make one exception. They want to leave out one single commodity. They want to exempt fruits and vegetables.

Gentlemen, the cotton exchanges are opposed to this bill, and are fighting it, and you are putting them out of business. The grain and cattle exchanges are opposed to this bill and are fighting it, and you are putting them out of business. But the fruit exchanges, which are fighting farm relief here to-day more vigorously than any of them, is the most rapacious robber of them all. [Applause.]

The federated fruit commission men are to-day exacting a toll from the producers compared with which the exactions of Shylock were pure benevolence. You can raise a load of hogs in one year. You can feed a load of cattle in one season, and when you ship hogs or cattle to our central markets your commission men there charge you for handling them less than 1 per cent. But it takes 12 years to bring an orchard into bearing.

It costs us an average of from $225 to $550 an acre overhead to reach the period of first production, and yet when we ship a carload of apples to the market they take 10 per cent—$10 out of every $100—and that is only a part of the toll they take. And we have no recourse. The fruit commission men were organized by Sapiro, and they are the most compactly and efficiently organized agencies dominating the marketing of farm products in America to-day. And they are represented here against this bill by one of the most active and resourceful lobbies ever brought to the Capitol. If there is any one agricultural commodity which above all others is in dire need of the orderly marketing provisions of this bill, it is fruits.

We need this legislation not only for the benefit of the producer but for the benefit of the consumer as well, for the consumer as well as the producer will profit by the provisions carried in this bill. Last year I shipped a car of apples to St. Louis, and when the expenses of packing and shipping were paid, with no return for overhead, I received 74 cents a bushel for them. I was down in St. Louis a week or two after that and I saw on the fruit stands there the same apples selling two for 15 cents.

If you will give us this bill, we can sell you the two for 10 cents. We can save the consumer 2½ cents on each apple and still give the producer a living cost for his product.

Now let us consider the political side of this proposition. One of the principal objections of the President to the last bill, and one of the chief reasons he assigned for vetoing it, was that it applied to only a few agricultural products, four or five commodities, instead of including all farm products. It was his contention, and one well supported, that it should be universal in its application; that there was no reason for omitting any of them. In drafting the present bill we have obviated that objection. Everything is included. So far as that phase of the bill is concerned it complies with every requirement of the President and merits his approval. Why turn back? Having remolded the bill to meet the President's suggestions, why again antagonize him and invite a veto and the defeat of the bill by excluding something else? It is the height of inconsistency.

During the war you put a price on our wheat. Cotton and steel and coal and chemicals and numerous other commodities were just as essential to the winning of the war as was wheat. But you singled out our wheat and put a price on it, while you let the price of everything else go to unheard-of figures. Wages and corporate profits broke all records. The sky was the limit.

But you held down the price of our wheat to $2.40 a bushel when we could have got from $7 to $10 for it, and you sold it to foreign governments at a profit. Do not make the same mistake again. Do not perpetuate that rankling injustice against another deserving commodity. Give this commodity its place in the bill along with other honest products of the soil. Vote down this amendment. [Applause.]

The CHAIRMAN. All time has expired. The question is on the substitute offered by the gentleman from New York to the amendment offered by the gentleman from Washington.

The question was taken, and the substitute was rejected.

Mr. HARRISON. Is it in order now to debate an amendment?

The CHAIRMAN. Debate on the section and all amendments thereto has expired. The question is on the amendment offered by the gentleman from Washington [Mr. SUMMERS].

Mr. MOORE of Virginia. Mr. Chairman, I ask that the amendment be again reported.

The amendment was again reported.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was rejected.

Mr. HARRISON. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 60, after line 2, insert the words "agricultural commodity means an agricultural commodity which is not a fruit."

Mr. O'CONNOR of Louisiana. Mr. Chairman, I move to amend by inserting the word vegetables, and I ask unanimous consent, in view of the fact that I have been promised two minutes, to proceed for two minutes.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. O'CONNOR of Louisiana to the amendment offered by Mr. HARRISON: After the word "fruit" insert the words "or vegetables."

The CHAIRMAN. The gentleman from Louisiana asks unanimous consent to proceed for two minutes notwithstanding the limitation on debate. Is there objection?

There was no objection.

Mr. O'CONNOR of Louisiana. Mr. Chairman and gentlemen of the committee, if the McNary-Haugen bill is enacted into law—that is, if it pass the Congress and be signed by the President or his veto overridden, in the event that he does veto the measure—it will inaugurate and put into motion an experiment in the way of stabilizing farm products that has had no parallel in human history. Even the immortal effort made by Joseph to offset what would otherwise be the disaster of the seven lean years by providing for the storage of the surplus in the seven fat years and thereby making for a stabilization throughout the fat and lean years, on account of the relatively small number of inhabitants to whom it was applied, sinks into insignificance compared to this giant effort on the part of leaders of agriculture, through governmental aid and assistance, to stabilize farm products that must inevitably reach into every household and make for the growth and sustenance of a hundred and twenty million people. Joseph's notable achievement will live as long as the Bible is read, for it affords not only a wonderful insight into the ability with which men in that distant period of the world's history met agricultural problems, but also evidences the profound thought and intellectuality that made for a thorough conception and understanding of the continuous and uninterrupted operation of the great law of compensation. "Life gives me gloom to-day; to-morrow comes her laughter." "Life frowns on me to-day, yet will she smile to-morrow." Three, four, five years of bad crops will be followed by three, four, five of good crops. Good times and bad times alternate in accordance with some unbeatable law. I say unbeatable, meaning that the law has been unbeatable up to this time. This bill is a challenge to the supremacy of that law of supply and demand and of those economics that have ruled the commercial and agricultural and industrial world up to this time. It is, therefore, a vast experiment, and will be conducted upon a scale unprecedented even in the imagination of the visionaries of a few years ago. Many of the foremost thinkers of the country believe that it is an experiment worth making.

William Green, president of the American Federation of Labor, thinks so, and no man in this country has a more thorough knowledge of the underlying causes for America's greatness than Mr. Green. No one knows better than he how to maintain this Republic in the vanguard of civilization. The great railroad paper, Labor, read eagerly every week by a million men and women, with such thinkers, writers, and philosophers on its staff as Edward Keating, Donald Ramsey, Raymond Longeran, Gil Hyatt, and other great spirits, who in the night of despotism, as it were, foresaw the glories of the coming day, is urging the enactment of this bill. When labor was reeling and staggering and truth, justice, and freedom were being bludgeoned out of our national existence these men preached the word that an injury to one was the concern of all, and that the degradation and misery of one group of our people ultimately meant the degradation of all of the other groups, and that the prosperity of the superstructure in our national life depended upon the well-being and the comfort and happiness of those that made for the mudsills and foundation of the Republic.

I wish I could quote from this great paper that has thundered in behalf of a square deal for the agriculturists of the land. Eloquently its writers have pleaded for the farmer. Looking into the past and glimpsing the future they see the farmer as the first man on earth and they see him as the last man on earth. They are for him for the ethical reason that they are for all human beings. They believe that all men and women are entitled to a living on this earth. That is reason No. 1. They believe in the proposed legislation because they hold the prosperity of the agriculturists would make for a greater purchasing power upon their part, which would tend tremendously to decrease unemployment in the cities by keeping the factories in operation; and they believe that if the farm boys were contented and happy as a result of making a living on their farms they would not in sheer hopelessness come to the city and thereby accentuate labor problems by adding to the number of men seeking employment in our industries. I have always sided with labor in their highest aspirations, believing that it was for the good of all communities to prevent discord and to make for friendly relations between capital and labor. Arm in arm these two great forces can accomplish wonders yet undreamed of.

But I want to submit, gentlemen of this House, that all great experiments ought to be tried out with some little care. There is no reason on earth why the Copeland amendment should not be restored to this bill. Fruits and vegetables should be excluded from its provisions. Its operations ought to be confined to those products of the earth susceptible to storage for a long period. I understand that the opposition to the adoption of such an amendment is due to the fact that vegetables and fruits in their broader significance might be deemed to embrace some of the very products which it is designed to make fall under the terms of this measure. There is no well-drawn distinction between fruits and vegetables, but the courts have held, as may be seen by a reference to the celebrated legal work, Words and Phrases, that vegetables mean cabbage, lettuce, potatoes, and such grains as are used on tables. I submit, my friends, that many vegetables are much more perishable than many fruits. The gentleman from Missouri is not consistent and logical in his statement to the effect that he wanted everything in the shape of an agricultural product forced and jammed and crammed into the bill, whether the product fitted into the purpose of the bill or not. I admire his earnestness, his sincerity of purpose, and his rhetoric more than I do his logic and his reason. He assigned no reason on earth why vegetables of a perishable nature should be included with those commodities that are not of perishable nature. Apparently he would make no distinction between that which could be stored and that which could not be stored. We ought to proceed, my friends, in a logical and sensible way; and the amendment proposed by Mr. HARRISON and that proposed by myself would make this bill far better than it would be without it. Notwithstanding the belief that exists in the minds of many Members that it would be better to reject these amendments in view of the fact that it is difficult to find phraseology to cover the purpose sought to be accomplished and to let the matter be adjusted in conference I feel that the dictionary means that fruits and vegetables are sufficiently clear to justify our adopting those amendments. Do not make this bill unreasonable. Do not make it a Procrustean bed and endeavor to fit all products to its terms even if you have to destroy them to do so. I am surprised that the committee finds itself at a loss to find suitable words to meet the situation, as I was told by prominent Republican members of the committee that a proper amendment would be prepared and offered by the committee itself.

Mr. TUCKER. Mr. Chairman, I ask unanimous consent to speak for two minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Virginia?

Mr. COOPER of Wisconsin. I object.

The CHAIRMAN. The question is on the amendment of the gentleman from Louisiana to the amendment of the gentleman from Virginia.

The question was taken, and the amendment to the amendment was rejected.

The CHAIRMAN. The question is on the amendment of the gentleman from Virginia [Mr. HARRISON].

The question was taken, and the amendment was rejected.

Mr. TAYLOR of Colorado. Mr. Chairman, I offer the following amendment:

The Clerk read as follows:

Mr. TAYLOR of Colorado offered the following amendment: On page 60, after line 8, add as subdivision (c) the following:

"None of the provisions of an act of Congress of the United States entitled 'An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes,' approved June 30, 1906, or any amendments thereto, shall hereafter be held or construed by any person or any official of any department of the Government of the United States, or in any court, to embrace or to be in any way applicable to any fresh or natural fruit in the condition when served from the tree, vine, or bush upon which it was grown."

Mr. LEA. Mr. Chairman, I make the point of order that it is not germane.

Mr. TAYLOR of Colorado. Mr. Chairman, I want to be recognized on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. TAYLOR of Colorado. Mr. Chairman, this amendment I have offered is in the exact language of subdivision (b) of section 17 of the Senate bill as it passed the Senate and came over to the House. This provision was introduced by the junior Senator from Colorado [Mr. WATERMAN] as an amendment to this bill when it was under consideration on the floor of the Senate and was unanimously approved by that body.

The Senator introduced this provision at the unanimous request of practically all the fruit growers in the western half of our State, and they have all urged me to do my utmost to retain that provision in this bill.

The point of order made by the gentleman from California and others would probably be good if it had been raised in the Senate, because fruits and vegetables and beef were expressly excluded from the Senate bill.

Mr. MONTAGUE. Fruits and vegetables are in the Senate bill?

Mr. TAYLOR of Colorado. No. That provision of the Senate bill reads as follows:

> The words "agricultural commodity" means an agricultural commodity which is not a fruit or vegetable or beef or beef products.

But when the House Committee on Agriculture struck out all of the Senate McNary bill after the enacting clause and inserted the complete Haugen bill, which did not contain this Waterman provision relating to fruits but did include all fruits as an "agricultural commodity," it seems to me that clearly makes this fruit amendment I have offered germane to the fruit commodity provisions of this bill. This House Haugen bill deals with fruit just as much as it does with any other agricultural commodity. It puts all of the fruit industry under the same Federal regulations and fees and penalties, and so forth, of this surplus control act. This amendment of mine pertains to the Federal control and applicability of the law to a certain class of fruit—that is, to fresh fruit just as it is picked from the tree, vine, or bush upon which it was grown.

When we are legislating upon and for the regulation, marketing, and development and betterment of the entire fruit industry throughout the country in this bill, it seems to me that any provision which a large number of fruit growers want inserted in this law pertaining to one certain kind of fruit ought to be a proper and germane matter for careful consideration by this House, and I hope the Chairman will not prevent my presenting this subject to the House by rejecting this amendment on a point of order.

The CHAIRMAN. The Chair thinks this brings in the merits of the pure food and drug act which is not at all involved in the Haugen bill, and sustains the point of order.

Mr. TAYLOR of Colorado. Mr. Chairman, I regret exceedingly the ruling of the Chair, to which I must gracefully submit, but to show the importance of this matter I will, by permission of the House, insert in the RECORD two out of a great many telegrams just received by me from numerous fruit growers and associations of my district in western Colorado, as follows:

DELTA, COLO., *April 28, 1928.*

Hon. EDWARD T. TAYLOR,

*House of Representatives, Washington, D. C.:*

The signers unanimously urge your support for Senator WATERMAN'S amendment to McNary-Haugen bill. Already this acid wash has cost fruit growers in Delta County a quarter of a million dollars. But, even more than that, it is the gravest menace to fruit growing in Colorado ever known. Please help WATERMAN.

Millard Fairlamb, Delta County Chamber of Commerce; Palmer & Joslyn Co.; Cedaredge Fruit Co.; the American Fruit Growers (Inc.); the Associated Fruit Co.; M. E. McCallister, Palisade Fruit Exchange; North Fork Produce Co.; Growers Trading & Supply Co.; North Fork Commercial Club; Paonia Chamber of Commerce; Union Fruit Co.; Curtis Fruit Co.; Paonia Fruit & Supply Co.; W. H. Garvin.

---

HOTCHKISS, COLO., *April 30, 1928.*

Hon. EDWARD T. TAYLOR,

*Congressman from Colorado, Washington, D. C.:*

Relating to rider in McNary-Haugen bill relative to eliminating apples from pure food law. This organization represents practically every fruit grower in Montrose and Delta Counties, and they urge you to use every effort to have this bill passed. Experience past two years shows heavy loss from cleaning residue off of apples, and no concrete evidence ever has been presented showing apples not cleaned injurious to health. As this law only enforced two years and apple shipments gone from here past 30 in same condition, buyers discriminating against Colorado apples, as other parts not forced to clean, and apple industry is hit hardest blow of its history, unless some action taken to eliminate this order; satisfied if conditions were known every man be for this rider.

DELTA-NORTH FORK FRUIT MEN'S ASSOCIATION.

Mr. Chairman, I also inclose a letter from Mr. Millard Fairlamb, of Delta, Colo., who is the legal representative and official spokesman of a majority of all the fruit growers and associations of western Colorado, and a very reliable and exceptionally well-informed and conservative lawyer, as follows:

DELTA, COLO., *April 28, 1928.*

Hon EDWARD T. TAYLOR,

*House of Representatives, Washington, D. C.*

DEAR MR. TAYLOR: Your telegram of April 27 to the American Fruit Growers of Delta, Colo., was handed to me for answer. I have been acting in cooperation with our fruit growers and fruit growers' associations in Delta and Montrose Counties for some six or eight months on this subject of apple washing. Our people here are unanimously opposed to it. We believe it has cost us a loss of $250,000 in Delta and Montrose Counties. We wrote you and telegraphed you at great length, and if you will refer to these letters and telegrams you will realize the feeling of our people in western Colorado that it is ruinous to the apple industry for this acid-washing order to be enforced.

Mr. W. P. Dale, president of the Uncompahgre Valley Water Users Association, was in Washington and there found out that a man by the name of Harvey is responsible for this experimentation. He works under a man by the name of Campbell, and both, of course, are impractical men who, although meaning all right, nevertheless are causing our American apple growers to expend millions of dollars in experiments. Two years ago the farmers were compelled by order to install brushing machines to brush off the spray residues. Last year they were compelled to build machines to immerse and wash the apples, and this year a third kind of a machine will have to be introduced so as to keep the apples out of the acid wash, but to spray them and wash the spray residues off by gently gushing the acid over them. As a matter of fact, these methods of preparing apples for market are all wrong. I wish you would see the voluminous testimony we have placed from our Delta County shippers and fruit associations in the hands of Senator WATERMAN. There was no intention of passing you by because last fall we appealed to you from time to time in regard to this same trouble, but in view of the fact that Senator WATERMAN had a chance to get in an amendment to the McNary-Haugen bill the evidence of scores of fruit jobbers and wholesalers has been placed in WATERMAN'S hands. Please go to Senator WATERMAN and read over this evidence. From it you will see that our people here are almost frantic over this subject of washing apples. I do not know a single one in Delta County that favors the movement, although, of course, anything that would improve the quality of the apples and make a better pack is desired. We think the experimentation should be worked out on a small scale by the Department of Agriculture instead of making the apple growers carry on this experimentation. After sufficient experiments have been carried on so a method may be advised without doing harm to apples, to make them cleaner and to remove any spray residues, we would be glad to welcome any positive advance that is sensible. At the present time we are afraid of this acid dip, because it has worked such destruction to the keeping qualities of apples. They look all right when they leave Delta County, but by the time they have been in the refrigeration car for a week the conditions have changed and deterioration progressed to such an extent that the loss is tremendous. We have had instance after instance where losses have been almost total.

We realize that so far as our commerce with foreign nations is concerned we must prepare our apples to comply with the regulations of the Customs Union. We feel that so far as the 96 per cent of the traffic in apples is concerned, which is of an interstate nature, that it should be left optional with each shipper to prepare apples so they will please the market. If there is anything eventually worked out by the Department of Agriculture that is a positive advance and worth while, you may rest assured that we in Delta County will avail ourselves of it, because we must have the highest-class pack that can be secured in order to stand the high freight rates out from this mountainous country.

So far as the McNary-Haugen bill is concerned, I can not help but view it as economically unsound, but that, of course, is my private opinion, and it really does not concern us much here in western Colorado, because we do not think it is necessary for the Government to subsidize the growing of fruits. I realize that the farmers of the Middle West are largely in favor of this McNary-Haugen bill. The one thing that looks good to us in connection with this McNary-Haugen bill is Senator WATERMAN'S amendment, and on that I can assure you that everybody in Delta County is in favor of that amendment.

Sincerely yours,

MILLARD FAIRLAMB.

Mr. Chairman, I feel that in fairness to the Agricultural Department, as well as to the fruit industry generally, I should say that I have for the past two years been in correspondence and consultation with the Agricultural Department and its representatives in this matter, and also in personal contact

with the situation in the fruit districts of Colorado, and that I know the great loss that has been caused to the fruit industry of Colorado and other States by the regulations and requirements of the Agricultural Department. I, just the other day, had an extensive conference with the Assistant Secretary of Agriculture and the chiefs of the subdivisions in charge of this matter, endeavoring to obtain some practical and fair solution of this problem, and I regret to say that I have been unable to obtain any material concessions that I feel will be satisfactory to the fruit industry of my district, although I should say that the officials of the department are sympathetic with our condition, and I am in hopes—and in fact, I believe—that some practical solution will be arrived at whereby our fruit industry will not be destroyed.

I asked the Agricultural Department officials to write me frankly as to their opinion and position on this particular amendment, and the Secretary of Agriculture, Mr. Jardine, has just to-day written me a letter on the subject. I feel that Congress and the country generally, and my constituents in particular, will be interested in this definite official statement from the Secretary of Agriculture, because sooner or later we have all got to come to some practical adjustment of this condition, and I believe in frankly and fairly presenting both sides. I therefore insert the Secretary's letter in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
*Washington, D. C., May 4, 1928.*

Hon. EDWARD T. TAYLOR,
*House of Representatives.*

DEAR MR. TAYLOR: I have your letter of April 29 requesting a statement from the department in regard to the provision inserted by Senator WATERMAN, of Colorado, in the so-called McNary-Haugen bill, S. 3555, which exempts from the provisions of the Federal food and drugs act fresh fruit in the condition in which it is severed from the tree, vine, or bush on which it is grown.

In order to present clearly the significance of this amendment and its probable effect, I wish to review some of the phases of the department's experience in the question of spray residue on fruits.

The department has long recognized the necessity for the use of arsenical sprays in the commercial production of fruit. Without them it would be impossible for the industry to exist in its present magnitude. The department not only, but the State experiment stations throughout the country, have urged the adoption of proper spraying schedules to protect fruit from the ravages of insect pests. In the efforts made by all agencies to secure a nation-wide control of these pests the question of possible harmful effect upon consumers of the residues left by spraying was not given serious consideration until action was initiated by the health officials of the city of Boston in 1919 against shipments of western fruit on the ground that the spray residues found were sufficient to cause possible injury to the health of consumers. The department's own investigation of these shipments showed that startlingly high amounts of spray residue actually were present. The department then began a campaign of education among fruit growers and packers to apprise them of the menace involved in the distribution of fruit bearing excessive spray residues. This campaign has been continued consistently since that time, and in it the cooperation of every element connected in any way with the fruit-producing industry has been sought. In fact, the cooperative features of this campaign have been marked by the highest development of coordination not only between Federal and State agencies but between these agencies and the fruit-producing industry itself. Throughout this period of educational work the department, in the enforcement of the Federal food and drugs act, made comparatively few detentions of excessively sprayed fruit. Every effort was made to handle the matter in a thoroughly constructive fashion.

The second event which added great impetus to the campaign for clean fruit was the report from England in the fall of 1925 of arsenical poisonings due to the consumption of sprayed American fruit. These reports were followed by widespread publicity in England not only, but on the European Continent, which practically paralyzed for a time the export market for American fruit. The economic effects of this were very seriously felt by our American producers, being reflected by a distinct reduction in price. The Government of Great Britain threatened an embargo against American fruit if American producers did not bring about a change in their methods which would guarantee a reduction of the spray residue content. It is our conviction that it was only upon the assurances made by this department that every effort would be made through official agencies not only, but by the fruit-producing industry itself, to guarantee the shipment of clean fruit that the embargo was prevented.

In the growing season of 1926 the department placed every available representative in the field to apprise fruit growers and shippers of the seriousness of the situation. The department called upon all interested State agencies and upon the industry itself to assist in disseminating a complete knowledge of the matter. In the enforcement of its plans for the protection of the public health the department steadfastly refrained from general publicity, and, in fact, took every possible step to prevent publicity in the knowledge that should general publicity occur, casting suspicion upon the wholesomeness of fruit, there would be a diminution of consumption approaching a public boycott, particularly of fruit produced in those western regions where it was likely to bear excessive amounts of spray residue. We had witnessed the practical destruction of two or three industries concerning which publicity occurred casting doubt upon the wholesomeness of the products. We wished, if possible, to avoid a similar difficulty for the fruit-producing industry.

It was found after the 1927 season shipments began that wiping methods of cleaning the fruit, which had up to that time been thought efficacious, were not bringing the fruit in many eastern sections, including Colorado, down to the internationally recognized tolerance of one one-hundredth grain arsenic trioxide per pound. In recognition of the difficulties with which the fruit producers were faced, the department refrained from taking action against fruit on this tolerance and made detentions of shipments only upon the basis of an arsenic content several times this figure. At the same time, investigational work was inaugurated to develop more efficacious methods of cleaning, as a result of which the acid-wash method now generally in use was worked out. While there have been widely disseminated reports that the acid-wash method destroys the keeping quality of the fruit, the experience gained in almost two years of its use has shown that when properly applied it does not adversely affect the keeping quality of the fruit. By the observation of simple precautions no fear need be felt by the growers and packers that the process will cause excessive losses. The surveys we have made have definitely shown that the proportion of spoilage in acid-washed fruit is not greater than what can be expected in any normal year in untreated fruit. Recognizing the impossibility of an immediate adoption of acid washing throughout the entire fruit-producing areas of the West, the department did not attempt to impose a tolerance of one one-hundredth grain but has been gradually reducing the tolerance in the expectation that so soon as proper cleaning equipment can be installed throughout the country this tolerance will be put into effect in order that American fruit may enter freely into every foreign market and may be distributed in the domestic markets without adverse action by State and city officials. The department has recently announced to the industry that it would not take action during the coming season on the basis of arsenic content not exceeding two one-hundredths grain per pound of fruit. The industry has ample time to make all provisions necessary for the coming season to meet this tolerance.

The amendment to the so-called McNary-Haugen bill introduced by Senator WATERMAN would exempt all fresh fruit from the provisions of the Federal food and drugs act. If the amendment prevails, there will no longer be a Federal control of the spray-residue question. This will not remove in any degree whatever the control of States, cities, and foreign governments. These agencies can be expected to follow the internationally recognized tolerance of one one-hundredth grain per pound as a guide in their operations. They are not in a position, nor can they be expected, to attempt sympathetic educational work among the growers and to provide technical assistance in the application of efficient cleaning methods. Instead of the situation being under control at the source, it will be controlled at consuming markets, and there is every reason to expect chaotic results. Nothing else could logically follow the independent operations of the many agencies which will be concerned. Furthermore, the abrogation by this legislative action of the promise given to the British Government by the department in 1925 to exert every possible effort to cure the trouble would undoubtedly be construed as sufficient ground by Great Britain not only but by countries in continental Europe to place an embargo upon American fruit, thus turning back a large part of the exportable surplus upon domestic markets. All these developments are sure to be attended by widespread publicity. We happen to know that press representatives throughout the country have a fairly complete knowledge of the situation and have refrained from publishing this information only because the department has been able to convince them that it would be adverse to the best interests of the country. There is also to be taken into account the position which will probably be assumed by growers in the Middle West and in the East, where, due to climatic conditions, there is not a heavy infestation of the codling moth, and such frequent and late sprayings as are prevalent in the West are unnecessary, thus causing little difficulty in meeting the tolerance of one one-hundredth grain per pound. Unquestionably, these growers will carry out the plans which they have heretofore advanced and from which they have been dissuaded by the department to advertise their fruit in consuming centers as free from excessive arsenical residues.

All of these various factors as the department sees them and is able to judge them from its long experience with this problem will unquestionably react against western fruit to a point where the magnificent industry which has been built up in that section of our country will be utterly destroyed. The department throughout its entire dealing with this question has been sympathetic with the growers and has sought by constructive means to aid them in meeting this serious problem. I feel quite sure that the elimination of the department's

regulatory control of fresh fruit through the passage of this amendment will be a fatal blow to this important agricultural enterprise of the West. The department's plans for the coming season contemplate a continuation of its efforts both in Colorado and elsewhere to demonstrate to the industry the most effective methods of cleaning fruit and to render any other helpful service that it can.

Sincerely yours,

W. M. JARDINE, *Secretary.*

The question is on the amendment of the gentleman from Louisiana to strike out the section.

The amendment was rejected.

The Clerk read as follows:

ADMINISTRATIVE APPROPRIATION

SEC. 17. For expenses in the administration of the functions vested in the board by this act, there is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $500,000, to be available to the board for such expenses—including salaries and expenses of the members, officers, and employees of the board and the per diem compensation and expenses of members of the commodity advisory councils—incurred prior to July 1, 1929.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The Clerk read as follows:

Amendment by Mr. ASWELL: Page 60, line 9, strike out all of section 17.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana.

The amendment was rejected.

The Clerk read as follows:

SEPARABILITY OF PROVISIONS

SEC. 18. If any provision of this act is declared unconstitutional or the applicability thereof to any person, circumstance, commodity, or class of transactions in respect of any commodity, is held invalid, the validity of the remainder of the act and the applicability of such provision to other persons, circumstances, commodities, and classes of transactions shall not be affected thereby.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The Clerk read as follows:

Amendment by Mr. ASWELL: Page 60, line 19, strike out all of section 18.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

The Clerk read as follows:

COOPERATIVE ASSOCIATIONS ACT

SEC. 19. Nothing in this act is intended or shall be construed to repeal or modify any provision of the act entitled "An act to authorize association of producers of agricultural products," approved February 18, 1922.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The Clerk read as follows:

Amendment by Mr. ASWELL: Page 61, line 3, strike out all of section 19.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

The Clerk read as follows:

PENALTIES

SEC. 20. (a) The provisions of sections 123 and 124 of the Penal Code, approved March 4, 1909, as amended, shall apply to any member, officer, or employee of the board; and, in addition, it shall be held a violation of section 123 of such code if any member, officer, or employee of the board at any time speculates, directly or indirectly, in any agricultural commodity.

(b) It shall be unlawful (1) for any cooperative association, or corporation created and controlled by one or more cooperative associations, or other agency if such agency is acting for or on behalf of the board under any marketing agreement, or (2) for any director, officer, or employee of any such association, corporation, or agency, to which information has been imparted in confidence by the board, to disclose such information in violation of any regulation of the board. Any such association, corporation, or agency, or director, officer, or employee thereof, violating any provision of this subdivision, shall be fined not more than $10,000 or imprisoned not more than 10 years, or both.

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The Clerk read as follows:

Amendment by Mr. ASWELL: Page 61, line 8, strike out all of section 20.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

The Clerk read as follows:

SHORT TITLE

SEC. 21. This act may be cited as the "Surplus control act."

Mr. ASWELL. Mr. Chairman, I move to strike out the section.

The Clerk read as follows:

Amendment by Mr. ASWELL: Page 62, line 3, strike out all of section 21.

Mr. KETCHAM. Mr. Chairman, I offer as a substitute for the bill just perfected the bill H. R. 12892.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. KETCHAM offers as a substitute for the bill just perfected H. R. 12892.

Mr. DOWELL. Mr. Chairman, I make the point of order that the amendment is not germane to the bill.

Mr. CHINDBLOM. Mr. Chairman, I make the further point of order that there is no bill pending before the committee. The bill is being read by sections and the committee has never considered the bill in toto. There can not be any substitute for the bill in the Committee of the Whole.

Mr. KETCHAM. Mr. Chairman, I desire to be heard briefly on the point of order.

Mr. JONES. Mr. Chairman, I desire to be heard on the point of order.

The CHAIRMAN. The Chair suggests that the Clerk has not yet read the amendment. Will the gentleman send up his amendment in writing?

Mr. KETCHAM. I have the amendment here. Mr. Chairman, I ask unanimous consent that the amendment may be considered as read, in view of the fact that it has already been printed in the RECORD under unanimous consent this afternoon.

The CHAIRMAN. Will the gentleman state his amendment again? He has merely sent up a blank bill.

Mr. KETCHAM. Mr. Chairman, I offer as a substitute for the bill now under consideration the bill H. R. 12892.

Mr. DOWELL. I make the point of order that it is not germane.

The CHAIRMAN. The gentleman from Michigan offers an amendment, which the Clerk will report.

The Clerk read as follows:

Mr. KETCHAM offers as a substitute for the bill now under consideration the bill H. R. 12892.

Mr. DOWELL. Mr. Chairman, I renew my point of order.

Mr. KETCHAM. Mr. Chairman, I desire to be heard briefly on the point of order.

Mr. RAMSEYER. Mr. Chairman, just to refer to a bill by number certainly ought not to be considered here as an amendment. The gentleman can ask unanimous consent to do away with the reading of this amendment, but to refer to an amendment merely by a certain number is a practice for which there ought not to be any precedent set here this afternoon.

Mr. KETCHAM. Of course, this request is made in the interest of the progress of the bill. I think everyone understands, and certainly no one better than the gentleman from Iowa [Mr. RAMSEYER] what is comprehended in the bill H. R. 12892. He has given the bill very thoughtful and careful consideration.

Mr. RAMSEYER. I suggest that the gentleman ask unanimous consent that the amendment be not read.

Mr. KETCHAM. I may say to the gentleman that the request has already been preferred.

Mr. RAMSEYER. The gentleman offered his amendment and there has been no such request since he offered the amendment.

Mr. KETCHAM. Mr. Chairman, what is the present situation? Is the gentleman from Iowa correct in his statement?

The CHAIRMAN. The Chair will ask the Clerk to again read the amendment as proposed.

The Clerk read as follows:

Mr. KETCHAM offers as a substitute for the bill now under consideration the bill H. R. 12892.

Mr. KETCHAM. Mr. Chairman, I ask unanimous consent that the reading of the amendment be dispensed with.

The CHAIRMAN. The gentleman from Michigan asks unanimous consent that the reading of the amendment be dispensed with. Is there objection?

There was no objection.

Mr. DOWELL. Mr. Chairman, I make the point of order on the amendment if the Chair holds that this is equivalent to a reading of the amendment.

Mr. KETCHAM. Mr. Chairman, I call particular attention to section 21 of the bill which we have just completed. Under the heading of "Short title," the section reads:

> This act may be cited as the "Surplus control act."

I submit, Mr. Chairman, that the bill which has now been sent to the desk as a substitute is absolutely on all fours with the title which has always been adopted as the short title of the act which we have perfected.

The proposed substitute plan has in it the export-debenture plan which is incorporated in the amendment just read by title from the desk. It has in it the identical features of the bill which we have been perfecting this afternoon, except in so far as the equalization fee is concerned. It has in it the board; it has in it the loan feature; it has in it the insurance feature; and in my opinion it is a better instrumentality of surplus control than that afforded by the equalization-fee plan.

Therefore, it seems to me, Mr. Chairman, from the standpoint of being germane, the purpose of the amendment sent to the desk is certainly germane to the main purpose of the bill which we have been perfecting this afternoon. Therefore I respectfully suggest to the Chair that the bill is in order at this particular point so far as the question of germaneness is concerned.

Mr. DOWELL. Mr. Chairman, just one moment. I desire to call the attention of the Chair to the decision referred to by the Chair in a ruling a little while ago on another amendment substantially along the line of the amendment offered by the gentleman from Michigan [Mr. KETCHAM]. It is the decision of Mr. Sanders, who was chairman. It is found in the CONGRESSIONAL RECORD of May 24, 1924, in volume 65, part 9, on page 9438. From that decision I want to read a line or two:

> However, the mere fact that it tackles the same problem does not necessarily make it a germane amendment.

He held in that opinion the same character of amendment as this one out of order. I do not desire to take further time, because the Chair himself cited this opinion a few moments ago. I think the Chair is very familiar with the question. [Cries of "Rule!"]

Mr. JONES. Mr. Chairman, I have before me the decision to which the gentleman from Iowa refers. The bill offered by the gentleman from Illinois [Mr. RAINEY] at that time did tackle the problem along the same line that these measures approach it. The reason why the plan offered by the gentleman from Illinois was not considered in order was that the old McNary-Haugen bill was an entirely different bill, both in theory and in wording, from the one that is now before the House to-day. The old McNary-Haugen bill formed an export corporation and fixed a ratio price based on the 1905 and 1913 average as agricultural and industry and applied that to the modern price and provided that this export corporation should buy at not less than the ratio price all the commodities and export them. The form of corporation which handled the commodities had the fixed minimum price, that being the ratio price.

The amendment offered by the gentleman from Illinois was to the effect that when the price level was below the cost of production scrip should be issued on the difference between the world price and the cost of production and this given to the producer. The scrip was to be tenderable in payment of customs duties. This amounted to a bounty out of the custom receipts, but did not approach the problem from the point of view of handling the surplus. The present McNary-Haugen bill has left the old McNary-Haugen bill and has come around to the present program; both of the pending bills have the same general purpose. The old McNary-Haugen bill did not have the cooperative feature. It did not make loans to permit the corporation to buy enough of the surplus to let the price come up to the proper level, but simply formed an export corporation which had authority at the price fixed in the bill to buy all the surplus and handle all the surplus. It was not the theory of that bill at all, as shown by this statement in the latter part, to let certain parties buy up part of the surplus and let the domestic price come up to it; but it was to buy all the surplus. It had no loan features. It had no board. It had no insurance feature. It simply undertook to authorize a Government corporation to buy all the farm commodities at the price fixed in the bill, this fixed price being a minimum price; and that was the line of attack all during the argument, that it was a price fixing bill. It was not a bill that treated the surplus as simply a matter to be lifted up and let the domestic price automatically rise, but it fixed the price. [Cries of "Rule!"]

I will take only a little longer to present my view. There is $400,000,000 involved in this bill. The discussion has been going on for four years, and I think the House should be willing to listen to a proposal that would really grant relief. I just want to make this point, Mr. Chairman, and then I shall be through: That in both of these bills the surplus problem is the main problem to be handled; the bills in the first three features are almost identical, differing only in the method of raising the money.

The old McNary-Haugen bill was not like the Rainey bill or the debenture plan, but the present McNary-Haugen bill has come around to the same theory of lifting up enough of the surplus to let the main price come up to its level.

The main purposes of both bills are exactly the same, and the methods of handling are simply incidental.

Mr. CANNON. Mr. Chairman, regardless of the terms of the old McNary-Haugen bill, it presented, in substance, a proposition to secure farm relief by a certain definite plan, and the Rainey amendment in effect proposed to attain the same object by another plan, just as the present bill offers relief by a definite plan and the amendment offered by the gentleman from Texas [Mr. JONES] proposes relief by another plan.

Now, it has been repeatedly held that to a proposition to effect a purpose by a specific method an amendment to achieve the same object by another unrelated method is not germane. It will only be necessary to cite one such decision. In 1918, in the second session of the Sixty-fifth Congress, the House was considering a bill providing for the conservation of foodstuffs. The method proposed for conservation of food was by educational and demonstrational methods. An amendment was offered proposing to achieve the same purpose by another method—that is, by prohibiting the use of grain in the manufacture of intoxicating liquor—but the Chair held, in a notable decision, that it was not competent to amend a bill proposing to attain an object by means of a definite plan through an amendment providing for achieving the same purpose in another way.

The amendment here proposed seeks to amend a bill providing for farm relief by attaining the same object in a way different from that under consideration and therefore is not in order.

The CHAIRMAN. As the Chair suggested when this question was brought up in a different form, he has had plenty of time to investigate this particular point of order. He has gone back to the Haugen bill of 1924 and reread that bill. The heart of the present Haugen bill, as has been stated here in the debates, is the equalization fee, and the Chair thinks that the heart of the Haugen bill in 1924 was the equalization fee.

In order to show that the principle of the bill has not changed very much, I will read just a part of two sections in the 1924 Haugen bill. Page 17, section 201, of that bill provides:

> In order that the producers of each basic agricultural commodity may pay ratably their equitable share of the expenses of the corporation.

That is the theory of the present Haugen bill. Reading further from the 1924 Haugen bill:

> Having due regard to such estimates—

That is the estimates of the board as to losses, expenses, and so forth—

> the corporation shall determine, as nearly as may be, the total amount of such expenses and losses which will be incurred or sustained as a result of the operations of the corporation in respect of each agricultural commodity during each operation period.

I think those two sections alone are enough to indicate to the committee that, while the ratio price was mentioned in the 1924 bill, it was the plan of the bill to bring up the price of agricultural commodities to the general ratio price, the equalization fee was the same in that bill as it is in this bill.

The debenture plan introduced by the gentleman from Michigan [Mr. KETCHAM], my colleague, and the gentleman from Texas [Mr. JONES], proposes what seems to the Chair a very different proposition. The Chair thinks that the reason and logic of the rule would tend to support the point of order, but he is not required to base his decision entirely upon the reason of the rule, as there is a precedent directly on all fours. The gentleman from Illinois [Mr. RAINEY] in 1924 offered a substitute which to the Chair seems identical in principle with the substitute offered now by the gentleman from Michigan [Mr. KETCHAM], which contains the debenture plan. In the Rainey substitute the requirement was that all exporters of certain agricultural commodities should be paid in customs scrip. It was called customs scrip at that time instead of a debenture.

The exporters were to be paid the export deficiency price, which the Rainey substitute defined to be the difference not in the cost of production, as in the Ketcham-Jones substitute, but in the probable average selling price in world markets outside of the United States of the agricultural commodities embraced within the substitute and the probable average cost of producing them on farms in the United States, plus 10 per cent. Now, the Ketcham-Jones debenture plan proposes to pay the exporters of seven different agricultural commodities a fixed price, and on the remaining agricultural commodities it proposes to pay them an amount based upon the difference between the cost of production in the United States and in competing foreign countries. Under the Ketcham-Jones substitute it is proposed to pay the exporters out of the Federal Treasury, while in the Haugen bill it is proposed to raise the expense of administering the law out of the equalization fee.

During the consideration of the Haugen bill in 1924 the Chairman had occasion to rule several times on several different substitutes. The Rainey substitute seems to be so much in point in this case that the Chair thinks it is a precedent, but Chairman Sanders said in another decision:

> It is not possible to offer a substitute for a bill which undertakes to give the same relief and yet departs entirely from the method of the bill under consideration.

In another decision:

> This proposition, while it undertakes to relieve agriculture, undertakes to do it in an entirely different way and in such manner as would not be proper by way of substitute.

Then, in addition to these two decisions from which I have quoted briefly, he made the decision which has already been quoted this afternoon and read in full by the gentleman from Illinois [Mr. RAINEY], expressly declaring his substitute out of order. The Chair, following the reason of the rule and the precedents, sustains the point of order and holds the amendment offered by the gentleman from Michigan [Mr. KETCHAM] not germane to the bill.

Mr. HARE. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from South Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

> Amendment offered by Mr. HARE: Page 1, line 3, strike out all after the enacting clause and substitute in lieu thereof H. R. 10562.

Mr. DOWELL. I make the point of order, Mr. Chairman, that the amendment is not in order, the time having passed when the amendment could be offered, and also that the amendment is not germane.

The CHAIRMAN. Does the gentleman from South Carolina desire to discuss the point of order?

Mr. HARE. I do; yes.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. HARE. Mr. Chairman——

Mr. DOWELL. Mr. Chairman, this amendment is so clearly out of order it seems there should be no discussion about it and the Chair should pass upon the question.

Mr. HARE. Mr. Chairman, I hope to show the gentleman it is not clearly out of order, but, on the contrary, I hope to show it is absolutely germane and in order.

Mr. DOWELL. Will you please address your remarks to the Chair.

Mr. HARE. I was not addressing the Chair. I am endeavoring to enlighten the gentleman himself, but I want to call the attention of the Chair——

Mr. CHINDBLOM. Mr. Chairman, I reserve a point of order for the purpose of discussing another phase of this matter. If the practice of offering substitutes in this manner is continued, I want to interpose other grounds for a point of order. I will reserve them for the present.

Mr. HARE. Mr. Chairman, I invite attention to the first part of the bill, which states the real purpose of the bill. The one we have under consideration provides that it is an act to establish a Federal farm board, to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce. The bill I am proposing provides for the establishment of a farm surplus board, to aid in the orderly marketing, control of production, disposition of surplus agricultural commodities, and other purposes. To my mind the purposes as set forth in the two bills are almost identical, and I want to say further that the provisions of the bill are quite identical.

If you will examine the provisions of the two bills, you will find they provide for a board to be appointed in the same way, one member from each of the 12 Federal land-bank districts. The men appointed are supposed to have similar qualifications. The duties devolving upon them are practically the same. The purposes of the bills are practically the same, the only difference being that the equalization fee is not found in the proposed bill and the insurance provision is not found in it.

Mr. CHINDBLOM. Mr. Chairman, the Chair may well take the gentleman at his word. The gentleman who has offered the amendment says that the equalization fee is not in his bill and the insurance feature is not in his bill. The Chair has already ruled that the equalization fee goes to the heart of the measure before the committee, and on that statement alone I think the Chair may well sustain the point of order without any further argument.

Mr. HARE. Mr. Chairman, I would like to submit that the question of germaneness goes to the purpose and the subject matter and not to the details of operation. The purpose of these two bills is to control the surplus of farm products and to establish a system of scientific marketing. They are the two essential things involved in both bills, and I contend that my bill is germane and properly submitted.

Mr. CHINDBLOM. Mr. Chairman, I make the further point of order that this is a substitute for the entire bill. The Aswell amendment, in the nature of a substitute, which has already been adopted, is a substitute for the entire bill. The time to offer a measure of this kind would have been by way of amendment to the Aswell substitute, and this proposal comes too late now.

I did not argue that point on the other substitute, because it was so clearly not germane, but I think this objection is clearly in point with respect to this amendment and should dispose of the point of order.

Mr. HARE. Mr. Chairman, my purpose in proposing this bill now is to give the real sympathizers of agriculture an opportunity to support a bill that can become a law and give real relief to the farmer. The bill we have just been considering is now in good shape to be passed and vetoed by the President, and if you refuse to consider this bill at this time it is equivalent to saying that you are not specially interested in getting farm-relief legislation at this session. Mark my prediction, if you refuse to consider this bill now, agriculture will go another year before it can expect any relief whatever from Congress.

The CHAIRMAN. The Chair is ready to rule.

The Chair, from a hasty examination of the substitute, does not find anything in it which leads him to think that it is not germane to the Haugen bill. It sets up a board and contains the loan features somewhat after the manner of the Haugen bill outside of the equalization-fee provision. The Chair feels, however, that the time for offering this as a substitute has passed. If it was the purpose to offer it as a substitute, it might well have been offered at the time the Aswell amendment was under consideration. For this reason the Chair sustains the point of order.

Mr. JOHNSON of Oklahoma. Mr. Chairman, for the past several days that we have been considering this all-important farm-relief legislation on the floor of the House we have heard no small amount of criticism of those responsible for the pending measure.

The gentleman from New York [Mr. CLARKE] in his brilliant and sarcastic way declared the bringing out of the McNary-Haugen bill due to political expediency and charged it, among other things, with being economically unsound. If the distinguished gentleman would get away from New England and see the dire distress our farmers of the South and West are suffering, he and other opponents of this measure would surely know there is real, urgent, and desperate need for farm legislation by the present session of Congress.

As to the oft-repeated declaration on the part of enemies of the pending farm-relief measure that it is "unsound," I do not pose as an expert on the subject, but the Agriculture Committee of this House has held numerous hearings on this bill since last January, at which time many of the best-informed men in America were heard and almost without exception those great leaders pronounced the pending bill as not only economically sound, but a great forward step in solving the problem of relieving agriculture of the unjust burdens which have impoverished the farmers of America.

But, since there has been so much said here in criticism of those responsible for this farm measure, it might not be amiss to reflect, in passing, on the long roster of those who are so bitterly opposing this bill. We see here lined up against this measure the element which calls itself "big business," fighting desperately not only this but every other bill we have had here in the interest of the farmers, who feed and clothe the world. I am a friend of every legitimate business, but the special-interest bunch which is bending every effort to defeat this bill has nothing in common with the tillers of the soil nor real business interests of the great South and West.

Now, let us see who is fighting this farm measure anyway. The speculators are loud in their opposition to it. In one breath they declare it is positively unworkable and in the next they admit that they are afraid it might work. If it is "economically unsound," why are these high-powered speculators so exercised over the prospects of the bill's passage? If, indeed, the McNary-Haugen bill should pass and happen to escape the President's veto and is as unsound and unworkable as this great array of speculators in farm commodities profess to believe, then why are they spending so much time here in opposition to its passage? We have heard considerable about the so-called farm lobby supporting this measure, but why, may I ask, have we heard so little of Wall Street gamblers and their great lawyers and high-powered lobbyists who have come here in droves from the manufacturing centers to oppose this bill which has for its purpose aid for the American farmer?

Again we are told by enemies of this measure that the Hon. Andrew Mellon, distinguished Secretary of the Treasury, has written a letter setting forth his reasons for opposing the McNary-Haugen bill. And some of you appear to think the famous Mellon letter ought to settle the issue, that Congress will not dare pass a measure which does not have the sanction of the Secretary of the Treasury. Without any desire to show disrespect to Mr. Mellon, I am frank to say that if this bill had the full sanction of Secretary Mellon I would feel skeptical about it being what the farmers want or need.

The distinguished Secretary of the Treasury and his faithful followers in Congress seem to oppose this or any other farm-relief program that has the slightest possibility of being real farm relief; they quite naturally oppose all measures which have for their purpose securing for the farmers reasonable prices for the products of the farm. Mr. Mellon and other beneficiaries of special privilege are very much alarmed lest the proposed measure might become a subsidy to the poor, distressed farmer. We heard no such protests from these quarters when the Congress passed the Fordney-McCumber tariff law, which granted subsidies to the industrial East and which robbed the farmer of millions in farm products.

Friends of the pending farm measure do not for a moment agree that it is fair to refer to this measure as a subsidy, but it is an honest effort to help the farmer help himself and to restore to the farmer the stabilization of farm products, which he was robbed of, if you please, by an unjust and discriminatory tariff. But I submit that if any class is entitled to special consideration by the Congress it is the farmer. [Applause.]

Mr. Chairman, several of my colleagues, especially on this side of the House Chamber, have persisted in this contention that we should revise the tariff to give the farmer a square deal and have insisted there would be no necessity for the McNary-Haugen bill or any of the many measures introduced here which seek equality for agriculture if we only had an honest revision of the tariff. I agree with these gentlemen, but this House early in the session turned down and refused to consider the Senate resolution proposing to revise the tariff. We are now confronted with a distressing condition and not a fanciful theory. We know this Congress will not revise the tariff.

During all of the debate for the past several days the one "scarecrow" the opposition to this measure has employed most effectively is the "big stick" of the President. The threat of another presidential veto has been swung high above our heads. So persistent have the enemies of this measure been in advising us of the absolute certainty of Executive veto that this body became terrified yesterday and for the time being eliminated what many of us believe to be the very heart of this bill—the equalization fee. But this afternoon friends of the bill here have reorganized their forces and reversed their decision of yesterday. For my part, Mr. Chairman, I am not alarmed because of this threat of those who claim to know the President's mind; and it is quite evident that the House is honored by having many who know the mind of the President. I say I am not alarmed about the much-discussed veto. I am determined to do my duty as I see it. Why, that word "veto" seems to be a nightmare to some of you. We have heard it almost constantly since last December. When the Democrats of this House were trying to relieve the small business man in the tax reduction bill we were warned about the veto. Only recently, when the House endeavored to pass a comprehensive flood control bill, and some of us who have tributaries, like the Canadian and the Washita Rivers, were bending every effort to get a square deal for those living on our tributaries, these self-styled White House spokesmen threw up their hands in holy horror and again told us flood control would be vetoed by the President. Mr. Chairman, it just occurs to me that if those who admit they know the mind of the President are correct and the tax reduction bill, the flood control bill, and the farm relief bill are doomed to a veto, this administration will break the previous records for breaking faith with the people, and the Republican Party already had a mighty high batting average in this respect.

I am not one of those who claim that the McNary-Haugen bill is a perfect measure. In its present form it doubtless has its defects, but it can be strengthened and perfected after the bill is put into operation. Although it possibly is not altogether the bill I would have written, it represents the judgment of the majority of the Agriculture Committee and is sponsored by practically every farm organization in the country. It is a great forward step in the right direction. It is a belated recognition of equality of agriculture. The McNary-Haugen bill is the only measure which has the slightest chance of passage. Let us give it a chance.

One thing is certain. Agriculture can not continue under the present deplorable conditions. In 1920 Government experts gave the mortgage indebtedness of the farms of America as $3,500,000,000, but to-day the mortgage indebtedness of the farmers has jumped to $12,450,000,000. Add to this $20,000,000,000 of shrinkage in farm values within the past eight years and we have the appalling figures of over $32,000,000,000 of actual loss to our farmers within only eight years. We know that since 1920 over 2,000,000 farmers have lost their homes and 4,000,000 of our farm population have been forced to leave the farms. More than 9 per cent of the farms of America are now vacant and uninhabited. These thousands of farms stand to-day as silent sentinels of the distress in which our farmers find themselves.

Within a few minutes we are to vote on this the most important bill to the farmers of America of any other measure that will come before the present session of Congress. We must pass the pending bill or nothing. We must give the farmers this measure or go home empty handed, so far as farm legislation is concerned. There have been many beautiful things said about the farmer during all this debate, but mere platitudes will not suffice now.

Within a few moments we must face the issue, and I hope and believe the reply of you gentlemen will be overwhelmingly in favor of the American farmers. [Applause.]

The CHAIRMAN. The question is on the amendment offered by the gentleman from Louisiana [Mr. ASWELL].

The amendment was rejected.

Mr. HAUGEN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House, with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. MAPES, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, having had under consideration the bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce, had directed him to report the same back to the House with sundry amendments, with the recommendation that the amendments be agreed to and that the bill as amended do pass.

The SPEAKER. Under the rule the previous question is ordered. Is a separate vote demanded on any amendment?

Mr. ASWELL. Mr. Speaker, I demand a separate vote on the Aswell substitute.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them in gross.

The other amendments were agreed to.

The SPEAKER. The question is on the Aswell amendment in the nature of a substitute.

Mr. ASWELL. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 146, nays 185, answered "present" 3, not voting 96, as follows:

[Roll No. 72]

YEAS—146

Mr. Free (for) with Mr. Wyant (against).
Mr. Dickstein (for) with Mr. Boies (against).
Mr. Roy G. Fitzgerald (for) with Mr. Canfield (against).
Mr. Davenport (for) with Mr. Wingo (against).
Mr. Bland (for) with Mr. James (against).
Mr. Deal (for) with Mr. Kerr (against).
Mr. Linthicum (for) with Mr. Williams of Texas (against).
Mr. Dempsey (for) with Mr. Celler (against).
Mr. Garrett of Tennessee (for) with Mr. White of Colorado (against).
Mr. Pratt (for) with Mr. Davey (against).
Mr. Porter (for) with Mr. Sullivan (against).
Mr. Connally of Texas (for) with Mr. Wurzbach (against).
Mr. Golder (for) with Mr. Johnson of Indiana (against).
Mr. Butler (for) with Mr. Pou (against).
Mr. Clarke (for) with Mr. Irwin (against).

General pairs:

Mr. Shreve with Mr. Tillman.
Mr. Connolly of Pennsylvania with Mr. Sears of Florida.
Mr. Stalker with Mr. Bloom.
Mr. Morin with Mr. Douglas of Arizona.
Mr. White of Maine with Mr. Bulwinkle.
Mr. Wainwright with Mr. Casey.
Mr. Moore of Ohio with Mr. Doyle.
Mr. Parker with Mr. Griffin.
Mr. Freeman with Mr. Larsen.
Mr. Graham with Mr. Hudspeth.
Mr. Strong of Pennsylvania with Mr. Combs.
Mr. Glynn with Mr. Drane.
Mr. Houston of Delaware with Mr. Fisher.
Mr. Sanders of New York with Mr. Gregory.
Mr. Kurtz with Mr. Kent.
Mr. Kendall with Mr. Lyon.
Mr. Kelly with Mr. Kunz.

Mr. JOHNSON of Texas. Mr. Speaker, my colleague, Mr. HUDSPETH, is not present on account of illness.

Mr. O'CONNOR of New York. Mr. Speaker, I want to announce the absence of my colleague, Mr. CELLER, who is ill. If present he would vote "aye."

The vote was announced as above recorded.

The SPEAKER. The question is on the committee substitute as amended to the Senate bill.

The committee substitute was agreed to.

The SPEAKER. The question is on the third reading.

The bill was ordered to be read a third time, and was read the third time.

Mr. ASWELL. Mr. Speaker, I move to recommit the bill with instructions.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. ASWELL moves to recommit the bill to the Committee on Agriculture with instructions to report the bill back forthwith with the following instructions: Page 42, line 17, strike out sections 9, 10, and 11.

Mr. ASWELL. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion of the gentleman from Louisiana to recommit the bill.

Mr. ASWELL. On that, Mr. Speaker, I ask for the yeas and nays.

The SPEAKER. The gentleman from Louisiana demands the yeas and nays. All those in favor of taking the question by the yeas and nays will rise. [After counting.] Fifty-five Members have risen, not a sufficient number, and the yeas and nays are refused.

The question now is on the motion to recommit the bill with instructions.

The question was taken, and the motion of Mr. ASWELL was lost.

The SPEAKER. The question is on the passage of the bill.

Mr. DOWELL. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 204, nays 122, answered "present" 3, not voting 101, as follows:

[Roll No. 73]

Mr. Shreve with Mr. Fisher.
Mr. Graham with Mr. Hudspeth.
Mr. Freeman with Mr. Larsen.
Mr. Kurtz with Mr. Kent.
Mr. Kelly with Mr. Kunz.

The result of the vote was announced as above recorded.

On motion of Mr. HAUGEN, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. BACON. Mr. Speaker, yesterday the Speaker appointed a funeral committee to attend the funeral of the late Representative THADDEUS C. SWEET, of the third New York district. That committee was made up of the following Members:

JAMES S. PARKER, BERTRAND H. SNELL, S. WALLACE DEMPSEY, ARCHIE D. SANDERS, CLARENCE MACGREGOR, FIORELLO H. LAGUARDIA, DANIEL A. REED, J. MAYHEW WAINWRIGHT, JOHN TABER, FREDERICK M. DAVENPORT, HARCOURT J. PRATT, JOHN D. CLARKE, CLARENCE HANCOCK, WILLIS C. HAWLEY, ALLEN T. TREADWAY, JOHN CAREW, THOMAS CULLEN, CHRISTOPHER D. SULLIVAN, ANTHONY J. GRIFFIN, JOHN J. BOYLAN, GEORGE W. LINDSAY, D. J. O'CONNELL, ROYAL H. WELLER, WILLIAM W. COHEN, and JOHN J. O'CONNOR.

The members of the committee were compelled to leave before the final vote was taken on this bill. I ask unanimous consent that the names of this committee be inserted at this point in the RECORD, so that their absence may be noted.

I am also requested to announce that Mr. JAMES S. PARKER, Mr. BERTRAND H. SNELL, Mr. JOHN TABER, Mr. JOHN D. CLARKE, Mr. HARCOURT J. PRATT, Mr. FREDERICK M. DAVENPORT, Mr. CLARENCE E. HANCOCK, Mr. CLARENCE MACGREGOR, and Mr. DANIEL A. REED would have voted "no" on the final passage of this bill had they been able to be present at this time, had they not been obliged to catch the train to attend Mr. Sweet's funeral. I am not informed how the other Members of the funeral committee, who have already left, would have voted on the final passage of the bill.

Mr. MOORMAN. Mr. Speaker, other Members in that funeral party may have voted for the bill if they had been present. I think they should be permitted to so state in the RECORD when they return, if they desire.

The SPEAKER. That is a question that may be taken up when it arises.

Mr. BLACK of New York. Mr. Speaker, my colleagues, Mr. CULLEN, Mr. COHEN, Mr. CAREW, Mr. GRIFFIN, and Mr. SULLIVAN, are not recorded on this roll call because they have left Washington to attend the funeral ceremonies of the late Congressman SWEET. I am authorized to announce that if Mr. CULLEN and Mr. COHEN had been present they would have voted "no."

Mr. SOMERS of New York. Mr. Speaker, the gentleman from Missouri [Mr. COMBS] is unable to be present to-day on account of illness. He has requested me to state that if he had been present he would have voted against the bill.

### FOURTH-CLASS POSTMASTERS

Mr. MEAD. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD upon the bill H. R. 7900, respecting fourth-class postmasters.

The SPEAKER. Is there objection?

There was no objection.

Mr. MEAD. Mr. Speaker, the purpose of the bill H. R. 7900 is to grant allowances to fourth-class postmasters for rent, fuel, light, and equipment. It is not a measure intended to increase the compensation of these underpaid Government workers, although it does enable them to retain the small compensation they earn. It seeks to correct an injustice that has existed since the establishment of these post offices, namely, requiring the fourth-class postmasters to provide quarters, heat and light, and to purchase the equipment necessary to transact a necessary public business. They are the only Government workers required to do this.

Former Postmaster General Work, under date of September 12, 1922, said:

> The fourth-class postmasters are confronted with a financial problem. Back in the old days the average fourth-class post office in this country was a narrow counter rigged up in the rear of a general store at a rural crossroads, serving a few patrons that dropped in during the day to send a letter or to inquire if an epistle had arrived for them. Now this condition has changed. Many a fourth-class post office is a veritable beehive of industry. Hundreds of pounds of parcel-post packages and second-class mail matter, including the daily papers and the standard periodicals, pour in upon the postmaster every day for distribution to the farmers living in his community center. The post office is located in the front of the store. It is a glass-incased inclosure taking up frequently half of the building, and there are rows of privately owned lock boxes rented by the patrons who desire to collect their mail at all hours of the day.
>
> With the advent of the parcel post it is now conservatively estimated that the receipt of mail matter in fourth-class post offices exceeds the outgoing mail many times. For the work of handling these thousands of parcel-post packages, besides the provision of storage space for them, the fourth-class postmasters get no direct compensation under the terms of the present law.
>
> A fourth-class postmaster is required to pass a competitive civil-service examination. His character and reputation in the community are the subject of searching inquiry before the commission is given him. The commission is all he receives from the Government with which to transact the business of the post office. It is necessary for him to secure quarters in which to maintain his office that must be easily accessible to his patrons and consequently of the highest rental value. He must also purchase fixtures, the cost of which will vary according to the civic pride he takes in the fact that he is an official representative of his Government. He must have the office properly heated at all times as well as adequately lighted so that business may be transacted in the early and the late hours of the day. Carriers of rural routes running from his office must also have space assigned to them in which to sort their mail and make preparations for departure over their routes, and space must be furnished them to do their work.

Mr. Work's statement is an accurate presentation of the situation as it existed in 1922, and conditions have since grown worse on account of the tremendous increase in the volume of incoming second, third, and fourth-class mail, greatly adding to the responsibility and work of the fourth-class postmaster without adding a penny to his compensation.

There were on January 1, 1928, 34,401 fourth-class offices. On July 1, 1913, there were 49,614. The extension of rural free delivery has eliminated a great number of fourth-class offices. From this it will be seen that the appropriation needed to reimburse these postmasters for necessary expenditures to conduct their offices will decrease from year to year.

At the time hearings were held on this bill by the subcommittee of which I am a member, a report was submitted by the secretary of the National League of District Postmasters, as follows:

| | |
|---|---|
| States reporting | 47 |
| Number of post offices reporting | 2,769 |
| Amount of salaries | $1,783,544 |
| Rental value of post-office quarters | $214,605 |
| Amount expended for fuel and light | $114,666 |
| Value of equipment | $372,122 |
| Average salary of those reporting | $644 |
| Percentage of salaries expended | 21.8 |

Now, here is a condition of Government employment that manifestly needs correction. Those of us who represent rural districts, wholly or in part, know that the value of the services of the country post offices is not alone as agencies for handling the mails in their respective communities. In thousands of these places the postmaster is the sole connecting link between the people and the Government. He is the guide, counsellor, and friend of those whom he serves and is called upon to be the leader in the social, civic, and patriotic activities that help to make good and substantial citizens.

The percentage of stamps on outgoing mail upon which his compensation depends is no index of the amount of work he must do nor the space required and equipment needed. As Postmaster General Work said, the day has passed when a post office of the fourth class could be conducted in the rear of a store as a side line to the business. Since their induction into the civil service the regulations require that they give their personal attention to the post office during business hours, which means anywhere from 10 to 14 hours daily.

It is true that the Postal Laws and Regulations permit fourth-class postmasters to engage in other business, limited in character. If this were not true there would be no post offices of this class because no man or woman could live on the small compensation received.

While the Postal Laws and Regulations permit a fourth-class postmaster to engage in other business, after an office has reached a grade of $500 salary it requires all the time of one person to attend to it. Either business or post office must be neglected, and the postmaster must hire some one to run his private business or some one to help him run the post office, of course, at his own expense. This was not true prior to 1912, because incoming and outgoing mail were more nearly equal. Since the introduction of parcel post and rural free delivery this service has undergone a complete change. The incoming mail, due to parcel post, requires much greater space, more work, but yields not one cent of revenue to the postmaster.

The laws says that third-class postmasters shall be granted an allowance for rent, fuel and light, and clerk hire. So a postmaster with postal receipts of $1,490, with a salary of $1,090, gets no allowance, but is entitled to it when he has receipts of $1,500 and a salary of $1,100. Though the office equipment and help are the same, in the latter case, he, as third class, may get what he is denied as a fourth class.

A difference of $10 in his receipts and $10 in his compensation will make a vast difference in his condition, because he then gets the allowances enumerated. There are a great many postmasters who are on the edge of the third class, and some of them have been on the edge of it for a number of years, but can not quite reach the mark required with regard to receipts. They have no allowances, but if they could jump that little hurdle, which may involve only an additional $10, or $20, or $30, of receipts they would be entitled to these allowances. So it is my contention that there is too big a spread there, and I think that this allowance based on compensation would bridge that gap.

In no other branch of the Government service is it required that its officers or agents furnish equipment necessary to carry on the Government's business. The great bulk of parcel post goes from city to country; hence the country postmasters are the distributing agents of this great volume of mail, performing the work and bearing the expense, but receiving no compensation for it.

Immense postal revenues are secured from the great mail-order centers. The contract entered into by the Post Office Department insures delivery through the country post office. As the distributing agent it is unfair to deny him compensation for his work, his building, equipment, heat, and light—all necessary to complete the contract.

It used to be said that these postmasters were glad to get the offices because it brought trade to the store. This is no longer the case, owing to rural free delivery, the mail-order business, and the automobile. Even if it did, that would be no justification for the Government to require the postmaster to donate rent, fuel, light, and equipment. While department regulations permit the fourth-class postmaster to engage in certain business activities, if he allows his other business to interfere with the proper discharge of his post-office duties, an inspector speedily recommends his removal.

Now, the fact is, that the storekeeper, by virtue of his position as postmaster, invites competition from outside. He is the Government agent of the mail-order houses in distant cities and near-by department stores, both of which use the parcel post and C. O. D. to take the trade from the locality served by the fourth-class office. Further proof that it is not a trade bringer is found in the fact that the annual turnover in the fourth-class postmaster service is approximately 20 per cent.

None of us, I believe, is proud of the fact that we have 34,400 men and women listed as officers of the Government—the only Government official with whom many of our citizens come in contact—whose average compensation is a little more than $500 a year. None of us, I feel assured, is content to permit these people to equip and maintain these Government agencies out of this pitiful wage. I firmly believe that it is the duty of the Government to be concerned with the welfare of its humblest citizens. How, then, can we permit a system to exist that makes it mandatory for this class of postal workers to donate part of their compensation in order that a necessary Government business be properly conducted?

MUSCLE SHOALS AND BOULDER DAM

Mr. BECK of Wisconsin. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD relative to Boulder Dam and Muscle Shoals.

The SPEAKER. Is there objection?

There was no objection.

Mr. BECK of Wisconsin. Mr. Speaker, I feel that in effect I have been gagged in the matter of discussing the Power Trust and its effect upon the life of the American people. As it is a question of supreme importance, and as I realize that a considerable number of my constituents, being vitally and immediately affected, have expected me to go into this matter; and as the chairman of the Rules Committee is refusing to allow the Muscle Shoals bill, already passed the Senate, to come up in the House, I am hereby extending my remarks in the RECORD. I wish there were some more effective course, but no way is open to a Member of the House of Representatives, except by the unanimous consent of all Members present, to discuss a governmental policy, no matter how grave may be the necessity for such discussion, unless a bill or resolution involving that policy is actually pending before the House, no way except by "extending" his remarks in the CONGRESSIONAL RECORD. An "extension of remarks" means, of course, that what is contained in that "extension" has not been any part of oral debate, not a word of it has been uttered in the hearing of anybody, either in or out of Congress; but that it merely has been printed in the RECORD, where, if any Member is interested and has the time, he may read it.

This is one of the rules of the lower House of Congress. In the Senate, with its smaller membership, no such rule is necessary. Unlimited debate is permitted. A Senator need not wait until a bill or resolution is under consideration to discuss a subject. A Senator has the privilege of addressing his colleagues "on the state of the Union" which, of course, may include any public policy, any tendency or drift in affairs that may be of public concern. But in the House of Representatives with its 435 Members, it is necessary, in the very nature of things, that debate shall be limited to those subjects actually before the body in the form of a bill or a resolution.

However valuable this rule may be in expediting the business of the House, it nevertheless is not without its disadvantages to the public and not without its hardships upon the Members of the House. For it operates not only to prevent the discussion of many important matters which are very properly of concern to the legislative branch of the Government, but it compels any Member of the House who would escape being gagged to print and publish at his own expense any matter he may feel it his bounden duty to bring to the attention of the people of his district or of the country.

Now, this condition at times operates tremendously against the public interest, for it not infrequently happens that the things which Congress does not do and does not consider are of infinitely greater importance than anything it does or considers at that particular session.

It is because there has come to my attention a matter of the gravest public concern and of the widest possible effect—and yet a matter which is not before the House—that I am resorting to the only avenue left open to me—the "extension of my remarks" in the RECORD and paying from my own pocket, as the law requires, the expense of paper and printing that I may report to the people of the district I represent the conditions I have found and that, in my judgment, require the immediate consideration of voters generally and of Congress particularly.

Electricity is assuming daily a larger and more important part in the industrial and domestic life of the American people and daily is exercising a greater influence in Government—Federal, State, and local. With it we light our streets, churches, theaters, offices, stores, homes. It supplies the motive power for great transportation systems, street railways, interurbans, and even for great stretches of transcontinental railroads. On the farms it turns the cream separator, it grinds the feed, it pumps the water, it milks the cows. In the home we use it to run the washing machines, to do the ironing, to do the cooking, and to sweep the floors. Now we are beginning to use it for heating the homes.

Some recent disclosures show that it is being used to elect Senators and Congressmen and governors and members of the legislatures, mayors and members of the city councils, and county boards, and that it has secured the appointment of men to high official positions in both the Federal and State Governments.

As yet the people are without adequate control over the rates charged for electrical current. The charges are exorbitant, the profits of the power companies are enormous.

BOULDER DAM AND MUSCLE SHOALS

The question as to whether the people of the United States, who built the dams and power plant at Muscle Shoals, shall operate that project for their own benefit or shall be compelled by Congress to turn it over to the Power Trust to operate for its benefit is not before the House.

Neither is the question before the House as to whether the Government shall build Boulder Dam and thus protect the farmers in the Imperial Valley against floods and sell the power developed by this dam so that the Government may reimburse itself for the money expended.

And if we are to accept what the chairman of the Rules Committee said to this House a few days ago, neither of these questions will come before the House, simply because he himself does not believe in "putting the Government in business."

Nevertheless, I propose to discuss both Muscle Shoals and Boulder Dam. I shall endeavor to show why and how the power company is making this fight against Government operation of the Muscle Shoals plant and against the Government producing and selling power at Boulder Dam.

First, I want to direct attention to the highly organized and generously financed publicity campaign, the insidious and almost desperate attempt to control public opinion.

The Power Trust has organized the most gigantic publicity and propaganda machine ever conceived by the brain of man. It started with the organization of the National Electric Light Association, headed by George B. Cortelyou, formerly secretary to President Roosevelt and later Secretary of the United States Treasury. This association now has linked up with it the railroads, the gas and traction companies, insurance companies, banks, and trust companies. In addition to its original function of false propaganda and publicity, they are pointing out to the power interests where they can gobble up local power sites and power plants. Their specialty is the securing of municipally owned plants and water-power sites that might be developed to the advantage of the Power Trust. This association issues a "Handbook for Speakers," and it sends out an army of women and men who must literally commit this book to memory and give it to the people in the form of lectures, and they worm themselves in on every program of every farmers' meeting and every meeting of women's clubs and parent-teachers' associations where it is possible to get.

They lecture before classes in our common schools, high schools, colleges, and universities. Their chief purpose is to dangle the uses of electricity before the eyes of the people at an attractive rate until they get them hooked, and then they jerk them out like a boy catching suckers. They want to get the people in the frame of mind of letting the Power Trust stick its hands into their pockets and help itself and have them say they like it. Another purpose of these speakers is to sell the people the idea of private ownership of public utilities as opposed to municipal ownership.

ORGANIZED GREED OF THE POWER COMBINE

Raushenbush and Laidler, two nationally known and recognized authorities on public-utility matters, have written a book called "Power control." In this book they tell the story of how the National Electric Light Association has organized its campaign to control public opinion. This organization not only has its speaking committee but it has its customers' ownership committee, committee on educational institutions, information bureau committee, women's committee, committee on banking institutions, a committee on public relations, and a committee on national utilities.

Through these committees it reaches every conceivable institution and organization; none escape. The membership of the association is composed of men and women in every locality in the United States, every one of which must be recommended by the local head of a privately owned utility before he can become a member of the organization. It is made the duty of the managers of local utilities to join local civic and fraternal organizations. He is instructed to make friends with the doctors, lawyers, bankers, professors in schools and colleges, farm and labor leaders, both men and women, and to make an accurate report of every one of these to the National Electric Light Association. Then along will come one of the association's smoothest agents and begin selling those who are amenable to reason a few shares of stock, and if he finds a few he can not hook any other way he will give them a share or two. He will then proceed to the college professor and say to him something like this: "Professor, you have a wonderful knowledge of the economics of electricity and power. You ought to write a book on the subject. You could render no greater service to the people of the country than to write such a book. If you will do so and will treat 'us' fair, our association will subscribe for

50,000 or 100,000 copies and sell them for you," and some of the professors fall for it.

This association also has committees largely composed of professors of colleges of agriculture and farmers who "are right" which it uses to encourage farmers to use electric current, but in no instance have I been able to learn where these committees have tried to get cheaper rates as a means of increasing the use of current among them.

Another way the public utilities have of spreading their alluring propaganda before the public is through the newspapers. The Electrical World, the organ of the utility interests, quotes an executive of the industry as saying, "Take the newspaper fellows into your confidence." "Buy white space in as many newspapers as your appropriation will permit." "Use that space. * * *" Emphasis is given the newspapers because it affords the cheapest and quickest means of getting the utilities' story to the people. This executive then goes on to say that if this policy is consistently followed "the fellow on the 'outside' who wants to put the 'public be damned' words into the utilities' mouth will not find it quite so easy to get his 'letter to the editor' printed at the top of the column with a display head." In 1927 the electric light and power companies of the United States planned to spend $28,000,000 for newspaper advertising, according to Raushenbush and Laidler. That is an average of over $583,000 for the newspapers in each of the 48 States in the Union.

Nor is that all. They have got in their work in every radio bill that has passed this House. Under the radio law it has organized the National Broadcasting Co. which is connecting up with an ever-increasing number of stations, and owns two of the largest in New York. Its president was at one time publicity director of National Electric Light Association. One of the speakers of the Edison Electric Co. of Boston recently said:

> This company feels that its establishment of a broadcasting station with a well-planned program of entertainment has had a marked influence in reaching and obtaining public attention and good feeling.

Nor is this all. The public-speaking committee of this association succeeded in placing its speakers on 18,000 programs of civic bodies in 1927, where they claim to have reached 2,000,000 people.

In all the speeches and propaganda placed before the people through all these avenues open to the Power Trust, no opportunity to magnify the failures and berate the success of municipally owned power plants was overlooked, while the latter is practically without means of placing the advantages of municipal ownership before the public. Some interesting facts as to the extent to which the Power Trust will go to discourage and throttle the advocates of public ownership of utilities is being dug up by the Federal Trade Commission in its investigation of the Power Trust, authorized by a resolution recently adopted by the Senate, according to a recent article appearing in the Washington Herald by M. S. Ramsay.

It appears from this article that the Illinois Committee on Public Utility Information, fathered by Samuel Insull, the man who contributed something like $165,000 to elect both a Republican and a Democrat to the same seat in the United States Senate, is sending broadcast an anonymous document linking up with the communist and bolshevist forces those civic and religious organizations which refuse to become avenues for spreading Power Trust propaganda or which advocate public ownership.

Among these are the American Farm Bureau Federation, the American Association of University Women, the United Society of Christian Endeavor, the National Woman's Christian Temperance Union, the Central Conference of American Rabbis, the American Federation of Teachers, the National Education Association, National Council of Jewish Women, National Board of the Young Women's Christian Association, and the Religious Society of Friends. This article also said that the evidence showed that this same committee supplies over 600 high schools in the State of Illinois with Power Trust propaganda; that—

> supplies of liquor twice were ordered from New York by another Illinois Power Trust official to forward lobbying activities in the State legislature.

In a recent address in this city a speaker, employed by this gigantic organization of public utilities, said the organization never took any part in political campaigns. Yet, according to Raushenbush and Laidler, when the water and power act passed by the California Legislature was submitted to the people for approval, the utilities of that State spent over $500,000 to defeat it. In that campaign two men, Eustace Cullinan, head of the so-called Greater California League, and John S. Drum, a former president of the American Bankers' Association and head of two utility companies, met in some back room and organized the Greater California League, and Mr. Cullinan appointed himself as its head at a salary of $25,000. That is the only meeting this organization ever had, and no one had access to its accounts except Mr. Cullinan himself.

One of the first things this two-man organization did was to prepare a leaflet, to be sent out by the bond houses opposing the water power act. It employed leaders of various groups and communities to work against the act. P. H. McCarthy, for many years president of the Building Trades Council, was employed for three months at a salary of $10,000 to educate the members of the building trades against the bill. George Skaller, secretary of the Civic League of Improvement organization, received $6,000 to educate his group against the act. Another man was paid $26,000 for his work against the act. Another received $5,000. Other thousands of dollars were spent on automobiles to haul known opponents of the act to the polls. Still other thousands were spent on junketing trips for members of the legislature visiting power plants where future attractive jobs at good salaries were dangled before their eyes.

MACGREGOR WRITES A SPEECH

Now, this incident in California might be considered as being truly representative or typical of the Power Trust's methods. What was done in California may have been a little crude, because it was an effort to meet an emergency. But let us look at Illinois, the home base of the celebrated Samuel Insull. There is nothing temporary about the Illinois program. The organization is permanent. Its committees have anticipated every possible emergency. Hear the name:

> The Illinois Committee on Public Utility Information.

B. J. Mullaney is the director and R. R. MacGregor is assistant director. Mr. Mullaney and Mr. MacGregor recently engaged in an interesting correspondence in relation to a political campaign. Evidently some of Mr. Mullaney's candidates had opposition and needed coaching. Mr. Mullaney sent a note to Mr. MacGregor asking for help. The note was straightforward and matter of fact. Here it is as it now appears on page 7330 of the CONGRESSIONAL RECORD for April 27, 1928:

> Mr. MACGREGOR. If you were running for a nomination for United States Senator against a man whose speeches have indicated that he favors Government ownership generally, and you had to get up a speech or series of speeches tackling him on that line, what have we that you would find pertinent and useful?

In his reply (which also is found on page 7330 of CONGRESSIONAL RECORD) Mr. MacGregor proceeds to write a speech for Mr. Mullaney on how to brand a candidate for office who believes in public ownership of public utilities as—

> a socialist, a pink, a red, or a Bolshevik.

He then says—

> It's a disease, and the best preventive for a general infection is not to let it get a start. Kill the first germs before they multiply and kill.

He then says:

> What is wrong with Government ownership? The answer is, it doesn't and it won't work. It's been tried time and time again. And every time it has caused the downfall of the government which tried it. Workers refuse to be dogged by an endless chain of bureaus until they can't even raise their families the way they wish. They revolt.

That statement would be all right if it were true. But the fact is that there is not a line, word, or syllable of it that is true. Public ownership of public utilities did not cause the downfall of Germany. It has not caused the downfall of England. It has not caused the downfall of Canada. It has not caused the downfall of a single government on earth, and it never will cause the downfall of any. But the forcing of the will of the financially powerful few upon the many, aided by government officials controlled by the powerful few, has caused the downfall of governments. And that is what men of the MacGregor stripe will go the length to do, to accomplish their ends.

Fortunately, however, the founders of this Government placed its control in the hands of the people themselves by giving them the ballot. Through the use of the ballot the people can have the kind of government they desire and all the MacGregors in the country will not be able to contribute to the downfall of this Government unless they are first able to take away the voting power of the people. They know this, and that is why a general assault on primary election laws is being made.

But one needs not take Mr. MacGregor very seriously when he reads the closing paragraph of his speech to Mullaney. It says:

This, of course, is not an attempt at writing a speech. My idea would not be to try logic or reason but to try to pin the Bolshevik idea on my opponent. I do not believe that the theories of government ownership would be much use except before a hand-picked audience.

Translated into English, this paragraph simply means: "There is no argument against public ownership of public utilities. The only thing that the combine can do to retain its financial grip on the people is to throw mud, mix things, smear everybody who gets in its way, lie to some and buy others, use the terms socialist, pink, red, Bolshevik to prejudice people against those who favor public ownership."

Big business interests adopted that method during the war and then proceeded to make profits off the people to the extent of $38,000,000,000. The Power Trust thinks it can adopt the same policy and exact still more billions in profits off the people.

THE POWER COMBINE IN POLITICS

Again, if this organization does not take any part in politics, how does it explain its activities against the water and power act of California at an expenditure of over one-half million dollars? If it is not in politics, how does it explain Insull's contribution of over $160,000 in a senatorial campaign in Illinois? How does it explain its activities in the election of officials from President of the United States down to members of school boards? If it is not in politics, how does it explain the fact that it worms its way into every department of government and places those in these departments on its pay rolls whom it feels can be used to the best advantage of the trust? If it is not in politics, how does it explain the fact that the first step it invariably takes to head off any governmental proposal to in any way curb or limit its activities is to invite all the reporters of the leading newspapers of the country to a great banquet where speeches are made by Government officials, lawyers, and even ministers of the gospel, and where sometimes wine flows like water? If it is not in politics, how does it explain the fact that it has practically secured control of all the avenues for disseminating information to the public, including the radio, newspapers, and the lecture platform? If it is not in politics, how does it explain its opposition to Senator HOWELL'S renomination to the Senate in the recent primary in Nebraska? If it is not in politics, how does it explain the fact that I received 28 telegrams within the space of 15 minutes from voters in my district protesting against the Boulder Dam bill on the very day that bill was scheduled to come up in the House? If it is not in politics, how does it explain the fact that every scheme is used that is possible for human ingenuity to invent to crush those it can not control and to exalt and place in attractive, influential positions those who yield to their blandishments?

THE POWER COMBINE WATCHES LEGISLATION AND OFFICIALS

I venture the assertion that no Government agency makes a move in the direction of public interest but what a utilities official is on hand to scrutinize its acts. When the question of flood control in the Mississippi Valley was first raised the utility interests were on hand to see to it that whatever Congress does in the matter of flood control should not, in the remotest degree, border upon the development of power. One of the Army engineers, a man who had been appointed to West Point from Superior, Wis., by Senator Lenroot and educated at Government expense and drawing a salary from the Government, was sent into the Mississippi Valley to investigate the feasibility of building reservoirs along the tributaries of the Mississippi River as a means of holding back the flood waters. When reservoirs are built it is only a short step to the utilization of the water in such reservoirs for power purposes. This engineer made his investigation chiefly in his swivel chair in Washington and reported back to the Government that reservoirs are not feasible as a means of flood control. Later, before the Flood Control Committee of the House, this same engineer testified under cross-examination that he at one time had been connected with the National Electric Light Association and that he is now on the pay roll of a private electric light and power company in New York and is its vice president, while at the same time he is drawing a salary from the War Department of the United States Government. So the bill for the relief of stricken humanity in the lower Mississippi Valley and the prevention of such catastrophes as occurred in that valley last year came to us tainted by the Power Trust.

The United States Chamber of Commerce, through its recent changes in offices, has fallen completely under the domination of the National Electric Light Association and henceforth will become the chief lobby and propaganda mill of the Power Trust. It is tied up either through direct membership or business relations with local chambers of commerce and similar organizations throughout the United States.

During the war, as everybody knows, the Government—the people themselves—built the giant dam and power plant at Muscle Shoals to manufacture explosives to be used in the war. Some statements say this entire plant cost the people $250,000,000. Others put it as low as $150,000,000. But whatever it cost, it belongs to the people to do with as they please. It belongs to them to do with it as they please, just as much as does any other Government-owned property.

When it was felt that this plant would no longer be needed for the purposes for which it was built, ways and means were sought to dispose of it. There are those who would sell it for whatever can be obtained for it, or lease it for a term of years to private power interests at a nominal rate of interest. Among these are those known to be financially connected with the power interests. Then again, there are those who insist on the people operating their own plant and selling the power for enough to recover the entire cost.

The stock argument against public ownership is that it is a failure—is proving a failure wherever tried, chiefly because of politics. Mr. Cortelyou puts it on a little broader ground. He says:

We shall try, among other things, to demonstrate that the entry of Government, whether National, State, or local, into this field, is constitutionally unsafe, politically unwise, economically unsound, and competitively unfair.

Yet they all emphasize what a great failure public ownership is and has been, and they particularly lay stress upon this in their opposition to Government operation of Muscle Shoals.

Now, what is the truth about this? According to Bradstreet, over 90 per cent of those who enter private business fail, while the percentage of failures of municipally owned utilities is insignificant in comparison. They point to the fact that there are relatively more bank failures, privately owned, than municipally owned utility failures during the last few years. The same is true, they say, of other lines of private business. On the other hand, they point to the fact that the largest business in the world, the post-office business, is being cheaply and successfully operated in everybody's interest and no one is afraid, like those who own stock in large private corporations can well afford to be afraid, of being sold out by the "higher ups" and the people left holding the bag. That has been the situation with reference to banks, with manufacturing establishments, mercantile establishments, railroads, and with every other kind of business. It has not been true with Government-owned utilities.

It is true that some small municipally owned power plants here and there have felt the same "squeezing process" of the larger privately owned ones, just as other small business institutions have felt at the hands of big business whose object is to squeeze out the competition offered by the "little fellows." But no one can successfully maintain that the hydroelectric plant owned by Ontario has been anything but a complete success, and it furnishes electric current for less than one-third the average price charged the people of the United States by the private power interests. The city-owned power plant at Tacoma, Wash., charges about the same rates as are charged in Canada. The significance of this becomes all the more apparent when it is known that the average rate in the United States is 7½ cents per kilowatt-hour while in Canada and Tacoma it is 2 cents or less. This becomes all the more significant when it is understood that every half cent reduction in the price per kilowatt-hour means a saving of $300,000,000 per year to the people of the United States, and a reduction from 7½ cents to 2 cents would mean a saving of $3,300,000,000 a year. That is over 1 per cent on the value of all the property in the United States, or is about equal to one-half of the amount the people pay in direct taxes.

Senator NORRIS, who has been making a stubborn fight for Government development of Muscle Shoals for generating electricity and for harnessing Great Falls on the Potomac to furnish light for the United States Government, tells of a woman in Toronto, Canada, who lives in an eight-room house who does her sweeping, cooking, washing, and ironing, heats her water for both kitchen and bath, has twice as many light bulbs as a similar home in Washington, and it costs her an average of $3.55 per month. In the city of Washington, D. C., the same service would cost her $23.18 per month; in Birmingham, Ala., $32; in Nashville, Tenn., $40; and in some cities in the United States, $60 per month.

Nor is this all. Part of the $3.55 this woman pays is an amortization fee which, in 30 years, will entirely wipe out the capital account in the plant and from that time on Canadians will not have to pay rates based on capital invested, while here in the United States private utilities are continually adding to

their capital account and are charging rates on reproduction cost.

Senator NORRIS visited the farm home of B. L. Sible. His home was lighted by electricity; his farm buildings were lighted by electricity; his house and barns were furnished water pumped by electricity; he filled his silo and ground his feed by electricity; he milked 17 cows by electricity; his wife did her cooking, washing, sweeping, ironing, and ran the cream separator by electricity, and was free from drudgery; the total cost for this service was $115.49 for a year and by its use they saved the cost of a hired man and a hired girl. This instance is typical of thousands of other farmers in Canada, and was not picked out as an especially favorable case.

But I am not looking at this question merely from the point of view of Government ownership. In fact, I believe I would prefer private ownership if some effective means can be devised to protect the people against unjust and outrageous charges of private utilities. Many States have attempted such control and did very well at it until holding companies with headquarters in New York and Chicago sprang into existence. These holding companies will go into a locality and either buy or build a plant at various strategic points and oftentimes sell preferred stock to people in the vicinity to more than pay for it and then issue themselves common stock equal in amount to the preferred stock and reserve to themselves all managerial and voting rights, giving the preferred stockholders no voice whatever in the management of the business they really own, and the courts have held that unless fraud can be proven, State commissions have no power over them. Commissions do, however, exercise some indirect powers over holding companies, but how long the courts will stand for that remains to be seen.

There is no question but what the hydroelectric plant in Ontario exercises some beneficial influence over charges in northeastern United States, and if New York succeeds in establishing a public-owned plant along the St. Lawrence River, a still greater influence will be exercised in that territory. If this House will pass the Norris bill for Government operation of Muscle Shoals, no doubt but the people in the southeastern portion of the United States will be benefited by lower rates. The same will be true in the southwestern part if the Johnson-Swing bill becomes a law. These developments, together with those of Tacoma and Seattle in the Northwest, will no doubt have a most wholesome influence.

That influence may not be all that could be desired and, if not, I am for extending Government ownership and operation of power over the country until the desired effect is obtained. I recognize that this is an age of "big business" and big businesses with large amounts of capital can probably render service more cheaply than an aggregation of small businesses with small amounts of capital. But the people will not tolerate large combinations of wealth organized under the pretext of rendering cheaper service, and then using the power of organization to squeeze exorbitant profits out of them.

The high rates charged by privately owned electric utilities in the United States not only exact an unjust tribute from the people, but they stand in the way of the use of electric current for heat and power. The utility companies of the Pacific coast discouraged the use of electricity for heating and power until they became bold enough to give it a trial and found it a very profitable adventure. Since then electric heating is becoming more and more general.

Frank Putnam, an authority on the subject, says of the use of electric current in heating, lighting, cooking, and other domestic uses in the homes in San Francisco:

> The average rate per kilowatt-hour for all energy used in such homes shades down to a little over 2 cents; the bills, depending on the size of the house and energy used, range from $7.50 to $18 monthly average through the year.

Continuing, Mr. Putnam says that architects and builders say that 6 per cent on the saving on the cost of homes to be electrically heated by the elimination of heating basements, chimneys, fireplaces, and the like will pay the home owner's entire electric-current bills, "where heating rates comparable to those on the west coast are obtainable." He also points to the fact that a large apartment hotel in Los Angeles is completely electrified and paid $7,300 for current for the first 10 months of 1927, and that the installation of this system cost about half the amount a coal, oil, or gas system would cost, and that 6 per cent interest on the saving in construction cost of this hotel, together with the saving in operating and maintenance, pays about half the electric bills and higher rentals secured probably pay the other half with some to spare.

In discussing the advantages of using electricity for heating, cooking, and lighting to the people of Seattle, Mr. Putnam says:

> These folks are as free from heating toil, dirt, and worry as the guest of the most expensive hotel—and their yearly bills for all-electric service average only $7 to $15 monthly, depending on the size of the home and the habits of its occupants.

He then tells of an all-electric service of a 28-room house, worth a quarter of a million dollars, costing a little over $42 per month, or about $500 per year. Mr. Putnam says that electric current can be produced as cheaply or cheaper by modern plants using coal as fuel as it can in plants using water power. (See "Electric Service Enters New Era," by Frank Putnam.)

The city of Tacoma probably has more electrically heated homes than any other city in the world, the number being about 3,000. Homer T. Bone, port counsel of the port of Tacoma, writes me that for the month ending December 15, 1927, he paid $16.53 for all-electric service, including heat, for a 10-room house. This amounts to something like $200 a year. The average price for current is but little over 1 cent per kilowatt-hour, while the rate falls as low as one-half cent.

In an article written for the Locomotive Firemen and Enginemen's Magazine for January, 1927, Mr. Bone has this to say:

> During a comparatively recent period of 12 months light and power users in a neighboring city of 20,000 inhabitants, supplied by a private power company, using hydroelectric power, paid an average of 4.19 cents per kilowatt-hour for all current used in that city.
>
> If Tacoma had exacted that rate from its people, the revenues of the Tacoma light department would have been increased $3,014,360.67 during the 12-month period.
>
> The total tax that will be levied in Tacoma to run the city government for 1927 is $2,482,217.80.

In other words, the light department of the city of Tacoma is saving the people over $500,000 more than the entire city tax bill.

The mayor tells me that the light department of the city of Kaukauna, Wis., is saving its people in electric rates an amount equal to the cost of the entire city government plus the cost of its public schools outside its continuation school.

These are the things that trouble the power monopoly, and it does not purpose to have any more examples as to how cheaply electric power can be generated. In order to enlist the farmers in this fight it just had to discover that Government operation of a power plant at Boulder Dam was going to ruin them. When it made that discovery it made a rush for the agricultural press of the country and, using the argument of large contracts for advertising in these papers, convinced many of the editors that Boulder Dam means irrigation, irrigation means more land under cultivation, more land under cultivation means more crops, and more crops mean lower prices, and lower prices mean ruination for the farmers. They, however, failed to convince the editors of these papers that they were willing that the Government should irrigate the whole Southwest if it would turn over the power to the Power Trust. As a matter of fact, Boulder Dam does mean irrigation, but it does not mean any more irrigation than now. Imperial Valley is already irrigated with water from Mexico, and the only change Boulder Dam would make is to enable the farmers of that valley to get their water from the United States. But even if it did increase the land under cultivation, the crops raised in this valley are chiefly tropical and semitropical fruits and vegetables that do not compete with crops raised elsewhere in the United States. Besides, the fact that such crops are raised in this valley enables the people to obtain them cheaper than they could if they had to be imported from some foreign country.

I have given here and at this time only a general review of the methods and purposes of the Power Trust, but enough, I hope, to show the necessity for a careful study of this subject by the Federal Government, by every State government, and by every political subdivision which has any control over the service, the rates, or the financing of public utilities.

True, an inquiry into one phase of their activities is now under way by the Federal Trade Commission. But that investigation has nothing to do with the kind of service or the rates charged or the methods of financing. It is solely an inquiry into their methods in molding public opinion. And while these publicity methods are a stench in the nostrils of the people, the Federal Trade Commission scarcely can be expected to do more than to bring to light multiplied instances of a kind which already are known to the people. The inquiry will do good—lots of it—but it will not meet the problem. For, after all, what the people want is cheaper rates for light and power. I purpose to go back to my own State and present to the people a much fuller discussion of this matter than I have attempted here.

I purpose to discuss costs and rates, comparing the rates paid by Wisconsin people with those paid elsewhere, and especially with municipally owned plants.

I purpose also to discuss the methods of financing employed by each of the big holding companies operating lighting and power plants in Wisconsin. I purpose to discuss common stock, watered stock, and the profits on such stock and their relation to the rates paid by Wisconsin consumers.

I shall do this in the hope that the people of my State, at least, will take the necessary steps to prevent predatory interests from acquiring control or possession of the last great natural resource left to the public.

FLOOD CONTROL

Mr. REID of Illinois. Mr. Speaker, I submit a conference report on the bill (S. 3740) for the control of floods on the Mississippi River, its tributaries, and for other purposes, for printing under the rule.

The conference report and statement are as follows:

CONFERENCE REPORT

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its amendments numbered 13, 17, 18, 19, and 20.

That the Senate recede from its disagreement to the amendments of the House numbered 1, 2, 3, 4, 5, 6, 7, 8, 10, 11, 12, 21, 22, 24, 25, 26, 27, 28, 29, 30, 32, and 33, and agree to the same.

Amendment numbered 9: That the Senate recede from its disagreement to the amendment of the House numbered 9, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "but nothing herein shall prevent, postpone, delay, or in anywise interfere with the execution of that part of the project on the east side of the river, including raising, strengthening, and enlarging the levees on the east side of the river"; and the House agree to the same.

Amendment numbered 14: That the Senate recede from its disagreement to the amendment of the House numbered 14, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by said amendment, insert the following:

"; (c) provide without cost to the United States, all rights of way for levee foundations and levees on the main stem of the Mississippi River between Cape Girardeau, Mo., and the Head of Passes.

"No liability of any kind shall attach to or rest upon the United States for any damage from or by floods or flood waters at any place: *Provided, however*, That if in carrying out the purposes of this act it shall be found that upon any stretch of the banks of the Mississippi River it is impracticable to construct levees, either because such construction is not economically justified or because such construction would unreasonably restrict the flood channel, and the lands in such stretch of the river are subjected to greater overflow and damage by reason of the construction of levees on the opposite banks of the river it shall be the duty of the Secretary of War and the Chief of Engineers to institute proceedings on behalf of the United States Government to acquire either the absolute ownership of the lands so subjected to overflow and damage or floodage rights over such lands."

And the House agree to the same.

Amendment numbered 15: That the Senate recede from its disagreement to the amendment of the House numbered 15, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"SEC. 4. The United States shall provide flowage rights for destructive flood waters that will pass by reason of diversions from the main channel of the Mississippi River: *Provided*, That in all cases where the execution of the flood control plan herein adopted results in benefits to property such benefits shall be taken into consideration by way of reducing the amount of compensation to be paid."

And the House agree to the same.

Amendment numbered 16: That the Senate recede from its disagreement to the amendment of the House numbered 16, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following: "which, in the opinion of the Secretary of War and the Chief of Engineers, are"; and the House agree to the same.

Amendment numbered 23: That the Senate recede from its disagreement to the amendment of the House numbered 23, and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by said amendment insert the following:

"including levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on the outlets and tributaries of the Mississippi River between Rock Island and Head of Passes in so far as such outlets or tributaries are affected by the backwaters of the Mississippi: *Provided*, That for such work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., and on such tributaries, the States or levee districts shall provide rights of way without cost to the United States, contribute 33⅓ per cent of the costs of the works, and maintain them after completion: *And provided further*, That not more than $10,000,000 of the sums authorized in section 1 of this act shall be expended under the provisions of this section.

"In an emergency, funds appropriated under authority of section 1 of this act may be expended for the maintenance of any levee when it is demonstrated to the satisfaction of the Secretary of War that the levee can not be adequately maintained by the State or levee district."

And the House agree to the same.

Amendment numbered 31: That the Senate recede from its disagreement to the amendment of the House numbered 31, and agree to the same with an amendment as follows:

In lieu of the matter proposed to be inserted by said amendment insert the following:

"The sum of $5,000,000 is hereby authorized to be used out of the appropriation herein authorized in section 1 of this act, in addition to amounts authorized in the river and harbor act of January 21, 1927, to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers for the preparation of the flood-control projects authorized to be submitted to Congress under this section: *Provided further*, That the flood surveys herein provided for shall be made simultaneously with the flood-control work on the Mississippi River provided for in this act: *And provided further*, That the President shall proceed to ascertain through the Secretary of Agriculture and such other agencies as he may deem proper, the extent to and manner in which the floods in the Mississippi Valley may be controlled by proper forestry practice."

And the House agree to the same.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3740) for the control of floods on the Mississippi River and its tributaries, and for other purposes, submit the following written statement explaining the effect of the action agreed on by the conference committee and submitted in the accompanying conference report, as to each of such amendments, namely:

SECTION 1

On No. 1: Strikes out the Secretary of War as a member of the planning board.

On No. 2: Provides for one civil engineer as a member of the planning board instead of two, as proposed by the Senate.

On No. 3: Provides that the civil engineer shall be chosen from civil life.

On No. 4: Provides that the planning board shall consider the plans recommended by the Mississippi River Commission.

On No. 5: Inserts the language proposed by the House, providing that the planning board shall recommend to the President such action as it may deem necessary to be taken in respect to the engineering differences between the two flood-control plans, the President's decision to be followed in carrying out the project. The planning board is to have no other authority in regard to the project except as set forth in this section.

On No. 6: Strikes out the word "further," as proposed by the House.

On No. 7: Strikes out the word "as," as proposed by the House.

On No. 8: Strikes out the words "as those protected by levees constructed on the main river," as proposed by the House.

On No. 9: Inserts the language proposed by the House, with the additional insertion, after the word "of," in line 22, on page 3, of the words "that part of." This is in the nature of a perfecting amendment and does not change the sense of the House amendment.

On No. 10: Inserts the new paragraph at the end of section 1, as proposed by the House, providing that all unexpended balances of appropriations heretofore made for flood control on the Mississippi River under the flood control acts of 1917 and 1923 shall be available for expenditure under this act, except section 13.

SECTION 2

On No. 11: Strikes out the word "additional," as proposed by the House, from the phrase "no additional local contribution to the project herein adopted is required."

SECTION 3

On No. 12: Strikes out the words "local interests" and inserts the words "the States or levee districts," as proposed by the House, in line 8, on page 5.

On No. 13: Strikes out the words "the title to," proposed to be inserted by the House, in line 15, on page 5.

On No. 14: Inserts the language proposed by the House, but changes the latter part of the last paragraph of the section so as to clarify the meaning.

SECTION 4

On No. 15: Strikes out the first paragraph of the section as proposed by the Senate, and inserts the language proposed by the House providing that the United States shall provide flowage rights for the water that is diverted from the main channel of the Mississippi. Strikes out the last clause of this paragraph, providing that the United States shall control, confine, and regulate such diversions. Conferees were of the opinion this language not needed, as amendment 8, section 1, fully covers the situation, and insert a proviso to the effect that where the flood-control project results in benefits to property, such benefits shall be taken into consideration by way of reducing the amount of compensation to be paid. This provision is similar to existing law.

On No. 16: Inserts the language proposed by the House, to the effect that the opinion of the Secretary of War is to decide what lands, easements, or rights of way are necessary to be acquired; and adds that the opinion of the Chief of Engineers is also to be followed.

On Nos. 17, 18, 19, and 20: Strikes out the language proposed by the House, and restores the language of the Senate, in the last proviso in section 4, the House amendments not having been considered essential or important.

SECTION 6

On No. 21: Strikes out the language proposed by the Senate and inserts the word "Funds," as proposed by the House, in line 10 on page 8.

On No. 22: Inserts the words "section 1 of," as proposed by the House, in line 11 on page 8.

On No. 23: Strikes out the language proposed by the Senate and inserts the language proposed by the House, with the additional provision that for levee work on the Mississippi River between Rock Island, Ill., and Cape Girardeau, Mo., the States or levee districts shall provide rights of way, pay one-third of the work, and maintain the levees when completed.

SECTION 7

On No. 24: Strikes out the words "below Cape Girardeau, Mo.," as proposed by the Senate, so that the emergency fund may be used for rescue work or repair or maintenance on any of the tributaries of the Mississippi.

On No. 25: Inserts the language proposed by the House, which would authorize the emergency fund to be used to repair levees destroyed by the flood of 1927.

SECTION 8

On No. 26: Inserts the new paragraph at the end of the section, as proposed by the House, providing that the salary of the president of the Mississippi River Commission shall be $10,000 and the salary of the other members of the commission shall be $7,500.

SECTION 9

On No. 27: Strikes out the entire section, as proposed by the Senate, and inserts the language proposed by the House providing that the provisions of sections 13, 14, 16, and 17 of the river and harbor act of March 3, 1899, shall be applicable to all lands, waters, easements, and other property and rights acquired or constructed under the provisions of this act.

SECTION 10

On No. 28: Inserts the language proposed by the House, providing that the surveys authorized by the river and harbor act of January 21, 1927, in addition to those set forth in House Document No. 308, Sixty-ninth Congress, first session, shall be prosecuted as speedily as practicable.

On Nos. 29 and 30: Strikes out the language proposed by the Senate and inserts the language proposed by the House, naming the tributaries for which flood-control projects shall be prepared.

On No. 31: Inserts the new paragraph at the end of the section, as proposed by the House, with the additional provisions that the flood-control projects on the tributaries of the Mississippi shall be submitted to Congress and that the forestry investigation may be undertaken by such other agencies as the President may deem proper, as well as by the Secretary of Agriculture.

SECTION 11

On No. 32: Strike out the language proposed by the Senate and inserts the language proposed by the House, to the effect that if the levee between Tiptonville, Tenn., and the Obion River, in Tennessee, is found feasible and is approved by the President it shall be built.

SECTIONS 13 AND 14

On No. 33: Inserts the two new sections proposed by the House, section 13 providing for a modification of the flood-control project on the Sacramento River, Calif., and section 14 providing that contracts for the sale of land shall contain a provision that no Member of Congress is interested in the sale.

FRANK R. REID,
C. F. CURRY,
ROY G. FITZGERALD,
RILEY J. WILSON,
W. J. DRIVER,
*Managers on the part of the House.*

Mr. GARNER of Texas. Mr. Speaker, can the gentleman inform us when he expects to call up this conference report?

Mr. REID of Illinois. On Saturday.

MISSOULA NATIONAL FOREST

Mr. SINNOTT. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill H. R. 126, respecting the Missoula National Forest, with Senate amendments thereto, and concur in the Senate amendments.

It is a very simple matter. It is a bill that was introduced by Mr. EVANS of Montana, the ranking minority member of my committee. The Senate amendment simply preserves the rights to certain homestead entrymen.

The SPEAKER. Has the matter been taken up by the committee?

Mr. SINNOTT. I can not say that the matter has been taken up by the committee, but the gentleman from Montana [Mr. EVANS], the author of the bill, requested me to call it up.

The SPEAKER. The gentleman from Oregon asks unanimous consent to take up the bill referred to and agree to the Senate amendment. The Chair is informed that similar requests have heretofore been made to agree to Senate amendments when the committee was opposed to that action; not on this particular bill, but as a general proposition. At this time the Chair does not think he should recognize the gentleman to call up the bill. Will the gentleman postpone his request?

Mr. SINNOTT. I will.

POISON IN DENATURED ALCOHOL AND MODERN MEDICAL VIEWS CONCERNING THE USE OF ALCOHOL

Mr. SIROVICH. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD by incorporating two articles on the medical use of alcohol—one written by Dr. Howard A. Kelly, gynecologist, of Johns Hopkins University, and one written by Dr. Morris Fishbein, editor of the Journal of the American Medical Association and of Hygeia.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. SIROVICH. Mr. Speaker and fellow Members of the House, on Friday, March 2, 1928, I addressed the House for almost 40 minutes, speaking on the subject of poison in denatured alcohol. In the course of my address I said:

There are two views in the United States concerning beverage alcohol. One is that of a group of honest, sincere, loyal American citizens, who contend that beverage alcohol is detrimental for human

consumption, and is responsible for all the wickedness found in our Nation, and that from a social, physical, economic, and political standpoint beverage alcohol has destroyed the home, interfered with the economic welfare of our country, destroyed the physical welfare of our fellowmen, and is chiefly responsible in corrupting the body politic of our Nation.

On the other hand, there is the equally sincere and honest wet element of our country, who believe in moderation and in temperance, and who contend that those who believe in moderation and temperance should not be crucified upon the altar of the drunkard. The wets, so called, deny that from a social, from a physical, and from an economic standpoint temperance has ever harmed any human being; but, on the other hand, they contend that from a political standpoint modern prohibition has brought more corruption to-day in Government than has ever existed in the history of our Nation. [Applause.]

On the medical side we have two groups of physicians. One who are firmly convinced that beverage alcohol serves no remedial purpose to human beings, while on the other hand we have equally great authorities on the other side who contend that beverage alcohol taken in moderation is a tonic to the system, is converted into carbon dioxide and water and heat and energy without leaving behind any refuse whatsoever.

To confirm these opposing views I would respectfully like to quote from an article written by Prof. Howard A. Kelly, the distinguished surgeon and gynecologist on the staff of Johns Hopkins Hospital, as well as the eminent and brilliant editor of the Journal of the American Medical Association, and of Hygeia, Dr. Morris Fishbein. One wrote upon the abuses of alcohol as a medicine, while the other wrote upon alcohol as a necessary part of the doctor's kit, for the World's Work Magazine:

THE ABUSES OF ALCOHOL AS MEDICINE

There is no single disease in the world of which alcohol is the cure. This *fact* is well known to science, is now generally admitted by progressive members of the medical profession, but is rarely made clear to the layman. The purpose of medicine is to cure disease. Since alcohol cures no disease it is not a medicine. It has no place in medical practice.

These facts have not been established so very long. They run counter to beliefs that have been held for generations and are hard to displace. Yet a bit of straight thinking on them is of importance to all the people of the world. The effects of alcohol upon the mind and body of man have had very careful study during this generation. That study crowded alcohol first from the field of curative medicines into the realm of stimulants, then from the field of stimulants to the company of depressants. It is now well known that alcohol does not cure, does not stimulate. It decreases, lessens mental or physical vitality. It creates only an illusion of vigor that does not exist.

All this has been proved by innumerable tests. A typist of known speed and accuracy has taken alcohol in graduated quantities. His speed and accuracy decrease in proportion to the alcohol he takes. Two men may play tennis or chess equally well. Give one of them a single glass of beer and he will be easily defeated by the one who abstains. Start 10 men of comparable vigor up a mountain side, 5 of whom have taken drinks as stimulation. These five will fail in the climb. So mild a drink as a pint of beer will lessen their physical and mental prowess by from 10 to 15 per cent. Innumerable tests have proved that alcohol does not stimulate them or make them capable of greater accomplishment. Instead, it depresses them, lessens their power.

Railroads learned a long time ago that it would not do for their operation employees to drink at all. The menace of drinking by drivers of automobiles, as has been often demonstrated, takes its toll of life every passing week. It has been shown that one spoonful of liquor lessens the ability to form quick judgment and to act on that judgment. That lessening of mental and physical ability can and has been measured. Split seconds in this strenuous age may mean life or death. Giving a driver alchool endangers life.

Yet the drinker believes himself stimulated. To him his faculties seem much alive. As a matter of fact, they have been clouded, and it is the haze of them that mellows all about him. The power of reasoning, of quick judgment, of effective action, has been inhibited, but he knows it not.

In the days of our grandfathers nearly all physicians prescribed liquor. Even a generation ago the practice was still general. Those physicians among us who are getting on in years and who now refrain from doing so may have given our patients a bit of alcohol in the days of our youth. So general was the practice that it was almost universal. Each doctor was likely to have a favorite wine or brandy that was the specific intoxicant that he prescribed. This fact throws light on the psychology of his act. The alcohol is the effective element in all these liquors and was the same in all of them. If the alcohol had a medicinal effect it would be as well to prescribe one liquor as another. It would be as well to prescribe pure alcohol administered as is other medicine. When a doctor prescribed port or sherry he was, in fact, going out of his way to give his patient what he considered a very pleasant drink. He was presenting alcohol in what, to him, was its most pleasant guise. It was not a medicine but a pleasure he was furnishing. His prescription was likely to please the patient and hold his patronage.

This alcohol was in the form most likely to breed a habit. Raw alcohol diluted with water, if it possessed any medicinal value, would have served the same purpose but would not have equally pleased the patient. Likewise, it would not have been nearly so dangerous to him from the standpoint of forming the habit of taking it. This practice on the part of doctors of prescribing palatable liquors for their patients has done yeoman service in recruiting for the army of inebriates.

Alcohol is a habit-forming drug. Its prescription to a person as a tonic when he is weakened by disease is as effective a way as could be devised for developing the alcohol habit in him. If it were possible to mass the army of drunkards in this country that has been recruited through these liquor prescriptions and march it to the next convention of the American Medical Association, this question would be settled forever. If it were possible to pile up the dead from automobile accidents that have resulted from a lessened efficiency of drivers who had been drinking prescription whisky or who have formed the liquor habit through having it prescribed by doctors, the Nation would be appalled.

Through the generations it has been the practice to prescribe whisky to stimulate flagging heart action. This is done on that same theory that it increases vigor instead of lessening it. There is the former belief, for example, that whisky is good for snake bite. The poison of snake bite throws a great burden on the heart. The idea was to stimulate the heart that it might bear that burden. It is now known by actual measurement that it decreases the heart vigor and therefore increases the probabilities of death.

That past generation that so freely prescribed whisky had another practice; that of bleeding the patient, which has now been abandoned. The reverse operation, blood transfusion, has taken its place. That generation put whisky into the patient and took blood out of him. Modern practice, reversing the process, takes the whisky out of him and puts blood into him.

The disease for which alcohol comes nearest being a remedy is diabetes. It is probable that alcohol furnishes a fuel that tends to burn out the fat that causes that disease. It may be that it is helpful. Now, however, we have insulin, which serves the same purpose much more effectively and, therefore, displaces alcohol.

Not long ago there was a case much in the newspapers. It developed that the attorney general and the governor of a Western State in which the prescription of liquor was forbidden had used whisky as a medicine. The children of the attorney general had been ill with typhoid and the wife of the governor had been ill with pneumonia. It seems that the doctor in each case had recommended whisky, which could not be bought at the drug stores. It had been procured through friends and administered. Comments on the case current in newspapers took the view that the lives of these children and the governor's wife had been saved by the whisky. They seemed to accept this salvation through liquor as a fact.

Now, whisky is not a cure for typhoid fever or pneumonia. Alcohol in this whisky is, of course, the vital element. It is a depressant, and if taken by these patients undoubtedly made their recovery more difficult. Yet if the doctor in this case had considered alcohol necessary to the recovery of his patients that alcohol was procurable at the drug store. Under the laws of the State alcohol can be prescribed, but in the pure form rather than in that of the customary potable liquors. This alcohol loses none of its medicinal qualities but merely becomes less attractive as a beverage. So it is evident that much deception was used in the presentation of this case, probably engineered by some one whose purpose was a relaxation of the regulations governing the prescription of liquor.

It is hardly necessary, however, to make out so complete a case against alcohol. If it were even granted that its prescription were occasionally necessary, that it sometimes saved a life, it might still be inadvisable to use it. Against this occasional benefit there should be set down as though on a balance sheet the known harm that it does. All those inebriates who, because of alcohol, have found their way into hospitals and lunatic asylums should be put down. All those cripples who go maimed through life because they or some one else has caused an accident because of alcoholic lessening of efficiency, all those patients suffering from cirrhosis of the liver, from deranged kidneys and stomachs, from diseased hearts and blood vessels, through liquor, should be balanced against the assumed occasional benefit.

Exhaustive tables worked out by British insurance companies extending over a period of 30 years show how alcohol affects the length of life. The man of 30 who does not use liquor has a life expectancy of 39 years. The man who does use it has a life expectancy of 35½ years. Three and a half years off the lives of liquor users should be charged up against the little good that is claimed to come from prescribing it. The benefits, if any, are so small and the obvious harm so great that intelligent man, if ever brought to think the matter through, is sure to take his position against the use of liquor or its prescription by doctors.

And here is another consideration from the standpoint of the medical profession that is generally overlooked, but that is vital to its integrity. The liquor prescription places a temptation in the way of the young doctor that is tragically likely to cause his downfall. Most young doctors have to endure that lean novitiate that has long been known as the starving period. They hang out their shingles and wait for practice to come.

Such a young doctor may take out a license that entitles him to write 100 liquor prescriptions a month. Those prescriptions may be readily saleable at $2 each. This will give this youngster $50 a week, which is quite adequate to keep him going. Why starve, he may ask himself, when this money is so easily available? I know young doctors who chuckle among their friends and pronounce these prescriptions a godsend to those entering the profession.

But the young doctor who writes a liquor prescription under these circumstances has ceased to be a doctor and becomes a bootlegger. He has already prostituted a noble profession. Even before he has actually become a doctor he has thrown ethics to the wind. His ethical standards are gone. His moral fiber is weakened. He has lost that which is indispensable to the proper practice of the profession that he has chosen to follow.

One shudders to think of the percentage of young doctors who are every year morally broken at the very beginning of their careers. The older men have already established their standards. Fewer of them are affected by the temptation to prescribe liquor. The reports that I gather from all directions of the tendencies on the part of the young doctors, however, are such as to lead me to the conclusion that the profession is being degenerated by this practice of writing whisky prescriptions. Its abandonment would be amply justified if for no other reason than to remove the temptation it offers from the path of the young practitioner.

The Federal law as it exists to-day allows the doctor to take out a license to prescribe liquor. Under that law oculists, dentists, horse doctors, and many others who would never be called upon to prescribe medicine can, if they wish, give away or sell liquor prescriptions. The unscrupulous among them, of course, abuse the privilege. Each doctor who takes out a license to do so may write 100 prescriptions a month, each for a pint. The current charge for such prescriptions is $2, though a charge of $3 is often made. A return of more than $3,000 a year from these prescriptions is possible to those doctors who see fit to exploit them.

---

ALCOHOL IN THE PRACTICE OF MEDICINE IS SEEN AS A NECESSARY PART OF THE DOCTOR'S KIT BY MORRIS FISHBEIN, M. D.

The wise physician is free from prejudice; he is not pledged to any single idea or system in the treatment of disease. He is entitled to use for the benefit of his patient any drug, manipulation, force, or food that he may think of benefit. There is no word in the English language so sadly abused as the word "cure." The history of medicine shows that there are no cures for anything.

There lies within the living tissue the power toward recovery, called in the Latin edition of Hippocrates the "vis medicatrix naturæ" [the remedial power of nature]. What the physician does is to attack the forces that cause disease, giving the tissues a better chance to repair the damages that these forces may have wrought. For instance, syphilis is caused by a wriggling organism known as the Spirochæta. The salvarsan or "606" of Paul Ehrlich has the power to inhibit the development of these organisms when it comes into contact with them in the human body. But the damage done by the organism on the tissues is not benefited by the salvarsan. That damage has to be repaired by the healing powers of the body, carried to the tissues by the blood.

If 100 emininent physicians were asked to vote as to the 10 most valuable drugs in the Pharmacopœia, a large majority would mention digitalis, brought prominently to medical attention many years ago by William Withering. This drug has the power of slowing the heart beat and of increasing its force. Next to rest it is probably the most valuable agent known in the treatment of the vast number of cases of heart disease that exist among our people. But digitalis is not a cure for anything. It does not restore a wasted heart muscle; it does not remove the excrescences from the heart valves that are the response to inflammations brought about by germs coming from the tonsils and the teeth; it does not attack the germs. It does produce a change in the heart function that may mean the difference between life and death, because it keeps the organ going until the healing powers that lie within the body itself have time and opportunity to exert their effects. Time is a great healer—but a slow one.

Sir Humphry Rolleston, Bart., K. C. B., M. D., Hon. D. Sc., D. C. L., and a lot of other alphabetical appendages of honor, formerly president of the Royal College of Physicians, of London, is also physician in ordinary to the King, and the holder of important teaching positions in medicine in England. In a few sentences he defines the position of alcohol as an important drug in the practice of medicine. "It may be beneficial, useless, or harmful," he says, "and, just as in health so in disease, it is the indiscriminate and excessive employment of alcohol that has encouraged the extreme view that it is never of any value. * * * Clinical observation by innumerable medical men over long ages has brought in a verdict favorable on the whole to the use of alcohol in disease, and it has naturally been urged that there may be a fallacy in arguing from the effects of alcohol in health to those in disease."

The distinguished British physician says that the main value of alcohol is in an emergency and as a temporary remedy at the crisis of pneumonia—for example, to stimulate the heart or occasionally as a sedative to induce sleep. The good effect on the heart is immediate and reflex from the mucous membrane of the stomach, but is temporary only, being followed by depression of the power of the heart. On the other hand, the continued use of alcohol in chronic heart disease is inadvisable because the drug has itself a tendency to weaken the heart muscle.

In 1925 Dr. Roger I. Lee read before the annual session of the American Medical Association his views as to the use of alcohol in medical practice. He pointed out that unquestionably the form of alcohol given has a distinct effect on the organs of taste and smell, and the form and dilution have a definite effect on the ease with which the drug is tolerated by the stomach. The great vogue of alcohol in the past was for the treatment of acute infections. It was noticed, for instance, that in such infections large amounts of alcohol could be tolerated without alcoholic intoxication, that the drug acted as a food tending to spare the tissues of the body, and that it possibly facilitated the retention of fluids in the body, a matter of great importance in fevers, in which the loss of water is great and serious.

Without regard to these factors, however, Doctor Lee finds a certain definite use for alcohol or for alcoholic liquors in the treatment of disease. "The usual immediate effect of alcohol in human beings," he says, "is the creation of the state of artificial euphoria."

The conspicuous example cited by Doctor Lee is one that has been cited to me by numerous great clinicians throughout the United States. "An elderly patient, for example, is convalescent from a mild upper respiratory infection, whether we call it a cold, the grip, influenza, bronchitis, or bronchial pneumonia. In the convalescence, the weight of years hangs heavily on the patient. He is conscious of many mild functional disturbances; he is depressed and miserable in mind and body; he is without appetite, and has a sense of prostration and weakness. To be sure, much can be done for this patient by careful nursing, tonics, and the various so-called volatile stimulants. Nevertheless, the exhibition of alcohol in some agreeable form eases the miseries of his body, encourages him to eat, and helps in the establishment of recovery."

"There are occasional cases in the early stage of pulmonary tuberculosis," Doctor Lee says, "when the little fever, the distress of body, and the consciousness of this dread malady make life appear drab, and the judicious administration of alcohol in small amounts seems to alter the gloomy outlook on life and to make endurable the rigors of the necessary regimen."

As for heart disease, here, too, Doctor Lee finds a use for alcohol, particularly in the patient with chronic disease of the organ that will no longer respond to the drugs used. The patient is worried and distressed. He sees constantly before him impending death. Such a patient "often finds more comfort from alcohol judiciously given in moderate doses than from opiates, which are better reserved for a future period."

Alcohol is probably never directly life-saving. That term must be reserved for such effects as are brought about by diphtheria or scarlet-fever antitoxins, by digitalis, by salvarsan, by quinine, or by other remedies with specific action on the organisms that cause disease.

In most of the textbooks on the uses of drugs there is specific mention of the use of alcohol in medicine as a food. The Council on Pharmacy and Chemistry of the American Medical Association—a body composed of some 17 practicing clinicians, specialists in the diseases of children, chemists, pharmacologists, bacteriologists, and others—has prepared for the use of teachers of materia medicia and therapeutics a book called Useful Drugs. This volume aims to select from the thousands of remedies in the United States Pharmacopœia and the National Formulary those drugs and preparations of greatest usefulness to the practicing physician.

In this book it is pointed out that alcohol is used externally to harden and cleanse the skin. Its astringent action permits it to serve as a mild counterirritant, and the fact that it is strongly antiseptic in concentrations of 70 per cent gives it high usefulness in surgery. Internally, according to Useful Drugs, "it is a narcotic, excessive doses depressing and paralyzing the central nervous system. Small doses produce euphoria, stimulate respiration, moderately dilate the cutaneous and splanchnic vessels, and modify the circulation. It is burned in the body and thus serves to a restricted extent as a source of energy." "In well-selected cases," says this guide, "especially in patients accustomed to its use, it may be very valuable; otherwise it is apt to do more harm than good."

The chief use of alcohol as a food or as a source of energy has been in diabetes. Since it is not nitrogenous it can not replace protein substances that are broken down in the body, and it can not replace insulin in the burning of sugar. It may act as a substitute for some of the

carbohydrates in the body, however, as it serves in the burning of fats. Alcohol does not become glycogen or give rise to the ketones, the substances that lead to acidosis and eventually to diabetic coma. Thus with alcohol in the diet it is possible to use a smaller amount of insulin than would otherwise be the case. The physiology and chemistry of these bodily reactions is a complicated matter.

Many competent physicians prefer to treat their cases of diabetes without the use of alcohol. No doubt an equally large number prefer to be in a position where they can use a pleasant form of this remedy if they feel the need of it. The late M. Duclaux, of the Pasteur Institute, was so much impressed by the experimental evidence on this question that he asserted that alcohol was a food surpassing starch and sugar in value, since weight for weight it contained more energy.

Many experiments have been cited to show that alcohol is harmful. Every one admits that validity of those experiments that indicated its detrimental effect on precise mental operations, such as are involved in typewriting, target shooting, typesetting, and motor driving. On the other hand, mental operations are shortened, the simple reactions and reaction times quickened, mental associations (such as making words to rhyme) made easier, and public speaking indulged in with facility. This has been thought to be the result of primary mental stimulation. But Prof. W. E. Dixon, the noted British pharmacologist, emphasizes the fact that these effects are the result of inhibition or depression of the higher centers of the brain.

It is safe to say that there is not the slightest scientific evidence to indicate that alcohol taken in moderation ever appreciably shortened anyone's existence. "When it is taken in strict moderation, injurious effects are yet to be proved," says Professor Dixon. The evidence presented by Prof. Raymond Pearl, the eminent biometrician of Johns Hopkins University, can not be gainsaid. In a fairly large and homogeneous sample of the working-class population of Baltimore the moderate drinking of alcohol did not shorten life. Indeed, moderate, steady drinkers showed somewhat lower rates of mortality and greater expectation of life than did total abstainers. On the other hand, those persons who were heavy drinkers of alcoholic beverages showed considerably increased rates of mortality and diminished longevity, as compared with abstainers or moderate drinkers.

The people who create an alcohol problem are obviously the heavy drinkers. They are, after all, cases for a psychiatrist, since their problem is a mental problem. They take too much alcohol because only with too much alcohol do they feel normal. The interior of the body of the drunkard shows the effects of alcohol as a poison. The final result of alcoholic intoxication repeatedly indulged in is delirium tremens, certainly a state of disease requiring serious consideration.

Professor Pearl emphasizes the beneficial effects of alcohol on the race, since it has a remarkably sharp and precise selective action on germ cells and developing embryos, killing off the weak and defective and leaving the strong and sound to survive and perpetuate the race. The fact has been proved on guinea pigs, fowls, rats, mice, rabbits, frogs, and insects. But if this fact is applied to the human race an entirely different point of view must be held, since the care of such weak, defective, or otherwise impaired specimens as come through embryonic life to human existence is a social problem.

Professor Pearl insists that the prevalent notion that parental alcoholism tends to cause the production of weak, defective, or monstrous progeny is not supported by the extensive body of experimental work that has been done on the problem. But there is some evidence to sustain this point of view. The German scientist, H. W. Siemens, states the matter briefly: "The cultured peoples of antiquity disappeared, despite the fact that they had no syphilis and that the alcohol industry was unknown to them. No uniform explanation of the downfall of all vanished peoples is afforded, therefore, by pointing to alcohol, to syphilis, or any similar agent. Above all, we know far too little as yet with regard to the influences that cause alterations in the germ plasm to permit us to draw any conclusions that would guide us to logical action."

The American Medical Association has invariably condemned physicians who were willfully prescribing liquor otherwise than in accordance with the law. It has urged every State and county medical association to use its best endeavor to discipline such physicians and to purge the medical profession of all who willfully, under the cloak of their profession, prescribe liquor for other than medicinal purposes. A resolution to this effect was adopted by the house of delegates in 1923, and reaffirmed in 1924. On the other hand, the house of delegates has felt that the law and its regulations at present have prevented large numbers of physicians of standing and professional integrity from prescribing for their patients in accordance with their best judgment as to their patients' necessities, while the unlawful acts of unworthy practitioners have been promoted.

The Volstead Act definitely makes the medical profession the custodian of beverage liquor in this country. The custodianship is not a pleasant one. The Government does not make any single group in its domain the custodian of dynamite, revolvers, or other objects with both good and evil uses. This custodianship, it has been urged, is granted to the medical profession as a privilege because at least a considerable number of physicians are convinced that alcoholic beverages have distinct uses in the treatment of disease. On the other hand, the word "privilege" in this connection is not apropos, since the patient who receives the liquor prescribed by a physician presumably requires it in order that he may recover from disease and become a more useful member of society.

In the last annual session of the American Medical Association, the house of delegates again gave serious consideration to the limitations on the prescribing of alcohol. Several resolutions were offered relative to the limitations that ought to be placed on such prescribing. The reference committee, to which the matter was referred, pointed out that "Alcohol is thought to be helpful in the treatment of disease and is being used in the practice of a very large number of doctors, many of whom believe it to be an essential and life-saving remedy."

The committee recommended that a bill be prepared correcting the provision of the Volstead Act that limits the amount of alcohol used, and providing such regulations as will permit doctors to prescribe whatever amounts of alcoholic liquors may be needed for their patients, and subject to such reasonable restrictions as may be thought wise and best after a conference with the head of the prohibition department. The committee recommended also the passage of a resolution, which was unanimously carried, to the effect that the American Medical Association declare its adherence to the principle that legislative bodies composed of laymen should not enact restrictive laws regulating the administration of any therapeutic agent by physicians regularly qualified to practice medicine.

Thus we have two of the most eminent authorities of the highest repute in medicine differing with one another as to the therapeutic use of alcohol in medicine.

If Professor Kelly is right in his scientific contention that pure alcohol is a poison, then how much greater a poison is pure alcohol denatured by the Government with the most violent and terrible poisons known to mankind when it enters the human stomach.

On February 14, 1928, in speaking before the House on this subject, I said:

Since prohibition has come into being 60,000,000 gallons of industrial alcohol are presumed to be used annually for commercial purposes, 6,000,000 of which, however, are diverted and converted by unscrupulous bootleggers to the clandestine purveyors of bootleg whisky. It is this industrial alcohol poisoned by the Government that has sent thousands of our unfortunate American citizens to an early and unsuspected grave.

Shall we have our Government act as a Lucretia Borgia of medieval days, who poisoned all who came into intimate contact with her? Shall we in this twentieth century—this civilized twentieth century—turn back to medieval times and leave to posterity the infamous heritage of the Borgias? I for one am irrevocably opposed to the country I love committing murder. [Applause.]

Mr. Chairman and gentlemen of the House, it is this 6,000,000 gallons of diverted and converted industrial poisoned alcohol that finds its way to human consumption and is responsible for the murder annually of 12,000 of our citizens. This frightful mortality of 12,000 has the added horror of the morbidity of those who become victims of alcoholic gastritis, cirrhosis of the liver, Bright's disease, optic neuritis, and blindness, which are all attributable to the poisonous substances contained in denatured alcohol.

Mr. Chairman, as long as the prohibition law is upon the statute books of our country I believe in its complete and rigid enforcement and will vote for any measure that will carry into effect that feature of our Constitution. [Applause.]

The question before the House is not whether one is in favor of prohibition or opposed to prohibition; not a question of temperance or intemperance; not a question of those who are honest in their views or those who are otherwise; but the fundamental and only question before the House is the amendment of the gentleman from Maryland [Mr. LINTHICUM], whether the Government shall put into industrial alcohol obnoxious drugs to make it unpalatable, or to put poison in it that ultimately commits murder.

Personally, I am in favor of denaturing alcohol with such ingredients that will make it unpalatable; yes, even nauseating, for human consumption; but loving humanity as I do, especially those weak, who need the guidance and assistance of others, I plead with you Members of this historic body not to permit our country to become particeps criminis to a continuation of horrors that have come in the wake of governmental participation in the poisoning of denatured alcohol. [Applause.]

To summarize my entire views, I would say that if drinking is a misdemeanor in the eyes of the law, it should not be punishable by blindness or death. Indeed, in the eyes of humanity, the deadly denaturing of pure alcohol that is ultimately diverted for bootleg purposes, is practicing capital punishment upon our citizens, and in my humble opinion is legalized murder.

As a deterrent and preventative for drinking poisoned alcohol is ineffective and has only helped increase prohibition's poisoned casualties.

When the history of prohibition will be written—its advantages or disadvantages, whichever time will record—this tragic and unfortunate casualty list will be one of the black chapters in American history, as it will always associate our Government, insofar as poisoning denatured alcohol is concerned, with the death penalty.

In the name of humanity I therefore appeal to the conscience of the membership of this historic body to retain whatever personal and individual views they may have regarding the advantages or disadvantages of prohibition, but only to modify the law so that alcohol may be denatured by various volatile oils and other chemical ingredients that are nontoxic in their nature but that can accomplish the same result as poison, without subjecting our Government to the proposition of poisoning its innocent and unsuspecting citizens.

FOREST CONSERVATION

Mr. MORROW. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of forest conservation.

The SPEAKER. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. MORROW. Mr. Speaker, forestry has become a problem of the people of the United States. When we can teach our people the necessity of reforestation and inspire in them the need of protecting our water and timber supply to prevent the floods and the washing away of the soil, then we have educated our American citizens to think constructively and not destructively.

The vital need of statistics covering the world's timber resources was brought out in the world's congress upon forestry. That congress brought out the fact that two countries which had been great sources of timber supply were in danger of exhausting that source of supply, namely, the United States and Canada.

It was announced that at the present rate of use the available supply of virgin softwood would be exhausted in 25 years. Each State should make a survey of its present supply of timber and ascertain the kind and quantity of new timber best suited for planting in the locality, in order to increase the available timber supply.

This need, as stated before, originates not only in the necessity for timber and the regrowth of the same, but likewise for water protection and flood control. State legislation should be enacted for cooperation with the Government in the drive for the growth of timber.

The spirit of timber planting and protection should be taught in the schools so the child will grow up with a desire for assisting in timber growth and its protection.

Forestry schools for the instruction of timber planting, growth, and care should be fostered in order that an interest may be created for the regrowth of a new crop of timber in the Nation.

Our people must realize that the loss of our timber has had much to do with the destruction of bird and wild life. Also that the removal of timber has permitted the soil and débris to be carried into the river channels and to destroy the fish, which have afforded man much sport and food.

Marshes and swamps which nature had placed for the home of wild life have been drained and to-day we are buying land for game preserves. Our only hope lies in reforestation and the stopping of the polluting of the streams.

Many of the rivers and streams that afforded fine fishing have become so polluted with mud that the fish have either perished or have been driven out. The student of nature realizes how stupid we American people have been in this respect. It is clear that the channels of streams are disappearing and the water supply therein is decreasing, and necessarily the life dependent upon that water supply is also decreasing.

The timber of the Nation, which was one of the elements of national wealth, should have been conserved years ago.

The same principle applies to another national source of wealth—oil. As fast as the hand of private capital can exhaust the supply so fast is that resource disappearing. We seem to adhere to the saying "Slam the door shut" after the animal has disappeared.

We have now a breathing spell, and have started principles of conservation, not alone for timber but also for the protection of the soil and water supply of the Nation.

The devastation of timber has brought about another evil in addition to destroying our timber supply and vegetation once sheltered by our forests. The President in his proclamation for Forest Week says that every year some 80,000 fires occur, which destroy our woodland.

The elements of nature cause a small percentage of these fires, but man, by careless and destructive habits, is the cause of the greatest per cent of forest fires. A cigarette smoker can cause the loss of millions of dollars in timber wealth. Besides the loss of human life, the loss from forest fires during the year in this Nation is in excess of $27,000,000. This loss was caused by 91,793 fires which burned and destroyed timber upon twenty-four and one-half million acres of land, an area as large as the State of Iowa. Seventy-two per cent of these fires were due to man's careless habits; 12 per cent were due to nature elements; and 15 per cent to unknown sources.

The American tobacco habit of smoking caused 5,626 fires, or 16 per cent; railroads caused 13 per cent of the fires; burning brush, 12 per cent. Under our fire-protection system 61 per cent were confined to fires of less than 10 acres, and less than 2 per cent exceeded 1,000 acres. Under the protected system the acreage areas as a whole were confined to average, one-fourteen hundredths of 140 acres, and without the protected system the average fire covered 337 acres. We see that the system of fire protection reduced the loss 60 per cent.

The influence that forests have upon water in the Nation is one of the most important subjects for solution to-day. The regularity of the flow of streams, the effect of erosion, must all be studied and considered in order that the prosperity of the Nation may not be endangered.

The devastation wrought by the uncontrolled flood waters of the Mississippi in the great flood of 1927 has brought the important question of flood control to our attention. Other problems than flood control are brought to mind. We turn to protecting, restoring, and conserving our great natural resources so vital to the needs, demands, and general utility of our people.

Through lack of economical use and protection, many of these resources are being exhausted. Oil and gas are fast disappearing and substitutes now are being demanded. Timber has become scarce, and we now awaken to its restoration, growth, and protection.

This form of education must continue if our soil is not to be washed away by erosion and our water supply curtailed. We must once more restore timber at the headwaters of the streams, upon the mountains, and on the hillsides. Waste land that will grow timber must be secured and utilized for that purpose.

We may think we own the land; we may go to the mountain top and say, as did Alexander the Great, "I am monarch of all I survey"; yet this is but a life lease. It has been and is continually being passed on.

This is very ably stated in an editorial appearing in the Albuquerque Journal, Albuquerque, N. Mex., under date of April 25, 1928, as follows:

> He who plants a tree does something for posterity and something for his own time as well. It is a beautiful thought that what we do to-day in the way of reforestation will benefit generations unborn, will aid in keeping our land verdant and beautiful as we know it, and will prevent erosion and kindred evils that will make of it a treeless waste, the prey of all the evils experienced by China and other countries whose forest armor has been sacrificed to greed, thoughtless improvidence, and crass indifference.

One thing that can not be stressed too strongly in this body, in public forums, clubs, and especially in the schoolroom, is the question of reforestation and protection of our timber. It means pure domestic water, the checking of floods, protection of and shelter for wild life, and restoration of proper climatic conditions.

The fact that Congress has passed legislation on this subject has stimulated an interest throughout the Nation for timber planting and conservation. This should be gratifying to those who have been foremost in this plan. The West must have timbered areas dotting its vast stretches; our mountain slopes and hillsides, which have been devastated must again be reforested. When this is properly brought about, and impounding dams have been erected, we will not be worried by drought, and certainly much of the flood disaster of the Nation will entirely disappear. Erosion will also be checked.

Scientific investigation of soil protection discloses that erosion carries away each year 1,500,000 tons of soil, and with it 60,000,000 tons of plant food. Little attention has thus far been paid to this depletion of soil which affords the sustenance for plant life in our agricultural and food-producing parts of the Nation.

Fostering education throughout the country by means of forest week, which has been proclaimed by the President and by the State executives in the Nation, is of great value in arousing interest in the observance of care and conservation of our

natural resources, particularly timber, which has heretofore been lacking in conservation.

Each person, man, woman, and child, in the United States should realize that the forest belongs to them; that they must care for and protect it; that the forest is the common heritage of all. By carrying into effect the McNary-Clark Act, in the course of half a century we can restore much of the protective watershed. Vast areas in Michigan, Wisconsin, Minnesota, and other States which were rich in pine and other forest trees can be replanted and can be classed again as timberland. The same principle can be applied with more force to the regions that were prairies; timber in such regions should be propagated and protected by State control.

The spirit of Arbor Day can not be stressed too strongly and observance of that day should be had in every school in the country.

ENROLLED BILLS SIGNED

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 3216. An act for the relief of Margaret T. Head, administratrix;

H. R. 7475. An act to provide for the removal of the Confederate monument and tablets from Greenlawn Cemetery to Garfield Park;

H. R. 11482. An act to amend section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes," approved February 24, 1925;

H. R. 11629. An act to amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service; and

H. R. 11723. An act to provide for the paving of the Government road, known as the La Fayette Extension Road, commencing at Lee & Gordon's mill, near Chickamauga and Chattanooga National Military Park, and extending to La Fayette, Ga., constituting an approach road to Chickamauga and Chattanooga National Military Park.

BILL PRESENTED TO THE PRESIDENT

Mr. CAMPBELL, from the Committee on Enrolled Bills, reported that this day they presented to the President of the United States, for his approval, a bill of the following title:

H. R. 10151. An act to amend section 9 of the Federal reserve act.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. COMBS (at the request of Mr. SOMERS of New York), for one day, on account of illness; and

To Mr. STROTHER, indefinitely, on account of illness.

ADJOURNMENT

Mr. HAUGEN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 7 o'clock and 39 minutes p. m.) the House adjourned until to-morrow, Friday, May 4, 1928, at 12 o'clock noon.

## COMMITTEE HEARINGS

Mr. TILSON submitted the following tentative list of committee hearings scheduled for Friday, May 4, 1928, as reported to the floor leader by clerks of the several committees:

COMMITTEE ON THE DISTRICT OF COLUMBIA

(7.30 p. m.)

To amend subchapter 1 of chapter 18 of the Code of Laws for the District of Columbia relating to degree-conferring institutions (S. 2366).

COMMITTEE ON BANKING AND CURRENCY

(10.30 a. m.)

To amend the act approved December 23, 1913, known as the Federal reserve act; to define certain policies toward which the powers of the Federal reserve system shall be directed; to further promote the maintenance of a staple gold standard; to promote the stability of commerce, industry, agriculture, and employment; to assist in realizing a more stable purchasing power of the dollar (H. R. 11806).

COMMITTEE ON NAVAL AFFAIRS

(10.30 a. m.)

To authorize an increase in the limit of cost of alterations and repairs to certain naval vessels (H. R. 13249).

To authorize the increase in the limit of cost of one fleet submarine (H. R. 13248).

## EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

477. A letter from the Secretary of the Navy, transmitting draft of a bill for the relief of Pedro P. Alvarez, to compensate the claimant for medical services and hospital treatment rendered to Sonora Josefa Somarriba, a native of Nicaragua; to the Committee on Foreign Affairs.

478. A communication from the President of the United States, transmitting supplemental estimate of appropriation for the Treasury Department for the fiscal year 1929, under the provision of the public building act approved May 25, 1926, $575,000 (H. Doc. No. 258); to the Committee on Appropriations and ordered to be printed.

479. A communication from the President of the United States, transmitting supplemental estimate of appropriations for the Treasury Department for the fiscal year 1929, $613,153; also drafts of proposed legislation affecting the use of existing appropriations (H. Doc. No. 259); to the Committee on Appropriations and ordered to be printed.

480. A communication from the President of the United States, transmitting supplemental estimates of appropriation for the Department of Agriculture for the fiscal year 1929; to enable the Secretary of Agriculture to carry into effect the provisions of the act approved April 16, 1928 (H. Doc. No. 260); to the Committee on Appropriations and ordered to be printed.

481. A communication from the President of the United States, transmitting supplemental and deficiency estimates of appropriations for the Department of the Interior for the fiscal years 1924 and 1927, $28,939.50; for the fiscal year 1928, $517,754.39; and for the fiscal year 1929, $452,500, amounting to $999,193,89; proposed authorizations for expenditure of Indian tribal funds amounting to $51,526.90, together with drafts of proposed legislation affecting existing appropriations (H. Doc. No. 261); to the Committee on Appropriations and ordered to be printed.

482. A communication from the President of the United States, transmitting supplemental estimates of appropriations for the Department of Justice for the fiscal year 1928, amounting to $204,973; also drafts of proposed legislation affecting existing appropriations (H. Doc. No. 262); to the Committee on Appropriations and ordered to be printed.

483. A communication from the President of the United States, transmitting supplemental estimate of appropriations for the Navy Department for the fiscal year ending June 30, 1928, and prior years, amounting in all to $2,429,241.59 (H. Doc. No. 263); to the Committee on Appropriations and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. TEMPLE: Committee on Foreign Affairs. H. J. Res. 268. A joint resolution requesting the President to negotiate with the nations with which there is no such agreement treaties for the protection of American citizens of foreign birth, or parentage, from liability to military service in such nations; with amendment (Rept. No. 1482). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13206. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the South Fork of the Cumberland River at Burnside, Pulaski County, Ky.; with amendment (Rept. No. 1484). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13207. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Neelys Ferry in Cumberland County, Ky.; with amendment (Rept. No. 1485). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13208. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Burkesville, Cumberland County, Ky.; with amendment (Rept. No. 1486). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13209. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at or near Arat, Cumberland County, Ky.; with amendment (Rept. No. 1487). Referred to the House Calendar.

Mr. PEERY: Committee on Interstate and Foreign Commerce. H. R. 13210. A bill authorizing the State Highway Commission, Commonwealth of Kentucky, to construct, maintain, and operate a bridge across the Cumberland River at Blacks

Ferry near Center Point in Monroe County, Ky.; with amendment (Rept. No. 1488). Referred to the House Calendar.

Mr. HUDDLESTON: Committee on Interstate and Foreign Commerce. H. R. 13481. A bill granting the consent of Congress to the Alabama State Bridge Corporation to construct bridges across the Tennessee, Tombigbee, Warrior, Alabama, and Coosa Rivers, within the State of Alabama; with amendment (Rept. No. 1489). Referred to the House Calendar.

Mr. HILL of Washington: Committee on Indian Affairs. S. 1480. An act authorizing certain Indian tribes and bands, or any of them, residing in the State of Washington, to present their claims to the Court of Claims; without amendment (Rept. No. 1490). Referred to the Committee of the Whole House on the state of the Union.

Mr. HOUSTON of Hawaii: Committee on Military Affairs. H. R. 13296. A bill to authorize the adjustment and settlement of claims for armory drill pay; without amendment (Rept. No. 1491). Referred to the Committee of the Whole House on the state of the Union.

Mr. FROTHINGHAM: Committee on Military Affairs. S. 3057. An act authorizing the Secretary of War to transfer and convey to the Portland water district, a municipal corporation, the water-pipe line including the submarine water main connecting Fort McKinley, Me., with the water system of the Portland water district, and for other purposes; with amendment (Rept. No. 1492). Referred to the Committee of the Whole House on the state of the Union.

Mr. REID of Illinois: Committee on Flood Control. H. R. 13484. A bill authorizing preliminary examinations of sundry streams with a view to the control of their floods, and for other purposes; without amendment (Rept. No. 1494). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. H. R. 12203. A bill to authorize the designation and bonding of persons to act for disbursing officers and others charged with the disbursement of public money of the United States; with amendment (Rept. No. 1497). Referred to the House Calendar.

Mr. GRAHAM: Committee on the Judiciary. H. R. 12249. A bill to remove the age limit of persons who may be confined at the United States industrial reformatory at Chillicothe, Ohio; without amendment (Rept. No. 1498). Referred to the House Calendar.

Mr. GRAHAM: Committee on the Judiciary. H. R. 12250. A bill to amend section 574, title 28, United States Code; without amendment (Rept. No. 1499). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. H. R. 13116. A bill to provide an additional justice of the Supreme Court of the District of Columbia, and for other purposes; without amendment (Rept. No. 1500). Referred to the Committee of the Whole House on the state of the Union.

Mr. BRITTEN: Committee on Naval Affairs. H. R. 13370. A bill authorizing the Secretary of the Navy to assign to the Chief of Naval Operations the public quarters originally constructed for the Superintendent of the Naval Observatory in the District of Columbia; without amendment (Rept. No. 1502). Referred to the House Calendar.

Mr. LEHLBACH: Committee on the Civil Service. H. R. 6518. A bill to amend the salary rates contained in the compensation schedules of the act of March 4, 1923, entitled "An act to provide for the classification of civilian positions within the District of Columbia and in the field services"; with amendment (Rept. No. 1503). Referred to the Committee of the Whole House on the state of the Union.

Mr. GRAHAM: Committee on the Judiciary. S. J. Res. 61. A joint resolution to provide for an agricultural day; without amendment (Rept. No. 1504). Referred to the House Calendar.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of Rule XIII,

Mr. WAINWRIGHT: Committee on Military Affairs. H. R. 10194. A bill for the relief of Maria Hensley Clay; without amendment (Rept. No. 1483). Referred to the Committee of the Whole House.

Mr. CARTWRIGHT: Committee on Indian Affairs. H. J. Res. 261. A joint resolution for the relief of Effa Cowe, Creek Indian, new born, roll No. 78; with amendment (Rept. No. 1493). Referred to the Committee of the Whole House.

Mr. W. T. FITZGERALD: Committee on Invalid Pensions. H. R. 13511. A bill granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of such soldiers and sailors of said war; without amendment (Rept. No. 1501). Referred to the Committee of the Whole House.

## ADVERSE REPORTS

Under clause 2 of Rule XIII,

Mr. GRAHAM: Committee on the Judiciary. H. Res. 180. A resolution directing the Attorney General to furnish to the House of Representatives certain information concerning prohibition enforcement, and for other purposes (Rept. No. 1495). Laid on the table.

Mr. GRAHAM: Committee on the Judiciary. H. Res. 181. A resolution directing the Secretary of the Treasury to furnish to the House of Representatives certain information concerning the enforcement of the prohibition act, and for other purposes (Rept. No. 1496). Laid on the table.

## CHANGE OF REFERENCE

Under clause 2 of Rule XXII the Committee on Pensions was discharged from the consideration of the bill (H. R. 8048) granting a pension to Margaret L. Davis, and the same was referred to the Committee on Invalid Pensions.

## PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of Rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BUSBY: A bill (H. R. 13500) to require the Civil Service Commission to make investigation and report on same in certain cases; to the Committee on the Civil Service.

By Mr. KOPP: A bill (H. R. 13501) authorizing Henry Horsey, Winfield Scott, A. L. Ballegoin, and Frank Schee, their heirs, legal representatives, and assigns, to construct and operate a bridge across the Des Moines River at or near Croton, Iowa; to the Committee on Interstate and Foreign Commerce.

By Mr. ANDRESEN: A bill (H. R. 13502) authorizing the State of Minnesota to construct, maintain, and operate a free highway bridge across the St. Croix River at or near Stillwater, Minn.; to the Committee on Interstate and Foreign Commerce.

Also, a bill (H. R. 13503) granting the consent of Congress to the State of Minnesota to construct, maintain, and operate a free highway bridge across the Mississippi River at or near Hastings, Minn.; to the Committee on Interstate and Foreign Commerce.

By Mr. RANKIN: A bill (H. R. 13504) to amend the act of August 11, 1916, known as the United States cotton futures act, as amended, by investing transactions in cotton for future delivery with public interest; providing a commission to supervise cotton futures exchanges; defining and prohibiting manipulations and squeezes, and for other purposes; to the Committee on Agriculture.

By Mr. JOHNSON of Oklahoma: A bill (H. R. 13505) to establish and maintain one or more pecan experiment stations, one located in the State of Oklahoma; to the Committee on Agriculture.

By Mr. LEAVITT: A bill (H. R. 13506) fixing the salary of the Commissioner of Indian Affairs and the Assistant Commissioner of Indian Affairs; to the Committee on Indian Affairs.

By Mr. SWANK: A bill (H. R. 13507) to amend section 3 of public act No. 230 (37 Stat. L. 194); to the Committee on Indian Affairs.

By Mr. THATCHER: A bill (H. R. 13508) to authorize the coinage of 50-cent pieces in commemoration of the enactment of the act of Congress, approved by the President on May 25, 1926, providing for the establishment in the State of Kentucky, of the Mammoth Cave National Park; to the Committee on Coinage, Weights, and Measures.

By Mr. WAINWRIGHT: A bill (H. R. 13509) to define the promotion list officers of the Army and to prescribe the method of their promotion, and for other purposes; to the Committee on Military Affairs.

By Mr. CRAIL: A bill (H. R. 13510) authorizing the erection in the city of Los Angeles of a suitable building for the Los Angeles branch of the Federal reserve bank; to the Committee on Banking and Currency.

By Mr. W. T. FITZGERALD: A bill (H. R. 13511) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war; committed to the Committee of the Whole House.

By Mr. DENISON: A bill (H. R. 13512) to amend the act entitled "An act to create the Inland Waterways Corporation for the purposes of carrying out the mandate and purposes of Congress, as expressed in sections 201 and 500 of the transportation act, and for other purposes," approved June 3, 1924; to the Committee on Interstate and Foreign Commerce.

By Mr. MERRITT: A bill (H. R. 13513) to authorize the Secretary of Commerce to convey the Federal Point Lighthouse

Reservation, N. C., to the city of Wilmington, N. C., as a memorial to commemorate the Battle of Fort Fisher; to the Committee on Interstate and Foreign Commerce.

By Mr. TILSON: A bill (H. R. 13514) authorizing citizen veterans of the World War to bring into the United States their wives who during legal infancy may have committed petty offenses; to the Committee on Immigration and Naturalization.

By Mr. SNELL: Joint resolution (H. J. Res. 294) providing for the completion of Dam No. 2 and the steam plant at nitrate plant No. 2 in the vicinity of Muscle Shoals, Ala., for the manufacture and distribution of fertilizers, for the sale of surplus power, and for other purposes; to the Committee on Military Affairs.

By Mr. DENISON: Joint resolution (H. J. Res. 295) authorizing an investigation and survey for a Nicaraguan canal; to the Committee on Interstate and Foreign Commerce.

By Mr. BEEDY: Resolution (H. Res. 184) requesting the Secretary of State, the Secretary of Agriculture, the United States Shipping Board, and the Interstate Commerce Commission to investigate in cooperation with each other the factors which are contributing to the diversion of commerce from points in the United States to Canadian ports and practical remedies for preventing such diversion, and to report thereon to the House at the beginning of the next session of the Seventieth Congress; to the Committee on Interstate and Foreign Commerce.

## PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREW: A bill (H. R. 13515) for the relief of the heirs of William H. Steele; to the Committee on War Claims.

By Mr. BOHN: A bill (H. R. 13516) providing for the examination and survey of Mackinac Island Passage; to the Committee on Rivers and Harbors.

By Mr. BRAND of Ohio: A bill (H. R. 13517) granting an increase of pension to Edna Olney Chrisman; to the Committee on Invalid Pensions.

By Mr. CLANCY: A bill (H. R. 13518) granting an increase of pension to Lance A. Chaldecott; to the Committee on Pensions.

By Mr. COLLINS: A bill (H. R. 13519) to authorize the Secretary of War to pay to R. B. Baugh, M. D., certain money due him for services rendered as a member of the local board of Smith County, Miss., operated during the World War; to the Committee on Claims.

By Mr. FAUST: A bill (H. R. 13520) granting an increase of pension to Catherine Knudsen; to the Committee on Invalid Pensions.

By Mr. FROTHINGHAM: A bill (H. R. 13521) for the relief of Minnie A. Travers; to the Committee on Claims.

By Mr. HOPE: A bill (H. R. 13522) granting a pension to Eva L. Smith; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13523) granting an increase of pension to Maranda F. Seals; to the Committee on Invalid Pensions.

By Mr. HOWARD of Oklahoma: A bill (H. R. 13524) for the relief of William Sheldon; to the Committee on Claims.

By Mr. HUDSPETH: A bill (H. R. 13525) granting a pension to G. P. Hodges; to the Committee on Pensions.

By Mr. KEARNS: A bill (H. R. 13526) granting a pension to Rosa Meyer; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13527) granting a pension to Sarah A. Fulkerson; to the Committee on Invalid Pensions.

By Mrs. LANGLEY: A bill (H. R. 13528) granting an increase of pension to Mima Osborn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 13529) for the relief of Chick Patrick; to the Committee on War Claims.

By Mr. POU: A bill (H. R. 13530) for the relief of J. R. and Eleanor Y. Collie; to the Committee on Claims.

By Mr. REED of New York: A bill (H. R. 13531) for the relief of Irene Brand Alber; to the Committee on Claims.

By Mr. SIMMONS: A bill (H. R. 13532) granting a pension to Raymond Emmett Slocumb; to the Committee on Pensions.

By Mr. SPEAKS: A bill (H. R. 13533) granting a pension to James J. Fitzgerald; to the Committee on Pensions.

By Mr. STRONG of Pennsylvania: A bill (H. R. 13534) granting an increase of pension to Elizabeth McLeister; to the Committee on Invalid Pensions.

By Mr. SWING: A bill (H. R. 13535) for the relief of Gertrude Wood; to the Committee on Claims.

By Mr. VINSON of Kentucky: A bill (H. R. 13536) granting an increase of pension to Arminna P. Rice; to the Committee on Invalid Pensions.

By Mr. TATGENHORST: Resolution (H. Res. 183) to pay Jennie K. Hunt, clerk to the late Hon. A. E. B. Stephens, a sum equal to one month's salary; to the Committee on Accounts.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

7385. By Mr. FROTHINGHAM: Petition signed by residents of Massachusetts, favoring flood-control legislation; to the Committee on Flood Control.

7386. By Mr. GARBER: Petition of Albert C. Hunt, justice, Supreme Court of Oklahoma, in support of the Tyson-Fitzgerald bill (S. 777, H. R. 500) without amendment; to the Committee on World War Veterans' Legislation.

7387. Also, petition of H. T. Petit, department adjutant the American Legion, Oklahoma City, Okla., in support of the Tyson-Fitzgerald bill without amendment; to the Committee on World War Veterans' Legislation.

7388. Also, petition of Mrs. Carl T. Wilson, department legislative chairman of the American Legion Auxiliary, Oklahoma City, Okla., in support of the Tyson-Fitzgerald bill without amendment; to the Committee on World War Veterans' Legislation.

7389. By Mr. HADLEY: Petition of residents of Sequim, Wash., protesting against the Lankford Sunday closing bill; to the Committee on the District of Columbia.

7390. By Mr. JOHNSON of South Dakota: Petition of citizens of Day County, protesting against the passage of the compulsory Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

7391. By Mr. KVALE: Petition of Mrs. E. W. Simpson and Mrs. M. N. Munson, Montevideo, Minn., urging passage of Stalker bill (H. R. 9588); to the Committee on the Judiciary.

7392. Also, petition of Mr. and Mrs. Thomas Simmons and Mr. and Mrs. E. C. Johnson, of Buffalo Lake, Minn., urging passage of Stalker bill (H. R. 9588); to the Committee on the Judiciary.

7393. By Mr. LEAVITT: Petition of citizens of Lewistown, Mont., urging increases in pensions for Civil War veterans and widows of veterans; to the Committee on Invalid Pensions.

7394. By Mr. LINDSAY: Petition of the Cigar Makers International Union of America, Glendale, Brooklyn, N. Y., protesting against House Resolution 9195, proposing to revise the statutes permitting the importation of cigars, cheroots, and cigarettes in quantities of less than 3,000 in a single shipment or consignment from Cuba; to the Committee on Interstate and Foreign Commerce.

7395. Also, petition of Military Order of the World War, New York, urging passage of Tyson-Fitzgerald bill without amendments; to the Committee on World War Veterans' Legislation.

7396. By Mr. McREYNOLDS: Petition from citizens of Cowan and Monteagle, Tenn., protesting against the passage of the Sunday observance bill (H. R. 78); to the Committee on the District of Columbia.

7397. By Mr. McSWEENEY: Petition of members of Weimer-Widder Post, No. 549, American Legion, of Beach City, Ohio, favoring Capper-Johnson bill; to the Committee on Military Affairs.

7398. By Mr. MEAD: Petition of Chamber of Commerce of Buffalo, N. Y., pertaining to farm-relief legislation; to the Committee on Agriculture.

7399. By Mr. O'CONNELL: Petition of the National Fertilizer Association, Washington, D. C., opposing the pending House substitute for the Norris Muscle Shoal resolution (S. J. Res. 46), particularly paragraph C of section 20, for which a special rule is now being sought; to the Committee on Foreign Affairs.

7400. Also, petition of the Cigar Makers' International Union of America, Local Union No. 87, Glendale, Brooklyn, N. Y., opposing the passage of House bill 9195, amending sections 2804 and 3402 of the Revised Statutes; to the Committee on Ways and Means.

7401. Also, petition of the Colorado River Commission of Arizona, Phoenix, Ariz., with reference to the Boulder Canyon Dam bill (H. R. 5773); to the Committee on Irrigation and Reclamation.

7402. By Mr. QUAYLE: Petition of Groton Chamber of Commerce, of Groton, Conn., opposing any legislative provision (as outlined in the naval construction bill, H. R. 11526), favoring ship or engine construction in Government plants; to the Committee on Naval Affairs.

7403. Also, petition of the Cigar Makers' International Union of America, of Glendale, Brooklyn, N. Y., opposing House

Resolution 9195, amending sections 2804 and 3402 of the Revised Statutes; to the Committee on Ways and Means.

7404. Also, petition of the Ellay Co. (Inc.), of New York City, favoring the old rate of postage of 1 cent on third-class matter; to the Committee on the Post Office and Post Roads.

7405. Also, petition of the American Legion, Department of New York State, headquarters of New York City, favoring the passage of the universal draft bill; to the Committee on Military Affairs.

7406. Also, petition of Gen. Harrison Gray Otis Post, No. 1537, of Los Angeles, Calif., favoring the passage of the Tyson-Fitzgerald bill; to the Committee on Military Affairs.

7407. Also, petition of the United Veterans of the Republic, of Los Angeles, Calif., favoring the passage of the Tyson-Fitzgerald bill; to the Committee on Military Affairs.

7408. Also, petition of Military Order of the World War, of New York, favoring the passage of the Tyson-Fitzgerald bill; to the Committee on Military Affairs.

7409. Also, petition of Post No. 169, American Legion, of the United States Veterans' Hospital of Outwood, Ky., favoring the passage of the Cutting-Blanton bill; to the Committee on World War Veterans' Legislation.

7410. Also, petition of the American Federation of Labor, favoring the passage of Senate bill 744, with certain amendments, for the establishment and maintenance of the Nation's merchant marine service; to the Committee on the Merchant Marine and Fisheries.

7411. By Mr. TEMPLE: Resolution of Department of Pennsylvania, the American Legion, in support of legislation for the retirement of emergency Army officers permanently disabled in line of duty (H. R. 500, S. 777); to the Committee on World War Veterans' Legislation.

## SENATE

### FRIDAY, *May 4, 1928*

*(Legislative day of Thursday, May 3, 1928)*

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

The VICE PRESIDENT. The Senate will receive a message from the House of Representatives.

#### MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Haltigan, one of its clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 9481) making appropriations for the Executive Office and sundry independent executive bureaus, boards, commissions, and offices, for the fiscal year ending June 30, 1929, and for other purposes; that the House receded from its disagreement to the amendment of the Senate numbered 4 to the said bill and concurred therein; that the House receded from its disagreement to the amendments of the Senate numbered 1, 10, and 11 and concurred therein severally with an amendment, in which it requested the concurrence of the Senate, and also that the House insisted on its disagreement to the amendments of the Senate numbered 7, 8, and 9.

The message also announced that the House had passed the bill (S. 3555) to establish a Federal farm board to aid in the orderly marketing and in the control and disposition of the surplus of agricultural commodities in interstate and foreign commerce, with an amendment, in which it requested the concurrence of the Senate.

#### ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Vice President:

H. R. 3216. An act for the relief of Margaret T. Head, administratrix;

H. R. 7475. An act to provide for the removal of the Confederate monument and tablets from Greenlawn Cemetery to Garfield Park;

H. R. 11482. An act to amend section 2 of an act entitled "An act to authorize an appropriation for the care, maintenance, and improvement of the burial grounds containing the remains of Zachary Taylor, former President of the United States, and the memorial shaft erected to his memory, and for other purposes," approved February 24, 1925;

H. R. 11629. An act to amend the proviso of the act approved August 24, 1912, with reference to educational leave to employees of the Indian Service; and

H. R. 11723. An act to provide for the paving of the Government road, known as the La Fayette Extension Road, commencing at Lee & Gordon's mill, near Chickamauga and Chattanooga National Military Park, and extending to La Fayette, Ga., constituting an approach road to Chickamauga and Chattanooga National Military Park.

#### ORDER OF PROCEEDING

Mr. HARRISON obtained the floor.

Mr. CURTIS. Mr. President, will the Senator yield? I desire to suggest the absence of a quorum.

Mr. HARRISON. If the Senator will withhold the suggestion for a moment, I will then yield. I understand the Senator from Michigan [Mr. VANDENBERG] desires to call up a bill for consideration which will not entail any discussion. I yield to him for that purpose.

#### ADDITIONAL CIRCUIT JUDGE FOR SIXTH JUDICIAL CIRCUIT

Mr. VANDENBERG. Mr. President, I ask unanimous consent for the immediate consideration of Calendar No. 980, the bill (H. R. 8229) for the appointment of an additional circuit judge for the sixth judicial circuit.

The VICE PRESIDENT. Is there objection to the request of the Senator from Michigan?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, and it was read, as follows:

*Be it enacted, etc.*, That hereafter there shall be in the sixth circuit four circuit judges, to be appointed and to have the powers, salary, and duties prescribed in section 118 of the Judicial Code, as amended.

The bill was reported to the Senate without amendment, ordered to a third reading, read the third time, and passed.

#### RELIEF OF FARMERS

Mr. BLEASE. Mr. President, I ask unanimous consent to have printed in the RECORD certain excerpts from various publications relating to the subject of farm relief and the farm-loan system.

The VICE PRESIDENT. Without objection, it is so ordered.

The matter referred to is as follows:

[Editorial appearing in Cooperation Magazine, published by the Cooperative League, New York City]

"RELIEVING" THE FARMER

Last year 2,000,000 people left the farms in the United States. More than half the population of this country is now living in towns and cities of more than 2,500 population. Only about one-fourth of the people are on the farms. The mortgages on the farms, unlike the people, are steadily increasing. The farms are slipping out of the hands of the farmers. The farmers are slipping away from the farms.

POLITICIANS STEAL BANKS FROM FARMER-OWNERS

All kinds of schemes to relieve the farmer have been promoted at Washington. And about the only thing he has been relieved of is his cash. The Federal farm loan act and the bureau which it created might have done the farmer good. But the whole machinery was turned over to the bankers, who now use it to do the farmers. The farmers have no control over the very act that was passed for them. In the meantime things with the farmers go from bad to worse.

GRANGE STANDS FOR PRIVATE OWNERSHIP OF ALL FARM ENTERPRISES

A most comprehensive plan has been developed by A. S. Goss, master of the Washington State Grange. Mr. Goss has taken his plan to Washington with a committee of the National Grange, which has indorsed it, to try to get it enacted into law. The National Grange has for many years been a bulwark of reactionary conservatism. The fact that this measure has come out of its last convention would indicate that the breath of a new life has been blown into it. It looks as though leaders who once were but the agents of the railroads are giving place to farmers of vision and capacity.

---

[Article appearing in Farm and Fireside, New York City]

WHAT THE FARM-LOAN SYSTEM NEEDS

(By Gertrude Mathews Shelby, New York writer and a careful student of cooperative credit, executive secretary of the national committee for cooperative banks)

[EDITOR'S NOTE.—We believe in the farm-loan system. We have not attacked it. We have merely called attention to policies and practices of the Federal board in Washington, which are clearly contrary to the letter and spirit of the farm loan act, which intended that management and control should be turned over to farmers.

We continue to insist upon a fair trial of the cooperative features of the law. We hold that farm-loan associations should be strengthened, not eliminated; that they should govern the land banks and participate in making a new market for bonds, while not discarding the old market.

Cooperative marketing is proving highly useful. Genuine cooperative credit will do as much, and even more. (George Martin, editor.)

DO SOMETHING CONSTRUCTIVE

Inasmuch as Farm and Fireside has unstintingly criticized the policies of the farm-loan system it is only just to farmers, to the Federal bureau, and to ourselves to offer in a wholly constructive spirit suggestions about the manner in which the situation may be remedied.

SEPARATE FEDERAL LAND BANKS FROM INTERMEDIATE CREDIT BANKS—A DANGEROUS DUAL POLITICAL AND FARMER-OWNERSHIP COMBINATION

The farm loan and agricultural credits acts should be amended, we think, in the following particulars:

1. The 12 new intermediate credit banks should be immediately and completely separated from the 12 land banks, with which they are now linked. Why?

Intermediates are Government-owned; land banks are farmer-owned. With the same board governing both, a knock on the head intended for one might kill both. Their destinies should not be confused.

Besides that, land-bank boards are now "the little neck of the farm-loan bottle." Even when money is on hand to lend, service is slow partly because applications can not be handled fast enough. Their work should not have been further complicated. Intermediates loan on livestock and warehoused products, land banks on real estate. A full board of experts on each highly specialized type of risk is needed.

2. Nearly four millions of undivided surplus or profits are being withheld. The act should be amended to specify when and how each borrower can get his full share of profits on his stock. To deprive a stockholder of any part of this surplus is to deprive him of the advantages of cooperation.

GET THE FARMER OUT OF DEBT!

After the required ample reserves are set aside, all earnings might be distributed annually. Or the interest rate might be lowered. The fairest plan for the farmer and safest for the system seems to us to be to apply earnings to shorten the term of loans—get the farmer out of debt quicker.

Also, upon repayment of a loan the law should require that it be retired at book value, not par, as now.

FARMERS NEVER GIVEN BUSINESSLIKE ACCOUNT OF THEIR BANKS

3. Businesslike account of your own great banking system has never been made to farmer stockholders. No statement is businesslike which does not include a detailed profit, loss, and expenditure account.

FARMER-OWNERS LIABLE FOR ALL LOSSES OF ALL LAND BANKS

4. Stockholders share in the gains of only their own land banks, but are liable to participate in the losses of all 12. Therefore the Federal board should be required to make available periodically a detailed report and statement of every bank in the system to any stockholder. Borrowers should be in a position to find out facts in full.

LET FARMERS BE REPRESENTED BY MAJORITY CONTROL OF BANKS THEY NOW FULLY OWN AND FULLY ASSUME LIABILITIES OF

5. The control of land-bank boards should be restored to stockholders, now practically powerless to control policy. The original number of directors should be restored to nine, of whom stockholders should elect six. This was guaranteed when 250,000 farmers purchased stock.

(More than 400,000 farmers, or 150,000 more than required number, now own this stock.)

OPERATE A GREAT SECRET CLAN OF FACT SUPPRESSION

6. The law by amendment should make it obligatory upon the board to publish for the use of stockholders a list of all associations and their directors. This information has been generally denied. Because the farmers' candidates in the recent elections did not have access to such lists those events were a farce. The law should require that up-to-date lists be distributed to directors of associations six months before each election, held every three years.

7. In some counties to discover the whereabouts of the farm-loan association requires a search warrant. What private business would fail to have its name in the telephone book and in the general directory? The law should require listing. If it has no office, the address of the official who conducts its business should be given.

PRIVATE BANKS HAVE THEIR MUTUAL, PROTECTIVE ASSOCIATIONS—WHY DOES FARM LOAN BOARD FEAR TO HAVE FARM-LOAN ASSOCIATIONS HAVE THEIR OWN ORGANIZATIONS FREE FROM FARM LOAN BOARD POLITICAL HAMSTRINGING AND HOG-TIED METHODS? IS THERE A REASON? THERE IS—THEY FEAR THAT SUCH A MOVEMENT WOULD SOON END THEIR UNFAIR AND UNJUST POLITICAL DOMINATION OF THAT WHICH THE FARMER NOW OWNS, AND THE END OF THEIR POLITICAL IRON-HAND RULE

The indisputable right of farm-loan associations to federate independently, without hindrance or dictation from land banks or Government bureaus, should be clearly established by an amendment. Had voluntary federation not been forbidden the associations, it would have been well-nigh impossible for politicians to control the land banks all these years. Real cooperation can not be ordered as a woman orders cheese from a store. Men must know each other well to choose officers, decide upon policy with restraint or regulation, and live up to common responsibility.

THESE POLITICAL BANKERS ARE THE ONLY ONES WHO ENJOY A "FREE BUGGY RIDE" AT THE EXPENSE OF THE OWNERS—ALL OTHERS PAY THEIR OWN EXPENSES—UNFAIR TREATMENT ACCORDED FARMER-OWNERS

The provision which requires land banks to pay the expenses of the Farm Loan Bureau of the Treasury Department out of the earnings on farmers' loans is unjust and should be repealed. National and Federal reserve banks do not pay expenses of similar bureaus.

THE FARM LOAN BOARD IS A GOVERNMENT UNTO ITSELF—SHOULD BE MADE RESPONSIBLE TO SOME ONE IN AUTHORITY TO REPRESENT THE PEOPLE AND REMOVED FROM PRESENT PETTY POLITICAL PLUNDERING

The Federal bureau is practically responsible to no authority. It should be made responsible to the Secretary of the Treasury and to the Director of the Federal Budget. The bureau now asks Congress for whatever appropriation it wants. If Congress votes the money, land banks will refund the amount to the Treasury. Because no Government funds are being spent, no check upon expenditures is probable. The door is open to wastefulness and exploitation.

POLITICS HAS CREPT INTO ITS ACTIVITIES—PUT EMPLOYEES UNDER CIVIL SERVICE AND REMOVE THEM FROM PETTY POLITICS

Political and personal patronage has crept into the system. To eradicate it, the act should be amended to place all employees of the board, including appraisers, under civil service.

THERE ARE SIX TOO MANY "BOB-TAILED" MEMBERS OF THE FARM LOAN BOARD—ONE HONEST SUPERVISOR ALL THAT IS NEEDED

To promote efficiency and heighten accountability we recommend reducing the Federal Farm Loan Bureau to one responsible official, who should be farm loan commissioner under the authority of the Secretary of the Treasury. "Bob-tailed commissions" grow slack. When something is found wrong it's nobody's fault. A single commissioner who understands and believes in genuinely cooperative credit is better than six mortgage specialists.

STRENGTHEN THE LOCAL FARM-LOAN ASSOCIATIONS

Demand that your farm-loan associations be strengthened. In this lies the great hope of farmers. Amendment of the law which will permit secretary-treasurers, after loans reach a stated total, to receive reasonable compensation for making collections and performing other duties is one practical step. Arguing that secretary-treasurers would not do this now unpaid work properly, the bureau refused to permit associations to make their own collections, etc.

FARM LOAN BOARD TREATS FARMERS' ASSOCIATION UNFAIRLY AND UNJUSTLY

The Federal bureau has consistently treated the association as though it were a vermiform appendix of the system—quite useless. It has repeatedly backed legislation to remove it under guise of arranging for "voluntary liquidation." The last Congress refused because the association's appraisal and indorsement of loans adds to the security behind the bonds. The law made the associations responsible for collections for two reasons: (a) To save money. (b) By prompt attendance to any delinquency before it becomes a default the association could often prevent loss. When defaults occur, the association as a whole must make good the sum. The secretary-treasurer, knowing personally borrower, property, and circumstances is obviously the best man to act.

BANKER POLITICIANS SERVE FARMERS—SHOULD BE REPLACED BY ACTUAL FARMER REPRESENTATIVES

Secretary-treasurers imbued with the spirit of cooperation do not balk full performance of their duties. Nevertheless, more efficient service might be secured if the work were paid for. Those in a position to know state that three-quarers of the secretary-treasurers are not imbued with the cooperative ideal of the system, the majority being bankers or country lawyers formerly or now engaged in private mortgage business. If so, stockholders should clean house. By the right sort of secretary-treasurers associations may readily be developed into strong, effective community agencies. The maximum income secretary-treasurers can now make is about $2,500 a year; the average is less than half, and the minimum can't be seen with the naked eye.

OPEN UP THE FARM-LOAN BOND SALES—LET EVERY BUYER HAVE A CHANCE INSTEAD OF A BANKER CLIQUE IN NEW YORK

14. Without disturbing present arrangements for the sale of bonds on the market now absorbing them (to secure the funds to loan farmers) provisions should be added to the law which would give everybody a chance to buy these securities and insure a steady expansion of the system.

Now bonds are issued only several times a year. Rich investors get them. They are practically all held east of Lake Erie. No general market has been developed. Small investors must have money available at precisely the moment the issue is out to get a smell of them.

Congress should place upon land banks and the bureau unmistakable responsibility to cultivate the widest possible market for bonds to secure the money to loan.

(a) Bonds should be on sale every day in the year.

(b) They should be widely advertised, until they become as well known as the soap that floats or the cigarette that satisfies.

(c) Secretary-treasurers should be empowered to sell these bonds and collect the commissions. Borrowers now have the right under the law, when for lack of funds their applications can not be granted by the land bank, to take their loans in bonds instead of in cash. Not many would have time or would want to sell these bonds. Secretary-treasurers, however, if permitted, might readily sell them. The old difficulty of finding farm-mortgage money was due partly to the necessity of finding a man with exactly the needed amount. Farm-loan bonds, in denominations of $25, $40, and $100 allow the loan to be split up between any number of purchasers.

Land banks should stand behind the bonds to prevent speculative variation in price.

The amount sold should be added to the quota allotted by the land bank to the association from the general sale of bonds. Forty-seven hundred secretary-treasurers would make a real sales force if trained, and the office would then become a position with fine prospects in it for a "live wire." Rubber and oil-stock salesmen can testify to the amount of money for investment in small towns and country districts. If money made in agricultural regions is kept there, the farmers' dependence on the traditional money center will be lessened and in time an independent financial system built up.

BIG BANKERS HAVE HYSTERICS IF DEPRIVED OF THEIR "RAKE-OFF"

The only people who would be sad are those financiers who privately have hysterics at the mere idea of anybody's money being handled without their getting the accustomed rake-off.

FARM LOAN BOARD IGNORES WILL AND RIGHTS OF THE FARMER-OWNERS OF THE 12 FEDERAL LAND BANKS—TOO PREPOSTEROUS TO BE PERPETUATED LONGER

The Federal Farm Loan Bureau should be legally confined to the reasonable duties of a department of the Treasury, to functions which are supervisory only. The spectacle of 12 privately owned banks being run by politicians who can ignore the will of stockholders, treat them arbitrarily, and get away with it is too preposterous to be perpetuated.

RESTRICT THE FARM LOAN BOARD TO ITS OWN BUSINESS AND PERMIT PRIVATE OWNERSHIP AND MANAGEMENT TO THRIVE INSTEAD OF BEING STIFLED BY POLITICAL PLUNDERERS

The bureau's main functions should be: (a) To see that mortgages in every way comply with the requirements laid down by the law, particularly that they do not exceed 50 per cent of the value of the property; (b) that bonds are properly issued; (c) that reserves are set aside by associations and banks as prescribed; (d) that investments are of required character; (e) that funds are accumulated to pay interest and retire bonds when due; (f) to maintain a campaign of education upon cooperative credit.

FARM LOAN BOARD GUILTY OF USURPATION OF PEOPLE'S RIGHTS—NEED OF DECENTRALIZATION OF THE PRESENT POLITICAL BANKING SYSTEM—LET THE PEOPLE RULE

It is usurpation of rights clearly belonging to stockholder-borrowers for the bureau to determine all policies. It must now approve every appointment. No wonder it is possible indirectly to run the whole system. Its domination, tolerable in the infancy of the land banks, would long ago have been limited if elections had been held as prescribed in the original act. The agricultural credits law extended the bureau's control. These provisions should be repealed, the system decentralized, and the board's power decidedly diminished.

---

[Reprinted from article appearing in The Nation, New York City]

THE POLITICIANS BETRAY THE FARMER

By Gertrude Mathews Shelby

The mortgage on the old farm, in billion-dollar bulk, has become national drama. Three hundred thousand farmers own 12 great district land banks of the billion-dollar farm-loan system. They subscribed forty-five millions of capital stock, but have been deprived of their right, guaranteed by the farm loan act, to manage and operate their property.

OFFERS GREATEST SYSTEM FOR POLITICAL PLUNDER IN COUNTRY

Why? Partly because the system offers to politicians the greatest patronage outside of the civil service, coupled with the ability to lend two hundred to three hundred millions a year, and partly because of a bureaucrat at the head of the Federal Farm Loan Board. But most important, a fundamental new power was given to our people by the farm loan act, a power financiers greatly feared, whereby agriculture could create and control its own credit pool. If agriculture made a success of the exercise of that right, other workers could justly demand it. The concentration of money might be menaced.

HOW THE FARM LOAN BOARD HANDLED $881,000,000 WITHOUT ANY BOOKS

Naturally a dramatic struggle is on. Sidelights of it appeared in a little-noticed investigation of Congress last session, and a new and more searching inquiry will possibly be demanded this winter. How the Federal Farm Loan Board did business was shown by indisputable testimony that the board had kept no books on transactions of eight hundred and eighty-one millions.

"It recently took the Treasury Department, employing 10 accountants, and working double shifts, from March 12 to about May 1, or nearly seven weeks, to compile a mere statement of receipts and expenditures from the Farm Board records," said Senator HOWELL to his colleagues. "Moreover, the accountant in charge of this work testified that he would have been unable to make up the statement from the records afforded him without the aid of the memories of several of the employees of the board."

ILLEGAL DIVERSION OF TREASURY FUNDS INTO "HIDDEN" BANK ACCOUNT

It was charged also that the board had removed $43,000 from the Treasury without authority, disbursing it without vouchers or receipts upon checks signed only by the Farm Loan Commissioner, first Charles E. Lobdell, later R. A. Cooper. Upon this, too, no books were kept.

ITEMS DISALLOWED BY COMPTROLLER GENERAL PAID BY BOARD MEMBERS

What was done with the money? Items disallowed by the Comptroller General were paid from it. Traveling expenses and extra salaries were paid. Presents were made to employees. Lobdell, who had become the beneficiary of a salary of $25,000, not authorized by the act, plus $15,000 more for expenses, had received his monthly stipend from this account, unknown to the Comptroller General.

SENATOR EDWARDS CALLS IT "ACCOUNT JUGGLING"

Senator EDWARDS has declared that "accounts were juggled." Nepotism of the worst sort existed.

LOBDELL LOVES TO HIRE DRESSMAKERS AS CLERKS

Lobdell employed two sons, another relative, an old friend, his wife's former dressmaker (as statistician of the board), and as secretary his wife's former dressmaker's nephew.

SENATOR HOWELL MAKES SERIOUS CHARGES—"MISAPPROPRIATION OF FUNDS"—CALLS FOR INVESTIGATION

Senator HOWELL made six serious charges on the floor of Congress, including "misappropriation of funds," and put in a resolution of investigation, still pending.

That is one reason why the Progressive platform (1924) carried a plank demanding reconstruction of the farm loan system and indorsing cooperative banking. That is why also certain conservative Democratic and Republican Congressmen have put in bills to accomplish the same end.

There is nothing really more human than the aspiration and pain represented by mortgages. They tell the tale of the struggle of men for homes, for land. From the era of the covered wagon till now men have had to depend on funds obtained on security of their land to start or to stock farms, to carry on through bad crops or general depression. Little farmers, wanting small loans, always suffered most from the mortgage sharks. They got the worst terms. They constitute the bulk of the pitiful flood of bankrupt farmers to-day, a scandalous reflection on both our land and credit policies.

FARMERS HAVE PAID FOR THE BANKS—WHY ARE THEY DEPRIVED OF RIGHTS?

The farm loan act was our first Federal law to encourage banks of the people for use, not profit. Providing a workable method for securing large funds at low cost by issuing bonds against the farm lands on which loans were made, it granted farmers the right to make themselves independent of existing financial pools. Congress advanced $9,000,000 to start 12 land banks. This is now practically all repaid out of earnings. Farmers who borrowed were required to purchase stock to 5 per cent of the amount of their loans. Furnishing the capital, they were endowed with the right to control the management of all 12 land banks, electing the majority of directors. This they have never been permitted to do. In these land-bank boards was vested power to issue and to sell, in whatever manner they saw fit, together or separately, tax-exempt bonds.

WALL STREET BANKERS' CLIQUE CONTROL SALE OF BONDS WHILE LOBDELL DRAWS DOWN A FAT SALARY AND HIGH EXPENSES (TO DRESSMAKERS?)

Selling the bonds is the key power of the system. That is the crux of the present complicated drama. The Federal Farm Loan Board usurped that power, and gave the bond sale over exclusively into the hands of the very group whose interest it was to keep financial power centralized.

A syndicate of six bond houses has had this lucrative business. It is composed of Brown Bros., Harris Forbes & Co., Lee Higginson & Co., the National City Co., the Guaranty Trust Co., and Alexander Brown & Sons, of Baltimore. The amount and time of farm-loan bonds issued have practically been determined by counsel with their agents. That, of course, offers practical if not direct control over how much money agriculture shall receive through this channel. Instead of allowing farmers to decentralize credit the Federal Farm Loan Board, usurping powers in the last analysis belonging to stockholders, hogtied them to the same financiers from whom they were to escape if they chose.

FARMERS, NOT POLITICIANS, HAVE MONEY AND LAND AT STAKE—LET THEM RUN THEIR OWN BUSINESS FREE FROM POLITICAL DOMINATION

A word about the structure of this system. The act provided that 10 or more farmers who wanted loans should organize cooperatively a national farm-loan association ("national" only in that there would be others all over the land). There are now 4,500 of these purely local groups. Certain of them have done a million-dollar business each. When such an association received its charter Government appraisers visited the land, recommending to the lank bank allowance or rejection of loans. Farmers who got loans took stock in the land bank of their district—for example, Spokane, or Springfield (Mass.), or New Orleans. The associations had to indorse every loan, enhancing the security behind the bonds. All associations are liable to twice the value of their stock ($130,000,000) for losses of their own land bank, and each bank is liable for the losses of every other.

"FEDERAL" IN NAME ONLY—IT IS REALLY THE FARMERS' OWN SYSTEM, BUT FARM-LOAN BOARD DENIES THIS FUNDAMENTAL FACT AND WOULD HAVE THE WORLD BELIEVE THAT THEY, THE POLITICIANS, OWN IT

A huge chain. Although called the Federal farm loan system, it never was Federal. It is the farmers' own, but the Federal Farm Loan Board has given them scant encouragement to think so. Within a year after the system was started in 1917 the farmers had met all requirements to take over management of the banks.

NO ELECTIONS HELD BY FARM LOAN BOARD AS DEMANDED IN FARM LOAN ACT—BOARD NEGLECTS TO DO ITS LEGAL DUTY BY FARMERS

But no elections were called. The Federal Farm Loan Board, announcing itself in its first report as opposed to control of banks by borrowers (the farmer owners)—although the first premise of the act the board was intrusted to administer, but that the farmer stockholders and owners should operate their own land banks—proceeded to override the law and to usurp vital functions. To prevent farmers from demanding control, using the plausible excuse that they took the action to protect bond buyers and also to promote the sale of Liberty bonds then being issued, the board secured an amendment deferring elections.

FARMERS DID NOT KNOW WHAT HAD HAPPENED UNTIL AFTER THEY HAD BEEN ROBBED BY POLITICIANS—FARM LOAN BOARD REFUSED TO EVEN LET FARMER OWNERS SEND $10 TO PROTECT THEMSELVES FROM THIEVES OF WASHINGTON CLIQUE

No explanations were vouchsafed. Farmers did not know what had happened to them until several years later. No elections being held, stockholders protested. Some of them tried to organize to protect themselves. Two Attorneys General refused to allow them to use even $10 a year of association funds to support a federation. (Infamous and shady Harry Daugherty was one of these! "Birds of a feather flock together!" No further comment necessary.)

THE STRONG BILL WAS PLAIN BETRAYAL OF PUBLIC TRUST BECAUSE IT LEGALIZED USURPATION OF POWER AND BANISHED HOPE OF PROPERTY OWNERS TO ASSERT THEIR CONSTITUTIONAL RIGHTS

In 1923 the Federal Farm Loan Board wrote and obtained from Congress a revision and emasculation of the original farm loan act by means of the Strong bill. Its provisions were a betrayal of public trust, stultifying the purposes of the original act, legalizing the usurpation of power by the board, and banishing the hope of the farmer stockholders to regain control of their property.

SENATE PASSES VITAL LAW WITHOUT CONSIDERATION—DISGRACEFUL LAST-MINUTE TRICK

Without being considered by the Senate at all it became law. In the disgraceful last-minute legislative jam its sponsors slipped the bill into the composite intermediate credits act, between two measures the Senate had separately passed. Without discussion, without a reading of the bill or the conference report, it became law.

SENATOR FLETCHER CALLS PROVISION "CONFISCATION OF FARMERS' PROPERTY AND RIGHTS TO CONTROL THEIR OWN PROPERTY"

According to Senator FLETCHER (long friend of the farmers' land-bank system), this amendment confiscated the farmers' rights to control their own property. It reduced farmers' elected representation on each land-bank board to a minority. Thus uninterrupted continuation of the bond-selling policy was made probable, for the old land-bank boards were perpetuated in power. This legislation destroyed the promise of decentralization of land credit; it should be repealed.

FARMER OWNERS DEPRIVED OF RIGHT TO OPERATE THE BANKS THEY HAD BOUGHT AND FULLY PAID FOR—POLITICIANS WITHOUT ONE CENT AT STAKE DO ALL THE BOSSING AND RUN UP ALL THE BILLS FOR THE FARMERS TO PAY

Not until the first elections held in seven years occurred could the stockholders fairly measure the seriousness of what had happened. Then they discovered that they had been deprived of their last chance to affect policy, improve service, eradicate policies, reduce their own interest rate—higher than offered by private companies not enjoying tax exemption—or secure the return of several millions of undivided profits held up from year to year. They found the entire system in the hands of politicians with not one cent at stake!

LOBDELL OVERREACHES HIMSELF IN SALARY-GRABBING CAMPAIGN—SENATORS BECOME CURIOUS AS RESULT OF POLITICAL PILLAGE

If salaries had not been raised throughout the land banks, and Lobdell had not overreached himself grabbing for salary and place, the stockholders' protests might have availed them nothing. But certain Senators became curious, and finding facts impossible to ascertain put several resolutions through the Senate which forced continued hearings before the Banking and Currency Committee.

UNFAIR AMENDMENT SADDLED ENTIRE EXPENSE ON FARMERS WHICH IS CONTRACTED BY POLITICIANS—UNPRECEDENTED TREATMENT OF AMERICAN PROPERTY OWNERS

The new legislation put the entire expenses of the Federal Farm Loan Board, a bureau of the Treasury, on the farmers' backs—an unprecedented arrangement; National and Federal reserve banks do not pay the cost of their bureaus. Two new $10,000 memberships were added to the board. Senator BORAH objected to this, charging the two places had been added as a matter of "political exigency." The board, although on record that it was large enough to take care of the work, now declared the new members necessary.

FARMERS REPORT UNFAIR TREATMENT AND POOR SERVICE

Farmers reported unfair practices and poor service; they demanded control of their own banks. Yet the Senate committee refused Senator HOWELL'S request to call certain witnesses or go into the matter further. The appointments were confirmed!

"PLACES MORE IMPORTANT THAN PRINCIPLES," SAID SENATOR NORRIS

"Case of places being more important than principles," commented Senator NORRIS, of Nebraska.

Places! "The system has become a political annex and pie-counter," wrote a stockholder.

POLITICAL PHASE OF POLITICAL BANKS THREATENS EVERY VOTER—PATRONAGE CLAMORED FOR BY POLITICIANS—HENCHMEN THRIVE OFF FARMER HELD DOWN BY TRICK OF CONGRESS IN TAKING AWAY FROM RIGHTFUL OWNERS THEIR RIGHTS TO MANAGE THEIR OWN LAND BANKS

The political phase of these dull-sounding agricultural banks now threatens if it does not already affect every voter. Remember that this system which lends hundreds of millions a year is wholly in the hands of hundreds of political stockholders. These hundreds of jobs constitute a patronage naturally clamored for by politicians. Then suppose Congressmen become greedy to secure the largest share of loans for their districts. If loyal henchmen or relatives are appointed as officers of the land banks and appraisers, discrimination among loans applied for is very easy. Associations, even States, complain that they can not get applications approved. Concentration of loans in others is reported.

QUALIFICATIONS OF POLITICAL APPRAISER DUBIOUS—TRAVEL AROUND AT FARMERS' EXPENSE—MAKE IDEAL ELECTIONEERING GANG

Consider another phase: Appraisers number several hundred. Having to pass no civil-service examinations, and being politically appointed, their qualifications are often most dubious. In each land-bank district there are 60 to 70 who go constantly, at the farmers' expense, from place to place. What an ideal electioneering force!

LOBDELL FORCED TO PUT MONEY BACK INTO THE TREASURY—FORCED TO START KEEPING BOOKS BY OUTSIDE ACTION

The net improvement in the situation as a result of the Senate hearing (on Senator HOWELL'S complaint) was: A large amount of information was obtained; accretions to the irregular account in the Franklin National Bank were stopped by the Secretary of the Treasury and at least a partial refund was demanded; the fiscal agent (Lobdell) began to keep books!

STOCKHOLDING FARMERS WANT TO CONTROL THAT WHICH THEY NOW OWN—WANT ERADICATION OF POLITICAL ABUSES

For the future these are the main demands made by farmers: Stockholders want control of their own property and freedom to decentralize credit. They believe preferential or exclusive contracts should be refused to any bond-selling agency. They desire a broadened market for bonds, lower interest, and returns of surplus. They ask that the right of farm-loan associations to support a federation out of their own funds be recognized. They demand production by the Federal Farm Loan Board of public information now systematically withheld even from the stockholders who own the 12 district land banks. They hope for eradication of political abuses by putting the system under civil service.

IF FEDERAL GOVERNMENT IS HONORABLY TO FULFILL PROMISES TO FARMERS CONGRESS MUST IMMEDIATELY PUT THESE DEMANDS INTO ACTION

If the Federal Government is honorably to make good its promise to agriculture of independence through a cooperative credit system these issues must be met. This kind of credit presents genuine advantages over the old system, where the poorest farmers were the victims of

usurious loan rates. It is especially built up to serve all sections—not the "best territory"—like private joint-stock land banks. Ultimately, by "loans at cost and loans that never come due" (repaid in regular installments), the farmers will get out of debt.

GIGANTIC MORTGAGE INDEBTEDNESS PRESSES DOWN ON FARMER—IT IS A SOCIAL QUESTION TO RELIEVE THE FARMER OF THIS BURDEN

With more than $11,000,000,000 of mortgage indebtedness bearing down on agriculture, that's a social question. To protect and perfect the Federal farm-loan system is a necessity if it were not plain justice.

---

[Extract from letter from farmer-owner of land-banking system deprived of his property rights by tricks of Harding-Coolidge administration]

"LET IT GO OVER!"

On page 7742 of the CONGRESSIONAL RECORD, in reporting the presentation by Senator COLE L. BLEASE of a resolution to demand that Secretary of the Treasury immediately release the annual report of the Farm Loan Board—which he has been suppressing and withholding for nearly five months—certain Senators shouted "Let it go over!"

That was purely a statemanshiplike action—"Let it go over!" These politicians will soon infest the various States with a message of "What we did for (should be "to") you dear farmers." The answer to that should be shouted from every seat—"Let it go over!" In fact, the further "over" it goes the better for farmers—so far as supporting at the election ballot box of politicians so craven as to desire to let pass the foul and dishonest treatment accorded farmer-owners of the 12 district Federal land banks by the present political pillage crew that has securely fastened its claws upon the political pork of the great farmer-owner land-bank system, and refuse to let go, allowing these farmer property owners of their simple rights and privileges as American citizens, instead of slaves in some Province of red Russia.

"Let it go over!"

And if Senator CHARLES CURTIS were one-tenth as much interested in the welfare of the farmers as he apparently was when he protested, when Senator BLEASE offered the resolution to release the annual report which Mellon now withholds, and said, "I think it unfair to the Secretary," etc., etc., the same Republican whip of the Senate would long since have rounded up the necessary votes to put the land banks into the hands of the rightful owners, which the same Senator CURTIS long since testified was the way it should have been done in the first place.

But the battle cry of the Coolidge administration now is "Let it go over!" Along next November millions of American voters will let it go over—to the Democrats who have them, first, a farmer-owned land-bank plan, which was pillaged away from them by dishonest Ohio politicians at the time Daugherty, Sinclair, Fall, and company were in the saddle.

"Let it go over!"

CALL OF THE ROLL

Mr. HARRISON. I now yield to the Senator from Kansas.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

| | | | |
|---|---|---|---|
| Ashurst | Edwards | Keyes | Sackett |
| Barkley | Fess | King | Schall |
| Bayard | Fletcher | La Follette | Sheppard |
| Bingham | Frazier | Locher | Shipstead |
| Black | George | McKellar | Shortridge |
| Blaine | Gerry | McLean | Simmons |
| Blease | Gillett | McNary | Smoot |
| Borah | Glass | Mayfield | Steiwer |
| Bratton | Goff | Metcalf | Stephens |
| Brookhart | Gooding | Moses | Swanson |
| Broussard | Gould | Neely | Thomas |
| Bruce | Greene | Norbeck | Tydings |
| Capper | Hale | Norris | Tyson |
| Copeland | Harris | Nye | Vandenberg |
| Couzens | Harrison | Overman | Walsh, Mass. |
| Curtis | Hawes | Phipps | Walsh, Mont. |
| Cutting | Hayden | Pine | Warren |
| Dale | Heflin | Pittman | Waterman |
| Deneen | Howell | Ransdell | Wheeler |
| Dill | Johnson | Reed, Pa. | |
| Edge | Kendrick | Robinson, Ark. | |

Mr. NORBECK. I desire to announce that my colleague the junior Senator from South Dakota [Mr. MCMASTER] is absent on official business. I ask that this announcement may stand for the day.

Mr. GERRY. I desire to announce that the Senator from New York [Mr. WAGNER] is necessarily detained from the Senate, being in attendance upon the funeral of the late Representative Sweet, of New York.

I also wish to announce that the Senator from South Carolina [Mr. SMITH] is detained from the Senate by illness.

The VICE PRESIDENT. Eighty-two Senators having answered to their names, a quorum is present. The question is on agreeing to the amendment of the Senator from Maryland [Mr. TYDINGS] to the farmers' produce market bill.

Mr. HARRISON. Mr. President, am I to understand that the market bill is before the Senate?

The VICE PRESIDENT. It is before the Senate.

Mr. SMOOT. The market bill was taken up by unanimous consent, was it not?

The VICE PRESIDENT. It was.

Mr. SMOOT. I ask for the regular order.

The VICE PRESIDENT. The regular order is Senate bill 728, the Boulder Dam bill.

Mr. SMOOT. I am perfectly aware of it, and I ask the Senator from California [Mr. JOHNSON] to lay it aside temporarily.

The VICE PRESIDENT. The Chair lays before the Senate the unfinished business, which is Senate bill 728, the Boulder Dam bill.

Mr. JOHNSON. I ask unanimous consent that the unfinished business may be temporarily laid aside and that the Senate proceed to the consideration of House bill 1, the tax reduction bill.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

PETITIONS

Mr. EDGE presented a resolution adopted by the board of commissioners, of Passiac, N. J., favoring prompt action by the United States Tariff Commission in investigating relative to the hand-machine embroidery industry to the end that relief may be obtained by those engaged in that industry in Passaic and vicinity as soon as possible, which was referred to the Committee on Finance.

Mr. LOCHER. Mr. President, I send to the desk a couple of telegrams which I ask may be printed in the RECORD and lie on the table.

There being no objection, the telegrams were ordered to lie on the table and to be printed in the RECORD, as follows:

COLUMBUS, OHIO, *May 3, 1928.*

Hon. CYRUS LOCHER,
*Senat Office Building, Washington, D. C.:*

Ohio physicians in session at eighty-second annual meeting officially protest against increase in Harrison narcotic tax and respectfully urge provision in revenue act for deduction of expenses incurred in attending scientific meetings.

OHIO STATE MEDICAL ASSOCIATION,
DON K. MARTIN,
*Executive Secretary.*

---

COLUMBUS, OHIO, *May 4, 1928.*

Hon. CYRUS LOCHER,
*United States Senate, Washington, D. C.:*

Approximately 35,000 members American Dental Association consider professional groups discriminated against by not permitting deductions of expenses attending professional meetings from income under present regulations. Therefore we solicit your support of Robinson amendment to revenue bill. Further, narcotic law is for public protection, and why place expense of operation upon the professions loyally cooperating at great inconvenience through keeping records. Thus we trust you will vote against any narcotic-tax increase. Please send copy Senate revenue bill.

Dr. HOMER C. BROWN,
*Chairman Legislative Committee, A. D. A.,*
*Hartman Building.*

REPORTS OF COMMITTEES

Mr. LA FOLLETTE, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 3281) to provide a shorter workday on Saturday for postal employees, reported it without amendment and submitted a report (No. 990) thereon.

Mr. FRAZIER, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 3127) to amend section 217, as amended, of the act entitled "An act to codify, revise, and amend the penal laws of the United States," approved March 4, 1909, reported it without amendment and submitted a report (No. 991) thereon.

Mr. BLEASE, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 3328) to amend title 39, the Postal Service, Chapter II, section 32, the Code of Laws of the United States of America in force December 6, 1926 (vol. 44, Pt. I, U. S. Stat. L.), reported it without amendment and submitted a report (No. 992) thereon.

Mr. MOSES, from the Committee on Post Offices and Post Roads, to which was referred the bill (S. 2751) to amend section 213, act of March 4, 1909 (Criminal Code, title 18, sec. 336, U. S. C.), affixing penalties for use of mails in connection with fraudulent devices and lottery paraphernalia, reported it with amendments and submitted a report (No. 994) thereon.

He also, from the same committee, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 1900) to provide for the construction of a post road and military highway from a point on or near the Atlantic coast to a point on or near the Pacific coast, and for other purposes (Rept. No. 999); and

A bill (S. 3890) to amend section 5 of the act entitled "An act making appropriations for the service of the Post Office Department for the fiscal year ending June 30, 1921, and for other purposes" (Rept. No. 1000).

Mr. BLAINE, from the Committee on the District of Columbia, to which was referred the bill (S. 4124) to provide for notice to owners of land assessed for benefits by the verdict of condemnation juries in the District of Columbia, and for other purposes, reported it with amendments and submitted a report (No. 993) thereon.

Mr. CAPPER, from the Committee on the District of Columbia, to which was referred the bill (S. 3902) to provide books and educational supplies free of charge to pupils of the public schools of the District of Columbia, reported it without amendment and submitted a report (No. 997) thereon.

Mr. SACKETT, from the Committee on the District of Columbia, to which was referred the bill (S. 4126) authorizing the National Capital Park and Planning Commission to acquire rights in land, and to lease land or existing buildings for limited periods in certain instances, reported it with amendments and submitted a report (No. 1003) thereon.

Mr. BLACK, from the Commitee on Claims, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

A bill (S. 3525) for the relief of A. M. Thomas (Rept. No. 995); and

A bill (H. R. 11960) for the relief of D. George Shorten (Rept. No. 996).

Mr. SHORTRIDGE, from the Committee on Naval Affairs, to which was referred the bill (S. 3692) to amend the act entitled "An act to readjust the pay and allowances of the commissioned and enlisted personnel of the Army, Navy, Marine Corps, Coast Guard, Coast and Geodetic Survey, and Public Health Service," approved June 10, 1922, as amended, reported it with amendments and submitted a report (No. 998) thereon.

Mr. PINE, from the Committee on Military Affairs, to which was referred the bill (H. R. 3467) for the relief of Giles Gordon reported it without amendment and submitted a report (No. 1002) thereon.

Mr. BINGHAM, from the Committee on Military Affairs, to which were referred the following bills, reported adversely thereon:

A bill (S. 3210) providing for the men who served with the American Expeditionary Forces in Europe as engineer field clerks the status of Army field clerk and field clerk, Quartermaster Corps, of the United States Army when honorably discharged; and

A bill (H. R. 8778) for the relief of William W. Woodruff.

### BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ROBINSON of Arkansas:

A bill (S. 4344) granting the consent of Congress to the State Highway Commission of Arkansas to construct, maintain, and operate a bridge across White River near Clarendon, Ark.; to the Committee on Commerce.

By Mr. CAPPER:

A bill (S. 4345) authorizing the Interstate Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Missouri River at or near Kansas City, Kans.; to the Committee on Commerce.

By Mr. FRAZIER:

(By request.) A bill (S. 4346) to authorize an appropriation for the purchase of certain privately owned land within the Fort Apache Indian Reservation, Ariz.; to the Committee on Indian Affairs.

A bill (S. 4347) granting an increase of pension to Laura L. Hammond (with accompanying papers); to the Committee on Pensions.

By Mr. McNARY:

A bill (S. 4348) granting a pension to Maria Maryatt Maxwell; to the Committee on Pensions.

By Mr. NEELY:

A bill (S. 4349) granting a pension to Mary M. Reynolds; to the Committee on Pensions.

By Mr. HALE:

A bill (S. 4350) granting an increase of pension to Mary I. Gatley (with accompanying papers); to the Committee on Pensions.

By Mr. DALE:

A bill (S. 4351) granting an increase of pension to Etta McLoud (with accompanying papers); to the Committee on Pensions.

By Mr. SHORTRIDGE:

A bill (S. 4352) for the relief of James R. Kiernan; to the Committee on Military Affairs.

By Mr. GOFF:

A bill (S. 4353) authorizing Huntington Clarksburg Bridge Co., its successors and assigns, to construct, maintain, and operate a bridge across the Great Kanawha River at a point at or near Winfield, Putnam County, W. Va.; to the Committee on Commerce.

By Mr. REED of Pennsylvania:

A bill (S. 4354) for the relief of Atlantic Refining Co., a corporation of the State of Pennsylvania, owner of the American steamship *H. C. Folger*, against U. S. S. *Connecticut;* to the Committee on Claims.

### AMENDMENTS TO TAX REDUCTION BILL

Mr. KING submitted an amendment, and Mr. COPELAND submitted two amendments, intended to be proposed by them to House bill 1, the tax reduction bill, which were ordered to lie on the table and to be printed.

### CUSTOMS SERVICE EMPLOYEES

Mr. EDGE submitted an amendment intended to be proposed by him to the bill (S. 4075) to adjust the compensation of certain employees in the customs service, which was referred to the Committee on Finance and ordered to be printed.

### AMENDMENT OF WORLD WAR ADJUSTED COMPENSATION ACT

Mr. BLACK submitted an amendment intended to be proposed by him to the bill (H. R. 10487) to amend the World War adjusted compensation act, as amended, which was referred to the Committee on Finance and ordered to be printed.

### TAX REDUCTION

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 1) to reduce and equalize taxation, produce revenue, and for other purposes.

Mr. HEFLIN. Mr. President, a point of order.

The VICE PRESIDENT. The Senator will state the point of order.

Mr. HEFLIN. I make the point of order that the Senate is not in order. I can not hear what is going on in front of the Vice President's desk.

The VICE PRESIDENT. The Senate will be in order.

Mr. HEFLIN. Has the tax bill been laid before the Senate?

The VICE PRESIDENT. The tax bill has been laid before the Senate.

Mr. SMOOT. Mr. President, I desire to submit the following unanimous-consent request:

### UNANIMOUS-CONSENT REQUEST

It is agreed by unanimous consent that when the Senate has completed its consideration of H. R. 1, the pending revenue bill, the Secretary be authorized—

(1) To make necessary changes in numbers and letters in all headings and subheadings and in any cross references thereto.

(2) To strike out or correct cross references that have become superfluous or erroneous, and to insert cross references made necessary or convenient, by reason of changes made by the Senate.

(3) Where amendments adopted to the bill do not conform in typography and indention to the style of the bill as printed, to make such corrections as may be necessary to produce such conformity.

(4) To make such changes in the table of contents as are necessary to make it conform to the action of the Senate in the remainder of the bill.

Mr. ROBINSON of Arkansas. Mr. President, does the Senator propose to give the Secretary power to revise the bill after it has been passed by the Senate?

Mr. SMOOT. Oh, no. If this is not done, we shall have to act upon every solitary change in the bill. It has always been done in the past. It simply authorizes the Secretary, if we strike out a paragraph or section, to change the numbers of the succeeding paragraphs or sections. If we strike out a section, then every section of the bill thereafter has to be renumbered.

Mr. ROBINSON of Arkansas. Of course, there is no objection to giving the Secretary authority to make changes in the numbering of sections or paragraphs or to correct manifest typographical errors. Has the Senator submitted his request to the ranking minority member on the Finance Committee, the Senator from North Carolina [Mr. SIMMONS]?

Mr. SMOOT. No; I have not. It was handed to me in typewritten form just before I presented it.

Mr. ROBINSON of Arkansas. Then I suggest that the Senator let it go over until the Senator from North Carolina has had an opportunity to examine it.

Mr. SMOOT. Very well.

Mr. ROBINSON of Arkansas. Mr. President, I ask unanimous consent to have printed in the RECORD certain telegrams relating to the pending tax bill.

The VICE PRESIDENT. Without objection, it is so ordered.

The telegrams referred to are as follows:

EL DORADO, ARK., *May 2, 1928.*

Senator JOE T. ROBINSON,
*United States Senate, Washington, D. C.:*

The Arkansas Medical Society, with a membership of exceeding 1,200, assembled in annual meeting at El Dorado to protest against the proposed increase in narcotic tax from $1 to $3. Furthermore, it is unfair to tax physicians, dentists, and druggists to cover expense, since the real benefit is to the laity and not to the profession.

WM. R. BATHURST, *Secretary.*

---

ELDORADO, ARK., *May 4, 1928.*

Senator J. T. ROBINSON,
*Washington, D. C.:*

This body urges your support of Robinson amendment correcting present discrimination against professional groups in not allowing income-tax deductions while attending professional and scientific meetings, also to oppose the proposed increase narcotic tax.

ARKANSAS DENTAL ASSOCIATION,
H. J. CRUME, *Secretary.*

---

COLUMBUS, OHIO, *May 3, 1928.*

Hon. JOSEPH T. ROBINSON,
*United States Senate, Washington, D. C.:*

Approximately 35,000 members of American Dental Association consider that professional groups are discriminated against by not permitting deductions of expenses attending professional meetings from income reports under present regulations; therefore, we solicit your support of Robinson amendment to revenue bill. Further, the narcotic law is for public's protection, and why place expense of operation upon the professions loyally cooperating at great inconvenience through the keeping of records; thus we trust you will vote against any narcotic-tax increase.

Dr. HOMER C. BROWN,
*Chairman Legislative Committee,*
*American Dental Association, Hartman Building.*

COTTON PRICE PREDICTIONS

Mr. HEFLIN. Mr. President, I ask unanimous consent for the present consideration of Senate bill 3845. I do not think there will be any objection to its consideration and passage.

Mr. CURTIS. Let the title of the bill be stated, Mr. President.

The VICE PRESIDENT. The clerk will state the title of the bill.

The CHIEF CLERK. A bill (S. 3845) to prohibit predictions with respect to cotton or grain prices in any report, bulletin, or other publication issued by any department or other establishment in the executive branch of the Government.

Mr. HEFLIN. Mr. President, all references to grain have been stricken from the bill, and as it now stands it applies to nothing but cotton. Several days ago the Senator from Connecticut asked for time to examine the bill; the bill has been pending here for two weeks, and I take it that he will not object to it. I trust that he will not. The Senator from Maryland on yesterday asked that the bill go over. It is very necessary that the bill be passed. There is a provision in the agricultural appropriation bill to prevent price predictions as to cotton, and this bill provides a penalty if such a thing shall be done. A number of Senators asked me to introduce the bill, the committee has unanimously reported it, and it ought to be passed. I trust there will be no objection to it.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

Mr. BINGHAM. Mr. President, the Senator from Alabama is incorrect in stating that I asked that the bill go over.

Mr. HEFLIN. I meant to say that the Senator from Rhode Island [Mr. METCALF] asked that the bill go over.

Mr. METCALF. Mr. President, I think if the bill shall be considered it may take some time. I might want to make one of my long speeches on it. [Laughter.] I suggest that the bill had better go over for the time being.

Mr. HEFLIN. Mr. President, I desired to see who objected to the consideration of the bill. I myself am going to make a speech on it a little later on. I think a part of it will be of interest to the Senator from Rhode Island.

POST OFFICE AT PHILIPPI, W. VA.

Mr. NEELY. Mr. President, I ask unanimous consent for the immediate consideration of Calendar 1010, the bill (H. R. 10799) for the lease of land and the erection of a post office at Philippi, W. Va., and for other purposes.

The VICE PRESIDENT. Is there objection to the request of the Senator from West Virginia?

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill, which had been reported from the Committee on Public Buildings and Grounds with an amendment, on page 1, line 8, after the words "Postmaster General," insert the words "and by the Secretary of the Treasury," so as to make the bill read:

*Be it enacted, etc.*, That the Secretary of the Treasury is authorized and directed to (1) authorize the Philippi Improvement Co. to erect upon the lot of land at the corner of Main and Masons Streets in the city of Philippi, W. Va., a building to be used as a post office of a design, plan, and specification approved by the Postmaster General and by the Secretary of the Treasury, and (2) require of the Philippi Improvement Co. the execution of such bonds to the United States as are required of contractors for the erection of public buildings.

SEC. 2. That the Postmaster General is authorized and directed to lease such building from the Philippi Improvement Co. for a term of 10 years after its occupancy at an annual rental of one-tenth of the total cost of such building, plus taxes, and plus interest at 6 per cent upon the difference between the total cost of the building and the quarterly installments of rent already paid, not including interest or taxes, but in no case shall the total payments provided for by this section exceed $52,600.

SEC. 3. That the expenses of such repairs, maintenance, and operation of the building as the Postmaster General may find necessary and proper during the period of the lease shall be borne by the Post Office Department.

SEC. 4. That upon the termination of the lease provided for in section 2, or upon payment by the Post Office Department at any time prior to the termination of such lease of the total cost of such building minus installments of rent already paid, such building shall become the property of the United States free and clear of all encumbrances.

SEC. 5. That there is authorized to be appropriated the amount necessary to pay the installments of rent provided for by section 2, and the expenses of repairs, maintenance, and operation provided for by section 3.

Mr. NEELY. Mr. President, two years ago the post-office building at Philippi, W. Va., was destroyed by fire. Ever since the mail for that office has been received and distributed in a small room of the Barbour County courthouse, which is destitute of every postal facility. The existing conditions are intolerably inconvenient for every patron of the office. The people of Philippi generously and patriotically propose, in pursuance of the provisions of this bill, to erect their own appropriate post-office building without subjecting the Government to any financial burden. The bill has been approved by the Post Office Department and by the proper committee of the Senate. In order to serve an extraordinary necessity the junior Senator from West Virginia [Mr. GOFF] and I urge the Senate to pass this measure immediately.

Mr. GOFF. Mr. President, as my colleague has stated, we are very anxious to have the bill passed, and I hope it may be passed without delay.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendment was concurred in.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

TAX REDUCTION

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 1) to reduce and equalize taxation, provide revenue, and for other purposes.

Mr. BINGHAM. Mr. President, I submit an amendment to the pending bill, which I ask may be printed and lie on the table.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. HARRISON. Mr. President, in the brief time during which I shall occupy the attention of the Senate this morning I desire to address myself to two propositions: One is the debt-retiring policy now being followed by the Treasury Department and the other is the estimates of the Treasury Department as to probable surpluses, because upon these two propositions rest the action of the Senate. The Treasury Department has stated that the Federal Treasury will stand for a cut in taxes of approximately $200,000,000. The majority members of the Finance Committee have accepted the views of the Treasury Department; much of the partisan press of the country have accepted them, and some have been led to believe that the Congress ought to go to no greater extent than $200,000,000 or $210,000,000 in the reduction of taxes.

Mr. President, in its estimates the Treasury Department every year for the last seven years has been incorrect anywhere from $100,000,000 to $600,000,000.

For your benefit I wish to state that in 1922 the Treasury Department estimated a surplus of $24,000,000, while there was an actual surplus of $313,000,000; in 1923 the Treasury Department estimated a surplus of $273,000,000, whereas the surplus grew to $309,000,000; in 1924 the Treasury's estimate was $329,000,000, while the actual surplus was $505,000,000; in 1925 the estimate of the Treasury Department was a surplus of $67,000,000, while the actual figures were $250,000,000; in 1926 the Treasury estimate was $262,000,000, while the actual figures were $377,000,000; in 1927 the Treasury estimate was $383,000,000, while the actual surplus was $635,000,000. This year there is a surplus of more than $400,000,000 in the Treasury. If the Treasury Department has been wrong in every instance for the last seven years, why should its estimate be accepted by us at this time as being conclusive?

When the 1921 revenue bill was under consideration the Treasury Department stated that it would stand for a reduction of $372,000,000. That was the recommendation of the Secretary of the Treasury. That was all the Treasury Department said the Treasury would stand. Both Houses of Congress refused to accept that recommendation, and they cut the taxes by $663,000,000; in other words, nearly $300,000,000 more relief was given in that act to the American taxpayers than the Treasury Department recommended or said that it could stand. Yet, with that large reduction that year, there was piled up in the Treasury a surplus of $313,000,000. The next year the surplus was $309,000,000; and yet the distinguished chairman of the Committee on Finance says that the Treasury's estimate of $200,000,000 at this time should be accepted as conclusive.

When the revenue act of 1924 was before Congress the Treasury Department recommended that a reduction of $323,000,000 would be quite sufficient; that the condition of the Federal finances could stand no greater reduction than that. The Congress did not accept their recommendation and passed an act carrying a reduction of $519,000,000, or nearly $200,000,000 more than the Treasury said it would stand for. Yet, Mr. President, that year, despite that great reduction beyond the recommendation of the Treasury Department, there was piled up in the Treasury a surplus of $505,000,000. The next year there was a surplus piled up of $250,000,000. Yet the distinguished chairman of the Finance Committee and the majority members of that committee say we should accept this year without question the recommendations of the Treasury Department.

Mr. REED of Pennsylvania. Mr. President, will the Senator yield for a question?

Mr. HARRISON. Yes; I yield to the Senator from Pennsylvania.

Mr. REED of Pennsylvania. Is it not true that the estimates which the Senator is criticizing were all made before the assembling of Congress in each year when it was impossible to know what the receipts of the future two years would be, which were necessarily involved in the estimates for the ensuing fiscal year; and is it not a fact that the estimate upon which the Finance Committee has acted in this case was made after the receipt of the March 15 tax payments, which enabled this estimate to be made with a degree of certainty that has not extended to any of the other cases?

Mr. HARRISON. If the Senator will bide his time, I will get to that very proposition. May I say, however, that he is wholly mistaken?

Mr. REED of Pennsylvania. The Senator is going to answer my question, is he?

Mr. HARRISON. Yes; I am going to answer that question or any other question which the Senator wishes to propound to me. That is the same argument that was made when the 1921 revenue act was being considered; it is the same argument that was made in 1924; it is the same argument that was made in 1926. I propose to read from the 1926 statement of the Secretary of the Treasury, after the March 15 tax returns had come in, as the tax returns for March, 1928, have now come in, upon which the chairman of the committee bases his claims of accuracy and upon which the Senator from Pennsylvania bases his claims of accuracy, and show that in that instance the Treasury figures were wrong, and state the reasons why they were wrong.

I am not deceived, neither are the minority members of the Finance Committee deceived by the assertions of the Treasury Department that this time their statements are more correct than heretofore, because they sent out all over the country and asked the collectors of internal revenue to report immediately upon the returns of the big taxpayers, so that they could compile them quickly and base their estimates upon them.

Mr. President, there are thousands upon tens of thousands of taxpayers in America who pay only their first installment in March; there are thousands upon thousands of them who pay perhaps half, and, perhaps, just a few of them pay all the tax assessed against them. I submit that the situation is not different at this time as to forming conclusions upon the estimates of the Treasury from what it has been in the past. But the Senator from Pennsylvania, with his adroitness—and he is adroit; if there is anybody who could throw up a smoke screen and hoodwink the American people with reference to the fiscal policies of the administration it is the distinguished Senator from Pennsylvania—knew what was coming in the following statement I was going to make, and that is why he tried to divert my attention from the line of discussion I was then pursuing. I showed to the Senate what happened in 1921 and in the consideration of the act of 1924. Now, let us see about the act of 1926.

The Treasury recommended in the consideration of the 1926 act that the Congress could cut the taxes $300,000,000. Congress did not accept that recommendation, but they cut the taxes by $422,000,000. Notwithstanding a $122,000,000 greater cut than that recommended by the Treasury, there was piled up in the Treasury a surplus that year of $307,000,000, and the next year it reached the enormous figure of $607,000,000. Yet with these startling facts before the Senate and before the country—facts which no Senator on the other side will deny—they have the audacity to come here and say, "Let us accept conclusively this year the estimate of the Treasury Department." I submit, Mr. President, if the Treasury Department has been wrong in every instance heretofore it is likely to be wrong in this instance at this time.

Mr. REED of Pennsylvania. Mr. President, will the Senator permit another question?

Mr. HARRISON. Why, yes; the Senator can ask all he desires.

Mr. REED of Pennsylvania. The Senator has called attention to the fact that the surplus in the fiscal year 1927 was about $250,000,000 more than the estimate.

Mr. HARRISON. Nineteen hundred and twenty-seven?

Mr. REED of Pennsylvania. Nineteen hundred and twenty-seven.

Mr. HARRISON. The surplus was $635,000,000.

Mr. REED of Pennsylvania. Yes; $250,000,000 more than the estimate.

Mr. HARRISON. Yes.

Mr. REED of Pennsylvania. Half of that increase was due to increased receipts, mostly because railroads paid their bonds which the Treasury was holding; and half of it was due to the decrease in expenditures, largely because the Senator's colleague from Missouri [Mr. REED] insisted that no legislation, including the deficiency appropriation bill, should pass unless he got his investigating committee continued.

How could the Treasury foresee either of those events; and how is the Treasury to be blamed for its failure to know that there was going to be such a filibuster?

Mr. HARRISON. Mr. President, if I were the Senator from Pennsylvania, I should be the last one in this Chamber to recall that filibuster——

Mr. REED of Pennsylvania. I should think the Senator would.

Mr. HARRISON. Because he was the one that led in it, and he was the one that caused the confusion at that time. It reflected no credit upon the Senator.

Mr. REED of Pennsylvania. The closing speech of that session was one which I should think the Senator would not want to recall.

Mr. HARRISON. It was the best one I ever made, and it was about the Senator from Pennsylvania and his connection with Pennsylvania corrupt politics.

Mr. REED of Pennsylvania. I suppose the Senator remembers what he said.

Mr. HARRISON. Now, may I proceed? I knew that that would be the argument made, that some of the railroads had paid some of their debts, and that we would not collect as much from the railroads next year as that year.

Mr. SMOOT. That is true.

Mr. HARRISON. Yes; to a certain extent that is true; but that does not excuse an error of between four hundred and six hundred million dollars in the Treasury Department's estimate. Not once, but year after year. The Senator can not excuse it under any circumstances.

In answer to the question of the Senator from Pennsylvania, here is a statement made by the Treasury Department in 1925, after the March returns came in. Here is what they said:

Under other revenue acts the March installment had been a certain percentage of the total annual revenue. Our June and September results, however, show that this ratio had changed materially. The explanation appears to be this: The large taxpayers pay in installments throughout the year. The small taxpayers pay in full in March. The taxes of the small taxpayers had been so reduced by the new law that their payments in full did not constitute such a material part of the whole.

Mr. President, that statement was made in 1925 after these returns. The same argument has been made every time; and I submit that there is no accuracy in the estimates made by the department.

Now, let me read some of the statements of some of the leaders on the other side of the aisle in the past with reference to their views of these estimates. Why, they have shifted as the winds have shifted; and none of them shifted more, and quicker, and in greater amount than the distinguished chairman of the Finance Committee.

Last year he shifted from one place to the other. When he was out amid the Black Hills of South Dakota it was one thing. When he was here in his office at Washington it was another thing. When he came in contact with that dominant figure of this administration, Andy Mellon, it was another thing. Now, I want to bear out that statement, because I would not do the Senator an injustice. I know that he has a right to change his mind. He has grown up changing his mind; but I never knew him to change his mind so completely and so constantly as he has upon this tax question during the last two years.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER (Mr. WATERMAN in the chair). Does the Senator from Mississippi yield to the Senator from Utah?

Mr. HARRISON. I do.

Mr. SMOOT. The reason why the Senator from Utah changed his mind as to the amount of reduction of taxes for this year was the very fact that after the returns of March 15 were known, and there was not any guess about it, I could not do otherwise than say that that is exactly what I was going to follow out if I could. That is the position I took, and that is my position now.

Mr. HARRISON. Mr. President, before I finish I shall show the motives behind this proposition for the rapid payment of the national debt. I shall lay the picture not only before the Senate but before the American people, and let them draw their own deductions. I shall let them know that from the head of this Government down to the chairman of the Finance Committee and our emissaries in foreign countries they are obsessed with the idea of taxing the American people in excessive sums to pay off the national debt within an unreasonable period. And that, too, notwithstanding the President of the United States on one occasion characterized as larceny, "The collection of more taxes than were required for the orderly administration of the Government."

Mr. SMOOT. I want to say to the Senator, so far as I am personally concerned, that I have no interest whatever in what may be paid off to assist anybody in this country.

Mr. HARRISON. Well, let us see. The Senator, then, can respond.

Mr. SMOOT. I want the Senator to understand that at this particular time. I have insisted, and shall always insist, that we collect from the foreign countries every dollar they owe the Government of the United States, and do it just as fairly as possible.

Mr. HARRISON. The Senator is being hoodwinked. He is being deceived. If he is innocent in this matter, he had better open his eyes quickly, because he is tripping into a trap.

Mr. SMOOT. I will take care of myself, Mr. President.

Mr. HARRISON. The Senator usually does, but I am always willing to give him good advice.

Mr. SMOOT. Before the Senator starts on that, I should like to have the Senator tell the Senate and the country what his estimates are now.

Mr. HARRISON. I shall tell the Senator and the country what my estimates are.

Mr. SMOOT. I should like to have them in detail.

Mr. HARRISON. We will give them to you in detail. Of course, I know it is going to have no influence upon the Senator, because, if he had taken all of our suggestions, he would really have had a pretty good bill here. The best parts of the bill were where he did accept our suggestions.

Mr. SMOOT. I do not know what the Senator means by "our suggestions." Does he mean the suggestions of the majority of the Finance Committee?

Mr. HARRISON. The Senator knows too well what I mean. Will not the Senator now, please, let me proceed?

Mr. SMOOT. Certainly; with great pleasure.

The PRESIDING OFFICER. The Senator from Mississippi has the floor.

Mr. HARRISON. Mr. President, I want to read a few extracts from the "high-ups" of the administration. Let us take, first, the President, the great friend of Dwight Morrow.

Three hundred and eighty-three million dollars—

Says the President on December 9, 1926, says the New York Times—

surplus for the fiscal year ending June 30, 1927. Expressed opinion that if surplus was to be used for any purpose other than reduction of public debt, it was wisest simply to make refund or credit to all classes of income-tax payers next year.

If it could not be used in paying off the national debt, he wanted to give the credit immediately to the income-tax payers for that year. No permanent tax reduction, notwithstanding at that time, according to his language, there was $383,000,000 surplus in the Treasury.

He said further, a little later, on March 26 of the same year:

Coolidge assured of heavy surplus. Understands surplus for fiscal year will be considerably in excess of the $400,000,000 previously estimated.

Let us see what Mr. Mellon says about this debt retirement, in April, 1923:

Mellon forecasts $484,000,000 deficit in the Budget in 1923—

Deficit!—

instead of the $167,000,000 predicted earlier. The surplus in 1922 will be about $47,000,000.

And yet the surplus was $308,000,000! He was not very far off; just a little over $250,000,000—this great man whose recommendation you ask us to accept as conclusive. I read further from the New York Times of March 16, 1926:

Treasury advises Coolidge that surplus for fiscal year 1924 will exceed one-half billion dollars.

Mellon says in letter to Senator SMOOT (dated July 4, 1926) that surplus of more than $377,000,000, recorded on June 30, has been applied to debt reluction. By close of fiscal year entire surplus will have gone into debt reduction—

Says the Secretary of the Treasury.

On March 21 of that year it says:

Treasury raises its estimate of this year's surplus to $250,000,000. Favors return of 15 per cent tax, but no revision of rates.

Prospect of surplus—

of $600,000,000 makes tax reduction an issue. Mellon prefers debt cut.

Mellon sees $600,000,000 or, maybe, $650,000,000 surplus. Later figures than those he gave to Coolidge.

That was in 1927, June 11—

Senator SMOOT—

Let us get down to him.

Mr. REED of Pennsylvania. Up to him.

Mr. HARRISON. I never supposed before that the Senator from Pennsylvania thought that in going from Mellon to SMOOT you would have to go up. I thought the Senator at least would think that you had to go down.

June 8, 1926, says the Times—

SMOOT tried to prove to his colleagues that unofficial estimates that the Budget surplus on June 30 would be from $250,000,000 to $300,000,000 were built on unstable figures. Expressed doubt whether there would be a considerable surplus at end of fiscal year 1927, quoting figures to prove his estimate.

And yet there was in 1926 a surplus of $377,000,000 and the next year of $658,000,000. The Senator was not very far wrong—just $658,000,000.

SMOOT says the surplus will be between $350,000,000 and $600,000,000.

That was on March 21, 1927; and yet it was still higher than that.

Senator SMOOT further said—

This is March 19, 1927, right after Congress adjourned, following that fight that we made here in that Congress to get some tax relief to the American people, when the majority side of this Chamber thwarted our plans; when, over on the other side of the Capitol, led by the distinguished minority leader of the Ways and Means Committee, a request signed by more than 175

Members of the House of Representatives was presented to the Ways and Means Committee of the House to take up immediately the consideration of a revenue bill and give some relief to the country, but the majority organization over there, acting in conjunction with the majority organization here, both of them under the domination and instruction of the man who sits as Secretary of the Treasury and the man who sits as President of the United States, thwarted our plans. You said the surplus ought to go into debt retirement. Just 12 days after that, however, the Senator from Utah gave out a statement to this effect:

SMOOT estimated surplus would reach as high as $600,000,000. If this figure was reached, Congress would be justified in reducing taxes $500,000,000, with special relief being afforded to corporations and those paying the medium surtaxes.

That was in March of last year.

Mr. SMOOT. I do not know what the papers say, Mr. President. I can not say anything about what papers the statement was in, but——

Mr. HARRISON. This was in the New York Times of March 19, 1927.

Mr. SMOOT. I do not care what paper it may have been in, Mr. President. I have never at any time thought that it would be more than $400,000,000. The Senator gets his years mixed up.

Mr. HARRISON. No; I am not getting my years mixed up. I am reading what purports to be a statement of the Senator and published in a reputable newspaper.

Mr. SMOOT. The Senator has already done it once, and I did not call his attention to it.

Mr. HARRISON. I am quoting from a paper here. The Senator denies the statement.

Mr. SMOOT. No; no.

Mr. HARRISON. I am going to read from papers of other dates and see if they are wrong also.

Mr. SMOOT. The Senator is speaking of one year and I was speaking of another year.

Mr. HARRISON. What year is the Senator speaking of?

Mr. SMOOT. Of course, I do not know in what year that paper was published.

Mr. HARRISON. I am speaking of March 19, 1927, immediately following the adjournment of the last Congress.

Mr. SMOOT. I think I said that the surplus would be over $600,000,000; and it was. It was $635,000,000.

Mr. HARRISON. Yes; the Senator just missed it by $35,000,000 that time. Did the Senator say at the same time that if it was over $600,000,000 we might give tax relief of $500,000,000 to the people at this time?

Mr. SMOOT. That is, if the same increase was made for the year that we are now legislating for, then we could do it.

Mr. HARRISON. It was more than $600,000,000 in 1927, and it is more than $400,000,000 in 1928.

Mr. SMOOT. No; the Senator has made a mistake again. We have not any figures for 1928 yet.

Mr. HARRISON. Why, I am surprised at the Senator. What is the Treasury's estimate for 1928?

Mr. SMOOT. The Treasury's estimate now, after receiving the taxes on March 15, 1928, is about $187,000,000.

Mr. HARRISON. Does the Senator state to this body that the Treasury does not estimate that for the fiscal year 1928, the present year, there will be a surplus of over $400,000,000 in the Treasury?

Mr. SMOOT. The Senator is quoting from a paper of March, 1927. Now he is speaking of the fiscal year which took in the $635,000,000 and was quite a different proposition.

Mr. HARRISON. For 1927 it was over $600,000,000.

Mr. SMOOT. Six hundred and thirty-five million dollars.

Mr. HARRISON. Why, of course; and this year it is more than $400,000,000. Is not that right?

Mr. SMOOT. Mr. President, I said if——

Mr. HARRISON. Oh, yes; "if."

Mr. SMOOT. And I say it again. Nobody knew it. The Secretary of the Treasury did not know it. The Senator from Mississippi did not know it. Nobody in the country knew what it would be for the fiscal year 1928.

Mr. HARRISON. What does the Senator say it is?

Mr. SMOOT. Nobody knew anything about what it would be for the fiscal year 1929—and that is what this bill applies to—until after the returns came in on March 15 of 1928. We must not get the fiscal year and the calendar year mixed up, and that is what the Senator is doing.

Mr. HARRISON. The Senator is still trying to confuse the issue. He plays "hide and seek" well with himself.

Mr. SMOOT. I am not trying to confuse the issue.

Mr. HARRISON. But he can not do it. Here he stated, if the newspaper is correct, in the New York Times of March 19, that the surplus would reach as high as $600,000,000.

Mr. SMOOT. And it reaches $635,000,000.

Mr. HARRISON. He said that if this figure was reached Congress would be justified in reducing taxes $500,000,000.

It reached $635,000,000, and yet the Senator says now that we will stand for a reduction of but $200,000,000.

Mr. SMOOT. The pending bill has no reference to that at all. This bill is to take care of 1929. This bill is based upon the receipts as shown on March 15, 1928, and the estimate of the Treasury was about $200,000,000. To be exact, it is $187,000,000, as I remember. That is what we are working on in this bill.

Mr. HARRISON. Now, let me ask the Senator a question.

Mr. SMOOT. Certainly.

Mr. HARRISON. What did the Senator mean when he said that if this figure, $600,000,000, was reached, Congress would be justified in reducing taxes $500,000,000?

Mr. SMOOT. I said if the amount of $600,000,000 was repeated again; then we could do it, and I say so now.

Mr. HARRISON. No; the Senator did not say anything about "repeated again."

Mr. SMOOT. Well——

Mr. HARRISON. Then the newspaper is wrong.

Mr. SMOOT. I will let the Senator from Mississippi put any construction on it he wants to; any construction he desires.

Mr. HARRISON. Let me read it again, so there will be no confusion about it.

Mr. SMOOT. There is no confusion about it.

Mr. HARRISON. Then we agree, and I will proceed.

Mr. SMOOT. No; we do not agree, because we disagree as to years. There is all the difference in the world.

Mr. HARRISON. Let us take another statement of the Senator. That was March 19.

Mr. SMOOT. Yes.

Mr. HARRISON. That he was going to give tax relief; and if it appeared there would be a surplus of $600,000,000, we were going to get a five hundred million tax reduction bill. On June 8, 1927, the Senator is quoted in the New York Times——

Mr. SMOOT. 1927?

Mr. HARRISON. June 8, 1927, the Senator is quoted as saying:

I think the tax bill is a very important thing and the taxes ought to be reduced to the extent of two hundred and sixty to three hundred million dollars, and the revision effective by February 1 next.

That was the statement at that time, that it could go up to $300,000,000.

Mr. SMOOT. That had no reference whatever to the $600,000,000. It is not the same thing at all.

Mr. HARRISON. I am not talking about the $600,000,000 now. I am just quoting from the Senator's statement. I am talking as the Senator was talking about a permanent tax-relief measure.

On July 22 the Senator made another statement. This was a speech at Rapid City.

Mr. PITTMAN. What year?

Mr. HARRISON. This was 1927. He said:

Plans cut of $300,000,000 including following reductions.

This is when he became specific. He was going to give tax reduction; and he was going to specify where it would come. First, corporation tax, 13½ to 12 per cent. In the pending bill he has not done that. He and his committee first reduced it to 12 per cent, and then they raised it to 12½ per cent. So he is not carrying out that promise. Let us see the next one:

Abolition of admission and so-called nuisance taxes.

He has not done that. He eliminated the admission taxes up to $3, but he left the tax on the balance. We are trying to eliminate all the admission taxes. So he is wrong in that.

Reduction in income taxes between $15,000 and $60,000.

He proposed to give a reduction to everybody who pays an income tax, whether five millions or twelve thousand, so he is wrong in that.

Automobile tax from 3 to 1½ per cent.

He was for that; he was against taking off the automobile tax, but when he saw we had sufficient votes to remove those taxes, then he, with his political brothers on the Finance Committee, suddenly changed front and they come in and now propose to take all the automobile taxes off. Consequently, he was not right in that assertion. I am just wondering whether the Senator was correct in any of those propositions. Let us go further. He made another statement on July 23, 1927, just the day after the other statement.

Will not support reduction beyond $300,000,000. To go beyond that would threaten a deficit.

He will not even go to $300,000,000. He wants to limit it now to $200,000,000. The next statement was November 15, 1927. Now we come to the time when he began to associate with Mr. Mellon and the occupant of the White House. Let us see if he shifted his position again. He says, as reported in the New York Times of that date:

Treasury determined in its stand not to reduce tax yields beyond $225,000,000. SMOOT now agrees.

I have here a copy of the New York Times of that date, in which there appears in big headlines—

Mellon foresees no business slump; tax shift by SMOOT.

Look at it, Senators: "Tax shift by SMOOT." That is in big headlines. So the Senator was just sidestepping and shifting all the time. The Secretary of the Treasury had a powerful influence with him.

I might read from the statements which I put in the RECORD of Representative Green, who at that time was chairman of the Committee on Ways and Means. I might put into the RECORD some of the statements of Mr. HAWLEY, who succeeds him. Of course, Mr. Green has not always agreed with the Treasury Department, so they found another place for him. I am very fond of the distinguished former Representative from Iowa, Mr. Green, but he had reached that age in life when, in the wisdom of Congress, men should retire from public service; so he was taken out of his important position as chairman of the Ways and Means Committee and elevated to a place upon the judiciary. It is quite a contrast, and yet amusing, that just a few weeks after that the chief justice of the Court of Claims, who was not as old as Mr. Green, retired, under the law. Thus we have it that some men who have reached an allotted age step down and accept the provisions of the law governing retirement, while others are kicked out and given like places.

They did not stop there, however. It was thought that Mr. Mills, who had been an influential spokesman for the Treasury Department on the Ways and Means Committee, could render greater service as Undersecretary of the Treasury. He likewise shifted his positions. I have many expressions here in which he speaks for debt retirement. He was the one in the hearings this time who appeared before the Finance Committee and combated the views of the Chamber of Commerce of the United States. He is the one who defends all this debt-retirement policy.

Mr. President, I submit that the Treasury to-day will stand for a tax reduction of at least $325,000,000. The American people are entitled to that relief. We have in this bill eliminated the retroactive features of the law, which give the relief in this tax year. That will carry over next year $400,000,000 of the surplus. That amount will be made available for tax reduction next year.

Ah, but Senators on the other side say, "That has been spent; the debt has been paid. We saved a lot of interest. We are using that money in debt retirement." Yes; but they forget that when they save a quarter of 1 per cent for the Government in retiring these bonds they are compelling the American taxpayer to go out and pay 6 per cent and 8 per cent, and sometimes 10 per cent, to borrow money in order that his taxes might be paid. Yes; you are saving the Government interest, but you are clamping the iron yoke of unnecessary taxes around the necks of the taxpayers of this country.

What about this debt-retiring proposition? Listen to me. In 1919 the Congress thought it was wise to create a sinking fund, which the Congress might appropriate annually to supply, and that that sinking fund should go toward the liquidation of the Nation's debt. The amount was made $253,000,000 annually.

The law provided further that we would take that money and buy Government bonds, and that when those bonds were canceled the interest on those bonds should continue to run and be compounded, piling up year by year in the sinking fund an added amount. Now it amounts to something like $350,000,000. In a few years it will soar to $600,000,000, and on up to $800,000,000. It was thought at that time that we could pay off the Nation's debt in 26 years by the use of that sinking fund alone, not employing surpluses drawn from the taxpayers of the country, not employing the interest that comes from the foreign debt. It was recognized that the war was fought not only for this generation but for generations yet to come, yet, at the rapid gait they are now going, and if we would follow the dictates of the Secretary of the Treasury and the President and the distinguished chairman of the Finance Committee, we would pay the debt off in far shorter time than 20 years. Their answer is that "We save interest by doing so," forgetting that they are imposing higher burdens and interest charges on the taxpayers of the United States.

Mr. President, I believe, and the other minority members of the Finance Committee believe, that a sufficient sinking fund should be provided annually to pay off this national debt in a reasonable time, and in an orderly, certain way. We believe that if you want to fix it at 20 years, you should do so, or at 25 years or 30 years, but the American people ought to know definitely just how much is to be employed every year in the payment of our national debt; that you should not this year pile up new surpluses drawn from the taxpayers and put them into the sinking fund, and take the interest from the foreign debt and put it into the sinking fund, and pay off in some instances more than a billion dollars a year in retiring the Nation's debt.

Why is this, I ask? It is hard to believe, but people have their opinions. I have shown what the President of the United States has said, that he did not want to give tax reduction to the people in 1926, but wanted to apply the surplus to debt reduction. We have read what certain leaders on the other side said last year, that the surplus should be applied to debt reduction.

The Senator from Utah, as well as anyone else, knows how difficult it was to fund our foreign debt. You were a long time negotiating. The representatives of the foreign countries pointed out the fine economic condition of America. They pointed out their own depleted condition. They pointed to the huge debt burdens of those countries, and you, in return, among other things, said that you were not going to cancel the debts, because this country owed huge debts. The large amount of this Nation's debt entered into that negotiation, and was helpful in getting as good a debt-funding agreement as you did procure. There is no question about that.

The debt will be paid in 18 years if we apply the interest on foreign debts and the principal of foreign debts collected with the sinking-fund requirements of the present law. Billions of dollars to be paid by the American people within 18 years. If we pay according to the sinking-fund law, using no cent drawn from the taxpayers in building up a surplus, and not using the interest that comes from the foreign debt, amounting to $160,000,000, if we use just the sinking fund alone, we will pay the whole debt in 22 years. In 22 years, applying merely the sinking fund alone, as provided in the law, excluding interest on foreign debts, excluding surpluses that may be drawn from the taxpayers, we will get out of debt.

Mr. SMOOT. The Senator will probably make the correction, but for the RECORD permit me to say this: The Senator speaks of the amount provided under the law to extinguish the debt. That has reference only to the domestic debt.

Mr. HARRISON. We were to raise 2½ per cent of the aggregate amount of bonds and notes of this Government outstanding, less an amount equal to the par amount of obligations of foreign governments held by the United States. That is quite true.

Mr. SMOOT. But outside of that there will be billions of dollars that we owe, representing money that we loaned to foreign countries, and we have to pay that.

Mr. HARRISON. There is no difference between the Senator and myself on this proposition. Let me continue, and the Senator will see that there is no difference.

Mr. SMOOT. From what the Senator has already said, I think there is.

Mr. HARRISON. The law provided for 2½ per cent upon the outstanding indebtedness of this Government, less the amount the foreign Governments owed.

Mr. SMOOT. But this is the domestic debt; that is, it was money expended by us during the war and not advanced to foreign countries.

Mr. HARRISON. That is quite true.

Mr. SMOOT. It was $10,136,194,500.

Mr. HARRISON. That is absolutely right. The constant appropriation continually for the sinking fund is $253,000,000 plus.

Mr. SMOOT. Yes; but——

Mr. HARRISON. Let me finish this. There is no difference between the Senator and myself.

The aggregate of Liberty bonds and Victory notes outstanding July 1, 1920, was $19,000,000,000 plus. The amount of foreign obligations held by the United States July 1, 1920, was $9,000,000,000 plus. The basis of the sinking fund was $10,136,000,000 plus. Two and one-half per cent of this was $253,000,000. We thought at that time, of course, that the foreign Governments would at least pay the interest and would pay the principal and that we would get the money back. We held their notes. Nobody thought we would have to compromise in some instances on the basis of 27 cents on the dollar, but we did.

If we allow the sinking fund to remain as it is, as I have stated, at $253,000,000 a year, and take that amount and buy Government bonds, as is provided, and cancel them and let the interest continue to run, compounded, in 22 years we will have paid not only our domestic debt but the foreign debt as well.

Does the Senator combat that proposition?

Mr. SMOOT. I combat it so far as the 2½ per cent is concerned. The Senator limited his statement to that basis. We would have to pay all the principal owed by the foreign countries; we would have to pay all the interest owed by the foreign countries; and we would have then to pay the 2½ per cent.

Mr. HARRISON. That is all quite true, but we would pay it all in 22 years. If the Senator disputes that proposition—and will ask his own actuary about it—he will find that I am stating the fact.

Mr. OVERMAN. Mr. President, will the Senator from Mississippi yield to me?

Mr. HARRISON. Certainly.

Mr. OVERMAN. As I understand it, the Senator from Utah has said that we owe foreign Governments a billion dollars, which we will have to pay?

Mr. SMOOT. Oh, no. They borrowed billions of dollars from us, and if they do not pay the United States the United States will have to pay the bonds which we sold to get the money to give to those foreign countries.

Mr. OVERMAN. That is quite another question.

Mr. GERRY. Mr. President, will the Senator from Mississippi yield to me?

The PRESIDING OFFICER. Does the Senator from Mississippi yield to the Senator from Rhode Island?

Mr. HARRISON. I yield.

Mr. GERRY. I read briefly from the hearings before the Finance Committee as bearing on that point:

Senator SHORTRIDGE. How long would it take us to pay off the entire indebtedness under the present system, eliminating any application by the Treasury for the payment of that debt out of accumulated surplus, except as provided by legislation since the war?

The CHAIRMAN. You mean at the 2½ per cent?

Senator SHORTRIDGE. That is about what it amounts to.

Undersecretary MILLS. About 22 years.

Senator SHORTRIDGE. About 20 years?

The CHAIRMAN. Yes.

Undersecretary MILLS. I think it is about that. It certainly would not be before that.

Mr. HARRISON. There is no controversy about that.

Mr. SMOOT. None at all on that point.

Mr. HARRISON. By the employment of the sinking fund alone, not using the interest we collect annually, which is about $160,000,000, from the foreign debt, we will have paid off our domestic and foreign debt in 22 years. If we want to employ the interest that we collect to build up a sinking fund, that is all right, but let us follow some fixed rule. Let us have the American people know that within a certain period this debt is going to be liquidated. I have the idea—and many people in the country have the idea—that in 18 years we will owe nothing unless we get into another war, which God grant we never will. If we employ the interest and the principal and the sinking-fund requirements during that time, we will be clear out of debt.

Mr. SMOOT. And then we can reduce taxes.

Mr. HARRISON. What will then happen I do not know. Let us see! There is where the Senator has tripped into the trap. There is not a single government whose debt we have not funded, and we have given them 62 years to pay, that will not then be here at the doors of this Government asking for the cancellation of the debt at that time. The argument will be most appealing. The argument will not then lie in the mouth of the chairman of the Finance Committee, who was a member of the War Debt Commission, to say, "Oh, we can not. Look at our own condition. We are in debt. We are taxing the American people to pay off this debt." They would then say immediately in reply, "But you are out of debt. You have prosperity in America. It is a great, wonderful, wealthy country. On the contrary, our nation is poor. We are struggling. We are burdened with taxes. Although we have 42 years more in which to pay you the principal and interest, although you may have settled with us at 27 cents on the dollar, yet we ask you to cancel the debt."

Behind that request will move a great force, a great propaganda which will rise in America, and which will force this Government to cancel those debts. We have seen the effect, poisonous at times as it is, of foreign interests in this country working upon the public mind to get legislation favorable to them. But behind all this are groups made up of the sons and daughters who came from those countries, bringing their pressure to bear upon their Congressmen, upon their Senators, upon the President and others to get those debts canceled. There will be other powerful interests at work. I have cited what the President said about debt retirement and what the Secretary of the Treasury has said about it.

Mr. President, the Senator from Utah as well as the Senator from Pennsylvania will remember that there appeared before the Finance Committee of the Senate some two years ago, when the French debt-funding agreement was before it, Mr. Dwight Morrow. Mr. Morrow at that time was the dominating figure of Morgan & Co., an able man, an estimable gentleman, close chum and college friend of the President of the United States; the man who, it is said, the President seeks for counsel and advice, who sat closeted at times exchanging views with the President when the President would see none other save Dwight Morrow. It is said that the Secretary of the Treasury has been not only a great business friend of Dwight Morrow, but a social friend as well. It is known to everybody how close the Undersecretary of the Treasury, Ogden Mills, has been and is to Dwight Morrow. Mr. Morrow has been appointed by the President on numerous commissions to render high service. He has performed those services well, no doubt. He has recently been honored by being sent as ambassador to Mexico. It is said by his friends that he performed a task there that none other could, powerful man that he was and is.

There he was appearing before the Finance Committee as the dominating representative and figure of Morgan & Co. What was his testimony? I asked him the question if his firm had negotiated and sold any bonds of any foreign country in America within recent months. His answer was to the point:

Since the war we have placed loans of European nations as follows: One loan to Great Britain of $250,000,000 in 1919; six loans to Belgium, one of $25,000,000 in 1920, one of $50,000,000 in 1920, one of $3,000,000 in 1921, one of $30,000,000 in 1924, one of $50,000,000 in 1924, and one of $50,000,000 in 1925; one loan to Austria of $25,000,000 in 1923; two loans to Switzerland, one loan to Germany, and three loans to France, of $100,000,000 each.

There was also a $100,000,000 loan placed in this country by the Italian Government. He told in the testimony how his interests and other groups took those bonds, how they made the loans, how they had to get other institutions in New York to take them over. He said that they sold in some instances, in the case of the Italian bonds, for instance, at 88 cents. They have now gone down still further. As a matter of fact, it is said that they are not marketable now.

The bonds are in this country. The Austrian bonds, the French bonds, the Italian bonds, all the bonds of the foreign governments whom we have given 62 years in which to fund their debts to us, will have their representatives here crying aloud for their cancellation. When they are canceled what will happen? Every Italian bond, every French bond, every Austrian bond, every foreign bond sold by the Morgan interests, through Dwight Morrow and his associates, will be affected by the cancellation of the Governments' debts, and those private bonds will immediately take on new life and soar skyward. They will reach par. They will go above par. Who will be benefited? It will be the groups of interests which own the bonds that were sold by Dwight Morrow's firm. Is that the reason for this unyielding contention, this organized plan upon the part of men in high places to liquidate our foreign debt within such a short time? It behooves the American people to think, and if the Senator from Utah has not believed that, then he is more innocent than I think he is.

Mr. SMOOT. Mr. President, I want to say to the Senator that I think he knows my attitude in relation to the cancellation of foreign debts.

Mr. HARRISON. Yes; but the Senator and I might not be here in 18 or 20 years.

Mr. SMOOT. That may be true, too; and more than likely is true so far as I am concerned.

Mr. HARRISON. I hope the Senator will be here.

Mr. SMOOT. I want to say to the Senator that I have never thought of agreeing, I have never had an idea of agreeing, and I can truthfully say that I never shall agree to the cancellation of the foreign debts. They may not pay us, but the obligation will be there, so far as I am concerned, and will last just as long as time remains as far as any action of mine is concerned.

Mr. BRUCE. Mr. President, does the Senator mean to say that even after our domestic indebtedness has been disposed of the obligations on the part of other nations of the world to us must be paid?

Mr. SMOOT. Certainly.

Mr. BRUCE. Even then?

Mr. SMOOT. Why, yes. Why should we cancel the debts?

Mr. BRUCE. Even after we have not a single dollar of indebtness remaining unpaid we are still to collect?

Mr. SMOOT. Absolutely. There is an obligation existing there that is just as sacred as any obligation the Senator himself would make.

Mr. HARRISON. Mr. President, I merely desired to say what I have said, and I therefore yield the floor.

Mr. SMOOT. Mr. President, in connection with the suggestion of the Senator from Mississippi, there are less than 4,000,000 people in the United States who pay taxes at all. We have no greater number of taxpayers than that, and that number includes all the associations, individuals, and all the corporations in the country. Every reduction that is made by the paying off of our indebtedness, the cancellation of our obligations, means reduction of taxes. If what the Senator said should happen in 18 years, the interest alone at 3 per cent on $18,000,000,000 would be $540,000,000. We talk about tax reduction. That is the best way in the world to have tax reduction.

As far as the debts owing to the United States by foreign countries are concerned, I want to call the attention of the Senate to the fact that approximately half of those debts were made after the close of the war. The advances were made after the close of the war.

Mr. KING. Mr. President, will my colleague yield?

Mr. SMOOT. Certainly.

Mr. KING. I think the Senator ought to state, in connection with that last observation, that most of the advances made after the armistice were based upon commitments anterior to that time and largely to pay American dealers who had sold goods and supplies and munitions of war to the allied nations, and most of them were payments and advances from the Treasury that went into the pockets of American manufacturers.

Mr. SMOOT. So far as the statement of my colleague is concerned, I could bring the hearings before the Finance Committee and submit them to the Senate, showing that the Senator from Missouri [Mr. REED] called particular attention to the fact and stated that there was not a scintilla of law authorizing such advances. I am not complaining of that. I simply want to call it to the attention of the Senate. I merely called it to the attention of the Senate.

Mr. BRUCE and Mr. SHORTRIDGE addressed the Chair.

Mr. SMOOT. Just a moment. I know what was back of it all. We had been in the Great War; the foreign countries incurred these obligations; there is not any question about it; and, in order to save their own credit or what little they had left, America had to advance this money to them.

Mr. BRUCE. The Senator called attention to the fact that a part of this indebtedness was contracted after the close of the World War. I imagine, however, that even that part of the entire indebtedness that the Senator from Utah [Mr. KING] has suggested was on account of commitments made during the World War.

Mr. SMOOT. I will admit that some of it was, but not all of it.

Mr. BRUCE. And, of course, part of it must also have been made necessary by the calamities and distress, in one form and another, resulting from the World War.

Mr. SMOOT. I have no doubt of that.

Mr. BRUCE. Suppose the Senator is right in saying that we should not cancel any part of the foreign indebtedness contracted after the war——

Mr. SMOOT. I did not say "after the war." I said any part of the indebtedness due to this country by foreign nations for which we are holding their obligations to-day. I will say further to the Senator that there was one country—Italy—whose obligations to the United States amounted to about $2,000,000,000, which were settled on a 26 per cent basis. The proposition that we made to France was on a basis of about 50 per cent.

Mr. BRUCE. I understand that.

Mr. SMOOT. In fact, I was perfectly willing to give France every single dollar that was advanced to her up to November 11, 1918, the date of the armistice, and then let her pay just what we had advanced to her after that, and pay it at the lowest rate of interest borne by any of the bonds which we issued. France, however, did not accept that proposition. If that had been done, it would not have been more than 50 per cent on the dollar of the French obligations due the United States.

Mr. FLETCHER. The reduction the Senator mentions much more than covers what went out of the pockets of American manufacturers.

Mr. SMOOT. Certainly; the reduction that we offered them was more than all that went to the manufacturers.

Mr. BRUCE. The Senator says that no part of the entire foreign indebtedness due to us, as well that contracted during the World War as that contracted after the World War, should be canceled, even though our indebtedness arising out of the World War shall have been completely discharged. I ask, is that the Senator's position?

Mr. SMOOT. I will say to the Senate that my position is exactly as I have stated it. We have settled with England; we have settled with Italy; we have settled with a number of other countries, not a single one of them paying the full amount of their obligations. My position is that when this Nation has settled with a foreign country and the two have agreed upon the amount of the obligation owed to the United States, the foreign country ought to pay it in full. That is my position.

Mr. BRUCE. I wish to say that I do not agree with the Senator. It is perfectly proper that we should ask for these settlements, because our own indebtedness has been contracted and remains unpaid, but it does seem to me that after our entire indebtedness originating in the World War shall have been fully discharged it would be mean and ungenerous not to say a squalid thing for this country then not to cancel the entire balance of the foreign indebtedness that may remain.

Mr. FLETCHER. Discharged by taxing our own people.

Mr. SMOOT. Mr. President, that would be an invitation for the other nations to pay no more money when we shall have collected from our taxpayers a sufficient amount to pay the obligations of the United States.

Mr. BRUCE. Mr. President, as I look at it to-day—of course, I simply state my own point of view, though it is that of thousands of citizens of the United States besides—the only justification that we have for asking that our Allies in the World War pay any part of their indebtedness to us, incurred during the World War, is found in the fact that we ourselves incurred indebtedness on account of that war; but after this latter indebtedness is all paid off—as it will be, I presume, in 15 years or so—it does seem to me that it would be unworthy of this great, generous, magnanimous Nation of ours that we should still insist on the payment to the last farthing of the principal and interest of the war debts due us by foreign governments.

Mr. REED of Pennsylvania. Will the Senator permit me to ask him a question?

Mr. BRUCE. Certainly.

Mr. REED of Pennsylvania. I should like to know which of our distinguished colleagues is speaking for the Democratic Party? I understood the Senator from Mississippi [Mr. HARRISON] to denounce the very thought of cancellation of the debts and warn us that we were going to be exposed to foreign influence to that end, and now I understand the Senator from Maryland to denounce anyone, or disagree violently with anyone, who does not think the debts ought to be canceled the moment the American taxpayer has succeeded in paying off the Liberty bonds which raised the money that we loaned to foreign governments. I should like to know which is the orthodox Democratic doctrine?

Mr. BRUCE. To begin with, I do not feel that I am under any imperious obligation to square my political convictions with those of any Member of the Senate, whether he is a Democrat or a Republican. I will say to the Senator, as my old friend the late S. Teackle Wallis used to say of himself, that while I belong to the Democratic Party in the proper sense of that term, I do not belong to it in any servile sense whatsoever.

Mr. REED of Pennsylvania. I quite honor the Senator for that.

Mr. BRUCE. That may not be sound Pennsylvania politics but it is good Maryland politics.

Mr. REED of Pennsylvania. But I am interested in knowing whether the Senator in this instance speaks the sentiment of the Democratic Party or whether the sentiment of a majority of that party is expressed by the Senator from Mississippi [Mr. HARRISON].

Mr. BRUCE. I do not know whether I speak the sentiments of the Democratic Party as a whole or not, and under the circumstances I do not care. I only know that I speak the sentiments of many of my own Democratic constituents in the State of Maryland, some of whom—and among them several of the most distinguished citizens of that State—have from the beginning advocated the entire cancellation of our foreign indebtedness.

Mr. REED of Pennsylvania. Then, perhaps the Senator from Mississippi, who is a distinguished keynoter, will tell us whether he agrees with the Senator from Maryland.

Mr. HARRISON. Mr. President, I have just expressed at length my own position about this matter. We have voted upon the debt-funding agreements; and Senators, by their votes, certainly expressed their views. I had not supposed the Republican Party had passed on the proposition, certainly the Democratic Party has not done so, that when we shall have

paid off our national debt, then we will be in favor or against the cancellation of the debts due us by foreign governments. For my own part, if I shall have any influence and I am here at that time, I shall then oppose the cancellation of these debts, as I oppose now the too rapid liquidation of our national debt, because I do not want to see that idea encouraged and that day hastened.

Mr. REED of Pennsylvania. Mr. President——

Mr. BRUCE. I think I have the floor.

Mr. REED of Pennsylvania. The Senator from Mississippi and the Senator from Utah are in perfect accord in opposing the cancellation of the debts until the foreign governments that have given us their pledges have complied with them. I am glad to say that I agree with both those Senators.

Mr. BRUCE. Mr. President, I wish to say first of all that I do not see exactly how the Senator could regularly ask of me the privilege of interrupting me when I had the floor and then when I attempted to say something to him, being still upon my feet, deny me the privilege of interrupting him. That is rather an unusual parliamentary situation.

Mr. REED of Pennsylvania. Will the Senator yield to me?

Mr. BRUCE. Yes.

Mr. REED of Pennsylvania. I understood that the Senator from Utah had the floor and that when he yielded I was recognized. If I interrupted the Senator when he held the floor in his own right, I beg his pardon.

Mr. BRUCE. The Senator has been here——

Mr. BROOKHART. Mr. President, I should like to get a chance to ask the Senator from Mississippi a question before we get too far away from his speech.

The PRESIDING OFFICER (Mr. WATERMAN in the chair). Too many Senators are talking at the same time.

Mr. BRUCE. Mr. President, it is not my purpose to object to your ruling, but the Senator from Utah yielded the floor to me, and then the Senator from Pennsylvania asked me if I would not suspend what I was saying for a moment and I gave my consent and yielded.

Mr. BROOKHART. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Iowa?

Mr. BRUCE. Yes, I do, if the Senator from Utah no longer has the floor.

Mr. BROOKHART. I wish to ask two or three questions of the Senator from Mississippi. The Senator objects apparently to the payment of our national debt in 18 years. From his speech, as well as I can judge from it, he said that would be an evil which we ought to avoid.

Mr. HARRISON. The Senator correctly interpreted my speech.

Mr. BROOKHART. The Senator from Mississippi mentioned a tax on somebody to pay the national debt. I should like to ask him if the war profiteers and the campaign contributors will not pay most of the debt in 18 years?

Mr. HARRISON. I did not mean the Senator from Iowa.

Mr. BROOKHART. I do not suggest that there is anything personal to me in that claim, but it seemed to me to be one of the most ridiculous arguments I ever heard to oppose paying our debts.

Mr. HARRISON. I am complimented that——

Mr. BROOKHART. When the profiteers of the war are on hand to be taxed to pay it.

Mr. HARRISON. I am complimented that the Senator has that view about it.

Mr. BROOKHART. The Senator made an estimate of the surplus under the rates that he advocates. How much does he figure that surplus will be?

Mr. HARRISON. Under what rates?

Mr. BROOKHART. The rates the Senator has proposed.

Mr. HARRISON. We have not proposed any rates as yet.

Mr. BROOKHART. Well, the Senator and his colleagues will propose rates.

Mr. HARRISON. We will.

Mr. BROOKHART. There will be no surplus under the rates which you will propose, then?

Mr. HARRISON. The idea of the minority members of the Finance Committee is that the Treasury can easily absorb a reduction in taxes of approximately $325,000,000, and if we can have our way about it we will present a substitute for the provisions of this bill touching a reduction of the surplus. I do not care, however, to get into a discussion of that question at this time. We will discuss that later when the amendment is offered.

Mr. BROOKHART. I only care to discuss the general features of it myself. Does the estimate of the Senator and his colleagues include the expense of flood control?

Mr. HARRISON. I judge from the question the Senator propounds that he is not for any tax reduction at this time, but he is for the payment of the national debt.

Mr. BROOKHART. I say frankly that I would be in favor of increasing the taxes if they were put on the right parties.

Mr. HARRISON. I judge that is the Senator's view.

Mr. BROOKHART. I am not for tax reduction; but the Senator favors this flood-control bill?

Mr. HARRISON. Yes; very much so.

Mr. BROOKHART. And has he allowed, in the rates that he will propose, enough to pay that bill? Will that be included?

Mr. HARRISON. The Senator probably was not here when I stated that there was a surplus this year of something over $400,000,000 under the House bill.

Mr. BROOKHART. The Senator proposes to reduce that by $300,000,000?

Mr. HARRISON. The Senator did not let me finish my statement.

Mr. BRUCE. Mr. President, I believe I have the floor. The Senator from Iowa is now going off on a line that hardly justifies me in surrendering the floor to him any longer, though I do not want abruptly to cut him off.

Mr. BROOKHART. One or two more questions.

Mr. BRUCE. I am sorry, but I can not yield further.

The PRESIDING OFFICER. Does the Senator from Maryland yield further to the Senator from Iowa?

Mr. BRUCE. I can not submit to interruptions any longer.

Mr. HARRISON. I should be very glad to answer the questions.

Mr. BRUCE. In his own time the Senator from Iowa can ask his questions; but he is now asking questions that are entirely alien to the one point in which I am interested.

Before I take my seat I merely wish to say that there is nothing surprising even about the idea that the foreign debts due to us might well have been canceled long ago, because, as we all know, there is an urgent body of public opinion in this country, and of the most highly enlightened and disinterested character, which has advocated the entire cancellation of those debts.

I remind the Senator from Utah of the action recently taken by that group of learned men, consisting largely of university teachers, who certainly are among the finest exemplars of our best national ideals, who insisted in the most vigorous and eloquent terms that the war debts due us should be totally canceled. I say nothing of other American citizens outside of academic walks who cherish the same belief.

I have never gone that far. We ourselves contracted, on account of the World War, an indebtedness of very great magnitude, even when considered in the light of our own enormous pecuniary resources; so I have felt that our country did the right thing when it settled on the terms that it did with Great Britain, on the terms that it did with France, and on the terms that it did with Italy.

Mr. SMOOT. We have not settled with France yet.

Mr. BRUCE. That is true; we have not finally settled with France yet.

Mr. SMOOT. Mr. Clemenceau said the other day that they never would pay us a dollar.

Mr. BRUCE. I should have said Belgium, not France. The Senator, strictly speaking, is right, though, so far as the debt commissions of France and the United States are concerned they have arrived at an agreement which lacks only the ratification of the French legislative assembly to be effective. I approve the debt settlements that we have actually arrived at. I think that our country in entering into them came up to the proper level of generosity and magnanimity in every way, though I, for one, do regret that England, in her pride of character and what Edmund Burke once called that chastity of honor which feels a stain as though it were a wound, was not a little less reserved in imparting to us just what she really felt was the proper basis of compromise between her and us under the circumstances. However, as I have said, I approve those settlements. Nevertheless, it does seem to me that when their terms shall have been met down to the time when our own indebtedness incurred on account of the World War—shall have been paid off, then all foreign debts due to us, principal and interest, should be released.

The debtors were our allies and partners with us in a great adventure and a desperate struggle, and though essentially are by no means altogether mere ordinary debtors, I admit that we should not be too quick to accept the opinion of debtors themselves on that subject. The point of view of the debtor is always very different from that of the creditor, whether the debtor is a domestic or an international one; but the very fact that Clemenceau has just stated that not a solitary franc due

by France to the United States will ever be paid shows that in the hearts of the French people there is the feeling that after having taken—to use a plain, coarse phrase—potluck with them in the World War the relations between them and us as debtor and creditor are something just a little different from an ordinary transaction on Wall Street or the Paris Bourse.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Utah?

Mr. BRUCE. I do.

Mr. SMOOT. Suppose the American Government had not taken part in the war, and Germany had won the war, which she more than likely would have done if America had not gone into it, the Senator does not think for a moment that Germany would have been as liberal to France as the Government of the United States has been, does he?

Mr. BRUCE. No; because I have not forgotten that when Bismarck went down to Paris and exacted an indemnity of one milliard of the French people, and afterwards saw with what rapidity the French provided the funds for its payment, he declared grimly that the next time he went to Paris he would bleed France white.

Mr. SMOOT. The Senator is correct.

Mr. BRUCE. That is the Bismarckian, but it is not the American way.

Mr. SMOOT. Not at all.

Mr. BRUCE. Nor is it the German way when Germany is not controlled by a military aristocracy; but that was the Bismarck way.

Mr. SMOOT. But if America had not gone into the war, I think France and all of the other countries that were fighting Germany would have been bled white by this time and no leniency at all would have been exercised toward any of them, in my opinion. What I want America to do is to settle exactly as we settled before; that is, on the basis of capacity to pay. That is what we have done with every single country; and we have all of the debts settled now, with the exception of the debt of France.

Mr. BRUCE. Let me interrupt the Senator for a moment. I agree with him entirely. I think that France, as a matter of self-respect as well as a matter of what is due to us, should come up and enter into a settlement with us as those other European nations have; and I think that she is running the risk of exposing herself to the world as guilty of shabby conduct in not being as sensitive as she should be to her pecuniary obligations to us.

Mr. SMOOT. I want to call the Senator's attention to the fact that we included in the settlement with France not only what we advanced to her for war purposes, but she bought about $2,000,000,000 worth of material, and the amount she agreed to pay was $407,000,000——

Mr. BRUCE. I would not release her from a dollar of that—not one dollar—unless she can plead some equitable set-off arising out of the war which I can not think of at this moment.

Mr. SMOOT. And all that she has ever paid us is 5 per cent upon that amount, or $20,000,000 a year. That amount falls due some time this year or next, I do not know which. That is $407,000,000; and we were perfectly willing to put it in. We were perfectly willing to say, "We will settle with you at 50 cents on the dollar of that, and we are perfectly willing to extend the time of payment for 62 years"; and I do not think it was a very nice thing for Mr. Clemenceau to make the statement he did the other day that France would never pay America one penny.

Mr. SIMMONS. Mr. President——

The PRESIDING OFFICER (Mr. FESS in the chair). Does the Senator from Maryland yield to the Senator from North Carolina?

Mr. BRUCE. I am sorry, but I can not yield to the Senator at this time. I will be very glad to do so later. The Senator from Utah has opened up a train of reflection by what he has said, which is natural enough, as the Senator from Utah has a way of always speaking right to the point.

The Senator misunderstands me if he thinks that I have any disposition to reflect on our Foreign Debt Commission. Not at all. I think that they handled all their problems in an admirable manner; and I think that they not only handled them with due regard to everything that we as a people had a right to expect of them, but with a generous sense in every regard of what we owed to our debtors. I do not think that there is any fault to be found with the Italian settlement, or with the British settlement, or with the Belgian settlement, or with any other settlement into which they have entered, assuming that our treatment of Great Britain was quite as lenient as she had a right to expect. That is not the point; and I think, of course, that France should not be released from a single dollar of the indebtedness which she has incurred to us under circumstances that do not arise directly out of our war copartnership with her.

The only indebtedness that I have in view as proper for cancellation hereafter is that which was contracted by those foreign countries when we were carrying on the war in conjunction with them, as their allies and comrades, and were struggling as they were struggling for the preservation of human liberty and free institutions throughout the world, or as Wilson said, to make the world safe for Democracy.

Mr. FLETCHER. Mr. President, may I ask the Senator one question?

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Florida?

Mr. BRUCE. Yes; I will yield, but I promised first to yield to the Senator from North Carolina.

Mr. SIMMONS. No; I will wait.

Mr. FLETCHER. I just want to ask one question—whether the position the Senator takes now, that when our debts are all paid we ought to cancel all foreign obligations to us, is not an encouragement to countries like France, and particularly France, to hold out and say that they are not going to pay this debt, in the hope that eventually we will have discharged all our obligations, met all our bonds, and then the argument that the Senator makes will apply, that we ought to cancel the rest of them? Does he not encourage France in the position that she is taking now?

Mr. BRUCE. No; I do not. I think that the effect would be just the opposite. Then France would have a clear prospect of some limit of time at the end of which her obligation to continue to make payments to us would cease. It is my belief that such an outlook would rather stimulate than dull the disposition of the French to meet their present obligations to us. At least, that is one view that might reasonably be taken of the matter.

The Senator from North Carolina desired to interrupt me. I shall be very glad now to submit to an interruption.

Mr. SIMMONS. The Senator has passed from the point about which I desired to ask him.

Mr. BRUCE. I will go back to it.

Mr. SIMMONS. But I will ask the Senator from Maryland and I will ask the Senator from Utah if they believe that the recent utterances of Mr. Clemenceau reflect the sentiment of the French people and the French Government?

Mr. SMOOT. Does the Senator want me to answer first?

Mr. BRUCE. I do. I should like to have the Senator do so.

Mr. SMOOT. I will say frankly to the Senator that I think they do. I think so from the articles I have received and the letters I have received from individuals in France, men that I know are responsible men, men of the French Government who stand in positions of responsibility. I have come to the conclusion that that is the position of the French people—not every one of them; but, I mean, the great majority of the French people.

Mr. SIMMONS. Does the Senator think that is the position of the present French Government, as distinguished from the French people?

Mr. SMOOT. I could not say that, Mr. President. I do know, however, that in the payments that were made to our Government for last year—that is, the payment of $20,000,000 interest upon the $470,000,000 for goods purchased—the French Government paid that $20,000,000, as they have done ever since the contract was made, and the first payment that was made upon the debt itself was the $10,000,000, or approximately $10,000,000, that was added.

Mr. SIMMONS. That is, the war debt?

Mr. SMOOT. That went on to the war debt. So that under Premier Poincare there has been paid on the French debt, outside of the goods purchased, $10,000,000, and that is all.

Mr. SIMMONS. Does not the Senator think that is a committal, so far as the present French Government can commit the people of France?

Mr. SMOOT. It was at least an acknowledgment; and, if the Senator will remember, when the French settlement was made the payments on the French debt settlement included the $20,000,000, 5 per cent on the amount of purchases made, and in the first two or three years it was $32,500,000, then a few years at $35,000,000, and it increased very gradually, because of the fact that we wanted France to get into such a financial condition that she could stabilize her franc and stabilize her money. That is the reason the settlement made with her was a very much better settlement than was made with most any other country with the exception of Belgium. We allowed Belgium to settle all of the prearmistice debt without interest, providing that she should pay interest on the money advanced to her after the armistice was signed.

Mr. SIMMONS. Mr. President, I want to say, so far as I have any opinion about the matter, that I do not believe that Clemenceau's declaration correctly represents the attitude of the French people, as expressed in the position and attitude of its Government. I think it would be a very sad thing for the United States Senate, through the expression of its Members, t give currency to the idea that this country did accept Mr. Clemenceau's declaration as a finality.

Mr. SMOOT. The Senator does not think my statement is to that effect, so far as the American people are concerned?

Mr. SIMMONS. The Senator went as far as he could possibly go.

Mr. SMOOT. I based my statement on letters I have received, I based it on articles I have seen in the French papers, and I based it upon the statement of French citizens in this country with whom I have conversed. I have not seen a single one of them yet who would not say, "We think that debt ought to be canceled."

Mr. SIMMONS. Mr. President, of course, I think that the individual expression of Frenchmen in this country would be along the line just indicated by the Senator from Utah, but I have very great respect for the honor and integrity of the French people, and I believe, even if there is a tendency at this time toward what might be called repudiation of this just debt to us, the time will soon come when the good sense of that great nation will recognize its obligations to itself, as well as to this country, and its responsibility to make just payments upon that indebtedness. However, that was not what I rose to ask the Senator.

Mr. KING. Mr. President, before the Senator leaves that point, will he suffer an interruption?

Mr. SIMMONS. I do not want to have an expression of sentiment here on the floor of the Senate that would be equivalent to accepting this declaration of Mr. Clemenceau as representing the French Government.

Mr. KING. I want to suggest to my friend from North Carolina, as well as my friend from Virginia, that the recent elections in France support, in my view, the opinion just expressed by the Senator from North Carolina.

Mr. SIMMONS. I had that in mind when I made the statement.

Mr. KING. Poincare, it is known, has uniformly held that the debt must be met, that there must be some common ground upon which the United States and France can meet with a view to accommodating any possible misunderstanding that now arises. He has recently achieved a great political trumph, and comes back to the control of France stronger than before. He will have a more powerful majority in the Chamber of Deputies, as well as in the Senate, than in the past. I think that that indicates that an approachment will soon be made by Poincare to the United States Government with a view to making a settlement of the debt which is due from France to the United States.

Mr. SIMMONS. And that would be in entire harmony with his attitude in recent years.

Mr. KING. Yes.

Mr. GLASS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Maryland yield to the Senator from Virginia?

Mr. BRUCE. I yield.

Mr. GLASS. I would ask the privilege of propounding a question to the Senator from Utah in the time of the Senator from Maryland, as I am compelled to leave the Chamber.

Mr. BRUCE. I am delighted to yield to the Senator.

Mr. SIMMONS. I hope that will not end my interruption.

Mr. GLASS. I ask the Senator to pardon me.

Mr. SIMMONS. I yield, so far as my rights are concerned.

Mr. GLASS. I am told that the Senator from Utah in my absence from the Chamber made the statement that the greater part of the loans made by this Government to foreign governments were made after the armistice, and made without authority of law. I desire to ask if that statement is correct.

Mr. SMOOT. I stated that in the hearings before the Finance Committee the Senator from Missouri [Mr. REED] brought that question up, and it appeared that more money had been advanced after the armistice was signed than before the close of the war, I think to nearly all the countries; I do not know whether it was all of them, but the great majority of them, the larger ones. He took the position that that was done without any law authorizing it.

Mr. GLASS. The Senator from Utah does not make himself responsible for the statement?

Mr. SMOOT. I do not.

Mr. GLASS. As a matter of fact, it is not true. As a matter of fact, after the armistice, millions of dollars were paid to foreign nations, but in response to commitments already made.

Mr. SMOOT. That came out in the discussion.

Mr. GLASS. Not one single dollar was loaned to them, or paid to them, that was not fully warranted by the text of the bond acts passed by Congress. As a matter of fact, the Senator from Utah knows, or should know, that all of these bond acts provided that—

> For the purposes of this act the date of the termination of the war between the United States and the Imperial German Government shall be fixed by proclamation of the President of the United States.

And nobody will find that one dollar was ever paid out of the United States Treasury on account of foreign loans after the proclamation of the President of the United States terminating the war. So that every dollar loaned was loaned in response to textual requirements of the law.

Mr. SMOOT. What I stated before that was that there was more money advanced after November 11, 1918, than was advanced before that date.

Mr. GLASS. I can not say definitely, although I am sure that is not true; but I am sure very definitely that no dollar was loaned to a foreign nation that was not fully warranted by the text of some act of Congress.

Mr. SIMMONS. Mr. President, I had not finished my interruption. If the Senator from Maryland desires to go on, I will not interrupt now.

Mr. BRUCE. I yield.

Mr. SIMMONS. The Senator from Pennsylvania [Mr. REED] sought to give a political aspect to this matter of difference of opinion as to whether our foreign obligations should be canceled or not. I am under the impression that there are no party lines so far as this question is concerned, that there are Democrats and there are Republicans who believe that the debts should not be canceled now or at any time in the future, under any conditions that may arise in the future, except to the extent to which this Government may consent to a reduction of the indebtedness such as has been made to various nations but not to France.

Mr. SMOOT. We offered it to them.

Mr. SIMMONS. Yes; we offered it to them. There is another element in this country who believe that these debts ought to be canceled now, and who believe, with the Senator from Maryland, that they ought to be canceled anyhow whenever our domestic debt is canceled.

The great mass of the people, in my judgment, are against cancellation, but, as I understood the point made by the Senator from Mississippi, his contention is that there is a powerful element in this country who would be glad to see the debt canceled now, and if it can not be canceled now would be glad to see it canceled when we pay our domestic debt, and that the position of many of them with respect to this is a selfish one, which grows out of large loans that have been made, and that the great financial interests in this country are connected with this loan.

The Secretary of the Treasury believes that, I imagine. Probably the subordinates who represent the Secretary believe it. As I understand, the Senator from Maryland is reflecting that view.

The Senator from Mississippi made the argument that the great source of this clamor for the quick payment of our domestic indebtedness was these very interests that have become so much involved in European finances, in the hope that as soon as this debt of ours is forgiven they will have first claim upon the foreign countries for their obligations, and that the result of that would be the advancement of the price and value of their securities. That is the position he was taking. He was insisting that not only the European Governments would like to have this quick payment of our domestic debt, in the hope of getting a cancellation of their debts at the time of its payment, but he insisted that there are big interests in this country that are insisting upon the same policy, that of quick payment of our indebtedness for this purpose.

He was combating that theory as not being in the interest of the American people, but in the interest of a small coterie of American financiers and capitalists, as not being urged by the American people as a whole, or by a majority of the American people, but by a small body interested in the advancement of the price of their securities, and an increase in the security which they would have for the payment of their debt, by wiping off the first lien, which is held by the United States.

I agree with the Senator from Maryland that he does not stand alone. There are a great many people who have no interest in the cancellation of foreign securities who agree with the Senator from Maryland, those professors to whom he has referred, and a great many who are not professors.

Mr. BORAH. Mr. President——

Mr. BRUCE. I yield to the Senator from Idaho.

Mr. BORAH. I want to ask a question of the Senator from North Carolina. Has the Committee on Finance ever undertaken to make any investigation of the activities of those who are seeking to have cancellation of the foreign debt?

Mr. SIMMONS. None that I know of. I admit that the Senator's view represents a very respectable element of people in this country who are not interested in the selfish way that I have described, but I believe that the main pressure of propaganda that has heretofore existed in favor of the cancellation of this debt and the propaganda that will come as soon as our debt is paid off, to cancel the balance of the obligations due us from foreign governments, has come and will come largely from men who are interested in having our foreign indebtedness forgiven because of the loans they have made to those countries. But I do dissent from the idea that there are any partisan lines upon the question. I think most of the Republicans of the country are opposed to cancellation. I think most of the people of the country who are Democrats are opposed to cancellation.

Mr. WALSH of Massachusetts. Mr. President, does the Senator know that the Republican Party, in its platform of 1926 and 1924, declared against cancellation?

Mr. SIMMONS. No; but I supposed, of course, they did, and I supposed the Democratic Party is against cancellation.

Mr. WALSH of Massachusetts. I find, on examining its platform, that the Democratic Party has not taken any position with reference to cancellation.

Mr. SIMMONS. But I do know that in many States the Democratic Party has taken a stand against it.

Mr. BRUCE. Mr. President, I bear witness to the fact that that is the position which the Senator from Pennsylvania [Mr. REED] has always taken in regard to the controversy. I recall the fact that on one occasion before any settlements were arrived at between the United States and any of our debtors he declared with no little vehemence, not to say heat, upon the floor of the Senate, that the American people were fixedly determined not to cancel one red cent owed us by these debtors.

Mr. REED of Pennsylvania. To the limit of their capacity.

Mr. BRUCE. Though I admit that the memory is a treacherous organ, yet the words of the Senator left the indelible impression on my mind that the Senator did not annex any qualification to his statement that those foreign countries might as well surrender all thought of indulgence on our part, because we would never relieve any of them from one red cent of the indebtedness due us by them.

Mr. REED of Pennsylvania. If the Senator will permit an interruption——

Mr. BRUCE. Certainly.

Mr. REED of Pennsylvania. I think the nature of the case establishes that qualification. No sane man expects them to pay beyond their capacity to pay.

Mr. BRUCE. At that time the Senator's attitude seemed to be that they had unlimited capacity to pay, that they had some sort of Fortunatus's purse or Aladdin's lamp, which would enable them to produce any amount of money that might be necessary for the liquidation of their indebtedness to us.

Mr. REED of Pennsylvania. I am diffident about interrupting the Senator, but perhaps he is willing to have it a colloquy. I think when we remember that in no case, except possibly the case of Great Britain, does the sum we are asking them to pay amount to so much as 5 per cent of what they are now spending on the maintenance of their armies and navies, it must be admitted that we are not extravagant in our request.

Mr. BRUCE. Yes; but they are spending that money largely because the United States of America will not do its duty and become a member of the World Court and the League of Nations and aid them in preserving the peace of the world. There is nothing surprising to me in the fact that the face of the Senator from Pennsylvania wore a peculiarly skeptical look when I suggested the idea that at some time in the future, when our own indebtedness arising out of the World War shall have been paid off, we might, as a matter of international generosity and good feeling, release all those foreign debts. I am bound to say that I am somewhat disappointed myself as to France because it was perhaps during the debate, when the Senator from Pennsylvania made his unyielding declaration, that I took up the cudgels for France and expressed my opinion that with just a little indulgence from us she would in due time place her head alongside of ours and reach a settlement with us that would be satisfactory to both countries.

At any rate, during the discussion to which I am referring I took the position that we should at least release France from a sufficient amount of her indebtedness to constitute some sort of equivalent for the large sums of money which she had given to us, in addition to the sums of money that she had loaned to us, when we were struggling, with her aid, for our national independence. I was the first person in this body—indeed, I was the first person in Congress, I think, to express the hope that we might be peculiarly generous in our relations as a creditor to France; and I am happy to say that in many different ways—though I was looking for nothing of the sort—I have received highly gratifying evidences of the sensibility on the part of the French people to the position which I took at that time, both in the form of letters and newspaper clippings and in the form of what was said to me orally when I happened to be abroad last year. I can only affirm that what I said I spoke from my heart. Of all the countries in the world there is not one to which we owe such a debt of gratitude as we owe to France.

Mr. REED of Pennsylvania. Mr. President, if the Senator will permit me——

Mr. BRUCE. Certainly.

Mr. REED of Pennsylvania. I myself have not been loath to speak in favor of the French position from time to time when I thought they were right. But when the Senator suggests that we ought to forgive a part of this debt in recognition of aid which France advanced to us during the Revolutionary War, surely he does not forget that although France, under Louis XVI, was one of the great countries of the world, she did not scruple to take from this country payment of every last red farthing of the debt that we owed to her which she had advanced to us in our distress.

Mr. BRUCE. I know, however, that she was a most generous, indulgent creditor. The Senator will recollect that the debt due by us to her was, in part at least, extended for a considerable time before it was finally funded; and she certainly released us from a part of the interest due her by us.

Mr. REED of Pennsylvania. She released us from interest down to 1783 when the treaty of peace was signed, and from then on we paid the interest.

Mr. BRUCE. That is, I think, a correct statement of the facts, but what I had in mind especially was the certainty that France not only made loans to us during the American Revolution but made splendid gifts. I shall never forget that on one occasion, when Benjamin Franklin went to the French minister to ask for a loan, the reply of the minister was, "No; we will not loan you the money. You have a hard campaign ahead of you in the South. You will need all your own resources of every sort to maintain yourself. My king is not willing to make a loan to you, but he will make a gift of the money to you," and he made it.

Mr. BORAH. The Senator ought to state the balance of it. The French minister in substance stated "We can not make a loan at this time because we do not want it known that we are having any part in this controversy."

Mr. BRUCE. No; that was later.

Mr. BORAH. Oh, no; it was not later. If the Senator will look at the record he will find that it was not later.

Mr. BRUCE. I think the Senator is mistaken. I had occasion once to say, in connection with some statement that the Senator made with reference to this matter, that there is such a thing as impromptu eloquence, but there is no such thing as impromptu history.

Mr. BORAH. That is what I am objecting to now.

Mr. BRUCE. My recollection is that the Senator made some statements of that kind at that time with regard to the transaction to which I have referred that were afterwards corrected by that learned don, Dr. John H. Latane, of Johns Hopkins University.

Mr. BORAH. I read his corrections, but I have also read history and I was stating an historic fact.

Mr. BRUCE. The Senator agreed with the corrections?

Mr. BORAH. No; I did not correct him. I stated the historic facts and now undertake to say that the only gifts which were made were made at the time when it was not thought safe to make a loan because it would identify France with the United States.

Mr. BRUCE. The Senator takes issue again with regard to that. The loan I am speaking of was not a loan made at the

time that Beaumarchais was carrying on his commercial operations, but at a later time.

Mr. BORAH. How much was that generous gift?

Mr. BRUCE. It was in those days considered a very great gift.

Mr. SMOOT. It was about a million dollars. I have a statement of every loan that was made and how it was made.

Mr. BRUCE. I forget the exact amount of it. I do not risk at this moment any statement as to its amount, but it was for that time a very great gift and was most gratefully received by our people; so gratefully that it was one of the things that made Benjamin Franklin say, when he was leaving the shores of France, that the American people would never forget their obligations to France.

So, as I said, we owe to France a measure of consideration such as we owe to no other people. All of us should be prepared to say of the French very much what Franklin himself said of them on one occasion. After making some observation he added, "The truth is that I love the French and the French love me." That has with brief interruptions always been our attitude toward France; that we loved the French and that they loved us, and I trust that the time will come when those delightful relations between the two countries will be completely restored.

What I am disappointed about in France, and I should not be the good friend of hers that I am if I did not state it, is that she has not paid as I see it the punctilious regard to her obligations as a nation to us that she should have paid. I think that we were disposed, in the persons of our Debt Commission, to be just as generous to her as she had any right to expect, indeed, perhaps, more generous than she had any right to expect, I think that it has not at all inured to her international credit that she should have been as dilatory—as faltering—as she has been with respect to her pecuniary obligations to us, and I fervently trust that the new political régime in France will commit itself to a different policy from that which has prevailed recently.

The Senator from North Carolina [Mr. SIMMONS] and the Senator from Mississippi [Mr. HARRISON] in their remarks have revealed the idea that there are selfish motives back of this desire on the part of a large portion of the American people that the foreign debts due us should be canceled.

Mr. SIMMONS. The Senator did not understand me to express any such view, did he?

Mr. BRUCE. I know that the Senator did not. He expressly disclaimed it. I have no exception to take to anything that the Senator said. We know that all human motives, individual, national, or international, are an amalgam of selfishness and unselfishness. The motives that took us into the World War were partly selfish and partly unselfish. There could be no grosser injustice than to say that they were wholly selfish; it would be nothing but a foul slander upon our people to affirm that; but they were partly selfish; that is to say, selfish so far as they arose out of natural instincts of self-preservation, and they were in part gloriously unselfish; that is to say, inspired by the genius of our institutions, by our love of liberty, by our devotion to those distinctive principles which have made our country so prosperous, so great, and so renowned; but if there is any selfishness at work in connection with the idea that the indebtedness due by France to us should be released now or hereafter, I say that it is of very limited operation. Of course, there are many sagacious business men in our country—the Secretary of the Treasury, if I am not mistaken, is one—who have always believed from the beginning that, just as an individual creditor sometimes gains by being indulgent with his individual debtor, so the United States of America, in a merely material sense, might gain more by being generous than by being a harsh creditor to our foreign debtors.

There is much to be said for that view. Often, of course, it is the broad view that is the wise view. Undeniably there is a vast volume of disinterested public opinion existing in this country which holds that those debts should be released. It is not asserting itself now, because the matter is practically settled for the present by the debt settlements into which we have entered.

Mr. SIMMONS. Mr. President, may I interrupt the Senator from Maryland?

Mr. BRUCE. Yes.

Mr. SIMMONS. The Senator spoke about the Secretary of the Treasury a few moments ago. I know, of course, the Secretary of the Treasury was in favor of a speedy liquidation of our domestic debt; but I want to ask the Senator from Maryland if he meant to state or to imply a minute or two ago that the Secretary of the Treasury was now in favor of a cancellation of the foreign indebtedness?

Mr. BRUCE. No; not at all. There is no warrant so far as I know for any such idea.

Mr. SIMMONS. Is the Secretary of the Treasury in favor of such cancellation after our domestic debt shall have been paid?

Mr. BRUCE. No; I have never heard that he entertained any such idea as that; but it is a fact, as the Senator from North Carolina will probably recall, that in one of his interesting papers the Secretary of the Treasury did express the opinion that often, merely as a matter of selfish policy, it is better to be generous with your debtor than too exacting; at least, that is my recollection at this moment. As I have stated, there is a great body of disinterested public opinion in the United States which for a time declared in the most unequivocal terms that there should be a cancellation of those debts; and it is perfectly idle to try to belittle the character of the men who voiced that opinion, because they are among the ablest, the most high-minded, the most useful, the most influential, and the most conspicuous citizens of our country. I am not speaking merely of the circle of learned men connected with our universities who came out in a pronouncement on the subject not very long ago, but I am speaking of thousands of Americans not so conspicuous throughout the length and breadth of our land. In the community in which I live, for instance, I recall the fact that one of the most distinguished of our judges in the city of Baltimore, the Hon. Alfred S. Niles, expressed in a public way the belief that there should be a total cancellation of the foreign debts due us.

He was followed or preceded—I forget which—by Mr. William L. Marbury, who, if not the leader, is among the most distinguished leaders of the Maryland bar. Mr. Marbury took exactly the same position as Judge Niles. My recollection is that the same policy was advocated by the Manufacturers Record, of Baltimore, which is so well known throughout the South and, indeed, in every State of the Union, for that matter. All this now belongs to the past, but I think that there is nothing visionary, nothing speculative, nothing beyond the domain of practical politics in my saying that when our own indebtedness arising out of the World War shall have been extinguished it would be the generous, the magnanimous, the wise, and the proper thing in every respect for this country to cancel all the foreign debts due it.

Of course, if in the meantime France does not arrive at a reasonable basis of settlement with us we should ignore her, but even if she is not fully alive now to what is due to her reputation as a nation it is to be hoped that by that time she will have been fully so and will have entered into a settlement with us that would also then come to an end.

Such are my views. They may be limited to me so far as the United States Senate is concerned, but I not only entertain them but entertain them most strongly.

I have been really discussing what lawyers call a moot question. In no event can the debts due us be paid off under 15 or 18 years from now; and I rather imagine that by that time I shall be paying an individual debt which is of far more consequence to me in a purely personal, selfish sense than any debt that is due by France to the United States. I shall then doubtless have gone where, as the Greeks said, "the most" are. Still, I trust that I may be pardoned for lifting the veil of futurity just a little.

Mr. TYDINGS. Mr. President——

Mr. BRUCE. I yield to my colleague.

Mr. TYDINGS. I ask unanimous consent to have printed in the RECORD, in connection with the foreign-debt discussion, a table which I have prepared showing all the countries of the world, the amount of their defense expenditures for 1927, the amount of foreign securities publicly offered in the United States, the relation which the defense expenditures bear to those securities, the population of the country, the standing armies of each country, showing the men in them and the proportion of men in the standing army to the whole population, the number of reserve forces and the proportion of reserves to the whole population, the total organized forces of the country and their percentage of the total population, also the additional unorganized man power of those countries, and some other information which the table itself will explain, as being worthy, I think, of the attention of the Senate in connection with this matter.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The table referred to is as follows:

*Table showing United States loans to nations of the world and the relation of these loans to their defense expenditures and military establishments*

By MILLARD E. TYDINGS

| Country | Defense expenditures, 1927 | Foreign securities publicly offered in the United States, 1927 | | Population | Active army | | | Reserve forces | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | | Amount | Per cent of defense expenditures to loans | | Number | Population | | Number | Population | |
| | | | | | | Per cent | One out of each— | | Per cent | One out of each— |
| Albania | $1,840,000 | | | 850,000 | 11,469 | 1.35 | 74 | | | |
| Argentina | 44,771,000 | $99,561,000 | 222 | 10,087,118 | 33,790 | .33 | 300 | 290,000 | 2.87 | 35 |
| Austria | 11,220,000 | 33,887,000 | 302 | 6,535,365 | 32,704 | .50 | 200 | (1) | (1) | |
| Bavaria | | | | 7,379,594 | | | | | | |
| Belgium | 22,729,000 | 14,130,000 | 62 | 7,874,600 | 71,790 | .90 | 111 | 689,683 | 8.80 | 12 |
